1.0 Scope

This Version Description Document (VDD) contains a functional description of the M1 system, all modules in this release identified by version number, a set of build instructions, installation procedures, identification of any known problems, release notes and any essential data relationships that are part of this 22 December 1992 release of the BDS-D M1 1.0.0.

1.1 Identification

This VDD defines the 22 December 1992 initial release of the M1 simulator, release version BDS-D M1 1.0.0.

1.2 System Overview

Soldier in the loop simulators exist at the Aviation Test Bed (AVTB) located at Ft. Rucker, Alabama and the Close Combat Test Bed (CCTB) located at Ft. Knox, Kentucky. The simulators include Rotary Wing Aircraft (RWA, only at Ft. Rucker), M1 tanks, Bradley Fighting Vehicles, Fixed Wing Aircraft (FWA), a Management, Command and Control system (MCC), Non Line of Sight vehicle (NLOS, located at Ft. Knox only), and, finally, a Semi-Automated Forces system (SAFOR). The M1 provides major enhancements to the next generation of M1 tank simulations and develops reconfigurable simulators with improved visuals, sensor models.

1.3 Document Overview

This document was prepared in accordance with DID DI-MCCR-80013A of DOD-STD-2167A and defines the 22 December 1992 release of the M1 software, Version BDS-D M1 1.0.0. This release contains the initial software capture of the M1 6.6.1.

2.0 Referenced Documents

2.1 Government Documents

DI-MCCR-80013A	Version Description Document, 29 February 1988
DOD-STD-2167A	Defense System Software Development, 29 February 1988

2.2 Non-Government Documents

ADST/WDL/TR--92-00640-YR1 28 October 1992	Advanced Distributed Simulation Technology System Definition Document
ADST/WDL/TR--92-003023 15 January 1993	ADST Configuration Management Plan
ADST/WDL/TR--92-003033 22 December 1992	M1 Coldstart Procedures

3.0 Version Description

Version BDS-D M1 1.0.0 of the M1 tank simulator is to be installed at Fort Knox, Kentucky.

3.1 Inventory of Materials Released

Listed below is the physical media and support documentation required to build, load and operate the M1 system. The M1 release version BDS-D M1 1.0.0 consists of all the source code needed to build the system, executable and data files required to run the system and GTOS 4.7 operating system.

Type	ID No.	Title
DC 6150 Tape		BDS-D M1 1.0.0 Initial 6.6.1 T/O GTOS 4.7 Operating System
Document	ADST/WDL/TR--92-003033	M1 Coldstart Procedures
Document	ADST/WDL/TR--92-003032	BDS-D M1 1.0.0 VDD

3.2 Inventory of CSCI Contents

Appendix A provides a listing of all M1 CSCI source files which were used to create release BDS-D M1 1.0.0. All source files reside on the Configuration Management and Control Sun Sparc workstation and are configuration controlled using the Revision Control System (RCS).

3.3 Changes installed

This release of the version BDS-D M1 1.0.0 captures the M1 SIMNET 6.6.1 software product baseline.

3.4 Adaptation Data

Adaptation data is contained in human editable files, which allow modification to the motion model and weapons system.

3.5 Coldstart Procedures

The separate M1 Cold Start Procedures, document no. ADST/WDL/TR--92-003033, provides detailed cold start instructions for the BDS-D M1 1.0.0 release.

3.6 Build and Distribution Instructions

GT based M1 Build Procedure

1) Log into the development system and create a directory named "gt".

2) Install BBN Tape #9 into the tape drive.

3) Load the tape into the directory tree at the user_root level:
"tar xvpf /dev/rst0".

4) Change to the gt directory:
"cd $HOME/gt".

5) Protect the make.config file in the Common tree:
```
pushd common/tools
chmod 0444 make.config
```

6) Remove all RCS and xRCS symbolic links from the tree branches:
```
foreach i ('find . -name RCS -print')
rm $i
end
foreach i ('find . -name xRCS -print')
rm $i
end
```

7) Change TOPDIR and GT variables in make.config so they point to the correct locations:
```
chmod +w make.config
vi or emacs make.config
(example: change TOPDIR = /release_6_6_1 to $(HOME)/gt)
(example: change GT = gtos4.7 to $(HOME)/gt4.7)
```

8) Add write privilege to all .a,.o, and .sym files (and remove them for a full build):
```
foreach i ('find . -name "*.a" -print')
chmod +w $i
rm $i
end
foreach i ('find . -name "*.o" -print')
chmod +w $i
rm $i
end
foreach i ('find . -name "*.sym" -print')
chmod +w $i
rm $i
end
```

9) Bring all source files up to date in order to do a full build:
```
foreach i ('find . -name "*.c" -print')
touch $i
end
```

10) Change to M1 common directory:
"cd $HOME/gt/common".

11) Move header files from individual directories to common/include:
```
make headers
```

12) Build libraries:
```
make install
```

Now, perform the above for the Simnet tree. The procedure is similar, but contains some differences.

13) Change to the M1 simnet directory:
"cd $HOME/gt/simnet".

14) Protect the make.config file in the simnet tree:
```
chmod 0444 make.config
```

15) Remove all RCS and xRCS symbolic links from the tree branches:
```
foreach i ('find . -name RCS -print')
rm $i
end
foreach i ('find . -name xRCS -print')
rm $i
end
```

16) Change TOPDIR and GT variables in make.config so they point to the correct locations:
```
chmod +w make.config
vi or emacs make.config
(example: change TOPDIR = /release_6_6_1 to $(HOME)/gt)
(example: change GT = gtos4.7 to $(HOME)/gt4.7)
```

17) Add write privilege to all .a,.o,.c and .sym files:
```
foreach i ('find . -name "*.a" -print')
chmod +w $i
rm $i
end
foreach i ('find . -name "*.o" -print')
chmod +w $i
rm $i
end
foreach i ('find . -name "*.sym" -print')
chmod +w $i
rm $i
end
```

18) Bring all source files up to date in order to do a full build:
```
foreach i ('find . -name "*.c" -print')
touch $i
end
```

19) Change to libsrc directory:
```
"cd libsrc".
```

20) Move header files from individual directories to simnet/include and build libraries in simnet/libsrc tree:

```
foreach i (*)
cd $i
pwd
make headers
cd ..
end
foreach i (*)
cd $i
pwd
make install
cd ..
end
```

21) Move header files from individual directories to simnet/vehicle/include and build libraries in the simnet/vehicle/libsrc directory tree:

```
cd ../vehicle/libsrc
foreach i (*)
cd $i
pwd
make headers
cd ..
end
foreach i (*)
cd $i
pwd
make install
cd ..
end
```

22) Build the executable "m1":

```
cd ../m1/src
make
```

3.7 Regression Test Results

No formal written regression test procedures are available for this release.

3.8 Release Notes

3.8.1 BDS-D M1 Software Release Notes

No release notes available for the BDS-D M1 1.0.0 application software initial release.

3.8.2 GTOS4.7 Operating System Software Release Notes

Appendix B contains the GTOS4.7 Operating System software release notes prepared by BBN Systems and Technologies Corporation.

3.9 Interface Compatibility

The BDS-D M1 1.0.0 release remains compatible with the SIMNET interface.

3.10 Bibliography

Management, Command and Control System (MCC) Operations Documentation
Report No. IEITR-74563; 15 March 1990.

3.11 Summary of Changes

Initial release. No summary of changes to baseline are available.

3.12 Installation Instructions

GT-111 based M1 Installation Procedure

1) Format the disk in which it is to be installed.

2) Install GT system software (Reference GTOS4.7 release notes.)

3) From root, tar M1 application delivery tape onto the prepared disk.

4) mkdir /simnet/db & tar databases into this directory.

5) Set boot string:

```
gt0> shutdown
147-Bug> ab <cr>
147-Bug> <cr>
147-Bug> <cr>

default string> ip0:A:GTOS4.7:/boot0.m1
              > <cr>
              > reset
              > y
              > <cr>
              > y
```

6) Create /simnet/data/assoc.def
   site3
   host 74

7) modify /simnet/vehicle/m1/data/textures.m1 to load subsystems 0 and 1.

8) Change m1vconfig.d, use m1vconfig.111 as starter.

9) Change m1_pars.?? : (Note: Where "??" is the actual filename)
   - subsystems 2
   - add extra database and texture line

10) Calibrate simulator.

3.13 Possible Problems and Known Errors

The following SP/CRs are currently open against the BDS-D M1 1.0.0. release. See Appendix C for copies of these SPRs with descriptions.

SP/CR #	Title
3	Unable to modify ballistic table structure on CIG HOST
8	Different Subsystem IDs in GT-101 and GT-111
33	M1 Autoloader Timing is too fast
34	GT-101 and GT-111 Incompatability for m1_cig.c
35	Sabot munition damage does not degrade with range
36	Remove STATIC from veh)impact_me function

4.0 Notes

The following is a list of acronyms used in this document.

ADST	Advanced Distributed Simulation Technology
AVTB	Aviation Test Bed
BBN	Bolt, Beranek, & Newman
CCTB	Close Combat Test Bed
FWA	Fixed Wing Aircraft
MCC	Management, Command and Control system
NLOS	Non Line of Sight
RWA	Rotary Wing Aircraft
SAFOR	Semi-Automated Forces system
SP/CRs	Software Problem/Change Reports
VDD	Version Description Document
