13. ABSTRACT (Maximum 200 words) This report identifies approved clinical research activities conducted at Walter Reed Army Medical Center through protocols approved by the Clinical Investigation Committee, the Human Use Committee/Institutional Review Board, and/or the Animal Use Committee, as appropriate. This report includes a Detail Summary Sheet outlining the progress of each protocol during Fiscal Year 93. Also included is a list of all known presentations and publications related to approved studies, as well as those not related to approved clinical investigation protocols. All research was conducted under the provisions of AR 40-38 (Clinical Investigation Program), AR 40-7 (Use of Investigational Drugs in Humans and the Use of Schedule I Controlled Drug Substances), AR 70-25 (Use of Volunteers as Subjects of Research), HSC Reg 40-23 (Management of Clinical Investigations, Protocols, and Reports), and AR 70-18 (The Use of Animals in DOD Programs).

F O R W A R D

The Annual Progress Report (APR) documents the continuing review during FY-93 of research approved by the Clinical Investigation Committee (CIC), the Animal Use Committee (AUC), and the Human Use Committee/Institutional Review Board (HUC/IRB) of Walter Reed Army Medical Center (WRAMC). The review of each research protocol is initiated by the Department of Clinical Investigation (DCI) on the anniversary month of its approval. At that time, a request is sent to the principal investigator for submission of a progress report. The completed report consists of a detail summary sheet (DSS), a copy of the approved consent form, and a questionnaire regarding the continuing review of human subject participation or animal use. Members of the HUC/IRB or AUC review the progress reports throughout the year, and one of the following recommendations is made: 1) approval, 2) request additional information, or 3) request termination of the protocol. The members' recommendations are presented monthly to the HUC/IRB or AUC for final approval. The approved detail summary sheets of 551 protocols are included in this document.

The FY-93 APR process at WRAMC was administered by the Editorial Office, Research Administration Service, Department of Clinical Investigation, in coordination with the Research Review Service.

I . U N I T S U M M A R Y

A. OBJECTIVE

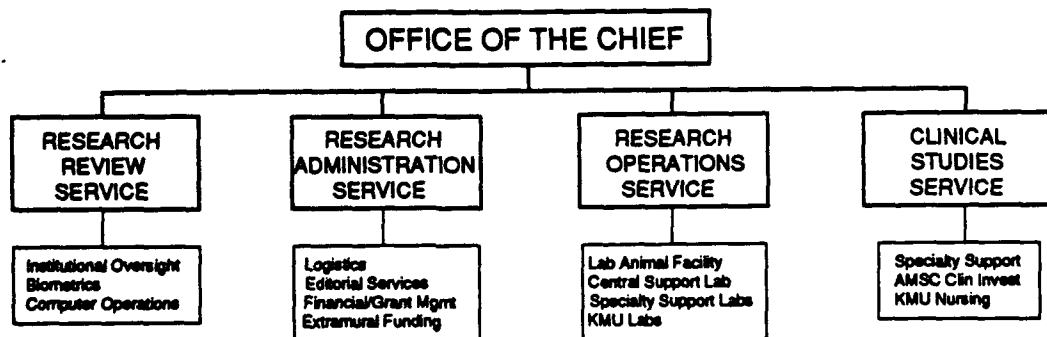

To implement and manage the clinical investigation program at Walter Reed Army Medical Center (WRAMC) by promoting, supporting, coordinating, planning, conducting, and publishing ethical, scientific inquiry into clinical health problems of beneficiaries of the military health care system, to include studies in humans and animals.

B. TECHNICAL APPROACH

The clinical investigation program at WRAMC is conducted in accordance with the following:

AR 40-7	Use of Investigational Drugs in Humans and the Use of Schedule I Controlled Drug Substances
AR 40-38	Clinical Investigation Program
AR 70-18	The Use of Animals in DOD Programs
TB MED 525	Control of Hazards to Health from Ionizing Radiation Used by the Army Medical Department
HSC 40-23	Management of Clinical Investigation Protocols and Reports
WRAMC 70-1	Clinical Investigation Program, WRAMC Research Activities
45 CFR 46	Protection of Human Subjects
21 CFR A,D,& F	Food and Drug Administration

C. ORGANIZATION SCHEME

D. DCI STAFF [Positions as of 30 September 1993; suffix (G) reflects grant-funded employees]

Because of severe budget restraints, the Department of Clinical Investigation was not permitted to replace civilian employees when positions were vacated. This resulted in a decrease of 4 WRAMC-funded civilian employees, from 51 to 47. Grant-funded civilian employees remained at 16. DCI had a net gain of 1 officer and 3 enlisted personnel, from 4 to 5 and 7 to 10, respectively. The total of 78 assigned personnel remains at last year's record high. In August 1993, the Research Operations Service welcomed a new Chief, LTC Daryl J. Kelly, MS. CPT Beverly D. Patton, SP, joined the staff in January 1993 as Chief, Nutrition Care, Kyle Metabolic Unit. More than \$113,000 in extramural funding was obtained from the National Institutes of Health to support research being conducted in the Research Section, Army Audiology and Speech Center. Most of these monies were used to fund two Ph.D.-level researcher positions. The Clinical Studies Service was

established as part of a reorganization of the Department's TDA to prepare for the pending downsizing.

F. RESEARCH ACTIVITY

1. Accomplished in FY-93

With the mission to empower WRAMC researchers from planning to publication, the Department of Clinical Investigation (DCI) supported a record total of 717 active protocols this year (Table I). Twenty-three percent (166) of these studies were newly approved during the fiscal year, leaving 556 ongoing for at least one year that are summarized in this report. Medical Corps officers at WRAMC were principal investigators of 79% of the investigations. Medical Corps activities accounted for 96% of the investigations, and less than 1% were conducted at Army Community Hospitals in the Walter Reed Health Service Region (Table II). Human studies accounted for 92% of the investigations, with 32% involving research therapies including investigational drugs or devices and cooperative oncology group studies (Table III). Animal studies accounted for 6%, and laboratory studies

accounted for 2%. Publication and presentation productivity by WRAMC staff included 214 published abstracts, 334 published articles, and 312 conference presentations (Table IV). There were 31 Clinical Investigation Recognition Seminars (now in its seventh year) presented by WRAMC researchers, providing local dissemination of WRAMC research presented at regional and national conferences.

TABLE I. WRAMC Protocol Activity

 FY-93 = 56

The Clinical Investigation Program maintained a high level of activity during 1993 with a record number of active protocols (718 compared to 715 last year) despite a hiring freeze for civilian personnel and a decrease in financial support for equipment. The number of AMEDD officers in training at WRAMC decreased to 480 from the record high of 491 the previous year, with a decrease in physicians from 434 to 420.

The DCI Strategic Planning process resulted in the reorganization of the Department's TDA, the award of funding for the renovation of the laboratory animal facility to meet American Association for Accreditation of Laboratory Animal Care (AAALAC) standards, and the designation of Building 7 as the future site of research laboratory space in the WRAMC Master Plan.

In March, the Department moved from its long-occupied space on the sixth floor (Wards 62-63 area) of Building 2 to office space on the second floor (C sector) of Building 1. Ultimately, these offices are planned for the new BRAC Building, on which construction began late this year.

Under the auspices of the WRAMC Professional Education and Training Committee, the first WRAMC Research Course was completed in early FY-93. Attending the 15-hour course were 122 investigators, both in training and staff. Course evaluations were extremely favorable, and a second course has been developed for early FY-94.

The prestigious Bailey K. Ashford Clinical Research Award is bestowed annually on a member of the year's graduating class whose research accomplishments excelled during training. Fifteen graduating trainees, representing 10 training programs, were nominated for the 1993 award. A selection committee named four semi-finalists and five finalists. The finalists presented their results at a symposium sponsored by the Department of Clinical Investigation. The 1993 finalists were: MAJ Benje H. Boedeker, MC, Resident, Anesthesia-Operative Service, Department of Surgery, "Ultra-Long Duration Local Anesthesia Produced by Injection of Lecithin-Coated Tetracaine Microcrystals"; CPT Thomas B. Francis, MC, Fellow, Endocrine-Metabolic Service, Department of Medicine, "New Methods in YAC (Yeast Artificial Chromosome) Cloning"; MAJ Sharon G. Jackson, MC, Fellow, Endocrine-Metabolic Service, Department of Medicine, "Endothelin and the Thyroid"; MAJ David A. Nickels, MC, Fellow, Pediatric Endocrinology and Metabolism Service, Department of Pediatrics, "Effect of Somatostatin on Glomerular PGE₂ Production in the Diabetic Rat"; and MAJ James M. Roach, MC, Fellow, Pulmonary and Critical Care Medicine Service, Department of Medicine, "Validation of a New Bronchoprovocation Technique." Recipient of the 1993 Bailey K. Ashford Clinical Research Award, MAJ David A. Nickels, was announced at graduation in June.

The Research Review Service continued to be busy with an ever-increasing number of protocols being submitted. After 8 years as Assistant Chief of the Department and Chief of the Research Review Service, LTC Sarkis S. Derderian, MC, left for a new assignment as the Medical Director of the Sleep-Related Breathing Disorders Center, Pulmonary and Critical Care Medicine Service, Department of Medicine. His replacement,

MAJ George C. Tsokos, MC, had been assigned to the Uniformed Services University of the Health Sciences and, since 1992, as the Director of Rheumatology Research, Rheumatology Service, WRAMC. The Service streamlined, in collaboration with the Clinical Investigation Regulatory Office, the procedure for requesting and reporting the one-time use of an investigational new drug. Additionally, a Multiple Project Assurance was issued to WRAMC by the Department of Health and Human Services effective May 1993. The Biostatistics Section increased significantly the functions and capabilities of data analysis by upgrading STATISTIX to 4.0 and SPSS/PC to 6.0 Windows and by procuring BMDP and S+ software for non-standard statistical analyses and SOLO Power program for sample size estimation. During the year, the Computer Operations Section successfully completed a relocation of the computer room and an upgrade of the network operating system and began to develop a new database for improved financial management of protocols. The new network operating system greatly expanded the capabilities and performance of the DCINET, to include initiating the development of a centralized database for all departmental operations. In conjunction with the Directorate of Information Management, the Section developed a plan for a major network expansion to take place in 1994.

The Research Administration Service provided support for the Department and all WRAMC investigators, managing intra- and extramural monies totalling over \$5,950,000. Of this total, \$670,110 was received by the Department in MEDCASE funds, which was a decrease of \$768,106. Extramural funding continued to expand, up \$204,839 from 1992, and includes support from the National Institutes of Health, the U.S. Army Medical Research and Development Command, and the Veterans Administration. During the past year, a large increase was seen in gifts, grants, and sponsored studies. To monitor, assist, and promote extramural funding to support research at WRAMC, a new vital office was created, the Extramural Funding Office. The Editorial Office continued to improve its services, providing comprehensive support to investigators/authors in composing research protocols and manuscripts. The compilation of the Annual Progress Report continues to closely monitor the progress of ongoing research projects, with all reports submitted within 30 days of the anniversary date of approval or the protocol is administratively reviewed and terminated. Additionally, the Editorial Office continues to update the "Clinical Investigator's Guide," explaining the research review process and research resources at WRAMC and providing checklists, formats, and guidelines. To assist principal investigators further, a program continues whereby the routine forms and instructions required to compile a protocol are available to researchers on a user-friendly floppy disk.

During 1993, the Research Operations Service initiated and successfully completed several major projects. In August 1993, LTC Daryl J. Kelly, MS, reported from the Walter Reed Army Institute of Research as the new Chief of this section. Through coordination with the Directorate of Engineering and Housing, the Research Operations Service submitted and was awarded a contract for the renovation of the research animal facility to be completed in August 1994 and for the construction of a new infectious disease laboratory to be completed in March 1994. The research animal use program successfully passed a congressionally mandated, DOD directed, IG

Inspection, which recommended completion of the planned animal facility renovations. By centralizing research efforts and realigning personnel, the Research Operations Service continued to increase laboratory research support to principal investigators throughout the medical center.

The DCI Flow Cytometry Laboratory provided support for 12 fellows and a number of staff from departments around the medical center, including the Allergy-Immunology Service, Rheumatology Service, Pediatric Hematology-Oncology Service, Department of Pathology and Area Laboratories, and Pediatric Endocrinology Service, with eight new protocols initiated. The DCI Immunogenetics Laboratory has aggressively expanded collaboration with researchers, supporting six protocols during this fiscal year. After establishing DNA-PCR and applying it to HLA typing, the laboratory is taking up several protocols dealing with Hepatitis B and C.

The Kyle Metabolic Unit Nursing Service supports 16 beds that are utilized for the evaluation and treatment of endocrine and metabolic disorders. CPT Beverly D. Patton was assigned as the metabolic dietitian.

The 7-year polyp prevention study (NIH grant), now in its third year, headed by LTC James Kikendall, MC, Gastroenterology Service, Department of Medicine, focused on enrolling additional subjects. This is a multi-center study of patients who have undergone colonoscopic removal of adenomas. Subjects are randomized to no intervention or to a low fat, high fiber, high fruit and vegetable diet and extensive counselling. Nutrition counselling for those in the dietary intervention group was ongoing during this past year.

As in years past, principal investigators conducting research under the Clinical Investigation Program at WRAMC continued to receive national recognition during FY-93 for their outstanding research. CPT Michael D. Eisenhauer, MC, Resident, Department of Medicine, received several recognitions this past year for this work entitled "Incidence of Cardiac Arrhythmias During Intravenous Pentamidine Therapy in HIV-Infected Patients." In November 1992, he won the Associates' Competition at the 9th Army Regional Meeting of the American College of Physicians, San Francisco, CA; in January 1993, he won the Associates' Competition, Metropolitan D.C. Chapter of the American College of Physicians, Washington, DC; and in April 1993, his poster received recognition as a finalist at the 74th Annual Session of the American College of Physicians National Meeting, Washington, DC.

MAJ Donald J. Lewis, MC, Urology Service, Department of Surgery, received two resident research awards. In February 1993, he received the Washington Urologic Society Residents Day Research Essay Award, and in April 1993, he received the Joseph Baugh Military Resident Research Award at the Uniformed Services Surgical Associates Annual Meeting, Bethesda, MD. Both of these awards were for his work on "Evaluation of the P53 Tumor Suppressor Gene in Human Testicular Cancer."

CPT Kimberly Peele, MC, Fellow, Neuro-Ophthalmology Service, Departments of Ophthalmology and Neurology, won the 1993 Residents' and

Fellows' Competition at the Annual Meeting of the North American Neuro-Ophthalmology Society for her research evaluating peripheral visual fields in pseudotumor cerebri. The title of her presentation was "The Role of Peripheral Visual Fields in Idiopathic Intracranial Hypertension."

MAJ David A. Nickels, MC, Fellow, Pediatric Endocrinology and Metabolism Service, Department of Pediatrics, was the recipient of the Ogden Bruton Award at the Annual Tri-Service Pediatric Seminar in February 1993. This award honors the best basic science research by an active duty pediatrician. Dr. Nickels' paper was entitled "Prevention of Diabetic Nephropathy: Potential New Mechanisms."

First Place honor went to MAJ Joachim J. Tenuta, MC, Orthopaedic Surgery Service, Department of Surgery, at the Residents' Night Competition, Washington Orthopaedic Society, for his work entitled "Arthroscopic Evaluation of Miniscal Repairs: Factors that Affect Healing." Dr. Tenuta presented his paper to the Society at their meeting held in Arlington, VA, in April 1993.

For his work "Subtalar Arthrodesis in the Pediatric Population: A Long Term Follow-Up Study," CPT William DeVries, MC, Orthopaedic Surgery Service, Department of Surgery, received second place recognition at the Residents' Night Competition, Washington Orthopaedic Society, Arlington, VA, April 1993.

The Charles A. Hufnagel Award of the Uniformed Services University of the Health Sciences was awarded to CPT John S. Xenos, MC, Orthopaedic Surgery Service, Department of Surgery, for his study "The Tibiofibular Syndesmosis: Evaluation of the Ligamentous Structures and Methods of Fixation." Dr. Xenos presented his work at the Annual Reserve Components Surgical Day, Bethesda, MD, in April 1993.

2. Planned for FY-94

The Department of Clinical Investigation hopes to maintain the essence of the Clinical Investigation Program despite severe budget restrictions in FY-94. The Bailey K. Ashford Research Symposium, the WRAMC Research Course, and the Clinical Investigation Recognition Seminars will be continued. Areas of particular interest for the upcoming year include the following:

- a. Close coordination and oversight of the renovation of the laboratory animal facility and the departmental space in the BRAC Building.
- b. Continued emphasis on departmental reorganization to support increased extramural funding.

3. Ongoing and Future Issues

It is probable that WRAMC activities in patient care, training, and research will decrease substantively in the future. The major ongoing and

future issue is the same as last year, funding of the WRAMC Clinical Investigation Program in this new environment.

TABLE V: Human Use Committee/Institutional Review Board Members

Kenneth Burman, COL MC	Co-Chairman Chief, Endocrine-Metabolic Service Representing Deputy Commander
Stephen Sihelnik, LTC MC	Co-Chairman Assistant Chief, Urology Service Representing Deputy Commander
Sarkis Derderian, LTC MC	Acting Co-Chairman Assistant Chief, DCI
Dominic Solimando, MAJ MS	OIC, Hematology-Oncology Pharmacy Representing Chief, Pharmacy Service
David DeDonato, LTC CH	Chief, Dept of Ministry and Pastoral Care
Jack Farrell, Ph.D.*+	Chief, Psychology Section U.S. Soldiers' & Airmens' Home
Eric Marks, M.D.*	Associate Professor Dept of Medicine, USUHS
Laurel Meaney, DAC	Patients' Rights Representative, WRAMC
Scott Murdoch, J.D.	Chief, Claims Office Representing Center Judge Advocate
Cheryl Hostetler, DAC	Clinical Instructor, Dietetic Internship Education and Research Nutrition Care Directorate Representing Ch, Nutrition Care Dir
Jean Reeder, LTC AN	Chief, Nursing Research Service Representing Chief, Dept of Nursing
Robert Smallridge, COL MC*	Chief, Dept of Clinical Physiology Division of Medicine, WRAIR Representing Director, WRAIR
Estelle Coleman-Fraser, DAC	Research Review Coordinator Department of Clinical Investigation

*Non-affiliated

TABLE VI: Clinical Investigation Committee Members

Sarkis Derderian, LTC MC	Acting Chairman Assistant Chief, DCI
Stephen Sihelnik, LTC MC	Acting Co-Chairman Staff, Urology Service, Dept of Surgery
Ana Rodriguez, COL MC	Chief, Nuclear Medicine Representing Radiation Control Comm
Audrey Chang, Ph.D.	Senior Biostatistician, DCI
Gary Klipple, COL MC	Chief, Nephrology Service Representing Chief, Dept of Medicine
Scott Murdoch, J.D.	Chief, Claims Office Representing Center Judge Advocate
Jean Reeder, LTC AN	Chief, Nursing Research Service
Douglas Hale, MAJ MC	Staff, General Surgery Service Representing Chief, Dept of Surgery

TABLE VII: Rotating Senior Investigators, Clinical Investigation Committee

Majorie Leek, Ph.D.	Army Audiology & Speech Center
Bahman Jabbari, COL MC	Neurology Service
Terry Schultz, COL MC	Department of Psychiatry
Roy Wong, COL MC	Gastroenterology Service
Gary Carpenter, COL MC	Allergy-Immunology Service
Russell Moores, MAJ MC	Department of Pediatrics

TABLE VIII: Animal Use Committee Members

Sarkis Derderian, LTC MC	Acting Chairman Assistant Chief, DCI
Judith Davis, MAJ VC	Attending Veterinarian Chief, Animal Resource Department, Div of Veterinary Medicine, WRAIR
Matthew Payne, CPT MS	Acting Ch, Research Operations Service Dept of Clinical Investigation, WRAMC
Hernando Mena, LTC MC*	Asst Chairman, Dept of Neuropathology Armed Forces Institute of Pathology
Ted Hadfield, LtCol BSC*	Chief, Division of Microbiology Armed Forces Institute of Pathology

*Non-affiliated

TABLE IX: HIV Research/Clinical Investigation Committee Member

Charles Oster, COL MC	Chief, Infectious Disease Service Representing Program Director, HIV Research, Jackson Foundation
