SECTION I - CODING FOR ITEM LOA OF DD FORM 350
(Federal Supply Class or Service Code)

General. A 4-digit code, as provided by this Section I, shall be entered in Item LOA of every procurement action reported on DD Form 350. Only one code number shall be entered. If more than one code is applicable, enter the code which describes the predominant product or service procured (See also ASPR 21-116.)

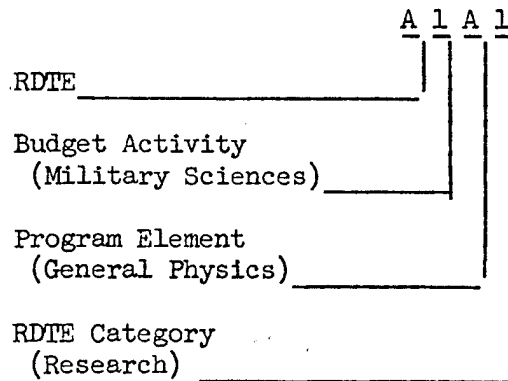

If the action is for research, development, test or evaluation work (RDTE), enter a code from Part A of this Section. RDTE is defined in ASPR 4-201. Do not assign a RDTE code to supplies or housekeeping services purchased in support of "in-house" research or development work; such supplies are coded in accordance with Part C of Section I and the services in accordance with Part B. Procurement personnel responsible for coding RDTE actions shall obtain sufficient information from requisitioning personnel to permit accurate classification in accordance with Part A.

If the action is for services other than RDTE work, enter a code from Part B of Section I, and if it is for supplies, enter a code from Part C.

PART A - RESEARCH, DEVELOPMENT, TEST AND EVALUATION (RDTE)

Purpose. The DD Form 350 codes in this Part A have been developed to coincide with the RDTE Program Elements in the Department of Defense Programming System. In the case of the Army and Navy, these codes also coincide with Departmental Budget Program Activity Codes (BPAC), while for Air Force they are related to the first two digits of the BPAC. Accordingly, it will be possible to analyze procurement figures in terms of DoD Programs and broad Budget Activities.

Description. The DD Form 350 code consists of four digits as indicated in the following example:

The first digit is always the letter "A" which identifies a RDTE contract. The second digit is numeric from 1 to 9 and identifies the following eight budget activities and a miscellaneous category.

- | | |
|--------------------------|--|
| 1. Military Sciences | 5. Ships and Small Craft |
| 2. Aircraft | 6. Ordnance and Combat Vehicles |
| 3. Missiles | 7. Other Equipment |
| 4. Military Astronautics | 8. Program-wide Management and Support |

The third digit is a letter identifying the specific RDTE element. The fourth digit is numeric from 1 to 6 and identifies the categories of RDTE defined in ASPR 4-201. The title of each code is the Program Element description which has been abbreviated for machine processing to fit within 28 digits.

Selection of Appropriate Code. Each Department or Navy Bureau shall use only that subdivision of Part A designated for it, i.e., Part A(1) for Army, Part A(2)(a) for Naval Air and Ordnance Systems Commands, Part A(2)(b) for all other Navy Activities including Special Projects Office, and Part A(3) for Air Force. It will be noted that separate codes are provided in each of these subdivisions for reporting contracts placed for ARPA and NASA. An "All Other" code also is provided for contracts which have not been assigned a specific Budget Activity or Program Element code, or which bear a security classification prohibiting unclassified disclosure of the program element title in combination with other DD Form 350 items.

To determine the appropriate DD Form 350 code, check the contract or purchase request for:

1. The appropriation symbol to insure that the contract is for RDTE. (Do not include housekeeping supplies or services in support of in-house RDTE even though a RDTE appropriation symbol is cited.) The following symbols are currently applicable.

Army 21X2040	Air Force 57X3600
Navy 17X1319	ARPA 97X0400.13
NASA 80X0108	

2. The Budget Program Activity Code (BPAC), Subhead Number, Budget Project Number or Program Element Number (PEN) as appropriate. Part A is arranged numerically according to this number which appears in the first column of each subdivision. The corresponding DD Form 350 code for Item 10A appears in the last column of each subdivision of Part A.

a. Army. BPAC numbers are defined in AR 37-100. Only the first four digits of the eight-digit number is used in this Part A.

b. Navy. Subhead numbers are defined in NavCompt Manual, Volume II. Activities other than Naval Air and Ordnance Systems Commands also require a Budget Project Number (BPN) which is assigned by ONR letter. In the fund citation this BPN is written as the first two digits of a five-digit Control Number.

c. Air Force. Program Element Numbers are prescribed for use in funding and programming by AFSC Regulation 170-1B.

3. Specific Type of Research where the same BPAC, Subhead/Project or PEN has been assigned to more than one DD Form 350 category. This applies only to Army BPAC 5011, Naval Air or Ordnance Supply System Subhead 9X01, other Navy Activity Subhead XXX1 Project 24, and Air Force PEN 6 14 45 01 4.

When a specific BPAC, Subhead/Project Number or PEN is not given, as in the case of ARPA, NASA or "All Other," it will be necessary to determine from the description of the RDTE the appropriate DD Form 350 code to assign. In this connection, requisitioning personnel shall furnish sufficient information to permit accurate coding.

PART B - OTHER SERVICES AND CONSTRUCTION

All services except RDTE work shall be coded in accordance with Part B. Each category is assigned a series of 4-digit codes for specific types of services and construction. The code consists of a letter identifying one of the 14 categories listed below, and 3 numeric digits identifying a specific service within each category.

- J. Maintenance and/or Repair of Equipment
- K. Modification, Alteration and/or Rebuild of Equipment
- L. Technical Representative Services
- M. Operation and/or Maintenance of Government-Owned Facility
- N. Installation of Equipment
- P. Salvage Services
- Q. Medical Services
- R. Architect, Engineer, Expert, and/or Consultant Services
- S. Housekeeping Services
- T. Photographic, Printing, and Publication Services
- U. Training Services
- V. Transportation Services
- W. Lease or Rental, except Transportation Equipment
- Y. Construction
- Z. Maintenance, Repair and Alteration of Real Property

PART C - SUPPLIES AND EQUIPMENT

All supply and equipment items will be coded in accordance with this part. Except for the Ships Category (FS Group 19), the classifications used are those contained in the H-2 series of cataloging handbooks, covering the Federal Supply Classification system, and personnel should refer to these handbooks for a complete description of the codes. In the case of ships, a more detailed code is provided herein than is shown in the H-2 handbooks.

*This section of the Navy RDTE code is arranged numerically according to the last two digits of the subhead number. Although "9" (nine) is shown in the first position of each subhead, the correct digit for Naval Ordnance Systems Command is "7" (seven). The second digit is "X" to represent a "6" or "7", if the program title for the subhead was the same in both FY 1966 and FY 1967. Otherwise, a "6" (six) is shown in the second position for FY 1966 and a "7" (seven) for FY 1967.

SECTION II - CODING FOR ITEM LOB OF DD FORM 350
(System or Equipment)

Purpose. The DD Form 350 codes in this Section II have been developed to complement the data in the Materiel Annex (Weapons Dictionary) of the DoD Programming System, and to facilitate analysis of DoD procurement by major weapon system, equipment or item. In general, the system is limited to items of materiel whose cost exceeds \$5 million in any one year of the program period. Only production items are covered by this coding system; RDTE work is excluded since it is covered by Section I, Part A of this Manual. Naval vessels also are excluded because adequate information can be derived from the coding systems in Section I, Part C, and Section III of this Manual.

Description and Use. The DD Form 350 code, consisting of three alphabetical digits, is shown in the first column of Section II. The first digit identifies one of the following major categories of equipment:

- | | |
|-----------------------|--------------------|
| A. Aircraft | E. Weapons |
| B. Aircraft Engines | F. Ammunition |
| C. Missiles & Rockets | G. Electronics |
| D. Vehicles | H. Other Equipment |

The second digit identifies a subdivision of the major category, e.g., Fighter Aircraft, and the third digit identifies the specific item, e.g., F-111.

Each system or equipment code shall include all subsystems, components, repair parts, modifications, repairs and related supplies and services (other than RDTE and construction) which are procured specifically for the system or equipment. If a procurement is for components, parts, or services covering more than one system or equipment, but 75% or more of the dollar amount is allocable to a single system or equipment, the code of that system or equipment shall be assigned. Otherwise, multi-system procurements shall not be assigned a specific code.

Each Department shall use only that part of Section II designated for it, i.e., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

1. Aircraft by design number within each basic mission symbol, e.g., A-4, A-5, A-6, F-4.
2. Aircraft Engines by design number within type of engine.
3. Missiles and Rockets by design number.

(Note: If an aircraft, missile or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in the Manual but agrees as to design number, the code applicable to that design number shall be assigned. For example, an RB-52 Aircraft would be assigned the code for B-52. The series symbol for an item is not used; e.g., F-111 is used rather than F-111A or F-111B.)

4. Air Force Electronics and Communications numerically by system number.

5. All Other Categories alphabetically by key word or words and by size or caliber, e.g., Semi-Trailer before Trailer, Cartridge 90mm before Cartridge 105mm.

If a system or equipment code is not applicable to a DD Form 350 transaction, or if the system or equipment bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000"(three zeros) shall be assigned.
