The principal aim of this study in year one was to recruit two recent doctoral graduates for fellowships in breast cancer prevention and control research. Kangmin Zhu, M.D., Ph.D., epidemiology, and Sherry R. Crump, M.D., MPH, preventive medicine, were recruited. Dr. Zhu has worked at Meharry Medical College with Dr. Robert Levine as his mentor, while Dr. Crump has worked at the Morehouse School of Medicine with Dr. Beverly Taylor as her mentor. C.V's of the fellows and their mentors are included in the appendix.

Both fellows have made excellent progress in year one. Dr. Zhu has submitted two applications to the U.S. Army for funding; 1)"An Intervention Study on Screening for Breast Cancer Among Single African-American Women Aged 65 and Older" and 2)"Breast Cancer and Risk Factors among African-American Women aged 20-54; A Case Control Study According to Estrogen Receptor Status." Dr. Crump has developed a research project "Barriers to Screening Mammography Utilization for African-American Women at Grady Memorial Hospital." Funding from the Morehouse Medical Treatment Effectiveness Center has allowed recruitment of personnel for this project to begin.

## GENERAL INSTRUCTIONS FOR COMPLETING SF 298

The Report Documentation Page (RDP) is used in announcing and cataloging reports. It is important that this information be consistent with the rest of the report, particularly the cover and title page. Instructions for filling in each block of the form follow. It is important to *stay within the lines* to meet optical scanning requirements.

**Block 1. Agency Use Only (Leave blank).**

**Block 2. Report Date.** Full publication date including day, month, and year, if available (e.g. 1 Jan 88). Must cite at least the year.

**Block 3. Type of Report and Dates Covered.** State whether report is interim, final, etc. If applicable, enter inclusive report dates (e.g. 10 Jun 87 - 30 Jun 88).

**Block 4. Title and Subtitle.** A title is taken from the part of the report that provides the most meaningful and complete information. When a report is prepared in more than one volume, repeat the primary title, add volume number, and include subtitle for the specific volume. On classified documents enter the title classification in parentheses.

**Block 5. Funding Numbers.** To include contract and grant numbers; may include program element number(s), project number(s), task number(s), and work unit number(s). Use the following labels:

C - Contract	PR - Project
G - Grant	TA - Task
PE - Program Element	WU - Work Unit Accession No.

**Block 6. Author(s).** Name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. If editor or compiler, this should follow the name(s).

**Block 7. Performing Organization Name(s) and Address(es).** Self-explanatory.

**Block 8. Performing Organization Report Number.** Enter the unique alphanumeric report number(s) assigned by the organization performing the report.

**Block 9. Sponsoring/Monitoring Agency Name(s) and Address(es).** Self-explanatory.

**Block 10. Sponsoring/Monitoring Agency Report Number.** (If known)

**Block 11. Supplementary Notes.** Enter information not included elsewhere such as: Prepared in cooperation with...; Trans. of...; To be published in... When a report is revised, include a statement whether the new report supersedes or supplements the older report.

**Block 12a. Distribution/Availability Statement.** Denotes public availability or limitations. Cite any availability to the public. Enter additional limitations or special markings in all capitals (e.g. NOFORN, REL, ITAR).

DOD - See DoDD 5230.24, "Distribution Statements on Technical Documents."

DOE - See authorities.

NASA - See Handbook NHB 2200.2.

**Block 12b. Distribution Code.**

DOD - Leave blank.

DOE - Enter DOE distribution categories from the Standard Distribution for Unclassified Scientific and Technical Reports.

NASA - Leave blank.

NTIS - Leave blank.

**Block 13. Abstract.** Include a brief (*Maximum 200 words*) factual summary of the most significant information contained in the report.

**Block 14. Subject Terms.** Keywords or phrases identifying major subjects in the report.

**Block 15. Number of Pages.** Enter the total number of pages.

**Block 16. Price Code.** Enter appropriate price code (*NTIS only*).

**Blocks 17. - 19. Security Classifications.** Self-explanatory. Enter U.S. Security Classification in accordance with U.S. Security Regulations (i.e., UNCLASSIFIED). If form contains classified information, stamp classification on the top and bottom of the page.

**Block 20. Limitation of Abstract.** This block must be completed to assign a limitation to the abstract. Enter either UL (unlimited) or SAR (same as report). An entry in this block is necessary if the abstract is to be limited. If blank, the abstract is assumed to be unlimited.

## **Introduction:**

Breast cancer is exceeded only by lung cancer as a cause of cancer deaths among women in the U.S. While the incidence of breast cancer is a bit lower among black women than among caucasians, mortality is higher. While special efforts to recruit minorities to research careers have been made by the National Institute of Health in recent years, including the Minority Investigator Supplement Program, Minority Health Professional Training Initiative, Minority Recruitment Network Office, etc., success of these effects has been limited, and the pool of minority investigators remains small. This is particularly true of cancer prevention and control researchers. This project addresses expanding the pool of minority cancer prevention and control researchers with regard to breast cancer.

## **Body:**

The hypothesis to be tested in this study is that with "protected time" and appropriate mentors recent doctoral graduates in social science and public health disciplines can achieve independent extramural funding for cancer prevention and control research within three years. The specific aim in year one of the grant was to recruit two recent post-doctoral fellows who would be provided with faculty mentors drawn from the rolls of the Drew, Meharry, Morehouse Consortium Cancer Center(DMMCCC). Specific criteria were developed for selection of the fellows and broad milestones of progress toward independent status identified.

In year one of this grant two post-doctoral fellows were recruited, Dr. Kangmin Zhu, epidemiology, and Dr. Sherry R. Crump, preventive medicine. Dr. Robert Levine at Meharry Medical College has served as mentor for Dr. Zhu while Dr. Beverly Taylor at Morehouse School of Medicine has mentored Dr. Crump. CV's of the fellows and their mentors are included in the appendix of this report.

Both fellows have made excellent progress in year one. Dr. Zhu has submitted two applications to the U.S. Army for funding; 1)"An Intervention Study on Screening for Breast Cancer Among Single African-American Women Aged 65 and Older" and 2)"Breast Cancer and Risk Factors among African-American Women aged 20-54; A Case Control Study According to Estrogen Receptor Status." Dr. Crump has developed a research project "Barriers to Screening Mammography Utilization for African-American Women at Grady Memorial Hospital." Funding from the Morehouse Medical Treatment Effectiveness Center has allowed recruitment of personnel for this project to begin.

In addition to the above Dr. Zhu has submitted a paper for publication, a review article on the relation of estrogen receptors to prognosis in breast cancer. Dr. Crump has been participating in the Morehouse School of Medicine Breast Health Education Study, and is currently assisting in the revision of the questionnaire for this community-based educational program for underserved African-American women. The prospect for a successful outcome for our initial two fellows, i.e., independent funding by the end of year three, is bright. Both Dr. Zhu and Dr. Crump are continuing into the second year of fellowship.

Recruitment of good candidates for the fellowship has been difficult. Three applicants

have been rejected for year two of the grant. Two persons who seem to be excellent candidates have been accepted thus far, one a biologist with a laboratory background who would like to move into prevention and control research, and the other a very experienced behaviorist who will receive her Ph.D. in December, 1995. Both these persons, M. George-Taylor, Ph.D. and Vanessa Parker, M.S., MPH and Ph.D. candidate, would like to enter into the fellowship program as of December 1, 1995. Dr. George-Taylor will be mentored by Dr. John Browne, a cell biologist at Clark Atlanta University, and Dr. Linda Pederson, an epidemiologist at the Morehouse School of Medicine. Both Clark Atlanta University and the Morehouse School of Medicine are part of the Atlanta University Complex, and are part of a multi institutional campus. Ms. Parker will be mentored by Dr. Patricia Matthews-Juarez and Dr. Samuel Shacks at Drew University. Dr. Shacks's C.V. has been submitted previously. The C.V.'s of the two candidates and the other mentors are included in the appendix of this report.

A third candidate, Edward H. Bradford, Jr., D.D.S., MPH is under review with a final decision to be made within 30 days. A copy of his C.V. is also enclosed as well as a C.V. of a potential mentor, Dr. M. Hargreaves. At this time we do not have a suitable candidate for the 4th fellowship position planned to be entered on in this year two. We respectfully request that we be allowed to carry over funds for a time while recruitment for the final position continues.

### **Conclusions:**

Year one of this grant has been highly successful. Two post doctoral fellows were recruited who have had a productive year and look forward to a continuation of success in year two. Protected time for young investigators with appropriate mentoring seem to be producing desired results: development of new independent investigators in cancer prevention and control research.

Recruitment of appropriate candidates in keeping with the plan of work for this project has been difficult. As year two gets underway, when four new fellows were planned for, only two are currently in hand and a third being evaluated for recruitment. It is respectfully requested that we be allowed an opportunity to fill all the positions, even if in one instance it may mean well less than three years of mentoring for the post-doctoral fellow. We are optimistic that all positions will be filled in the next few months.
