13.1.3 Maintenance

a. Submission of Changes:

(1) A S/A may request additions, deletions, or changes to this volume by submitting such requests through the authorized contact point to the DLSC program manager. Correspondence will be addressed to:

Commander
Defense Logistics Services Center
ATTN: DLSC-SB
Federal Center
Battle Creek, MI 49017-3084

(2) Emergency changes may be requested by calling:

Commercial: Area Code 616, 961-4514.
DSN: 932-4514/4309.

b. Each request for change will include the following information:

(1) The required effective date of the change. To meet the 30-day requirement set forth in paragraph

13.1.3.c.(1), DLSC must receive the request 60 days prior to the effective date.

(2) A statement that the requested change has been fully coordinated (if applicable). All changes to chapters 13.3 and 13.4 require effective date coordination. Changes to the Standard FSC Table, appendix 13-2-A, require effective date coordination except for Data Record Numbers (DRNs) 3428 (Hi-Dollar Breakout Commodity Category Code), 2611 (DoD Commodity Materiel Management Category Code), 0478 (Distribution Activity Code Segment M) and 8905 (File Maintenance Receiver Code). Changes to the Major Organizational Entity (MOE) Rules contained in appendix 13-6-B require effective date coordination except for:

(a) Primary Inventory Control Activity MOE Rules when the PICA Level of Authority (LOA) is 07, 08, 26, 48, or 81.

(b) Secondary Inventory Control Activity (SICA) MOE Rules providing the change does not affect a table in chapter 13.3.

(c) Authorized Item Identification Data Collaborator/Receiver Codes (DRNs 2533 and 2534).

(d) DoD Commodity Materiel Management Category Codes and/or Military Service Materiel Management Category Codes.

(3) Identification of the specific table line entry (e.g., MOE Rule Number A111) or other information to be changed, and the type of change required.

c. Announcement of Changes:

(1) Any addition/deletion/change required for this volume may be announced by interim issuance, change, or revision, providing it is distributed to all interested activities a minimum of 30 days in advance of the effective date. If the 30-day requirement cannot be met, DLSC will announce the change by telephone or teletype as appropriate, with

subsequent confirmation by interim issuance.

(2) Emergency additions/deletions/changes to this volume that require rapid publication and distribution to all interested activities will be announced by means of interim issuances. These will be issued in letter form on an as-required basis.

(3) All interim issuances and any other additions/deletions/changes required, except those for appendix 13-6-C, Activity-MOE Rule Cross Reference Table, will be accumulated on a quarterly basis and published as a formal change.

(4) If any scheduled quarterly change affects more than 25 percent of the data contained in this volume, a complete revision will be issued instead of a change. This rule will also apply to the specific Service/Agency segments.

d. The Change Indicator Code (DRN 0122) identifies the most current action taken on a FSC or MOE Rule Record. These codes are indicated as follows:

A NEW	IDENTIFIES THE ADDITION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS TO THE DATA BASE.
C CANCELLED	IDENTIFIES PENDING REPLACEMENT OR DELETION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS FROM THE DATA BASE BEFORE THE EFFECTIVE DATE IS REACHED.
D DELETION	IDENTIFIES DELETION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS FROM THE DATA BASE AFTER THE EFFECTIVE DATE IS REACHED.

- R REVISED IDENTIFIES THE REVISION OF ONE OR MORE DATA ELEMENTS OF A FSC OR MOE RULE PROFILE IN THE DATA BASE.
- BLANK IDENTIFIES A FSC OR MOE RULE, WITH RELATED DATA ELEMENTS, WHICH IS AUTHORIZED FOR USE BASED ON THE ASSIGNED STATUS CODE AS DEFINED IN FLIS, VOLUME 10, TABLE 116.

13.1.4 Contents. Following is an explanation of the contents of this volume and its purpose in FLIS.

a. The Standard Federal Supply Classification Table (appendix 13-2-A) contains the FSCs listed in Cataloging Handbook H2-1, Groups and Classes. Additional information is contained in volume 2, section 2.1.7; volume 4, section 4.2.1; and DoD 4130.2-M, Federal Catalog System Policy Manual, section 3. Arrangement of the FSCs in the table is in numerical order from the lowest to the highest. The Standard FSC Table will be used to:

- Validate functional assignments by FSC in accordance with published directives.
- Validate FSC codes.
- Determine which activities will receive output distribution on an FSC basis.

b. Registration of Activity Interest by Integrated Materiel Managers (IMMs) (chapter 13.3) contains instructions for the registration of Service/Agency interest on items accepted for management by a IMM. The chapter consists of individual sections for IMM use under the conditions cited therein (e.g., Provisioning and Item Management Coding).

c. Registration of Activity Interest by Integrated Materiel Managers (IMMs) (chapter 13.4) contains instructions for the registration of Military Service

interest on items managed by Integrated Materiel Managers. The chapter consists of individual sections for IMM use under the conditions cited therein (e.g., recording user interest).

d. MOE Rule Development for NATO and Other Foreign Countries (chapter 13.5) contains criteria and examples for MOE Rule development in conjunction with Foreign Military Sales (FMS) cases.

e. Major Organizational Entity (MOE) Rules (chapter 13.6):

(1) The MOE Rule Table, appendix 13-6-B, reflects management responsibilities within participating Military Services, Civil Agencies, and NATO and other foreign countries. The information included in the MOE Rules is a combination of Department of Defense (DoD) and Service/Agency cataloging/supply management assignments which are made on the basis of organizational responsibilities. Additional information is contained in volume 2, chapter 2.1; volume 6, section 6.3.11; and DoD 4130.2-M, section 5. The MOE Rule Table is used to:

(a) Display, in a tabular format, functional materiel management assignments made by Services/Agencies for computer and manual applications. The data against each MOE Rule Number is consistent throughout the DoD and Services/Agencies and may be applied against many National Stock Numbers (NSNs).

(b) Provide uniform criteria for validating materiel management assignments.

(c) Reduce the frequency of change to the system when a change in functional assignments is made. This can be accomplished by revising the appropriate element in the MOE Rule without changing the MOE Rule Number and without generating mass output.

(d) Minimize the input of predetermined information, since redundant data (applicable to many

items) will be recorded against a single entry in the System Support Record (SSR) table and not against the FLIS data base.

(e) Provide a flexible base for accumulation of management statistics.

(2) MOE Rules will be established for existing and potential items of supply.

(3) MOE Rules for nuclear ordnance items will be processed and applied in accordance with volume 4, chapter 4.16.

(4) The Activity to MOE Rule Cross-Reference Table, appendix 13-6-C, lists MOE Rules sequentially by activity code, PICA, SICA, PICA Level of Authority, SICA Level of Authority, submitter, collaborator, and receiver.

13.1.5 FLIS Data Base File Maintenance

a. MOE Rules and related data codes denote managerial and operational responsibilities exercised by supply activities and techniques of materiel management employed by the activity having principal supply control responsibility. The date an approved MOE Rule and related data are recorded against an NSN will be the reference point for development of management statistics.

b. MOE Rule and related data elements are input to the DLSC FLIS data base through the use of the following three segments:

(1) Segment B, which consists of the elements of data necessary to portray an individual Service/Agency management profile in relation to a specific item identification.

(2) Segment R, which is used when adding, changing, or deleting single data elements or a combination of data elements. The permissible data elements are reflected with the input formats for Document Identifier Codes (DICs) using this segment.

(3) Segment T, which is used to delete an entire MOE Rule and its related segment B data elements.

c. The related data elements, excluding supplementary type activity registrations, are added, changed, or deleted as reflected by applicable input formats in volumes 8 and 9 except as follows:

(1) The Acquisition Method Code and Acquisition Method Suffix Code are assigned by the:

(a) Primary Inventory Control Activity (PICA) for each item Service-managed or retained.

(b) IMM for the first MOE Rule established. No other MOE Rule requires these codes except when a Civil Agency is not supported by the IMM. In such an instance the Civil Agency assigns these codes to the Civil Agency MOE Rule. On the IMM items, DLSC will automatically record the data in the FLIS against the applicable SICA MOE Rules.

(2) The Item Management Code (IMC) and Item Management Coding Activity (IMCA) are required only for items subject to IMM, and are input by the IMM. (See volume 6, chapters 6.3 and 6.8.)

d. Item identification data collaborators/receivers may be recorded as supplemental to a given MOE Rule on an item-by-item basis when authorized by the controlling PICA and/or SICA, subject to the following limitations:

(1) The data collaborator/receiver must be recorded against the parent Service/Agency MOE Rule.

(2) The data collaborator/receiver must not duplicate activities contained within the MOE Rule.

e. Input formats for MOE Rule and related data DICs are contained in volume 8, chapter 8.1 and volume 9, chapter 9.1.

Add Data Element(s) (DIC LAD)

Add Moe Rule and Related Data (DIC LAU)
Change Data Element(s) (DIC LCD)
Change MOE Rule and Related Data (DIC LCU)
Delete Data Element(s) (DIC LDD)
Delete MOE Rule and Related Data (DIC LDU)
Multiple DIC Input (DIC LMD)

f. SSR MOE Rule/FLIS data base file maintenance and/or mass-change updates require that:

(1) When file maintenance to SSR/FLIS data base data is required by a Service/Agency due to a FLIS System Change Request (SCR) (e.g., logistics transfer), DLSC-S will monitor the results through the Item Management Statistical Series section 21 report, MOE Rule Distribution (IMSS-21).

(2) If a Service/Agency has not input the transaction(s) necessary to update pending erroneous segment B or future effective dated file records to the FLIS data base, DLSC-S will interrogate the FLIS data base for those MOE Rules recorded on items and output the results to the responsible Service/Agency for initiation of corrective action.

(3) Upon completion and notification of the updated transaction(s), the affected Service/Agency focal point will provide DLSC-S with the required information for retention, cancellation, and/or deletion of specific MOE Rule(s) from the FLIS.

13.6.2 The MOE Rule FSG/FSC Management Exception Table.

a. The table provides a complete listing of Federal Supply Classifications (FSCs) and/or Federal Supply Groups (FSGs) upon which specific MOE rules are limited to submitting. When an "E" appears in the "All Others" indicator column, the entries listed in the FSG/FSC column, are the only groups and classifications on which the MOE rule can submit. All others are excluded. When an "I" appears in the "All Others" indicator column, the entries appearing in the FSG/FSC column are the only groups and classifications upon which the MOE rule cannot submit. All other FSGs/FSCs can be submitted on. When an entry in the FSG/FSC column appears as two positions, the entry indicates that all the classes within the group are included (e.g., 67 -- means all of group 67). All other entries are four positions and denote the complete Federal Supply Classification. The table is listed in MOE rule order.

b. The following data elements and related Data Record Numbers (DRNs) appear within the table:

		MOE Rule Number (DRN 8290)	All Others Indicator (DRN 4497)	Federal Supply Classification (DRN 3990) FSG(s) / FSC(s) (DRN 3994) (DRN 3996)
1. Inclusive/Exclusive Code	4497			
A code which designates whether "all other" FSGs and FSCs than those listed for a specific MOE rule are included for, or excluded from use by the MOE rule.				
2. Assigned Federal Supply Group	3994	A004	E	8340 8465
The Federal Supply Classification allows 99 segments called groups. Each of these groups is assigned a two digit code, (e.g. Group 10-Weapons, Group 13-Ammunition and Explosives).

13.1.3 Maintenance

a. Submission of Changes:

(1) A S/A may request additions, deletions, or changes to this volume by submitting such requests through the authorized contact point to the DLSC program manager. Correspondence will be addressed to:

Commander
Defense Logistics Services Center
ATTN: DLSC-SB
Federal Center
Battle Creek, MI 49017-3084

(2) Emergency changes may be requested by calling:

Commercial: Area Code 616, 961-4514.
DSN: 932-4514/4309.

b. Each request for change will include the following information:

(1) The required effective date of the change. To meet the 30-day requirement set forth in paragraph 13.1.3.c.(1), DLSC must receive the request 60 days prior to the effective date.

(2) A statement that the requested change has been fully coordinated (if applicable). All changes to chapters 13.3 and 13.4 require effective date coordination. Changes to the Standard FSC Table, appendix 13-2-A, require effective date coordination except for Data Record Numbers (DRNs) 3428 (Hi-Dollar Breakout Commodity Category Code), 2611 (DoD Commodity Materiel Management Category Code), 0478 (Distribution Activity Code Segment M) and 8905 (File Maintenance Receiver Code). Changes to the Major Organizational Entity (MOE) Rules contained in appendix 13-6-B require effective date coordination except for:

(a) Primary Inventory Control Activity MOE Rules when the PICA Level of Authority (LOA) is 07, 08, 26, 48, or 81.

(b) Secondary Inventory Control Activity (SICA) MOE Rules providing the change does not affect a table in chapter 13.3.

(c) Authorized Item Identification Data Collaborator/Receiver Codes (DRNs 2533 and 2534).

(d) DoD Commodity Materiel Management Category Codes and/or Military Service Materiel Management Category Codes.

(3) Identification of the specific table line entry (e.g., MOE Rule Number A111) or other information to be changed, and the type of change required.

c. Announcement of Changes:

(1) Any addition/deletion/change required for this volume may be announced by interim issuance, change, or revision, providing it is distributed to all interested activities a minimum of 30 days in advance of the effective date. If the 30-day requirement cannot be met, DLSC will announce the change by telephone or teletype as appropriate, with subsequent confirmation by interim issuance.

(2) Emergency additions/deletions/changes to this volume that require rapid publication and distribution to all interested activities will be announced by means of interim issuances. These will be issued in letter form on an as-required basis.

(3) All interim issuances and any other additions/deletions/changes required, except those for appendix 13-6-C, Activity-MOE Rule Cross Reference Table, will be accumulated on a quarterly basis and published as a formal change.

(4) If any scheduled quarterly change affects more than 25 percent of the data contained in this volume, a complete revision will be issued instead of a change. This rule will also apply to the specific Service/Agency segments.

d. The Change Indicator Code (DRN 0122) identifies the most current action taken on a FSC or MOE Rule Record. These codes are indicated as follows:

A NEW	IDENTIFIES THE ADDITION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS TO THE DATA BASE.
C CANCELLED	IDENTIFIES PENDING REPLACEMENT OR DELETION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS FROM THE DATA BASE BEFORE THE EFFECTIVE DATE IS REACHED.

D DELETION	IDENTIFIES DELETION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS FROM THE DATA BASE AFTER THE EFFECTIVE DATE IS REACHED.
R REVISED	IDENTIFIES THE REVISION OF ONE OR MORE DATA ELEMENTS OF A FSC OR MOE RULE PROFILE IN THE DATA BASE.
- BLANK	IDENTIFIES A FSC OR MOE RULE, WITH RELATED DATA ELEMENTS, WHICH IS AUTHORIZED FOR USE BASED ON THE ASSIGNED STATUS CODE AS DEFINED IN FLIS, VOLUME 10, TABLE 116.

13.1.4 Contents. Following is an explanation of the contents of this volume and its purpose in FLIS.

a. The Standard Federal Supply Classification Table (appendix 13-2-A) contains the FSCs listed in Cataloging Handbook H2-1, Groups and Classes. Additional information is contained in volume 2, section 2.1.7; volume 4, section 4.2.1; and DoD 4130.2-M, Federal Catalog System Policy Manual, section 3. Arrangement of the FSCs in the table is in numerical order from the lowest to the highest. The Standard FSC Table will be used to:

Validate functional assignments by FSC in accordance with published directives.

Validate FSC codes.

Determine which activities will receive output distribution on an FSC basis.

b. Registration of Activity Interest by Integrated Materiel Managers (IMMs) (chapter 13.3) contains instructions for the registration of Service/Agency interest on items accepted for management by a

IMM. The chapter consists of individual sections for IMM use under the conditions cited therein (e.g., Provisioning and Item Management Coding).

c. Registration of Activity Interest by Integrated Materiel Managers (IMMs) (chapter 13.4) contains instructions for the registration of Military Service interest on items managed by Integrated Materiel Managers. The chapter consists of individual sections for IMM use under the conditions cited therein (e.g., recording user interest).

d. MOE Rule Development for NATO and Other Foreign Countries (chapter 13.5) contains criteria and examples for MOE Rule development in conjunction with Foreign Military Sales (FMS) cases.

e. Major Organizational Entity (MOE) Rules (chapter 13.6):

(1) The MOE Rule Table, appendix 13-6-B, reflects management responsibilities within participating Military Services, Civil Agencies, and NATO and other foreign countries. The information included in the MOE Rules is a combination of Department of Defense (DoD) and Service/Agency cataloging/supply management assignments which are made on the basis of organizational responsibilities. Additional information is contained in volume 2, chapter 2.1; volume 6, section 6.3.11; and DoD 4130.2-M, section 5. The MOE Rule Table is used to:

(a) Display, in a tabular format, functional materiel management assignments made by Services/Agencies for computer and manual applications. The data against each MOE Rule Number is consistent throughout the DoD and Services/Agencies and may be applied against many National Stock Numbers (NSNs).

(b) Provide uniform criteria for validating materiel management assignments.

(c) Reduce the frequency of change to the system when a change in functional assignments is

made. This can be accomplished by revising the appropriate element in the MOE Rule without changing the MOE Rule Number and without generating mass output.

(d) Minimize the input of predetermined information, since redundant data (applicable to many items) will be recorded against a single entry in the System Support Record (SSR) table and not against the FLIS data base.

(e) Provide a flexible base for accumulation of management statistics.

(2) MOE Rules will be established for existing and potential items of supply.

(3) MOE Rules for nuclear ordnance items will be processed and applied in accordance with volume 4, chapter 4.16.

(4) The Activity to MOE Rule Cross-Reference Table, appendix 13-6-C, lists MOE Rules sequentially by activity code, PICA, SICA, PICA Level of Authority, SICA Level of Authority, submitter, collaborator, and receiver.

13.1.5 FLIS Data Base File Maintenance

a. MOE Rules and related data codes denote managerial and operational responsibilities exercised by supply activities and techniques of materiel management employed by the activity having principal supply control responsibility. The date an approved MOE Rule and related data are recorded against an NSN will be the reference point for development of management statistics.

b. MOE Rule and related data elements are input to the DLSC FLIS data base through the use of the following three segments:

(1) Segment B, which consists of the elements of data necessary to portray an individual Service/Agency management profile in relation to a specific item identification.

(2) Segment R, which is used when adding, changing, or deleting single data elements or a combination of data elements. The permissible data elements are reflected with the input formats for Document Identifier Codes (DICs) using this segment.

(3) Segment T, which is used to delete an entire MOE Rule and its related segment B data elements.

c. The related data elements, excluding supplementary type activity registrations, are added, changed, or deleted as reflected by applicable input formats in volumes 8 and 9 except as follows:

(1) The Acquisition Method Code and Acquisition Method Suffix Code are assigned by the:

(a) Primary Inventory Control Activity (PICA) for each item Service-managed or retained.

(b) IMM for the first MOE Rule established. No other MOE Rule requires these codes except when a Civil Agency is not supported by the IMM. In such an instance the Civil Agency assigns these codes to the Civil Agency MOE Rule. On the IMM items, DLSC will automatically record the data in the FLIS against the applicable SICA MOE Rules.

(2) The Item Management Code (IMC) and Item Management Coding Activity (IMCA) are required only for items subject to IMM, and are input by the IMM. (See volume 6, chapters 6.3 and 6.8.)

d. Item identification data collaborators/receivers may be recorded as supplemental to a given MOE Rule on an item-by-item basis when authorized by the controlling PICA and/or SICA, subject to the following limitations:

(1) The data collaborator/receiver must be recorded against the parent Service/Agency MOE Rule.

(2) The data collaborator/receiver must not du-

plicate activities contained within the MOE Rule.

e. Input formats for MOE Rule and related data DICs are contained in volume 8, chapter 8.1 and volume 9, chapter 9.1.

Add Data Element(s) (DIC LAD)
 Add Moe Rule and Related Data (DIC LAU)
 Change Data Element(s) (DIC LCD)
 Change MOE Rule and Related Data (DIC LCU)
 Delete Data Element(s) (DIC LDD)
 Delete MOE Rule and Related Data (DIC LDU)
 Multiple DIC Input (DIC LMD)

f. SSR MOE Rule/FLIS data base file maintenance and/or mass-change updates require that:

(1) When file maintenance to SSR/FLIS data base data is required by a Service/Agency due to a FLIS System Change Request (SCR) (e.g., logistics transfer), DLSC-S will monitor the results through the Item Management Statistical Series section 21 report, MOE Rule Distribution (IMSS-21).

(2) If a Service/Agency has not input the transaction(s) necessary to update pending erroneous segment B or future effective dated file records to the FLIS data base, DLSC-S will interrogate the FLIS data base for those MOE Rules recorded on items and output the results to the responsible Service/Agency for initiation of corrective action.

(3) Upon completion and notification of the updated transaction(s), the affected Service/Agency focal point will provide DLSC-S with the required information for retention, cancellation, and/or deletion of specific MOE Rule(s) from the FLIS.

CHAPTER 2
STANDARD FEDERAL SUPPLY CLASSIFICATION (FSC) TABLE

13.2.1 Purpose

Uses of the Standard FSC Table include: validation of FSCs, listing of classifications subject to integrated material management and item management coding procedures and classifications subject to single submitter criteria. FSCs relating to any of these conditions, list the appropriate managing activity. The table also shows the Army and Air Force Federal Supply Class Managers and activities authorized to receive file maintenance and decoded characteristics data.

- All activity codes listed in the table are found in FLIS, Volume 10, table 104.

13.2.2 Definitions

The following data elements and related Data Record Numbers (DRNs) appear within the table. Included within the data element definitions are the FLIS, Volume 10 tables, shown in parenthesis, which provide a complete list of the possible entries for each DRN.

Data Element	DRN
a. FSC/MOE Rule Change Indicator Code	0122
(Volume 10, table 166) A computer generated code, resulting from an input transaction which changes any portion of the FSC or MOE Rule record.	
b. Assigned FSC	3990

Data Element

DRN

A code identifying the supply classification of an item under the Federal Catalog Program. It also identifies items of production and homogeneous areas of commodities with respect to their physical or performance characteristics. The first two positions of the code denote the Federal Supply Group (FSG), with the last two positions identifying the FSC within the specified group. The combination of the four digits constitute the complete Federal Supply Classification.

d. Item Management Classification Activity (IMCA) 4075

The General Services Administration or appropriate Defense Supply Center responsible for determining the DoD method of management for each item in a FSC assigned for integrated management.

- DoD 4140.26-M defines these responsibilities.

e. Single Submitting Activity Code 9255

Data Element	DRN	Data Element	DRN
An activity having sole responsibility for submittal of catalog data proposals to the Federal Logistics Information System. Management responsibility includes all items of supply in a given FSC class (Category A Single Submitters); or, where management responsibility is determined on a by-item basis within a given FSC class, (Category B Single Submitters).		i. Hi-Dollar Breakout Commodity Category Code	3428
f. Standardization Submitting Activity Code	0749	DLAM 4105.2, FLIS, Volume 10, Table 78) A code used by DoD activities to identify the commodity category of spare parts, including components and related spares.	
A code that identifies an activity having sole responsibility for submittal of standardization data, to the Federal Logistics Information System, in a given FSC class.		j. Commodity Material Management Category Code, DoD	2611
g. Army Federal Supply Class Manager	8831	(FLIS, Volume 10, Table 48) A code used to classify items into categories by material commodity for management information purposes.

CHAPTER 5
MOE RULE DEVELOPMENT FOR
NATO AND OTHER FOREIGN COUNTRIES

13.5.1 Purpose. This chapter provides the criteria for Major Organizational Entity (MOE) Rule development when a FMS case(s) (DoD Letter of Offer and Acceptance (DD Form 1513)) exists. Policy/Procedural guidance for Federal Catalog data and services furnished under FMS agreement is contained in sub-section 83, DoD 4130.2-M, Federal Catalog System Policy Manual.

13.5.2 Criteria for MOE Rule Development:

a. If a foreign government has a FMS case with DLSC for cataloging services and data the MOE Rule profile for recording foreign government interest will be constructed with the country code in the first two positions and '01' in the last two positions (as outlined in appendix 13-6-B, Foreign MOE Rules).

b. If a foreign government has a FMS case for cataloging data and services with a U. S. Military Service, the MOE Rule profile for recording U. S. Military Service interest (if not already recorded on the item as a manager) will be constructed as in the following example:

c. The U. S. Military Service responsible for adding a FMS MOE Rule is also responsible for deleting the FMS MOE Rule when the agreement is terminated.

13.5.3 Input and Output Data Submitters and Receivers. An input transaction which contains a MOE Rule number with an "I" or "O" in the first position must also contain the Originating Activity Code "TU" (CASC-POA), Submitting Activity Code 9Z (DLSC-SD) and Related Transaction Submitting Activity Code 9Z. The resulting output, notification of return or unprocessable package (KRE/KRU) will be forwarded to Activity 9Z whereas notification of approval (KNA) will be forwarded to activities "TU" and "9Z".

CHAPTER 6
MAJOR ORGANIZATIONAL ENTITY (MOE) RULES

13.6.1 MOE Rule Tables

a. The Wholesale-Retail Grid, (Appendix 13-6-A), lists the various levels of service/agency supply management responsibility. Information is provided for the Primary Inventory Control Activity (PICA) and Secondary Inventory Control Activity (SICA), Integrated and Non-Integrated Material Managers and for all the related levels of authority specific to each.

b. The MOE Rule Table (Appendix 13-6-B) reflects the various profiles of management responsibility within the participating service/agencies, NATO and other foreign governments. The information included in the MOE rules is a combination of Department of Defense (DoD) and service/agency cataloging and/or supply management assignments, which are made on the basis of organizational responsibilities. MOE rule assignments, within the table, are established for both existing and potential items of supply. The table is displayed in tabular format and is listed in MOE rule order.

c. The Activity to MOE Rule Cross-Reference Table, (Appendix 13-6-C), is designed to provide the user with a reference for determining which MOE rules apply to a specific service, agency, NATO or other foreign country. The table is listed sequentially by activity and by MOE rule within each activity.

d. The following data elements and related Data Record Numbers (DRNs) appear within the tables. Included within the data element definitions are the FLIS, Volume 10 tables, shown in parenthesis, which provide a complete list of the possible entries for each DRN.

Data Element	DRN
1. FSC/MOE Rule Change Indicator Code	0122

(Volume 10, table 166) A code which is computer generated as the result of an input transaction changing any portion of a FSC or MOE rule record.

2. MOE Rule Number 8290

A code which represents a specific MOE rule that applies to the management of an item or a group of items of supply. The first position identifies the service/agency responsible for establishing and maintaining the MOE rule. The remaining three positions are non-significant and are used for sequencing purposes only.

3. MOE Code 2833

(Volume 10, table 51) A code representing the subdivision of a U.S. governmental organization, or an agency of the North Atlantic Treaty Organization nations, or other friendly governments and international organizations participating in the Federal Catalog Program.

4. MOE Rule Status Code 8458

(Volume 10, table 116) A code designating the status of a MOE rule as active, cancelled with or without replacement, or with the replacement pending, as reserved or as being an effective dated new MOE rule or a MOE rule with a pending change.

5. Future MOE Rule Status Code 0297

(Volume 10, table 116) A code which represents the forth coming status code to be assigned based on a future effective dated MOE rule action.

6. Effective Date 2128

A seven position, numeric code representing the century and Julian date a MOE rule table maintenance action becomes effective.

7. Primary Inventory Control Activity (PICA) 2866

(Volume 10, table 104) A code indicating the principal supply control activity responsible for establishing and controlling stockage objectives, and maintaining item accountability for an item of supply. (Formerly, the wholesale inventory manager)

8. PICA Level of Authority 3505

(Volume 10, table 74) A code that identifies the level of authority of a PICA. The code indicates logistics material management, level of responsibility and basis of categorization. The codes are used internally for statistics and general management data, and are based on material management responsibilities assigned by service/agency directives.

9. Secondary Inventory Control Activity (SICA) 2938

(Volume 10, table 104) A code that identifies a supply control activity responsible for controlling stock levels and maintaining item accountability when supply support is furnished by a different service/agency; or, in the case of a Defense Supply Center, responsible for residual supply management actions not transferred to the General Services Administration (GSA). (Formerly, the retail inventory manager)

10. SICA Level of Authority 9547

(Volume 10, table 74) A code that identifies the level of authority of a SICA. The code indicates the logistics material management level of responsibility and basis of categorization. The codes are used internally for statistics and general management data, and are based on material management responsibilities assigned by service/agency directives.

11. Authorized Item Identification Data Submitter Code 2535

(Volume 10, table 104) A code identifying the single activity authorized to submit item identification data, to the Defense Logistics Services Center (DLSC), for a specific item of supply.

12. Authorized Item Identification Data Collaborator Code 2531

(Volume 10, table 104) A code identifying the activity or activities designated to collaborate on proposed revisions to the item identification data recorded at DLSC, for a specific item of supply.

13. Authorized Item Identification Data Receiver Code 2532

(Volume 10, table 104) A code identifying the activity or activities designated to receive automatic distribution of recorded item identification data.

14. Commodity Material Management Category Code, DoD 2611

(Volume 10, table 48) A code employed to classify items into categories by material commodity for management information purposes.

15. Military Material Management Codes:

- Major Material Category Code, Army 9256

(Volume 10, table 65) A code which identifies the major material categories or principal and secondary items to the CONUS inventory managers, National Inventory Control Point, or in the case of DLA/GSA managed items, the Army SICA which exercises managerial responsibility.

- Cognizance Code, Navy
(Volume 10, table 62) A code which identifies the Inventory Control Point office or agency which exercises supply management. The first position is numeric and identifies the stores account. The entire code identifies the combined technical bureau, command and inventory managers having jurisdiction over the item.

2608

- Material Management Aggregation Code (MMAC), Air Force
(Volume 10, table 66) A two position alphabetic code authorized to identify specific items, (National Stock Numbers), to be managed by a specific manager. These codes apply to systems, programs, selected Federal Supply Classifications and to the aggregation of related pieces of equipment.

2836

- Material Management Code, Marine Corps
(Volume 10, table 54) A code employed by the Marine Corps in classifying items into material categories. An Alpha code designates the agency within the DoD which has been assigned responsibility for integrated material management control. A numeric code designates internal Marine Corps material management responsibility for items not assigned to another service.

9257

16. Management Exception Rule Notes
A notation entered against a specific MOE rule which denotes the properties, materials and conditions governing the MOE rule.

9542

e. The following table contains the valid combinations of PICA/SICA Level of Authority (LOA) codes to be used in MOE rule assignment (e.g. A PICA with a LOA of 01 can be entered without SICAs, or can have SICAs with LOAs of 5D or 9D

only):

13.6.2 The MOE Rule FSG/FSC Management Exception Table.

a. The table provides a complete listing of Federal Supply Classifications (FSCs) and/or Federal Supply Groups (FSGs) upon which specific MOE rules are limited to submitting. When an "E" appears in the "All Others" indicator column, the entries listed in the FSG/FSC column, are the only groups and classifications on which the MOE rule can submit. All others are excluded. When an "I" appears in the "All Others" indicator column, the entries appearing in the FSG/FSC column are the only groups and classifications upon which the MOE rule cannot submit. All other FSGs/FSCs can be submitted on. When an entry in the FSG/FSC column appears as two positions, the entry indicates that all the classes within the group are included (e.g., 67 -- means all of group 67). All other entries are four positions and

denote the complete Federal Supply Classification. The table is listed in MOE rule order.

b. The following data elements and related Data Record Numbers (DRNs) appear within the table:

1. Inclusive/Exclusive Code 4497

A code which designates whether "all other" FSGs and FSCs than those listed for a specific MOE rule are included for, or excluded from use by the MOE rule.

2. Assigned Federal Supply Group 3994

The Federal Supply Classification allows 99 segments called groups. Each of these groups is assigned a two digit code, (e.g. Group 10-Weapons, Group 13-Ammunition and Explosives).

3. Assigned Federal Supply Class within Federal Supply Group 3996

The Federal Supply Classification allows the Federal Supply Group to be subdivided into 99 classes. The classes within any group are considered to be closely related. The combination of the Federal Supply Group and the specific class within the group, constitute the four digit Federal Supply Classification.

4. Assigned Federal Supply Classification 3990

A code which identifies the supply classification of an item of supply under the Federal Catalog Program, or an item of production and/or a homogeneous area of commodities with respect to their physical or performance characteristics.

The first two digits identify the Federal Supply Group and the last two digits identify the class within the specified group. The combination of these four digits constitute the Federal Supply Classification.
