FORT RILEY, KANSAS**

ENERGY ENGINEERING ANALYSIS PROGRAM (EEAP)

Prepared for

U.S. Army Corps of Engineers
Kansas City District
Kansas City, Missouri

Under

U.S. Army Engineer District, Mobile
Indefinite Delivery A-E Contract
Contract No. DACA01-94-D-0033
Delivery Order 0001
EMC No. 1406-001

December 1995

By

EMC Engineers, Inc.
2750 S. Wadsworth, Suite C-200
Denver, Colorado 80227
303/988-2951

1. COMPONENT ARMY		FY 1995 MILITARY CONSTRUCTION PROJECT DATA		2. DATE DEC 1995	
3. INSTALLATION AND LOCATION Fort Riley, Kansas			4. PROJECT TITLE Install Basewide Utility Monitoring Control System (UMCS)		
5. PROGRAM ELEMENT	6. CATEGORY CODE	7. PROJECT NO.	8. PROJECT COST (\$000) 5,840		
9. COST ESTIMATES					
ITEM		UM	QUANTITY	UNIT COST	COST (\$000)
Primary Facilities: Provide a UMCS to include 190 buildings. Provide PC-based front-end computers, Central Operator Station, Communication Processor, Remote Control Units, Auxiliary Control Units, Unitary Control Units, sensors, and actuators. Provide fiber optic data transmission to the 190 buildings on the UMCS.		LS			4,698
Estimated Contract Cost					4,698
Contingency (10%)					470
Subtotal					5,168
Supervision, Inspection and Overhead (7.0%)					362
Design Cost (6.0%)					310
TOTAL REQUEST					5,840
TOTAL REQUEST (ROUNDED)					5,840
10. DESCRIPTION OF PROPOSED CONSTRUCTION					
Construct a Utility Monitoring and Control System (UMCS) to monitor and control HVAC systems, and the utilities serving 190 buildings at Fort Riley. The UMCS will replace the existing HVAC control systems and energy monitoring and control system (EMCS). The UMCS would consist of PC-based front-end computers communicating to building control units. Other associated items include software, fiber optic data communication systems, instrumentation, documentation, training, and testing of equipment.					
11. REQUIREMENT					
This project is required to correct local HVAC control problems and deficiencies, in order that environmental cooling and heating are adequately provided for active duty personnel at Fort Riley. This project will replace the existing local loop HVAC controls system with a new UMCS. The UMCS will monitor and control the facilities' HVAC systems, and utilities. This project will reduce the natural gas consumption, electrical consumption, and electric demand of HVAC systems through UMCS control technology. An immediate utility savings would be recognized.					

1. COMPONENT ARMY	FY 1995 MILITARY CONSTRUCTION PROJECT DATA	2. DATE DEC 1995
3. INSTALLATION AND LOCATION Fort Riley, Kansas		
4. PROJECT TITLE Install Basewide Utility Monitoring Control System (UMCS)	5. PROJECT NUMBER	
<p>11. REQUIREMENT (continued)</p> <p>The project will include the following items of work:</p> <ul style="list-style-type: none"> • The UMCS will include PC-based front-end computers communicating to building Control Units, to control and monitor HVAC systems. • Existing automatic temperature control equipment will be removed and disposed of. Some end control device components will be reused in the new UMCS and will be checked and commissioned into operating condition. • New Direct Digital Control (DDC) components will be installed, to provide the required sequences of operation, input/output functions, and monitoring functions, including necessary software, hardware, instrumentation, communications, training, and documentation. • The field hardware in the 23 buildings on the existing EMCS will be replaced. <p>Modifications or repairs to the existing mechanical and electrical equipment would be provided to assure a complete, well operating control system.</p> <p>Additionally, the project will result in a more functionally efficient system providing greater reliability and more accurate temperature control, and will yield significant savings in operating costs by a more accurate and precise operation of air handling units, boilers, chillers, and other equipment.</p> <p><u>Current Situation:</u></p> <p>Fort Riley has an existing EMCS connected to 23 buildings. The EMCS was installed in 1985. The EMCS has a central operator station that includes a TI 112 CPU with a 40 megabyte hard drive, a cartridge tape data storage, a color monitor, a TI terminal printer, two dot matrix printers, and telephone modems. The EMCS has three work stations each consisting of a monitor, a telephone modem, and a dot matrix printer located at three remote sites from the central operator station.</p> <p>Discussions with the EMCS operators at Fort Riley regarding the existing EMCS indicated the system is currently used to its capacity, is energy inefficient, and is technologically obsolete (failing).</p>		

1. COMPONENT ARMY	FY 1995 MILITARY CONSTRUCTION PROJECT DATA	2. DATE DEC 1995
3. INSTALLATION AND LOCATION Fort Riley, Kansas		
4. PROJECT TITLE Install Basewide Utility Monitoring Control System (UMCS)		5. PROJECT NUMBER
<p>11. REQUIREMENT (continued)</p> <p><u>Impact if Not Provided:</u></p> <p>If this project is not funded, a reduction of 211,470 MBtu/yr (223,100,850 MJ/yr) cannot be achieved. The Army will not realize a \$1,525,870 annual energy dollar savings with a 3.95 simple payback and a savings-to-investment ratio (SIR) of 2.3. Excessive amounts of natural gas and electricity will continue to be used, and there will be no contribution to energy reduction goals established for U.S. Army facilities by Army Headquarters.</p> <p><u>Supporting Documentation:</u></p> <p>Supporting data includes basic engineering calculations which show energy savings. The supporting data was documented and conducted under an Army contract performed by an A-E firm (E M C Engineers, Inc.) in FY 95.</p> <p><u>Verification of Savings:</u></p> <p>The Fort Riley Army facility uses existing electrical meters and natural gas meters which are read monthly by the local utility companies. Historic monthly electrical and natural gas use data are available and can be obtained for monthly billing periods. The energy use for billing periods prior to the installation of the UMCS can be compared to the energy use for billing periods subsequent to the UMCS installation.</p> <p><u>Amount of Energy Conserved:</u></p> <p>The amount of energy conserved is estimated to be 211,470 MBtu per year (223,100,850 MJ/yr).</p>		

LIFE CYCLE COST ANALYSIS SUMMARY
ENERGY CONSERVATION INVESTMENT PROGRAM (ECIP)

LOCATION:	Fort Riley	REGION: 2 (Kansas)	PROJECT NO:	1406-005	
PROJECT TITLE:	Feasibility Study for Installation of UMCS		FISCAL YEAR:	1995	
ANALYSIS DATE:	12/13/95	ECONOMIC LIFE:	10	PREPARED BY:	A. Niemeyer

1. INVESTMENT: Install Basewide UMCS with DDC Controls

A. CONSTRUCTION COST	=	\$5,167,395
B. SIOH COST	(7.0% of 1A) =	\$361,718
C. DESIGN COST	(6.0% of 1A) =	\$310,044
D. TOTAL COST	(1A + 1B + 1C) =	\$5,839,156
E. SALVAGE VALUE OF EXISTING EQUIPMENT	=	\$0
F. PUBLIC UTILITY COMPANY REBATE	=	\$0
G. TOTAL INVESTMENT	(1D - 1E - 1F) =	-----> \$5,839,156

2. ENERGY SAVINGS (+) OR COST (-):

DATE OF NISTR 85-3273-9 USED FOR DISCOUNT FACTORS:

ENERGY SOURCE	FUEL COST \$/MBTU (1)	SAVINGS MBTU/YR (2)	ANNUAL \$ SAVINGS (3)	JAN '95 DISCOUNT FACTOR (4)	DISCOUNTED SAVINGS (5)
A. ELECT.	\$12.10	58,176	\$703,926	8.78	\$6,180,473
B. DIST	\$0.00	0	\$0	9.88	\$0
C. NAT GAS	\$4.12	153,296	\$631,580	9.53	\$6,018,953
