Foreword

With this document, Budget of the Union for Science and Technology, - 1987, it is being attempted to provide figures intended not only for technicians in the budget area, but also for the uninitiated, reflecting a simplified account, and offering a clear view of the different S&T activities, in all the ministries. These are detailed accounts, quantitatively expressing one of the principal guidelines from the First PND [National Development Plan]-NR for S&T: "... The totally priority status conferred by the government on the improvement of the needy population's living conditions offers a challenge to scientific and technical policy; it does not suffice to reallocate funds for the pursuit of goals in the future; it is necessary to gear the application of the available information to the solution of social problems now." (First PND-NR)

This budget reflects the MCT's successful efforts to attain its strategic goals, considering the fact that it has increased from 2.8 percent of the Budget of the Union for 1986 to 3.1 percent of that budget for 1987. Hence, there has been concrete progress in the civil society's joint effort, with the government of the New Republic, to construct a prosperous, democratic Brazil.

CNPq wishes, on this occasion, to express appreciation for the essential contribution from SOF/SEPLAN to the accomplishment of this work

Crodowaldo Pavan
President of CNPq

Introduction

This document, "Budget of the Union for Science and Technology - 1987," is an extract from the General Budget of the Union for 1987 Bill; consequently setting forth the action to be taken by the Federal Government during the year, and citing goals to be attained, with the respective financing sources of the organs receiving funds charged to the National Treasury.

Substantial changes made by SOF/SEPLAN in the Budget of the Union have enabled CNPq to reap remarkable dividends of a qualitative nature, of real benefit to the Science and Technology Program executed horizontally by 19 ministries; making clear the simultaneous activity of the universe of institutions engaged in science and technology in the country, in the federal area, and not exclusively those of the Ministry of Science and Technology.

In the bulk of these changes, starting this year, the section relating to the Supervised Entities, in particular, provides the added financial information on the Other Sources component; hence, there are Demonstrative Charts of the Work Program associated with funds from all sources.

This decision is justified in view of the indivisibility of the overall objectives and main goals of each project and activity; so as to better discern the government's action included in the budget.

The amount of funds equivalent to other sources, accounting for only 5 percent of the effort on the part of the Treasury of the Union, by no means warrants a separate analysis, and may be easily identified institutionally, in the individual column, based on the supervised entity.

Methodology

I. Intention

As a direct result of the innovations of a qualitative type introduced by SOF/SEPLAN in the Budget of the Union, CNPq/MCT has as a main objective in this document to break down the spending of all the organs and/or institutions included in the Budget of the Union for Science and Technology, demonstrating the Work Program of the Direct Administration, and of the Supervised Entities receiving funds from the National Treasury.

The Work Program is demarcated in accordance with the Functional Program Classification, in which the government's activities are classified on the basis of the following plan:

Function	Program	Subprogram	Project
	Program	Subprogram	Activity
	Program	Subprogram	Project
		Subprogram	Activity
			Project
			Activity
			Activity

The functions cover the maximum level of accumulations of government activities, through which the major national goals are attained. The programs are extensions of the functions, and represent the ways and means for action, organically interconnected to achieve the goals sought. The subprograms include identifiable partial goals within the end result of a program. The projects/activities represent the combined actions aimed at achieving the goals of the subprograms and programs, as their actual instruments; recording for the first time in this document a brief description of the overall objectives and main goals of each project and activity, as as to afford a better view of the government's action involved in the budget.

II. Data Generation

In the Technical Budget Manual (MTO-01), containing instructions for preparing the SOF/SEPLAN proposals, there are included in Annex VI "Special Instructions for the Budget Units Engaged in Scientific and Technical Activities," the content of which is as follows:

1. Foreword

These special instructions are aimed at improving the quality of the information regarding S&T, so as to allow for the consolidation of the Federal Budget for Science and Technology, as well as to improve the follow-up of projects/activities in the field.

2. Activities in Science and Technology

The C&T activities are those which may be included in one of the following subprograms with functional program classification:

- 054 - Fundamental Research
- 055 - Applied Research
- 056 - Experimental Development
- 057 - Scientific and Technological Information
- 058 - Quality Tests and Analyses
- 059 - Survey of the Environment

- 206 - Post-Graduate Education
- 292 - Geological Surveys
- 296 - Hydrological Studies and Research
- 374 - Brands and Patents
- 375 - Metrology

It is recommended that:

- . The entities specializing in S&T, whether they be financiers or executors, classify their projects and activities in the Science and Technology Program, when appropriate; and
- . The maintenance and development of research centers should be considered an activity to be classified in the Science and Technology Program.

III. Filling Out Forms

When the General Instructions were issued, technicians from SOF/SEPLAN and CNPq held meetings with the Secretariat of Budget and Finance of each one of the ministries involved, in order to improve the Functional Program Classification, making the A&T activities more explicit. Despite this careful methodology, dubious interpretations and/or potential difficulties regarding classification were surmounted through the inclusion of projects and activities, preserving their original classification, but heeding the respective ministerial secretariats, in a process of discussions between CNPq and the organs involved.

IV. Issuance of Listings

With regard to the consistency and issuance of listings, also based on an agreement between SOF/SEPLAN and CNPq/MCT, the same computer data bank was used for the Budget of the Union.

According to specific instructions, S&T was defined as the group of projects/activities comprising the Science and Technology Program (Code 10 of the Functional Program Classification) and the subprograms identified by the codes given in Item II-2.

The listings decided on for this document (Charts) retain the same format as those in the Budget of the Union.

The monetary data may be explained by:

- . Projects and activities
- . Running and capital expenses
- . Treasury and other sources

V. Description of the Charts

Sequentially, the structure of the descriptive financial charts retains the following arrangement:

- . Consolidated by organs and functions
- . Consolidated by source of funds
- . Consolidated according to spending objective
- . Condoliated according to project and activity
- . Demonstration of the outlay by functions
- . Percentage distribution of the outlay by source of funds (graph)
- . Percentage distribution of the outlay by organs (graph)
- . Percentage distribution of the outlay by functions (graph)
- . Percentage distribution of the outlay by programs (graph)
- . Percentage distribution of the outlay by subprograms (graph)
- . Demonstration of the outlay by program and organ
- . Demonstration of the outlay by subprograms, projects, and activities
- . Demonstration of the outlay by budget units, consolidating the Work Program by organ
- Direct Administration -
- . Demonstration of the outlay by budget units, consolidating the Work Program by organ
- Supervised Entities -

Conclusions

In 1987, the funds of the Treasury of the Union for S&T total 17.1 billion cruzados which, when other funds are added, amount to the sum of 18 billion cruzados; because the latter represents 5% of the Treasury source.

Applications in S&T - 1987

	Millions of cruzados	Percentage participation
Treasury funds	17,086	94.47
Funds from other sources	1,001	5.53
Total	18,087	100.00

In terms of overall percentage participation, the Budget of the Union for S&T, Treasury Funds, represents 3.1 percent of the total Budget of the Union, showing a gain of some percentage points over 1986, when this participation was 2.8 percent.

Treasury Funds	Millions of cruzados	Percentage participation
Budget of the Union for S&T	17,086	3.07
General Budget of the Union	556,653	100.00

By organs, from a cumulative standpoint, the applications in S&T of five ministries amount to 85 percent of the total, prominent among which, in order of magnitude, are the Ministry of Science and Technology (30 percent), the Ministry of Agriculture (20 percent), the Presidency of the Republic (16 percent), the Ministry of Education (14 percent), and General Charges of the Union (4 percent), the latter having transferred its appropriations to the

executor organs in 1987, at the beginning of the fiscal year, inasmuch as this relative participation was considerably greater (18 percent) in 1986.

By functions, and cumulatively, four functions out of a total of 12 account for 90 percent of the S&T applications, with special mention given, among those with the largest participation, to: Administration and Planning (47 percent), Agriculture (21 percent), Education and Culture (14 percent), and Energy and Mineral Resources (8 percent).

The appropriations heavily concentrated in the "Administration and Planning" function must be attributed directly to the Ministry of Science and Technology's programming, which has no direct correspondence on the function level in the Functional Program Classification; in other words, given the non-existence of the science and technology function, all the MCT's funds are still classified in the administration and planning function.

In this respect, it should be stressed, based on a strictly technical rationale, that the continuity and systematic maintenance of the Budget of the Union appropriations for science and technology, computed as a government program, are the anticipated behavior; since the advantages and gains from the CNPq/MCT stem from the program's horizontal flexibility. During the past 5 years, the latter has carried out its S&T budget planning work jointly with the General Secretariats of all the ministries, creating, at a given time, a source of budget management directed toward the federal science and technology activities.

The "science and technology" program accounts for 70 percent of the science and technology applications for fiscal year 1987 which, with the addition of the "higher education," "rural development and extension," and "government planning" programs, totals 97 percent of the federal program applications.

	Associative participation			200,000
36100.03100351.724	Union participation in capital of financier of studies & projects to partly allow for the enterprise's operation	200,000		

	Planning and budgeting			11,509
36100.03100402.009	Coordination and planning, to assist the state minister in devising policy guidelines, and to coordinate preparation and evaluation of plans & programs developed by organs directly subordinate to and/or supervised by the ministry	11,509		

	Geographical & statistical information	22,392
36100.03100442.689	Coordination and execution of national cartographic policy, to support with maps and charts the planning & execution work of the various sectorial policies (land, agriculture, energy, environment, mineral-geological, transportation, basic sanitation, and sea & air navigation) Nautical charts (KM2) = 30,501 Aeronautical charts (KM2) = 1,405,000	22,392
	Socioeconomic studies & research	63,890
36100.03100452.694	Contribution to National S&T Development Fund, to lend the fund financial support enabling it to engage in activities in areas to produce information and technology leading to improvement in the population's quality of life	63,890
	Fundamental research	352,212
36100.03100542.639	Development of research in space and atomospheric sciences, to carry out research activities, including physical & chemical research of space phenomena, particularly in radio astronomy and solar physics, geophysics and aeronomics, astrophysics, meteorology, and oceanography Research projects (project) = 7 Works published (unit) = 107	3,200
36100.03100542.694	Contribution to National S&T Development Fund, to lend the fund financial support enabling it to generate information in the area of fundamental research and institutional support to consolidate and develop science and research centers	349,012
	Applied research	1,193,828
36100.03100551.380	Backing for S&T development, to expand improve, and consolidate national S&T competence in the area of universities research centers, and enterprises Financial support (person) = 130 Financial support (institution) = 694	622,800
36100.03100551.695	Spot reception & processing station to allow external users and INPE researchers access to data collected by the "Spot satellite" permitting reception, recording, & digital processing of data from the French satellite "Spot," at INPE's current facilities in Cuiaba (MT) and Cachoeira, Sao Paulo (SP) Reception system adaptation (unit) = 1	10,000

36100.03100552.652	Contribution to Fund to Support Technology, to lend financial backing for planning & administration of projects in sectors of micromechanics, new materials, biotechnology, sea resources, and fine chemistry	2,740
36100.03100552.690	Development & promotion of industrial technology, to reinforce autonomous technological development of the national industrial enterprise by promoting applied research and providing services for extension and dissemination of technological information. Research project (project) = 30 Public servants trained (person) = 300	74,000
36100.03100552.692	Development & application in space technologies, to promote knowledge of the country's natural resources, and to allow for monitoring of changes in environment, using data obtained from satellites and aircraft, and conducting research and development in space, plasma, semiconductor, sensor, combustion and propulsion, computer science, and computer engineering applications Reception, processing, & dissemination (data) = 6,480	21,000
36100.03100552.694	Contribution to National S&T Development Fund, to lend the fund financial support enabling it to develop information & technologies in the applied research area, including human resources training	462,488
36100.03100561.125	Experimental development Development of integrated circuits in the area of microelectronics, to develop complete cycle of integrated circuit manufacture, ensuring competitiveness of end products of the electronics industry by end of the decade Goal will not be attained until 1989	389,467 212,990

36100.03100562.490	Technological development of new materials; implementation of policy action for new materials aimed at establishing types of production and use thereof geared to the national features Training in centers of excellence (centers) = 1 Research projects (project) = 4 Provision of study grant (grant) = 66	80,000
36100.03100562.687	Contribution to Space Activities Fund to lend financial support for S&T development activities in the sector related to space activity	14,768
36100.03100562.694	Contribution to National S&T Development Fund, to lend the fund financial backing in activities using S&T information both to produce new materials, equipment, products, processes, and specific systems or services, and to improve the existing ones technically	66,045
36100.03100562.710	Coordination of activities in the biotechnology field, study and planning of policy in the biotechnology area, and support to research institutes developing biotechnological products or processes of socioeconomic interest	15,664
	Scientific and technological information	35,863
36100.03100572.688	Backing to technological application centers, to provide technical advice to state and municipal S&T centers which have been surveyed and considered strategic in the community Technical assistance (unit) = 15	580
36100.03100572.694	Contribution to National S&T Development Fund, to lend the fund financial backing for activities relating to infrastructure and handling of S&T information	35,283
	Intelligence and counterintelligence services	890
36100.03101692.002	Advice relating to national security, providing direct, immediate advice to the state minister to formulate and execute the policy on national security, mobilization, intelligence, and counterintelligence	890

	Human resources training		556
36100.03102172.007	Human resources training, to promote integrated training of personnel on all levels of grade and service, so as to achieve better working conditions and higher productivity rates Public servants trained (person) = 110	556	

	International cooperation		2,770
36100.03104112.001	Coordination of international affairs, to coordinate, monitor, and analyse plans for technical cooperation and assistance in S&T, including support and promotion of special events in the area	2,770	2,770

Total: 1,045,790 2,144,850 3,190,190,640

This is a U.S. Government publication. Its contents in no way represent the policies, views, or attitudes of the U.S. Government. Users of this publication may cite FBIS or JPRS provided they do so in a manner clearly identifying them as the secondary source.

Foreign Broadcast Information Service (FBIS) and Joint Publications Research Service (JPRS) publications contain political, economic, military, and sociological news, commentary, and other information, as well as scientific and technical data and reports. All information has been obtained from foreign radio and television broadcasts, news agency transmissions, newspapers, books, and periodicals. Items generally are processed from the first or best available source; it should not be inferred that they have been disseminated only in the medium, in the language, or to the area indicated. Items from foreign language sources are translated. Those from English-language sources are transcribed, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by FBIS/JPRS. Processing indicators such as [Text] or [Excerpts] in the first line of each item indicate how the information was processed from the original. Unfamiliar names which are rendered phonetically or transliterated by FBIS/JPRS are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear from the original source but have been supplied as appropriate to the context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by the source.

SUBSCRIPTION/PROCUREMENT INFORMATION

The FBIS DAILY REPORT contains current news and information and is published Monday through Friday in 8 volumes: China, East Europe, Soviet Union, East Asia, Near East & South Asia, Africa (Sub-Sahara), Latin America, and West Europe. Supplements to the DAILY REPORTs may also be available periodically and will be distributed to regular DAILY REPORT subscribers. JPRS publications generally contain less time-sensitive information and are published periodically. Current JPRS publications are listed in *Government Reports Announcements* issued semi-monthly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161 and the *Monthly Catalog of U.S. Government Publications* issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

U.S. Government offices may obtain subscriptions to the DAILY REPORTs or JPRS publications (hardcovers or microfiche) at no charge through their sponsoring organizations. DOD consumers are required to submit requests through appropriate

command validation channels to DIA, RTS-2C, Washington, D.C. 20301. (Telephone: (202) 373-3771, Autovon: 243-3771.) For additional information or assistance, call FBIS, (703) 527-2368, or write to P.O. Box 2604, Washington, D.C. 20013.

The public may subscribe to either hardcover or microfiche versions of the DAILY REPORTs and JPRS publications through NTIS at the above address or by calling (703) 487-4630. Subscription rates will be provided by NTIS upon request. Subscriptions are available outside the United States from NTIS or appointed foreign dealers. Back issues or single copies of the DAILY REPORTs and JPRS publications are not available. New subscribers should expect a 30-day delay in receipt of the first issue.

Both the DAILY REPORTs and the JPRS publications are on file for public reference at the Library of Congress and at many Federal Depository Libraries. Reference copies may also be seen at many public and university libraries throughout the United States.
