- I. DoD 5010.15.1-M, Volume IV, 1 Dec 75, is changed as follows:
 - A. Page v, Part Two, Section I, Line 1: Delete the word "three" and substitute "four."
 - B. Page v, Part Two, Section I: Add the following paragraph:

The Verb Index which is an alphabetical listing of the "title" line of the DWMSTDP Operation/Element Description sequenced by the verb, page D-1.
 - C. Add pages D-1 after page C-1.
- II. This change is an administrative addition of an index for the elements published in the volume.
- III. This change sheet will be filed in front of the publication for reference purposes, after changes have been made.

FOREWORD

This volume of DoD 5010.15.1-M, "Standardization of Work Measurement," is one of a series published under the authority of DoD Directive 5010.15, Defense Integrated Management Engineering System (DIMES). It provides standard time data for Farming, Fishery, Forestry and Related Occupations as classified by Department of Labor codes, and includes guidelines for uniform application. Some of the tasks covered in the occupations are groundskeeping, mowing, and others of this nature.

Maximum use of the guidelines and standard time data is mandatory at each Department of Defense activity where Labor Performance Standards are developed and applied.

All of the included standard time data have been reviewed and approved by a Joint Service/Agency Standard Time Data Group prior to publication.

A handwritten signature in cursive script that reads "John J. Bennett".

DEFENSE WORK MEASUREMENT STANDARD TIME
DATA PROGRAM (DWMSTDP)

FARMING, FISHERY, FORESTRY AND RELATED OCCUPATIONS

PART ONE - GUIDANCE

CHAPTER I - GENERAL INFORMATION

1.1 PURPOSE

This volume of Farming, Fishery, Forestry and Related Occupations Standard Time Data is one of ten volumes of standard time data in the 11 volume series included in DWMSTDP. Farming, Fishery, Forestry and Related Occupations as categorized by the Department of Labor includes those occupations concerned with growing, harvesting, catching and gathering land and aquatic plant and animal life and the products thereof; and occupations concerned with providing services in support of these activities. This volume provides a single DoD source for Standard Time Data which can be used in the development of labor standards for:

- 1.1.1 Organizations, activities, or functional areas whose primary missions correlate to Farming, Fishery, Forestry and Related Occupations, e.g., an activity whose primary responsibility is groundkeeping, gardening, logging, farming, etc.
- 1.1.2 For Farming, Fishery, Forestry and Related occupations within organizations, activities, or functional areas engaged in other than Farming, Fishery, Forestry and Related occupations; e.g., A groundskeeper assigned to a construction operation.
- 1.1.3 Work performed by personnel whose primary jobs are other than farming, fishery, forestry, and related occupations, but who may actually do that type work as a part of their jobs: e.g., an ammunition handler performing groundkeeping duties within an ammunition depot.

1.2 SCOPE

This publication applies to all military services and defense agencies. The data contained herein will be used to the maximum extent practicable in the development of labor performance standards in compliance with DoD Directive 5010.15.

1.3 APPLICATION

The Farming, Fishery, Forestry and Related Occupations Standard Time Data contained must be applied in accordance with the general information contained in the Basic Volume and the specific instructions contained in this volume.

1.4 SUBMISSION OF NEW DWMSTDP ELEMENTS

All newly developed or existing Farming, Fishery, Forestry, and Related Occupations Standard Time Data not now included herein will be submitted with back-up motions patterns analysis to the Defense Industrial and Management Engineering Office (DIMEO) for review and possible inclusion in the updating changes to this volume. The Basic Volume contains procedures for submitting this input.

CHAPTER II - CODING

2.1 GENERAL

2.1.1 Information requirements applicable to DWMSTDP have been standardized. Applicable DoD Standard Data elements have been utilized and all other data elements have been proposed for data representation standardization action in accordance with the provisions of DoD Instruction 5000.12, "Data Elements and Codes Standardization Procedures" and DoD 5000.12-M.

2.1.2 The complete coding structure for a Defense Work Measurement Standard Time Data Program element is explained in the Basic Volume. Figure 1 highlights a typical Occupation Code, Work Category Code, and Work Sub-Category Code for Farming, Fishery, Forestry, and Related Occupations Data.

Figure 1 - DWMSTDP Coding Structure

2.2 TYPES OF CODES

2.2.1 Occupation Codes

The Occupation Codes for DWMSTDP elements in this volume conform to the numeric codes of Farming, Fishery, Forestry, and Related Occupations listed in the U.S. Department of Labor Dictionary of Occupational Titles. All Department of Labor Farming, Fishery, Forestry, and Related Occupations are shown in Figure 2. Figure 3 identifies the work ascribed to the specific occupations contained in this volume. There are occasions when a standard time data element may have common application to two or more divisions of the total 4 Farming, Fishery, Forestry, and Related Occupational category. If this is the case, an X is used in both the Occupation Division position (second numeric) and the Group position (third numeric), e.g., 4XX. If the common application occurs only within the Occupation Division, an X is used in the Group position only (third numeric) e.g., 40X,42X.

2.2.2 Work Category Code

The two position Work Category Code encircled in Figure 1 further identifies the various types of work performed within the occupation groups. This classification category indicates the major action being performed or major equipment involved in the DWMSTDP element. Figure 4 lists and defines the work categories used in coding Farming, Fishery, Forestry, and Related Occupations standard time data.

2.2.3. Work Sub-Category Code

The two position Work Sub-Category Code encircled in Figure 1 is a sub-division of the Work Category Code and identifies the object, process, or condition associated with the action or equipment. This code is generally oriented to a noun-verb relationship, e.g., SS is the code for "Stone, Scribe" in the element description header line. However, if the noun-verb sequence in the element code causes a duplication of the code, the sequence has been modified. The noun-verb sequence will remain in the verbage of the title whenever possible.

2.3 FUNDAMENTAL STANDARD TIME DATA

Every occupation includes general purpose data such as get, place, read or write which are fundamental to each occupation but not specific to any one. These are called "Universal" and are contained in Volume X - Universal Standard Time Data.

FARMING, FISHERY, FORESTRY AND RELATED OCCUPATIONS WORK CATEGORY CODES

<u>Work Category</u>	<u>Code</u>	<u>Definition</u>
Actuate	AC	Manual manipulation of an object for engaging, disengaging, starting or stopping a device. (Examples: crank, dial set with knob, move lever.)
Job Preparation	JP	The actions required to prepare an object(s), work place, or employee, or any combination of the three for ensuing work. NOTE: Excluded from this category are layout, packaging and machine setup.
Object Handling	OH	The process of manually moving an object for the purpose of changing its location, position, or alignment. The movement path may or may not be fixed. The primary purpose of this handling is not to activate another object or device.
Process Time	PT	The interval of time made up of a combination of manual and machine time components, so integrated that it would be impossible or impractical to separate and analyze them with Methods Time Measurement. Process time may be obtained by stopwatch, manufacturers' specifications or formulae.
Threaded Fastener	TF	Tightening or loosening a threaded object--bolt, nut, screws, or hand-knob by hand. (Examples: fingerturn-per thread, spin, tighten or loosen-moderate pressure.)
Tool Use Hand Operation - Non-powered	TL	The use or preparation for use of any non-powered implement, instrument or utensil held in the hand and used for cutting, hitting, digging, rubbing, etc. (Examples: knife, saw, hammer, shovel, rake, prybar, needle for sewing.)

SECTION I - INDEXES

This provides three indexes as follows:

The Occupation Code Index which includes the page location for each Code in both the DWMSTDP Element Index and the DWMSTDP Element Listing, Page A-1.

The DWMSTDP Element Index which is sequenced according to the DWMSTDP Element Code, page B-1.

The Noun/Verb Index which is an alphabetical listing of the "title" line of the DWMSTDP operation/element description, page C-1.
