Foreword

Personnel surveys enable Navy leadership to set priorities and target policy initiatives to address the needs and concerns of Sailors. The Navy-wide Personnel Survey (NPS) is one such survey that focuses on such topic areas as quality of work life, Sailor demographics, training/education needs, leadership satisfaction, financial status, job satisfaction, career development, and overall satisfaction with Navy life. This report uses data from the 2003 NPS to update a previous report (Thomas & Thomas, 1991) that focused on Sailor family demographics. This information can be used for planning Navy-sponsored family programs, such as child-care and youth programs.

The NPS was conducted under the sponsorship of the Chief of Naval Personnel and was administered between December 2002 and May 2003. The NPS was administered to a random sample of 13,960 active-duty officers and enlisted Sailors on paper (66%) and via the Internet (33%). Overall, the adjusted response rate was 28 percent. The results of the survey were briefed to the Commander, Navy Personnel Command in March 2004 and provided to the Chief of Naval Personnel and his staff in June 2004. A detailed report on the overall findings of the 2003 NPS is provided by Whittam, Janega, and Olmsted (2005).

Questions regarding this report should be directed to Ms Zannette Uriell, (901) 874-4641, or DSN 882-4641, email: zannette.uriell@navy.mil. Questions regarding the NPS survey should be directed to Dr. Kimberly Whittam, (901) 874-2321 or DSN 882-2321, email: kimberly.whittam@navy.mil.

DAVID L. ALDERTON, Ph.D.
Director

Summary

Knowing the demographics of Navy personnel and their families is key to creating good personnel policies. When this information is not readily accessible in existing databases or is inaccurate, estimates based on survey data are often used. The Navy-wide Personnel Survey (NPS) is one survey that can provide such estimates; this technical note provides estimates of family demographics based on the NPS.

The estimates indicate that the majority (60%) of Navy personnel in 2003 had families, with 54 percent having spouses and 45 percent having children under the age of 21. These results are similar to the results found in 1991 (Thomas & Thomas, 1991).

The total number of children in Navy families has decreased since 1991, likely due to the smaller Navy of 2003. However, the ratio of children to active duty personnel is now higher, with there now being about the same number of Navy children as there are Navy personnel. About 35 percent of the children are between 0 and 4 years of age, 33 percent between 5 and 11, and 32 percent between 12 and 21.

Introduction

Background

Knowing the demographics of Navy personnel and their families is key to creating good personnel policies. In some instances, these demographic data are not easily accessible in existing databases. For example, no current Navy or military database captures the religious affiliation of Navy officers. In instances such as this, estimates based on survey data are used. In 2004, the Navy Judge Advocate General requested information from previous Navy-wide Personnel Surveys (NPS) to determine religious affiliation of Navy officers as part of its response to a lawsuit brought against the Navy's Chief of Chaplains.

Surveys are also often used to provide estimates of family-related demographics, such as the numbers of Navy parents and children. In these cases, Navy or military databases may lag or contain inaccuracies due to lack of or inconsistent reporting. This report replicates the methodology of a previous report (Thomas & Thomas, 1991) that focused on Sailor family demographics, updating their estimates of the number of Navy parents and children with data from the 2003 NPS.

Method

The 2003 NPS was used to determine the Navy-wide demographics in this report, using supporting information from the Enlisted Master File and the Officer Master File.

2003 Navy-wide Personnel Survey

The NPS began in 1990 and was designed to be a Navy-wide omnibus survey. The purpose of the NPS was to measure the attitudes and opinions of Sailors regarding a variety of issues important to Navy leadership. To accomplish this purpose, a number of features were built into the design of the NPS. First, the NPS has been administered annually or biennially to facilitate the tracking of trends in Sailor attitudes and opinions. Second, the NPS would be a general issue survey addressing topics of both immediate and enduring interest to the Navy. Third, the NPS would randomly sample both enlisted personnel and officers in great enough numbers such that responses to the survey would be representative of the entire Navy.

The NPS is currently administered to a representative cross-section of the Navy. The survey addresses several major areas of Sailor life, including general demographics, quality of work life, gender integration, training and education needs, satisfaction with leadership, Sailor financial status, detailing, TEMPO (i.e., time spent away from home), job characteristics, job satisfaction, career development, availability of resources, and overall satisfaction with Navy life.

The 2003 NPS was distributed between December 2002 and May 2003. The NPS was administered to a random sample of 13,960 active-duty officers and enlisted Sailors on paper (66%) and via the Internet (33%). Overall, the adjusted response rate was 28 percent. The results of the survey were briefed to the Commander, Navy Personnel Command in March 2004 and

provided to the Chief of Naval Personnel and his staff in June 2004. A detailed report on the overall findings of the 2003 NPS is provided by Whittam, Janega, and Olmsted (2005).

Enlisted and Officer Master Files

The Enlisted Master File and the Officer Master File contain record information for Navy personnel. The NPS data were weighted to reflect the population of the October 2002 files, so that the results would accurately reflect the Navy-wide population of that time period.

Approach

Methods similar to those used by Thomas and Thomas (1991) were employed to allow for more consistent comparisons to be made across time. Cross tabulations were run to determine the number of personnel in several categories of interest. Parents were categorized according to paygrade/rank as well as family status, which is a combination of whether or not there was a spouse and the type of spousal employment, either military or civilian. Civilian spouses were further categorized by whether or not the spouse was employed full- or part-time. For this report, spouses in Reserves were categorized by their civilian job unless the Reserves were their only job and the survey respondent indicated it was full-time.

The number of children is also provided. Children were considered according to the age range of the youngest child in the family as well as the total number of children of Navy personnel across several age ranges. There were 5 categories of age ranges: 0–4 years, 5–11 years, 12–14 years, 15–18 years, and 19–21 years. Analyses were performed altogether, and separately for each gender. Within each table where paygrade/rank is considered, subtotals for Enlisted and Officer are also included.

Results

Since the E-1 paygrade and Flag officers (O-7 and above) were not included in the NPS sample, all tables reflect paygrades E-2 through O-6. Tables are presented in Appendix A for the entire Navy, Appendix B presents the results for males, and Appendix C presents the results for females. A list of tables and appropriate topics are provided below.

Family Status

Tables A-1, B-1, and C-1: Estimated number of parents according to marital status and presence or absence of children (family status).

Tables A-2, B-2, and C-2: Estimated number of parents according to marital status, presence or absence of children, and paygrade/rank (family status by paygrade/rank).

Estimated Number of Parents Based on Age of Youngest Child

Tables A-3, B-3, and C-3: Estimated number of parents by age of youngest child and family status of parent.

Tables A-4, B-4, and C-4: Estimated number of parents by age of youngest child and paygrade/rank of parent.

Tables A-5, B-5, and C-5: Estimated number of parents by age of youngest child and paygrade/rank of parent for single parents.

Tables A-6, B-6, and C-6: Estimated number of parents by age of youngest child and paygrade/rank of parent for dual-military parents.

Tables A-7, B-7, and C-7: Estimated number of parents by age of youngest child and paygrade/rank of parent for those with civilian spouses.

Tables A-8, B-8, and C-8: Estimated number of parents by age of youngest child and paygrade/rank of parent for those with civilian spouses employed full-time.

Tables A-9, B-9, and C-9: Estimated number of parents by age of youngest child and paygrade/rank of parent for those with civilian spouses employed part-time.

Estimated Number of Children

Tables A-10, B-10, and C-10: Estimated number of children by age of children and paygrade/rank of parent.

Tables A-11, B-11, and C-11: Estimated number of children of single parents by age of children and paygrade/rank of parent.

Tables A-12, B-12, and C-12: Estimated number of children of dual-military parents by age of children and paygrade/rank of parent.

Tables A-13, B-13, and C-13: Estimated number of children of military and civilian parents by age of children and paygrade/rank of parent.

Tables A-14, B-14, and C-14: Estimated number of children of military and civilian parents working full-time by age of children and paygrade/rank of parent.

Tables A-15, B-15, and C-15: Estimated number of children of military and civilian parents working part-time by age of children and paygrade/rank of parent.

Discussion

The active-duty Navy of 2003 is about 200,000 members smaller than the Navy of 1991, but the proportions of families is very similar. The majority (60%) of the 2003 Navy has some type of family; about 54 percent have spouses and about 45 percent have children under the age of 21. Families with children have increased slightly from the 42 percent found in 1991 (Thomas & Thomas, 1991). Generally, most who are parents have civilian spouses (37%), while a smaller proportion is a single parent (5%) or a dual-military parent (3%), similar to the 1991 findings. The total number of children in Navy families has also decreased since 1991, most likely due to the fact that the 2003 Navy is smaller. However, the ratio is higher now, with almost one child per adult in 2003 compared to one child per 1.4 adults in 1991.

The child/adult ratio can also be looked at in terms of family type. For those in a single parent family in 2003, there are about 1.7 children per active duty parent. There are also about

1.7 children per active duty parent for those in dual-military parent families, although this number may be confounded somewhat by whether or not the second parent is active duty Navy or is in another service. For those in families with one active duty parent and one civilian spouse, the ratio is 2.10 children per active duty parent.

While the family type (including marital status and parental status) and family size may be extracted from data in Navy databases such as the EMF and OMF, the ages of the children may not be available in those databases. Survey data may then be used to supplement the existing databases by providing more detailed information, such as the ages of Navy children. Results from this report are not directly comparable to the 1991 report because of a difference in age groupings on the survey, but the 2003 data still provide interesting information about Navy families. About 35 percent of Navy children are between 0 and 4 years of age, about 33 percent are between 5 and 11, and about 32 percent are between 12 and 21.

The Navy is committed to providing a good quality of life for Sailors and families (CNO, 2005), and the Navy funds several support programs for that reason. Ages of children are especially important when determining childcare, after-school care, and teen programs. While all families could potentially benefit from these programs, the families most likely to need additional childcare are those with a single parent, dual-military parents, or those with a spouse employed full-time. Thirty-six percent of children in single parent families are between the ages of 0 and 4 while another 34 percent are between 5 and 11. There are fewer children in dual-military families, but the percentage of those between 0 and 4 (54%) is higher than for single parents and lower for those between 5 and 11 (24%). Children of those with civilian spouses employed full-time seem to be older than either children of single parents or of dual-military parents, with only 20 percent of the children between 0 and 4 and another 34 percent between 5 and 11.

While not from an official Navy database, the survey data presented here can still be useful to Navy leadership in providing accurate estimates about the demographics of Navy families. The survey results are comparable to what can be obtained from Navy databases for family status; for example, the 2003 survey data show that 42 percent of men are married parents while the October 2003 Navy database shows 41 percent of men are married parents. Thus, NPS survey data can both serve to validate the accuracy of Navy databases, and also provide data to supplement them.
