| 14. ABSTRACT (<i>Maximum 200 words</i>): This report describes the updating of ARI's educational benefits usage database with Montgomery GI Bill and Army College Fund data for Army Regular, Reserve, and Guard components over the 2005 and 2006 period. For the Regular component, the report includes tabulations of program participation and benefit usage, type of educational program entered, and time between separation and start of education benefits. For Reserve and Guard components, the report includes tabulations by benefit eligibility status, VA training time type, and type of educational program entered. The tabulations are presented by entry cohort, going back to the 1985 entry cohort for all three components. | | | | | |

Updating ARI Educational Benefits Usage Data Bases for Army Regular, Reserve, and Guard: 2005 – 2006

Introduction

This report describes the work done under contract No. W74V8H-06-P-0155 titled "Updating Data Bases for Modeling Army College Fund (ACF) and Montgomery GI Bill (MGIB) Usage".

The provision of educational benefits is an important and expensive program designed to aid recruiting and to address larger social goals. Accordingly, the Army Research Institute for the Behavioral and Social Sciences (ARI) collects and analyzes program participation and benefit usage data and provides it to Army G-1 (Deputy Chief of Staff for Personnel) to support its reporting to Congress. The ARI educational benefits usage database pulls source data from Army personnel records, Defense Manpower Data Center, and Veterans Administration (VA). Program participation and benefit usage rates are calculated by accession cohort for Army College Fund and Montgomery GI Bill programs going back to 1981.

Two databases were processed, analyzed and archived in this effort. The first database contains individual level data on Soldiers who enlisted between fiscal years 1981 and 1986; and the second database contains individual level data on Soldiers who enlisted after 1 July 1985 and enrolled in the Montgomery GI Bill program.

ACF Databases

The ACF/Chapter 32 database has been updated on an annual basis from 1986 to 2002. The database was created originally using the Army Accessions data files from the U.S. Military Entrance Processing Command (MEPCOM). The database was divided into three separate cohorts: the FY81/82 accessions cohort, the FY83/84 accessions cohort, and the FY85/86 accessions cohort. The data for each cohort have been updated annually using the latest information on benefits usage from VA Army College Fund program (Chapter 32) data. At each update, the critical information was first extracted from the data source and then merged into each of the three cohort files. A different set of variable names by time period and cohort was used for each update to support longitudinal analyses.

At the end of each fiscal year, the Defense Manpower Data Center (DMDC) provides ARI with a copy of the VA Chapter 32 data for selected record types. Nearly 3.9 million records were received on the FY04 VA benefit usage data file. These records contain information on

benefit usage, date and amount of contribution, education level and objective, and related facility and training information.

The FY05 VA Chapter 32 data tape from DMDC contained a total of 3,828,663 records. These records were copied and archived onto CD-ROM after processing and verification of data records were completed. Unlike previous updates from 1986 to 2002 where the ACF FY81/82, FY83/84, and the FY85/86 accessions cohort were updated using the most recent VA Chapter 32 data, the FY05 data, along with FY03 and FY04 are archived to facilitate future updates when there is such a need.

MGIB Database

The Montgomery GI Bill (MGIB) database was updated on a quarterly basis using the MGIB data files from DMDC. This database was started in 1991 and was originally updated on an annual basis. Since March 1993, ARI began to receive the update tapes from DMDC on a quarterly basis. This effort allowed the analysis of MGIB usage on a quarterly basis.

Around the fall of 1999, DMDC began to convert the existing legacy system into the Defense Enrollment Eligibility Reporting System (DEERS). Consequently, no MGIB data were available from DMDC until April 2002. The first quarterly data containing Regular Army records received from DMDC after the conversion was as of September 2001, with a new record layout, data dictionary, and more variables than previously provided on the quarterly files. With the help of the DMDC staff familiar with the database, we were able to identify the variables needed for analysis. Beginning in April 2002, we also received quarterly data files for the Army Reserve and National Guard.

Four quarterly MGIB data files were processed for this contract: September 2005, December 2005, March 2006, and June 2006. Upon the processing of each quarterly data set, three sets of tabulation were created, one for the Regular Army, one for the Army Reserve and one for National Guard. In the previous update, major revisions were made in the computer programs for both the Army Reserve and National Guard tabulations to reflect changes suggested by the Contracting Officer's Representative (COR). These changes included the use of Select Reserve (SR) Basic Benefit Eligibility Status (bytes 315-316) and VA Training Time (byte 354) as major variables in the MGIB usage tabulation. The current sets of tables for the Army Reserve and the National Guard also incorporated those changes from the previous update.

For the Regular component, the report includes tabulations of program participation and benefit usage, type of educational program entered, and time between separation and start of education benefits. For Reserve and Guard components, the report includes tabulations by benefit eligibility status, VA training time, and type of educational program entered. The tabulations are presented by entry cohort, going back to the 1985 entry cohort for all three components.

As of September 2006, eight additional quarterly files were processed and available for analysis. These files are:

| <u>Type</u> | <u>Date</u> | <u>Total Cases</u> |
|---------------|--|--------------------|
| Regular Army | 4 th quarter 2005 (as of 09/05) | 1,857,859 |
| Regular Army | 1 st quarter 2006 (as of 12/05) | 1,864,783 |
| Regular Army | 2 nd quarter 2006 (as of 03/06) | 1,884,767 |
| Regular Army | 3 rd quarter 2006 (as of 06/06) | 1,903,426 |
| Reserve/Guard | 4 th quarter 2005 (as of 09/05) | 2,030,934 |
| Reserve/Guard | 1 st quarter 2006 (as of 12/05) | 2,044,626 |
| Reserve/Guard | 2 nd quarter 2006 (as of 03/06) | 2,065,231 |
| Reserve/Guard | 3 rd quarter 2006 (as of 06/06) | 2,092,984 |

Documentation

The tabulation of the updated MGIB databases is presented here in three sections:

- I. MGIB Regular Army Analysis Tables
- II. MGIB Army Reserve Analysis Tables
- III. MGIB National Guard Analysis Tables

A compact disk (CD-ROM) is also provided to ARI. It contains electronic versions of the following deliverables: FY05 ACF data file from DMDC; FY05 and FY06 MGIB data files from DMDC; record layouts; data dictionary; SPSS transport files for MGIB databases; MGIB Analysis Tables; and the ACF/MGIB 2006 Contractor Report.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records were no longer existed in the Total Army Personnel Data Base (TAPDB) system.
