*Form Approved*  
*OMB No. 0704-0188*

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

# Embedded Simulation

## Embedded Simulation System Capabilities

- **HLA and DIS compliant**
  - RPR and MATREX FOM
  - DREN connection
  - Classified DVL
- **Man-in-the-loop desktop or SIL**
- **Create a manned vehicle that can control n number of unmanned assets**
  - UGV, UAV, UGS
- **Sub system simulation**
  - Mobility, sensor, lethality, survivability
- **SOSCOE interface**
  - Integrate with real hardware
- **Live/Virtual mix**
  - Real vehicle with simulated sensor and weapon
  - Mission planning and rehearsal capability

## Embedded Simulation Technologies

# Vehicle Dynamics Modeling

## Predict 3-D dynamic response of vehicle systems

- vehicle steering, handling, stability, rollover, slope performance...

## Quantify benefits of tech-insertions or impacts due to configuration changes

- Identify safe limits of operation
- Evaluate field mishaps/accidents

**Integrating FCS representative technologies**

**Integration:**

- Gen 5 Autonomous Navigation System (ANS)
- Tactical Autonomous Combat – Chassis (TAC-C)
- ARL R-CTA developed algorithms

**Test & Experimentation:**

- Address FCS Risk UGV0213
- MULE & ARV relevant scenarios

- Directly address risks associated with employing UGVs in dynamic environments.
- Identify additional risk areas of operating UGVs around moving traffic, pedestrians, and dismounted forces.
