Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

INTRODUCTION

This publication includes all of the Office of Scientific Research and Development reports which have had OSRD numbers assigned to them and which have been forwarded to the Office of Technical Services. It does not include any report having a military security classification, nor does it include reports prepared under OSRD sponsorship which have not had OSRD numbers assigned to them. It was not feasible to include the unnumbered reports due to bibliographic problems which would have delayed publication by several months. If it is possible to prepare a similar list for the unnumbered series at a later date, an effort will be made to do so.

For convenience, the publication is arranged in three parts:

- Part I** A bibliography arranged by OSRD number with the correlated PB numbers. Immediately following the PB number is the volume and page reference in the "Bibliography of Scientific and Industrial Reports" where an abstract of the report may be found.
- Part II** A cross reference list arranged in PB number order and giving the corresponding OSRD number.
- Part III** An author and subject index to the OSRD reports listed in Part I. The entries refer to OSRD numbers.

All of the reports are available from OTS in photostat or microfilm copies at the prices indicated. OTS has no printed copies available for sale. The reports should be ordered from OTS by PB numbers, and the order should be accompanied by a check or money order made payable to the Treasurer of the United States.

*The "Bibliography of Scientific and Industrial Reports" is a weekly publication prepared by OTS containing abstracts of 1,500 scientific and technical reports. Subscriptions at \$10 per year may be placed with the Superintendent of Documents, Washington, D. C.
