**Report Documentation Page**

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

<tbody>
<tr>
<td>The MTC shall be a high fidelity simulation of E-3 mission system hardware, performance, and capability that represents Block 30/35 AWACS.</td>
</tr>
</tbody>
</table>

Includes simulations of sensor systems, data-links, communication and navigation systems, constructive entities, common malfunctions, and databases.

Enables crewmembers to train in a stand-alone mode or networked mode with other DMO participants for a full range of composite force employment options.

Block 30/35 to be replaced by Block 40/45 approximately FY20.

AWACS MTC
AWACS Maintenance Trainer System (MTS)

Kelly Morris
677 AESG/SYCB
(937) 255-
Kelly.Morris@wpafb.af.mil
25 May 10

All information contained in this presentation represents the Government’s understanding of the nature of the anticipated procurement as of the presentation date. All information is subject to change.
## Description

The E-3 MTS primary mission is to provide training and hands on experience as defined in the E-3 AWACS TOs. Mockup exercises familiarize students with physical characteristics, removal and replacement of LRUs, SRUs, BITE and external test connectors.

Capability to conduct advanced 5/7 level training with students using test equipment to troubleshoot instructor created faults.

Program provides support for organic USAF and NATO at Tinker AFB.
AWACS Maintenance Trainer System (MTS)

Acquisition Strategy
Current contract ends 30 Sep 11
Service Disabled Veteran Owned Small Business set aside

AWACS
Flight Crew Trainer (FCT)

Kelly Morris
677 AESG/SYCB
(937) 255-8655
Kelly.Morris@wpafb.af.mil
25 May 10

All information contained in this presentation represents the Government’s understanding of the nature of the anticipated procurement as of the presentation date. All information is subject to change.
The FCT will provide trained, mission qualified crew members for E-3 crewmembers - Pilot, Copilot, Navigator and Flight Engineer including initial, difference, upgrade, continuation, senior staff and recertification.

Both Instructor Based Training (IBT) and Computer Based Training (CBT) will be provided by the contractor through curriculum development. All courseware developed belongs to the government.

FCT will be concurrent with the E-3 aircraft and operate as a high fidelity simulation of the aircraft.

Date: 25 May 10

All information contained in this presentation represents the Government’s understanding of the nature of the anticipated procurement as of the presentation date. All information is subject to change.
The F-15C MTC program consists of simulation system capability provided through the use of an MTC that contains high fidelity cockpits, instructor/operator stations, brief/debrief capabilities, threat stations, command and control stations, a realistic combat environment and DMO Network capability. The ACC aircrews may perform any or all functions identified in the Master Training Task List associated with flying solo or multi-ship missions from mission planning through mission debrief. The capability to simulate all functions associated with all aspects of full spectrum F-15C training and wartime missions are present.

DMO Operations & Integration

Mr. Andrew Hostetter
677 AESG/SYCB
656-6808
Andrew.hostetter@wpafb.af.mil
25 May 2010

All information contained in this presentation represents the Government’s understanding of the nature of the anticipated procurement as of the presentation date. All information is subject to change.
DMO O&I provides the integration and operational services necessary to integrate geographically separated DMO and legacy simulator systems. The contractor provides the necessary infrastructure and updates critical technologies needed to evolve the overall capability of DMO to support a real-time common synthetic battle-space. The contractor establishes and maintains the standards that enable interoperability among dissimilar simulator systems and is the master architect of the DMO Network. The contractor also is required to provide scheduling, network connectivity, and other operational services necessary to support DMO training events.

B-1 Training System

Lindsay Liming
677th AESG/SYCB
(937) 255-2685
Lindsay.liming.1@wpafb.af.mil
25 May 10

Government disclaimer statement indicating that all information is provided for information purposes only, represents a best understanding of the procurement as of the presentation date, and is subject to change.
The objective of the B-1 TS program is to provide the Warfighter fully integrated, cost-effective, high fidelity training in the operation, weapons employment, and maintenance of the B-1 weapon system. The B-1 contract is a 5-year effort that combines concurrency upgrades, Contractor Logistics Support (CLS) and Training Systems Support Center (TSSC) operations. This is not a full scale development for the training system; rather, the modifications to the B-1 TS are to maintain concurrency with the B-1 weapon system and provide CLS for the TS. No new devices will be acquired. The major modification for this contract will be the B-1 Integrated Battle Space (IBS) upgrade, Training System (TS) modification.
B-1 Training System

**Acquisition Strategy**

- Anticipate 90-day transition and 12-month base with 6 one-year option periods
- Service contract
- Firm Fixed Price, IBS and Sustainment Blocks (SB) CLINs are FPIF
- Contract Award Date NLT 1 Oct 2011
  - Allows for a 90-day transition with the incumbent

Summary of Program Requirements

• Modifications to bring Training Systems into configuration concurrency with the B-1 aircraft.
  o Major modification will be the IBS upgrade to the TS
• Full time on-site CLS for the ATS and on-call CLS for the MTS
• Training Software Support Center: Maintain configuration management over training software baselines; maintain the technical order and drawing library for its assigned trainers; perform routine sustainment software changes to maintain the training fidelity of the devices; provide management and database support for Distributed Missions Operations (DMO); correct training system deficiencies.
• Operational sites include Dyess AFB, Ellsworth AFB & Sheppard AFB
