Form Approved  
OMB No. 0704-0188

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

# Impact of materials and process information on product lifecycle

**Project Funding Trends by Commitment and Expenditure of Lifecycle Cost (LCC)**

**85% of life cycle costs and environmental impact is built-into products during design**

From: H. P. Barringer & D. P. Weber (1996) "Lifecycle Cost Tutorial"

# ***Chemical & Materials Dilemma***

## **Technology Development**

- Cycle times 7-30 Years
- Developed independent of application
- Empirical developments
- Modeling
- Multi-scale issues

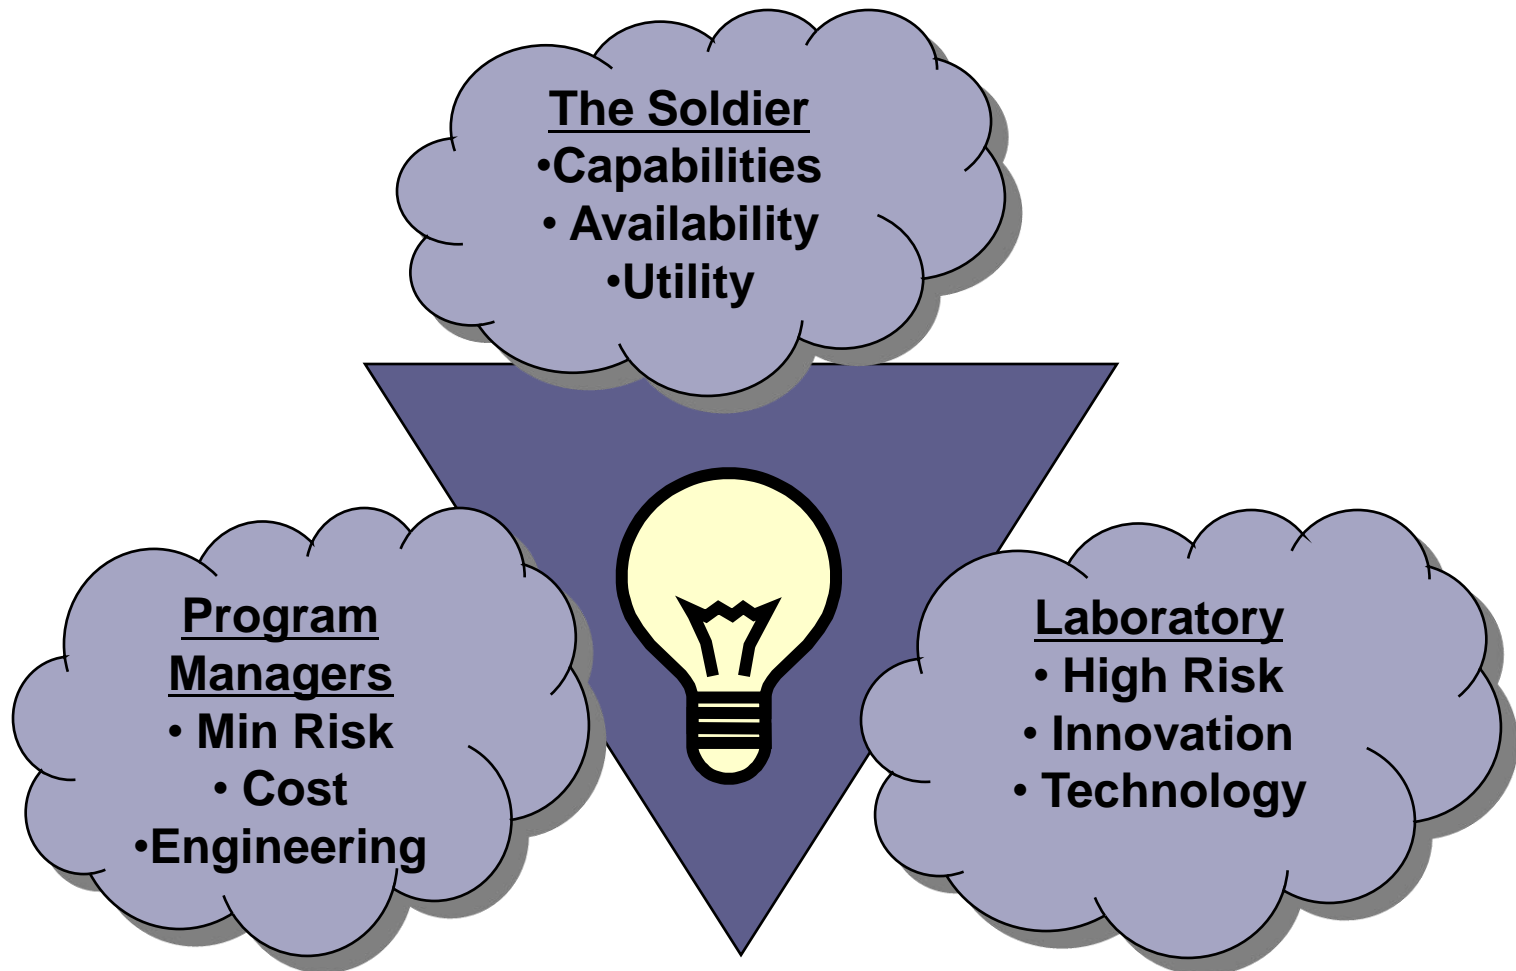

## **Engineering Design**

- Cycle times 3-5 Years
- Requires confidence in materials system
- Risk Averse
- Modeling enables rapid developments in design

**Use of New Materials & Processes only Occurs  
With Mitigation of Risk**

# Technology Dilemma – Differing, Sometimes Conflicting Perspectives/Values

# **Business Transformation**

- ***Standardize ... to significantly enhance the ability to process and share information throughout DoD and the military services.***
- ***Eliminate stovepipes from solution design and deployment.***

# DoD-NASA Partnership

- MAPTIS - Materials & Process Technical Information System
- MAPTIS is a NASA-wide materials database established for the purpose of recording and disseminating material information
- MAPTIS distributes in-house & commercial databases
- Housed and administered by NASA

# Looking Forward

- **Single source – integrate with existing data sources**
- **Track materials to components through acquisition cycle**
- **Investigate restricted materials use**
- **Target implementation strategies**

*TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.*

A soldier in a combat helmet and vest stands in front of a large fire, holding a dog tag that reads "FOCUSED ON THE WARFIGHTER". The soldier is wearing a tan helmet with goggles and a camouflage vest. The background is a bright, intense fire. A machine gun is visible on the right side of the frame. The dog tag is a metal tag with a hole on the left side, and the text is embossed on it. The overall scene is dramatic and emphasizes the soldier's focus on his mission.
