I

EXECUTIVE SUMMARY

On March 2, 2010, the Secretary of Defense appointed the two of us to co-chair a working group to undertake a comprehensive review of the impacts of repeal, should it occur, of Section 654 of Title 10 of the United States Code, commonly known as the “Don’t Ask, Don’t Tell” law. In this effort, we were aided by a highly dedicated team of 49 military and 19 civilian personnel from across the Department of Defense and the Military Services. Our assignment from the Secretary was two-fold: 1) assess the impact of repeal of Don’t Ask, Don’t Tell on military readiness, military effectiveness, unit cohesion, recruiting, retention, and family readiness; and 2) recommend appropriate changes, if necessary, to existing regulations, policies, and guidance in the event of repeal. The Secretary directed us to deliver our assessment and recommendations to him by December 1, 2010.¹ This document constitutes our report of that assessment and our recommendations. The Secretary also directed us to develop a plan of action to support implementation of a repeal of Don’t Ask, Don’t Tell. That plan accompanies this report.

At the outset, it is important to note the environment in which we conducted our work: the Nation’s military has been at war on several fronts for over 9 years. Much is being demanded from the force. The men and women in uniform who risk their lives to defend our Nation are, along with their families, stretched and stressed, and have faced years of multiple and lengthy deployments to Iraq, Afghanistan, and elsewhere. Some question the wisdom of taking on the emotional and difficult issue of Don’t Ask, Don’t Tell on top of all else. For these and other reasons, the Secretary directed that we “thoroughly, objectively and methodically examine all aspects of this question,” and include, most importantly, the views of our men and women in uniform. Accordingly, over the last nine months we:

- solicited the views of nearly 400,000 active duty and reserve component Service members with an extensive and professionally-developed survey, which prompted 115,052 responses—one of the largest surveys in the history of the U.S. military;

¹ During the nine months we conducted our work, the legislative and legal landscape for Don’t Ask, Don’t Tell changed considerably. In May, efforts in Congress to repeal 10 U.S.C. § 654 gained momentum, and a repeal provision was added to the National Defense Authorization Act (NDAA) for Fiscal Year 2011 in both the House and Senate. The amended NDAA passed the full House, but, as of this writing, has not been voted upon by the full Senate. Also, a federal district court in California declared the Don’t Ask, Don’t Tell law to be unconstitutional in September, and issued a worldwide injunction immediately prohibiting Don’t Ask, Don’t Tell enforcement the following month. The decision and injunction were appealed by the Government, and the Court of Appeals for the Ninth Circuit stayed the injunction pending the appeal. As of this writing, the appeal before the Ninth Circuit is still pending. After careful consideration of these legislative and legal developments, we determined they did not alter our assignment in any way.

- solicited the views of over 150,000 spouses of active duty and reserve component Service members, because of the influence and importance families play in the lives of Service members and their decisions to join, leave, or stay in the military, and received 44,266 responses;
- created an online inbox for Service members and their families to offer their views, through which we received a total of 72,384 entries;
- conducted 95 face-to-face “information exchange forums” at 51 bases and installations around the world, where we interacted with over 24,000 Service members—ranging from soldiers at Fort Hood, Fort Benning, and Fort Bragg, sailors at Norfolk, San Diego, and Pearl Harbor, airmen at Lackland, Langley, and Yokota in Japan, Marines at Camp Lejeune, Camp Pendleton, and Parris Island, cadets and midshipmen at our Service academies, and Coast Guardsmen on Staten Island, New York;
- conducted 140 smaller focus group sessions with Service members and their families;
- solicited the views of the Service academy superintendents and faculty, Service chiefs of chaplains, and Service surgeons general;
- solicited and received the views of various members of Congress;
- engaged RAND to update its 1993 study, *Sexual Orientation and U.S. Military Personnel Policy*;
- solicited and received the views of foreign allies, veterans groups, and groups both for and against repeal of the current law and policy; and
- during a two-week period prior to issuance, solicited and received the comments of the Secretaries of the Army, Navy and Air Force, and the Chiefs of each Service, on this report in draft form.

Finally, we heard the views and experiences of current and former Service members who are gay or lesbian. We knew that their viewpoints would be important, and we made affirmative efforts to reach them, though our ability to do so under the current Don’t Ask, Don’t Tell law was limited. The two of us personally interviewed former Service members who are gay or lesbian, including those who had been separated under Don’t Ask, Don’t Tell. To reach those currently in the military, we hired a private company to administer the survey of Service members and an interactive online confidential communications mechanism. This company was obligated to protect the identity of Service members and did not reveal identifying information to the Working Group. Through the confidential communications mechanism, the private company was able to engage a total of 2,691 Service members, 296 of whom self-identified as gay or lesbian, in interactive online conversations about their experiences.

Our Working Group also reviewed hundreds of relevant laws, regulations, and Department of Defense and Service policies and issuances (directives, instructions, and memoranda) and evaluated various policy options. As discussed in detail in section V, the breadth and depth of the Working Group’s work was extensive. To our knowledge, our nine-month review and engagement of the force was the largest and most comprehensive in the history of the U.S. military, on any personnel-related matter.

Based on all we saw and heard, our assessment is that, when coupled with the prompt implementation of the recommendations we offer below, the risk of repeal of Don’t Ask, Don’t Tell to overall military effectiveness is low. We conclude that, while a repeal of Don’t Ask, Don’t Tell will likely, in the short term, bring about some limited and isolated disruption to unit cohesion and retention, we do not believe this disruption will be widespread or long-lasting, and can be adequately addressed by the recommendations we offer below. Longer term, with a continued and sustained commitment to core values of leadership, professionalism, and respect for all, we are convinced that the U.S. military can adjust and accommodate this change, just as it has others in history.²

Significant to our assessment are the following:

The results of the Service member survey reveal a widespread attitude among a solid majority of Service members that repeal of Don’t Ask, Don’t Tell will not have a negative impact on their ability to conduct their military mission.³ The survey was conducted by Westat, a research firm with a long track record of conducting surveys for the U.S. military. The survey was one of the largest in the history of the military. We heard from over 115,000 Service members, or 28% of those solicited. Given the large number of respondents, the margin of error for the results was less than $\pm 1\%$, and the response rate was average for the U.S. military.

The results of the survey are best represented by the answers to three questions:

- When asked about how having a Service member in their immediate unit who said he or she is gay would affect the unit’s ability to “work together to get the job done,” 70% of Service members predicted it would have a positive, mixed, or no effect.⁴
- When asked “in your career, have you ever worked in a unit with a co-worker that you believed to be homosexual,” 69% of Service members reported that they had.⁵

2 Our assessment is based on conditions we observe in today’s U.S. military. It is not meant as commentary on any point prior to today, over the past 17 years since the Don’t Ask, Don’t Tell law was enacted by Congress. Nothing in this report should be construed as doubt by us about the wisdom of enacting 10 U.S.C. § 654 in 1993, given circumstances that existed then.

3 See Section VII, “The Survey Results.”

4 See Appendix C, “Survey Responses: 2010 Department of Defense Survey of Service Members,” Question 68a.

5 See Appendix C, Question 36.

- When asked about the actual experience of serving in a unit with a co-worker who they believed was gay or lesbian, 92% stated that the unit’s “ability to work together” was “very good,” “good,” or “neither good nor poor.”⁶

Consistently, the survey results revealed a large group of around 50–55% of Service members who thought that repeal of Don’t Ask, Don’t Tell would have mixed or no effect; another 15–20% who said repeal would have a positive effect; and about 30% who said it would have a negative effect.⁷ The results of the spouse survey are consistent. When spouses were asked about whether repeal of Don’t Ask, Don’t Tell would affect their preference for their Service member’s future plans to stay in the military, 74% said repeal would have no effect, while only 12% said “I would want my spouse to leave earlier.”⁸

To be sure, these survey results reveal a significant minority—around 30% overall (and 40–60% in the Marine Corps and in various combat arms specialties)—who predicted in some form and to some degree negative views or concerns about the impact of a repeal of Don’t Ask, Don’t Tell. Any personnel policy change for which a group that size predicts negative consequences must be approached with caution. However, there are a number of other factors that still lead us to conclude that the risk of repeal to overall military effectiveness is low.

The reality is that there are gay men and lesbians already serving in today’s U.S. military, and most Service members recognize this. As stated before, 69% of the force recognizes that they have at some point served in a unit with a co-worker they believed to be gay or lesbian.⁹ Of those who have actually had this experience in their career, 92% stated that the unit’s “ability to work together” was “very good,” “good,” or “neither good nor poor,” while only 8% stated it was “poor” or “very poor.”¹⁰ Anecdotally, we also heard a number of Service members tell us about a leader, co-worker, or fellow Service member they greatly liked, trusted, or admired, who they later learned was gay; and how once that person’s sexual orientation was revealed to them, it made little or no difference to the relationship.¹¹ Both the survey results and our own engagement of the force convinced us that when Service members had the actual experience of serving with someone they believe to be gay, in general unit performance was not affected negatively by this added dimension.

Yet, a frequent response among Service members at information exchange forums, when asked about the widespread recognition that gay men and lesbians are already in the military, were words to the effect of: “yes, but I don’t *know* they are gay.” Put another way, the concern with repeal among many is with “open” service.

6 See Appendix C, Question 47a.

7 See Appendix C, Questions 67-75.

8 See Appendix D, “Survey Responses: 2010 Department of Defense Survey of Spouses,” Question 17.

9 See Appendix C, Question 36.

10 See Appendix C, Question 47a.

11 Service members, CRWG Focus Groups, 2010; Service members, Online Inbox, 2010.

In the course of our assessment, it became apparent to us that, aside from the moral and religious objections to homosexuality, much of the concern about “open” service is driven by misperceptions and stereotypes about what it would mean if gay Service members were allowed to be “open” about their sexual orientation. Repeatedly, we heard Service members express the view that “open” homosexuality would lead to widespread and overt displays of effeminacy among men, homosexual promiscuity, harassment and unwelcome advances within units, invasions of personal privacy, and an overall erosion of standards of conduct, unit cohesion, and morality. Based on our review, however, we conclude that these concerns about gay and lesbian Service members who are permitted to be “open” about their sexual orientation are exaggerated, and not consistent with the reported experiences of many Service members.

In today’s civilian society, where there is no law that requires gay men and lesbians to conceal their sexual orientation in order to keep their job, most gay men and lesbians still tend to be discrete about their personal lives, and guarded about the people with whom they share information about their sexual orientation. We believe that, in the military environment, this would be true even more so. According to a survey conducted by RAND of a limited number of individuals who anonymously self-identified as gay and lesbian Service members, even if Don’t Ask, Don’t Tell were repealed, only 15% of gay and lesbian Service members would like to have their sexual orientation known to everyone in their unit.¹² This conclusion is also consistent with what we heard from gay Service members in the course of this review:

“Personally, I don’t feel that this is something I should have to ‘disclose.’ Straight people don’t have to disclose their orientation. I will just be me. I will bring my family to family events. I will put family pictures on my desk. I am not going to go up to people and say, hi there—I’m gay.”¹³

“I think a lot of people think there is going to be this big ‘outing’ and people flaunting their gayness, but they forget that we’re in the military. That stuff isn’t supposed to be done during duty hours regardless if you’re gay or straight.”¹⁴

If gay and lesbian Service members in today’s U.S. military were permitted to make reference to their sexual orientation, while subject to the same standards of conduct as all other Service members, we assess that most would continue to be private and discreet about their personal lives. This discretion would occur for reasons having nothing to do with law, but everything to do with a desire to fit in, co-exist, and succeed in the military environment.

12 RAND, *Sexual Orientation and U.S. Military Personnel Policy - An Update of RAND's 1993 Study*, Santa Monica, CA: National Defense Research Institution, November 2010, 27.

13 Service member, Confidential Communication Mechanism, 2010.

14 Service member, Confidential Communication Mechanism, 2010.

As one gay Service member stated:

“I don’t think it’s going to be such a big, huge, horrible thing that DoD is telling everyone it’s going to be. If it is repealed, everyone will look around their spaces to see if anyone speaks up. They’ll hear crickets for a while. A few flamboyant guys and tough girls will join to rock the boat and make a scene. Their actions and bad choices will probably get them kicked out. After a little time has gone by, then a few of us will speak up. And instead of a deluge of panic and violence...there’ll be ripple on the water’s surface that dissipates quicker than you can watch.”¹⁵

In communications with gay and lesbian current and former Service members, we repeatedly heard a patriotic desire to serve and defend the Nation, subject to the same rules as everyone else. In the words of one gay Service member, repeal would simply “take a knife out of my back...You have no idea what it is like to have to serve in silence.”¹⁶ Most said they did not desire special treatment, to use the military for social experimentation, or to advance a social agenda. Some of those separated under Don’t Ask, Don’t Tell would welcome the opportunity to rejoin the military if permitted. From them, we heard expressed many of the same values that we heard over and over again from Service members at large—love of country, honor, respect, integrity, and service over self. We simply cannot square the reality of these people with the perceptions about “open” service.

Given that we are in a time of war, the combat arms communities across all Services required special focus and analysis. Though the survey results demonstrate a solid majority of the overall U.S. military who predict mixed, positive or no effect in the event of repeal, these percentages are lower, and the percentage of those who predict negative effects are higher, in combat arms units. For example, in response to question 68a, while the percentage of the overall U.S. military that predicts negative or very negative effects on their unit’s ability to “work together to get the job done” is 30%, the percentage is 43% for the Marine Corps, 48% within Army combat arms units, and 58% within Marine combat arms units.¹⁷

However, while a higher percentage of Service members in warfighting units *predict* negative effects of repeal, the percentage distinctions between warfighting units and the entire military are almost non-existent when asked about the *actual* experience of serving in a unit with someone believed to be gay. For example, when those in the overall military were asked about the experience of working with someone they believed to be gay or lesbian, 92% stated that their unit’s “ability to work together,” was “very good, “good” or “neither good nor poor.”¹⁸ Meanwhile, in response to the same question, the percentage is 89% for those in Army combat arms units and 84% for those in Marine combat arms units—all very high percentages.¹⁹ Anecdotally, we heard much the same. As one special operations force warfighter told us, “We have a gay guy [in the unit]. He’s big, he’s mean, and he kills lots of bad guys. No one cared that he was gay.”²⁰

18 See Appendix C, Question 47a.

19 Westat, vol. 1 Appendices J and L, Question 47a.

20 Service member, CRWG Focus Group, 2010.

Thus, the survey results reflecting actual experience, our other engagements, and the lessons of history lead us to conclude that the risks of repeal within warfighting units, while higher than the force generally, remain within acceptable levels when coupled with our recommendations for implementation.

The survey results also reveal, within warfighting units, negative predictions about serving alongside gays decrease when in “intense combat situations.” In response to question 71a, for example, 67% of those in Marine combat arms units predict working alongside a gay man or lesbian will have a negative effect on their unit’s effectiveness in completing its mission “in a field environment or out at sea.” By contrast, in response to the same question, but during “an intense combat situation,” the percentage drops to 48%.²¹ See section VII. While 48% indicates a significant level of concern, the near 20-point difference in these two environments reflects that, in a combat situation, the warfighter appreciates that differences with those within his unit become less important than defeating the common enemy.

Our assessment also took account of the fact that the Nation is at war on several fronts, and, for a period of over nine years, the U.S. military has been fully engaged, and has faced the stress and demands of frequent and lengthy deployments. We conclude that repeal can be implemented now, provided it is done in manner that minimizes the burden on leaders in deployed areas. Our recommended implementation plan does just that, and it is discussed more fully in section XIII of this report and in the accompanying support plan for implementation. The primary concern is for the added requirement that will be created by the training and education associated with repeal. We are cognizant of this concern, but note that during this time of war, the Services have undertaken education and training in deployed areas on a number of important personnel matters. These education and training initiatives have included increased emphasis on sexual assault prevention and response, suicide prevention, and training to detect indications of behavioral health problems. The conduct of these programs in deployed areas indicates that training and education associated with a repeal of Don’t Ask, Don’t Tell can be accommodated. We assess this to be the case, in large part because our recommendations in this report involve a minimalist approach to changes in policies, and education and training to reiterate existing policies in a sexual orientation-neutral manner.

It is also the case that the results of the survey indicate that, in this war-time environment, a solid majority of Service members believe that repeal will have positive, mixed, or no effect. Most of those surveyed joined our military after September 11, 2001, and have known nothing but a military at war.

Our assessment here is also informed by the lessons of history in this country. Though there are fundamental differences between matters of race, gender, and sexual orientation, we believe the U.S. military’s prior experiences with racial and gender integration are relevant. In the late 1940s and early 1950s, our military took on the racial integration of its ranks, *before* the country at large had done so. Our military then was many times larger than it is today, had just returned from World War II, and was in the midst of Cold War tensions and the

21 Westat, vol. 1 Appendices J and L, Questions 71a and 71c.

Korean War. By our assessment, the resistance to change at that time was far more intense: surveys of the military revealed opposition to racial integration of the Services at levels as high as 80–90%.²² Some of our best-known and most-revered military leaders from the World War II-era voiced opposition to the integration of blacks into the military, making strikingly similar predictions of the negative impact on unit cohesion. But by 1953, 95% of all African-American soldiers were serving in racially integrated units, while public buses in Montgomery, Alabama and other cities were still racially segregated.²³ Today, the U.S. military is probably the most racially diverse and integrated institution in the country—one in which an African American rose through the ranks to become the senior-most military officer in the country 20 years before Barack Obama was elected President.

The story is similar when it came to the integration of women into the military. In 1948, women were limited to 2% of active duty personnel in each Service,²⁴ with significant limitations on the roles they could perform. Currently, women make up 14% of the force,²⁵ and are permitted to serve in 92% of the occupational specialties.²⁶ Along the way to gender integration, many of our Nation's military leaders predicted dire consequences for unit cohesion and military effectiveness if women were allowed to serve in large numbers. As with racial integration, this experience has not always been smooth. But, the consensus is the same: the introduction and integration of women into the force has made our military stronger.

The general lesson we take from these transformational experiences in history is that in matters of personnel change within the military, predictions and surveys tend to overestimate negative consequences, and underestimate the U.S. military's ability to adapt and incorporate within its ranks the diversity that is reflective of American society at large.

Our conclusions are also informed by the experiences of our foreign allies. To be sure, there is no perfect comparator to the U.S. military, and the cultures and attitudes toward homosexuality vary greatly among nations of the world. However, in recent times a number of other countries have transitioned to policies that permit open military service by gay men and lesbians. These include the United Kingdom, Canada, Australia, Germany, Italy, and Israel. Significantly, prior to change, surveys of the militaries in Canada and the U.K. indicated much higher levels of resistance than our own survey results—as high as 65% for some areas²⁷—but the actual implementation of change in those countries went much more smoothly than expected, with little or no disruption.

Likewise, the experience of various municipal and federal agencies is somewhat relevant. These agencies include the CIA, FBI, USAID, and the State Department, who at present have personnel who live and work alongside U.S. military personnel in deployed areas. Reportedly, in those agencies the integration of gay and lesbian personnel did not negatively affect institutional or individual job performance.

Finally, our overall assessment is itself based on a risk assessment conducted by a panel of military and DoD career civilian personnel drawn from across the Services, and included those in combat arms specialties. The panel utilized a standard military decision support process recommended by the J-8 directorate of the Joint Staff. This same process has been used by the Department of Defense to support recent decisions about the new Cyber Command location and authority, and the Afghanistan National Security Force size and mix. Upon reviewing the survey results and other information gathered by the Working Group, the panel members utilized their own professional judgment to assess the risk of a repeal of Don't Ask, Don't Tell to military readiness, unit effectiveness, unit cohesion, recruiting, retention, and family readiness. The results of that exercise are detailed in section XI.

Informed by the panel's determinations, as the co-chairs of the Working Group the two of us then assessed the risk of repeal to overall "military effectiveness" as low. Figure 1 depicts the panel's ratings, plus our own assessment of risk to overall military effectiveness.

Figure 1. Assessment of Impact of a Repeal of Don't Ask, Don't Tell

In sum, we are convinced the U.S. military can make this change, even during this time of war. However, this assessment is accompanied by, and depends upon, the recommendations provided in section XIII of this report.

Motivating many of our recommendations is the conclusion, based on our numerous engagements with the force, that repeal would work best if it is accompanied by a message and policies that promote fair and equal treatment of all Service members, minimize differences among Service members based on sexual orientation, and disabuse Service members of any notion that, with repeal, gay and lesbian Service members will be afforded some type of special treatment.

Included, also, should be a message to those who are opposed to “open” service on well-founded moral or religious grounds, that their views and beliefs are not rejected, and that leaders have not turned their backs on them. In the event of repeal, we cannot and should not expect individual Service members to change their personal religious or moral beliefs about homosexuality, but we do expect every Service member to treat all others with dignity and respect, consistent with the core values that already exist in each Service. These are not new concepts for the U.S. military, given the wide variety of views, races, and religions that already exist within the force.

Our most significant recommendations are as follows:

Leadership, Training, and Education. Successful implementation of repeal of Don’t Ask, Don’t Tell will depend upon strong leadership, a clear message, and proactive education. Throughout our review, we heard from a number of senior officers and senior enlisted leaders in all the Services words to the effect of “If the law changes, we can do this; just give us the tools to communicate a clear message.” This will require us to equip commanders in the field with the education and training tools to educate the force on what is expected of them in a post repeal environment. In our support plan accompanying this report, we set forth this key implementation message for repeal:

- *Leadership.* The clear message from the Working Group’s assessment is “leadership matters most.” Leaders at all levels of the chain of command set the example for members in the unit and must be fully committed to DoD policy to sustain unit effectiveness, readiness, and cohesion.
- *Professionalism.* Leaders must emphasize Service members’ fundamental professional obligations and the oath to support and defend the Constitution that is at the core of their military service. In the profession of arms, adherence to military policy and standards of conduct is essential to unit effectiveness, readiness, and cohesion.
- *Respect.* Unit strength depends on the strength of each member. We achieve that strength by treating each member with respect.

In our view, the starting point for this message should be a written communication from the leaders of the Department of Defense, including the Secretary of Defense and senior military leaders of each Service, that deliver their expectations in clear and forceful terms.

Standards of Conduct. Throughout our engagement with the force, we heard many concerns expressed by Service members about possible inappropriate conduct that might take place in the event of repeal, including unprofessional relationships between Service members; public displays of affection; inappropriate dress and appearance; and acts of violence, harassment, and disrespect. Many of these concerns were about conduct that is already regulated in the military environment, regardless of the sexual orientation of the persons involved, or whether it involves persons of the same sex or the opposite sex. For instance, military standards of conduct—as reflected in the Uniform Code for Military Justice, Service regulations and policies, and unwritten Service customs and traditions—already prohibit fraternization and unprofessional relationships. They also address various forms of harassment and unprofessional behavior, prescribe appropriate dress and appearance, and provide guidelines on public displays of affection.

We believe that it is not necessary to establish an extensive set of new or revised standards of conduct in the event of repeal. Concerns for standards in the event of repeal can be adequately addressed through training and education about how already existing standards of conduct continue to apply to *all* Service members, regardless of sexual orientation, in a post-repeal environment.

We do recommend, however, that the Department of Defense issue guidance that all standards of conduct apply uniformly, without regard to sexual orientation. We also recommend that the Department of Defense direct the Services to review their current standards to ensure that they are sexual-orientation neutral and that they provide adequate guidance to the extent each Service considers appropriate on unprofessional relationships, harassment, public displays of affection, and dress and appearance. Part of the education process should include a reminder to commanders about the tools they already have in hand to punish and remedy inappropriate conduct that may arise in a post-repeal environment.

As a related matter, to address tensions and incidents that may arise between individual Service members in a post-repeal environment, including the Service member who simply refuses to serve alongside a gay person, commanders should be reminded of the enormous latitude and discretion they have, for the sake of unit cohesion, to address any situation concerning Service members who are intolerant or intractable in their behavior toward one another.

Moral and Religious Concerns. In the course of our review, we heard a large number of Service members raise religious and moral objections to homosexuality or to serving alongside someone who is gay. Some feared repeal of Don't Ask, Don't Tell might limit their individual freedom of expression and free exercise of religion, or require them to change their

personal beliefs about the morality of homosexuality. The views expressed to us in these terms cannot be downplayed or dismissed. Special attention should also be given to address the concerns of our community of 3,000 military chaplains. Some of the most intense and sharpest divergence of views about Don't Ask, Don't Tell exists among the chaplain corps. A large number of military chaplains (and their followers) believe that homosexuality is a sin and an abomination, and that they are required by God to condemn it as such.

However, the reality is that in today's U.S. military, people of sharply different moral values and religious convictions—including those who believe that abortion is murder and those who do not, and those who believe Jesus Christ is the Son of God and those who do not—and those who have no religious convictions at all, already co-exist, work, live, and fight together on a daily basis. The other reality is that policies regarding Service members' individual expression and free exercise of religion already exist, and we believe they are adequate. Service members will not be required to change their personal views and religious beliefs; they must, however, continue to respect and serve with others who hold different views and beliefs.

Within the chaplain community, the solution to this issue can be found in the existing guidance developed by and for our chaplains, which we believe should be reiterated as part of any education and training concerning repeal. Those regulations strike an appropriate balance between protecting a chaplain's First Amendment freedoms and a chaplain's duty to care for all. Existing regulations state that chaplains “will not be required to perform a religious role...in worship services, command ceremonies, or other events, if doing so would be in variance with the tenets or practices of their faith.”²⁸ At the same time, regulations state that “Chaplains care for all Service members, including those who claim no religious faith, facilitate the religious requirements of personnel of all faiths, provide faith-specific ministries, and advise the command.”²⁹

Privacy and Cohabitation. In the course of our review we heard from a very large number of Service members about their discomfort with sharing bathroom facilities or living quarters with those they know to be gay or lesbian. Some went so far to suggest that a repeal of Don't Ask, Don't Tell may even require separate bathroom and shower facilities for gay men and lesbians. We disagree, and recommend against separate facilities. Though many regard the very discussion of this topic as offensive, given the number of Service members who raised it, we are obliged to address it.

The creation of a third and possibly fourth category of bathroom facilities and living quarters, whether at bases or forward deployed areas, would be a logistical nightmare, expensive, and impossible to administer. And, even if it could be achieved and administered, separate facilities would, in our view, stigmatize gay and lesbian Service members in a manner reminiscent of “separate but equal” facilities for blacks prior to the 1960s. Accordingly,

28 Department of the Army, AR 165-1, *Army Chaplain Corps Activities*, December 3, 2009, 12.

29 Department of the Navy, SECNAVINST 1730.7D, *Religious Ministry within the Department of the Navy*, August 8, 2008, 5.

we recommend that the Department of Defense expressly prohibit berthing or billeting assignments or the designation of bathroom facilities based on sexual orientation. At the same time, commanders would retain the authority they currently have to alter berthing or billeting assignments or accommodate privacy concerns on an individualized, case-by-case basis, in the interests of morale, good order and discipline, and consistent with performance of mission.³⁰ It should also be recognized that commanders already have the tools—from counseling, to non-judicial punishment, to UCMJ prosecution—to deal with misbehavior in either living quarters or showers, whether the person who engages in the misconduct is gay or straight.

Most concerns we heard about showers and bathrooms were based on stereotype—that gay men and lesbians will behave as predators in these situations, or that permitting homosexual and heterosexual people of the same sex to shower together is tantamount to allowing men and women to shower together. However, common sense tells us that a situation in which people of different anatomy shower together is different from a situation in which people of the same anatomy but different sexual orientations shower together. The former is uncommon and unacceptable to almost everyone in this country; the latter is a situation most in the military have already experienced. Indeed, the survey results indicate 50% of Service members recognize they have already had the experience of sharing bathroom facilities with someone they believed to be gay.³¹ This is also a situation resembling what now exists in hundreds of thousands of college dorms, college and high school gyms, professional sports locker rooms, police and fire stations, and athletic clubs around the nation. And, as one gay former Service member told us, to fit in, co-exist, and conform to social norms, gay men have learned to avoid making heterosexuals feel uncomfortable or threatened in these situations.³²

Equal Opportunity. We recommend that, in a post-repeal environment, gay and lesbian Service members be treated under the same general principles of military equal opportunity policy that apply to all Service members. Under the Military Equal Opportunity program, it is DoD policy to “[p]romote an environment free from personal, social, or institutional barriers that prevent Service members from rising to the highest level or responsibility possible. Service members shall be evaluated only on individual merit, fitness, and capability.”³³ This policy goes hand-in-hand with Service-level policies and basic military values that call for treating every military member with dignity and respect.

We do *not* recommend that sexual orientation be placed alongside race, color, religion, sex, and national origin, as a class eligible for various diversity programs, tracking initiatives, and complaint resolution processes under the Military Equal Opportunity Program. We

30 Each Service has directives on command authority, for example: Department of the Air Force, AFI 51-604, *Assumption of Command*, April 4, 2006; Department of the Army, AR 600-20, *Army Command Policy*, April 27, 2010.

31 See Appendix C, Question 87.

32 Retired Service member, communication to CRWG Co-Chair, May 10, 2010.

33 Department of Defense, DoDD 1350.2, *Department of Defense Military Equal Opportunity (MEO) Program*, August 18, 1995, 2-3; Department of Defense, DoDD 1020.2, *Diversity Management and Equal Opportunity (EO) in the Department of Defense*, February 5, 2009, 4.

believe that doing so could produce a sense, rightly or wrongly, that gay men and lesbians are being elevated to a special status as a “protected class” and will receive special treatment. In a new environment in which gay and lesbian Service members can be open about their sexual orientation, we believe they will be accepted more readily if the military community understands that they are simply being permitted equal footing with everyone else.

In the event of repeal of Don’t Ask, Don’t Tell, the Department of Defense should make clear that sexual orientation may not, in and of itself, be a factor in accession, promotion, or other personnel decision-making. Gay and lesbian Service members, like all Service members, would be evaluated only on individual merit, fitness, and capability. Likewise, the Department of Defense should make clear that harassment or abuse based on sexual orientation is unacceptable and that all Service members are to treat one another with dignity and respect regardless of sexual orientation. Complaints regarding discrimination, harassment, or abuse based on sexual orientation can be dealt with through existing mechanisms—primarily the chain of command—available for complaints not involving race, color, sex, religion, or national origin.

Benefits. As part of this review, we considered appropriate changes, in the event of repeal, to benefits to be accorded to same-sex partners and families of gay Service members. This issue is itself large and complex, and implicates the ongoing national political and legal debate regarding same-sex relationships.

Members of the U.S. military are eligible for and receive a wide array of benefits and support resources, both for themselves and their families. A reality is that, given current law, particularly the Defense of Marriage Act, there are a number of those benefits that cannot legally be extended to gay and lesbian Service members and their same-sex partners, even if they are lawfully married in a state that permits same-sex marriage. An example of this is the Basic Allowance for Housing at the “with-dependent rate.” The “with-dependent” rate is limited by statute to Service members with “dependents.”³⁴ The word “dependent” is also defined by statute and is limited to the Service member’s “spouse” or dependent parents, unmarried children, or certain others under the age of 23 who are placed in the legal custody of the Service member.³⁵ And, the Defense of Marriage Act limits the definition of the word “spouse” to mean “only a person of the opposite sex who is a husband or wife.”³⁶

However, there are some benefits that are now, under current law and regulations, fully available to anyone of a Service member’s choosing, including a same-sex partner, because they are “member-designated” benefits. Examples here are beneficiaries for Servicemembers’ Group Life Insurance and Thrift Savings Plan, missing member notification, and hospital visitation access. If Don’t Ask, Don’t Tell is repealed, Service members may designate a same-sex partner for these benefits without then having to conceal the nature of the relationship from the military. In the event of repeal, the Department of Defense and

34 37 U.S.C. § 401.

35 37 U.S.C. § 401.

36 1 U.S.C. § 7.

the Services should inform Service members about these types of benefits so that they can take advantage of them for their committed same-sex partners should they desire to do so.

A third category of benefits are those that are not statutorily prohibited, but that current regulations do not extend to same-sex partners. With regard to this category, the Department of Defense and the Services have the regulatory flexibility to revise and redefine the eligible beneficiaries to include same-sex partners. Here, we recommend that, where justified from a policy, fiscal, and feasibility standpoint, the benefit be refashioned to become a member-designated one—in other words, to give the Service member, gay or straight, the discretion to designate whomever he or she wants as beneficiary. An example of a benefit in this category is the provision of free legal services by a military legal assistance office, and it may be suitable for this member-designated approach. Military family housing is another prominent benefit in this category. However, we do *not* recommend at this time that military family housing be included in the benefits eligible for this member-designated approach. Permitting a Service member to qualify for military family housing, simply by designating whomever he or she chooses as a “dependent,” is problematic. Military family housing is a limited resource and complicated to administer, and a system of member designation would create occasions for abuse and unfairness.³⁷

Also, we are *not*, at this time, recommending that the Department of Defense or the Services revise their regulations to specifically add same-sex committed relationships to the definition of “dependent,” “family members,” or other similar terms in those regulations, for purposes of extending benefits eligibility. We are convinced that, to create an environment in which gay and lesbian Service members can win quick and easy acceptance within the military community, repeal must be understood as an effort to achieve equal treatment for all. If, simultaneous with repeal, the Department of Defense creates a new category of unmarried dependent or family member reserved only for same-sex relationships, the Department of Defense itself would be creating a new inequity—between unmarried, committed same-sex couples and unmarried, committed opposite-sex couples. This new inequity, or the perception of it, runs counter to the military ethic of fair and equal treatment, and resentment at perceived inequities runs deep in military families.

We recommend that the particular issue of a “qualifying relationship” status for couples not in a Federally-recognized marriage be revisited as part of a follow-on review of the implementation of a repeal of Don’t Ask, Don’t Tell. This will permit the Department of Defense to revisit and reassess the issue as implementation of repeal is underway. It is also in recognition that the national debate on same-sex marriage and partner benefits is ongoing, and that the judicial and legislative landscape on this issue is in a state of flux.

³⁷ Current Service policies state that non-dependents are not allowed to reside in military family housing. We do not recommend any changes to those policies, other than to state that any exception to policy to allow a non-dependent to reside in military family housing, be administered without regard to sexual orientation.

Re-accession. In the event of repeal, we recommend that Service members who have been previously separated under Don't Ask, Don't Tell be permitted to apply for reentry into the military, pursuant to the same criteria as others who seek reentry. The fact that their separation was for homosexual conduct would not be considered as part of the Service member's application for re-accession. For example, a Service member separated under Don't Ask, Don't Tell who received an honorable discharge would be evaluated for re-accession under the same criteria that other Service members who had received honorable discharges would be. Further, consistent with the practice for other Service members who apply for re-accession, we recommend that the Service member who applies for re-accession after having been separated under Don't Ask, Don't Tell not be given any type of credit for the time out of service, subject to any actions a board for the correction of military records may, in its discretion, take.

UCMJ. We support the pre-existing proposals to repeal Article 125 of the Uniform Code of Military Justice and remove private consensual sodomy between adults as a criminal offense. This change in law is warranted irrespective of whether Don't Ask, Don't Tell is repealed, to resolve any constitutional concerns about the provision in light of *Lawrence v. Texas*³⁸ and *United States v. Marcum*.³⁹ We also support revising offenses involving sexual conduct or inappropriate relationships to ensure sexual orientation neutral application, consistent with the recommendations of this report. For example, the offense of adultery defined in the *Manual for Courts-Martial* should be revised to apply equally to heterosexual and homosexual sex that is engaged in by or with a married person.

Follow-on Review. Finally, we recommend that one year after any repeal of Don't Ask, Don't Tell has been in effect, the Department of Defense conduct a follow-on review to monitor the implementation of repeal and to determine the adequacy of the recommended actions that are adopted. This should include a reassessment of the same-sex partner benefits issues referred to earlier.

We are confident in the assessment and recommendations summarized above and detailed in the pages that follow. As stated before, this may have been the most comprehensive and inclusive personnel-related review in the history of the U.S. military. We both personally spent many long hours on this project. Our work was supported by a team of highly-dedicated civilian and military personnel, many of whom are experts in the area of military personnel matters.

Two final points should be made about our mission. In the course of our review, many asked us if the stated positions of the President, the Secretary of Defense, and the Chairman of the Joint Chiefs of Staff in support of repeal in some way influenced, prejudiced, or constrained our review and assessment. This was not the case. The views expressed by

38 539 US 558 (2003).

39 60 M.J. 198 (C.A.A.F. 2004).

Service members and their families in information exchange forums and other engagements were civil and professional, but always frank and diverse and reflected strongly held views both for and against changing the law and policy, without regard to the views expressed by our national leaders.

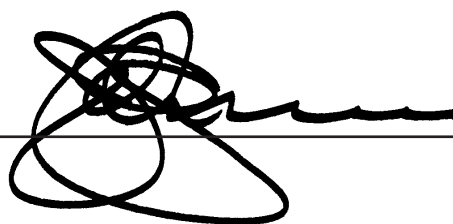

Next, our mandate was to assess the impact of repeal of Don't Ask, Don't Tell, and how best to implement repeal should it occur; we were not asked to determine *whether* the Don't Ask, Don't Tell law and policy *should* be repealed. However, our engagement of the force was wide-ranging enough that we did answer the question of *whether* the U.S. military *can* implement repeal of Don't Ask, Don't Tell. To be clear, the Service member survey did not ask the broad question whether Don't Ask, Don't Tell should be repealed. This would, in effect, have been a referendum, and it is not the Department of Defense's practice to make military policy decisions by a referendum of Service members. But, among the 103 questions in the Service member survey and the 44 questions in the spouse survey were numerous opportunities to express, in one way or another, support for or opposition to repeal of the current policy. Among the 72,000 online inbox submissions were numerous expressions both for and against the current policy. If the impact of repeal was predominately negative, that would have revealed itself in the course of our review.

Further, as co-chairs, we believe we are both personally required to report our honest and candid assessments to the Secretary—either as the solemn duty of a military officer to his civilian leadership, or because of the fiduciary obligation a lawyer owes his client. Thus, if our assessment was that the risk to military effectiveness of implementing repeal was unacceptable, we both would have been obligated to report that to the Secretary.

We are both convinced that our military can do this, even during this time of war. We do not underestimate the challenges in implementing a change in the law, but neither should we underestimate the ability of our extraordinarily dedicated Service men and women to adapt to such change and continue to provide our Nation with the military capability to accomplish any mission.

Carter F. Ham

BACKGROUND

Law and Regulations

Section 654 of Title 10 of the United States Code, commonly known as the Don't Ask, Don't Tell law, was enacted by Congress and signed into law by President Bill Clinton in 1993, following a protracted and high-profile political debate through much of that year concerning homosexuality in the U.S. military.⁴⁰

The law, formally titled “Policy concerning homosexuality in the armed forces,” states that a member of the armed forces “shall be separated from the armed forces” if it is found that he or she:

1. “has engaged in, attempted to engage in, or solicited another to engage in a homosexual act or acts,” unless the member demonstrates, among other things, that “such conduct is a departure from the member’s usual and customary behavior” and “under all the circumstances, is unlikely to recur”;
2. “has stated that he or she is a homosexual or bisexual, or words to that effect,” unless the member demonstrates that “he or she is not a person who engages in, attempts to engage in, has a propensity to engage in, or intends to engage in homosexual acts”; or
3. “has married or attempted to marry a person known to be of the same biological sex.”

This law is implemented by the Department of Defense through DoD Instruction 1332.14, *Enlisted Administrative Separations*;⁴¹ DoD Instruction 1332.30, *Officer Separations*;⁴² and DoD Instruction 1304.26, *Qualification Standards for Enlistment, Appointment, and Induction*.⁴³

40 The historical account in this Law and Regulations subsection is drawn in large part from the 1993 study by RAND and its 2010 update. (RAND, *Sexual Orientation and U.S. Military Personnel Policy: Options and Assessment*, Santa Monica, CA: National Defense Research Institution, 1993; RAND, 2010.)

41 Department of Defense, DoDD 1332.14, *Enlisted Administrative Separations*, December 21, 1993.

42 Department of Defense, DoDD 1332.30, *Separation of Regular Commissioned Officers*, December 21, 1993.

43 Department of Defense, DoDD 1304.26, *Qualification Standards for Enlistment, Appointment, and Induction*, December 21, 1993.

In short, the Don't Ask, Don't Tell law and policy set forth three forms of homosexual conduct that require separation of a Service member: acts, statements, or marriage.

The phrase “Don't Ask, Don't Tell” comes from two aspects of the law and policy. First, under DoD policy, sexual orientation is considered to be a “a personal and private matter” and Service members and military recruits are not asked to reveal their sexual orientation (“Don't Ask”). Second, under both the law and policy, a statement by a Service member that he or she is gay is—in addition to homosexual acts and marriage—grounds for separation (“Don't Tell”).

Prior to 1993, there was no Congressional statute that expressly regulated homosexuality in the U.S. military; homosexuality in the military was regulated and restricted through a combination of sodomy prohibitions in military law and military personnel regulations. These restrictions were not formalized until the early 20th century. The first such provision was Article 93 of the Articles of War, enacted in 1917, which prohibited sodomy.⁴⁴ Throughout the World War I and II periods, Article 93 was the principal vehicle by which the military discharged homosexual men and women from service.

After World War II, in October 1949, the Department of Defense issued a memorandum that standardized policy across Services. This policy stated that “homosexual personnel, irrespective of sex, should not be permitted to serve in any branch of the Armed Services in any capacity, and prompt separation of known homosexuals from the Armed Forces be made mandatory.”⁴⁵ That memorandum was followed in 1953 by Executive Order 10450, which declared “sexual perversion” to be cause for dismissal from Federal jobs⁴⁶ and resulted in a significant increase in the annual number of discharges for homosexuality relative to the size of the force.⁴⁷ In 1959, the Department of Defense issued Directive 1332.14, *Administrative Discharges*, that listed homosexual acts and sodomy as “sexual perversion” and, therefore, reason for discharge from military service.⁴⁸ The language of the directive was later altered in 1975 to describe “homosexual acts or other aberrant sexual tendencies” as grounds for dismissal.⁴⁹

Inconsistent application of this policy among the Services led, in 1981, to the issuance of a new memorandum by Deputy Secretary of Defense W. Graham Claytor, Jr. which made discharge mandatory for openly gay or lesbian personnel, and minimizing opportunities for retention.⁵⁰ Among the rationales for the policy of mandatory separation was to provide the Department of Defense with the most legal protection against lawsuits filed by Service members discharged for homosexuality. Subsequently, the revised directives stated that

homosexuality is “incompatible with military service,” as the presence of homosexual personnel would “seriously [impair] the accomplishment of the military mission.”⁵¹ This marks a shift in the justification used for the discharge of gay and lesbian Service member from one based on physical or mental unfitness to serve to one based on negative impacts on mission accomplishment.

Under the 1982 directive the following were grounds for separation: 1) a statement that one was gay; 2) engaging or attempting to engage in homosexual acts; 3) marriage to a person of the same-sex. These are the same three basic elements for separation under today’s Don’t Ask, Don’t Tell law and policy.

On January 29, 1993, President Clinton directed Secretary of Defense Les Aspin to develop a draft executive order that would end discrimination due to sexual orientation in determining who may serve in the U. S. military. On April 5, 1993, Secretary Aspin formed a Military Working Group to develop and assess policy options to meet the President’s requirement.⁵² The Military Working Group was composed of a general or flag officer from each Service and a support staff of approximately 50 officers, enlisted personnel, and civilian employees. The Military Working Group met with Service members as well as with civilian experts on the military; it also examined the experiences of foreign militaries, reviewed available research reports, and military separations data from the Services.⁵³

The 1993 Military Working Group concluded that homosexuality remained inconsistent with military service, and that the presence in the military of individuals identified as homosexuals would have a significantly adverse effect on both the readiness of the force and unit cohesion.⁵⁴

In parallel with the Military Working Group’s study, the Department of Defense contracted RAND to conduct a separate study on the topic to provide “information and analysis required to structure the issues and...[develop] an analytic framework to evaluation a range of implementation alternatives.” RAND collected historical information on racial and gender integration in the U.S. military, identified and interviewed civilian and military personnel from foreign nations that accepted gays and lesbians into military service or anticipated doing so, collected information on public safety organizations within the United States regarding their acceptance of gays and lesbians into their ranks, examined the academic research from social and behavioral science regarding the issue, and analyzed the then-current policy and possible alternatives. RAND’s report concluded that sexual orientation, by itself, was “not germane” to military service and recommended clear standards of conduct for all military personnel, to be equally and strictly enforced, in order to maintain the military discipline necessary for effective operations. RAND recommended a military policy that focused on

51 DoDD 1332.14, 1–9.

52 Department of Defense, *Summary Report of the Military Working Group*, July 1, 1993, 1.

53 DoD, *Summary*, 3.

54 DoD, *Summary*, 11.

actual conduct, not behavior presumed because of sexual orientation, and that the military hold all Service members to the same standard of conduct.⁵⁵

Meanwhile, President Clinton's directive and the studies undertaken by the Military Working Group and RAND sparked a political debate and congressional interest in the subject of homosexuality in the military. The Senate and House Armed Services Committees held hearings on the subject, and called to testify a number of active duty and retired senior military officers, academic researchers, and individuals from interested organizations. Many of those who testified—most prominent among them General Colin Powell, then Chairman of the Joint Chiefs of Staff—expressed opposition to lifting the ban on gays and lesbians in the military.

In the midst of the reviews and the political debate, the Clinton Administration announced its position on the issue—referred to as “Don't Ask, Don't Tell, Don't Pursue.” This approach would have ended the practice of directly questioning recruits about their sexual orientation (“Don't Ask”), would have required gay and lesbian personnel to keep their sexual orientation private (“Don't Tell”), and would have, at least in concept, prevented investigations from being started on an arbitrary basis (“Don't Pursue”).

Ultimately, after hearings and extensive debate, Congress enacted into law much of the Administration's proposal, albeit without the “Don't Pursue” component, as part of the 1994 National Defense Authorization Act. The new law was codified at Section 654 of Title 10 of the United States Code.

Central to the Don't Ask, Don't Tell law were fifteen policy findings by Congress, made after numerous hearings and testimony, and which were similar in large part to the findings and recommendations of the 1993 Military Working Group. These findings noted the importance of high morale, good order and discipline, and unit cohesion to success in combat, the fact that “military life is fundamentally different than civilian life,” and that it is often necessary of military members “involuntarily to accept living conditions and working conditions that are often Spartan, primitive, and characterized by forced intimacy with little or no privacy.” The findings concluded that “[t]he prohibition against homosexual conduct is a longstanding element of military law that continues to be necessary in the unique circumstances of military service” and “[t]he presence in the armed forces of persons who demonstrate a propensity or intent to engage in homosexual acts would create an unacceptable risk to the high standards of morale, good order and discipline, and unit cohesion that are the essence of military capability.”⁵⁶

The Department of Defense implemented the Don't Ask, Don't Tell law by incorporating provisions regarding homosexual conduct into the DoD regulations covering separations

55 RAND, 1993, xxiv.

56 10 U.S.C. § 654.

and accessions.⁵⁷ Based on these DoD regulations, the military departments each issued their own implementing regulations.⁵⁸

Separations

Since 1980, over 32,000 active duty Service members have been separated on the basis of homosexuality or homosexual conduct under Don't Ask, Don't Tell and its predecessor policies; of these more than 13,000 occurred since the law was enacted.⁵⁹

During the early 1980s the number of Service members separated each year for homosexuality was approximately 1,700. This number dropped to approximately 900–1,000 per year between 1987 and 1992. After Don't Ask, Don't Tell was enacted, an average of approximately 700–800 Service members were separated from the military on the basis of homosexual conduct. In the years 1997–2001, separations increased to approximately 1,100 year.⁶⁰

Figure 2. Number of Annual Separations for Homosexual Conduct per 100,000 Active Duty Service Members in the U.S. Military Services by Year

60 OSD(P&R), 2010.

Since Don't Ask, Don't Tell has been in place, approximately 85% of discharges for homosexual conduct have been made on the basis of statements by the Service member, while approximately 15% were on the basis of homosexual acts.⁶¹ Further, 69% of homosexual conduct discharges under Don't Ask, Don't Tell were of male Service members.⁶² Also, the vast majority—nearly 99%—of separations under Don't Ask, Don't Tell have been of enlisted personnel, who make up roughly 84% of the active force.⁶³ Approximately one quarter of these discharges have occurred in the first four months of a Service member's service.⁶⁴

While the over 13,000 active duty Service members discharged under Don't Ask, Don't Tell is itself a substantial number, these discharges constitute a very small portion of the overall number of discharges from the military. Since 2005 the number of discharges for homosexual conduct is just under 1% of all involuntary discharges, which include, for example, discharges for misconduct, medical disqualification, hardship, and indiscipline.⁶⁵ Overall, homosexual conduct discharges represent approximately one third of one percent (0.33%) of all separations, voluntary and involuntary, from the military.⁶⁶

Attitudes of the American Public

Since Don't Ask, Don't Tell was enacted in 1993, a number of public opinion polls reveal shifting public sentiment toward gay men and lesbians in the U.S. military. These polls, and the attitudes they reflect, are of limited relevance for our review but are noted here as they reflect the changing views of society at large—which includes both current and potential future Service members, military families, and others who may influence Service members' views and attitudes.

In the early 1990s, polls by major national polling and news organizations consistently indicated that 50–60% of the American public supported allowing gay men and lesbians to serve in the military, and around 40% supported allowing gay men and lesbians to serve openly. In the years since, polls indicated that public opinion has shifted toward greater support of open military service by gay men and lesbians, as reflected in Figure 3 below. It is significant to note the difference in the level of support for allowing gays and lesbians to serve versus allowing them to serve “openly.”

Figure 3. American Public Support for Allowing Gay Men and Lesbians to Serve in the U.S. Military Services

Source: Polling data collected by CBS/New York Times (1993, 2010), NBC/Wall Street Journal (1993), Newsweek (1994, 1998, 2000), Gallup (1996, 1999, 2001, 2003, 2004, 2005, 2009), MIT (2001), ABC/Washington Post (2001, 2008, 2010), Fox News (2003, 2010), Annenberg (2004), Boston Globe (2005), Pew (2006), CNN (2007, 2010), Quinnipac (2009).

Attitudes of the American Military

Authoritative data on Service members' opinions on whether gays and lesbians should be allowed to serve openly in the military is limited. While several organizations have polled military personnel, these polls tend to lack the methodological rigor of many of the public opinion polls described above. These polls of Service members, limited as they are, show the same general trend over time toward greater support for open service by gay men and lesbians.⁶⁷ However, the trend lags behind the acceptance of open service found in the public at large.

Because of their various limitations, the Working Group has not relied on these polls; nor has the Working Group conducted its own poll of whether Service members think Don't Ask, Don't Tell should be repealed. As stated before, it was not our mission to conduct such a referendum of Service members.

⁶⁷ Polls include Annenberg Public Policy Center, *National Annenberg Election Survey*, Washington, October 2004; Zogby International and Sam Rodgers, *Opinions of Military Personnel on Gays in the Military*, New York, December 2006, 5-7.

Litigation

The Supreme Court has never ruled on the constitutionality of Don't Ask, Don't Tell. However, lower Federal appellate courts have, until recently, consistently upheld the law in the face of constitutional challenges. Plaintiffs in these cases have brought a variety of constitutional challenges to Don't Ask, Don't Tell, including free speech arguments under the First Amendment, and equal protection and substantive due process arguments under the Fifth Amendment.

In evaluating these challenges, the courts until recently have by and large reviewed Don't Ask, Don't Tell under a “rational basis” legal standard, which is the most deferential standard of judicial review. In practice, application of the rational basis standard means that a court will almost always find a law to be constitutional. The courts have also shown substantial deference to the judgments of Congress and the Executive, which they traditionally do in matters involving military affairs. In upholding the constitutionality of Don't Ask, Don't Tell, the courts have relied on the findings made by Congress in 1993, which came after many hearings and much congressional testimony and were codified in the Don't Ask, Don't Tell statute itself.

These early Don't Ask, Don't Tell cases were decided against a backdrop of the Supreme Court's 1986 decision in *Bowers v. Hardwick*.⁶⁸ In that case, the Supreme Court found that there was no fundamental right to engage in consensual, homosexual sodomy.

Seventeen years later, however, in the case *Lawrence v. Texas*,⁶⁹ the Supreme Court overturned *Bowers*. In *Lawrence*, the Court found a Texas law that criminalized homosexual sodomy to be unconstitutional, and ruled that consenting adults have a protected liberty interest to engage in private, consensual sexual intimacy. The Court explicitly rejected *Bowers*, declaring “*Bowers* was not correct when it was decided, and it is not correct today. It ought not to remain binding precedent. *Bowers v. Hardwick* should be and now is overruled.”

Lawrence has had an impact on lower court constitutional challenges to Don't Ask, Don't Tell. Since *Lawrence*, two Federal appellate courts—the U.S. Court of Appeals for the Ninth Circuit, in the case *Witt v. Department of the Air Force*,⁷⁰ and the U.S. Court of Appeals for the First Circuit, in the case *Cook v. Gates*⁷¹—have held that the deferential “rational basis” standard of review is no longer appropriate and have required the government to defend Don't Ask, Don't Tell under a heightened level of constitutional scrutiny. However, these two courts came to different conclusions about the constitutionality of Don't Ask, Don't Tell.

68 478 U.S. 186 (1986).

69 539 U.S. 558 (2003).

70 527 F.3d 806 (9th Cir. 2008).

71 528 F.3d 42 (1st Cir. 2008).

In the First Circuit decision, the government still prevailed: the court held that although Don't Ask, Don't Tell should be subject to heightened scrutiny, it concluded that the law met this standard, by deferring to the findings made by Congress in 1993. In the *Witt* case, however, the Ninth Circuit decided that it must look at the particular facts of each individual case to determine if the application of Don't Ask, Don't Tell to that Service member was constitutional. The court therefore required the government to demonstrate that Major Witt's discharge under Don't Ask, Don't Tell "significantly further[s]" an "important governmental interest," such as military readiness or unit cohesion, and that her discharge was "necessary to further that interest."⁷² The court remanded the case to the district court to evaluate the specific facts of Major Witt's separation against this new, higher standard of review.

Following a 6-day trial in September 2010, the district court held that the government had not met this higher standard and ordered Major Witt to be re-instated in the Air Force, subject to meeting applicable re-entry requirements. As of this writing, the government has appealed the trial court's ruling, and the appeal is pending review by the Ninth Circuit.

Earlier that same month, on September 9, 2010, another Federal district court in California, following an 8-day bench trial, declared Don't Ask, Don't Tell to be unconstitutional in its entirety, in the case *Log Cabin Republicans v. Gates*.⁷³ This case differed in an important way from the *Witt* case in that the court reviewed the Don't Ask, Don't Tell law and policy as applied to everyone, not just the particular plaintiff. The district court held that Don't Ask, Don't Tell violates Service members' substantive due process rights under the Fifth Amendment, as well their free speech rights under the First Amendment. Applying the *Witt* heightened scrutiny standard, the district court ruled that the government had failed to show that Don't Ask, Don't Tell significantly furthers the government's interest in military readiness or unit cohesion. The district court also ruled that Don't Ask, Don't Tell places restrictions on speech that are broader than are reasonably necessary. Consequently, the district court held that the law and policy are unconstitutional.

On October 12, in that same case, the district court issued a worldwide injunction that immediately prohibited enforcement of the Don't Ask, Don't Tell law and policy. The decision and injunction were appealed by the government, and on October 20 the Court of Appeals for the Ninth Circuit stayed the injunction pending the appeal. As of this writing, the appeal before the Ninth Circuit is still pending.

Pending Legislation

In his State of the Union address in January of this year, President Obama declared that Don't Ask, Don't Tell "denies gay Americans the right to serve the country they love

⁷² Id. at 819.

⁷³ Memorandum Opinion, *Log Cabin Republicans v. Gates*, Case No. CV 04-08425-VAP (C.D. Cal., September 9, 2010).

because of who they are,” and he stated his intention to work with the military and Congress to repeal the law.⁷⁴

The following week, on February 2, 2010, the Secretary of Defense and the Chairman of the Joint Chiefs of Staff both testified before the Senate Armed Service Committee in support of repeal of Don't Ask, Don't Tell.⁷⁵ At the same time, Secretary Gates announced his intent to appoint this Working Group. The Working Group was officially established one month later, on March 2, and the Secretary directed that the Working Group submit a report of its assessment and recommendations to him by December 1, 2010.⁷⁶

In May 2010, well before this report was completed, efforts in Congress to repeal the Don't Ask, Don't Tell law gained momentum, and a repeal provision was added to the National Defense Authorization Act (NDAA) for Fiscal Year 2011 in both the House and Senate. On May 27, the House agreed to an amendment to the NDAA (H.R. 5136) to repeal Don't Ask, Don't Tell, and the NDAA, with the amendment, passed the full House on May 28. That same day, the Senate Armed Services Committee added the identical repeal language to its version of the NDAA (S. 3454). Efforts on the Senate floor in September 2010 to pass the NDAA did not yield a vote, and as of this writing, the full Senate has not passed the NDAA for FY 2011.

The repeal provision contained within both the House of Representatives and Senate Armed Services Committee versions of the NDAA would work as follows: once the law is enacted, repeal of 10 U.S.C. § 654 would be effective only after the President, the Secretary of Defense, and the Chairman of the Joint Chiefs deliver to Congress a certification that: 1) they have considered this report and recommendations; 2) the Department of Defense has prepared the necessary post-repeal policies and regulations; and 3) the implementation of those policies and regulations is consistent with the standards of military readiness, military effectiveness, unit cohesion, and recruiting and retention of the Armed Forces. Once the certification is delivered, repeal of 10 U.S.C. § 654 becomes effective 60 days later.⁷⁷

Again, as of this writing, the full Senate has not passed S. 3454, and the FY2011 NDAA containing the repeal provision has not become law.

III OUR MISSION

On February 2, 2010, in testimony before the Senate Armed Service Committee, Secretary of Defense Robert Gates announced his intent to appoint this Comprehensive Review Working Group from within the Department of Defense to, as he put it, undertake a “review of the issues associated with properly implementing a repeal of the ‘Don’t Ask, Don’t Tell’ policy.”⁷⁸ Our mandate from the Secretary was to “thoroughly, objectively and methodically examine all aspects of this question.”⁷⁹

The Working Group was established on March 2, 2010. The Terms of Reference issued to us by the Secretary were to:

1. Determine any impacts on military readiness, military effectiveness, unit cohesion, recruiting, retention, and family readiness and recommend any actions that should be taken in light of such impacts.
2. Determine leadership, guidance, and training on standards of conduct and new policies.
3. Determine appropriate changes to existing policies and regulations, including but not limited to issues regarding personnel management, leadership and training, facilities, investigations, and benefits.
4. Recommend appropriate changes (if any) to the Uniform Code of Military Justice.
5. Monitor and evaluate existing legislative proposals to repeal 10 U.S.C. § 654 and proposals that may be introduced in the Congress during the period of this review.
6. Assure appropriate ways to monitor the workforce climate and military effectiveness that support successful follow-through on implementation.
7. Evaluate the issues raised in ongoing litigation involving 10 U.S.C. § 654.

The Secretary directed that we deliver the report with our assessment and recommendations, as well as a plan of action to support implementation of repeal, by December 1, 2010.

⁷⁸ Senate Committee on Armed Services, *Department of Defense Authorization for Appropriations for Fiscal Year 2011, and to Receive Testimony Relating to the “Don’t Ask, Don’t Tell” Policy*, 111th Cong. 2d Sess., 2010, 56.

⁷⁹ See Appendix A.

Underlying our nine-month assignment were two guiding principles. First, our review was to be wide-ranging and comprehensive, and include “active outreach” across the force. We were directed to “systematically engage” the force at all levels, which necessarily encompassed the large surveys of Service members and spouses, the numerous large-group information exchange forums, the smaller focus group sessions, the online inbox, and the confidential communication mechanism.

In addition, we were directed to solicit the views of military families as part of the review, because of the influence families play on a Service member’s decision to join, stay in, or leave the force.

Second, both the Secretary and we were mindful that Don’t Ask, Don’t Tell is, to many, an emotional, divisive, and political issue, and he directed us to conduct our review in a “professional, thorough and dispassionate manner,” and to “minimize disruption and polarization within the ranks.” In accordance with that, at the outset of our review, we directed Working Group members to leave their personal views about Don’t Ask, Don’t Tell at the door, and we abided by the same principle ourselves. In the course of our work, we studiously avoided soliciting Working Group members’ personal views about the issue.

IV OUR WORKING GROUP

The Working Group was composed of military and civilian personnel from across the Department of Defense and the Military Services. Of the 68 individuals associated with the Working Group, 49 were military, both officer and enlisted, and 19 were civilian personnel.⁸⁰

Air Force Major General Gregory Biscone served as the Working Group's chief of staff and coordinated its efforts.

In addition, because an overwhelming majority of separations under Don't Ask, Don't Tell occurred among the enlisted force, we ensured that the Working Group consisted of a number of enlisted personnel, with Navy Fleet Master Chief Scott Benning serving as the senior enlisted advisor to the Working Group.

A majority of the Working Group's members were assigned to four teams, each led jointly by a senior DoD civilian and a two- or three-star general or flag officer.

Survey Team. Led by Lieutenant General Richard Newton, Air Force Deputy Chief of Staff for Manpower and Personnel, and Mr. Karl Schneider, Principal Deputy Assistant Secretary of the Army for Manpower & Reserve Affairs, this team oversaw the Working Group's engagement of the force, including surveys of Service members and military spouses, the online inbox, and the confidential communication mechanism, and served as our primary interface with RAND.

Legislative, Regulatory, and Legal Team. Led by Mr. Paul Oostburg Sanz, General Counsel of the Navy and Major General Steve Lepper, Deputy Judge Advocate General of the Air Force, this team provided analysis of the various laws, policies, and regulations addressing homosexual conduct and status in the military and civilian life, and provided recommendations for changes to Federal law, the Uniform Code of Military Justice, and certain regulations should Don't Ask, Don't Tell be repealed. This team also monitored and evaluated the legislation pending in Congress to repeal Don't Ask, Don't Tell and the ongoing litigation involving the issue.

Policy Team. Led by Mr. Daniel B. Ginsberg, Assistant Secretary of the Air Force for Manpower and Reserve Affairs, Vice Admiral Mark Ferguson, Chief of Naval Personnel, and Lieutenant General Thomas Bostick, Army Deputy Chief of Staff for Personnel, this team produced recommended changes to policies that would be affected by a repeal of Don't Ask, Don't Tell.

80 See Appendix B, "Comprehensive Review Working Group."

Education and Training Team. Led by Lieutenant General Richard Zilmer, Deputy Commandant for Manpower and Reserve Affairs of the Marine Corps and Mr. Joseph McDade, Jr., Army Assistant Deputy Chief of Staff for Personnel, this team provided recommendations for an education and training plan in the event of repeal of Don't Ask, Don't Tell.

In the course of our review, the Working Group also provided regular reports to and was advised by an "Executive Committee" consisting of the Under Secretary of Defense for Personnel and Readiness; the Under Secretaries and Vice Chiefs of the Army, Navy, and Air Force; the Assistant Commandant of the Marine Corps, the Vice Commandant of the Coast Guard; the senior enlisted leader of each Service; and the Chief and senior enlisted advisor of the National Guard Bureau.

Support for our work was provided by a number of DoD and Service agencies, including the Defense Manpower Data Center; the U.S. Army Research Institute for Behavioral and Social Sciences; the Navy Personnel Research Science and Technology Laboratory; the Army Personnel Survey Office; the Air Force Personnel Survey Office; the Defense Equal Opportunity Management Institute; CNA; the Office of the Department of Defense Historian; the Historians of the Army, Navy, and Air Force; the FBI Historian; the Armed Services Chaplains Board; the U.S. Military Academy (West Point); the U.S. Naval Academy; the U.S. Air Force Academy; the U.S. Coast Guard Academy; and the Surgeons General of the Army, Navy, and Air Force.

Systematic Engagement of the Force

The Secretary of Defense directed our Working Group to engage in a far-reaching effort unlike any other, to “systematically engage the force” about a repeal of Don’t Ask, Don’t Tell. In his initial written direction, the Secretary stated:

“To effectively accomplish this assessment, I believe it essential that the working group systematically engage the force. The participation of a range of age, rank and warfare communities in this study including families, in addition to active outreach across the force is a critical aspect that will undoubtedly lead to insights and recommendations essential to the Department’s implementation of any change.”⁸¹

To accomplish this goal, the Working Group solicited the views of Service members and their families through a variety of means:

Information Exchange Forums. The Working Group conducted 95 “information exchange forums” (IEFs) at 51 separate installations with a total of about 24,000 active duty, guard and reserve Service members. These IEFs typically ranged in size from 150–300 military personnel who, in almost all cases, were assigned to attend by the base or installation leadership. Smaller IEFs were conducted with military spouses at most installations visited. We attended many of the IEFs personally and led the discussions, others were led by other members of the Working Group leadership, generally two team leads and one senior enlisted leader. With very few exceptions, we found the discussion at IEFs to be lively, frank, candid, and at times emotional, but always civil. IEFs were not open to the general public or media, but participants were advised at the outset of each IEF that information expressed at the sessions was not confidential. The following table lists the installations at where we conducted IEFs, in addition to an initial session we conducted at the Pentagon:

81 See Appendix A.

Table 1. Locations of Information Exchange Forums

Army	Marine Corps	Navy
Fort Benning, GA Fort Hood, TX Fort Sam Houston, TX Fort Bragg, NC Fort Eustis, VA Fort Carson, CO Schofield Barracks, HI Fort Shafter, HI Baumholder, Germany Stuttgart, Germany	Camp Lejeune, NC Parris Island, SC MC Air Station Miramar, CA MC Recruit Depot San Diego, CA Camp Pendleton, CA MCBH Kaneohe Bay, HI MCB Okinawa, Japan	NAB Little Creek, VA Norfolk Naval Station, VA Naval Station San Diego, CA Port Hueneme, CA NAS North Island, CA Naval Station Pearl Harbor, HI Naples, Italy Yokosuka NB, Japan
Air Force	Coast Guard	Reserve Components
Lackland AFB, TX Randolph AFB, TX Langley AFB, VA Buckley AFB, CO U.S. Air Force Academy, CO Peterson AFB, CO Hickam AFB, HI Ramstein AB, Germany Yokota AB, Japan	Sand Island, HI Staten Island, NY Coast Guard Headquarters, DC	Arlington Hall Readiness Center, VA Norfolk Reserve Center, VA March AFB, CA Andrews AFB, MD Little Rock, AR MC Reserve Training Center Chicago, IL MC Reserve Training Center Madison, WI Hickam Reserve Center, HI Naval Operations Support Center Great Lakes, IL U.S. Army Reserve Center Honolulu, HI Air Force Reserve Center, HI Air National Guard Center, HI Army National Guard Center, HI

Note: Locations of IEFs are listed according to the Service that had responsibility for the visit; however, most IEFs were attended by personnel from various Services and components.

At the Secretary’s direction, IEFs were not conducted in Iraq and Afghanistan to avoid interference with the missions there. However, at installations such as Fort Hood, Fort Bragg, Fort Benning, Camp Lejeune, and elsewhere, we encountered large numbers of Service members who had deployed to Iraq or Afghanistan one or more times, or were preparing to deploy. These Service members shared their perspectives concerning the impact of repeal in combat situations and deployed environments.

Focus Groups. Typically, as a follow-on to each IEF, the Working Group held focus groups in smaller sessions of 9–12 Service members each (and sometimes family members)—140 in all—intended to understand the views of the military community in a more intimate and relaxed

setting. Trained discussion facilitators from Westat led the focus group sessions. All focus group attendees were told their participation was voluntary and they could leave at any time. Focus group attendees were also asked to honor a request for non-attribution of all comments made during the discussions, but attendees were also told that the confidentiality of comments made in focus groups could not be guaranteed. Similarly, at many installations, we and other senior members of the Working Group conducted small and informal leadership discussion groups with general and flag officers and senior enlisted Service members.

Online Inbox. The Working Group established this mechanism to allow all Service members and their families to anonymously express their views to the Working Group through a website accessible with a Common Access Card (CAC). Access to the online inbox was restricted to CAC holders to help ensure that comments were entered only by Service members. The Working Group also encouraged Service members to input comments provided by their family. To ensure the comments we received did not include identifying information (other than rank and Service), the Working Group contracted with the Data Recognition Corporation to redact names, units, and other similar information prior to providing the comments to the Working Group. In all, the Working Group received 72,384 total comments about Don't Ask, Don't Tell via the online inbox, with 98% (70,732) of these comments from Service members. Among Service member comments, 70% were from the enlisted ranks. Of those Service members who contributed to the online inbox, the breakdown among the Services and grade is given in the figure below:

Service Members' Survey. To conduct a large-scale survey of Service members, we retained the Westat Corporation. Westat has regularly provided research services to agencies of the U.S. Government, as well as businesses, foundations, and state and local governments since 1963. Westat has a long track record of studies that support the military's human resource needs—particularly in the areas of personnel recruitment and retention, quality of life, and programs for military members and their families. The results of these studies are used to shape many of the human resources policies and practices of the Military Services.

The Service member survey was developed by representatives from the Working Group, Westat, the Defense Manpower Data Center, and the Services' survey offices. The survey questions were devised to address each area of the Terms of Reference, as well as additional topics of concern (e.g., privacy) that were identified through our IEFs and other engagements with the forces.

Once drafted, questions were subjected to multiple rounds of review and scrutiny beginning with survey experts from the Military Services, the Defense Manpower Data Center, and the Office of the Undersecretary of Defense for Personnel and Readiness. Prior to release, the Army, Navy, and Air Force Chiefs of Staff, the Commandants of the Marine Corps and Coast Guard all had an opportunity to review and comment upon the survey questions.

Initially, the Working Group intended to solicit 200,000 active duty and reserve component Service members to participate in the survey. At the direction of the Secretary of Defense in May, the Working Group doubled the intended number of recipients to 400,000. Service members solicited to complete the survey were selected at random according to standard practice used by the Defense Manpower Data Center to sample the population. Service members were sampled according to military Service, active/reserve components, pay grade, military occupation, deployment status, location, gender, and family status. The sampling plan also called for an oversampling of certain sub-groups (e.g., enlisted Service members at the grade of E1–E3) who in recent DoD surveys tended to have lower response rates than the overall military population. This combination of stratification and selected oversampling was intended to ensure that survey responses were as representative of the force as possible.

The 103-question web-based survey was designed to take approximately 30 minutes to complete. The survey was released on July 7, 2010, and was available online through August 15, 2010. Service members chosen for the survey received a letter explaining the purpose of the survey, along with a unique PIN for accessing the survey. Survey invitations were sent to Service members via e-mail, and the participants responded to the survey online. Westat sent five reminder notices to Service members; two of the notices were sent by both e-mail and U.S. mail, and the other three reminders were sent by e-mail only.

In all, we received 115,052 responses (28% of those solicited)—making this one of the largest surveys ever within the U.S. military. The percent of Service members who received the survey and responded⁸² by Service were:

- Army – 19% of active duty personnel who received the survey responded, 22% for the Army National Guard, and 25% for U.S. Army Reserve
- Marine Corps – 29% of active duty personnel who received the survey responded and 20% for the Marine Corps Reserve
- Navy – 28% of active duty personnel who received the survey responded and 33% for the U.S. Navy Reserve
- Air Force – 39% of active duty personnel who received the survey responded, 38% for Air Force National Guard, and 39% for the Air Force Reserve
- Coast Guard – 54% of active duty personnel who received the survey responded and 39% for Coast Guard Reserve.

The response rate for this survey, as a whole and by Service, was in-line with typical response rates for surveys within the Department of Defense. Since 2008, DMDC’s Status of Forces Survey (SOFS) program, which features the most comparable methodology to the Service member and spouse surveys (web administration with postal and e-mail notifications and reminders), has seen response rates of 29–32% for Active Duty Service members, and 25–29% for Reservists.⁸³

To offer perspective on the scope and representative accuracy of the survey results, we note that recent Gallup polls of national opinion have surveyed 1,021 respondents to achieve a $\pm 4\%$ margin of error;⁸⁴ and 2,240, to achieve a $\pm 2\%$ margin of error,⁸⁵ with 95% confidence that the results represent the views of the targeted U.S. adult population of more than 227 million.⁸⁶ In comparison, the Service member survey received responses from a significantly larger number of respondents (more than 115,000), representing a much smaller target active duty and reserve (including Coast Guard) population of around 2.2 million.⁸⁷ The number of responses to the Service member survey reduced the margin of

82 These are weighted response rates to reflect the intentional oversampling of certain low-response categories of Service members, such as junior enlisted, as described above. 29% is the overall unweighted response rate.

87 Westat, vol. 1, 18, A1, A6.

error to less than $\pm 1\%$, with a similar 95% level of confidence in the representative accuracy of the results. The spouse survey was similar.

Spouse Survey. We also surveyed the spouses of active duty and reserve component Service members. The spouse survey was, like the Service member survey, created through a joint effort between the Department of Defense and Westat. Questions for the survey were mainly taken from the Service member survey and existing DoD family readiness surveys. Other questions were developed based on issues raised by family members in IEFs and family focus groups. Through an iterative process between Westat and the Working Group, questions were edited, cut, and added in order to effectively assess spouses' attitudes about the potential impact of repeal on recruiting, retention, and family readiness. Further drafts were reviewed by senior Service representatives and representatives from the Office of the Under Secretary of Defense for Personnel and Readiness. The final draft was approved by the Working Group and Westat, after taking into account comments from the Services and Office of the Under Secretary of Defense for Personnel and Readiness.

The final spouse survey included 43 questions and was expected to take 15–20 minutes to complete. In all, 150,186 spouses of Service members were solicited to respond to the survey, randomly selected from a DoD database and chosen for the purposes of obtaining a statistically representative sample.

The spouse survey was sent out via postal mail on August 13, 2010, and responses were accepted until September 26, 2010. Westat sent two reminder notices to spouse non-respondents, followed by a second survey and a final reminder. In addition, the U.S. Coast Guard sent a separate communication encouraging participation in the spouse survey. In all, we received 44,266 responses to the spouse survey, or 30% of those solicited.

Confidential Communication Mechanism. At the outset of this review, we recognized that some Service members, particularly those who are gay or lesbian, would want a means of communicating their thoughts and concerns about Don't Ask, Don't Tell to the Working Group in an anonymous and confidential manner. We also recognized that the viewpoints of current Service members who are gay or lesbian would be important to obtain as part of this review, but that the Working Group's ability to do so was constrained by current law and policy. To meet this need, the Working Group directed the Westat Corporation to design, implement, and manage a confidential communication mechanism to engage Service members, including gay and lesbian Service members, in a live interactive online exchange.

These confidential dialogues offered the opportunity for Service members to engage in confidential online discussions with Westat moderators. Service members were provided a PIN to allow them to use the confidential communication mechanism on a non-government computer and in a place of their choosing. Like the Service member survey, the confidential communication mechanism was open from July 7, 2010, through August 15, 2010. The Working Group ensured that the online confidential communication mechanism was accessible from 8:00 am to 8:00 pm Eastern time, seven days a week, to enable Service

members around the world to utilize it. After conducting an online dialogue, Westat analysts removed information that could be used to personally identify the Service member.

In all, 2,691 Service members and family members made use of the confidential communication mechanism to communicate with Westat, including 296 who self-identified as gay, lesbian, or bisexual.

Confidentiality. In order to protect the confidentiality of individuals who utilized the confidential communication mechanism, Westat obtained a Certificate of Confidentiality from the Department of Health and Human Services. This Certificate also covered other aspects of Westat’s work including the Service member and spouse surveys, and family focus groups. With the Certificate, issued in accordance with section 201(d) of the Public Health Service Act, 42 U.S.C. § 241(d), Westat cannot be compelled to release the identities or identifying characteristics of participants in the surveys, confidential communication mechanism, or family focus groups to Federal, state, or local authorities. Users of the confidential communication mechanism were informed of the Certification of Confidentiality and were told that Westat would not disclose their identity unless a participant provided consent for release of that information or Westat discovered that a participant planned harm against him or herself or another. We are confident that these confidentiality protections helped ensure that gay and lesbian Service members were able to discuss the issues related to their service in the military fully and candidly, without fear that the information they revealed might generate an investigation or discharge under Don’t Ask, Don’t Tell.

Research

The Working Group also turned to a number of academic and research sources, both inside and outside the Department of Defense, to obtain insight in the issues associated with a repeal of Don’t Ask, Don’t Tell.

The Working Group actively engaged with scholars from each of the Service academies. Faculty and researchers at the academies drafted white papers that included useful research and guidance on issues related to repeal. The West Point paper addressed the issue of repeal from a variety of disciplines, including philosophy and ethics, organizational behavior, psychology, sociology, and management. The Air Force Academy paper built on the solid base provided by the West Point paper and extended the discussion into implications for implementation. The Naval Academy paper discussed diversity implications for repeal and provided suggestions for potential implementation. An important contribution of the Coast Guard Academy white paper was a thoughtful discussion of the religious and moral issues related to Don’t Ask, Don’t Tell law.

The Working Group consulted historians from the Department of Defense and the Services, who provided historical insights on topics such as the past usage of surveys in

military personnel studies and the experience of the U.S. military with racial and gender integration.

The Working Group hosted meetings with faculty, scholars, and researchers from the academies, war colleges, research laboratories, and civilian academia with expertise related to military personnel matters, organizational change management, and other relevant issues.

Key Engagements

Consistent with our Terms of Reference, the Working Group engaged a large number of interested and relevant organizations for their advice and viewpoints, including those who are prominent advocates for and against the repeal of Don't Ask, Don't Tell. These meetings spanned nearly the entire period of our review, beginning with an initial round of meetings, at our invitation, not long after the Working Group was first stood up. The advocacy groups and organizations with which we met included:

- Alliance Defense Fund
- Center for American Progress
- Center for Military Readiness
- Center for Security Policy
- Family Research Council
- Focus on the Family
- Heritage Foundation
- Human Rights Campaign
- Liberty Counsel
- OutServe
- Palm Center for the Study of Sexuality in the Military
- Service Members Legal Defense Network
- SLDN Military Outreach Committee
- Service Members United
- USMA Knights Out

We attended most of these meetings personally. We learned much from these organizations, and appreciated the many diverse views provided. These views did much to inform the assessments and recommendations in this report. (These meetings with the Working Group, however, should in no way be interpreted as participation by these

organizations in the Working Group, or endorsement by them of the Working Group or our assessments and recommendations.)

On September 16, 2010, the Working Group met with 15 same-sex partners of gay and lesbian current Service members to hear their viewpoints and experiences.

The Working Group consulted current and former military chaplains in groups and individually, on several occasions. We also personally met with the four heads of the Services' chaplains corps to solicit their views on the impact of repeal. These chaplains were drawn from the full spectrum of religious affiliations, all Military Services, and included junior, mid-level, and senior chaplains. In addition, the Working Group consulted the chaplains' endorsing organizations. At present, there are 202 religious organizations that serve as endorsing agencies for chaplains in the U.S. military. Through the auspices of the Armed Forces Chaplain's Board, the Working Group requested input from all 202 of these endorsing agencies concerning the effect repeal of Don't Ask, Don't Tell may have on the ministry of the chaplains they endorse. The Working Group received replies from 77 of these endorsing organizations. Several other religious organizations, including, for example, the Catholic League and the North Carolina Conference of Methodist Church Youth, submitted unsolicited input, opinion, and documents for the Working Group's consideration.

We personally met with the Service Surgeons General and discussed medical issues associated with repeal of Don't Ask, Don't Tell, such as safety concerns about the blood supply. Additionally, the Working Group reached out to the:

- American Medical Association
- American Psychological Association
- Gay and Lesbian Medical Association

We solicited input from veteran and Military Service organizations. These organizations included:

- Air Force Association
- American Legion
- AMVETS
- Association of the U.S. Army
- Association of the U.S. Navy
- Iraq and Afghanistan Veterans of America
- Marine Corps League
- Military Families United

- Military Officers Association of America
- National Association for Uniformed Services
- National Guard Association of the United States
- National Military Family Association
- Non Commissioned Officers Association
- Reserve Officers Association
- Service Women's Action Network
- Student Veterans of America
- Veterans of Foreign Wars
- Veterans and Military Families for Progress
- Vietnam Veterans of America
- VoteVets

We met with representatives from these veteran and Military Service organizations during March, April, and May. These groups also provided information and other written materials to the Working Group, including surveys, public statements, policy analysis, and testimony. (As above, these meetings did not constitute formal participation in or endorsement of the Working Group process.) Additionally, we met personally with a number of gay and lesbian veterans arranged by the Human Rights Campaign, Servicemembers' Legal Defense Network's Military Outreach Committee and by Servicemembers United.

Finally, we personally visited with and solicited the views of several members of Congress and their staffs.

Overall, the Working Group accepted information from these organizations and any others who offered input.

Engagement with Foreign Militaries

In order to understand the experiences of foreign militaries with the integration of gay and lesbian personnel, the Working Group contacted representatives of all nations who are members of NATO and those nations that contribute to the International Security Assistance Force - Afghanistan, to obtain information on those nations' policies regarding gay and lesbian Service members. General Ham had a number of conversations with counterparts in the European and Israeli militaries. At a conference with his counterparts from the United Kingdom, Canada, Germany, Australia, Denmark, and the Netherlands, Mr. Johnson solicited their views and experiences. On May 19, 2010, members of the Working Group attended a conference held at the Brookings Institution in Washington, D.C. and hosted by the Century Defense Initiative at Brookings and the Palm Center. Senior military officers

and experts from Australia, Britain, Canada, Israel, the Netherlands, and Sweden discussed their experiences with implementing policy changes related to the open service of gay and lesbian Service members in their countries.

The Working Group sought additional, detailed information from the United Kingdom, Canada, and Australia in particular, regarding their transition experiences, implementation plans, and lessons learned.

RAND Study Update

As directed by Secretary Gates in the Terms of Reference, the Working Group engaged RAND to update its 1993 study, *Sexual Orientation and U.S. Military Personnel Policy*. RAND's update provided us with an additional source of input for our assessment and recommendations. For its updated study, RAND's research centered on the following nine areas:

Foreign Militaries. RAND examined the experiences of selected foreign governments that have changed or are considering changing their policies to allow openly gay and lesbian personnel to serve in their militaries. The RAND analysis focused on the following seven countries: Canada, United Kingdom, Germany, the Netherlands, Italy, Israel, and Australia.

Police and Fire Departments and Other Government Organizations. RAND visited domestic police and fire departments and other domestic governmental organizations that have dealt with the issue of integrating gay men and lesbians into their workforces. RAND collected information from 10 police and fire departments, as well as the FBI, CIA, U.S. Agency for International Development, and State Department.

Recruiting and Retention. RAND researched recruiting and retention since its 1993 study and assessed the factors associated with attitudes towards gay men and lesbians in the general population. First, they reviewed recent major studies of the determinants of enlistments and reenlistments and drew from that literature and other available data to describe important trends in these determinants since 1993. Second, they assessed the possible effects of repeal on recruiting and retention by looking at youth survey data and the relevant results from the Working Group's Service member survey.

Military Focus Groups. RAND conducted 22 focus groups with Service members at 10 military bases across the country.

Survey of Serving Gay Men and Lesbians. RAND conducted a limited survey designed to gather information on how gay men and lesbians manage their identity in military units and how that might change if Don't Ask, Don't Tell is repealed. RAND adopted a "peer-to-peer recruitment" approach to conduct its survey. This approach is based on the assumption that there are existing networks of gay and lesbian Service members who are known to

each other. RAND fielded the survey through the Internet, and using this approach, RAND reached 208 self-identified gay and lesbian current Service members.

Unit Cohesion and Performance. RAND updated its 1993 report with new research on unit cohesion and performance conducted since 1993.

Homosexual Identity and Behavior. RAND updated its 1993 report with new data on the prevalence of homosexuality in the general population and the military. RAND also provided updated research on sexual orientation, sexual behavior, and gay and lesbian individual behavior with regard to disclosing their sexual identity. In addition, RAND updated its research on the epidemiology of HIV and other health issues within the gay and lesbian population.

Developments in Policy and Public Opinion Since Passage of Don't Ask, Don't Tell. RAND examined significant events and developments in U.S. military personnel policy regarding sexual orientation since 1993. In addition, RAND overviewed changes in public opinion regarding the ability of gays and lesbians to serve openly in the military.

Implementation. RAND conducted a literature review and engaged in focused field observations on how organizations have changed policies concerning sexual orientation in the workplace and in other relevant contexts, such as college housing.

RAND's updated report served as an additional independent input to our assessment and recommendations, and not as a stand-alone assessment. In many areas, RAND's work overlapped with the Working Group review, while in some areas, they provided new information for our consideration.

Legal and Policy Review

The Working Group identified a number of issues areas that merited a review of existing policies and consideration of possible policy modifications in the event of repeal. These issue areas were identified in large part from what the Working Group learned in our engagements with the force, in addition to those areas specifically listed in the Terms of Reference. Among the issue areas considered by the Working Group were equal opportunity policy; collection and maintenance of data based on sexual orientation; standards of conduct; changes to the Uniform Code of Military Justice and *Manual for Courts-Martial*; privacy and cohabitation; benefits; duty assignments; medical policies; re-accession of prior Service members; moral and religious concerns; and release from service commitments.

For each of these issue areas, and others, the Working Group reviewed the relevant laws, regulations, and Department of Defense and Service policies and issuances (directives, instructions, and memoranda) and evaluated various policy options. The Working Group's work, in doing so, was extensive. For instance, the Working Group issued a data call to the

Services, in response to which the Services submitted 1,007 documents. These documents were integrated in the Working Group's policy analysis. To understand issues related to stationing gay and lesbian Service members and their families overseas, the Working Group compiled and analyzed over 320 Status of Forces Agreements and their amendments, researched the laws and policies regarding homosexuality of 194 countries, and interviewed 21 legal scholars from foreign nations. The Working Group examined data from the Centers for Disease Control and the Department of Health and Human Services, solicited input from medical personnel across the Services, to include the Services Surgeons General, and consulted with medical experts from the American Psychological Association and the American Medical Association. When delving into the benefits issue, the Working Group examined the applicability of 126 military and veterans benefits to same-sex partners and their children that are codified in several hundred enumerated statutes within Titles 10, 37, and 38 of the United States Code. The Working Group conducted a comparative analysis of the laws and policies of all 50 states to understand family law issues, litigation trends under state constitutional rights regarding employment and housing discrimination, and the interrelation and impact of the Defense of Marriage Act. The Working Group reviewed and considered the scores of reports, articles, and research studies received from external advocacy groups and organizations.

Based on this extensive research and policy analysis, input from our engagements with the force, and consultation with policy subject matter experts, the Working Group developed a range of potential courses of action for each issue area. The Working Group then provided these policy options and recommended approach to the Executive Committee for their thoughts and insights into how the Department of Defense should proceed in these areas in the event of repeal. Comments from the Executive Committee informed our ultimate recommendations on these issues, which are summarized in section XIII of this report.

Leadership, Education, and Training

The Working Group worked with the Services' training experts, Service academy staff, and the Defense Equal Opportunity Management Institute to define education and training requirements in the event of repeal and to develop leadership, education, and training guidance and tools. The following principles guided the Working Group's approach: 1) education and training requirements should provide the Services discretion in how they will implement repeal of Don't Ask, Don't Tell consistent with their unique service cultures, 2) education and training products should be simple and should target education and communication efforts that will assist leaders in successful implementation with minimal impact on the force, and 3) education and training implementation should leverage existing programs rather than creating new, stand-alone requirements.

Beginning in May 2010, the Working Group met with Service Headquarters Education and Training Directorates to gain Service perspectives about education and training guidance and products. The Working Group later undertook leadership engagement visits to the Service Training and Education Commands. Between May and October, the Working Group also

conducted a series of monthly conferences with the Service Training Commands, Service academies, Professional Military Schools, and the Defense Equal Opportunity Management Institute to identify suggested communication, education, and training requirements and content. These meetings utilized the expertise of all the Services in the development of recommended education and training products. Each of these conferences had specific themes which corresponded with the progression of policy issues and with the development of various leadership, education, and training products. Many of these products are included in the support plan for implementation, published as a companion document to this report.

Panel Assessment

To assist us in our overall assessment, we convened a panel to assess impact of repeal on the areas specified in the Terms of Reference. This panel was made up of subject matter experts and Service members representing a range of Service, rank, and warfare communities. The panel reviewed all of the material relevant to each assessment area: military readiness, unit effectiveness, unit cohesion, recruiting, retention, and family readiness. Information and data for this assessment was derived from the Working Group's systematic engagement of the force and their families, input from interested and relevant organizations, scholarly work of civilian and military researchers, experiences of foreign militaries and domestic organizations with similarities to the military, and the historic record of racial and gender integration in the U.S. military. The assessment panel was aided by staff from the Joint Staff, J-8, and used a standard decision support process recommended by them. After coming to a numeric assessment of risk within each area, the panel considered the various policy, legal, and training and education recommendations that were intended to mitigate impacts within each assessment area and then developed a final assessment of risk. A more detailed discussion of the assessment approach and the results of the panel's assessment can be found in section XI of this report.

Fiscal Assessment

The Working Group identified areas for which a repeal would likely result in implementation costs, based on the assessment and implementation of recommendations contained in this report. These net costs were estimated with a rough order of magnitude. The costs included the extension of certain benefits and support resources to a "member-designated" status, minor privacy-related modifications to a limited number of existing facilities, execution and administration of education and training programs for the force, and potential impacts on recruiting and retention. The Working Group also identified areas of cost avoidance stemming from the fact that, in the event of repeal, Service members would no longer be discharged on the basis of homosexual conduct. Savings would be derived by avoiding the need to recruit and to train Service members to replace those separated under Don't Ask, Don't Tell.

Service Review

After completion of the policy review and development of policy recommendations, the Working Group also visited the Service war colleges and non-commissioned officer academies to hold discussion panels with selected students. These institutions included the National Defense University, Army War College, Naval War College, Air War College, and U.S. Marine Corps War College, as well as U.S. Army Sergeants Major Academy, Air Force Senior Noncommissioned Officer Academy, and U.S. Navy Senior Enlisted Academy. At these panels, Working Group members discussed preliminary findings and recommendations to obtain feedback and insight from these current and future leaders.

In addition, as directed, we provided the Military Department Secretaries and Service Chiefs with a near-final version of our report for review and comment. The Secretaries and Chiefs provided us with extensive and insightful comments, as well as their perspectives on Service-level impacts, which helped inform our assessment and recommendations and contoured the final version of this report.

VI WHAT WE HEARD

The Secretary of Defense directed a far-reaching effort to “systematically engage the force” about a potential repeal of Don’t Ask, Don’t Tell. As described in section V, the Working Group received survey responses from 115,052 Service members and 44,266 military spouses. Ninety-five information exchange forums were conducted with over 24,000 Service members, 140 smaller focus group sessions with a total of about 14,000 Service members, and received 72,384 online inbox entries. Westat engaged in interactive online confidential communications with 2,691 Service members, including 296 who self-identified as gay or lesbian. The Working Group also engaged in discussions with a variety of different foreign governments, interested groups, historians, academics, doctors, chaplains, lawyers, veterans, communities within the military, and members of Congress on this topic. We heard frank, strong, and sharply divergent views on this topic, but we were heartened that the conversation was civil and respectful.

For this section of the report, there is an important caveat. If the Working Group were to attempt to numerically divide the sentiments we heard expressed in IEFs, online inbox entries, focus groups, and confidential online communications between those who were for or against repeal of the current Don’t Ask, Don’t Tell policy, our sense is that the majority of views expressed were against repeal of the current policy. However, any such effort to divide the sentiments into one camp or another would not have any quantitative value, and would be highly misleading and flawed. As we discovered from the survey results, the views voiced both for and against repeal in IEFs, online inbox entries, focus groups, and confidential communications were not representative of the force as a whole. The Service members we heard from through these mechanisms were those individuals who felt strongly enough and motivated enough to give voice to their views. Further, the Service members and spouses participating in IEFs, focus groups, the online inbox, and online confidential communication mechanism were not selected through a formal sampling process to ensure representativeness of the force. Many volunteered to participate, while others were asked by their local commands to participate. It is also true that Service members could make multiple inputs to the online inbox and online confidential communication mechanism.

The survey results, by contrast, were intended to and did capture the views of the force as a whole in an analytically sound and objective manner, and were representative across every component of the force.⁸⁸

88 Westat, vol. 1, A1–A9.

But, through the large numbers of Service members we heard from in IEFs, focus groups, online inbox entries, and confidential communications, a consistent list of concerns, observations, and arguments for and against the current Don't Ask, Don't Tell policy emerged. This list informs both our assessment and our set of recommendations in this report. In other words, the information obtained through these mechanisms is of qualitative, but not quantitative, value. The surveys are the instruments designed to provide data of quantitative value.

What follows is selection of unvarnished comments⁸⁹ representative of themes that we commonly and consistently heard from the force in IEFs, focus groups, online inbox comments, and online confidential communication mechanism. Although the Working Group did not ask Service members *whether* the law should be repealed, the vast majority of Service members offered views on just that. As such, we divide the list into two basic categories: views in support of and against the current policy. Again, this list informs our assessment and the set of recommendations that follow in this report.

Views in Support of Current Policy

Privacy; Unwanted Advances. This concern was typically on the top of the list, the most prevalent in our discussions. In sum, Service members acknowledge the likelihood that they have already had the experience of being in close proximity to someone else in the military who is gay, but they were concerned about sharing bathroom facilities, living quarters, or berthing arrangements with someone they “know” to be gay. Many Service members raised the possibility that a third and possibly fourth category of bathroom facilities for gay and lesbian Service members would be necessary if Don't Ask, Don't Tell were repealed.

“I live in the barracks and I don't think that it would go over well in that kind of environment. I'm concerned about how people would treat that individual.”⁹⁰

“In the privacy side of the thing, they'll have to make some changes to the current infrastructure, [for example] privacy stalls in the bathrooms.”⁹¹

“I do not have to shower or sleep in a room with men so I do not want to shower or sleep in the same room as a woman who is homosexual. I would feel uncomfortable changing and sleeping as I would if it was a man in the room. I should not have to accept this.”⁹²

89 Some quotes in this report have been corrected for typographical errors and minor misspellings. In no case has the substance or content of the quote been altered.

91 Service member, CRWG Focus Group, 2010.

92 Service member, CRWG Focus Group, 2010.

“Tell him if he hits on me I will kick his - -!”⁹³

Overall Effects on Unit Cohesion. Many Service members expressed concern that repeal would hurt unit cohesion. Specific concerns included erosion of trust and caring between unit members, a decrease in socializing both on- and off-duty, and discomfort with working and fighting alongside someone who may be sexually attracted to them.

“I cannot rely on someone who I don’t feel comfortable with, nor can they trust me. A lack of trust turns into a lack of cohesion which eventually leads to mission failure.”⁹⁴

“I think removing the ‘Don’t ask, don’t tell’ policy will cause a negative effect. I believe it will cause more tension and isolation in workcenters. Causing workflow to decrease and attitudes of tension and conflict to arise.”⁹⁵

“It will be difficult to relate to new members. You just can’t show them around. Can’t take them out to a bar. It is tough to relate on a one on one basis.”⁹⁶

“It will be detrimental to unit cohesion. They (the gay people) will be separated and will feel left out. Those who are openly gay will be excluded from social functions, such as barbeques. This, in turn, will result in people feeling bad, left-out or upset.”⁹⁷

Religious and Moral Issues. Many Service members expressed strong religious and moral objections to homosexuality. These Service members worried that repeal would mean the end of their personal religious freedoms or a censorship of their religious views. Others questioned how religious beliefs would impact retention and whether military members would leave the military as a result of repeal.

“For me personally, it’s morally wrong and socially unacceptable.”⁹⁸

“People might separate voluntarily. That’s going to be detrimental to the government. I do my job, I know they’re here, but some people like myself have a problem if they come out. You can’t question my morals, you can’t make me stay.”⁹⁹

“The problem is dealing with people’s background or moral teachings and there are a percentage of Marines who have a religious basis for being against homosexuality, and you cannot ask or force people to go against something that have been taught.”¹⁰⁰

“...homosexuality is morally offensive. Like adultery, and drug use, I can not tolerate homosexuality. I will not work side by side with someone that is an adulterer, a drug addict, or a homosexual.”¹⁰¹

“What would they [the DoD] do? Come out with a memo saying that the Bible, Koran, etc are wrong and that it is ok to be gay?”¹⁰²

“If the state favors the demands of the homosexual activists over the First Amendment, it is only a matter of time before the military censors the religious expression of its chaplains and marginalizes denominations that teach what the Bible says about homosexual behavior.”¹⁰³

“The law works; why change it?” Many Service members expressed this view about Don’t Ask, Don’t Tell. Others emphasized that their current units are effective and questioned how repeal would improve that performance. We also heard from those who believed the law actually protects gay men and lesbians from harassment or violence and keeps sexual orientation a personal and private matter.

“You don’t ask you don’t tell, you come to work and do your job. It is not broke so don’t fix it.”¹⁰⁴

“Doesn’t DADT work, doesn’t it make sense? They can serve; just keep it to yourself.”¹⁰⁵

“It is easier to live with speculation than confirmation.”¹⁰⁶

“If you know for sure, it would freak people out more. There are rumors, but you never know. If it is out of sight it is out of mind, but once you know for sure that’s when people are freaked out.”¹⁰⁷

“I strongly disagree with the repeal of the Don’t Ask, Don’t Tell policy. I believe it will cause more conflict and more hazing among the military. It seems to be working perfectly as is.”¹⁰⁸

“Why now? We are at war.” Service members also voiced concern about taking this issue up now. There was a worry that Service members already have a very full plate (or overflowing rucksack) and that a repeal of Don’t Ask, Don’t Tell was just too much while fighting two wars.

“I believe this is not the time for us to make huge changes in the military. We are at war and our men and women overseas do not need any more distractions. This issue should be addressed at the appropriate time. That time is not now.”¹⁰⁹

“I think there are times and places for everything. This is not that time when we are in two wars and money is an issue.”¹¹⁰

“The bottom line is the timing is wrong. We’re getting ready for another surge in Afghanistan, and it’s not the right time.”¹¹¹

A number of Service members also believe repeal is politically motivated, driven by special interests. For example, a Service member told us that repeal was being driven by a “handful” of people who want to “push their agenda of trying to change society’s moral standards.”¹¹² Another stated, “this isn’t about the military, this is politics.”¹¹³

Standards of Conduct. At almost every engagement, issues regarding standards of conduct were raised. Specific concerns were voiced about the possibility of unwanted sexual advances, violence erupting in reaction to repeal, and harassment. Some attendees said that they would find it difficult to witness public displays of affection between gay and lesbian Service members. Some Service members were troubled by the potential for flamboyant behavior and questioned whether “pink boas” would be authorized with uniforms.¹¹⁴

“A small part of the military will come out and affect the entire military. Good order and discipline will be affected by this.”¹¹⁵

“Some will be flamboyant; they might get a beating.”¹¹⁶

“There needs to be protection on both sides. People get drunk and it’s a whole other thing. There’s the possibility of beating up gays, but there’s also the possibility of a gay guy making advances.”¹¹⁷

“They should just sustain the standard. I don’t like flamboyant queers.”¹¹⁸

“Flamboyant behavior by any members should not be allowed or tolerated.”¹¹⁹

Health Issues. Some Service members expressed concern that repeal of Don’t Ask, Don’t Tell would lead to increased risk of contracting HIV or other sexually transmitted diseases. Others had more general concerns about medical readiness and medical treatment of homosexuals or worries about battlefield transfusions.

“I think homosexual sex leads to diseases. There’s always a chance to getting what someone has.”¹²⁰

“I think of the medical issues. The AIDS rate is running rampant in the gay community. When they go to medical will they be looked at different than a straight man? When you start looking at the statistics, they have more chance of getting an STD as well as other things. Doctors need to look at them differently from when I get checked. Another issue, when you fill out your form at the doctors they will need to ask ‘are you homosexual’ so they can look for different things.”¹²¹

“If you are in an infantry company in a fire fight, and you have an open homosexual who gets wounded, who is going to want to treat him for the fear of HIV and other stuff?”¹²²

“Blood transfusions in battle zones, when lives are on the line can become a stress point.”¹²³

Same-sex Partner Benefits. Service members and their families asked many questions about extending benefits to same-sex partners. Many cautioned that it would be unfair to treat same-sex partners differently than committed boyfriends or girlfriends of straight Service members. Others worried about the availability of resources to pay for benefits.

123 Service member, Online Inbox, 2010.

“...I would have a problem giving their partners benefits. That would not be fair to heterosexuals who have live-in boyfriends and don’t get benefits.”¹²⁴

“Allocation of resources is an issue. It’s a natural progression that benefits will be given to partners. It’s a financial stress on the system.”¹²⁵

Creation of a New Protected Class. Service members questioned whether repeal would mean the creation of a new protected class like race or gender. Some were apprehensive that they could be forced to celebrate “gay pride week” or punished if they refused to socialize with gay and lesbian Service members.

“How far are we going to go with this whole gay thing? Am I supposed to celebrate gayness—do they get to wear a rainbow flag on their uniform? If that is the case, this uniform isn’t worth wearing.”¹²⁶

“How will it fair for me to potentially decline social events with my gay boss or subordinates because of my religious beliefs? How do I host events without EO/IG complaints because I would not invite gay couples? My moral values cannot be compromised to support what I consider immoral behavior.”¹²⁷

Erosion of Overall Standards Within the Military Community; Family Values. Many expressed the view that the military is “the last moral institution in American,” that repeal of the policy will destroy that, and that the military should not be used for “social experimentation.”

“I believe that the impact would be devastating to me, my family, my unit, the military, our country and the world!”¹²⁸

“People view the military as the last bastion of morals and what is good. If we break that down here, what does it boil down to? What’s left?”¹²⁹

“The military shouldn’t be a testing ground for social experiments.”¹³⁰

Participants frequently expressed concerns about living next door to a gay couple. Many were worried about how repeal would clash with the kinds of values they are trying to teach their children. In particular, they spoke about “exposing” their children to the “gay lifestyle.” They often voiced concerns about how that living situation would impact their

children. Others expressed a fondness for the military community because of the similarity in values and emphasis on family, and a fear that it will come to an end. Many of these concerns mirror concerns expressed in civilian society.

“I’m raising my family and was brought up a devout Catholic. Now all of a sudden Adam and Steve move in next door. I have to deal with that earlier, now with my kid.”¹³¹

“I won’t raise my kids in a neighborhood with a gay family.”¹³²

One Service member thought some parents might not want their children socializing with children from gay families.¹³³ Others focused more generally on not wanting to deal with having to explain homosexuality to their children if they saw a gay or lesbian couple.

“How can you attend a family meeting and have two guys holding hands there? What do you tell your kids?”¹³⁴

“One of my main concerns should the law pass is preparing myself as a parent to explain the dynamics of a same sex couple/family. My son is far too young for me to explain this topic and would create confusion and pose questions that would place me and my spouse in a difficult spot.”¹³⁵

“If repealed I would have to deal with it and so would my family but I would not attend (unless ordered to) any function where that particular lifestyle would be exhibited.”¹³⁶

Views in Support of Repeal

“There are already gays and lesbians in the military.” Typically, between 60% and 80% of Service members we talked to at information exchanges forums and small focus group discussions believed they had served alongside a gay or lesbian Service member. Many shared their belief that today the military performs its mission with gay men and lesbians and repeal would have no affect on performance—either personally or as a unit.

“We’ve all worked with homosexuals; what’s changed? The standards are the same.”¹³⁷

137 Service member, CRWG Focus Group, 2010.

“Everyone kind of knows if someone is gay. There is no impact on effectiveness.”¹³⁸

“I have served with gays in the military and have found them to be of high caliber and encompassing all the Army values and performance standards. Performance has NEVER been an issue.”¹³⁹

“There are already gay men and women serving with me...and it does not have an impact on how I do my job.”¹⁴⁰

“In the unit that I am in now there are individuals that are homosexual. Of course they aren’t able to come out and say it but we know. I really don’t see an impact in my unit. We haven’t had any issues thus far and these soldiers have been deployed numerous times with the same people.”¹⁴¹

“I don’t care, as long as he can fight.” Other Service members stated they didn’t care about the whole debate over repeal; they only cared if their fellow unit members could work together to “get the job done.” What mattered to these Service members was a cohesive team that focused on the mission and a common enemy.

“All I care about is can you carry a gun, can you walk the post, as far as people in my unit.”¹⁴²

“As a team or a corps, I am only as good as the rest of my team. Cohesion is the heart of the matter. Given a task, a homosexual and a heterosexual can probably accomplish it the same way, so it should not have too much of an effect on getting the task done.”¹⁴³

“As Battalion Commander for a unit that recently completed 12-month combat deployment to Iraq, I can say unequivocally that gay/lesbian Soldiers are integrated across our force, at the lowest tactical levels, with no negative operational impacts. In fact, my unit was far better, particularly technically and from a leadership perspective, with these Soldiers in positions of operational and organizational significance.”¹⁴⁴

“I think it’s morally wrong but as long as the mission gets done and done right, I wouldn’t have a problem with it.”¹⁴⁵

“What does it matter if they can do the job if you are gay or straight?”¹⁴⁶

“This is America.” Some Service members expressed a view that repeal is not only the “right thing” to do, but is one of the freedoms for which they fight and die. Others believed all Americans should have the right to serve their country, including gay men and lesbians:

“I believe that this policy/law change will only enhance who we are as a great nation. We claim to be free when other nations have already accepted this factor into their environment. This is only something that will help us promote peace and implement non-prejudicial acts rather than hatred.”¹⁴⁷

“Gays and lesbians have been serving in the Armed Forces since the inception of our country. They love this country just as much as heterosexuals. They have been ‘outed’ while serving, humiliated in front of their peers, beaten up and given dishonorable discharges in the past (and even present day). This must end. This is NOT what our country is about.”¹⁴⁸

“I love America for its tolerance. I am willing to be a KIA [Killed In Action] because I think America values equality and civil liberties. It would be great if the institution I served in mirrored exactly these ideals.”¹⁴⁹

“We need everyone willing and able to serve.” Other Service members spoke of repeal in pragmatic terms and stated the military simply needs everyone who is willing and able to serve. Others expressed concern that we had degraded readiness by kicking out qualified and experienced warriors out of the military.

“Please repeal the act. We need all available men and women who are willing to serve their country, no matter what their sexual orientation is.”¹⁵⁰

“As it is, there aren’t enough good people in the military, and we shouldn’t turn people away because of things they do in their private life.”¹⁵¹

“We have lost immeasurable talent and dedication with those discharged or never allowed to enter military service.”¹⁵²

152 Service member, Online Inbox, 2010.

“Times are changing.” Some Service members viewed the issue of repeal as a “generational” one with the younger generation being more accepting of open homosexuality. Cadets and midshipmen in particular told us that serving with a gay man or lesbian is “no big deal.”

“Kids growing up now, it is not a big deal. In this room the average age is 30. The values most of us were raised with are different. You look at younger guys born in the 80s, some of these guys their tolerance level is different than mine is.”¹⁵³

“With the younger generation it may not be as big of a deal. The percentage is a lot higher with acceptance instead of 45 and older. The military population is conservative.”¹⁵⁴

“Younger generations are more open. It’s more of the younger generation’s decision.”¹⁵⁵

“There are kids in society who accept this type of thing now. It is not like when we were kids. They don’t have a problem with them [gay people].”¹⁵⁶

“It won’t be such a big deal.” Some Service members expressed a view that repeal of Don’t Ask, Don’t Tell would be a “non-event.” These members saw no realistic concerns over privacy. Some gay and lesbian Service members predicted repeal would have minimal impact because Service members may be reluctant to serve openly.

“There is no need for separate showers. People will get over it when people realize that they are not being hit on or approached in the shower.”¹⁵⁷

“About separate facilities: we all went to college and stayed in dorms, we are all adult now and we have accepted it.”¹⁵⁸

“I think if it is lifted not a lot of members will come out. They are your coworkers and things will stay where they are. If we didn’t know you were gay by now, it is unlikely that you will tell us.”¹⁵⁹

“We’ve done it before; we can do it again.” Some Service members pointed out that lessons learned from the racial and gender integration of the U.S. military apply to repeal of Don’t Ask, Don’t Tell.

153 Service member, CRWG Focus Group, 2010.

154 Service member, CRWG Focus Group, 2010.

159 Service member, CRWG Focus Group, 2010.

“This is not the first time we have had to tackle this issue. It was done before with two other groups of people; there were issues and problems that had to be overcome. This has happened before and will likely happen again. We have a blueprint on how to handle it—we handled it before, we’ll handle it again.”¹⁶⁰

“It’s going to take time to get used to it. It took time to get used to women, African Americans. Any time there is a prejudice it takes generations to disappear. Some people will have issues, but as long as they are professional then it doesn’t matter.”¹⁶¹

“This is an equality issue, and who doesn’t deserve equal rights? We’ve done it before with African Americans, and we have done it before with females. We can do it again. As brothers and sisters in arms, we stand and fight not only for our country, but for one another.”¹⁶²

“I recommend repeal of DADT and believe Service members will make it work, just as they made it work when laws were changed to allow non-whites and females to serve their nation honorably and with pride.”¹⁶³

“Take a knife out of my back.” Gay and lesbian Service members shared with us through online inbox entries and confidential online communications how Don’t Ask, Don’t Tell places a heavy burden on their shoulders. They explained how repeal would mean the end of living a lie for them and their families. Gay and lesbian Service members also expressed how repeal would increase their personal effectiveness and promote unit cohesion, because they can now be honest with their fellow unit members.

“I doubt I would run down the street yelling ‘I’m out’; but it would take a knife out of my back I have had for a long time. You have no idea what it is like to have to serve in silence...”¹⁶⁴

“It is hard to explain to a child why their parents can’t hold hands or attend school or unit functions together the way other families do. It also places a strain on my relationship when I am deployed since I am afraid that someone will find the picture I carry in my shirt pocket or find a letter from my family. It also makes it very difficult and uncomfortable to explain to someone why I wear a wedding ring since I am not married.”¹⁶⁵

160 Service member, CRWG Focus Group, 2010.

161 Service member, CRWG Focus Group, 2010.

162 Service member, Online Inbox, 2010.

164 Service member, Confidential Communication Mechanism, 2010.

165 Service member, Confidential Communication Mechanism, 2010.

“I deploy twice per year and sacrifice a lot of time away from my very legitimate family to serve this country. I have less than a handful of military friends because of the Don’t Ask, Don’t Tell policy. If I invite someone to my home for a barbeque or any other activity that straight families take for granted, it makes my sexual orientation too obvious.”¹⁶⁶

By and large, gay and lesbian Service members expressed the view that they would be relieved to no longer have to hide the existence of their partners and looked forward to the opportunity to share their work lives with their families.

“Every time there is a family event, there are people left out, because of who they are with; they are not allowed to bring their family with them. The fact that they are same sex does not negate the fact that they love and are proud of the support that their partner has given them, the same support that a wife or husband would give their spouse in the military. The conventional family is recognized and able to be thanked for their support, as every military member knows, we could not do what we do and go where we go without the support of our spouse or partner.”¹⁶⁷

“We can do this; just provide clear guidance and strong leadership.” Many commanders and senior enlisted personnel simply expressed a desire in the case of repeal to receive clear guidance and leadership from the chain of command.

“I can’t pick and choose what I enforce; I have strong religious beliefs but I have to leave them behind and do my job; if I can’t do that, I’ve got to leave the Army.”¹⁶⁸

“It is important to lead by example. Even if we disagree we have to follow rules.”¹⁶⁹

“We must ensure we are ready for this change with the necessary policies and practices to provide a safe, tolerant, supportive environment for all who serve.”¹⁷⁰

“In the military, you are given orders and you drive on. This policy needs to come from the top, with specific guidelines. Soldiers will then adapt, as they always do.”¹⁷¹

VII THE SURVEY RESULTS

In the previous section, we provided a sense of what we heard through our qualitative engagements with the force. In this section, we provide a summary of Service members' responses to the quantitative tools used by the Working Group: the pair of surveys conducted by Westat. The Service members' survey was one of the largest surveys in the history of the military, with 115,052 responses. In addition, we received 44,266 responses to the spouse survey. The results of these surveys constitute a significant component of our assessment.

We highlight here the responses to particular questions that we believe are representative of the overall picture. Appendix C of the report contains results for all of the questions on the Service member survey, with results broken down by Service; Appendix D of the report contains results for the spouse survey.¹⁷² There, we let the survey results speak for themselves. Before reviewing the survey highlights, we make several points:

First, we did not “poll” the military or conduct a referendum on the overall question of whether to repeal the current Don't Ask, Don't Tell law and policy. That was not our mission, nor are military policy decisions made by referendum of Service members. Our primary mission was to assess the impact of a repeal, should it occur to military readiness, military effectiveness, unit cohesion, recruiting, retention, and family readiness. To accomplish that task we focused the survey on those topics.

Second, many of the survey questions were devised in response to concerns raised frequently by Service members in information exchange forums and focus group sessions. For example, the questions about privacy and living arrangements were asked in response to the concerns expressed by a large number of Service members in our discussions.

Third, as described in section V, the survey sample of Service members was designed to ensure adequate representation in terms of Service, active/reserve component, rank, and gender, among other factors. The overall sample was almost 400,000 Service members (split evenly among active duty and reserve component forces). The response rate for this survey (28% overall), as a whole and by Service, was typical for surveys within the Department of Defense.¹⁷³ The survey sample of military spouses was similarly designed to ensure adequate representation in terms of Service and active/reserve component. The overall sample was just over 150,000 spouses (70,000 active duty and 80,000 reserve component). The response rate for the spouse survey (29% overall) was also typical for this type of survey within the military community.¹⁷⁴ The results of each survey were “weighted,” consistent with industry

¹⁷² The entirety of the survey results broken down by all subpopulations is contained in Volume 1 of the Westat Survey Report, published in conjunction with this report.

¹⁷³ Defense Manpower Data Center, “DADT,” 1.

¹⁷⁴ Defense Manpower Data Center, “DADT,” 1.

standard practices, to more accurately reflect the make-up of the force by accounting for the intentional oversampling of certain low-response groups (e.g., junior enlisted). The 115,052 responses to the Service member resulted in a margin of error of less than $\pm 1\%$. The spouse survey margin of error was similar.

We highlight the following:

Impact of Repeal on Cohesion

The Service member survey asked a number of questions on Service members' views about the effect of repeal on unit cohesion, including task and social cohesion. Task cohesion is a unit's ability to work together effectively, whereas social cohesion is a unit's ability to get along and trust one another. Overall, 70–76% of Service members said repeal would have a positive, a mixed, or no effect on aspects of task cohesion. Similarly, 67–78% of Service members said repeal would have a positive, mixed, or no effect on aspects of social cohesion. Table 2 summarizes Service members' responses to questions on aspects of task cohesion; Table 3 does so for questions on aspects of social cohesion.

Table 2. Service Members' Perceptions of Impact of a Repeal of Don't Ask, Don't Tell on Task Cohesion

Question 68 & 69. If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how would it affect...

Task Cohesion	Positively / Very Positively	Equally Positively & Negatively	No Effect	Negatively / Very Negatively
Question 68a. How Service members in your immediate unit work together to get the job done?	18.4%	32.1%	19.9%	29.6%
Question 68b. How Service members in your immediate unit pull together to perform as a team?	19.4%	31.8%	19.3%	29.5%
Question 69c. The extent to which leaders in your immediate unit have the skills and abilities to lean unit members into combat?	19.4%	32.7%	24.1%	23.9%

Table 3. Service Members' Perceptions of Impact of a Repeal of Don't Ask, Don't Tell on Social Cohesion

Question 68 & 69. If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how would it affect...

Social Cohesion	Positively / Very Positively	Equally Positively & Negatively	No Effect	Negatively / Very Negatively
Question 68c. How Service members in your immediate unit trust each other?	18.1%	31.2%	17.6%	33.1%
Question 68d. How much Service members in your immediate unit really care about each other?	18.1%	33.6%	18.4%	30.0%
Question 69a. The extent to which Service members in your immediate unit can get help from their leaders on personal problems	20.0%	33.5%	21.9%	24.7%
Question 69b. The extent to which leaders in your immediate unit trust their unit members?	19.2%	33.8%	21.7%	25.4%
Question 69d. The extent to which leaders in your immediate unit care about their unit members?	20.3%	34.6%	22.7%	22.4%

Impact of Repeal on Unit Effectiveness

The survey also asked a number of questions in a variety of different ways to solicit views about the impact of repeal of Don't Ask, Don't Tell on unit effectiveness and the overall ability to get the job done. Because not all Service members have the same experience with deployed or combat situations, the survey asked questions about unit effectiveness based on the experience each Service member said they had in different environments.

Service members without combat deployment experience since September 11, 2001, were asked how, if at all, repeal would affect their unit's effectiveness at completing its mission "on a day-to-day" basis." Almost 80% said repeal would have a positive, a mixed, or no effect.¹⁷⁵ Service members with combat experience during this period were asked slightly different questions. When asked how, if at all, repeal would affect their unit's effectiveness "in a field environment or out at sea," 56% said it would have a positive, mixed, or no effect, and 44% said it would have a negative effect. However, when specifically asked about the

175 Calculated as the sum of the responses "very positive," "positive," "no effect," and "equally positive and negative effect."

effect “in intense combat situations” or “when a crisis or negative event happens that affects your unit” the levels of those that predicted a negative effect went down—approximately 30% said that repeal would have a negative effect, and approximately 70% said it would have a positive, mixed, or no effect on their unit’s effectiveness. Table 4 below summarizes these responses.

Table 4. Service Members’ Perceptions of Impact of a Repeal of Don’t Ask, Don’t Tell on Unit Effectiveness

Question 70 & 71. If Don’t Ask, Don’t Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how, if at all, would it affect your immediate unit’s effectiveness at completing its mission...

	Very Positive / Positive	Equally Positive and Negative	No Effect	Very Negative / Negative
Question 70. Respondents without combat deployment experience since September 11, 2001				
On a day-to-day basis	17.4%	32.6%	29.3%	20.8%
When a crisis or negative event happens that affects your immediate unit	17.2%	32.8%	29.9%	20.0%
Question 71. Respondents with combat deployment experience since September 11, 2001				
In a field environment or out at sea	11.4%	25.8%	18.6%	44.3%
When a crisis or negative event happens that affects your immediate unit	12.5%	33.3%	24.7%	29.4%
In an intense combat situation	12.4%	31.4%	25.6%	30.6%
Note: Question 70 was asked only of Service members who have never been deployed or who have not been deployed into a combat environment since September 11, 2001. Question 71 was asked only of Service members who have been deployed into a combat environment since September 11, 2001.				

Privacy/Living Arrangements

Given the large number of Service members who raised privacy issues in large group and focus group sessions, the survey devoted a number of questions in the survey to privacy concerns—in particular, bathroom facilities and living and berthing arrangements—to gauge how Service members thought they would handle these issues if repeal occurred. These questions were also asked in order to understand more fully potential impacts on social cohesion within a unit.

In general, when it came to bathrooms with open bay showers, almost a third (29%) of Service members said they would do nothing different in the event of repeal; 11% said they would address the matter directly with the gay or lesbian Service member; and 26% said they would take a shower at a different time. Meanwhile, 19% said they would seek guidance from a chaplain, mentor, or leader, and 7% said they would do “something else.” (See Table 5.) Service members responded similarly when asked about living and berthing arrangements. (See Table 6.) Service members that answered that they would do “something else” to either question were given the opportunity to describe in their own words what they would do; less than 0.1% of all Service members indicated that violence of any kind might occur.¹⁷⁶

Table 5. Service Members’ Likely Actions if Assigned to Share Open Bay Shower Facilities With a Gay or Lesbian Service Member

Question 90. If Don’t Ask, Don’t Tell is repealed and you are assigned to bathroom facilities with an open bay shower that someone you believe to be a gay or lesbian Service member also used, which are you most likely to do?

	Overall
Take no action	29.4%
Use the shower at a different time than the Service member I thought to be gay or lesbian	25.8%
Discuss how we expect each other to behave and conduct ourselves	11.0%
Talk to a chaplain, mentor, or leader about how to handle the situation	1.3%
Talk to a leader to see if I had other options	17.7%
Something Else	7.0%
Don’t Know	7.9%

Table 6. Service Members’ Likely Actions if Assigned to Share Living Quarters With a Gay or Lesbian Service Member

Question 88. If Don’t Ask, Don’t Tell is repealed and you are assigned to share a room, berth, or field tent with someone you believe to be a gay or lesbian Service member, which are you most likely to do?

	Overall
Take no action	26.7%
Discuss how we expect each other to behave and conduct ourselves which sharing a room, berth, or field tent	24.2%
Talk to a chaplain, mentor, or leader about how to handle the situation	2.4%
Talk to leader to see if I have other options	28.1%
Something Else	8.7%
Don’t Know	9.9%

¹⁷⁶ CRWG, “Summary of Open Ended Responses From the Service Member Survey,” white paper, September 30, 2010.

Impact of Repeal on Unit Readiness

Service members were asked to assess their current readiness, as well as how repeal of Don't Ask, Don't Tell would affect their personal readiness and their unit's readiness. With regard to personal readiness, 67% of Service members said that repeal would have a positive or no effect; 22% said the effect would be equally positive as negative, and 12% said repeal would have a negative effect. In addition, 58% said repeal would have a positive or no effect on their ability to train well; 21% said the effect would be equally positive as negative; and 21% said repeal would have a negative effect. The responses about effects at the unit level, as opposed to at the personal level, were somewhat more negative. For example, with regard to their unit's ability to train well together, 31% said that repeal would have a negative impact. (See Table 7.)

Table 7. Service Member Perceptions of Impact of a Repeal of Don't Ask, Don't Tell on Military Readiness

Question 75. If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how would it affect...				
	Positively / Very Positively	No Effect	Equally Positive as Negative	Negatively / Very Negatively
Personal Readiness				
Your personal readiness	7.1%	60.0%	21.5%	11.5%
Your ability to train well	7.3%	51.1%	20.8%	20.8%
Unit Readiness				
Your immediate unit's readiness	6.8%	46.1%	25.8%	21.2%
Your unit's ability to train well together	7.0%	37.1%	24.5%	31.3%

Impact of Repeal on Recruitment

The Services rely on referrals—from family, friends, and current or former Service members—for about a third of new recruits. Overall, nearly one-half (47%) of Service members said that repeal of Don't Ask, Don't Tell would have no effect on their willingness to recommend military service to a family member or close friend; 6% said that it would have positive effect; 10% said it would have a mixed effect; and 27% said it would have a negative effect.

Table 8. Service Member Willingness to Recommend Military Service to a Family Member or Close Friend if Don't Ask, Don't Tell is Repealed

Question 80. If Don't Ask, Don't Tell is repealed, how, if at all, will it affect your willingness to recommend to a family member or close friend that he or she join the military?

	Overall
Positively	6.3%
Equally as positively as negatively	9.9%
No effect	46.5%
Negatively	27.3%
Don't know	10.0%

Impact of Repeal on Retention

Overall, more than 60% of Service members told us that their career plans would not change as a result of repeal; 13% said that they would definitely leave sooner than they had otherwise planned; and 11% said they would think about leaving sooner than they had planned. (See Table 9.)

Table 9. Service Member Intentions to Remain in the Military if Don't Ask, Don't Tell is Repealed

Question 81. If Don't Ask, Don't Tell is repealed, how, if at all, will your military career plans be affected?

	Overall
My military career plans would not change	62.3%
I will stay longer than I had planned	1.7%
I will think about staying longer than I had planned	1.8%
I will think about leaving sooner than I had planned	11.1%
I will leave sooner than I had planned	12.6%
Don't know	10.5%

Service members were asked to rate the three factors they consider most important when deciding whether to remain in the military.¹⁷⁷ “Job satisfaction,” “Retirement benefits,” “Current economic situation and civilian job availability,” “Pay and allowances/Bonuses,” and “To serve and defend my country” were each listed by over one-quarter of respondents. Of these, all were consistently rated as more important than repeal of Don't Ask, Don't Tell in

177 See Appendix C, Question 33.

deciding whether to remain in the military.¹⁷⁸ Overall, 48% of Service members told us that all the factors they listed are more important to their decision to stay or leave the military than repeal, while only 8% said repeal was more important than anything else. (See Table 10.)

Table 10. Service Members' Assessment of the Relative Importance of Repeal in Their Decision of Whether to Stay in the Military

Question 82. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would your top three decision factors be to you in deciding whether to remain in the military?

	Overall
All Factors More Important than Repeal	48.0%
All Factors Equally Important as Repeal	16.0%
All Factors Less Important than Repeal	7.6%
Some more, Some less Important as Repeal	28.5%

Impact of Repeal on Morale

In addition, the survey also asked questions about morale. In question 73, Service members were asked how their level of morale would be affected if Don't Ask, Don't Tell were repealed. Consistent with responses to similar questions about effects on unit effectiveness, cohesion, and readiness, 62% of Service members responded that repeal would have a positive, mixed, or no effect on their morale, while 28% said it would have a negative impact on their morale.

Table 11. Service Member Perception of Impact of Repeal on Morale

Question 73. If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how, if at all, would your level of morale be affected?

	Overall
Positively / Very Positively	4.8%
Equally as positively as negatively	13.2%
No effect	43.6%
Negatively / Very Negatively	27.9%
Don't know	10.5%

¹⁷⁸ See Appendix C, Questions 82a, 82d, 82f, 82m, and 82n.

Those Who Have Already Served With Someone They Believe is Gay

Service members were asked on the survey whether they had ever worked with a leader, co-worker, or subordinate they believed to be gay or lesbian in their career. 75% of Service members answered “yes” to at least one of these questions.¹⁷⁹ For example, 69% of Service members said that they had worked with a co-worker that they believed to be gay or lesbian. (See Table 12.) When asked if they were currently serving with someone they believed to be gay or lesbian, more than a third (36%) answered yes. (See Table 13.)

Table 12. Service Members Who Have Served With Leaders They Believe to be Gay or Lesbian

Question 36. In your career, have you ever worked in a unit with a co-worker you believed to be homosexual?	
	Overall
Yes	69.3%
No	30.7%

Table 13. Percentage of Service Members Currently Serving With Someone They Believe to be Gay or Lesbian

Question 34. Do you currently serve with a male or female Service member you believe to be homosexual?	
	Overall
Yes	36.0%
No	64.0%

Thus, a large number of Service members report that they have already had the experience of serving in a unit with a person they believed to be gay or lesbian. This is consistent with what we heard in large group information exchange forums. In response to the question, “How many of you have already had the experience of serving in a unit with a person you believed to be gay or lesbian?”, in a group of 150–300 Service members, typically 80% or more of those present raised their hands.¹⁸⁰

Those Service members who reported that they are currently serving with someone they believe to be gay or lesbian were more likely to answer that repeal would have a positive, mixed, or no effect on unit cohesion, unit effectiveness, unit readiness, recruiting, retention, and family readiness. For example, when asked how repeal of Don’t Ask, Don’t Tell would affect their immediate unit’s effectiveness in an intense combat situation, 74% of those

¹⁷⁹ CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Service Members, 2010.

¹⁸⁰ CRWG analysis of information exchange forum notes, 2010.

currently serving with someone they believe to be gay or lesbian reported the impact would be positive, equally positive and negative, or have no effect, while 26% reported that it would have a negative effect.¹⁸¹ Those not currently serving with someone they believe to be gay or lesbian were more negative in their predictions: 33% of these Service members predicted that repeal would have a negative impact on unit effectiveness in an intense combat situation.¹⁸²

Among Service members who said that they are currently serving with someone they believe to be gay or lesbian, the portion who said repeal would have positive, mixed, or no effect on aspects of unit cohesion was 3–8% percentage points higher than those who are not currently serving with someone they believe to be gay or lesbian. With regard to privacy and living arrangements, Service members currently serving with someone they believe to be gay or lesbian were more likely to say they would take no action or handle the situation on their own.

Overall, among those Service members who report that they are currently serving with someone they believe to be gay or lesbian, the portion answering that the effects of repeal would be negative was generally around 6% percentage points lower than for those who report that they are not currently serving with someone they believe to be gay or lesbian. Table 14 compares these responses across a selection of questions related to unit effectiveness, unit cohesion, and unit readiness.

181 CRWG analysis of *2010 DoD Comprehensive Review Survey of Active Duty and Reserve Service Members*, 2010.

182 CRWG analysis of *2010 DoD Comprehensive Review Survey of Active Duty and Reserve Service Members*, 2010.

Table 14. Perceptions of Impact of a Repeal of Don't Ask, Don't Tell on Unit Effectiveness, Unit Cohesion, and Unit Readiness by Whether Currently Serving With Someone They Believe to be Gay or Lesbian

If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how would it affect...

	Currently Serve w/ Gay or Lesbian	Positively / Very Positively	Equally Positively & Negatively	No Effect	Negatively / Very Negatively
Unit Effectiveness					
Question 71a. Your immediate unit's effectiveness at completing its mission in a field environment or out at sea	Yes	15.1%	25.9%	21.6%	37.5%
	No	9.3%	25.7%	17.0%	48.1%
Question 71c. Your immediate unit's effectiveness at completing its mission in an intense combat situation	Yes	16.0%	30.1%	27.8%	26.0%
	No	10.3%	32.2%	24.4%	33.2%
Unit Cohesion					
Question 68a. How Service members in your immediate unit work together to get the job done?	Yes	22.4%	30.5%	22.6%	24.5%
	No	16.1%	32.9%	18.5%	32.4%
Question 68c. How Service members in your immediate unit trust each other?	Yes	22.8%	29.3%	19.6%	28.4%
	No	15.5%	32.2%	16.4%	35.8%
Unit Readiness					
Question 75b. Your immediate unit's readiness	Yes	9.3%	24%	48.4%	18.3%
	No	5.4%	26.9%	44.8%	22.9%
Question 75f. Your unit's ability to train well together	Yes	10.0%	23.0%	40.4%	26.5%
	No	5.4%	25.4%	35.2%	34.1%

Note: "Currently Serve w/ Gay or Lesbian" reflects Service members' responses to question 34: "Do you currently serve with a male or female Service member you believe to be homosexual?"

Army, Marine Corps, and Combat Arms

Among the Services, the Marines were consistently more negative in their responses about the effect of repeal. The combat arms communities in both the Army and the Marine Corps were also more negative about the effect of repeal than others in their Services.¹⁸³

For example, as discussed earlier, approximately 44% of all Service members said that their unit’s effectiveness “in a field environment or out at sea” would be negatively impacted by repeal of Don’t Ask, Don’t Tell. Nearly 60% of respondents in the Marine Corps and in Army combat arms said they believed there would be a negative impact on their unit’s effectiveness in this context; among Marine combat arms the number was 67%. (See Table 15.)

Likewise, when asked how repeal of Don’t Ask, Don’t Tell would impact the readiness of their immediate unit, 21% of Service members overall said that it would have a negative impact. Among Marine Corps respondents this number was 32%; among Army combat arms it was 35%; and among Marine combat arms 43%. (See Table 15.)

Table 15. Army, Marine Corps, and Army and Marine Combat Arms Perceptions of Impact of a Repeal of Don’t Ask, Don’t Tell on Unit Readiness

Question 75b. If Don’t Ask, Don’t Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how, if at all, would it affect your immediate unit’s readiness?

	Overall	Army	Marine Corps	Army Combat Arms	Marine Combat Arms
Positively / Very positively	6.8%	7.4%	5.3%	5.2%	3.5%
Equally as positively as negatively	25.8%	25.8%	27.4%	23.9%	24.5%
Negatively / Very Negatively	21.2%	23.8%	31.8%	35.1%	43.5%
No effect	46.1%	42.9%	35.5%	35.8%	28.5%

The responses of Marines and of Army and Marine combat arms were similarly more negative than the force overall in response to questions about unit cohesion. For example, question 68a asked Service members about the impact of repeal on their unit’s ability to “work together”—an aspect of task cohesion. While slightly under 30% of Service members as a whole predicted repeal would have a negative impact, that number was 43% among the Marine Corps, 48% among Army combat arms, and 58% among Marine combat arms. (See Table 16.)

¹⁸³ The Working Group invited the Services to further analyze Service-specific data from the Service member survey data. We understand, based on this Service analysis, that this finding generally applies to combat warfare communities in all Services.

Table 16. Army, Marine Corps, and Army and Marine Combat Arms Perceptions of Impact of a Repeal of Don't Ask, Don't Tell on Task Cohesion

Question 68a. If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how, if at all, would it affect... How Service members in your immediate unit work together to get the job done?

	Overall	Army	Marine Corps	Army Combat Arms	Marine Combat Arms
Positively / Very positively	18.4%	18.9%	12.7%	13.2%	8.7%
Equally as positively as negatively	32.1%	31.5%	31.1%	26.1%	24.4%
Negatively / Very negatively	29.6%	31.9%	42.8%	47.5%	57.5%
No Effect	19.9%	17.8%	13.4%	13.3%	9.4%

Question 68c asked Service members about the impact of repeal on the trust between unit members—a part of social cohesion. Overall, 33% of Service members predicted a negative impact on trust between unit members; this number was 47% for the Marine Corps, 49% for Army combat arms, and 60% for Marine combat arms. (See Table 17.)

Table 17. Army, Marine Corps, and Army and Marine Combat Arms Perceptions of Impact of a Repeal of Don't Ask, Don't Tell on Social Cohesion (Trust)

Question 68c. If Don't Ask, Don't Tell is repealed and you are working with a Service member in your immediate unit who has said he or she is gay or lesbian, how, if at all, would it affect... How Service members in your immediate unit trust each other?

	Overall	Army	Marine Corps	Army Combat Arms	Marine Combat Arms
Positively / Very Positively	18.1%	18.6%	11.8%	13.6%	8.3%
Equally as positively as negatively	31.2%	30.3%	29.5%	26.1%	24.7%
Negatively / Very Negatively	33.1%	35.5%	47.3%	48.9%	59.7%
No Effect	17.6%	15.6%	11.4%	11.3%	7.4%

The Marine Corps, Army combat arms, and Marine combat arms also differed significantly from the force overall in the portion that reported that they are currently serving with someone they believe to be gay or lesbian, and that reported that they are

serving in gender-integrated units. While more than a third of the force as a whole said they are currently serving with someone they believe to be gay or lesbian, around one-quarter of Army combat arms and Marines believe they are doing so. (See Table 18.) Fewer still Marine combat arms personnel report that they are serving with someone they believe to be gay or lesbian.

Table 18. Percentage of Army, Marine Corps, and Army and Marine Combat Arms Service Members Currently Serving With Someone They Believe to be Gay or Lesbian

Question 34. Do you currently serve with a male or female Service member you believe to be homosexual?

	Overall	Army	Marine Corps	Army Combat Arms	Marine Combat Arms
Yes	36.0%	37.6%	24.9%	26.7%	20.0%
No	64.0%	62.4%	75.1%	73.3%	80.0%

In addition, while 80% of the overall force indicated that it serves in units with both men and women, 63% of Marines report that they serve in mixed gender units. Additionally, only 43% of Army combat arms personnel and 30% of Marine combat arms personnel indicate that they serve in units that include both men and women. In general, men who are currently serving in gender-integrated units are less likely to predict a negative impact of repeal of Don't Ask, Don't Tell: 28% compared to 39% among men who are serving in male-only units.¹⁸⁴

Table 19. Percentage of Army, Marine Corps, and Army and Marine Combat Arms Service Members Currently Serving in Units With Both Men and Women

Question 4. Does your immediate unit include both men and women?

	Overall	Army	Marine Corps	Army Combat Arms	Marine Combat Arms
Yes	80.0%	77.3%	62.7%	42.5%	29.7%
No	20.0%	23.7%	37.3%	57.5%	70.3%

184 CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Service Members, 2010.

Impact of Repeal on Family Readiness

To further assess some of the concerns expressed in the information exchange forums and focus groups, the Working Group included questions in the Service member survey and spouse survey about the presence of same-sex couples in on-base military housing and about the involvement of same-sex partners in family readiness activities. When asked about military housing, 44% of Service members answered that if a same-sex couple lived on-base they would “get to know them like any other neighbors”; 17% answered that they would be uncomfortable but would not move; and 18% answered that they “would probably move off base.” Many Service members reported that they simply didn’t know how they might respond. (See Table 20.)

Table 20. Service Member Reported Courses of Action if a Gay or Lesbian Couple Moved Into On-base Housing

Question 96. If Don't Ask, Don't Tell is repealed and you had on-base housing and a gay or lesbian Service member was living with a same-sex partner on-base, what would you most likely do?	
	Overall
I would get to know them like any other neighbors.	42.2%
I would make a special effort to get to know them.	1.9%
I would be uncomfortable, but access to the exchange, commissary, and MWR facilities is more important to me than who my neighbors are when deciding where to live.	5.1%
I would be uncomfortable, but the quality of on-base housing is more important to me than who my neighbors are when deciding where to live.	5.2%
I would be uncomfortable, but the cost of moving makes it unlikely I would leave on-base housing.	6.3%
I would probably move off-base.	17.6%
Something else	5.5%
Don't Know	16.3%

With regard to participation in deployment support activities, 76% of spouses responded that the presence of a same-sex partner of a gay or lesbian Service member would have no effect on their own participation; 14% responded that they would attend less often. (See Table 21.)

Table 21. Military Spouses' Perceptions of Impact of Repeal on Deployment-Support Activities

Question 29. Assume Don't Ask, Don't Tell is repealed and your spouse is deployed. Would the presence of a partner of a gay or lesbian Service member affect how often you attend deployment-support activities?

	Overall
Yes, I would attend deployment-support activities more often	1.3%
No, it would have no effect on my attendance at deployment-support activities	76.2%
Yes, I would attend deployment-support activities less often	13.4%
I don't know	9.1%

The spouse survey also asked spouses to rate the impact of repeal on their own family readiness. Over three-quarters (77%) of military spouses also said that repeal would have no effect on their family readiness; 8% said that it would reduce their family readiness.

Table 22. Military Spouses' Perceptions of the Impact of Repeal on Family Readiness

Question 32. Assume Don't Ask, Don't Tell is repealed. Would repeal affect your family readiness?

	Overall
Yes, it would improve my family readiness	1.0%
No, it would have no effect on my family readiness	77.2%
Yes, it would reduce my family readiness	8.2%
I don't know	13.5%

Open-Ended Responses

Finally, Service members were given the opportunity, in question 103 of the survey, to provide a response in their own words about “the impacts to you, your family, your immediate unit, or your Service if Don't Ask, Don't Tell is repealed.” Comments were provided by 47,318 Service members. The Working Group reviewed all of these responses and found that

they expressed many of the same sentiments—on all sides of the issue—raised by Service members in the Working Group’s other engagements with the force.

In addition, with the assistance of the Defense Manpower Data Center, the Working Group compared the open-ended comments provided by Service members with their responses to other survey questions regarding impact of repeal. This analysis revealed that Service members’ open-ended comments were by and large consistent with their responses to the other questions in the survey. For example, Service members whose responses to questions about impact of repeal were predominately negative tended to provide open-ended comments that were negative. These Service members’ open-ended comments most often expressed concerns about flamboyant gay men in the Service, repeal tarnishing the image of the military, and privacy in living facilities and showers. Similarly, Service members whose responses to questions about impact of repeal were predominately positive tended to provide open-ended comments that were also positive. These Service members’ open-ended comments most often expressed that sexual orientation is irrelevant to a Service member’s ability to do the job, that gay and lesbian Service members have a right to serve openly, that they have a right to serve without fear of being separated, and the like.

Meanwhile, those Service members who indicated on the survey that repeal would have no effect provided open-ended comments similar to those who indicated a positive effect. The most prevalent comments were that sexual orientation is irrelevant to a Service member’s ability to do the job, that gay and lesbian Service members have a right to serve openly, and that repeal is acceptable so long as good order and discipline is maintained.

Those Service members who indicated that repeal would have equally mixed positive and negative effects provided open-ended comments along the same lines, mixed positive and negative. The most prevalent comments included: that sexual orientation is irrelevant to a Service member’s ability to do the job, concerns about privacy in living facilities and showers, that Don’t Ask, Don’t Tell is working and does not need to be changed, that repeal is acceptable so long as good order and discipline is maintained, and the like.

VIII LESSONS FROM HISTORY

Although there are fundamental differences between matters of race, gender and sexual orientation, we believe the racial integration of the U.S. military in the 1940s and 1950s, and the gender integration of the military that began in earnest in the 1970s, present some useful historical lessons. We discuss these lessons here.

Racial Integration of the U.S. Military

As a preliminary matter, it should be noted that, contrary to popular belief, President Harry S. Truman did not simply and abruptly order the Military Services to end racial segregation in 1948. Calls to study the issue began around 1945; Truman's 1948 Executive Order declared that "equality of treatment and opportunity for all persons in the armed services without regard to race, color, religion, or national origin" was "the policy of the President," and established a Committee which then took two years to study the issue.¹⁸⁵ The Services adopted integration plans in 1949 and 1950. However, it was not until 1953 that 95% of African-American soldiers were serving in integrated units and not until the 1970s that Navy ships were fully integrated.¹⁸⁶

During World War II and in the immediate post-War era, some of America's most admired public figures and war heroes of that period expressed concern for permitting Service members of different races to serve together. Like the discussion today, the concerns then centered on military readiness, military effectiveness, unit cohesion, and morale. In 1941, Admiral Chester Nimitz stated:

"One does not install a part in a machine, no matter how excellent that part may be in itself, unless it will fit and work smoothly with other parts. That, frankly, covers the Navy Department's attitude on this question. Negro officers aboard ship would form a small unassimilable minority which, despite anything we could do, would inevitably form a source of discord that would be harmful to the service."¹⁸⁷

185 "Records of the President's Committee on Equality of Treatment and Opportunity in the Armed Services (Record Group 220)," Harry S. Truman Library and Museum, accessed November 19, 2010, <http://www.trumanlibrary.org/hstpaper/fahy.htm>.

186 Matthew Cashdollar, "Not Yes or No, But What If: Implications of Open Homosexuality in the Military," in *Attitudes Aren't Free: Thinking Deeply About Diversity in the US Armed Forces*, eds. Jim Parco and David Levy, (Maxwell Air Force Base: Air University Press, 2010), 169.

187 Erin R. Mahan, "Racial Integration of the Armed Forces: Information Paper for Considering Open Service Policy," August 9, 2010, 7.

Likewise, Admiral Nimitz stated “The policy [of limiting black Sailors to the messman’s branch] was instituted in the interest of harmony and efficiency aboard ship after many years of experience.”¹⁸⁸

In 1941, Army Chief of Staff General George Marshall contended that racial segregation was working and should be continued, and warned that “experiments within the Army in the solution of social problems are fraught with danger to efficiency, discipline, or morale,”¹⁸⁹ and General Henry “Hap” Arnold, commander of the Army Air Corps, wrote in a 1940 internal Army memo, “Negro pilots cannot be used in our present Air Force since this would result in having Negro officers serving over white enlisted men. This would create an impossible social problem.”¹⁹⁰

Much of the opposition to racial integration of the Military Services stemmed from what we now know to be blatant stereotype. In 1946, the Army’s Assistant Chief of Staff for Organization and Training, Major General Idwal Edwards, warned that the Army must recognize the “ineptitude and limited capacity of the Negro soldier.”¹⁹¹ Others even suggested that segregation actually benefited the black soldier. Most notably, in 1948 then Army Chief of Staff General Dwight D. Eisenhower testified before a Senate hearing that segregation protected blacks because “In general, the Negro is less educated...and if you make a complete amalgamation, what you are going to have in every company the Negro is going to be relegated to the minor jobs, and he is never going to get his promotion.”¹⁹²

Meanwhile, opinion polls and surveys of the military then, though not as extensively used in the 1940s as today, showed solid opposition to the idea of racial integration of the military. In a 1946 survey of 2,376 Army and Army Air Forces white enlisted men, over 80% responded that “white and Negro soldiers should *not* work, train, and live [eat or sleep] together.”¹⁹³ Similarly, 80% of white officers at that time reported that they would not like being assigned to an integrated unit (shared working, training, and living conditions), 9% were in favor of such an assignment, and 10% were undecided.¹⁹⁴

Within a few years during and after World War II, as African Americans had an opportunity to prove themselves alongside their white counterparts in integrated situations, attitudes began to change. During World War II, the number of African Americans in the Army increased dramatically, from 4,435 in 1940 to over 700,000 by September 1945.¹⁹⁵ Integration of the other Military Services occurred on a limited and experimental basis

195 Mahan, “Racial,” 6.

toward the end of World War II and in the post-war period. Both the Navy and the Army Air Force experimented with integrated units because of morale and undermanning problems. In 1943, the Navy's Special Programs Unit proposed a plan to assign black crew members to predominantly white crews aboard ships. The experiment began in 1944 and was successful to the point that racial restrictions were lifted in Navy general-service positions. Thus, the Navy was partially integrated three years before President Truman's executive order.¹⁹⁶ The post-war Air Force went through a similar process due to practical problems of obtaining enough qualified pilots for the all-black 332nd Fighter Wing, the famed Tuskegee Airmen. Initially, the idea met resistance but moved forward after Truman's 1948 executive order.¹⁹⁷

The Army and Marine Corps moved more slowly toward racial integration. However, when the personnel shortages of the Korean War necessitated integrated units, Army field officers placed white and black soldiers side by side.¹⁹⁸

By the end of World War II, opposition to racial integration began to erode. In 1944, the commandant of the Marines Corps, Lieutenant General Alexander Vandegrift declared, "The Negro Marines are no longer on trial. They are Marines. Period."¹⁹⁹ By 1949, attitudes toward integrated units were improving, but opposition to integration still existed. In a 1949 survey of 1151 white enlisted men, 61% opposed full integration (work, train, and live together), compared to 80% in 1946; 32% opposed partial integration (working and training together but separate living and eating facilities) compared to over 70% in 1946. This survey also revealed that white soldiers who had worked with black soldiers were less opposed to integration than white soldiers who had only served in segregated units.²⁰⁰

Likewise, following the 1948 Executive Order, many in military leadership accepted the new policy and emphasized the importance of leadership in successful implementation of integration efforts. Army Major General Idwal Edwards, who two years earlier warned of the Negro's "ineptitude and limited capacity," stated in 1948 that any problems implementing the Commander-in-Chief's direction will be "minimized if commanders give the implementation of this policy their personal attention and exercise positive control."²⁰¹

By the time of the Korean War in 1951, Army studies proclaimed integration to be an unqualified success and stated that "integration enhances the effectiveness of the Army."²⁰²

To be sure, racial integration of the U.S. military did not proceed smoothly, and following President Truman's Executive Order racial discrimination, tension, and stereotypes

did not magically evaporate within the ranks. Numerous individual incidents of racial hostility occurred, and racial tensions persisted for years in the military. During the civil rights and Vietnam eras in the 1960s and 1970s, there were outbreaks of racial violence within the military, reflecting the unrest in society at large. One such incident in July 1969, at Camp Lejeune, North Carolina, led to the death of a Marine. In 1971, a race riot at Travis Air Force Base, California, involved hundreds of military members and spanned four days.

Despite those incidents, the U.S. military is today widely regarded as one of the most integrated and diverse institutions in America; it is, for example, the community in America in which interracial marriage is most prevalent.²⁰³ In 1989, General Colin Powell, an African American, rose to become the most senior officer in the U.S. military, twenty years before Barack Obama became the first African-American President of the United States.

In drawing parallels to racial integration in the 1940s and 1950s, there are similarities and differences between that experience and repeal of Don't Ask, Don't Tell today that we must acknowledge.

First, skin color and sexual orientation are fundamentally different. That said, the concerns expressed in the 1940s about the effects of integration on unit cohesion and effectiveness sound much the same as those voiced in this debate.

Second, there is a religious component to the issue of homosexuality that generally does not exist on matters of race. Many hold a sincere religious and moral belief that homosexuality is a sin. Many military chaplains today express opposition in religious terms to allowing gay men and lesbians to serve openly in the military. By contrast, there was no significant opposition to racial integration among military chaplains. In fact, the historical record of the period indicates that the military chaplain community, for the most part, encouraged followers along the path of racial integration.

Third, the military began racial integration in the late 1940s and 1950s, *in advance* of American civilian society. In 1954, 95% of the Army was integrated, while buses and other public accommodations in cities such as Montgomery, Alabama, were not. As such, the military did serve as a social experiment in this regard for the rest of American society. By contrast, repeal of Don't Ask, Don't Tell would mean treating gay men and lesbians in the military in a manner similar to what already exists in civilian workplaces, where there is no law that requires gay men and lesbians to hide their sexual orientation to keep their jobs. In that respect, repeal would *not* mean that the military is being used as a social experiment—the military would be following the rest of American society.

203 A study conducted by Jacobson analyzed the 1990 census (PUMS) and the Current Population Survey (CPS) from 1976 to 1998 and found that while interracial marriage is still rare in U.S. society, it is significantly more prevalent in the U.S. military than in civilian society. (Cardell K. Jacobson and Tim B. Heaton, "Inter-group marriage and United States military service," *Journal of Political and Military Sociology*, 33, 2003, 1–22.)

Fourth, the historical record strongly suggests that the opposition to racial integration at the outset was much wider and deeper than the present-day opposition to repeal of Don't Ask, Don't Tell. As previously noted, opposition to integration among white enlisted soldiers in 1946 was as high as 80% of those surveyed. In 1949, one year after President Truman's Executive Order, opposition to integrated living and working space among white enlisted soldiers was still over 60%.

Fifth, many note the military is today being asked to consider repeal of Don't Ask, Don't Tell during a time of war. The fact is that the U.S. military took on racial integration in the midst of World War II, during the Korean War, and the beginning of the Cold War era; there is no reason to believe that today's force could not successfully accomplish a similar change.

Sixth, in terms of numbers, the size of the change brought about by racial integration of the U.S. military in the 1940s and 1950s was many times larger than any change that would result from a repeal of Don't Ask, Don't Tell. In 1945, there were 700,000 African Americans in the Army, out of a total force of over 8 million, or 9% of the force.²⁰⁴ Today, the active duty force is approximately 1.4 million Service members, and by all estimates the portion of gay and lesbian Service members is significantly smaller.²⁰⁵ Further, race is an obvious identifier; sexual orientation is not. Even if the law is repealed, it is likely that gay men and lesbians will continue to be discreet and private about their sexual orientation, as in civilian society.

These similarities and differences aside, we believe the military's successful experience in racial integration is a relevant chapter in American history for this basic reason: prior to integration, many of the most admired and respected military leaders predicted negative consequences for unit cohesion and morale that are very similar to the concerns we have heard in our engagements on Don't Ask, Don't Tell. Those public fears of racial integration were based in large part on lack of experience and stereotype; likewise, surveys of the force at the time indicated widespread opposition. But, with strong leadership and a clear message, change occurred in large part without negative consequences for unit cohesion and effectiveness, and the military is a better institution for it today.

Gender Integration of the U.S. Military

Gender integration of the military has occurred at a slower pace than racial integration. The passage of the Armed Services Integration Act, which made women an official part of the military, occurred in 1948²⁰⁶—the same year as President Truman's Executive Order on

204 At its peak in 1945, the Army had approximately 8.2 million soldiers. (Kent Roberts Greenfield, Robert R. Palmer, & Bell I. Wiley, "The Organization of Ground Combat Troops," in *US Army in World War II* (Washington, DC: Center of Military History, 1992).)

racial desegregation. But it took many years to expand the military occupational specialties open to women, and even today, certain specialties are restricted to men only.

In 1948, women were limited to 2% of active duty personnel in each of the Services,²⁰⁷ and there were significant limitations on the positions they could fill. It was not until the late-1970s that the number and the roles of women in the military increased. This coincided with the introduction of the all-volunteer force, the end of the Vietnam War, projected shortages of military personnel, and the national debate over the Equal Rights Amendment and women's rights generally. In 1976, women entered the Service academies for the first time and flight training was opened to women. In 1977, the Coast Guard assigned the first woman to sea duty, and in 1978, women were allowed to serve on noncombatant ships in the Navy. In 1978, the Women's Army Corps was disbanded and women were integrated into the regular Army.

These events did not happen without resistance or controversy. As with racial integration, the initial concerns most frequently raised were predictions about negative impacts to unit cohesion and military effectiveness. Many leaders expressed concerns about women breaking from what they perceived to be traditional roles in society and questioned the physical capabilities of female Service members, especially in combat settings. For example, in an October 1943 memo, the Marine Corps' director of Plans and Policies, Brigadier General C. Thomas stated, "The American Tradition is that a woman's place is in the home,"²⁰⁸ and "Women do not take kindly to regimentation."²⁰⁹ Similarly, three decades later in 1976, General William C. Westmoreland, who had retired four years earlier as Army Chief of Staff stated, "The purpose of West Point is to train combat officers, and women are not physically able to lead in combat. Maybe you could find one woman in 10,000 who could lead in combat, but she would be a freak, and we're not running the Military Academy for freaks."²¹⁰

Surveys of Service members showed similar opposition. In 1977, over 80% of upperclass midshipmen preferred that the U.S. Naval Academy remained an all-male institution.²¹¹ In 1981 and 1982 U.S. Navy surveys of ships' crews receiving women indicated concerns about discipline and cohesion. In these surveys, lower ranking enlisted personnel generally were more open to gender integrated crews, while the chief petty officers and commissioned officers generally opposed gender integration.²¹²

Kuczynski, *Men and Women in Ships: Preconceptions of the Crews* (San Diego: Navy Personnel Research and Development Center, August 1982).

Today women make up about 14% of the force and can serve in over 92% of the occupational specialties in the military.²¹³ As time has gone by, many barriers have gone down. Women have been a part of combat flying units since the early 1990s, and this summer women were allowed to attend submarine school for the first time. Though all the Military Services (with the exception of the Coast Guard) retain some restrictions on assignments, women are, in fact, routinely exposed to the dangers of combat operations. This is exemplified by the fact that combat casualty rates for women in Operation Iraqi Freedom are higher than in any combat operation in our nation's history, and in 2005 the first Silver Star was awarded to a woman for combat action.²¹⁴

As with racial integration, the expansion of women's roles in the military have not brought a degradation in military readiness, military effectiveness, or unit cohesion. At the same time, similar to racial integration, the integration of women has not been without incident, sometimes with national attention. In September 1991, the nation learned of the sexual misconduct of scores of Naval Officers at the annual Tailhook Convention in Las Vegas. In 1996, the Army brought charges against 12 commissioned and non-commissioned male officers for sexual assault of female trainees at the Aberdeen Proving Ground. More recently, the United States Air Force Academy faced national scrutiny when multiple cases of sexual assault and rape were reported by female cadets in 2003. These incidents have highlighted the need for military leaders to remain focused on integration implementation, including leadership, standards of conduct, and sexual assault and harassment prevention.

Despite these ongoing concerns related to harassment and assault, it is clear that the introduction and integration of women into the force has made our military stronger.

We note some differences and similarities between the advances in equality for women over the past six decades and repeal of Don't Ask, Don't Tell.

First, gender, as with race, is an obvious identifying characteristic, whereas, sexual orientation is not.

Second, the religious and moral objections to women serving in the military, while stronger than religious objections to racial integration, do not rise to the same level as religious and moral objections concerning service by gay or lesbian individuals. While some may hold more traditional views on the roles of women based on religious or moral grounds, for the most part, women are welcome and successful at all levels of the chain of command.

Third, although the integration of women has involved restrictions on military occupational specialties, including exclusion from ground combat units, we do not recommend

213 Defense Manpower Data Center, "Female Representation in the Active Component—1980, 1987, & 1990-2009," Excel spreadsheet; OSD(P&R), e-mail communication to CRWG, November 12, 2010.

214 Silver Star awarded to Army Sgt. Lee Ann Hester June, 2005 for valorous action in combat, defeating an enemy ambush on their convoy. There were four previous women who received the Silver Star in World War II for evacuating 42 patients from a field hospital under fire.

similar limitations for sexual orientation upon repeal of Don't Ask, Don't Tell. Gay men and lesbians are currently serving across the Services in combat and combat support roles, and we would expect them to continue to do so after repeal.

Fourth, issues of proper relationships, public displays of affection, and harassment that arose after integrating women will certainly surface after repeal of Don't Ask, Don't Tell. Just as military leaders continue to be vigilant in addressing incidents of sexual harassment and assault, we must remain committed over the long term to leadership, professionalism, and respect, regardless of sexual orientation.

IX EXPERIENCE OF OTHER MILITARIES

Comparison between our military and those of other nations is far from perfect, but here too we find some information relevant to our assessment.

The Working Group researched the policies regarding military service by gays and lesbians in the 43 NATO and ISAF partner nations.²¹⁵ Of these, the Working Group identified 35 that permit gays and lesbians to serve openly in their military. The Working Group confirmed that six nations—the United States, Bulgaria, Jordan, Poland, Turkey, and the United Arab Emirates—exclude gay men and lesbians from serving or serving openly in the military by policy. For the remaining two nations, the Working Group was unable to determine their policies regarding service by gays and lesbians. In some nations, actual practice toward gays and lesbians in the military may differ from official policy.

215 The Working Group undertook to research the policies of all nations around the world, by contacting embassies and researching foreign laws and policies. This research proved inconclusive in many instances. For many countries, the Working Group was unable to obtain definitive information on their policies. This exercise was further complicated by the fact that many countries may not have a formal military policy banning gays and lesbians or open service, but the countries' civilian laws criminalize homosexuality or homosexual conduct as a general matter.

A number of nations have, over the past 20 years, transitioned to policies permitting open service by gays and lesbians. These countries include the United Kingdom (policy changed in 2000), Canada (1992), Australia (1992), Germany (2000), and Israel (1993). Some of these nations changed their policies in light of court decisions or other legal challenges. For instance, the United Kingdom and Canada lost court cases that then required them to rapidly implement a change in their policies.²¹⁶ In Germany²¹⁷ and Australia, national defense leaders changed their policies to head off adverse outcome in pending court challenges.

Working Group members interacted with senior military and civilian officials from the United Kingdom, Canada, and Australia to study conditions prior to policy change, how they handled the transition, and what impacts, if any, they observed. The Working Group focused on these three countries because they are in many ways culturally similar to the United States, and their militaries are, like the U.S. military, all-volunteer forces and of similar size proportionate to their national populations. These nations also work closely with U.S. forces in international operations.

Researchers from RAND also spent time interviewing military officials from Canada, the United Kingdom, Germany, the Netherlands, Italy, Israel, and Australia.

Prior to policy change in these countries, the rank and file military was generally opposed to allowing gay men and lesbians to serve. Notably, both Canada and the United Kingdom conducted surveys of their military personnel, and both convened small study groups to examine the potential implications of change. The surveys conducted in Canada and the United Kingdom revealed that 60–65% of military personnel were opposed to bathing or sharing living quarters with gay men or lesbians,²¹⁸ and 35–45% were opposed to working with gay men or lesbians.²¹⁹ The most common arguments against policy change involved degradation of unit cohesion, concerns about personal privacy in bathing facilities and housing, moral opposition, and medical concerns related to HIV and AIDS—many of the same concerns expressed by U.S. Service members in the Working Group’s engagements with the force.²²⁰

The approach taken to the change in policy varied by country, but by and large they undertook what is best described as a minimalist approach. The usual pattern for implementing policy change started with an announcement of the policy change, sometimes accompanied by a statement from senior defense leaders, and followed by an information packet for the chain of command to explain how the policy worked and how it was to be enforced. In Israel and Germany, the announcement was simply a notice of the change embedded within a list of other policy changes. In RAND’s interviews, German officials

noted that in many cases, military leaders were unaware of the impending change until after it had already occurred.²²¹

These countries, by and large, describe their current policies regarding gay men and lesbians in military service as, in essence, a “non-policy.”²²² By this, they mean that gay men and lesbians may serve openly not because they have a policy expressly permitting it, but because they have no specific policy on military service by gay men and lesbians at all. When the bans and restrictions were lifted in these countries (in the case of the United Kingdom, it was a ban on homosexuality in the military; in Australia, a prohibition on homosexual conduct; and in Canada, from 1988, restrictions on gays and lesbians serving in certain sensitive and leadership positions), they were most often replaced with general policies of non-discrimination or codes of conduct that addressed all military personnel without regard to their sexual orientation. The United Kingdom, for instance, issued a formal Code of Social Conduct that applies to all its military personnel, but does not specifically address homosexuality or sexual orientation.²²³ Israel’s military personnel policy is silent on the issue of homosexuality.²²⁴

Only a few of these nations assessed the impact of their policy changes in the years after the bans were lifted. In discussions with the Working Group and with RAND, many foreign military officials have referred to the change as a “non-issue.” Within the United Kingdom, Canada, and Australia militaries, there was a general expectation that noticeable numbers of gay men and lesbians would reveal their sexual orientation to fellow military personnel after the policy change, but in fact very few did so. As a result, commanders and senior officials have generally concluded that the policy change has had little impact on their forces.²²⁵

Officials in Canada and the United Kingdom also indicated that their recruiting goals were still met in the years immediately following the policy change, and that their retention did not suffer as a result of the policy change.²²⁶

The United Kingdom undertook a review six months after the policy change as well as a more formal review two years afterwards. British officials told RAND that they knew of three military members who had resigned from service as a result of the policy change, out of a total force of 250,000 personnel.²²⁷ In their two year review, the United Kingdom did not notice any recruitment challenges. Indeed, British officials observed that their new recruits were largely “indifferent” to the presence of gay men and lesbians in the ranks.²²⁸

Similarly, Australian defense officials reported no noticeable problems with recruiting or retention following the change.²²⁹

Thus, in the United Kingdom, Canada, and Australia, no problems with recruiting and retention following the change in policy to permit gay men and lesbians to serve were reported, except for isolated reports of small increases in the loss of senior non-commissioned officers that may have resulted in part from the policy change.

None of these nations directly assessed the effects of the policy change on unit cohesion or combat effectiveness. However, most of these nations have been engaged in combat operations in the years since changing their policy. Uniformly, these nations reported that they were aware of no units that had a degradation of cohesion or combat effectiveness, and that the presence of gay men and lesbians in combat units had not been raised as an issue by any of their units deployed in Iraq or Afghanistan. The United Kingdom's review two years after its policy change found very few problems in units, primarily because only a small number of military members opted to disclose their sexual orientation. Those few incidents that did occur were handled at the unit level, and were comparable in scope to incidents reported as "personality clashes."²³⁰ Since the time of that review, British forces have deployed to Iraq and Afghanistan; senior officials interviewed indicated that no incidents had occurred during these deployments and that leaders and military personnel had fully adapted to the policy.²³¹

None of the nations contacted by the Working Group or RAND indicated that there was a rise in the number of harassment incidents as a result of the policy change.²³² Germany maintains a somewhat unique reporting mechanism for formal complaints of all kinds, which operates outside the Ministry of Defence and reports directly to the Parliament. In the five years since the policy change, 50 of the 60,000 complaints filed involved a gay man or lesbian. Of those 50, fewer than 10 involved harassment of some kind.²³³ In the United Kingdom, there was no increase in the rate of same-sex harassment. In the two years that followed the policy change, there had been one incident of an unwanted sexual advance by a gay man, which was dealt with effectively at the unit command level.²³⁴ Canada observed no change in the rate of same-sex harassment in the years after policy change.²³⁵ In Australia there were 12 complaints filed involving gay men or lesbians in the 2 years post policy change, of which fewer than 5 involved harassment of any kind.²³⁶ In their report to the Working Group, RAND notes that in the course of their review of foreign militaries, several countries have commented that harassment due to gender integration was far more pronounced than harassment due to sexual orientation.²³⁷

X

EXPERIENCES OF DOMESTIC ORGANIZATIONS

We also looked to the experiences of various municipal and federal agencies in the United States in integrating gay and lesbian personnel. As with foreign militaries, there are limits to making comparisons to these domestic organizations, but there are some important insights to be drawn. In particular, a number of the federal agencies currently have personnel who live and work alongside U.S. military personnel in deployed areas. For this task, we relied in large part on RAND's update to its 1993 report.²³⁸

In 1993, RAND studied sexual orientation at local police and fire departments. These institutions were chosen based on certain similarities to the military: they are all-volunteer forces of U.S. citizens, they are hierarchical in nature, and they rely heavily on cohesion and readiness to perform effectively. In many of the organizations, men far outnumber women.

In its 2010 update, RAND again surveyed municipal public safety agencies, this time in Houston, San Diego, Chicago, Charlotte, Oklahoma City, Orange County, and Philadelphia. RAND also studied several Federal agencies, including the Federal Bureau of Investigation, the Central Intelligence Agency, the State Department, and the U.S. Agency for International Development.

In 1993, none of the organizations surveyed by RAND had formal bans on gay employees or limits on the positions they could hold, but they did report very few openly gay personnel. Since then, many of the localities in question adopted policies of non-discrimination based on sexual orientation, which in turn apply to these public safety agencies. For example, Chicago, Houston, San Diego, and Orange County all now have ordinances against discrimination based on sexual orientation.²³⁹

Some Federal agencies have instituted policies to the same effect. For example, then-Secretary Warren Christopher issued a memo in 1994 outlining the Department of State's commitment to non-discrimination:

"The Department of State is committed to equal opportunity and fair and equitable treatment for all. The Department shall not discriminate among its employees or candidates for employment on the basis of race, color, national origin, sex, religion, disability, or sexual orientation."²⁴⁰

238 RAND, 2010.

239 RAND, 2010, 331.

240 RAND, 2010, 331.

Later, in 1998, President Clinton issued an Executive Order prohibiting discrimination based on sexual orientation for civilian employees in all Federal agencies.²⁴¹ Twenty-four states have enacted similar prohibitions applicable to state organizations.²⁴²

Employees of these institutions reported that having gay and lesbian personnel among their ranks has had no effect on their organization's institutional performance. Rather, it appears that a common focus on the job brought co-workers together despite personal beliefs. Anecdotally, one Philadelphia police officer said: "[Other police officers] can hate your guts but they will still back you up,"²⁴³ noting instances of racist white police officers supporting fellow officers who were black. Likewise, a captain of a firefighting squad opined that sexual orientation "has nothing to do with fighting fires."²⁴⁴ Several interviewees actually reported that integration of gay and lesbian personnel resulted in improved performance, in that the organizations were better equipped to respond to concerns of gay and lesbian constituents in their communities.²⁴⁵

Gay and lesbian employees of the agencies surveyed were evaluated by the same criteria as all other employees and accordingly, were represented in institutional leadership. The FBI reported that it had gay employees working successfully in positions that required close collaboration with the military, both domestically and internationally.²⁴⁶ Some stated that a work environment permitting gay and lesbian employees to acknowledge their sexual orientation improved individual job performance as the individuals did not have to expend effort concealing part of their lives and could focus fully on their work.²⁴⁷

Recruiting has also not suffered, with police and fire departments generally reporting "an abundance" of recruits for their agencies.²⁴⁸ Some agencies (e.g., Chicago Police Department, Philadelphia Police Department) have gone so far as to conduct specific outreach efforts to their local gay and lesbian communities.

Overall, retention was generally reported to be very high at the agencies surveyed, and it is rare for an employee to leave for reasons related to sexual orientation.²⁴⁹

The fire departments RAND studied presented a somewhat comparable environment to the military with regard to living and working conditions and associated privacy concerns. While on shift, firefighters share living, bathing, and eating facilities. Also like the military, fire departments had to adapt when women were integrated into their ranks. Those adaptations were often temporary at first (e.g., curtains dividing living spaces) with

249 RAND, 2010, 348.

more permanent accommodations following over time. Nonetheless, firefighters share intimate quarters when on duty, regardless of permanent, separate facilities. None of the departments interviewed saw the need for additional privacy accommodations for gay firefighters, and some individuals said that, when compared to integrating women, integrating gay and lesbian personnel was trivial. Very few privacy problems have been reported on the basis of sexual orientation.²⁵⁰

Among Federal agencies, the FBI's training facility at Quantico, Virginia is one example of an environment where Federal employees share living space. During interviews there, RAND did not find any incidents or complaints based on sexual orientation.²⁵¹ Foreign service officers from the State Department may be assigned to shared living spaces in certain countries; according to a foreign service officer interviewed by RAND, this has "absolutely been a non-issue."²⁵²

Furthermore, some Federal agencies send their personnel to deployed environments, where they may work alongside U.S. military personnel and live in military housing facilities. In the case of the FBI, according to RAND, no agent has asked to be sent home from a deployment with military personnel because of harassment directed against gays and lesbians.²⁵³

The locales surveyed represent a range of anti-discrimination regimes. In cases where there is no official policy forbidding discrimination based on sexual orientation, existing standards provide similar protections. For example, Oklahoma City policy states that "employment decisions shall be made on the basis of skill, ability, qualifications, and job performance."²⁵⁴ All agencies have some form of formal complaint process outside the chain of command to resolve complaints with a supervisor; typically an Office of Internal Affairs, human resources, or Equal Employment Opportunity office. Federal employees interviewed by RAND cited a 1992 change in policy allowing gay individuals to obtain security clearances and Executive Order 13087 in 1998 as important to extending workplace protections to employees.²⁵⁵

In the 1990s, more open forms of harassment such as graffiti on lockers were a concern in many agencies. Today, however, these forms of harassment are far less frequent. Slurs and derogatory name-calling based on sexual orientation still happen, but at much lower rates than for race or gender. These concerns are typically handled successfully at low levels in the organizational hierarchy.²⁵⁶

252 RAND, 2010, 337.

253 RAND, 2010, 337.

254 RAND, 2010, 331.

255 RAND, 2010, 332–333.

256 RAND, 2010, 342–343.

In general, reports of gay men or lesbians harassing others individuals are rare. In Oklahoma City, interviewees claimed that gay officers tended to keep their off-duty life private. One interviewee stated, “I know in this part of the country it’s not easy for people [to accept homosexuality]. I was raised to believe [homosexuality] is wrong, but at work, it’s about treating all fairly.”²⁵⁷

RAND found no case of standards of conduct being lowered due to the presence of gay or lesbian employees, and some interviewees stated they thought having openly gay co-workers benefitted the unit.²⁵⁸ For the most part, gay men and lesbians either kept their sexual orientation private, or revealed it to select co-workers on a case-by-case basis.²⁵⁹ Interviewees typically had trouble estimating the number of gay or lesbian members of their organization because only a small number were open about their sexuality to the entire department. When gay employees have decided to “come out,” it has typically been a discreet event to a few people. One human resources representative stated, “If you can’t be successful out, then you won’t come out.”²⁶⁰

There were also very few reports of “flamboyant” or inappropriate behavior by gay and lesbian personnel. One official observed that if a police officer carried a purse while on duty, he would be disciplined for a uniform policy violation. Broadly there was a sense that gay personnel know what behavior is acceptable in a business environment.²⁶¹

In general, cohesion and effectiveness have not seemed to have been affected by breaches of standards of conduct. An Oklahoma City Police officer said, “We really just think of ourselves as gray shirts.”²⁶² A fire captain said that sexual orientation does not advantage or disadvantage a firefighter.²⁶³ What mattered most to people interviewed was not a person’s background or orientation, but whether they could do the job.

In sum, as with racial and gender integration of the military, the process of integrating gay men and lesbians into these municipal and Federal organizations ultimately laid many fears to rest. The experience of municipal law enforcement agencies and Federal agencies has been that the integration of gay and lesbian personnel has not negatively affected institutional or individual job performance.

XI PANEL ASSESSMENT

To assist us in our assessment, the Working Group established a panel to consolidate and review the full breadth and depth of data collected by the Working Group and to conduct a staff assessment. A summary of the assessment panel’s approach, make-up, and findings are contained in this section; our overall assessment, which considers the findings of the staff assessment along with other factors, is in the following section.

Approach

To address the Terms of Reference, the Working Group needed to understand how the six areas assigned by the Terms of Reference—military readiness, military effectiveness, unit cohesion, recruiting, retention, and family readiness—relate to one another. Figure 5 depicts the model constructed by the Working Group to depict these relationships. Areas in blue are those assigned expressly by the Terms of Reference: military readiness, military effectiveness, unit cohesion, recruiting, retention, and family readiness. The overarching area to be assessed was military effectiveness. Military readiness and unit cohesion are primary components of military effectiveness. In addition, “unit effectiveness,” which is similar to but somewhat different from unit cohesion, was considered an additional component of military effectiveness that should be evaluated. Within military readiness, components are defined by statute, and include personnel readiness. As such, recruiting and retention were considered to be subcomponents of military readiness. Taken together, the panel’s assessment of these major assessment areas and their subcomponents provided the information for the co-chairs to make an overall risk assessment to military effectiveness.

Figure 5. Working Group Military Effectiveness Assessment Model

In order to understand and evaluate each assessment area, the Working Group broke down each area into component parts. For unit cohesion, academic and military research indicates that it is made up of both task cohesion and social cohesion.²⁶⁴ Therefore, though they were not specifically assigned by the Terms of Reference, the panel assessed these subcomponents too. Unit effectiveness was assessed both while in garrison and deployed. Recruitment and retention focused on enlisted and commissioned officer personnel. Additionally, as part of the Department of Defense's responsibility to report readiness to Congress,²⁶⁵ the deployability of the force is considered part of military readiness; and it was also evaluated by the panel. Finally, family readiness was evaluated based on three distinct time periods for a military family: in garrison, during deployment, and while relocating.

The panel was selected to represent all the Services and a wide range of ages, grades, warfare specialties, and experiences. The assessment panel included military officers, three senior non-commissioned officers, and several DoD career civilians. The panel consisted of combat arms personnel, aviators, surface combat personnel, an intelligence officer, a personnel specialist, family readiness specialists, a recruiter, a judge advocate, an aeromedical officer, and a military researcher. Eight of the panel members were part of the Working Group, including three Working Group members who were brought into the Working Group specifically because of their recent operational experience. For most of the review, the panel consisted of 11 members; for the family readiness review, the panel was increased to 15 members. In performing their assessment, each of the panel members applied their own individual, professional judgment. Through inclusion of panel members representing the operational communities in each service, the concerns and views of those communities were both heard and incorporated into the panel deliberations. Specifically included were representatives from the Army and Marine Corps combat arms communities.

To conduct its staff assessment, the panel used a standard military decision support process recommended by the Force Structure, Resources, and Assessment Directorate of the Joint Staff (J-8). The same process has also been used by the Department of Defense in a variety of complex military decisions and risk assessments. The process is also widely used and accepted in academia and industry as well.²⁶⁶

The first step of the decision support process required the assessment panel to determine the importance of each of the sub-areas to the various assessment areas. For example, the panel had to determine whether task cohesion or social cohesion had greater influence to overall unit cohesion and to what degree—or whether the two sub-areas had equal importance. The panel reviewed an extensive body of research, including materials submitted by outside organizations about the relative importance of task and social cohesion. This particular topic is itself subject to ongoing debate among academics and researchers. When discussing the Don't Ask, Don't Tell policy, some researchers have minimized the

264 "Task cohesion" refers to the ability to work together effectively in order to accomplish a mission. "Social cohesion" refers to the emotional bonds and trust among unit members.

265 10 U.S.C. § 117.

266 Other users of the process include National Aeronautics and Space Administration, Johnson & Johnson, and Amtrak.

importance of social cohesion and explained that it is only task cohesion that is critical to performance.²⁶⁷ Others tout the importance of social cohesion in military units as the driving force behind unit performance.²⁶⁸ The consensus among the panel was that both contribute to unit cohesion, but that task cohesion is the more important of the two. Indeed, research and analysis of the Service member survey data shows that task cohesion has a stronger relationship with unit performance than social cohesion.²⁶⁹ Thus, the panel weighed task cohesion significantly higher (0.84) than social cohesion (0.16) in relative importance for overall unit cohesion.

In a similar manner, the panel assigned numerical weights to each assessed area as reflected in Figure 6.

In order to conduct its risk assessment, the panel reviewed relevant material and heard presentations from six different subject matter experts on the topics of unit effectiveness,

Adler (Westport, CT: Praeger Publishers, 2006), 185–201; CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Members, 2010.

unit cohesion, recruiting, retention, deployability, and family readiness. Each subject matter expert described the area to be assessed, provided relevant information gathered by the Working Group, and answered questions. The information provided included qualitative information from the Working Group’s systematic engagement of the force and their families (i.e., information exchange forums, focus groups, online inbox, and confidential communication mechanism), quantitative data from surveys, other data from the Services, scholarly work from civilian and military researchers, materials submitted by outside organizations, experiences of foreign militaries and domestic organizations, historical accounts of racial and gender integration in the U.S. military, and the relevant sections of RAND’s update to its 1993 report.

After hearing each presentation and reviewing the data, panel members assigned a numeric rating for the risk of repeal of Don’t Ask, Don’t Tell to each sub-area of military readiness, unit effectiveness, unit cohesion, recruiting, retention, and family readiness. A rating of less than 3 was “LOW RISK”; a rating of 4 and above, but less than 6, was “MODERATE RISK,” and 7 and above was “HIGH RISK.” A rating between 3 and 4 was “LOW-MODERATE” and between 6 and 7 was “MODERATE-HIGH.”

The assessments of each individual panel member were then averaged to determine a single risk assessment for each area. Risk assessments for subcomponents were aggregated, in accordance with the weights assigned, to form a numeric risk rating for the overall area assessment.

The panel applied its numeric ratings twice: once before and once after the consideration of risk mitigation factors, including the various policy, legal, training and education, and leadership recommendations of the Working Group. The panelists assumed that the Department of Defense had adequate time to fully implement these recommendations.

Concurrently, a “red team” observed the assessment process from a separate room. The purpose of the red team was to critically evaluate the application of the methodology by the assessment panel, to ensure that the methodology was applied fairly and objectively, and that the assessment was based on relevant data and subject matter expertise. The red team was composed of seven individuals, co-led by a general officer and a career SES civilian, with personnel from each Service, as well as civilian analysts that specialized in

red teaming. The red team was provided with the same information as the panel members and was able to hear and see everything during the assessment. The red team provided a summary report noting areas of concern with regard to methodology, discussion of ratings, group dynamics, and weaknesses in logic and analysis. The red team noted that, in general, the assessment panel's conclusions and assessments were somewhat more conservative (i.e., presuming greater risk) than warranted given the data and information considered. Additionally, although the panel members did not always agree on their assessment of risk, panel deliberations were noted to be thoughtful, dispassionate, and without undue influence by any one panel member.

Factors Considered by the Panel

In evaluating the information gathered by the Working Group and presented by the subject matter experts, the panel considered a number of contextual factors, the most important of which are discussed below. Through the survey process and other engagements with the force, the Working Group heard views, concerns, and attitudes about a repeal of Don't Ask, Don't Tell. Utilizing this information—in conjunction with historical lessons, the experiences of foreign militaries and domestic organizations, and organizational research on the topic within the U.S. military—the panel made its assessments of the impact of repeal. In order to best interpret this information, the panel also considered several contextual factors including: the relationship between attitudes and behaviors, research on when and if gays and lesbians are likely to disclose their sexual orientation in a military environment, and understanding what “open” service is and is not.

Attitude vs. Behavior. First, the assessment panel discussed research indicating that attitudes—including those expressed in surveys—are not a good predictor of actual future behavior. This is demonstrated in social psychology data.²⁷⁰ Attitudes tend to be fairly general and emotionally laden. Behaviors reflect attitudes to a limited extent, and are also strongly affected by rules, social norms, and other constraints of specific situations. Thus, this is one of the reasons the Working Group's survey focused in large part on Service members' actual, past experiences with gay men and lesbians in their unit, and less on the predictions of how Service members might respond to future situations.

Disclosure of Sexual Orientation. Second, the panel considered the extent to which gay and lesbian Service members will disclose their sexual orientation upon repeal. Research reviewed by the panel indicated that gay and lesbian Service members make-up approximately 3–4% of the total force.²⁷¹ Based upon academic literature, RAND's survey of gay and lesbian Service members, and the experiences of other nations after policies were changed to allow gay men and lesbians to serve openly, the panel expected gay Service

This survey is administered by the National Institutes of Health and incorporates information on a variety of work and health related topics. It includes information on self-reported sexual orientation and military service.

members to continue to be discreet about their personal lives and careful to whom they share their sexual orientation.

Understanding What “Open” Service Means. Third, the panel considered the apparent disconnect between Service members’ reports of having served successfully with others they believe to be gay or lesbian and predictions of negative impacts if gays and lesbians are allowed to serve “openly.” When Service members speak about gays and lesbians with whom they actually served, such co-workers are described based on their professional attributes, technical proficiency, and what they brought to the unit. In contrast, when expressing generalized concerns about repeal, Service members often focused on stereotypes: that gay men in particular would act in an effeminate manner inconsistent with the common image of a warfighter, would make unwanted sexual advances toward heterosexual Service members, or would engage in inappropriate public displays of affection.²⁷² These generalized perceptions of gay Service members led to a fear that unit cohesion, morale, and good order and discipline will erode. Additionally, the panel considered the fact that Service members were not aware of the Working Group’s recommendations for how to implement a repeal of Don’t Ask, Don’t Tell. As such, the consensus was that Service members, fairly, were likely to consider a “worst case” scenario when predicting likely impact of repeal.

Areas of Assessment

With regard to each of the assessment areas the panel made the following findings:

Unit Cohesion. As discussed previously, unit cohesion has two primary parts, task cohesion and social cohesion. “Task cohesion” refers to the ability to work together effectively in order to accomplish a mission. “Social cohesion” refers to the emotional bonds and trust among unit members.

Based on research and comments from currently serving gays and lesbians, the panel expected that the number of gay and lesbian Service members would remain small following a repeal, and that most gay and lesbian Service members would likely only disclose their sexual orientation in a limited manner.²⁷³

Service members reported high levels of task cohesion in their current units—including those who believed they were currently serving with gay men and lesbians. Overall, 72% of Service members, and 77% of Service members currently serving with someone they believe to be gay or lesbian, indicated that repeal would have a positive, mixed, or no effect on task cohesion.²⁷⁴ Analysis of the survey data revealed that the largest driver of task cohesion was not the presence of gay men or lesbians in a unit, but the presence of good leadership by

272 Service members, CRWG Information Exchange Forums and Focus Groups, 2010.

273 CRWG, “The Process of Disclosure of Sexual Orientation in the Workplace,” white paper, 2010.

274 CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Members, 2010.

officers and non-commissioned officers.²⁷⁵ Additionally, research indicates that leadership, shared mission success, and a common out-group or enemy all enable high unit cohesion.²⁷⁶

Another key factor in the panel’s assessment was research indicating that cohesion in military units is not likely to be adversely impacted by group diversity, especially with the presence of an effective leader.²⁷⁷ A number of Service members indicated in focus groups and in comments on the survey that what was important was whether or not someone could do their job, not their sexual orientation.²⁷⁸ The panel noted that Service members within combat arms were somewhat more negative about impact of repeal on task cohesion; however, combat arms personnel also believed, on the whole, that they were better led and reported higher overall cohesion in their current units.²⁷⁹

On the other hand, a significant reason for the panel’s relatively high risk assessments for social cohesion was the potential impact of repeal on trust within a unit that might result from any violations of personal privacy. Though the possibility of violent episodes based on violations of personal privacy exists, the panel assessed that instances of violence are likely to be extremely rare and isolated. In addition, the panel found—and survey results supported—that while some units or individuals may reduce their off-duty socializing post-repeal, this has little impact on social cohesion, especially when compared to the large impact of leadership.

The combined assessments of the panel members yielded an initial risk rating of LOW–MODERATE for task cohesion, and of MODERATE–HIGH for social cohesion before mitigation measures were considered. Given the relative greater importance of task cohesion to social cohesion, the panel rated the overall initial risk to unit cohesion as LOW–MODERATE.

278 Service member, CRWG Focus Groups, 2010.
279 CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Members, 2010.

The panel determined the impact of repeal on personal privacy, trust, and overall social cohesion can be significantly mitigated by the Working Group’s policy recommendations, emphasis on existing standards of conduct, support to leaders to handle situations dealing with personal privacy, and education of the force that will help break down stereotypes. The panel recognized that mitigation measures for social cohesion will, in large part, rely on unit leaders to manage the expectations and behavior of their unit members. With these types of mitigation measures in place, the panel’s risk assessments went down considerably. Consistent, sexual-orientation neutral standards of conduct, as well as a policy of not collecting or tracking information on a Service member’s sexual orientation, served to mitigate task cohesion risk. Altogether, the panel found the risk to task cohesion as LOW, the risk to social cohesion as MODERATE, and the overall risk to unit cohesion to be LOW.

Unit Effectiveness. Unit effectiveness refers to a unit’s ability to accomplish assigned tasks or missions and is the product of a complex interplay of numerous factors, both internal and external to the unit. Internal factors include leadership, individual knowledge and skills, training, equipment, logistical support, and unit cohesion, while external factors include weather, terrain, and enemy characteristics. Many of these factors would not be impacted by repeal; however, social factors such as cohesion, leadership, and social interactions, could be impacted. As such, the research and analysis for unit cohesion was a component of the assessment of the impact of repeal on unit effectiveness.

The panel assessed the risk to unit effectiveness in the two environments within which the majority of military units operate: “in garrison” (e.g., at home, on base, or in port) and deployed. Prior to mitigation measures, the panel rated the impact of repeal as MODERATE risk in garrison and as LOW–MODERATE in a deployed environment.

The survey results revealed that Service members were more negative about the impact of repeal on unit effectiveness while deployed to a field environment or out at sea, with 44% of respondents reporting that unit effectiveness would be affected negatively in

that situation.²⁸⁰ On the other hand, the numbers of those predicting negative effects fell to 29% when asked about unit effectiveness in a crisis situation and 31% in an intense combat situation.²⁸¹ These results suggest a large number of respondents are concerned about privacy and non-work-related distractions in the field or at sea. However, these concerns diminish when a strong focus on mission accomplishment is required. These findings are consistent with research showing that a mutual threat and high levels of interdependence among unit members, commonly found in combat situations, enhances cohesion by activating an in-group identity and a shared goal that supersedes individual differences.²⁸² Within garrison or during down time on deployment, the external threat is greatly reduced or non-existent, and those environments allow for numerous distractions, which can exacerbate tensions between Service members and detract from mission focus.

Further, the survey results revealed unit effectiveness was reported to be good among those Service member who are currently serving with someone believed to be gay or lesbian.²⁸³ While these ratings are slightly less positive than those for units in which the Service member is not serving with someone believed to be gay or lesbian, when quality of leadership is accounted for, this difference becomes virtually non-existent.²⁸⁴ It is only in units with poor quality leadership—which in the survey accounted for less than 3% of responses—that this difference is noticeable. As with unit cohesion, the differences in unit effectiveness due to quality of leadership are five to ten times larger than those due to the presence of someone believed to be gay or lesbian.

The panel also found relevant the historical record of the U.S. military's experience with racial and gender integration, as well as experiences of foreign militaries and analogous domestic organizations. Not long after surveys of U.S. forces indicated that 65–80% of white Service members predicted significant disruption and negative impact to unit effectiveness if blacks were integrated into their units, Army research from the period 1951–1953, conducted during the Korean War, found that racially integrated units performed in combat equally as well as all-white units.²⁸⁵ Likewise, Army research from the 1970s revealed no decline in unit effectiveness as a result of gender integration.²⁸⁶

Finally, RAND's updated report notes that domestic police and fire departments concluded that the presence of gay men and lesbians did not undermine unit effectiveness. The RAND report also describes the experiences of several foreign militaries that lifted bans on the military service of gay men and lesbians.²⁸⁷ These nations have participated in

287 RAND, 2010, 275–316.

combat operations, often in cooperation with U.S. forces, since they lifted their bans, and none observed a decline in unit effectiveness.

The primary focus of mitigation measures were good leadership, clear standards of conduct applicable to all Service members, and well-designed education and training programs. The panel discussed the importance of leaders fully and consistently enforcing the standards of conduct in garrison or in port, as well as when deployed in the field or at sea. When the recommended mitigation measures were considered, the panel rated the risk of repeal to unit effectiveness in both garrison and deployed settings as LOW. With those two environments combined, the panel rated the risk of repeal to overall unit effectiveness as LOW.

Military Readiness. Military readiness is defined as the ability of forces to fight and meet the requirements of the National Military Strategy.²⁸⁸ Within military readiness, the panel considered recruiting, retention, and deployability issues as separate sub-areas for assessment. The panel rated retention as the most important of the three based on the time and resources invested in developing each Service member through their career, followed by non-deployability issues based on its impact on the ability to send forces abroad, and recruitment. The panel's assessment of each is described separately below. Based on the assessments of recruiting, retention, and deployability factors, the panel assessed the overall risk of repeal to military readiness as MODERATE, before taking account of any mitigation measures and LOW, after taking account of these measures.

Recruiting. The panel concluded, from data supplied by the Services, there would be little impact from a repeal of Don't Ask, Don't Tell on recruiting for the officer and enlisted ranks. Service Academies and ROTC programs remain highly competitive and Services are meeting their officer accession objectives.

A military recruiting survey asked potential recruits whether a repeal of Don't Ask, Don't Tell would impact their likelihood to enlist. RAND analyzed this data and concluded that the effect on enlisted recruitments could decline by up to 7%, or the equivalent effect of a 1% decline in the national unemployment rate. The overall decline of 7% came from RAND's analysis of a survey conducted by Joint Advertising Marketing Research and Studies in the April-June timeframe.²⁸⁹ (A subsequent analysis of a survey in the July to September timeframe, which used slightly different wording, showed an *increase* in overall recruiting of 4%; however, this information was not available to the panel at the time of its assessment.)²⁹⁰

The consensus among panel members, however, was that overall risk to recruitment was LOW for a number of reasons.

First, research and survey data show that enlisted recruits are driven primarily by economic and financial reasons. Research also shows that there is a weak link between attitudes and behavior, especially when individuals are asked to predict behavior in situations with which they are not familiar. As such, the panel was skeptical that enlisted recruits' prediction about the impact of repeal on their likelihood of enlisting would reliably predict their actual behavior. Thus, the consensus of the panel was that a 7% decline would not actually come to fruition.

Second, military recruitment systems are structured such that they are resilient to fluctuations in the availability of potential recruits and the demand for new recruits on an annual basis. Each Service has been able to meet recruiting goals in recent years in substantially more difficult conditions than exist currently.²⁹¹

288 Department of Defense, Joint Publication 1-02, *Dictionary of Military and Associated Terms*, September 30, 2010, 387.

289 RAND, 2010, 178, 187.

290 RAND, 2010, 178, 187.

291 CRWG Assessment Team, "Recruiting Analysis Paper," white paper, 2010.

Third, Service member survey data indicated that 63% of respondents would still recommend military service if Don't Ask, Don't Tell was repealed.²⁹²

Finally, based on the experience of other nations, the panel believed that any recruiting challenges resulting from a repeal of Don't Ask, Don't Tell will be minimal.

Accordingly, the panel assessed that, without mitigation measures in place, the risk of repeal to both officer and enlisted recruitment is LOW.²⁹³

In terms of mitigation measures, of particular importance to the panel's assessment was the recommendation not to collect data on applicants' sexual orientation and to continue existing policy of not asking recruits to reveal their sexual orientation. Also of importance was education and training for recruiters. This would enable them to clearly, succinctly, and accurately explain to potential recruits what repeal of Don't Ask, Don't Tell means for individual recruits, thereby reducing uncertainty about the change in policy.

After such mitigation measures were taken into account, the risk of repeal to both officer and enlisted recruitment was assessed as LOW.

²⁹² See Appendix C, Question 80.

²⁹³ In reaching this conclusion, the panel did not place any weight on arguments offered that repeal would increase the number of ROTC candidates available, or recruiters' access to college campuses. Although repeal may mean that ROTC programs will be generally more accepted on college campuses, the panel did not find any persuasive evidence that supports the view that repeal will have a positive effect on officer recruitment. There may be minimal gain, but more likely a net zero impact, of access to schools and institutions that currently prohibit military accessions programs.

Figure 13. Recruiting Risk Assessment After Mitigation

Retention. Just as the Military Services place great emphasis on recruiting in order to sustain personnel readiness, they also emphasize retention of those already serving. Retaining those the Services have already invested time and resources training and developing to be productive members of the force is critical to the sustainment of readiness. This is particularly true of those junior leaders who represent an investment of 7–10 years of training and development, and who make up the pool of the future leaders of the force. As with recruitment, the panel assessed retention of enlisted and officer personnel separately.

Prior to mitigation measures being taken, the panel concluded that the risk of repeal of Don't Ask, Don't Tell to the retention of enlisted and officer personnel is MODERATE.

Figure 14. Retention Risk Assessment Before Mitigation

Here, key to the panel's considerations were these factors:

First, the survey results revealed that if Don't Ask, Don't Tell were repealed, 62% of Service members across all pay grades reported that their career plans would not change; 13% reported that they will leave sooner than planned, and 11% indicated that they will consider leaving sooner than planned.²⁹⁴ Additionally, 19% of Service members who reported they intend to remain beyond their current obligation or until retirement, indicated they would leave sooner if Don't Ask, Don't Tell is repealed.

Second, the panel concluded, based on the survey results and other factors, that enlisted personnel retention is most heavily influenced by financial benefits and economic conditions outside the military. The Service member survey asked respondents to identify the top three factors in considering whether to stay or depart from military service. Among the enlisted ranks, the state of the economy was consistently ranked first or second—except for among the senior enlisted grades for whom retirement benefits and years to retirement became more important. The survey results indicate that officer retention is impacted primarily by personal job satisfaction and the satisfaction of their families with the military. Additionally, when Service members compared these particular factors to repeal, only 8% of Service members viewed repeal to be more important than other retention factors.²⁹⁵ RAND's analysis of this data estimates the number of Service members, depending on Service and warfare community, who may leave the military sooner as a result of repeal at 3–6%.²⁹⁶

Third, the majority of enlisted personnel have long-term service obligations that will prevent large numbers from leaving immediately if repeal were to occur. Initial obligations are between three to six years; with a second contract term, this often adds up to nine to ten years' service. The 10-year mark is halfway to retirement benefits. Over the years of fulfilling their service obligations, enlisted personnel will likely adjust to and better understand the changes brought about by repeal. Officers do not sign enlistment contracts. They incur service obligations in various other ways (e.g., professional education), but these obligations do not extend as far through an officer's career as typical service obligations do for enlisted personnel. Officers have more flexibility in extending their obligations and decide to leave or stay for a larger variety of reasons. Thus, though survey results indicated fewer officers than enlisted personnel would change their career plans if Don't Ask, Don't Tell were repealed, the panel assigned a greater risk of repeal to officer retention than enlisted retention. This was because officers have greater flexibility in their own retention decisions, there are fewer financial incentive programs available to the Services that may significantly affect officer retention, and the primary burden of managing the process of repeal will fall to leaders of small units.

294 CRWG analysis of *2010 DoD Comprehensive Review Survey of Active Duty and Reserve Members*, 2010.

295 See Appendix C, Question 33.

296 RAND, 2010, 188.

Fourth, neither Canada nor the United Kingdom observed retention problems as a consequence of their lifting of the respective bans on military service by gay men and lesbians.²⁹⁷

The panel concluded that, after mitigation measures, the risk of repeal of Don't Ask, Don't Tell to the retention of enlisted personnel is LOW, and the risk to retention of officers is higher, in the range of LOW-MODERATE. The overall risk rating for retention is LOW-MODERATE.

In terms of mitigation factors, key to the panel's risk assessment on retention was the recommendation not to introduce new mechanisms for Service members to terminate their military service prior to the conclusion of their present service obligation. Education and training considered was also considered important, to enable commanders to effectively communicate the actual and expected consequences of repeal for everyday life in the military, for use in retention counseling.

Other Readiness Factors. Personnel readiness is a key facet of military readiness and refers to the preparedness of Service members, individually and collectively, to perform their responsibilities in support of the missions assigned. Within personnel readiness, commanders track unit personnel who are non-deployable. Many reasons exist as to why a member may be non-deployable, including lack of a security clearance, pending disciplinary action, inadequate training, or the Service member being within 180 days of separation.

297 Canadian Defense Officials, interview with the CRWG, May 2010; United Kingdom Ministry of Defence, *Tri-Service*.

The panel identified four key reasons for non-deployability that may be impacted by a repeal of Don't Ask, Don't Tell—training, medical, legal, and family care. The panel found the impact of repeal on deployability to be LOW, even before mitigation measures were considered.

Throughout the Working Group’s engagements with the force, Service members brought up various medical concerns. This included increased risk of contracting HIV or other sexually transmitted diseases. In 1993, the DoD Military Working Group concluded that HIV-related concerns were a significant risk to the military if gays and lesbians were allowed to serve openly. However, since then the medical community has made significant advances in its understanding, treatment, and prevention of HIV. The panel noted that every Service member is tested for HIV at least every two years, and all Service members are tested prior to and following deployment, on the advice of a doctor, or upon request. A positive HIV test immediately classifies a Service member as non-deployable. All new recruits are tested, and a positive HIV test result precludes entry into military service.

In addition, the Services Surgeons General have issued a joint letter to the Working Group stating that the medical community procedures to prevent the spread of HIV and to secure the blood supply of the Military Services are sufficient, such that a repeal of Don't Ask, Don't Tell will have no adverse impact to deployability of personnel.²⁹⁸ Thus, the panel concluded that repeal of Don't Ask, Don't Tell would result in no significant change in overall HIV prevalence in the military.

Next, the panel considered survey results in which 46% of Service members predicted that repeal of Don't Ask, Don't Tell would have a negative effect on their unit’s ability to train well together.²⁹⁹ The panel reviewed research and discussions related to social cohesion and

298 Surgeons General of the Army, Navy, and Air Force, Memorandum to the CRWG Co-Chairs, “Medical Impact of the Repeal of 10 U.S.C. § 654 (Don't Ask, Don't Tell Policy),” August 12, 2010.

299 CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Members, 2010.

privacy and concluded that any impacts to training would not jeopardize the deployability or readiness of troops.

The panel also considered whether repeal would result in an increase in violence or harassment such that Service members would be unable to deploy due to pending disciplinary action. Foreign militaries indicated very few incidents of violence and harassment following repeal.³⁰⁰ The panel reviewed data from the Services on typical non-deployability due to “legal reasons,” reviewed qualitative data from the Working Group’s engagements with the force, and assessed comments regarding violence from the write-in portions of the survey. Based on this, the panel concluded that existing standards and good leadership would maintain discipline within the force and not impact deployability.

Finally, the panel considered whether repeal would impact family care plan issues. Within the military a family care plan is required for children of dual military spouses or children of a single military parent. Service members must have concrete plans in place for who will take care of their children in the event of deployment and must ensure that required legal documentation—such as a medical power of attorney—is complete. Current data shows that the numbers of those who are non-deployable for lack of family care plans is very small, and the panel concluded that repeal would not add significantly to that number.

Mitigation measures discussed by the panel included: sexual orientation neutral policies, maintaining current high standards of conducts, and providing education and training to leaders and the force at large. These measures were determined to be effective in reducing overall risk of deployability. The panel rated the potential impact to deployability as LOW.

300 “Lessons Learned from the Service of Gays and Lesbians in Allied Militaries,” presentation, *The Brookings Institution Conference*, Washington, DC, May 19, 2010.

Family Readiness. Family readiness is the military family’s ability to successfully meet the challenges of daily living in the unique context of military life, including deployments and frequent relocation. Programs and benefits provided by the Services play a key role in helping Service members and their families through deployment-related stresses.

Based on several factors, the assessment panel concluded that the overall risk of repeal of Don’t Ask, Don’t Tell to family readiness, before considering mitigating factors, was LOW. The area of largest concern was family readiness in garrison.

First, a majority of spouses (61%) rated their family as ready or very ready, with only 6% rating their family as unready or very unready.³⁰¹ Moreover, 78% of spouses said that repeal would have no effect on or would improve their family readiness, while only 8% said it would reduce their family readiness.³⁰²

Second, spouses reported that repeal would have no effect on their involvement in family support activities, programs, and events. More than 70% of spouses who said they attended most support activities and that these activities were important or very important indicated that repeal would have no effect on their participation.³⁰³ However, 24% of those spouses who attend most deployment support events, and 15% of those who attend most family support events, report they would attend less often. Although some spouses had expressed concerns about a negative impact on participation in these programs, many recognized that same-sex partners cope with the same experiences and stresses while their Service members were deployed. Many (72%) of the spouses also said that repeal would either have no effect on their attendance at military social events or that they would attend more often.³⁰⁴

301 See Appendix D, Question 31.

302 See Appendix D, Question 32.

303 CRWG analysis of 2010 DoD Comprehensive Review Survey of Active Duty and Reserve Members, 2010.

304 See Appendix D, Question 27.

Third, while many spouses and Service members expressed concerns about same-sex couples moving into on-base housing, a majority of spouses who currently live in on-base housing said that if Don't Ask, Don't Tell were repealed they would stay in on-base housing. Far fewer, less than 20%, said they would seek to move if Don't Ask, Don't Tell were repealed.³⁰⁵

Fourth, while the assessment panel recognized the potential for some minor negative impacts to family readiness for many families, they also concluded that there would likely be a substantial positive effect on family readiness for gay or lesbian Service members and their families.

The key mitigating factors considered by the assessment panel were effective education, strong leadership, and clear policies. Although many spouses indicated that they would prefer to have information about a new policy distributed on military web sites (34%) or printed information (37%), many also said that no special communication would be necessary (43%).³⁰⁶

After considering the impact of repeal after mitigation measures are in place, the panel rated the overall impact on family readiness as LOW, including in garrison.

305 See Appendix D, Question 21.

306 See Appendix D, Question 11.

Summary of Panel Assessment

The panel provided the Co-Chairs with their staff assessment of overall risk in the areas of military readiness, unit effectiveness, unit cohesion, recruiting, retention, and family readiness. Figure 20 depicts the panel's numeric risk ratings prior to the consideration of mitigating factors; Figure 21 depicts the numeric risk ratings after consideration of mitigation factors.

Figure 20. Preliminary Assessment of Risk Before Mitigation Factors Considered

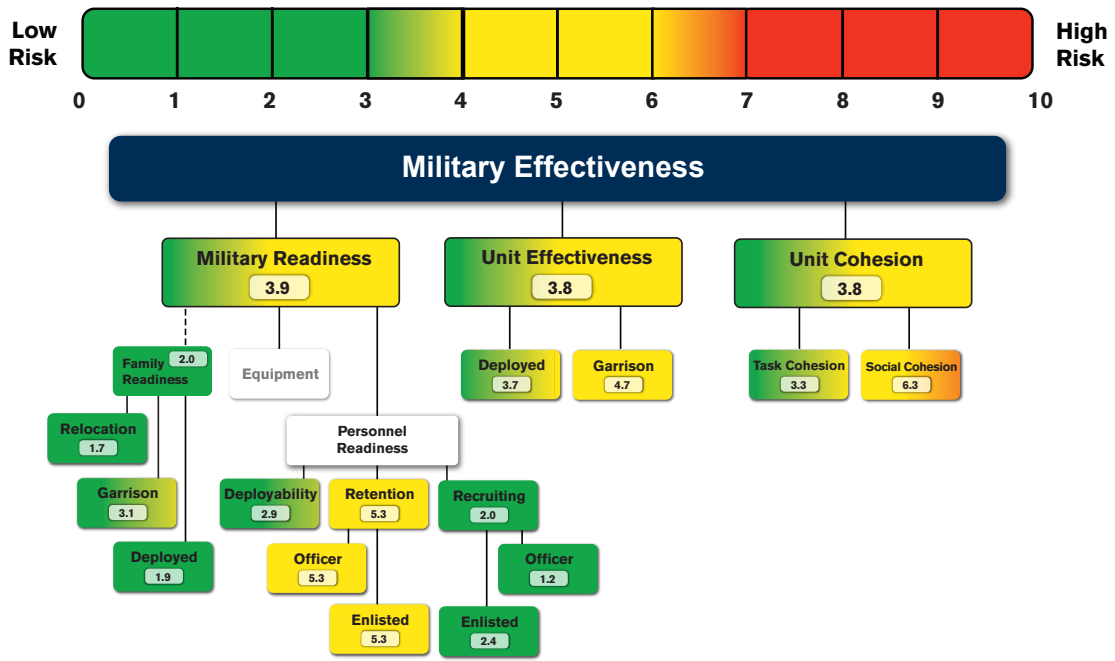

Figure 21. Assessment of Risk After Mitigation Factors Considered

XII OUR OVERALL ASSESSMENT

Introduction

Based on all we saw and heard, our assessment is that, when coupled with the prompt implementation of the recommendations we offer below, the risk of repeal of Don't Ask, Don't Tell to overall military effectiveness is low. We conclude that, while a repeal of Don't Ask, Don't Tell will likely, in the short term, bring about some limited and isolated disruption to unit cohesion and retention, we do not believe this disruption will be widespread or long-lasting, and can be adequately addressed by the recommendations we offer below. Longer term, with a continued and sustained commitment to our core values of leadership, professionalism, and respect for all, we are convinced that the U.S. military can adjust and accommodate this change, just as it has others in history.

The survey results reveal that approximately 70% of the force predict that repeal will have mixed, positive or no effects on their unit's ability to "work together to get the job done." We are mindful that, during this time of war, these same survey results reveal a significant minority—around 30%, and in some cases as high as 40–60% in warfighting units—that predict negative effects. However, for the reasons stated below, we are confident that the risks of repeal to military effectiveness in these units, while somewhat higher than the overall force, remain within acceptable levels when coupled with the recommendations for implementation in this report.

For our assessment we considered a number of things large and small, complex and simple. Those most important are described below.

We begin with an e-mail received in the course of our review from a military spouse from Virginia who is also an active volunteer in support of military families. This one e-mail captures much of what underlies our assessment.

"As a wife of a Marine (an officer who entered as an enlisted), I've served as a volunteer, been appointed as a Family Readiness Assistant and worked professionally as a Readiness and Deployment Support Trainer and a Family Readiness Trainer for Marine Corps Family Team Building, I've had the opportunity to come in contact with and discuss this matter with a number of Marines and family members of varying ages and ranks....

“I do believe that repealing ‘Don’t Ask, Don’t Tell’ is an inevitable and important step for modernizing our current military force, and is fundamentally necessary for a country built on the ideals of equality for all citizens.

“I firmly believe that, in time, our future generations will look back on our current debate as antiquated and nonsensical, failing to comprehend how we could possibly oppose opening our military to any citizen wanting to serve the nation. I believe this debate is largely motivated by a general misunderstanding and a reactionary fear, similar to the motives of our previous generations who opposed or questioned the idea of integrating our armed forces or permitting women to serve in the diverse roles they currently occupy across our branches of the service.

“With that said, I have no illusions that this process will be an easy or a quick one. The military is a community steeped in tradition and order. We take great pride in our history and culture, and at times this pride often impedes the speed of progress or willingness to embrace change. In the Marines Corps, particularly, the opposition to this process will likely be immense, specially surrounding living quarters and barracks structure for junior enlisted Marines. I believe that this issue can be addressed and mitigated by the leadership (both officers and NCOs) starting with every Marine’s first day of training at boot camp/officer candidate school...

“I think it’s important we emphasize both to our leaders and junior military members that this policy is intended to build morale among the branches and equalize our military, not to alter its culture. It’s important to remember that the military culture is an impartial one that does not offer any special treatment, advancement or encouragement of any lifestyle choices, and simply welcomes those who want to serve their nation—without discrimination—but equally without any endorsement of any personal qualities, traits or choices made by its members.

“I believe that in the next few decades, as the armed forces adjust to this change and become more comfortable with its impact, the resistance will recede and the military will actually be stronger for making this policy change.”³⁰⁷

Survey Results

The results of the Service member survey, described in section VII, reveal that in today’s U.S. military, a solid majority believe that repeal of Don’t Ask, Don’t Tell will have a positive, mixed, or no effect on military readiness, military effectiveness, unit cohesion,

307 Spouse, e-mail message to CRWG, 2010.

recruiting, retention, and family readiness.³⁰⁸ Asked specifically in question 68a of the Service member survey about how an openly gay or lesbian individual in their unit would affect the unit's ability to "work together to get the job done," 70% of Service members said the effect would be equally mixed, positive, or non-existent; only 30% said it would be negative or very negative.³⁰⁹ Asked in question 81 about how repeal will affect their own military career plans, 62% responded that their plans would not change, while an additional 11% did not know.³¹⁰

Overall, in response to a variety of questions, 50–55% of the force indicated that repeal will have a mixed or no effect; about 15–20% believe that repeal will have a positive effect, while another 30% believe it will have a negative effect.³¹¹

The results of the spouse survey are consistent. When spouses were asked whether repeal of Don't Ask, Don't Tell would affect their preference for their Service member's future plans to stay in the military, 74% of respondents said repeal would have no effect on their preference; 12% answered "I would want my spouse to leave earlier."³¹² When asked what they would do if a gay or lesbian Service member and same-sex partner lived on-base in their neighborhood, 63% of respondents answered "I would get to know them like any other neighbor," 13% answered "I would do nothing," and 13% answered "I would generally avoid them when I could."³¹³ Finally, 76% of spouses answered the presence of a gay or lesbian partner of a Service member "would not affect my attendance at deployment-support activities."³¹⁴

To be sure, these survey results reveal a significant minority—about 30%—who expressed in some form and to some degree negative views or concerns about the impact of a repeal of Don't Ask, Don't Tell.³¹⁵ Any personnel policy change for which a group that size predicts negative consequences must be approached with caution. However, there are a number of other considerations that still lead us to conclude that the risk of repeal to overall military effectiveness is low.

Misperceptions About "Open" Service

The reality is that gay men and lesbians are already serving in today's military. The other reality, revealed in the course of this review, is that much of the force recognizes this. As the survey indicates, 36% believe they are currently serving in a unit with a gay or lesbian Service member; 69% believe that, at some point in their career, they have served in

308 See Appendix C, Questions 67–75.

309 See Appendix C, Question 68a.

310 See Appendix C, Question 81.

311 See Appendix C, Questions 67–75.

313 See Appendix D, Question 25.

314 See Appendix D, Question 29.

315 See Appendix C, Questions 67–75.

a unit with a co-worker they believed to be gay or lesbian.³¹⁶ But, a frequent response among Service members at information forums, when asked about the widespread recognition that gay men and lesbians are already in the military, is “yes, but I don’t *know* they are gay.” Put another way, the concern with repeal among many is with “open” service.

In listening to Service members we found a perceptions gap—between the perception of the gay Service member that people know and work with, and the perception of the stereotypical gay individual that people do not know and have never worked with. When Service members talk about a unit member they believe to be gay or lesbian, their assessment of that individual was based on a complete picture and actual experience, including the Service member’s technical and tactical capabilities and other characteristics that contribute to his or her overall effectiveness as a member of the military and as a colleague.

By contrast, when asked about serving with the *imagined* gay Service member who is “open” about his or her sexual orientation, that feature becomes the predominant if not sole characteristic of the individual, and stereotypes fill in the rest of the picture. Stereotypes motivated many of the comments we heard. The most prevalent concern expressed is that gay men will behave in a stereotypically effeminate manner, while lesbian women are stereotypically painted in “masculine” terms. We heard widespread perceptions that, if permitted to be open and honest about their sexual orientation, gay Service members would behave as sexual predators and make unwelcome sexual advances on heterosexuals, gay men would adopt feminine behavior and dress, there would be open and notorious displays of affection in the military environment between same-sex couples, and that repeal would lead to an overall erosion of unit cohesion, morale, and good order and discipline. Based on our review, however, we conclude that these concerns are exaggerated and not consistent with the reported experiences of many Service members.

The perceptions gap we note here is also reflected in the survey data. The data reveals that Service members who are currently serving with someone they believe to be gay or lesbian are less likely to perceive a negative impact of repeal on the key elements of unit task and social cohesion, and unit effectiveness. Conversely, those who have believe they have never served with someone who is gay or lesbian are more likely to perceive a negative impact. Likewise, of Service members who believe they have in their career served in a unit with a co-worker who is gay or lesbian, 92% stated that the unit’s “ability to work together” was “very good,” “good,” or “neither good nor poor.”³¹⁷

Thus, our view is that the negative perceptions and predictions of serving alongside a gay Service member are refuted by the considerable track record of actual experiences where Service members did exactly that.

316 See Appendix C, Question 34.

317 See Appendix C, Question 47a.

In addition, we conclude that if Don't Ask, Don't Tell is repealed, there will not be a mass "coming out" of gay Service members, as some predict. We assess that, for the most part and at least in the short term, gay Service members would continue to be selective and discreet about whom they share information about their sexual orientation with, for reasons having nothing to do with the law and everything to do with a sheer desire to fit in, co-exist, and succeed in the military environment. This conclusion is also consistent with the environment in civilian society, where no law requires gay men and lesbians to conceal their sexual orientation to keep their jobs. In civilian society, gay men and lesbians are legally permitted to be "open" about their sexual orientation, but research indicates that they tend to be open about their sexual orientation only with someone they know and trust (e.g., friends) rather than with someone they don't know as well (e.g., neighbors). (See Figure 22.)

Figure 22. Disclosure of Sexual Orientation by Gay Men Ages 24–34

Source: RAND, 2010, 11

We believe this selectivity would exist even more so in the military environment, apart from what the law may prohibit or permit. RAND conducted a limited survey that included 208 individuals who anonymously self-identified as gay or lesbian Service members and asked them how their behavior would change if Don't Ask, Don't Tell were repealed. Only 15% indicated they would like to have their sexual orientation known to everyone in their unit if the law is repealed, and 59% would selectively disclose it to others. (See Figure 23.)

Figure 23. Disclosure of Sexual Orientation Under Don't Ask, Don't Tell and Repeal

Source: RAND, 2010, 27.

Our conclusion that gay and lesbian Service members would, for the most part, continue to be discreet about their orientation is consistent with what we heard directly from those Service members, on an anonymous basis:

“Personally, I don’t feel that this is something I should have to ‘disclose.’ Straight people don’t have to disclose their orientation. I will just be me. I will bring my family to family events. I will put my family pictures on my desk. I am not going to go up to people and say, hi there—I’m gay.”³¹⁸

“I think a lot of people think there is going to be this big ‘outing’ and people flaunting their gayness, but they forget that we’re in the military. That stuff isn’t supposed to be done during duty hours regardless if you’re gay/straight.”³¹⁹

“If I am asked the question, then I will answer honestly, but I will not go to work the next day after DADT is repealed and just announce to everyone that I am Gay. I try my best not to make the people around me uncomfortable; I already know how that feeling can be.”³²⁰

320 Service member, Confidential Communication Mechanism, 2010.

Risks of Repeal Within Warfighting Units

Though the survey results demonstrate a solid majority of Service members—around 70%—who predict mixed, positive, or no effects in the event of repeal,³²¹ this percentage is not uniform among all subgroups in the U.S. military. The percentages of those who predict negative effects are higher in warfighting units.³²² In response to question 68a, for example, while only 30% the U.S. military as a whole predict negative or very negative effects on their unit’s ability to “work together to get the job done,”³²³ the percentage is 43% for the Marines Corps, 48% within Army combat arms units, and 58% within Marine combat arms units.³²⁴ Particularly in this time of war, we made sure that warfighters in all Services were part of our risk assessment process.

The percentages above reflect *attitudes*. Social science research tells us that attitudes, which are often laden with emotion and misperception, are less valuable as predictors of future behavior than actual experiences.³²⁵ Thus, in designing the survey we recognized that an important component in assessing the impact of repeal of Don’t Ask, Don’t Tell was to also focus on Service members’ actual past and present experiences in a unit with someone they believed to be gay.

In response to question 34 of the survey, while 36% of the overall force stated they are currently serving in a unit with someone they believe to be gay,³²⁶ only 20% of those in Marine combat arms units and 27% of those in Army combat arms units answered that they were serving with someone they believe to be gay.³²⁷ A similar distinction exists in response to question 36, when it came to those who have ever at any point in their career served in a unit with a co-worker they believed to be gay or lesbian. Thus, fewer Service members in warfighting units have served with someone they believe to be gay, and more are left to only imagine what service with an openly gay person would be like—the circumstance in which misperceptions and stereotypes fill the void, for lack of actual experience.

However, when Service members in warfighting units who had served with someone they believed to be gay or lesbian were asked to assess their actual experiences, the distinctions in survey results between those in combat arms and the overall military are almost non-existent. For example, for those who have had the experience of working with someone they believed to be gay or lesbian, when asked to rate that unit’s “ability to work together,” 92% of the overall military said the answer was “very good,” “good,” or “neither good nor poor.”³²⁸ In response to that same question, the percentage is 89% for those in

326 See Appendix D, Question 34.

327 Westat, vol. 1, Appendices J and L, Question 34.

328 See Appendix C, Question 47a.

Army combat arms units and 84% for those in Marine combat arms units—all very high percentages.³²⁹

These survey results reveal to us a misperception that a gay man does not “fit” the image of a good warfighter—a misperception that is almost completely erased when a gay Service member is allowed to prove himself alongside fellow warfighters. Anecdotally, we heard much the same. As one special operations force warfighter told us, “We have a gay guy [in the unit]. He’s big, he’s mean, and he kills lots of bad guys. No one cared that he was gay.”³³⁰

The survey results also reveal that, within warfighting units, negative predictions about serving alongside gays decrease when in “intense combat situations.” In response to question 71a, for example, 67% of those in Marine combat arms units predict working alongside a gay man or lesbian will have a negative or very negative effect on their unit’s effectiveness in completing its mission “in a field environment or out at sea.”³³¹ By contrast, in response to the same question, but during “an intense combat situation,” the percentage drops to 48%.³³²

Our judgment is that the levels of reluctance of gays to “out themselves” described in the previous section, even if permitted by law, would be even higher in warfighting units. This, coupled with the low number of gay men estimated to be in the military (relative to their representation in civilian population),³³³ leads us to conclude that, if the law were repealed, the change in culture and environment in warfighting units will be minimal.

For these reasons, we conclude that the risks of repeal within warfighting units of all Services, while somewhat higher than the force generally, remain within acceptable levels when coupled with our recommendations for implementation.

Change During a Time of War

Our assessment also took account of the fact that the Nation is at war on several fronts, and for a period of over nine years, the U.S. military has been fully engaged, and has faced the stress and demands of frequent and lengthy deployments. When it comes to a repeal of Don’t Ask, Don’t Tell, many ask: why now?

The question “why now?” is not for us, but for the President, the Secretary of Defense, and Congress, informed by the military advice of the Joint Chiefs of Staff. The question we answer here is “can we now?” We considered the question carefully and conclude that

329 Westat, vol. 1, Appendices J and L, Question 47a.

330 Service member, CRWG Focus Group, 2010.

331 Westat, vol. 1, Appendices J and L, Question 71a.

332 Westat, vol. 1, Appendices J and L, Question 71c.

333 RAND, 2010, 98–102.

repeal can be implemented now, provided it is done in a manner that minimizes the burden on leaders in deployed areas. Our recommended implementation plan does just that, and it is discussed more fully in the accompanying support plan for implementation.

The primary concern is for the added requirement that will be created by the training and education associated with repeal. We are cognizant of these concerns, but note that during this period, the Services have undertaken education and training in deployed areas on a number of important personnel matters. These education and training initiatives have included increased emphasis on sexual assault prevention and response, suicide prevention, and training to detect indications of behavioral health problems. The conduct of these programs in deployed areas indicates that training and education associated with a repeal of Don't Ask, Don't Tell can be accommodated. We assess this to be the case, in large part because our recommendations in this report involve a minimalist approach to changes in policies, plus education and training that reiterates existing policies in a sexual orientation-neutral manner.

It is also the case that the results of the survey indicate, though this is a time of war, a solid majority of Service members believe that repeal will have positive, mixed, or no effect. Most of those surveyed joined our military after September 11, 2001, and have known nothing but a military at war.

We are also informed by past experience. In the late 1940s and early 1950s, in the period immediately following World War II, during the Korean War and the beginning of the Cold War, our military took on the task of racial integration, in advance of the rest of society. And, at the time, the change implicated far larger numbers of Service members: African Americans in the Army then numbered 700,000 of a total force of over 8 million, and the opposition to racial integration was far greater than today's resistance to repeal of Don't Ask, Don't Tell. The process of racial integration was slow and presented many challenges, but history shows that there were no differences in combat effectiveness in the Korean War between integrated and all-white segregated units.

Resistance to Change Generally

We recognize that some number of individuals within any group or organization are initially resistant to significant change, no matter the specific circumstances.³³⁴ Research shows that factors such as self-interest, misunderstandings about the underlying situation, and differing assessments all play a role in creating initial resistance among a significant minority of those who will be affected by change.³³⁵ Such resistance can also occur based on the potential insecurity and instability that change can bring.³³⁶ Such baseline resistance

334 Eric B. Dent and Susan G. Goldberg, "Challenging 'resistance to change'", *The Journal of Applied Behavioral Science*, 35, no. 1, March 1999, 25–41; Paul Thornton, *Management Principles and Practice*. (Livermore: Wingspan Press), 2006. 153.

335 John P. Kotter and Leonard A. Schlesinger, "Choosing Strategies for Change," *Harvard Business Review* (Boston: July 1, 2008), 130–139.

336 Kotter, 130–139.

to any major organizational change is estimated by some experts at a consistent 20–30% (with 5–10% expressing strong resistance) and is to be expected.³³⁷

Lessons from History

Though there are fundamental differences among matters of race, gender, and sexual orientation, we believe the racial integration of the U.S. military in the 1940s and 1950s and the gender integration of the military that took place largely in the 1970s present some useful historical lessons and provide basic support for our assessment.

With the benefit of many years of hindsight, we believe the lesson to be drawn from these transformational experiences described in section VII above is that, in matters of personnel change within the military, predictions and surveys tend to overestimate the negative consequences for unit cohesion and military effectiveness, and underestimate the U.S. military's ability to adapt and incorporate within its ranks the diversity that is reflective of American society at large. These experiences also highlight the importance of effective leadership in the process of implementing change.

Experiences of Other Militaries

Our assessment is also informed by the experiences of foreign allies. To be sure, there is no perfect comparator to the U.S. military. In recent times, however, a number of other nations have transitioned to policies that permit open military service by gays and lesbians. These include the United Kingdom, Canada, Australia, Germany, Italy and Israel. Significantly, prior to change, surveys of the militaries in Canada and the U.K. indicated much higher levels of resistance than the Working Group's survey results—as high as 65% for some areas—but the actual implementation of change in those countries went much more smoothly than expected, with little or no disruption.³³⁸

We also know from the experience of other nations that very few gay men and lesbians “came out” after the lifting of the ban on military service. We have heard from military officials from the United Kingdom and Canada that few military members revealed their sexual orientation after the policy changed.³³⁹

337 Paul Thornton, *Management Principles and Practice*. (Livermore: Wingspan Press), 2006. 153.

338 “Lessons Learned from the Service of Gays and Lesbians in Allied Militaries,” presentation, *The Brookings Institution Conference*, Washington, DC, May 19, 2010.

339 Defense Officials from the United Kingdom, Canada, Australia, and New Zealand, interviews with CRWG, Norfolk, VA, May 2010.

Domestic Organizations

Our assessment is also informed by the experiences of non-military organizations in our country. As with the other comparators above, we recognize that no domestic organization is wholly analogous to the U.S. military. That said, we think the fact that municipal law enforcement agencies (local police and fire departments) and Federal agencies (including the FBI and CIA) have had no negative major disruptions in integrating gay and lesbian personnel is notable.

The experience of these agencies shows that the integration of gay and lesbian personnel has not negatively affected institutional job performance or individual job performance. Rather, it appears that in these organizations sexual orientation has had little or nothing to do with success in the workplace.³⁴⁰ Further, some gay and lesbian personnel were able to do their jobs even better in environments accepting of their sexual orientation.³⁴¹ Integrating gay and lesbian employees also did nothing to negatively impact recruiting and retention at the agencies surveyed.³⁴² Further, in situations in which gay and lesbian personnel in these Federal agencies have lived and worked alongside U.S. military personnel in deployed environments, we are aware of no reports of conduct detrimental to accomplishing the mission.³⁴³

Panel Assessment

Finally, our overall assessment is itself based on the staff assessment conducted by a panel of military officers, senior non-commissioned officers, and DoD career civilians chosen to represent all the Services, and a wide range of ages, grades, warfare specialties, and experiences. To conduct its assessment, the panel used a standard military decision support process recommended by the J-8, Directorate of the Joint Staff. This staff risk assessment was typical in the military context, and it is one the military utilizes for a variety of important decisions.

To inform our assessment of the overall risk to military effectiveness, the panel assessed the impact of repeal of Don't Ask, Don't Tell on military readiness, unit effectiveness, unit cohesion, recruiting, retention, and family readiness. After consideration of various mitigation measures, including policies, leadership, education, and training, the panel assessed all areas and subcomponents of those areas as in the LOW or MODERATE risk ranges. In the key areas of military readiness, unit effectiveness, and unit cohesion the risks were all deemed to be LOW. Having considered the panel's assessments, as well as other information gathered by the Working Group and implementation of our recommendations that follow, we assess the risk of repeal of Don't Ask, Don't Tell to overall military effectiveness is LOW.

XIII

OUR RECOMMENDATIONS

We now turn to our recommendations. Our Terms of Reference call for us to recommend appropriate changes to policies and regulations and to develop leadership guidance and training for the force in the event of repeal.

These recommendations were developed in conjunction with our assessment, based on all that we heard. Many of the recommendations that follow come, in particular, from listening to Service members during our engagement of the force. In some instances, we recommend revisions to existing regulations; in other areas we recommend that the Department of Defense and/or the Services simply reiterate existing guidance; in still other places we recommend no change at all, but reviewed the issue because a number of Service members raised it. As indicated in the prior section, our assessment presumes successful implementation of these recommendations.

Motivating many of our recommendations is the conclusion, based on our numerous engagements with the force, that repeal would work best if it is accompanied by a message and policies that promote fair and equal treatment of all Service members, minimize differences among Service members based on sexual orientation, and disabuse Service members of any notion that, with repeal, gay and lesbian Service members will be afforded some type of special treatment. Within the military culture, such a message maximizes the opportunities for quick and smooth acceptance of gay and lesbian Service members within the force. It is also consistent with all we heard from gay and lesbian Service members themselves, who told us that they simply want a repeal of the law so that they can be treated the same as everyone else, and serve the Nation without fear of separation if their sexual orientation becomes known.

As a related matter, we believe it critical that it be made clear to those who are opposed to repeal, particularly on moral and religious grounds, that their concerns are not being rejected and that leaders have not turned their backs on them. In the event of repeal, individual Service members are *not* expected to change their personal religious or moral beliefs about homosexuality; however, they *are* expected to treat all others with dignity and respect, consistent with the core values that already exist within each Service. For the U.S. military, these are not new concepts, given the wide variety of views, races, and religions that already exist within the force.

Leadership, Training, and Education

First and foremost, successful implementation of a repeal of Don't Ask, Don't Tell requires strong leadership, a clear message, and proactive training and education. Throughout our engagements with the force, we heard from general and flag officers and senior enlisted leaders in all the Services, including those strongly opposed to changing the law and policy, words to the effect of "If the law changes, we can do this; just give us the tools to communicate a clear message." Further, leaders must demonstrate to Service members that they are committed to implementing this change, and that the leaders expect Service members to adapt as well. Messages like the one from the Commandant of the Marine Corps, that if repeal comes the Marines will "get in step and do it smartly,"³⁴⁴ must continue. Accordingly, the Working Group has developed training and education guidance in the event of repeal. This includes specific recommendations for training in the deployed environment. This training and education guidance is contained in the Support Plan for Implementation, provided as a companion document to our report.

In the Support Plan, we set forth what we believe is the key implementation message for repeal:

- *Leadership.* The clear message from the Working Group's assessment is "leadership matters most." Leaders at all levels of the chain of command set the example for members in the unit and must be fully committed to DoD policy to sustain unit effectiveness, readiness, and cohesion.
- *Professionalism.* Leaders must emphasize Service members' fundamental professional obligations and the oath to support and defend the Constitution that is at the core of their military service. In the profession of arms, adherence to military policy and standards of conduct is essential to unit effectiveness, readiness, and cohesion.
- *Respect.* Unit strength depends on the strength of each member. We achieve that strength by treating each member with respect.

In our view, the starting point for this message should be a written communication from the leaders of the Department of Defense, to include the Secretary of Defense and the senior military leaders of each Service, that deliver their expectations in clear and forceful terms.

³⁴⁴ General James F. Amos, Commandant, United States Marine Corps, *Senate Armed Services Committee Confirmation Hearing*, September 21, 2010, transcript, 13.

Standards of Conduct

Throughout our engagement of the force we heard Service members express concerns, in the event of a repeal of Don't Ask, Don't Tell, about standards of conduct. Most often, those concerns centered on a potential for unprofessional relationships between Service members, public displays of affection, dress and appearance, and acts of violence, harassment, or disrespect between homosexual and heterosexual Service members.

In light of these concerns, we considered whether the Department of Defense should issue revised or additional standards of conduct in the event of repeal.

The military is a highly regulated environment. Service core values, customs, courtesies, and traditions define acceptable behavior. Overall, the purposes of standards of conduct are to promote good order and discipline, prohibit behavior that would bring discredit on the Military Services, and promote the customs, traditions, and decorum of the military and of individual Services. Among many other things, military standards of conduct prescribe appropriate attire and personal appearance, prohibit unprofessional relationships, address various forms of harassment and related unprofessional behavior, and provide guidelines on public displays of affection. These standards of conduct regulate many aspects of Service members' personal lives considered off-limits in civilian society. These regulations, policies, and orders are generally issued at the Service level, or by commanders.

For example, the Air Force regulates dating, courtship, and close friendships between men and women, noting that personal relationships “become matters of official concern when they adversely affect or have the reasonable potential to adversely affect the Air Force by eroding morale, discipline, respect for authority, unit cohesion, or mission accomplishment.”³⁴⁵ The formation of such relationships between superiors and subordinates within the same chain of command or supervision is prohibited.³⁴⁶

Depending on the severity or impact to others, violations of standards of conduct may be addressed through administrative action (e.g., counseling or formal reprimand) or discipline under the Uniform Code of Military Justice (UCMJ). Criminal acts—for example, assault, cruelty and maltreatment, or disrespect to a superior commissioned or non-commissioned officer—may be addressed through non-judicial punishment or trial by court-martial.³⁴⁷

Rules concerning public displays of affection and proper dress and appearance, meanwhile, are largely unwritten and vary by Service and across commands within Services. For example, at present, other than in the Marine Corps there are no Service-level regulations or written policies prohibiting public displays of affection. However, public

³⁴⁵ Department of the Air Force, AFI 36-2909, *Professional and Unprofessional Relationships*, August 13, 2004, 2, para. 1.

³⁴⁶ AFI 36-2909, 3, para. 3.3.

³⁴⁷ 10 U.S.C. § 815.

displays of affection—especially while in uniform—are informally discouraged in all the Services as a matter of individual Service culture, traditions, and decorum.

We believe it is not necessary to set forth an extensive set of new or revised standards of conduct in the event of repeal. Concerns for standards in the event of repeal can be adequately addressed through training and education about how already existing standards of conduct continue to apply to *all* Service members, regardless of sexual orientation, in a post-repeal environment.

We do recommend, however, that the Department of Defense issue generalized guidance to the Services that all standards of personal and professional conduct must apply uniformly without regard to sexual orientation. We also recommend that the Department of Defense instruct the Services to review their current standards of personal and professional conduct to ensure that they are neutral in terms of sexual orientation and provide adequate guidance to the extent each Service considers appropriate on unprofessional relationships, harassment, public displays of affection, and dress and appearance. Part of the education process should include a reminder to commanders about the tools they already have in hand to remedy and punish inappropriate conduct that may arise in a post-repeal environment.

Moral and Religious Concerns

In the course of our review, we heard a large number of Service members raise religious and moral objections to homosexuality or to serving alongside someone who is gay. Some feared repeal of Don't Ask, Don't Tell might limit their individual freedom of expression and free exercise of religion, or require them to change their personal beliefs about the morality of homosexuality. Without doubt, the views along these lines were sharply divided and deeply held, and they cannot be discounted or dismissed.

Special attention should also be given to address the concerns of our community of approximately 3,000 military chaplains. Some of the most intense and sharpest divergence of views about Don't Ask, Don't Tell exists among the chaplains. During the course of the Working Group's engagements with the force, a number of currently-serving chaplains voiced concern that a repeal of Don't Ask, Don't Tell would constrain their ability to provide religious ministry consistent with their beliefs and customs; some chaplains also asked whether they would still be able to express opposition to homosexuality and worried that they might receive negative performance reports or adverse personnel actions for expressing such opinions. In the course of our review, we heard some chaplains condemn in the strongest possible terms homosexuality as a sin and an abomination, and inform us that they would refuse to in any way support, comfort, or assist someone they knew to be homosexual. In equally strong terms, other chaplains, including those who also believe homosexuality is a sin, informed us that "we are all sinners," and that it is a chaplain's duty to care for all Service members.

To ensure that we understood these issues, our Working Group included two military chaplains among its membership. In addition, we conducted discussion groups with chaplains, and personally consulted with the senior chaplains of each Service, as well as a number of more junior chaplains across the force.

To serve as a military chaplain, an individual must receive an endorsement from a qualified religious organization; if the organization withdraws its endorsement, the individual can no longer serve as a chaplain. The Working Group also contacted the approximately 200 ecclesiastical endorsing agencies that endorse military chaplains, to gauge the likelihood of continued endorsement in the event of repeal. Of the approximately 200 endorsing agencies to which the Working Group wrote, 77 responded, which, in total, represented almost 70% of active duty military chaplains. Of the 77 that responded, most expressed opposition to a repeal of Don't Ask, Don't Tell, based primarily on theological objections to homosexuality. However, none stated that it would withdraw its endorsements for military chaplains if the law were repealed. A significant portion of the respondents did suggest that a change in policies resulting in chaplains' free exercise of religion or free speech rights being curtailed would lead them to withdraw their endorsement.

In the discussion groups with chaplains, while many expressed opposition to a change in policy, nearly all indicated that they were willing to continue their ministry in the military. Only three out of approximately 145 chaplains who participated indicated they would seek to separate or retire should the law be changed.

In general, we conclude three things:

First, the reality is that in today's U.S. military, Service members of sharply religious convictions and moral values—including those who believe that abortion is murder and those who do not, and those who believe Jesus Christ is the Son of God and those who do not—and those who have no religious convictions at all, already co-exist, work, live, and fight together on a daily basis. This is a reflection of the pluralistic American society at large.

Second, with regard to Service members concerned about their own individual expression and free exercise of religion, we conclude that no modified or revised policy is required, particularly in light of the training and education we are recommending in the event of repeal. In our view, existing policies regarding individual expression and free exercise of religion by Service members are adequate. Service members will not be required to change their personal views and religious beliefs; they must, however, continue to respect and co-exist with others who may hold different views and beliefs.

Third, existing DoD and Service policies and guidance pertaining to chaplains is adequate to accommodate a repeal of Don't Ask, Don't Tell. In our view, existing policies on chaplains' protections and obligations are adequate and strike an appropriate balance between protecting a chaplain's First Amendment freedoms and a chaplain's duty to care

for all. Existing Army and Air Force regulations state that chaplains “will not be required to perform a religious role...in worship services, command ceremonies, or other events, if doing so would be in variance with the tenets or practices of their faith.”³⁴⁸ At the same time, according to Navy regulations, “chaplains care for all Service members, including those who claim no religious faith, facilitate the religious requirements of personnel of all faiths, provide faith-specific ministries, and advise the command.”³⁴⁹ Overall, it is DoD policy that chaplains “serve a religiously diverse population,”³⁵⁰ and, to be considered for appointment as a chaplain, an individual must be “willing to support directly and indirectly the free exercise of religion by all members of the Military Services, their family members, and other persons authorized to be served by the military chaplaincies.”³⁵¹

However, in recognition of the concerns expressed by chaplains and their endorsing agencies, the Department of Defense should, in the event of a repeal of Don’t Ask, Don’t Tell, direct the Services to reiterate the principle that chaplains, in the context of their religious ministry, are not required to take actions inconsistent with their religious beliefs, but must still care for all Service members. Evaluation, promotion, and assignment of chaplains must continue to be consistent with these long-standing Service policies.

Equal Opportunity

We recommend that, in a post-repeal environment, gay and lesbian Service members be treated under the same general principles of military equal opportunity policy that applies to all Service members. Under the Military Equal Opportunity program, it is DoD policy to, “promote an environment free from personal, social, or institutional barriers that prevent Service members from rising to the highest level of responsibility possible. Service members shall be evaluated only on individual merit, fitness, and capability.”³⁵²

Hand-in-hand with military equal opportunity are Service-level policies on diversity, inclusion, and respect. These are consistent with and support basic military values of treating every military member with dignity and respect. For instance, among the facets of the Air Force Diversity Policy is to “educate and train all personnel on the importance of diversity, including mutual respect, thus promoting an Air Force culture that values inclusion of all personnel in the Total Force...”³⁵³ The DoD Human Goals Charter, last issued in 1998, states that the Department of Defense strives “to create an environment that values diversity and fosters mutual respect and cooperation among all persons.”³⁵⁴ That same year, the Secretary of Defense William Cohen issued a memorandum in which he stated: “I will not tolerate illegal discrimination against or harassment of any DoD personnel. I expect all commanders,

348 AR 165-1, 12, para. 3-2.b(6); Department of the Air Force, AFI 52-101, *Planning and Organizing*, May 10, 2005, updated March 14, 2008, 2, para 2.1.

executives, managers, and supervisors to work continuously toward establishing a climate of respect and fairness for all DoD personnel.”³⁵⁵

Under the Military Equal Opportunity program, there is also a reference to “unlawful discrimination,” which is defined with reference to five specified classes: race, color, religion, sex, and national origin. The DoD Military Equal Opportunity directive states, “Unlawful discrimination against persons or groups based on race, color, religion, sex or national origin is contrary to good order and discipline and is counterproductive to combat readiness and mission accomplishment. Unlawful discrimination shall not be condoned.”³⁵⁶ Complaints of unlawful discrimination on these bases, as well as of sexual harassment, may be handled through the resources of the Military Equal Opportunity program, or through the chain of command. These five identified classes—race, color, religion, sex, and national origin—are also the focus of diversity programs and initiatives and are tracked as an identifier in Service personnel systems based on initial and periodic inquiries of Service members.

Meanwhile, there are other prohibited practices contrary to Military Equal Opportunity policy that do not involve “unlawful discrimination” against one of the five groups identified above, or sexual harassment; those prohibited practices are addressed principally through the chain of command, and not through the resources of the Military Equal Opportunity Program.

As stated before, we believe that, to maximize the opportunities for a smooth and successful repeal, perceived “equal treatment” of all Service members is key. Throughout the force, rightly or wrongly, we heard both subtle and overt resentment toward “protected groups” of people and the possibility that gay men and lesbians could, with repeal, suddenly be elevated to a special status. For example, a common question was whether, if the law were repealed, there would be affirmative action to recruit gay men and lesbians? While much of this sentiment is based on misperceptions about equal opportunity policy, we believe that, in a new environment in which gay and lesbian Service members can be open about their orientation, they will be accepted more readily if the military community understands that they are simply being permitted equal footing with everyone else, pursuant to general principles of military equal opportunity applicable to all Service members. This is consistent with the views and aspirations we heard from current and former gay and lesbian Service members: that they are not seeking special treatment, just asking the Department of Defense to “take [the] knife out of my back,” as one gay Service member put it.³⁵⁷

Therefore, in the event of repeal, we do *not* recommend that the Department of Defense place sexual orientation alongside race, color, religion, sex, and national origin as a class eligible for various diversity programs, tracking initiatives, and the Military Equal Opportunity program complaint resolution processes. Instead, the Department of Defense

356 DoDD 1350.2, 2, para. 4.2.

357 Service member, Confidential Communication Mechanism, 2010.

should make clear that sexual orientation may not, in and of itself, be a factor in accession, promotion, or other personnel decision-making. Gay and lesbian Service members, like all Service members, would be evaluated only on individual merit, fitness, and capability. Likewise, the Department of Defense should make clear that harassment or abuse based on sexual orientation is unacceptable and that all Service members are to treat one another with dignity and respect regardless of sexual orientation. Complaints regarding discrimination, harassment, or abuse based on sexual orientation would be dealt with through existing mechanisms available for complaints not involving race, color, sex, religion, or national origin—namely, the chain of command, the Inspector General, and other means as may be determined by the Services.

Collection and Retention of Sexual Orientation Data

As a related matter, we considered whether the Department of Defense should proactively collect and maintain data on Service members' sexual orientation. Under current policy, Service members are not asked to reveal their sexual orientation, and data regarding Service members' sexual orientation are not tracked (though discharge documents for Service members separated under Don't Ask, Don't Tell may indicate that the basis was homosexual conduct).

We recommend against creating a data category for Service member sexual orientation; in the event Don't Ask, Don't Tell is repealed, we recommend that the Department of Defense continue the practice of not asking Service members or recruits to identify their sexual orientation. This recommendation is consistent with the policy of other Federal agencies, and with the DoD's own policy for civilian employees. We would not, however, preclude the Department of Defense or the Services from continuing current policy, to collect and maintain other information that incidentally implicates sexual orientation, for example, where a gay or lesbian Service member lists a same-sex partner as a beneficiary for certain benefits, or as a person to be notified upon injury or death. (The issue of benefits is discussed in greater detail later in this section.) In the event such information is collected, it is protected from routine disclosure by Federal law and implementing DoD policy.³⁵⁸ Also, we would not preclude voluntary, anonymous, and confidential surveys, such as for purposes of legitimate data analysis or as a follow-up to this assessment.

The Uniform Code of Military Justice

Next, we recommend modification to the prohibition on sodomy in Article 125 of the Uniform Code of Military Justice (UCMJ),³⁵⁹ and a corresponding change to the Manual for Courts-Martial (which implements the UCMJ and provides rules, policies, and, procedures for UCMJ prosecutions).

³⁵⁸ 5 U.S.C. § 552a; Department of Defense, DoDD 5400.11, *Department of Defense Privacy Program*, May 8, 2007, 3, para. 4.6.

³⁵⁹ 10 U.S.C. § 925.

Article 125 of the UCMJ treats all acts of sodomy, heterosexual, homosexual, consensual, or otherwise, as punishable conduct. In *Lawrence v. Texas*,³⁶⁰ the Supreme Court held that private consensual sodomy between adults cannot be considered a crime. The U.S. Court of Appeals for the Armed Forces reached a similar conclusion in the military context in the case *United States v. Marcum*.³⁶¹ In light of these decisions, we recommend that Article 125 be repealed or amended to the extent it prohibits consensual sodomy between adults, regardless of sexual orientation. The other prohibitions considered punishable under Article 125, including forcible sodomy, sodomy with minors and sodomy that is demonstrated to be “service discrediting” (e.g., in public or between a superior and subordinate), should remain on the books.

The DoD Joint Service Committee on Military Justice, which consists of military lawyers from each Service, is responsible for conducting an annual review of the Manual for Courts-Martial and recommends changes to both the UCMJ and the Manual. The Joint Services Committee has already developed a legislative proposal along the lines outlined above, in light of *Lawrence* and *Marcum*, and we endorse that proposal.

In essence, the Joint Service Committee has proposed the following action by Congress: repeal of Article 125 in its entirety, and amend Article 120 of the UCMJ³⁶² to include forcible sodomy and sodomy offenses against children. The Joint Service Committee also proposes to rewrite the Manual for Courts-Martial so as to make clear that all other aspects of the repealed Article 125 not barred by *Lawrence* and *Marcum* may be prosecuted under Article 134 of the UCMJ,³⁶³ which generally prohibits all misconduct that is prejudicial to good order and discipline or is Service discrediting.

In addition and in general, we recommend that the Joint Service Committee review all other UCMJ offenses involving sexual conduct or inappropriate relationships to ensure sexual orientation-neutral application of the UCMJ in a post-repeal environment, consistent with the recommendations of this report. For example, as applied in courts-martial, the definition of “sexual intercourse” means only intercourse between a man and a woman.³⁶⁴ Several offenses specified in the Manual for Courts-Martial under Article 134 of the UCMJ—namely Adultery, Prostitution, and Patronizing a Prostitute—all have “sexual intercourse” as a required element of the offense.³⁶⁵ As a result, homosexual sex is not covered under these offenses, such that if a married woman had sex with a man who was not her husband, it could qualify as adultery under military law, but if she had sex with a woman, it would not. We recommend that the Joint Service Committee determine how to revise these offenses to apply to both homosexual and heterosexual sex.

Privacy and Cohabitation

Throughout our engagements with the force, we heard a number of Service members express discomfort about sharing bathroom facilities or living quarters with someone they know to be gay or lesbian. In connection with this issue, we note that 38% of survey respondents state that they have already shared a room, berth, or field tent with another Service member they believe to be homosexual;³⁶⁶ 50% believe they have already shared bathrooms with open bay showers that were also used by a Service member they believe to be homosexual.³⁶⁷

Housing policy for the U.S. military is established through a combination of DoD and Service-level regulations; in general the Department of Defense requires Service members without dependents, in pay grades E-6 and below, to live in barracks or dormitories. These Service members, with command approval, may live off-base. Overall, approximately 24% of the active duty force resides in barracks, dorms or onboard ship.³⁶⁸ This percentage varies from Service to Service: in the Air Force, the percentage is only 17%, while in the Marine Corps it is 39%.³⁶⁹

In general, DoD regulations also provide that Service members in barracks or dorms have a private bedroom and a bathroom shared by no more than one other person.³⁷⁰ However, there are variances to this standard, most notably the Marine Corps, the Navy, at Service academies, and in training environments. For instance, in the Marine Corps personnel E-3 and below share a bedroom in the interest of unit cohesion.³⁷¹ Navy shipboard requirements provide that both officers and enlisted personnel occupy shared staterooms or berthing areas divided by pay grade and gender.³⁷² The Services require gender segregation in housing and berthing.³⁷³

We do *not* recommend segregated housing for gay or lesbian Service members. We believe this would do more harm than good for unit cohesion, create a climate of stigmatization and isolation, and be impossible to enforce or administer unless Service members are required to disclose their sexual orientation. On the other hand, we are sensitive to concerns expressed to us by commanders that disputes may arise between gay and straight Service members assigned to live together involving, at least to some extent, sexual orientation. Commanders should have the flexibility, on a case-by-case basis, to address those concerns in the interests of maintaining morale, good order, and discipline.

366 See Appendix C, Question 86.

367 See Appendix C, Question 87.

368 Westat, vol. 1, Appendix F, Question 11.

369 Westat, vol. 1, Appendices S and T, Question 11.

370 U.S. Army Corps of Engineers, TI 800-01, *Design Criteria*, July 20, 1998, Table B-2.

371 Defense Manpower Data Center, *April 2007 Status of Forces Survey of Active Duty Members: Housing Briefing*, December 2007.

372 Department of the Navy, *Shipboard Habitability Design Criteria Manual*, December 1, 1955, 11, para. 3.2.3.3., 13, para. 3.2.7.2.

373 DoN, *Shipboard*, 11, para. 3.2.3.3., 13, para. 3.2.7.2.

Accordingly, we recommend that the Department of Defense expressly prohibit berthing or billeting assignments based on sexual orientation, except that commanders should retain the authority to alter berthing or billeting assignments on an individualized, case-by-case basis, in the interest of maintaining morale, good order, and discipline, and consistent with performance of mission.

Next, a frequent concern expressed by some Service members was personal privacy in settings where they may be partially or fully unclothed in the presence of another Service member they know to be gay or lesbian—for instance, shared showering facilities or locker rooms. Likewise, military mission or training requirements may require that Service members live and work under conditions that offer limited personal privacy. Many ask whether repeal of Don't Ask, Don't Tell will require a third and possibly a fourth set of separate bathroom facilities. Meanwhile, others regard the very suggestion as offensive. Service members consistently raised this general topic, so we are obliged to address it.

Personal privacy in shared bathing situations exists to varying degrees throughout the U.S. military. The basic design standard for DoD facilities requires separate male and female showers directly adjacent to the corresponding gender's dressing and toilet areas, and include private shower/drying stalls. In other places, such as recruit training, there are shared facilities containing open bay berthing and group showers. Navy shipboard design criteria require individual stall showers,³⁷⁴ while Army regulations only require separate toilet facilities for men and women, but do not establish personal privacy standards.³⁷⁵

Here again, we are convinced that separate bathroom facilities would do more harm than good to unit cohesion and would be impracticable to administer and enforce. Concerns about showers and bathrooms are based on a stereotype—that gay men and lesbians will behave in an inappropriate or predatory manner in these situations. As one gay former Service member told us, to fit in, co-exist, and conform to social norms, gay men have learned to avoid making heterosexuals feel uncomfortable or threatened in situation such as this. The reality is that people of different sexual orientation use shower and bathroom facilities together every day in hundreds of thousands of college dorms, college and high school gyms, professional sports locker rooms, police and fire stations, and athletic clubs.

Accordingly, we recommend the Department of Defense expressly prohibit the designation of separate facilities based on sexual orientation, except that commanders retain the authority to adjudicate requests for accommodation of privacy concerns on an individualized, case-by-case basis in the interest of maintaining morale, good order, and discipline, and consistent with performance of mission. It should also be recognized that commanders already have the tools—from counseling, to non-judicial punishment, to UCMJ prosecution—to deal with misbehavior in both living quarters and bathing situations, whether the person who engages in the misconduct is gay or straight.

374 DoN, *Shipboard*, 18, para. 3.4.3.4.

375 TI 800-01, 15-2, para. 2.c.

Benefits

Next, our Terms of Reference required that we consider the issue of benefits for same-sex partners and the families of gay and lesbian Service members, in the event of repeal. This issue is itself large and complex, and is part of the ongoing national, political, and legal debate concerning same-sex relationships and gay marriage. We studied the issue carefully, and no other policy recommendation came close to consuming as much time and effort.

As a preliminary matter, it is important to note that, given current law, particularly the Defense of Marriage Act,³⁷⁶ there are a number of benefits that cannot legally be extended today to gay and lesbian Service members and their same-sex partners, even those who were lawfully married in states that permit same-sex marriage. Therefore, on the issue of benefits, our recommendations are these, in the event of repeal of Don't Ask, Don't Tell:

1. That the Department of Defense and the Services inform Service members about those benefits that are now, under current law and regulations, already available to any person of a Service member's choosing, which would include a same-sex partner.
2. That the Department of Defense and the Services review those benefits that may, where justified from a policy, fiscal, and feasibility standpoint, be revised by a change in regulation to become a "member-designated" one—in other words, to give the Service member the discretion to designate whomever he or she wants as a beneficiary, which would include a same-sex partner.
3. That the Department of Defense and the Services not, at this time, revise their regulations to specifically add same-sex committed relationships to the definition of "dependent," "family members," or other similar term in those regulations, for purposes of extending benefits eligibility, but that this particular issue be revisited as part of a follow-on review of the implementation of a repeal of Don't Ask, Don't Tell.

Members of the U.S. military are eligible for and receive a wide array of benefits and support resources, both for themselves and for certain members of their families. These benefits include health care, on-base housing, housing allowances, family separation allowances, family support programs, and commissary and base exchange shopping privileges. Many of these benefits are governed and limited in some manner by statute and/or regulation, be it the amount of the benefit, who is eligible for it, or both. In the event of repeal of Don't Ask, Don't Tell, the basic question becomes whether and to what extent benefits and support resources currently available only to spouses of Service members can and should also be extended to same-sex partners of Service members.

376 1 U.S.C. § 7.

For our analysis of the benefits issue, we divided benefits broadly into three categories:

First, there are certain benefits that, given current law, cannot legally be extended to same-sex partners. Legal limitations include, for example, the small number of jurisdictions in the United States in which gay men and lesbians are legally permitted to marry or obtain legal recognition of their relationship, the statutory definition of “dependent” in Titles 10 and 37 of the U.S. Code, and, on top of all that, the Defense of Marriage Act, which for Federal purposes defines “marriage” to mean “only a legal union between one man and one woman as husband and wife” and “spouse” to refer “only to a person of the opposite sex who is a husband or a wife.”³⁷⁷ Thus, under current law, full benefit parity between spouses of heterosexual Service members and same-sex partners of gay and lesbian Service members in committed relationships is legally impossible.

More specifically, many of the most significant benefits for those who are married, including eligibility for the Basic Allowance for Housing at the “with-dependent rate,” are statutorily defined in a way that does not allow extension to any same-sex relationship. Criteria for the Basic Allowance for Housing—money a Service member living off-base receives to pay for housing—are set forth in 37 U.S.C. § 403. As Section 403 contemplates, the amount of the Basic Allowance for Housing is significantly higher if the Service member has “dependents.” However, “dependent” is also defined by law, in 37 U.S.C. § 401, and is limited to the Service member’s “spouse” or dependent parents, unmarried children, or certain others under the age of 23 who are placed in the legal custody of the Service member. And, as described above, the Defense of Marriage Act limits the definition of the word “spouse” to refer “only to a person of the opposite sex who is a husband or wife.”³⁷⁸ Thus, the higher “with-dependent” Basic Allowance for Housing cannot be made available to the gay or lesbian Service member under current Federal law, even if he or she is lawfully married, on the sole basis of a same-sex relationship.

Likewise, military health care benefits for same-sex partners are legally limited in the same way, because coverage is for “dependents” and that term is defined by law, in 10 U.S.C. § 1072, with reference to “spouse.”

Thus, for benefits in this first category, we simply cannot recommend that the Department of Defense extend them to same-sex couples, because it would be legally impermissible to do so. We did not, therefore, assess the fiscal implications of extending these types of benefits. We note, however, the evolving legal landscape. On July 8, 2010, a Federal district court in Boston declared the Defense of Marriage Act unconstitutional,³⁷⁹ and the case is now on appeal.

377 1 U.S.C. § 7.

378 1 U.S.C. § 7.

379 Memorandum Opinion, *Gill v. Office of Personnel Management*, Case No. 09-10309-JLT (D. Mass., July 8, 2010); Memorandum Opinion, *Massachusetts v. Department of Health and Human Services*, Case No. 1:09-11156-JLT (D. Mass., July 8, 2010).

The second category of benefits we studied are those that are now, under current law and regulations, fully available to anyone of a Service member's choosing, including a same-sex partner, because they are "member-designated" benefits. In other words, benefits like Servicemembers' Group Life Insurance and Thrift Savings Plan beneficiaries, missing member notification, and hospital visitation access, are currently available to same-sex partners because the Service member has discretion to designate the beneficiary. If Don't Ask, Don't Tell is repealed, Service members may so designate a same-sex partner without then having to conceal the nature of the relationship from the military. In the event of repeal, we recommend the Department of Defense and the Services inform Service members about these types of benefits, so that they can take advantage of them for their committed same-sex partners and children, should they desire to do so.

The third category of benefits is more complicated, and our recommendation is consequently more complicated. In this category are benefits that are not statutorily prohibited, because Congress has not explicitly limited the benefit in a manner that precludes same-sex partners, but that current regulations do not extend to same-sex partners. For these, the Department of Defense and the Services have the regulatory flexibility to define the eligible beneficiaries in way that includes same-sex partners.

An example of a benefit in this category is the provision of free legal services by a military legal assistance office. At present, those legal services may be extended to "dependents," and in this context Congress has left it to Service secretaries to determine who is a "dependent."³⁸⁰

Military family housing is another prominent benefit in this category. The Services, through regulation, make military family housing available to Service members who also qualify for the Basic Allowance for Housing at the "with-dependent" rate. Linking military family housing to the legal criteria for the "with-dependent" Basic Allowance for Housing is not legally required, but it has been long-standing regulatory practice.³⁸¹

For benefits such as these, the Department of Defense *could* legally direct the Services to revise their regulations to extend coverage to Service members' same-sex partners. This could be accomplished in two ways: leave to the Service member the freedom to designate his or her "dependents," "family members," or similar term; or, revise these definitions to specifically mention a committed, same-sex relationship, and require some type of proof of that committed relationship. The latter is similar to the approach now being taken in Federal agencies for civilian employees.³⁸²

380 10 U.S.C. § 1044(e).

381 Department of Defense, DoD Manual 4165.63-M, *DoD Housing Management*, October 28, 2010.

382 In June 2010, the President issued a memorandum, followed by implementing guidance from the Office of Personnel Management, directing Federal civilian agencies to create a new status of "domestic partner" applicable to same-sex relationships of Federal civilian employees, and to extend to domestic partners those benefits that can be extended under existing law. The criteria for what constitutes a "domestic partnership" for Federal benefits purposes, and how a partnership is established or dissolved, are set forth by OPM and include that the two individuals are at least 18 years of age, maintain a common residence (or would but for an assignment abroad or other relevant obstacle), and share responsibility for a significant measure of each other's financial obligations. Federal agencies can, if they choose to do so, require employees to provide documentation, such as a sworn affidavit, attesting that their relationship meets these criteria. (Executive Office of the President, *Presidential Memorandum - Extension of Benefits to Same-Sex Domestic Partners of Federal Employees*, June 2, 2010.)

Our recommendation is that the Department of Defense and the Services review benefits in this category and assess whether they can be extended to same-sex partners in accordance with the former approach—that is, to refashion the benefit to become a “member-designated” one. Where it is legally permissible to do so under current statutory definitions, and where justified by policy, fiscal, and feasibility considerations, DoD should redefine the eligibility criteria for benefits in this category to allow Service members—gay or straight—to designate a beneficiary of their choosing, which could be a same-sex partner.

There is an element of fairness and equality to this approach, and it provides Service members with greater discretion to decide who in their life has access to benefits and support services. Both homosexual and heterosexual Service members could avail themselves of this type of expanded member-designated eligibility, and the Department of Defense would be enhancing the vital role of a Service member’s “supporters”—people in a Service member’s life who may not be his or her spouse, but may be a long-time partner, boyfriend, girlfriend, parent, or friend. Obviously, this approach requires some limit on the number of people the member could designate, and it should be constrained by other policy, fiscal, and practical considerations.

Access to legal services is a benefit that may be suitable for this member-designated approach, provided there is some type of limit to the number of people the member may designate. Other benefits and support services that may be suitable are, for example, programs and services provided by the Department of Defense family centers, which include mobility and deployment assistance, relocation assistance, and crisis assistance. Expanding the eligibility for these benefits and programs could be achieved by modifying the definition of “family member” in DoD policy and regulations to permit Service member designation.

We do not, however, recommend that military family housing be included in the benefits eligible for this member-designated approach. Permitting a Service member to qualify for military family housing, simply by designating whomever he chooses as a “dependent,” is problematic. Military family housing is a limited resource and complicated to administer, and such a system would create occasions for abuse and unfairness.³⁸³

Also, we do not, at this time, recommend that the Department of Defense and the Services revise their regulations to specifically add same-sex committed relationships to the definition of “dependent,” “family member,” or other similar term, for purposes of extending benefits eligibility. We realize this is different from the direction the Federal government is taking for civilian employees to address the disparity in benefits available to married opposite-sex relationships and committed same-sex relationships. However, we believe that, in the short-term, immediately following a repeal of Don’t Ask, Don’t Tell, our recommended approach is justified in the military context, for several reasons.

383 Current Service policies state that non-dependents are not allowed to reside in military family housing. We do not recommend any changes to those policies, other than to state that any exception to policy to allow a non-dependent to reside in military family housing be administered without regard to sexual orientation.

First, as stated before, we believe that to create an environment in which gay and lesbian Service members can win quick and easy acceptance within the military community, repeal must be explained as an effort to achieve equal treatment for all. If, simultaneous with repeal, the Department of Defense creates a new category of unmarried dependent or family member reserved only for same-sex relationships, the Department of Defense itself would be creating a new inequity—between unmarried, committed same-sex couples and unmarried, committed opposite-sex couples. This new inequity, or the perception of it, would run counter to the military ethic of fair and equal treatment.

In addition, benefits play a much larger role in day-to-day military life, than in Federal civilian agencies. For the military, “benefits” cover many aspects of day-to-day life, including on-base housing, housing allowances, family support programs, and commissary and base exchange shopping privileges, and provide other valuable forms of assistance, like family separations allowances, space-available travel, and relocation assistance. We know from our numerous engagements of the force that resentment at perceived inequities runs deep in military families.

Finally, there is the complexity of the administration of a new system in which the personnel or another office on a military base would have to determine whether a same-sex couple qualifies as a “committed” relationship. Other Federal agencies are managing this by establishing a domestic partner status for same-sex partners, through an affidavit or other evidence of the relationship.³⁸⁴ Within the military community, where benefits are much more prominent and visible than in civilian life, administering such a system distracts from the military’s core mission and runs counter to the Secretary of Defense’s basic direction that implementation of a repeal of Don’t Ask, Don’t Tell be done in a way that minimizes disruption to the force.

For these reasons, we recommend, for the time being, that the Department of Defense and the Services not revise their regulations to specifically add same-sex committed relationships to the definition of “dependent,” “family member,” or other similar term, for purposes of benefits eligibility.

However, we also recommend that the Department of Defense revisit this issue after repeal, as part of the post-repeal follow-on review we recommend below. This will permit the Department of Defense to revisit and reassess the issue as implementation of repeal is underway. It is also in recognition that the national debate on same-sex marriage and partner benefits is ongoing, and that the judicial and legislative landscape is in a state of flux. During the post-repeal assessment, the Department of Defense may then reconsider creating a “qualifying relationship” status for same-sex relationships, or for both committed same-sex and committed unmarried opposite-sex relationships, if the implementation of repeal to that point indicates that the extension of benefits in this manner is feasible and desirable.³⁸⁵

384 Executive Office of the President, *Presidential Memorandum - Extension of Benefits to Same-Sex Domestic Partners of Federal Employees*, June 2, 2010.

385 A number of benefits and support programs for current and former Service members and their families are administered through the Department of Veterans’ Affairs. As such, we recommend that DoD work with the Department of Veterans Affairs on this and future action pertaining to same-sex partner benefits.

Duty Assignments

The Working Group considered the extent to which U.S. and foreign laws and policies and international agreements may impact duty assignments for gay and lesbian personnel, and, in particular, Service members with committed same-sex partners.

First, the Working Group considered overseas assignments of Service members to countries that criminalize homosexual conduct, or homosexuality in general. Gay and lesbian Service members assigned to serve in such countries may be subjected to greater legal risk than their heterosexual counterparts. To address this, we recommend that the Services ensure that information on host-country laws and related military policies regarding homosexuality and homosexual conduct are included in their standard briefings to all Service members being deployed overseas. We do not recommend imposing restrictions on overseas assignments of gay and lesbian personnel.

Second, the Working Group considered issues related to duty assignments for Service members with committed same-sex partners. With regard to overseas assignments, current law limits the ability of the Department of Defense to fund and support accompanying travel for the Service member's partner, based on the eligibility definitions for "dependents" in 37 U.S.C. § 403.³⁸⁶ Furthermore, even if a same-sex partner wishes to accompany a Service member to an overseas assignment at his or her own expense, in many instances the partner would not be eligible for the special host-nation legal protections that a "command sponsored" individual may receive. The United States has negotiated Status of Forces Agreements with various countries, which, among other things, set forth legal protections under the host country's law for civilians who accompany a Service member to that country. In many instances, the terms of the agreements—which vary by country—have been written in such a way that they would not cover same-sex partners among those who receive those protections.

The Department of Defense and the Services also have policies that allow for "dual-career military married couples" to apply to be assigned to the same geographic area.³⁸⁷ DoD instructions define these "Joint Spouse Assignments" as "[a]ssignments made expressly for allowing military members to establish a joint household with their spouses who are also military members."³⁸⁸ Because the term "spouse" here can only refer to opposite-sex married couples under the Defense of Marriage Act, if the Department of Defense and the Services were to extend the co-located assignment policy to Service members in a committed same-sex relationship with another Service member, it would need to rewrite the relevant regulations to refer to same-sex partners (or some other term), instead of only "spouses." Without such a revision, two Service members in a committed same-sex relationship would

386 37 U.S.C. § 403; Department of Defense, DoDI 1315.18, *Procedures for Military Personnel Assignments*, January 12, 2005, 44.

387 DoDI 1315.18, 7, para. 6.2.3.2.

388 DoDI 1315.18, 22, para. E.2.1.29.

not be able to apply for a co-located assignment and would be more likely to be assigned to different geographic locations than an opposite-sex married military couple would be.

As it relates to the treatment of Service members with committed same-sex partners, the topic of duty assignments—both for overseas assignments and for co-location of dual military couples—presents many of the same issues discussed in the previous section on benefits. As such, our recommendation and the reasons for it are similar. In short, we recommend that the Department of Defense and the Services not, at this time, rewrite their regulations to specifically accommodate same-sex committed relationships for purposes of duty assignments. However, gay and lesbian Service members in committed relationships—with either a civilian or a military partner—should be able to make an individualized, hardship-based request for accommodation in assignment. Additionally, to account for the differences in the treatment of same-sex partnerships and family relationships in various U.S. jurisdictions and foreign countries, the Services should make available voluntary counseling to gay and lesbian Service members on these issues.

Medical

During our engagement of the force, we heard from a number of Service members concerns about the prevalence of HIV in the military, the safety of the blood supply, and other medical issues. Thus, we considered whether the Department of Defense should issue any additional or modified medical guidance or policies in these areas.

The 1993 Summary Report of the Military Working Group cited medical concerns as one of the reasons against lifting the ban on homosexual conduct in the military. Specifically, the report stated that “due to their sexual practices, active male homosexuals in the military could be expected to bring an increased incidence of sexually transmitted diseases,”³⁸⁹ of which HIV was the primary concern.

An assessment of the impact of repeal on individual medical readiness is addressed in section XI of this report. In short, in the event of repeal, there will be no change in the safety of the blood supply and no significant change in overall HIV prevalence. There is a possibility that repeal of Don’t Ask, Don’t Tell could lead to an increase in the number of Service members who fall into the category of “men who have sex with men,” and this is the group at highest risk for HIV infection in the civilian population. However, our view is that such an increase is likely to be minimal and is not expected to impact military readiness or effectiveness.

The Surgeons General of each of the military departments have drafted and signed a joint letter to the Working Group stating that:

389 Department of Defense, *Summary Report of the Military Working Group*, July 1, 1993, 6-7.

“The repeal of 10 U.S.C. § 654 will not affect the medical readiness of the Armed Forces. Further, repeal of Don’t Ask, Don’t Tell will not require a change to any medical policies. The Department of Defense has policies and procedures to protect the health of the force to include the prevention of diseases such as human immunodeficiency virus (HIV) transmission.”³⁹⁰

We concur with the Surgeons General and recommend no new policies or modifications to existing medical policies. We do recommend minor changes to existing education and training programs to address misinformation and misperceptions about HIV and the safety of the blood supply.

Re-Accession

Under current law and policy, Service members who have been involuntarily discharged under Don’t Ask, Don’t Tell are not eligible for reenlistment or reappointment.³⁹¹ Each Service maintains procedures for reenlistment or reappointment. Generally, the fact that a Service member was separated on the basis of homosexual conduct is indicated by separation and re-entry codes provided on the Service member’s record of discharge (DD Form 214).

In the event of repeal, we recommend that the Department of Defense issue guidance to the Services permitting Service members previously separated on the basis of homosexual conduct to be considered for re-entry, assuming they qualify in all other respects. Requests for re-entry by those previously separated on the basis of homosexual conduct should be evaluated according to the same criteria as other former Service members seeking re-entry, and the fact that the basis of the separation was homosexual conduct should not be considered to the detriment of the applicant. For example, those whose DD Form 214 show an honorable discharge (or an uncharacterized discharge for those separated during initial training) and a separation code reflecting homosexual conduct shall be considered for re-entry. The Services should not establish any special procedures or preferential treatment for those Service members. The needs of the Service will continue to determine re-entry criteria.

We also considered whether the Department of Defense or the Services should adopt a policy to provide monetary compensation and/or other non-monetary redress to Service members previously separated under Don’t Ask, Don’t Tell. We recommend no change in policy. In general, the Department of Defense does not provide retroactive monetary compensation unless specifically authorized by legislation; nor does the Department of Defense provide non-monetary redress such as promotion in grade following then-validly executed separation actions.

390 Surgeons General of the Military Departments, Memorandum to the CRWG Co-Chairs, “Medical Impact of the Repeal of 10 U.S.C. § 654 (Don’t Ask, Don’t Tell Policy).”

391 10 U.S.C. § 654(c)(1).

This recommendation would not preclude a Service member previously separated under Don't Ask, Don't Tell or for any other reason from petitioning for redress through the Service Boards for the Correction of Military Records or Service Discharge Review Boards under the procedures and standards set forth by statute.³⁹² The types of redress available at these boards can be either monetary (e.g., retroactive payments for periods of broken service, retroactive payment of full separation pay) or non-monetary (e.g., change in categorization of discharge, credit for periods of broken service).

Release from Service Commitments

Some Service members told us they would seek to be released from their service commitments if Don't Ask, Don't Tell were repealed, based on their opposition to gay men and lesbians in the military or to homosexuality in general. We recommend against a policy allowing release from service commitments and voluntary discharge of Service members based on opposition to living or serving with gay or lesbian Service members after a repeal of Don't Ask, Don't Tell. The U.S. military is an all-volunteer force, but once Service members join the Military Services, they are not guaranteed a certain legal or policy landscape for the duration of their commitment.³⁹³ At present, Service members serve alongside others of different backgrounds, beliefs, races, and religions, reflective of American society as a whole. This already includes gay men and lesbians, and most Service members recognize that. It would be inappropriate, unworkable, and unfair to others to adopt a policy that permits release based on an assertion of incompatibility with or intolerance for gay men and lesbians. Under existing regulations, Service members may request to be voluntarily discharged under a military department secretary's plenary authority. The military department Secretary has the discretion whether to grant such requests, and only after determining the early separation to be in the best interest of the Service. Such discretionary discharges should only be permitted when they meet the standard of being in the best interest of the Service.

Fiscal Impact

The Working Group undertook a rough order of magnitude net annual cost estimate for repeal of Don't Ask, Don't Tell that factored in the implementation of our recommendations. This estimate includes costs related to the expansion of benefits eligibility, minor privacy accommodations (e.g., shower curtains), and execution and administration of education and training programs for the force. It also considers savings if there is no longer a need to recruit and train replacements for some number of Service members separated under Don't Ask, Don't Tell each year.

The estimated cost depends to a significant degree on which benefits and support resources are refashioned to have a "member-designated" eligibility, consistent with our

392 10 U.S.C. § 1552; 10 U.S.C. § 1553.

393 Service members sign a DD Form 4/1 upon entry acknowledging that laws and regulations governing military personnel may change without notice.

recommendation above. The decision of which benefits to extend would be made at later time by the Department of Defense and the Services, and a more complete cost estimate is not possible until such decisions are made. To obtain a preliminary cost estimate, the Working Group assumed a set of readiness-enhancing support resources that would be extended in this fashion. Based on this assumption, the Working Group estimated the annual cost of changing these benefits to a member-designated system for all Service members, regardless of sexual orientation, to be \$40-\$50 million. These benefits costs constituted approximately 80% of the total estimated annual cost of \$50-\$60 million. The Working Group estimated approximately \$20 million in cost savings, for a total net annual cost estimate of \$30-\$40 million.

We also recognize that, should future decisions provide the partners of gay and lesbian Service members with benefits more consistent with those received by spouses of married Service members, personnel costs would rise. They would also rise if recruitment and retention issues become evident; however, at this time, the Working Group expects recruiting and retention expenses related to repeal to be negligible. Because of the uncertain nature of these future decisions and certain external conditions, this area will require further analysis by the Services in the event of repeal and should be included in the follow-on review recommended below.

Follow-On Review

Finally, we recommend that one year after any repeal of Don't Ask, Don't Tell takes effect, the Department of Defense conduct a follow-on review to monitor and assess effectiveness of implementation of repeal and to determine the adequacy of the recommended actions that are adopted.

A

MEMORANDUM AND TERMS OF REFERENCE

SECRETARY OF DEFENSE
1000 DEFENSE PENTAGON
WASHINGTON, DC 20301-1000

MAR 2 2010

MEMORANDUM FOR THE GENERAL COUNSEL
COMMANDER, US ARMY EUROPE

SUBJECT: Comprehensive Review on the Implementation of a Repeal of 10 U.S.C. § 654

The President has requested that the Congress repeal 10 U.S.C. § 654, "Policy Concerning Homosexuality in the Armed Forces," and directed the Department to consider how best to implement a repeal of this law.

The Chairman of the Joint Chiefs of Staff and I owe the President an assessment of the implications of such a repeal, should it occur. We also must develop an implementation plan for any new statutory mandate. To be successful, we must understand all issues and potential impacts associated with repeal of the law and how to manage implementation in a way that minimizes disruption to a force engaged in combat operations and other demanding military activities around the globe. Should Congress take this action, strong, engaged and informed leadership will be required at every level to properly and effectively implement a legislative change.

Accordingly, you are to stand up an intra-Department, inter-Service working group to conduct a comprehensive review of the issues associated with a repeal of the law. An integral element of this review shall be to assess and consider the impacts, if any, a change in the law would have on military readiness, military effectiveness and unit cohesion, and how to best manage such impacts during implementation.

To effectively accomplish this assessment, I believe it essential that the working group systematically engage the force. The participation of a range of age, rank and warfare communities in this study including families, in addition to active outreach across the force is a critical aspect that will undoubtedly lead to insights and recommendations essential to the Department's implementation of any change.

It is critical that this effort be carried out in a professional, thorough and dispassionate manner. Given the political dimension of this issue, it is equally critical that in carrying out this review, every effort be made to shield our men and women in uniform and their families from those aspects of this debate.

OSD 02309-10

Your terms of reference are attached. By copy of this memorandum, all DoD Components will fully cooperate in the execution of this Review and be responsive to all requests for information, detail personnel, or other support. The working group shall submit its report to me by December 1, 2010.

A handwritten signature in black ink, appearing to read "Robert M. Gates". The signature is fluid and cursive, with a large initial "R" and "M".

TERMS OF REFERENCE

Comprehensive Review on the Implementation of a Repeal of 10 U.S.C. § 654

These Terms of Reference (TOR) establish the objectives of the Secretary of Defense-directed Comprehensive Review for the Repeal of 10 U.S.C. § 654, "Policy Concerning Homosexuality in the Armed Forces." The Review will examine the issues associated with repeal of the law should it occur and will include an implementation plan that addresses the impacts, if any, on the Department.

Objectives and Scope:

The Review will identify the impacts to the force of a repeal of 10 U.S.C § 654 in the areas reflected below:

1. Determine any impacts to military readiness, military effectiveness and unit cohesion, recruiting/retention, and family readiness that may result from repeal of the law and recommend any actions that should be taken in light of such impacts.
2. Determine leadership, guidance, and training on standards of conduct and new policies.
3. Determine appropriate changes to existing policies and regulations, including but not limited to issues regarding personnel management, leadership and training, facilities, investigations, and benefits.
4. Recommend appropriate changes (if any) to the Uniform Code of Military Justice.
5. Monitor and evaluate existing legislative proposals to repeal 10 U.S.C § 654 and proposals that may be introduced in the Congress during the period of the review.
6. Assure appropriate ways to monitor the workforce climate and military effectiveness that support successful follow-through on implementation.
7. Evaluate the issues raised in ongoing litigation involving 10 U.S.C § 654.

Methodology:

1. Review all DoD directives, instructions and other issuances potentially impacted by a repeal. Identify where new directives and instructions may be needed.
2. Ensure participation in the working group by: military service leadership; appropriate OSD staff elements; cross service officer and enlisted communities; mid-grade and senior ranks; human resources/personnel specialists; pay and benefits specialists; family support programs specialists; accession point and training communities; service

academies and/or senior service schools; and medical, legal and religious support personnel.

3. In an appropriately balanced manner, engage Members of Congress, key influencers of potential service members and other stakeholder groups that have expressed a view on the current and perspective policy.
4. Research/study methods shall include systematic engagement of all levels of the force and their families, analysis of current data and information, and review the experiences of foreign militaries.
5. Engage the RAND Corporation to update the National Defense Research Institute report on "Sexual Orientation and U.S. Military Personnel Policy: Options and Assessment" (1993).

Deliverables:

- A Report addressing the areas above will be delivered to the Secretary of Defense not later than December 1, 2010. Prior to the delivery of the report to the Secretary of Defense, each Service Chief shall be afforded the opportunity to review and comment.
- The Review will provide a plan of action to support the implementation of a repeal of the law. The Review shall identify areas for further study.

Support:

- The Under Secretary of Defense (Comptroller)/Chief Financial Officer will provide adequate funding for the Review.
- The DA&M, through Washington Headquarters Services, will coordinate for and provide human resources, office/facilities, and other support to ensure success of this effort.
- The Military Departments and other DOD Components will provide full support to the Review with detail personnel, information (including but not limited to documents and interviews of personnel), analytical capacity as determined necessary and any other support as requested.

Background Information	1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 34, 35, 36, 37, 38, 46, 54, 62, 63, 97, 98, 99, 100, 101, 102

All respondents were asked the following question, but given Service specific options for the answer:

Question 1. Which one of the following best describes your current military occupational specialties?

Army	N	Army
Combat Arms (CA/MFE)	7,411	25.8%
Combat Support (CS/OS)	8,783	31.4%
Combat Service Support (CSS/FS, IS)	6,510	17.9%
Medical, JAG, Chaplains, Acquisition	4,201	11.7%
Other	3,420	13.2%
Marine Corps	N	Marine Corps
Combat Arms (CA)	5,391	28.3%
Combat Support (CS)	5,478	35.6%
Combat Service Support (CSS)	5,624	36.1%
Navy	N	Navy
Surface	6,849	35.8%
Aviation	5,378	26.7%
Submarine	1,029	5.2%
Medical	2,613	12.9%
Other	5,583	19.4%
Air Force	N	Air Force
Operations	13,702	31.2%
Logistics	4,982	13.8%
Support	11,441	31.1%
Medical	3,832	8.8%
Other	5,007	15.1%
Coast Guard	N	Coast Guard
Afloat	1,430	21.4%
Ashore	4,927	64.7%
Aviation	676	9.1%
Medical	146	1.9%
Other	223	2.8%

The following questions were asked of all respondents:

Question 2. About how many people serve in your immediate unit?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
1-10	30,233	27.1%	26.4%	26.3%	27.8%	28.6%	26.3%
11-20	38,064	33.3%	31.0%	36.0%	37.9%	33.6%	32.0%
21-30	12,826	10.9%	9.6%	12.3%	13.0%	11.2%	13.8%
31-40	7,191	6.2%	6.2%	6.5%	6.0%	6.2%	6.7%
41-50	7,270	6.2%	6.5%	6.7%	5.0%	6.2%	6.8%
Larger than 50	17,311	16.2%	20.3%	12.2%	10.3%	14.2%	14.3%

Question 3. About how long have you worked in your immediate unit?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
0-3 months	12,114	10.7%	10.5%	13.7%	9.8%	9.9%	17.7%
4-6 months	10,729	11.5%	11.3%	15.1%	12.6%	10.0%	5.9%
7-12 months	20,400	19.0%	19.7%	19.3%	19.8%	16.8%	17.3%
13-18 months	16,574	14.9%	14.8%	15.0%	17.2%	12.9%	18.6%
19-24 months	12,632	11.0%	11.3%	10.7%	12.3%	9.9%	10.0%
More than 2 years	42,313	32.8%	32.4%	26.2%	28.3%	40.6%	30.4%

Question 4. Does your immediate unit include both men and women?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	97,661	80.0%	77.3%	62.7%	85.9%	89.4%	84.5%
No	16,996	20.0%	22.7%	37.3%	14.1%	10.6%	15.5%

Question 5. Does your immediate unit include individuals of different races or ethnicities?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	109,405	96.4%	96.6%	97.8%	97.4%	94.9%	94.0%
No	5,033	3.6%	3.4%	2.2%	2.6%	5.1%	6.0%

Question 6. Have you ever been deployed for 30 days or more?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, and I am currently deployed	10,114	10.9%	14.2%	6.7%	12.1%	4.9%	11.6%
Yes, but I am not currently deployed	75,383	58.9%	56.7%	59.8%	62.9%	60.2%	56.1%
No	29,292	30.2%	29.1%	33.4%	25.0%	34.9%	32.3%

The following question was only asked to respondents who said they were currently deployed or previously had been deployed:

Question 7. Since September 11, 2001, have you been deployed to a combat zone or an area where you received imminent danger pay or hostile fire pay?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	66,053	83.2%	89.6%	87.4%	74.0%	79.8%	24.4%
No	19,390	16.8%	10.4%	12.6%	26.0%	20.2%	75.6%

The following questions were only asked to respondents who said they were not currently deployed but had been deployed since September 11:

Question 8a. Thinking back to the unit with which you most recently deployed, how effective was that unit in completing its mission... In a field environment or out to sea?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very effective	34,176	56.3%	52.6%	61.3%	60.8%	58.8%	55.1%
Effective	18,847	34.1%	37.5%	31.8%	32.5%	28.6%	35.7%
Equally as effective as ineffective	2,217	5.0%	6.3%	4.1%	4.4%	2.8%	6.5%
Ineffective	341	0.8%	1.0%	0.5%	0.5%	0.4%	1.1%
Very ineffective	349	0.7%	0.8%	0.6%	0.8%	0.5%	0.6%
Does not apply	2,120	3.2%	1.8%	1.7%	1.0%	9.0%	1.1%

Question 8b. Thinking back to the unit with which you most recently deployed, how effective was that unit in completing its mission... When a crisis or negative event happened that affected your unit?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very effective	27,376	44.8%	41.2%	51.1%	46.7%	48.3%	40.4%
Effective	22,534	38.8%	40.9%	36.2%	37.9%	35.8%	42.7%
Equally as effective as ineffective	4,264	9.3%	11.6%	6.9%	8.5%	5.8%	10.3%
Ineffective	954	2.1%	2.8%	1.7%	1.7%	1.1%	1.2%
Very ineffective	564	1.3%	1.7%	0.7%	1.1%	0.8%	1.2%
Does not apply	2,271	3.7%	1.8%	3.4%	4.1%	8.1%	4.1%

Question 8c. Thinking back to the unit with which you most recently deployed, how effective was that unit in completing its mission... In an intense combat situation?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very effective	21,702	38.7%	40.9%	46.1%	33.3%	34.2%	19.2%
Effective	14,521	27.2%	31.7%	25.5%	23.0%	21.0%	16.9%
Equally as effective as ineffective	2,673	6.1%	8.0%	4.8%	5.4%	3.0%	6.3%
Ineffective	404	1.0%	1.4%	0.5%	0.7%	0.4%	0.9%
Very ineffective	314	0.7%	0.9%	0.4%	0.7%	0.4%	1.1%
Does not apply	18,291	26.4%	17.1%	22.7%	36.9%	41.0%	55.6%

The following question was asked of all respondents:

Question 9. What is your current marital status?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Now married	75,444	55.9%	56.3%	48.5%	55.4%	59.1%	55.5%
Legally separated or filing for divorce	2,909	2.9%	2.9%	3.3%	3.6%	2.1%	2.4%
Divorced	9,392	7.7%	8.3%	4.4%	7.0%	8.5%	6.3%
Widowed	275	0.2%	0.2%	0.0%	0.2%	0.2%	0.1%
Never married	26,802	33.3%	32.3%	43.9%	33.7%	30.1%	35.7%

The following question was only asked to respondents that said they were divorced, widowed or never married:

Question 10. Are you currently in a committed relationship?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	16,501	43.8%	44.8%	42.9%	44.3%	41.4%	45.5%
No	19,834	56.2%	55.2%	57.1%	55.7%	58.6%	54.5%

The following questions were asked of all respondents:

Question 11. During the last 24 months, where have you lived the most?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
In a temporary facility while on deployment (e.g., tent, trailer)	5,852	7.2%	12.2%	5.7%	2.0%	1.7%	0.5%
Onboard a ship or submarine	1,444	1.5%	0.1%	0.7%	7.3%	0.0%	5.4%
Barracks or dormitory at a military facility	8,781	15.4%	13.7%	33.7%	14.6%	12.1%	5.9%
Military family housing	10,632	10.3%	8.9%	11.6%	11.1%	12.0%	9.3%
Rented or owned civilian housing	85,137	62.7%	61.6%	45.3%	62.8%	71.9%	76.4%
Other	3,026	2.9%	3.5%	3.0%	2.2%	2.2%	2.5%

Question 12. How many of the NCOs/Pos in your immediate unit are good leaders?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
All	15,237	14.1%	14.6%	14.5%	11.7%	14.9%	11.8%
Most	53,888	43.0%	44.6%	43.3%	37.7%	42.9%	45.9%
Some	25,259	23.0%	22.5%	22.9%	24.6%	22.8%	24.2%
A few	14,155	16.1%	15.3%	15.9%	20.6%	14.8%	13.9%
None	1,263	1.4%	1.4%	1.3%	1.7%	1.3%	1.2%
Do not have any NCOs/POs in my immediate unit	4,951	2.3%	1.5%	2.0%	3.6%	3.3%	2.9%

Question 13. How many of the officers over your immediate unit are good leaders?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
All	22,940	20.1%	18.9%	25.1%	19.6%	21.0%	18.8%
Most	50,457	38.6%	39.3%	37.4%	36.9%	39.1%	37.5%
Some	20,656	18.8%	19.8%	16.8%	19.3%	17.1%	17.5%
A few	12,699	14.0%	14.9%	12.2%	15.3%	12.1%	10.7%
None	2,424	3.0%	3.1%	2.8%	3.3%	2.6%	2.1%
Do not have any officers over my immediate unit	5,511	5.5%	3.9%	5.9%	5.5%	8.1%	13.4%

The following questions were asked of all respondents and used to measure unit cohesion:

Question 14a. Service members in my immediate unit work together to get the job done

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	49,096	38.8%	37.2%	39.4%	37.5%	43.0%	39.1%
Agree	56,065	49.6%	49.8%	49.7%	50.5%	48.2%	52.5%
Neither agree nor disagree	6,502	7.5%	8.3%	7.6%	7.4%	6.0%	6.5%
Disagree	2,620	3.3%	3.8%	2.6%	3.8%	2.4%	1.7%
Strongly disagree	525	0.7%	0.9%	0.6%	0.8%	0.5%	0.3%

Question 14b. Service members in my immediate unit pull together to perform as a team

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	46,604	36.7%	35.7%	36.7%	35.3%	40.1%	37.3%
Agree	54,747	47.7%	47.7%	47.4%	48.4%	46.9%	51.7%
Neither agree nor disagree	9,288	10.4%	10.9%	11.3%	10.6%	9.1%	8.4%
Disagree	3,405	4.2%	4.6%	3.8%	4.6%	3.3%	2.2%
Strongly disagree	692	1.0%	1.1%	0.9%	1.1%	0.6%	0.3%

Question 14c. Service members in my immediate unit trust each other							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	34,036	26.0%	25.6%	27.4%	23.9%	28.1%	25.3%
Agree	52,829	43.0%	42.4%	43.2%	42.8%	43.6%	49.4%
Neither agree nor disagree	19,314	20.5%	21.1%	20.3%	21.3%	19.0%	18.8%
Disagree	6,597	7.9%	8.1%	7.1%	8.8%	7.2%	5.3%
Strongly disagree	1,923	2.6%	2.8%	2.0%	3.1%	2.2%	1.3%

Question 14d. Service members in my immediate unit really care about each other							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	31,731	24.4%	24.6%	24.4%	21.4%	26.7%	22.5%
Agree	50,948	41.0%	40.4%	41.7%	39.9%	42.2%	46.1%
Neither agree nor disagree	23,526	24.2%	24.6%	24.1%	26.2%	22.1%	24.0%
Disagree	6,256	7.3%	7.3%	7.0%	8.6%	6.6%	5.7%
Strongly disagree	2,174	3.1%	3.2%	2.8%	3.9%	2.4%	1.7%

Question 15a. Service members in my immediate unit can get help from their leaders on personal problems							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	40,013	32.2%	30.3%	38.7%	31.9%	33.6%	29.3%
Agree	54,434	46.9%	46.5%	46.1%	47.9%	46.8%	53.2%
Neither agree nor disagree	13,577	13.7%	15.0%	10.5%	13.0%	13.1%	12.8%
Disagree	4,712	5.2%	5.9%	3.4%	5.1%	4.9%	3.4%
Strongly disagree	1,565	2.0%	2.3%	1.4%	2.2%	1.5%	1.2%

Question 15b. Leaders in my immediate unit trust their unit members

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	30,501	23.6%	22.4%	25.5%	22.8%	25.8%	21.9%
Agree	57,204	47.3%	46.6%	49.1%	46.9%	47.7%	53.6%
Neither agree nor disagree	18,782	20.1%	21.2%	18.2%	20.7%	18.3%	18.2%
Disagree	6,203	7.1%	7.7%	5.6%	7.5%	6.7%	5.0%
Strongly disagree	1,546	1.9%	2.1%	1.6%	2.1%	1.6%	1.3%

Question 15c. Leaders in my immediate unit have the skills and abilities to lead unit members into combat

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	29,500	24.6%	25.7%	29.5%	20.4%	24.0%	14.3%
Agree	47,621	40.5%	41.8%	42.2%	37.1%	40.3%	33.5%
Neither agree nor disagree	25,514	23.1%	20.9%	19.7%	28.3%	24.1%	35.7%
Disagree	7,806	7.7%	7.6%	5.7%	8.8%	7.9%	10.2%
Strongly disagree	3,739	4.1%	4.0%	3.0%	5.5%	3.8%	6.3%

Question 15d. Leaders in my immediate unit care about their Service members

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Strongly agree	39,768	30.5%	29.8%	33.1%	28.5%	32.5%	27.5%
Agree	53,353	45.6%	44.9%	45.9%	46.0%	45.9%	52.9%
Neither agree nor disagree	14,705	16.3%	17.0%	15.1%	17.2%	15.0%	15.0%
Disagree	4,423	5.2%	5.6%	3.7%	5.5%	4.7%	3.3%
Strongly disagree	1,868	2.5%	2.8%	2.2%	2.8%	1.8%	1.3%

The following questions were only asked to respondents that said they were not currently deployed:

Question 16a. How effective is your immediate unit in completing its mission... On a day-to-day basis?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very effective	20,809	41.0%	36.6%	43.9%	39.4%	47.8%	43.0%
Effective	22,957	47.0%	47.9%	46.1%	49.1%	44.2%	49.2%
Equally as effective as ineffective	4,018	10.1%	12.7%	8.8%	10.2%	6.9%	6.8%
Ineffective	566	1.5%	2.3%	0.9%	1.0%	0.8%	0.8%
Very ineffective	138	0.4%	0.6%	0.2%	0.3%	0.2%	0.2%

Question 16b. How effective is your immediate unit in completing its mission... When a crisis or negative event happens that affects your immediate unit?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very effective	18,650	35.6%	32.1%	34.8%	34.5%	42.0%	39.3%
Effective	22,352	45.3%	45.1%	46.2%	46.5%	44.0%	47.7%
Equally as effective as ineffective	6,113	15.5%	18.5%	15.1%	15.7%	11.4%	10.9%
Ineffective	1,020	2.8%	3.5%	2.9%	2.3%	2.0%	1.7%
Very ineffective	285	0.8%	0.9%	1.1%	1.0%	0.6%	0.4%

The following questions were only asked to respondents that said they were currently deployed:

Question 17a. How effective is your immediate unit in completing its mission... In a field environment or out to sea?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very effective	3,288	40.2%	39.9%	49.4%	38.5%	39.4%	48.3%
Effective	3,505	43.4%	42.8%	41.6%	45.8%	45.4%	39.8%
Equally as effective as ineffective	917	13.5%	14.0%	8.5%	13.5%	12.9%	11.5%

Equally as effective as ineffective	1,827	24.5%	23.5%	16.1%	29.4%	26.8%	41.1%
Ineffective	255	3.8%	4.3%	1.4%	3.4%	2.3%	5.0%
Very ineffective	144	2.2%	2.4%	1.3%	2.2%	1.5%	2.0%

The following questions were asked of all respondents and were used to measure unit readiness:

Question 18a. To perform its immediate mission-essential tasks, does your unit have enough... Trained personnel?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	81,409	70.5%	69.6%	77.3%	67.9%	71.0%	71.4%
No	29,196	24.8%	24.6%	18.9%	28.2%	25.6%	24.7%
Don't know	4,207	4.7%	5.8%	3.8%	3.9%	3.4%	4.0%

Question 18b. To perform its immediate mission-essential tasks, does your unit have enough... Experienced personnel?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	78,910	68.1%	69.1%	72.9%	65.0%	66.0%	70.1%
No	31,911	27.5%	25.8%	23.6%	31.1%	30.6%	25.9%
Don't know	3,953	4.3%	5.1%	3.4%	3.8%	3.3%	4.0%

Question 18c. To perform its immediate mission-essential tasks, does your unit have enough... Motivated personnel?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	85,769	68.8%	68.3%	70.3%	67.0%	69.8%	74.6%
No	22,860	24.8%	24.9%	23.3%	27.4%	23.8%	18.8%
Don't know	6,040	6.4%	6.8%	6.4%	5.6%	6.4%	6.7%

Question 19. To perform its immediate mission-essential tasks, does your unit have enough deployable personnel?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	58,670	50.8%	50.6%	54.4%	47.1%	52.3%	49.6%
No	22,304	19.0%	19.4%	14.6%	20.0%	19.2%	20.0%
Don't know	17,448	17.7%	20.1%	14.7%	13.8%	17.2%	16.0%
Does not apply	16,339	12.5%	9.9%	16.3%	19.1%	11.3%	14.4%

The following questions were asked of all respondents:

Question 20. For your immediate unit to work together well, how important is it for unit members to socialize together off-duty?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very important	10,592	10.8%	11.5%	14.5%	8.4%	9.4%	8.1%
Important	40,818	35.3%	35.5%	39.8%	32.6%	35.3%	32.7%
Neither important nor unimportant	47,517	40.5%	40.0%	35.4%	42.6%	42.0%	44.6%
Unimportant	13,012	10.8%	10.5%	8.2%	12.8%	10.9%	12.0%
Very unimportant	2,685	2.6%	2.5%	2.0%	3.5%	2.4%	2.6%

Question 21. How would you rate your immediate unit's morale?							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very high	9,687	8.0%	8.5%	7.9%	7.4%	7.5%	5.1%
High	46,275	35.5%	36.0%	38.1%	33.5%	34.8%	33.0%
Moderate	45,788	41.3%	40.6%	40.1%	41.7%	42.4%	46.4%
Low	9,704	11.0%	10.7%	10.3%	12.1%	11.3%	11.6%
Very low	3,210	4.2%	4.1%	3.6%	5.3%	4.0%	3.9%

Question 22. How would you rate your own morale?							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very high	21,139	17.7%	19.2%	18.0%	16.8%	15.9%	11.2%
High	48,951	38.8%	38.7%	39.1%	36.3%	40.4%	39.8%
Moderate	33,356	30.4%	29.1%	29.6%	31.5%	32.0%	37.7%
Low	7,831	8.5%	8.3%	8.3%	9.8%	8.0%	8.4%
Very low	3,449	4.6%	4.7%	5.0%	5.7%	3.6%	2.9%

Question 23. How well prepared is your immediate unit to perform its mission?							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very well prepared	26,169	20.9%	18.5%	23.4%	20.2%	25.4%	20.5%
Well prepared	59,039	48.8%	45.5%	50.9%	50.3%	53.2%	56.1%
Moderately prepared	25,648	25.5%	29.3%	22.6%	25.8%	19.0%	20.7%
Poorly prepared	3,254	4.1%	5.6%	2.7%	3.1%	2.1%	2.4%
Very poorly prepared	531	0.8%	1.1%	0.4%	0.5%	0.4%	0.4%

Question 24. How well prepared are you to perform your military job?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very well prepared	41,085	35.4%	34.6%	38.8%	34.8%	36.6%	28.5%
Well prepared	55,751	47.1%	46.3%	45.8%	47.7%	48.3%	54.3%
Moderately prepared	15,930	15.1%	15.8%	13.8%	15.7%	13.5%	15.9%
Poorly prepared	1,590	1.9%	2.5%	1.2%	1.4%	1.3%	1.2%
Very poorly prepared	404	0.6%	0.8%	0.3%	0.4%	0.3%	0.2%

Question 25. In the last 2 months, about how often has your immediate unit socialized together, off-duty?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Not at all in the last 2 months	34,191	30.5%	33.3%	21.2%	29.7%	30.0%	24.2%
Once	32,534	25.8%	25.4%	23.8%	26.4%	27.2%	26.8%
Two or three times	35,873	30.8%	28.9%	37.4%	31.2%	31.5%	33.0%
Four or more times	11,981	12.8%	12.4%	17.6%	12.8%	11.3%	16.0%

The following question was only asked of respondents that said they were “Now married”:

Question 26. How does your spouse feel about your military service?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very positive	25,405	29.9%	27.8%	30.9%	29.8%	33.7%	32.6%
Positive	25,334	30.9%	30.4%	27.7%	30.4%	33.4%	34.4%
An equal mix of positive and negative feelings	20,343	31.9%	33.3%	33.6%	32.8%	27.8%	28.3%
Negative	2,317	3.7%	4.3%	3.5%	3.7%	2.7%	2.7%
Very negative	1,378	2.7%	3.3%	3.1%	2.5%	1.7%	1.3%
Not sure	452	0.9%	0.9%	1.2%	0.7%	0.8%	0.7%

The following question was only asked of respondents that said they were in a committed relationship, but not currently married:

Question 27. How does your significant other feel about your military service?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very positive	4,509	23.8%	22.4%	21.6%	24.0%	28.5%	21.7%
Positive	5,015	27.3%	26.2%	26.3%	26.0%	31.4%	32.9%
An equal mix of positive and negative feelings	5,538	38.6%	40.7%	41.1%	38.0%	32.5%	36.9%
Negative	647	4.8%	4.9%	5.3%	6.1%	3.0%	4.0%
Very negative	364	3.2%	3.7%	3.2%	3.6%	1.5%	2.3%
Not sure	385	2.4%	2.1%	2.5%	2.4%	3.1%	2.1%

The following question was only asked of respondents that said they were “Now married”:

Question 28. How does the rest of your family feel about your military service?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very positive	28,331	34.4%	29.7%	38.0%	38.6%	38.9%	44.3%
Positive	29,525	37.3%	37.2%	35.4%	36.2%	38.9%	39.4%
An equal mix of positive and negative feelings	14,492	23.1%	26.9%	22.7%	20.4%	18.2%	13.4%
Negative	1,235	2.1%	2.8%	1.4%	1.8%	1.3%	0.9%
Very negative	480	1.1%	1.4%	0.8%	1.0%	0.6%	0.5%
Not sure	1,189	1.9%	1.9%	1.6%	2.0%	2.0%	1.5%

The following question was only asked of respondents that did *not* say they were “Now married”:

Question 29. How does your family feel about your military service?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very positive	17,576	42.4%	37.1%	42.1%	46.3%	50.1%	53.4%
Positive	12,484	29.7%	29.9%	29.2%	28.7%	30.1%	33.0%
An equal mix of positive and negative feelings	7,640	22.7%	26.9%	24.0%	19.7%	16.0%	10.8%
Negative	691	2.1%	2.6%	1.9%	2.0%	1.2%	0.6%
Very negative	344	1.1%	1.5%	0.9%	1.0%	0.7%	0.6%
Not sure	727	2.0%	2.0%	1.7%	2.2%	2.0%	1.6%

The following questions were asked of all respondents:

Question 30. Would you ever recommend to a family member or close friend that he or she pursue service in the military?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, and I have done so	85,602	69.5%	69.2%	61.9%	66.5%	75.2%	76.2%
Yes, but I have not done so to date	17,041	15.9%	15.7%	17.5%	17.9%	14.3%	15.7%
No	11,873	14.6%	15.1%	20.5%	15.6%	10.5%	8.1%

Question 31. Why did you join the military? Choose 2 that best apply.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Pay and allowances	16,435	15.6%	15.3%	11.2%	17.0%	16.7%	20.2%
Education benefits/GI Bill	41,074	41.2%	41.1%	30.1%	44.5%	44.5%	35.8%

Other	3,994	4.1%	4.4%	4.8%	4.1%	3.4%	2.2%

Question 34. Do you currently serve with a male or female Service member you believe to be homosexual?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	35,506	36.0%	37.6%	24.9%	46.0%	30.6%	29.9%
No	79,128	64.0%	62.4%	75.1%	54.0%	69.4%	70.1%

Question 35. In your career, have you ever worked in a unit with a leader you believed to be homosexual?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	43,089	38.5%	40.4%	30.8%	44.3%	33.4%	40.9%
No	71,506	61.5%	59.6%	69.2%	55.7%	66.6%	59.1%

Question 36. In your career, have you ever worked in a unit with a coworker you believed to be homosexual?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	78,749	69.3%	68.9%	58.2%	78.6%	67.9%	72.0%
No	35,840	30.7%	31.1%	41.8%	21.4%	32.1%	28.0%

Question 37. In your career, have you ever worked in a unit with a subordinate you believed to be homosexual?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	60,040	49.1%	51.0%	43.4%	62.8%	37.6%	46.8%
No	54,653	50.9%	49.0%	56.6%	37.2%	62.4%	53.2%

The following question was only asked to respondents who said they served with a leader they believed to be gay or lesbian:

Question 38. In the unit where you had a leader you believed to be gay or lesbian, about how many other unit members also believed the leader to be gay or lesbian?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
All or most	19,773	47.5%	47.9%	40.7%	50.8%	45.9%	48.1%
Some	11,062	24.8%	25.5%	26.0%	22.2%	25.2%	23.8%
A few	5,091	12.8%	12.9%	16.0%	12.5%	11.7%	12.6%
None	1,050	2.6%	2.5%	3.7%	2.8%	2.4%	2.2%
Don't know	6,031	12.2%	11.1%	13.5%	11.6%	14.8%	13.2%

The following questions were only asked to respondents who said they served with a leader they believed to be gay or lesbian and where all, most, some or a few other unit members believed the leader to be gay or lesbian:

Question 39a. How would you rate that unit's... Ability to work together?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very good	13,805	30.9%	30.1%	23.8%	32.7%	33.9%	33.1%
Good	20,062	46.0%	45.3%	44.6%	47.8%	46.3%	49.2%
Neither good nor poor	5,924	14.8%	15.2%	19.7%	13.0%	13.6%	12.5%
Poor	2,422	6.2%	6.9%	8.8%	4.8%	4.7%	3.8%
Very Poor	773	2.2%	2.6%	3.1%	1.7%	1.4%	1.5%

Question 39b. How would you rate that unit's... Morale?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very good	11,092	24.6%	24.2%	18.4%	25.6%	27.1%	24.7%
Good	19,078	43.3%	43.6%	40.0%	44.9%	42.2%	45.6%
Neither good nor poor	7,331	18.1%	17.9%	22.1%	16.7%	18.3%	17.4%
Poor	3,992	9.9%	9.9%	14.0%	9.1%	9.0%	8.6%
Very Poor	1,447	4.1%	4.4%	5.5%	3.6%	3.4%	3.7%

Question 39c. How would you rate that unit's... Performance?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very good	13,953	31.1%	29.7%	26.5%	32.9%	34.8%	34.1%
Good	20,404	47.0%	46.6%	45.7%	48.5%	46.7%	49.5%
Neither good nor poor	5,739	14.6%	15.4%	17.9%	12.6%	13.3%	12.0%
Poor	2,090	5.2%	6.0%	6.9%	4.3%	3.8%	3.3%
Very Poor	712	2.1%	2.4%	3.1%	1.6%	1.4%	1.0%

Question 40. Among all the factors that affect how well a unit works together, how much did the unit members' belief that this leader was gay or lesbian affect the unit's ability to work together?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
A lot	2,947	9.2%	10.4%	15.9%	6.6%	6.2%	6.3%
Some	6,207	16.6%	17.3%	20.7%	15.3%	14.6%	15.0%
A little	5,951	16.4%	16.5%	19.5%	15.9%	15.3%	15.9%
Not at all	18,208	50.5%	49.0%	36.6%	54.7%	55.9%	55.4%
No basis to judge	2,588	7.2%	6.8%	7.4%	7.6%	8.1%	7.4%

The following question was only asked to respondents that answered a lot, some or a little to the previous question:

Question 41. Was the effect on the unit's ability to work together...

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Mostly positive	2,306	15.9%	15.5%	14.3%	18.7%	15.0%	17.8%
Mostly negative	5,652	37.5%	39.7%	43.8%	30.2%	34.6%	30.3%
About equally positive and negative	7,184	46.6%	44.8%	41.8%	51.1%	50.4%	51.9%

The following question was only asked to respondents who said they served with a leader they believed to be gay or lesbian and where all, most, some or a few other unit members believed the leader to be gay or lesbian:

Question 42. Among all the factors that affect a unit's morale, how much did the unit members' belief that this leader was gay or lesbian affect the unit's morale?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
A lot	2,625	8.1%	9.3%	13.0%	5.7%	5.5%	4.8%

Don't know	10,704	10.0%	9.2%	11.4%	11.2%	10.0%	11.6%

Question 81. If Don't Ask, Don't Tell is repealed, how, if at all, will your military career plans be affected?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
I will stay longer than I had planned	1,422	1.7%	1.9%	0.7%	2.2%	1.2%	1.7%
I will think about staying longer than I had planned	1,500	1.8%	2.0%	1.5%	2.2%	1.4%	1.5%
I will think about leaving sooner than I had planned	12,698	11.1%	11.8%	15.0%	8.6%	9.9%	9.1%
I will leave sooner than I had planned	12,126	12.6%	14.2%	23.1%	7.9%	8.2%	6.2%
My military career plans would not change	73,210	62.3%	60.2%	47.5%	68.0%	69.0%	67.5%
Don't know	10,690	10.5%	9.8%	12.2%	11.2%	10.3%	14.0%

For this question, respondents were asked to say how repeal would impact the importance of the three factors they selected, in response to question 33, as most important to them when deciding whether to remain in the military:

Question 82a. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military? Pay and allowances / Bonuses

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	14,988	54.5%	54.4%	44.3%	57.0%	56.8%	56.5%
Equally as important as repeal	5,447	21.4%	21.8%	21.8%	21.5%	20.3%	20.5%
Less important than repeal	3,057	12.4%	13.9%	19.1%	9.1%	10.1%	7.8%
Don't know	2,927	11.7%	9.9%	14.8%	12.5%	12.8%	15.3%

Question 82b. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military? Education benefits

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	7,289	51.7%	52.3%	43.9%	51.4%	53.9%	50.7%
Equally as important as repeal	3,215	24.2%	24.4%	25.6%	25.6%	21.7%	25.4%
Less important than repeal	1,373	9.9%	10.8%	12.0%	7.8%	9.1%	7.1%
Don't know	1,954	14.2%	12.4%	18.4%	15.2%	15.3%	16.8%

**Question 82c. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Quality of leadership**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	10,570	52.4%	53.2%	46.4%	53.3%	53.7%	52.8%
Equally as important as repeal	4,553	23.6%	23.7%	23.1%	23.3%	23.8%	24.4%
Less important than repeal	2,213	11.9%	12.2%	16.3%	9.2%	9.8%	8.9%
Don't know	2,077	12.1%	10.9%	14.2%	14.2%	12.7%	13.8%

**Question 82d. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Retirement benefits**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	25,305	58.1%	56.1%	52.7%	60.4%	61.0%	60.0%
Equally as important as repeal	8,099	20.8%	21.6%	21.5%	20.3%	19.6%	20.1%
Less important than repeal	3,493	9.4%	11.3%	13.3%	6.7%	7.4%	5.7%
Don't know	4,318	11.8%	11.0%	12.4%	12.6%	12.0%	14.2%

**Question 82e. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Years completed toward retirement**

	N	Over- all	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	16,133	58.8%	57.1%	53.2%	61.8%	60.9%	60.6%
Equally as important as repeal	4,803	19.9%	20.8%	19.6%	18.8%	19.0%	18.9%
Less important than repeal	2,355	10.3%	12.2%	14.7%	7.2%	8.3%	6.5%
Don't know	2,585	11.1%	9.9%	12.5%	12.2%	11.8%	14.0%

**Question 82f. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Current economic situation and civilian job availability**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	14,176	54.8%	53.9%	47.9%	56.7%	58.1%	54.4%
Equally as important as repeal	5,120	21.1%	21.8%	22.3%	20.6%	19.7%	22.6%
Less important than repeal	2,568	11.3%	13.0%	16.3%	8.3%	8.7%	7.9%
Don't know	2,984	12.8%	11.3%	13.5%	14.4%	13.6%	15.0%

**Question 82g. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Family separations and stability**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	12,055	60.2%	60.9%	49.6%	60.3%	64.2%	59.9%
Equally as important as repeal	3,525	19.6%	19.7%	21.4%	19.8%	17.9%	19.7%
Less important than repeal	1,644	9.0%	9.4%	13.8%	7.5%	6.7%	6.2%
Don't know	1,825	11.3%	9.9%	15.3%	12.4%	11.3%	14.2%

**Question 82h. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Health benefits**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard

Don't know	3,071	10.4%	9.7%	11.9%	10.1%	11.3%	13.4%

Question 82n. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military? Job satisfaction

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	20,332	54.4%	54.1%	45.3%	57.1%	57.2%	55.9%
Equally as important as repeal	7,498	21.9%	22.7%	22.8%	20.8%	20.5%	21.5%
Less important than repeal	4,113	12.4%	13.2%	18.5%	9.9%	10.0%	8.4%
Don't know	3,753	11.4%	10.0%	13.4%	12.2%	12.3%	14.2%

**Question 82o. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Family satisfaction with military**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	12,693	57.6%	57.7%	49.6%	59.3%	61.0%	57.2%
Equally as important as repeal	4,155	20.0%	20.5%	21.9%	18.1%	19.1%	19.9%
Less important than repeal	1,969	10.2%	10.6%	15.4%	8.6%	7.6%	8.0%
Don't know	2,234	12.2%	11.3%	13.1%	13.9%	12.3%	14.9%

**Question 82p. Assume Don't Ask, Don't Tell is repealed. How important, compared with the repeal, would the following factors be to you in deciding whether to remain in the military?
Other**

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than repeal	1,504	40.3%	41.0%	31.5%	41.5%	43.1%	45.5%
Equally as important as repeal	655	19.3%	19.9%	17.7%	21.8%	16.1%	19.1%
Less important than repeal	491	15.9%	17.6%	19.8%	11.2%	13.1%	9.9%
Don't know	932	24.5%	21.4%	31.0%	25.6%	27.7%	25.5%

The following question was answered by all respondents:

Question 83. In your opinion, which of the following are the top THREE factors that enable you to fulfill your mission during combat?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Having NCOs/ POs who lead by example	33,789	37.5%	43.1%	38.3%	28.5%	32.8%	27.2%
Having officers who lead by example	24,764	18.0%	18.0%	14.1%	18.9%	18.8%	21.2%
Unit training/ Individual training	46,615	39.1%	39.4%	40.1%	40.1%	37.0%	42.6%
Length of time serving together	4,668	5.5%	6.1%	7.5%	4.6%	3.7%	6.1%
Individual unit members' technical capabilities	20,139	16.6%	14.8%	15.2%	16.5%	21.5%	15.1%
Unit morale	33,484	31.3%	29.4%	32.4%	35.9%	32.1%	26.1%
Clear task objectives	32,138	26.1%	24.3%	21.8%	28.7%	29.6%	31.4%
Trust among unit members	54,139	48.2%	47.6%	53.5%	48.5%	46.3%	53.3%
Unit members who get along well socially	7,343	9.3%	9.1%	11.1%	8.5%	9.5%	10.1%
Similar moral values among unit members	9,714	8.6%	9.6%	8.7%	6.9%	7.9%	6.8%
Having only heterosexual members in the unit	4,471	5.2%	6.0%	8.2%	3.3%	3.8%	3.7%
Diversity among unit members	3,641	4.0%	3.4%	2.1%	6.9%	3.7%	4.5%
Having unit members who work together as a team	58,062	49.9%	48.8%	46.5%	51.5%	52.8%	50.1%

For this question, respondents were asked to say how repeal would impact the importance of the three factors they selected, in the previous question, as most important to them being able to fulfill their mission in combat:

Question 84a. How would the repeal of Don't Ask, Don't Tell affect the importance of these factors? Having NCOs/POs who lead by example

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than before repeal	13,138	37.7%	37.7%	40.3%	37.2%	36.5%	37.4%
As important as before repeal	9,010	26.5%	26.5%	27.9%	25.7%	25.9%	27.5%
Less important than before repeal	1,685	6.1%	6.4%	10.0%	4.3%	4.5%	4.3%
Would not be impacted by repeal	9,795	29.7%	29.4%	21.7%	32.8%	33.2%	30.9%

Question 84b. How would the repeal of Don't Ask, Don't Tell affect the importance of these factors? Having officers who lead by example

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than before repeal	9,787	38.4%	38.5%	42.0%	37.6%	37.7%	36.1%
As important as before repeal	6,834	27.3%	26.4%	28.4%	28.2%	27.6%	28.9%
Less important than before repeal	1,016	5.2%	6.1%	7.0%	4.3%	3.7%	3.1%
Would not be impacted by repeal	7,032	29.2%	29.0%	22.5%	29.9%	31.0%	31.9%

Question 84c. How would the repeal of Don't Ask, Don't Tell affect the importance of these factors? Unit training/Individual training							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More important than before repeal	12,195	27.6%	28.6%	31.9%	26.4%	24.6%	22.4%

Question 91. If a wartime situation made it necessary for you to share bathroom facilities with an open bay shower with someone you believe to be a gay or lesbian Service member, which are you most likely to do?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Take no action	35,215	31.5%	31.8%	18.4%	36.3%	33.3%	32.4%
Use the shower at a different time than the Service member I thought to be gay or lesbian	28,220	25.3%	25.8%	27.9%	22.1%	25.4%	22.4%
Discuss how we expect each other to behave and conduct ourselves	11,389	11.5%	11.4%	11.4%	13.7%	10.2%	11.8%
Talk to a chaplain, mentor, or leader about how to handle the situation	1,378	1.4%	1.4%	1.7%	1.5%	1.3%	1.1%
Talk to a leader to see if I had other options	18,622	16.1%	16.1%	22.6%	12.4%	16.0%	15.1%
Something else	6,775	6.2%	6.7%	9.2%	4.4%	5.1%	4.2%
Don't know	8,933	8.0%	6.7%	8.8%	9.6%	8.7%	13.0%

Question 92. Do you usually attend military social functions?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, by myself	23,221	21.0%	19.0%	26.9%	21.1%	23.0%	18.2%
Yes, with my spouse, significant other or other family members	61,222	49.3%	51.4%	49.9%	46.7%	46.6%	44.2%
No	26,386	29.7%	29.6%	23.2%	32.2%	30.4%	37.6%

The following question was only asked to respondents that said they attended military social functions:

Question 93. If Don't Ask, Don't Tell is repealed and a gay or lesbian Service member attended a military social function with a same-sex partner, which are you most likely to do?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Continue to attend military social functions	41,690	49.5%	48.1%	36.8%	56.8%	53.7%	54.0%
Stop bringing my spouse, significant other or other family members with me to military social functions	4,644	5.0%	5.2%	5.5%	4.8%	4.3%	4.3%
Stop attending military social functions	25,231	30.4%	32.5%	40.4%	23.0%	26.4%	24.8%
Something else	2,556	3.0%	3.0%	4.0%	2.7%	2.8%	2.3%
Don't know	10,067	12.1%	11.2%	13.3%	12.7%	12.9%	14.5%

The following question was only asked to respondents that said they attended military family programs:

Question 94. Do you usually attend military family programs?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, by myself	8,044	8.0%	9.0%	9.2%	6.9%	6.4%	5.4%
Yes, with my family	49,330	40.1%	44.2%	36.8%	33.9%	38.1%	32.4%
No	52,717	51.9%	46.9%	54.0%	59.2%	55.4%	62.2%

The following questions were asked of all respondents.

Question 95. If Don't Ask, Don't Tell is repealed and a gay or lesbian Service member participated in military family programs with a same-sex partner, which are you most likely to do?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Continue to participate in military family programs	23,634	43.1%	43.7%	30.4%	47.9%	44.4%	46.4%
Stop bringing my family with me to military family programs	5,550	8.6%	8.8%	8.9%	9.0%	8.0%	7.2%
Stop participating in military family programs altogether	20,578	35.1%	35.3%	46.8%	28.9%	33.7%	30.8%
Something else	1,370	2.3%	2.3%	2.5%	2.3%	2.1%	2.0%
Don't know	6,148	10.9%	10.0%	11.4%	11.9%	11.8%	13.7%

Question 96. If Don't Ask, Don't Tell is repealed and you had on-base housing and a gay or lesbian Service member was living with a same-sex partner on-base, what would you most likely do?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
I would get to know them like any other neighbors.	46,740	42.2%	41.6%	27.7%	47.3%	45.8%	47.3%
I would make a special effort to get to know them.	1,893	1.9%	1.9%	2.1%	1.9%	1.6%	1.9%
I would be uncomfortable, but access to the exchange, commissary, and MWR facilities is more important to me than who my neighbors are when deciding where to live.	5,385	5.1%	5.2%	6.2%	5.2%	4.3%	4.5%
I would be uncomfortable, but the quality of on-base housing is more important to me than who my neighbors are when deciding where to live.	5,293	5.2%	5.3%	7.6%	4.7%	4.3%	4.3%
I would be uncomfortable, but the cost of moving makes it unlikely I would leave on-base housing.	7,088	6.3%	6.6%	8.4%	5.1%	5.4%	5.8%
I would probably move off-base.	19,944	17.6%	18.7%	25.0%	13.1%	15.7%	12.6%
Something else	6,261	5.5%	5.6%	5.8%	5.5%	5.3%	4.1%
Don't know	17,957	16.3%	15.1%	17.2%	17.2%	17.6%	19.5%

Question 97. What is your present pay grade?							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
E1-E3	8,486	14.8%	12.6%	30.6%	12.7%	13.8%	11.5%

53-59	3,402	1.7%	2.1%	0.1%	1.0%	2.1%	1.0%
60 or older	224	0.1%	0.2%	0.0%	0.1%	0.1%	0.0%

Question 99. Are you male or female?							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Male	90,893	84.4%	84.4%	92.2%	83.6%	81.1%	87.2%
Female	18,587	15.6%	15.6%	7.8%	16.4%	18.9%	12.8%

Question 100. Are you Spanish/ Hispanic/ Latino?							
	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes: Mexican-American, Mexican, Chicano, Puerto Rican, Cuban, Central or South American, or other Spanish/ Hispanic/ Latino	11,916	13.1%	13.3%	18.4%	13.0%	10.4%	12.0%
No	97,322	86.9%	86.7%	81.6%	87.0%	89.6%	88.0%

Question 101. What is your race? Mark one or more races to indicate what you consider yourself to be.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
White	89,092	78.0%	77.8%	81.3%	72.0%	80.3%	88.5%
Black or African-American	12,678	17.2%	18.0%	14.1%	19.8%	15.7%	7.9%
Native-American, American Indian or Alaska Native	3,767	4.1%	3.8%	4.5%	5.3%	3.5%	4.5%
Asian-American, Asian-Indian, Chinese, Filipino, Japanese, Korean, Vietnamese or other Southeast Asian	5,261	5.2%	4.4%	4.6%	8.2%	5.3%	3.5%
Native Hawaiian, Samoan, Guamanian, Chamorro or other Pacific Islander	1,320	1.4%	1.2%	1.4%	1.5%	1.5%	1.9%

Question 102. Do you have any family members, friends or acquaintances who are gay or lesbian, or whom you believe to be gay or lesbian?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, one	20,937	18.9%	19.2%	20.2%	17.4%	18.8%	18.3%
Yes, more than one	45,793	39.9%	39.6%	33.2%	43.8%	40.5%	41.2%
No	43,364	41.2%	41.2%	46.6%	38.8%	40.6%	40.5%

Question 103. If you would like to share other thoughts and opinions about the impacts on you, your family, your immediate unit, or your Service if Don't Ask, Don't Tell is repealed, please use the space below.

This question was an open comment field.

D

SURVEY RESPONSES: 2010 DEPARTMENT OF DEFENSE SURVEY OF SPOUSES

The following question was asked of all respondents:

Question 1. What is your marital status? MARK ONE.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Married	43,465	97.8%	97.3%	97.1%	97.6%	99.0%	98.9%
Separated	740	2.2%	2.7%	2.9%	2.4%	1.0%	1.1%
Divorced	Respondents that answered that they were "divorced" or "widowed" were asked to skip to the end. The answers for the remaining questions were only tabulated from those respondents that said they were married or separated.						
Widowed							

The following questions were asked of all eligible respondents:

Question 2. How many years have you been married?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
5 years or less	15,650	43.0%	42.3%	62.5%	43.4%	36.3%	41.1%
6 to 10 years	10,193	24.0%	24.2%	19.9%	25.2%	24.3%	25.1%
11 to 15 years	7,118	14.6%	14.7%	9.3%	14.9%	16.5%	14.2%
16 to 20 years	5,685	10.0%	9.9%	5.8%	10.1%	11.7%	11.3%
21 to 25 years	3,280	5.1%	5.2%	2.0%	4.4%	6.6%	5.2%
More than 25 years	2,220	3.3%	3.6%	0.4%	2.0%	4.6%	3.1%

Navy, Active Duty	4,346	15.2%	-	-	-	-	-
Navy Reserve	2,220	2.6%	-	-	85.6%	-	-
Air Force, Active Duty	3,658	15.2%	-	-	14.4%	65.5%	-
Air National Guard, Air Force Reserve	6,972	8.0%	-	-	-	34.5%	-
Marine Corps, Active Duty	4,040	8.4%	-	90.6%	-	-	-
Marine Corps Reserve	2,285	0.9%	-	9.4%	-	-	-
Coast Guard, Active Duty	2,477	2.2%	-	-	-	-	86.3%
Coast Guard Reserve	720	0.4%	-	-	-	-	13.7%

Question 4. Are you currently serving, or have you ever served, in the military?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, currently	Respondents that answered that they were currently serving in the military were asked to skip to the end and their answers were not included in the final response tally.						
Yes, previously but not now	4,703	11.8%	12.2%	7.2%	12.3%	13.0%	7.8%
No	39,471	88.2%	87.8%	92.8%	87.7%	87.0%	92.2%

The following questions were asked of all eligible respondents:

Question 5. Is your spouse currently deployed?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	5,737	15.8%	18.6%	14.3%	16.6%	10.4%	9.8%
No	38,415	84.2%	81.4%	85.7%	83.4%	89.6%	90.2%

Question 6. How many times has your spouse been deployed since September 11, 2001?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Never	11,207	21.5%	18.6%	17.1%	17.2%	30.0%	48.6%
1 time	12,138	28.2%	33.8%	27.7%	20.3%	24.1%	14.4%
2 times	9,387	23.5%	27.6%	26.7%	21.4%	17.0%	8.0%
3 times	4,993	12.9%	12.2%	16.0%	15.9%	11.4%	4.7%
4 or more times	5,688	13.9%	7.8%	12.6%	25.2%	17.4%	24.2%

Question 7. Do you have any family members, friends or acquaintances, including coworkers, whom you believe to be gay or lesbian?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, one	5,236	12.1%	11.9%	14.1%	11.5%	12.5%	10.6%
Yes, more than one	27,091	59.0%	57.5%	57.1%	63.2%	58.9%	66.5%
No	11,726	28.9%	30.6%	28.9%	25.3%	28.6%	22.9%

Question 8. Has your spouse ever worked on a daily basis with an individual he or she believed to be a homosexual Service member?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	14,082	34.8%	32.5%	26.9%	45.9%	33.1%	43.9%
No	12,019	26.4%	26.7%	35.0%	17.7%	29.5%	23.0%
Don't Know	17,916	38.8%	40.8%	38.1%	36.4%	37.4%	33.0%

The following questions were asked to respondents that said that their spouse has worked on a daily basis with an individual he or she believed to be a homosexual Service member.

Question 9. How well did you know that individual? If more than one individual, please answer thinking about the Service member with whom your spouse worked most recently.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very well	1,331	9.9%	10.5%	7.9%	9.5%	9.7%	9.2%
Well	1,938	14.8%	14.9%	12.8%	13.5%	16.4%	15.8%
Somewhat well	3,241	23.7%	24.1%	24.3%	22.5%	24.2%	21.6%
Not well at all	7,513	51.7%	50.5%	55.0%	54.5%	49.6%	53.4%

Question 10. Compared with other Service members in the community, how much did that Service member participate in military social activities?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
More than most other Service members in the community	830	6.2%	6.3%	4.8%	5.7%	7.2%	5.4%
Less than most other Service members in the community	1,346	9.2%	9.5%	10.8%	7.8%	9.4%	9.5%
About the same as most other Service members	6,338	45.7%	46.5%	45.5%	44.1%	45.9%	47.0%
Don't Know	5,497	38.8%	37.6%	38.8%	42.5%	37.5%	38.1%

The following questions were asked of all eligible respondents.

Question 11. If Don't Ask, Don't Tell is repealed, the military will want to prepare and assist spouses in understanding the new policy. How would you like the military to provide you with information on the new policy? MARK ALL THAT APPLY.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
No special activities or communications would be necessary	19,039	43.0%	42.5%	37.0%	43.0%	45.8%	49.1%
Distribute printed information to spouses about repeal	16,000	37.4%	37.8%	40.9%	38.5%	34.8%	34.4%
Provide information about the repeal on military Web sites	14,793	34.3%	34.0%	38.1%	36.3%	32.3%	31.5%
Have interactive chats available on line to answer questions from Service member spouses	3,191	8.2%	8.5%	8.5%	9.2%	6.9%	7.0%
Conduct information sessions on bases and installations about repeal	5,367	13.5%	13.8%	15.4%	13.8%	12.4%	9.5%
Provide information through military chaplains trained to work with spouses and family members on repeal	5,891	14.5%	15.4%	16.7%	14.1%	12.4%	10.9%
Provide information through other military counselors trained to work with spouses and family members on repeal	5,663	14.1%	14.8%	15.6%	14.8%	11.9%	11.2%
Provide information through Family Readiness Group/ Work-Life Program leaders trained to work with spouses and family members on repeal	8,308	21.2%	22.9%	25.3%	20.1%	17.7%	14.0%
Offer courses to spouses on how to discuss repeal within their families	3,337	9.1%	9.9%	11.5%	9.5%	6.7%	6.1%
Other	1,649	3.6%	3.7%	3.7%	3.2%	3.7%	3.1%

Question 12. Overall, how do you feel about your spouse's current military service?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very positive	16,097	32.9%	29.0%	32.4%	35.0%	38.6%	43.3%
Positive	15,151	32.5%	31.6%	30.7%	32.2%	35.2%	34.4%
An equal mix of positive and negative feelings	11,401	30.6%	34.8%	33.3%	28.2%	23.9%	20.1%
Negative	699	1.8%	1.9%	1.8%	2.3%	1.1%	1.0%
Very negative	454	1.4%	1.8%	1.3%	1.4%	0.7%	0.6%
Never thought about it	279	0.8%	0.9%	0.6%	0.9%	0.6%	0.6%

Question 13. Which one of the following statements best describes your spouse's current military career intentions?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Definitely stay in until retirement	24,415	51.8%	48.1%	41.1%	54.7%	60.5%	62.4%
Probably stay in until retirement	8,405	20.1%	20.9%	20.9%	19.1%	19.3%	18.7%
Definitely stay in beyond present obligation, but not necessarily until retirement	1,322	3.8%	3.9%	5.4%	4.5%	2.6%	2.3%
Probably stay in beyond present obligation, but not necessarily until retirement	2,048	5.7%	6.2%	8.0%	5.7%	4.2%	3.1%
Definitely leave upon completion of present obligation	1,631	4.9%	5.6%	9.0%	4.4%	2.5%	1.9%
Probably leave upon completion of present obligation	1,665	4.7%	5.4%	8.7%	3.7%	2.8%	2.1%
Have met retirement eligibility but will continue to serve	2,888	4.5%	4.6%	2.7%	4.3%	5.0%	6.8%
Don't Know	1,646	4.4%	5.4%	4.3%	3.6%	3.1%	2.7%

Question 14. Which of the following best describes your preference for your spouse's military career intentions?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Remain in the military until retirement	30,684	67.0%	63.2%	57.3%	69.3%	75.5%	78.8%
Remain in the military beyond present obligation, but not necessarily until retirement	3,698	10.0%	10.4%	14.0%	10.4%	7.6%	7.5%
Leave upon completion of his or her present obligation	3,564	9.2%	10.9%	12.1%	8.1%	5.8%	4.7%
I do not have a strong preference	6,063	13.8%	15.4%	16.6%	12.3%	11.1%	8.9%

Question 15. What are the most important factors you and your spouse consider when making decisions about his or her future in the military? PLEASE MARK UP TO 3 FACTORS.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Spouse's current pay and benefits	18,685	49.3%	49.3%	45.4%	49.0%	50.2%	55.0%
Your job status	2,548	7.2%	6.9%	7.4%	7.1%	7.5%	10.2%
Education benefits (for you, your spouse, and/or your children)	7,245	22.1%	22.7%	20.4%	22.9%	21.1%	18.8%
Spouse's retirement benefits	17,158	38.9%	36.8%	28.6%	39.6%	45.8%	43.3%
Spouse's years completed toward retirement	6,612	15.5%	15.4%	13.3%	14.7%	17.3%	13.6%
Current economic situation and civilian job availability	8,652	26.8%	25.6%	33.4%	27.6%	26.0%	29.6%
Family separations and stability	6,823	17.7%	19.7%	18.6%	18.1%	13.2%	14.0%
Medical care	9,456	29.2%	28.4%	30.2%	30.2%	29.2%	33.0%
Childcare options	244	0.9%	0.9%	1.2%	0.9%	0.6%	0.9%
Deployment-related considerations	5,079	13.1%	15.5%	14.9%	10.4%	10.4%	4.9%
Spouse's ability to serve and defend the country	4,496	10.6%	10.9%	9.7%	9.8%	11.4%	8.2%
Spouse's job satisfaction	8,683	21.0%	19.3%	22.3%	21.6%	23.2%	25.4%
Our satisfaction with military life	4,343	12.1%	11.2%	15.5%	12.6%	12.7%	10.1%
Our children's well-being	6,451	18.8%	19.0%	22.3%	19.7%	15.9%	20.3%
Living on-base	164	0.7%	0.8%	1.0%	0.5%	0.6%	0.3%
The ability to live in a close knit military community	408	1.2%	1.3%	1.6%	0.9%	1.2%	0.7%
Other	916	2.4%	2.5%	2.9%	2.5%	2.2%	1.6%

Question 16. How important a factor would a repeal of Don't Ask, Don't Tell be to you in making decisions about your spouse's future in the military?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very important	5,906	13.4%	13.9%	17.4%	12.0%	12.5%	9.7%
Important	5,356	12.0%	11.9%	15.3%	11.3%	11.6%	9.0%
Neither important nor unimportant	11,783	27.7%	27.7%	27.4%	26.9%	28.3%	28.7%
Unimportant	7,222	16.0%	15.8%	13.3%	16.6%	16.9%	18.1%
Very unimportant	10,981	24.1%	23.5%	19.5%	26.4%	24.9%	29.2%
Don't Know	2,790	6.7%	7.2%	7.1%	6.8%	5.7%	5.3%

Question 17. Would a repeal of Don't Ask, Don't Tell affect your preference for your spouse's plans for his or her future in the military?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, I would want my spouse to stay longer	1,031	2.8%	2.9%	2.2%	3.5%	2.5%	2.3%
Yes, I would want my spouse to leave earlier	5,507	11.8%	12.0%	16.5%	9.6%	11.7%	7.6%
No, it would have no effect on my preference for my spouse's plans for military service in the future	32,439	73.8%	73.6%	66.5%	75.6%	75.0%	79.4%
Don't Know	5,068	11.6%	11.5%	14.8%	11.3%	10.8%	10.7%

Question 18. Have you ever recommended to a family member or close friend that he or she pursue service in the military?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	33,354	75.4%	74.7%	71.5%	74.6%	78.2%	81.9%
No	10,794	24.6%	25.3%	28.5%	25.4%	21.8%	18.1%

Question 19. Would a repeal of Don't Ask, Don't Tell affect your willingness to recommend military service to a family member or close friend?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, I would be more likely to recommend military service to a family member or close friend	1,924	4.8%	4.9%	3.7%	5.5%	4.6%	5.4%
Yes, I would be less likely to recommend military service to a family member or close friend	8,521	17.9%	17.6%	23.4%	15.3%	18.9%	13.1%
No, it would not affect my willingness to recommend military service to a family member or close friend	29,254	67.2%	67.1%	60.8%	69.6%	67.6%	73.0%
Don't Know	4,375	10.0%	10.4%	12.1%	9.6%	8.9%	8.5%

Question 20. What is your preference on where to live?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
In on-base housing	7,175	21.6%	21.8%	31.1%	15.1%	23.4%	12.0%
In military housing off-base	2,156	6.5%	5.8%	7.0%	11.0%	4.2%	7.4%
In civilian housing	34,326	71.9%	72.4%	61.9%	73.9%	72.4%	80.6%

Question 21. Where do you currently live?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
In on-base housing	4,347	16.2%	16.0%	22.9%	11.4%	18.7%	7.3%
In military housing off-base	1,200	4.1%	2.5%	4.8%	9.8%	2.7%	6.0%
In civilian housing	38,522	79.7%	81.5%	72.3%	78.8%	78.6%	86.7%

Question 22. Assuming you had a choice on where to live, what are the most important factors you would consider? PLEASE MARK UP TO 3 FACTORS.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Cost of housing	21,527	56.8%	54.7%	60.0%	59.3%	57.7%	60.1%
Housing condition	14,564	39.7%	41.8%	42.0%	36.6%	37.4%	34.6%
Amount of space	7,415	21.8%	23.2%	20.8%	20.5%	20.9%	16.6%
Quality of schools in the area	18,811	44.4%	43.6%	38.3%	45.9%	46.8%	47.6%
Safety of the community	22,186	58.5%	57.2%	59.3%	61.2%	58.7%	59.0%
Sense of the community in the neighborhood	2,841	5.9%	5.7%	5.6%	6.0%	6.4%	5.9%
Presence of children in the neighborhood	1,515	3.7%	3.7%	3.9%	3.4%	3.6%	3.1%
Commuting time to your job	6,329	14.6%	14.8%	12.3%	14.1%	15.4%	17.0%
Proximity to spouse's job	8,233	21.6%	20.8%	26.5%	22.6%	20.1%	26.2%
Neighbors that I know and trust	2,915	6.7%	7.0%	6.4%	5.5%	7.4%	5.6%
The values of the community	4,278	9.1%	9.4%	7.8%	7.6%	10.2%	8.2%
Presence of local businesses	1,113	2.8%	2.9%	2.5%	2.5%	2.7%	2.8%
Easy access to the exchange, commissary, and MWR facilities	2,377	6.8%	6.7%	8.1%	7.8%	6.1%	5.7%
Other	983	2.5%	2.7%	2.8%	2.4%	2.1%	3.1%

Question 23. Assuming you had a choice on where to live, how important would a repeal of Don't Ask, Don't Tell be to you in considering where to live?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very important	5,660	13.2%	13.9%	16.1%	11.9%	12.0%	9.1%
Important	3,831	8.6%	8.5%	11.0%	7.8%	8.4%	6.7%
Neither important nor unimportant	12,062	27.7%	27.7%	27.8%	28.2%	27.4%	28.0%
Unimportant	7,758	17.8%	17.8%	15.7%	17.1%	19.0%	18.9%
Very unimportant	12,016	26.4%	25.6%	22.5%	29.1%	27.1%	32.1%
Don't Know	2,751	6.3%	6.5%	6.9%	5.9%	6.0%	5.2%

Question 24. Assume Don't Ask, Don't Tell is repealed and you live in on-base housing. If a gay or lesbian Service member lived in your neighborhood with their partner, would you stay on-base or would you try to move out?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
I would stay on-base	20,185	49.5%	48.9%	48.1%	51.9%	49.0%	54.6%
I would try to move out	7,004	15.8%	15.9%	19.8%	13.6%	16.3%	12.4%
Don't Know	4,727	10.9%	10.6%	12.9%	10.6%	11.2%	8.7%
Does not apply, I would not live on-base	11,987	23.7%	24.5%	19.2%	23.9%	23.5%	24.2%

The following question was asked to respondents that said they would stay on-base, try to move out, or don't know if Don't Ask, Don't Tell is repealed and they live on-base.

Question 25. While living on-base, which of the following would you do?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
I would make a special effort to get to know the gay or lesbian Service member and partner	876	2.6%	2.5%	2.4%	3.0%	2.5%	3.6%
I would get to know them like any other neighbor	20,021	63.1%	62.4%	57.5%	66.4%	63.7%	70.9%
I would generally avoid them when I could	4,230	13.2%	13.8%	15.6%	11.1%	13.0%	9.4%
I would do nothing	3,767	12.8%	12.8%	16.5%	12.4%	12.0%	9.4%
I would do something else	1,031	3.1%	3.1%	3.1%	2.6%	3.3%	2.6%
Don't Know	1,613	5.2%	5.4%	4.9%	4.6%	5.5%	4.1%

The following questions were asked of all eligible respondents.

Question 26. In the last 12 months, about how many informal military social events, such as picnics, gatherings and holiday parties, have you attended?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
All or nearly all of these events	4,753	10.9%	11.6%	13.8%	9.9%	9.2%	10.4%
Many of these events	6,422	15.3%	14.1%	18.8%	15.4%	16.3%	14.9%
Some of these events	11,042	25.8%	24.8%	26.9%	24.8%	28.2%	26.6%
Very few of these events	11,391	26.1%	25.6%	24.8%	26.3%	27.4%	26.7%
None of these events	10,119	21.9%	23.8%	15.7%	23.7%	18.9%	21.3%

Question 27. Assume Don't Ask, Don't Tell is repealed. Would the attendance of a gay or lesbian Service member with his or her partner affect how often you attend these types of military social events?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, I would attend these types of military social events more often	559	1.4%	1.4%	1.3%	1.5%	1.3%	1.2%
Yes, I would attend these types of military social events less often	8,203	18.1%	18.1%	23.0%	15.3%	19.0%	14.3%
No, it would not affect my attendance at these types of military social events	31,315	72.0%	71.6%	66.8%	75.0%	71.8%	77.9%
Don't Know	3,877	8.5%	8.9%	8.9%	8.2%	7.9%	6.5%

Question 28. During your spouse's most recent deployment since September 11, 2001, how many deployment-support gatherings did you attend?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
All or nearly all of these gatherings	3,925	9.4%	11.8%	12.0%	9.3%	4.1%	2.9%
Many of these gatherings	3,572	9.0%	10.7%	9.5%	9.0%	5.9%	4.0%
Some of these gatherings	5,515	13.3%	14.6%	13.7%	13.2%	11.1%	7.5%
Very few of these gatherings	6,283	15.8%	17.3%	15.8%	16.5%	13.1%	6.6%
None of these gatherings	14,119	32.7%	28.4%	33.1%	36.6%	38.3%	34.2%
Does not apply, my spouse has not been deployed since September 11, 2001	10,401	19.8%	17.3%	15.9%	15.5%	27.5%	44.7%

Question 29. Assume Don't Ask, Don't Tell is repealed and your spouse is deployed. Would the presence of a partner of a gay or lesbian Service member affect how often you attend deployment-support activities?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, I would attend deployment-support activities more often	506	1.3%	1.3%	1.3%	1.7%	1.0%	0.8%
Yes, I would attend deployment-support activities less often	6,168	13.4%	13.0%	16.7%	11.8%	14.5%	11.1%
No, it would not affect my attendance at deployment-support activities	33,063	76.2%	76.8%	72.4%	77.7%	75.1%	77.8%
Don't Know	4,208	9.1%	8.8%	9.7%	8.8%	9.4%	10.3%

Question 30. If you had concerns about the impact of the repeal of Don't Ask, Don't Tell, to whom would you likely turn? MARK ALL THAT APPLY.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Would not need to talk to someone	13,370	31.4%	31.3%	27.1%	33.5%	31.1%	35.8%
My spouse	30,130	68.5%	68.2%	73.2%	66.8%	68.9%	64.9%
A family member	11,209	26.8%	26.5%	33.3%	25.9%	25.8%	25.3%
A friend outside of your family	8,358	19.9%	19.6%	24.2%	18.7%	20.0%	16.7%
A neighbor	2,399	5.9%	5.9%	8.2%	5.4%	5.5%	4.5%
Key Spouse/ Senior Spouse	1,373	3.3%	3.1%	5.1%	2.4%	4.1%	1.0%
Airmen and Family Readiness Center	1,073	2.6%	1.5%	2.2%	1.3%	6.2%	0.6%
Military Family Life Consultants (MFLC)	2,246	6.0%	6.9%	5.1%	5.7%	5.1%	3.7%
Other military spouses	8,130	19.2%	18.6%	26.1%	19.1%	17.9%	17.6%
Family Readiness Group	3,495	9.3%	12.0%	13.8%	6.7%	4.8%	1.5%
Work-Life Program	402	0.9%	0.8%	0.6%	1.2%	0.5%	4.5%
Ombudsman/ Ombuds Offices	1,043	2.3%	0.8%	0.8%	8.6%	0.6%	5.7%
Support services on the base or installation	2,368	6.1%	6.1%	6.8%	7.2%	5.1%	4.3%
Support services in the civilian community	972	2.2%	2.5%	2.4%	2.1%	1.7%	1.4%
A military chaplain	4,959	12.0%	13.7%	12.8%	9.8%	10.5%	7.7%
Community religious leaders	5,328	11.4%	11.3%	10.9%	10.7%	12.7%	9.1%
Someone else	1,572	3.5%	3.5%	3.6%	3.0%	3.7%	2.8%

Question 31. How would you rate your overall family readiness to handle the challenges of military life?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very ready	11,891	26.0%	24.4%	26.5%	29.1%	26.4%	29.2%
Ready	15,838	35.4%	32.9%	37.8%	36.3%	38.5%	36.6%
About an equal mix of feeling ready and unready	11,488	26.8%	27.8%	25.0%	26.7%	25.6%	26.8%
Unready	1,451	3.3%	4.2%	3.3%	2.6%	2.2%	2.7%
Very unready	880	2.4%	3.4%	2.1%	1.4%	1.3%	1.7%
Not sure	2,482	6.1%	7.3%	5.3%	3.8%	6.1%	3.0%

Question 32. Assume Don't Ask, Don't Tell is repealed. Would repeal affect your family readiness?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, it would improve my family readiness	401	1.0%	1.1%	1.0%	1.3%	0.7%	0.9%
Yes, it would reduce my family readiness	3,809	8.2%	8.4%	10.9%	6.6%	8.3%	5.5%
No, it would have no effect on my family readiness	34,179	77.2%	76.0%	70.8%	81.2%	78.3%	84.7%
Don't Know	5,654	13.5%	14.5%	17.3%	10.8%	12.7%	8.9%

Question 33. What family readiness programs would you turn to for assistance in sustaining family readiness? MARK ALL THAT APPLY.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Military One Source	18,270	48.1%	53.2%	57.8%	46.4%	38.1%	16.2%
Health Facilities	9,532	23.0%	22.6%	20.1%	24.2%	24.1%	25.3%
Deployment Support Programs	16,479	40.1%	41.1%	40.9%	40.0%	39.9%	18.2%
On-base Chapels	6,095	15.9%	16.2%	16.9%	14.0%	16.8%	12.5%
Family Support Programs	21,930	54.6%	54.9%	48.5%	54.0%	57.9%	43.8%
Work-Life/Employee Assistance Programs	5,833	14.2%	13.4%	13.7%	14.7%	13.4%	34.2%
Other	4,697	10.8%	10.3%	11.0%	11.1%	11.1%	15.2%

Question 34. How important are military family programs in supporting your overall family readiness?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Very important	9,392	23.3%	25.8%	24.7%	23.1%	18.7%	14.3%
Important	14,762	34.4%	35.0%	37.4%	32.7%	34.4%	26.7%
Neither important nor unimportant	13,526	29.7%	27.5%	27.3%	30.8%	33.7%	38.5%
Unimportant	4,176	8.2%	7.6%	6.8%	8.6%	9.0%	13.5%
Very unimportant	2,126	4.3%	4.1%	3.8%	4.7%	4.2%	7.0%

Question 35. Assume Don't Ask, Don't Tell is repealed. If the partner of a gay or lesbian Service member participated in a family support program, would it affect your participation?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes, I would participate in that family support program more often	433	1.1%	1.2%	1.0%	1.2%	1.0%	0.9%
Yes, I would participate in that family support program less often	7,019	15.2%	14.9%	19.5%	12.8%	16.5%	12.4%
No, it would not affect my participation in that family support program	32,541	75.1%	75.4%	69.9%	78.0%	73.8%	78.5%
Don't Know	4,066	8.6%	8.5%	9.6%	8.0%	8.7%	8.2%

Question 36. Please tell us if you have any other thoughts or comments about how a repeal of Don't Ask, Don't Tell would affect your family readiness. PLEASE PRINT.

This question was an open comment field.

Question 37. What is the highest degree or level of school you have completed?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
12 years or less of school, but no high school diploma, certificate, or GED	676	2.1%	2.6%	1.9%	2.0%	1.2%	0.9%
High school diploma or GED	4,563	13.3%	14.4%	15.2%	11.9%	11.6%	9.5%
Some college credit, but no degree	11,571	31.2%	31.6%	36.1%	31.3%	28.5%	28.7%
Associate's degree (e.g., AA, AS)	6,462	16.1%	16.3%	16.3%	16.0%	15.5%	16.7%
Bachelor's degree (e.g., BA, AB, BS)	13,551	25.8%	24.2%	22.2%	27.0%	29.0%	30.8%
Master's, professional, or doctorate degree (e.g., MA, MS, MD, JD, DVM, DDS, PhD)	7,242	11.6%	10.9%	8.3%	11.8%	14.2%	13.5%

Question 38. What age were you on your last birthday?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Up to 20 years old	629	2.4%	2.2%	7.1%	2.3%	1.2%	1.2%
21 to 25 years old	5,265	16.9%	15.6%	34.2%	16.4%	13.7%	12.9%
26 to 30 years old	8,078	22.2%	22.0%	24.7%	22.9%	20.9%	24.2%
31 to 35 years old	8,031	19.1%	18.7%	14.9%	20.3%	20.4%	22.6%
36 to 40 years old	7,905	16.0%	16.6%	10.5%	16.4%	16.5%	15.9%
41 years old or more	14,048	23.4%	25.0%	8.6%	21.7%	27.3%	23.2%

Question 39. Are you male or female?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Male	2,741	6.7%	6.6%	1.1%	7.0%	9.1%	4.8%
Female	41,367	93.3%	93.4%	98.9%	93.0%	90.9%	95.2%

Question 40. Do you or your spouse have any children living at home either part-time or full-time?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	33,655	76.4%	78.3%	69.9%	75.3%	76.4%	73.9%
No	10,441	23.6%	21.7%	30.1%	24.7%	23.6%	26.1%

The following questions were asked of respondents that said they had children living at home either part-time or full-time.

Question 41a. How many children do you or your spouse have, living at home either part-time or full-time, in each age group? 5 years old or younger?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
None	15,384	40.5%	42.2%	24.4%	39.1%	43.9%	38.1%
One	11,344	37.2%	36.9%	47.6%	37.6%	33.8%	38.4%
Two or three	6,742	22.0%	20.6%	27.4%	23.0%	22.0%	23.2%
Four or more	105	0.3%	0.3%	0.6%	0.4%	0.3%	0.3%

Question 41b. How many children do you or your spouse have, living at home either part-time or full-time, in each age group? 6-12 years old?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
None	17,605	53.0%	51.2%	61.8%	53.4%	52.9%	56.3%
One	9,867	29.4%	30.3%	24.3%	29.9%	29.0%	28.3%
Two or three	5,938	17.1%	17.9%	13.6%	16.3%	17.6%	14.8%
Four or more	171	0.5%	0.6%	0.3%	0.4%	0.5%	0.5%

Question 41c. How many children do you or your spouse have, living at home either part-time or full-time, in each age group? 13-17 years old?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
None	23,418	72.8%	71.3%	83.2%	73.5%	71.7%	75.2%
One	7,329	20.0%	21.0%	12.7%	19.3%	21.0%	18.5%
Two or three	2,763	7.0%	7.5%	4.0%	7.1%	7.1%	6.1%
Four or more	53	0.2%	0.2%	0.0%	0.1%	0.1%	0.2%

Question 41d. How many children do you or your spouse have, living at home either part-time or full-time, in each age group? 18 years old or older?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
None	28,012	86.3%	84.7%	94.3%	88.3%	85.2%	88.8%
One	4,073	10.1%	11.2%	4.5%	8.9%	10.9%	8.8%
Two or three	1,422	3.4%	3.9%	1.2%	2.7%	3.7%	2.4%
Four or more	44	0.2%	0.2%	0.0%	0.1%	0.2%	0.0%

The following questions were asked of all eligible respondents.

Question 42. Are you of Hispanic or Latino origin?

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
Yes	4,637	12.9%	13.7%	16.0%	13.2%	10.1%	9.9%
No	39,113	87.1%	86.3%	84.0%	86.8%	89.9%	90.1%

Question 43. What is your race? PLEASE SELECT ONE OR MORE.

	N	Overall	Army	Marine Corps	Navy	Air Force	Coast Guard
White	36,912	81.9%	80.4%	86.0%	77.8%	85.7%	91.0%
Black or African-American	3,279	12.1%	14.9%	8.4%	12.4%	8.3%	4.8%
Asian	2,292	6.0%	4.4%	5.7%	10.6%	5.9%	4.2%
Native Hawaiian or other Pacific Islander	626	1.8%	1.6%	2.1%	2.2%	1.7%	1.6%
American Indian or Alaska Native	884	2.6%	2.8%	2.7%	2.8%	2.2%	2.6%

Question 44. As the last question in the survey, we'd like you to tell us about any other thoughts or opinions you have – positive, negative, or neutral – about the implications on family readiness and support or other aspects of military life if the government decides to repeal the Don't Ask, Don't Tell law and policy. PLEASE PRINT.
