What is the TSPG?
Provide the world’s best training systems to the combat forces of today and tomorrow.
Lead the development, acquisition and sustainment effort necessary to meet every MAJCOM’s simulation and training requirement.
Air Force Modeling and Simulation Policy

The Air Force Agency for Modeling & Simulation is the AF advocate for modeling and simulation, facilitating policy, planning and funding processes to lead the implementation of new and emerging technologies in support of the warfighter.
The Future of Air Force Training
The Warfighter Research Readiness Division develops the leading edge technologies that facilitate making the warfighter’s training vision a reality while striving to stretch that vision through research into capabilities that are still just a dream.
The Next Generation of Air Force Training

The Simulator Systems Group acquires state-of-the-art training systems necessary for the warfighter to attain the skills required to operate and maintain the latest weapon systems and to expand mission rehearsal capabilities to meet the growing demands of the Air Force mission.
The Current Generation of Air Force Training
The 507th Aircraft Sustainment Squadron sustains the current inventory of training systems which are vital to the mission readiness of today’s warfighter.
Together the TSPG has the expertise to provide the warfighters, MAJCOMs, SPMs and industry with an integrated approach and single source for all training systems throughout their life cycle.
