## AVIATION FUEL

The information contained in this section summarizes USAF aviation fuel and related data on a world-wide basis.

The data as shown in Tables 1 through 9 include fuel inventories, issues, storage capacity and construction in being and authorized to increase fuel storage capacity. These tables were developed by the Directorate of Statistical Services, DCS/Comptroller with the assistance of the Fuels and Materiel Division, Directorate of Supply and Services, DCS/Materiel.

Base and terminal inventories during Fiscal Year 1952 increased in all grades of fuel with a total increase of 735,000 barrels or over 6%. Total inventory as of 30 June 1952 was 13,447,356 barrels - a 6% increase over the 30 June 1951 inventory of 12,639,571 barrels. The 30 June 1952 inventory consisted of 12,111,726 barrels on bases and terminals and 1,335,630 barrels intransit. Jet fuel comprised 30% of the total inventory as of 30 June 1952 with a 350,000 barrel or 11% increase during the year.

Issues during Fiscal Year 1952 totaled 36,114,646 barrels, a 38% increase over the Fiscal Year 1951 figure of 26,224,672 barrels. Issue by quantity of grade in order of sequence 100/130, Jet, 115/145, 91/96 and 80 was the same as Fiscal Year 1951. Though issue of grade 100/130 was greatest in quantity, issue of grades 115/145 and Jet during Fiscal Year 1952 showed a more substantial increase over Fiscal Year 1951 than did the grade 100/130.

## USAF INDUSTRIAL RESERVE

This part of the USAF Statistical Digest on the USAF Industrial Reserve includes two tables. The first table titled - "USAF Departmental Industrial Reserve", includes information on industrial facilities for which the Air Force has custody, jurisdiction and accountability. These facilities are listed in order of plant number and show the location, product and any appropriate remarks regarding the present status of the plant.

Table number 2 - "USAF Industrial Facilities Expansion of Productive Capacity and Supply", includes all facilities in the USAF Industrial Reserve - Real and Personal Property - to which the Air Force has either whole or part title. The following information is shown for each facility: floor area (sq. ft.) acquisition cost of facility; type of expansion; additional funds cumulative authorized and allocated since 30 June 1950; major product; appropriate remarks.

#### SUMMARY

The two tables in this part supplement those of the previous Statistical Digest. Table 1 shows the overall status of USAF Research and Development Funds - Fiscal Year 1948 through Fiscal Year 1952. In Table II, these figures are broken down in detail, by Command, to show the area of increase or decrease in Fiscal Years 1950 through 1952. The greatest increase of cumulative obligations, as of 30 June 1952, occurred in the Air Research and Development Command. The outstanding decrease occurred in the Air Materiel Command. At the end of Fiscal Year 1952 there was a balance of 275.9 millions of dollars in unliquidated obligations.

## FISCAL

The Fiscal area covers the major portion of tables relating to financial matters. Subjects covered are: Budget, Procurement, Bonds.

### DEFINITIONS

#### BUDGET

The Budget Section of this area reflects the funding operations of the various Air Force Appropriations and/or funds with the respective major programs for the fiscal years indicated in the title of each table. Some of the related Budget tables are to be found in other areas of the publication such as reports on Air National Guard, Reserve Forces, Mutual Defense Assistance Program, and Research and Development.

The report on Reserve Officer Training Corps does not appear as a separate table in this publication but is combined with the Reserve table in as much as the ROTC and AF Reserve Programs were merged in FY 1951 under the Reserve Personnel Requirements Appropriation in so far as pay is concerned while the Reserve procurement was abolished in other Air Force appropriations.

#### ANNUAL BUDGET AUTHORIZATION

The annual amount authorized for the purpose of executing an approved annual financial plan and which it is expected will be allocated to a Command or allotted to an installation during the fiscal year for the project covered by the authorization. The amount of the annual budget authorization is not available for obligation until the funds are allotted.

#### APPROPRIATION ACCOUNT

An account established to make amounts available for obligation and expenditure from the Treasury. (AFM 172-1).

#### APPROPRIATIONS OR CASH APPROPRIATIONS

An authorization by an act of Congress to make payments out of the Treasury for specified purposes within a prescribed amount. (AFM 172-1).

#### APPROPRIATION REIMBURSEMENT

A collection, other than an expenditure refund, for commodities work, or service furnished, or to be furnished, to an individual, firm, corporation, or federal agency, or for the benefit of other appropriations of the Department of the Air Force, which collection lawfully may be covered into the Treasury of the United States as repayment to an appropriation. (AFM 172-1).

#### BUDGET PROGRAM

The classifications of contemplated or actual obligations and expenditures by related projects within a major program; e.g. Aircraft and related Material, Electronics Equipment, etc. (AFM 172-1).

#### CONTRACT AUTHORIZATION

Statutory authorization under which contracts or other obligations may be entered into prior to appropriations for the payment of such obligations. (AFM 172-1).

#### EXPENDITURES

The amount of vouchers, or other documents (less refunds received) which have been entered in fiscal accounts as final charges against an appropriation or fund. (AFM 172-1).

#### FUND

TABLE 4 - EXPENDITURES DURING FY 1952 FROM FUNDS DIRECTLY APPROPRIATED PRIOR TO FISCAL YEAR 1950 TO UNITED STATES AIR FORCE AND AIR CORPS, ARMY

- (Notes: 1. These figures are applicable to Appropriations "Department of the Air Force, 1948", "General Expenses, USAF, 1949", and the 1948 and 1949 programs of the "Aircraft and Related Procurement" Appropriation.  
 2. These figures exclude expenditures against FY 1950 Appropriations which are shown on Table ---.  
 3. These figures exclude funds appropriated to other Army Technical Services for Support of the Air Force, but which were budgeted for, accounted for, and administered by the Army.  
 4. These figures include reimbursements.  
 5. All figures are in thousands of dollars. Figures in parenthesis indicate minus amounts.  
 6. Figures for Air Corps, Army, 1947 Appropriation, previously shown on this table, have been excluded because this appropriation "lapsed" (was no longer available for expenditure by the Air Force) as of 30 June 1951 and the unexpended balance was transferred to the "Certified Claims" account of the U.S. Treasury.)

TABLE 5 - USAF WORLD-WIDE FIRE LOSS EXPERIENCE SUMMARY - FY 1952

(The fire losses in Continental US for FY 1952, excluding aircraft fires, totaled \$2,152,502 on the basis of 1,745 reported fires and the Overseas fire losses for the same period totaled \$3,813,778 on the basis of 543 reported fires. The figures cited above represent a sharp increase when compared with comparable statistics of recent years. While the 8 major fires in Continental US as listed in Table accounted for approximately 50 percent of the monetary loss for FY 1952, and 12 major fires overseas (listed in the same table) accounted for 90 percent of the losses, the sharp increase in the number of fires is very significant and indicative of deep concern over the trend. Table below covers all installations and includes all fires to which a fire department is called, regardless of the monetary significance.)

TABLE 2 - TUITION RATES FOR MDAP FORMAL TRAINING - FY 1952

(In the accomplishment of training of foreign students under the Mutual Defense Assistance Program (MDAP), the USAF charged the MDAP - appropriated funds for specific courses of training. This charge for "tuition" was reimbursed to the regular USAF accounts, from which the expense for MDAP training was funded. The determination of the tuition rates was based on the policy directive issued by the Office of Secretary of Defense to all of the three Services. This policy was predicated on the language of the appropriation legislation.

The policy specifically excluded the pay and allowances of all military personnel from MDAP, therefore, MDAP tuition rates were developed to include those pertinent direct and indirect expenses other than military pay and allowances. The tuition rates were based on the number of entries into training and the experience factor of attrition for each course.)

MILITARY PERSONNEL

TO: ALL RECIPIENTS OF THE "USAF STATISTICAL DIGEST".

1. During the months of April, May, and June 1952 certain Aviator Engineer units were reassigned from the Department of the Army to the Department of the Air Force for budgetary purposes only. These units are scheduled for eventual reassignment during FY 53 to the Air Force as normal SCARWAF units, but during this period they remained under Army administrative, disciplinary, and training jurisdiction and remained physically at Army training stations. On 1 July 1952 they were reassigned to the Army. The troop spaces had not been previously programmed by the Air Force. Accordingly, the strengths of these units were excluded from all publications of the AF command strengths which were released during this period.

2. In order to balance with the overall Department of Defense total military strengths it is necessary that this special group of personnel be added to the published USAF totals. However, for internal use within the Air Staff, for all other than budgetary computations, the strength data as previously published should continue to be used.

3. The strength totals of this special group, for use as outlined above, are as follows:

TABLE 50- OFFICERS SELECTED FOR TEMPORARY PROMOTIONS BY FISCAL YEAR IN WHICH SELECTED --  
FY 1949 THROUGH FY 1952

(Selections made by Selection Boards do not necessarily mean actual promotions, as cancellations may be made because of resignations, etc. The table includes both regular and non regular officers. The table excludes selections of Captains for promotions accomplished through other than Selection Board actions such as those selected under AFL-36-25. Temporary promotions of Second Lieutenants to First Lieutenants are also excluded as such promotions were not accomplished by action of a Selection Board. Complete data on temporary promotion of lieutenants were not available for this publication.

TABLE 56 - COST OF TRAINING USAF MILITARY STUDENTS BY COURSE - FY 1952

(Official costs of training USAF military students were developed in accordance with the uniform principles set forth by course in the table below. The data used to develop the training costs were obtained from reports prepared under the provisions of APR 170-13. The official costs of training are set forth by career fields. The career fields are listed alphabetically, and the courses offered in each career field are listed numerically by Officer and Airman Courses. The assumption has been made that ATRC and AU bases have the single major mission of training, and consequently, the total operating costs of bases, including student pay plus major and intermediate command Headquarters costs, are chargeable against the end product, namely: student graduates. Since costs generated by students eliminated from a course represent a part of the cost of the finished product, eliminate costs are included in the total course cost figures. All costs specifically identified with a particular course or department were costed directly to the course. Other base costs were distributed on an equitable basis to the courses being conducted.)
