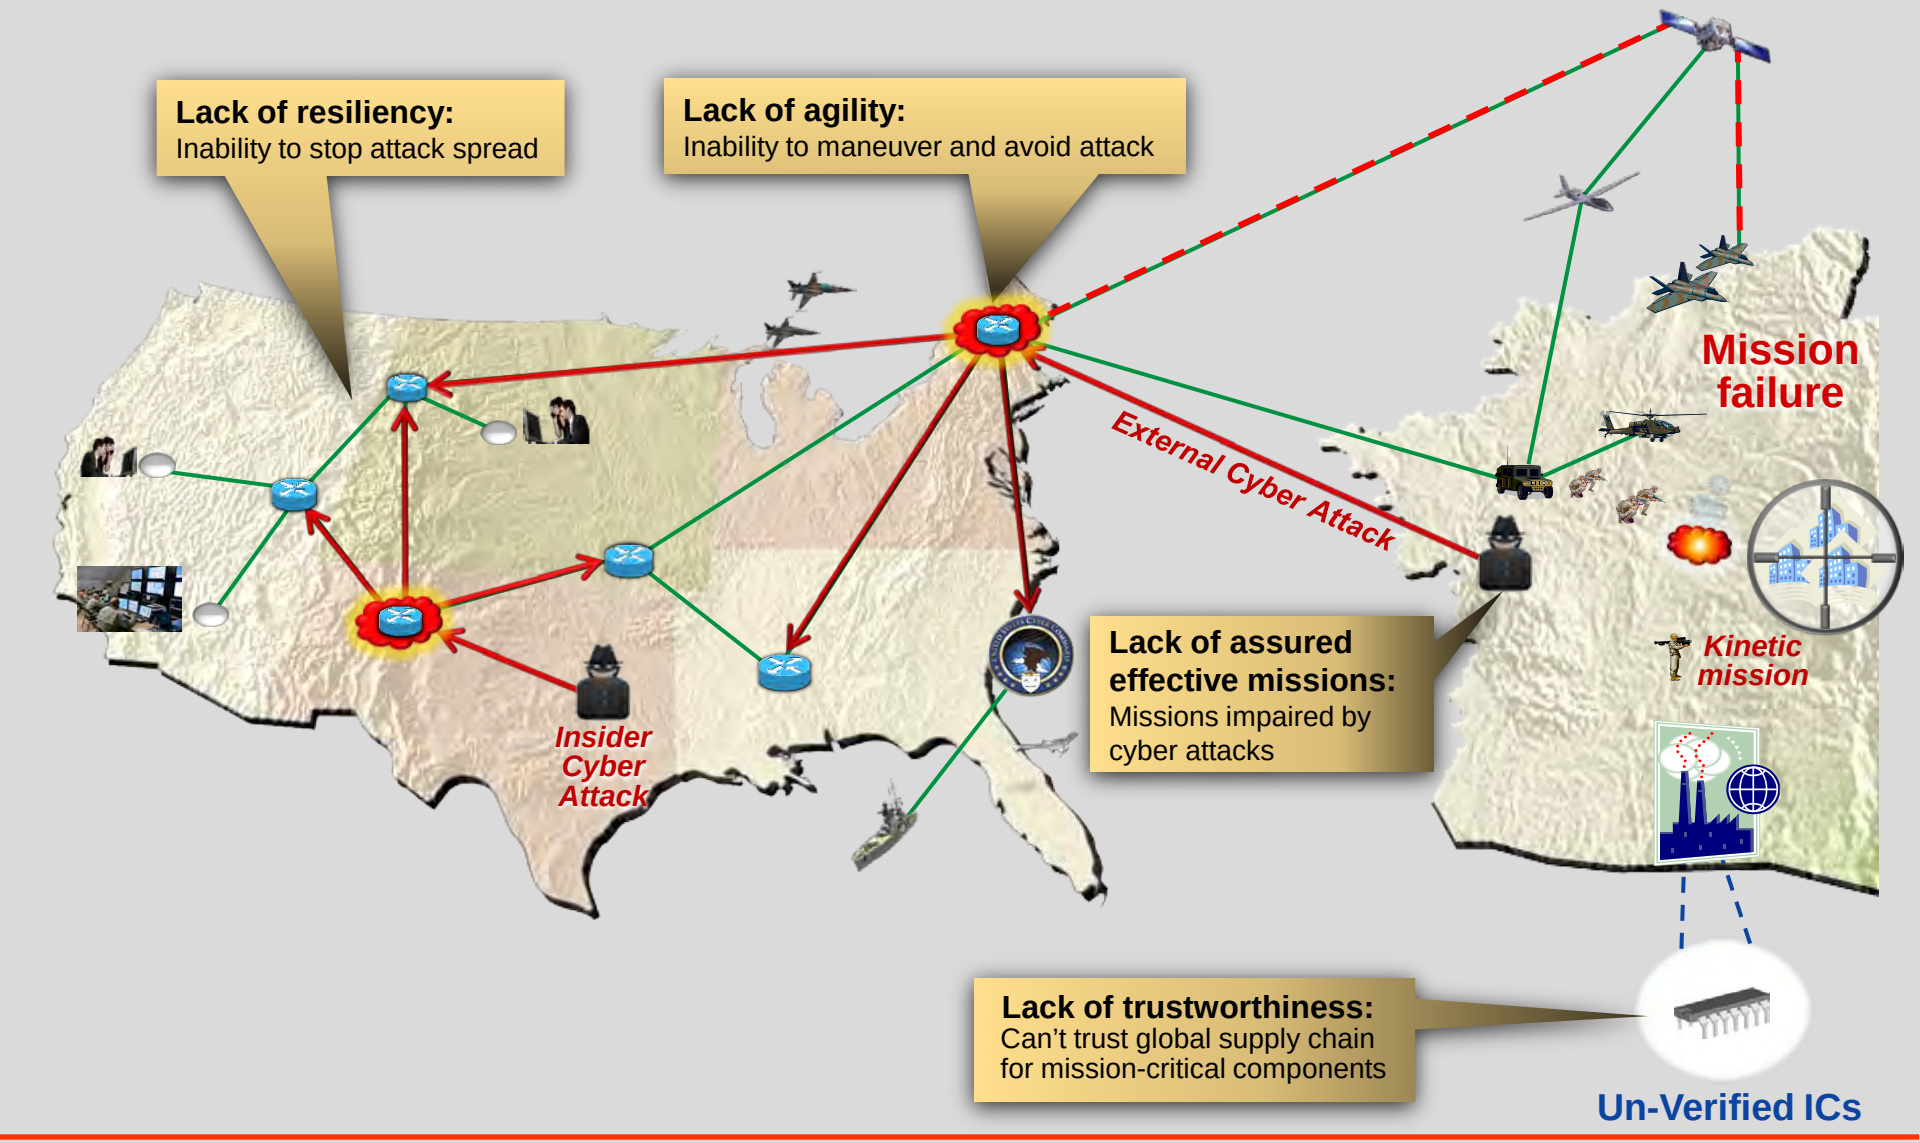
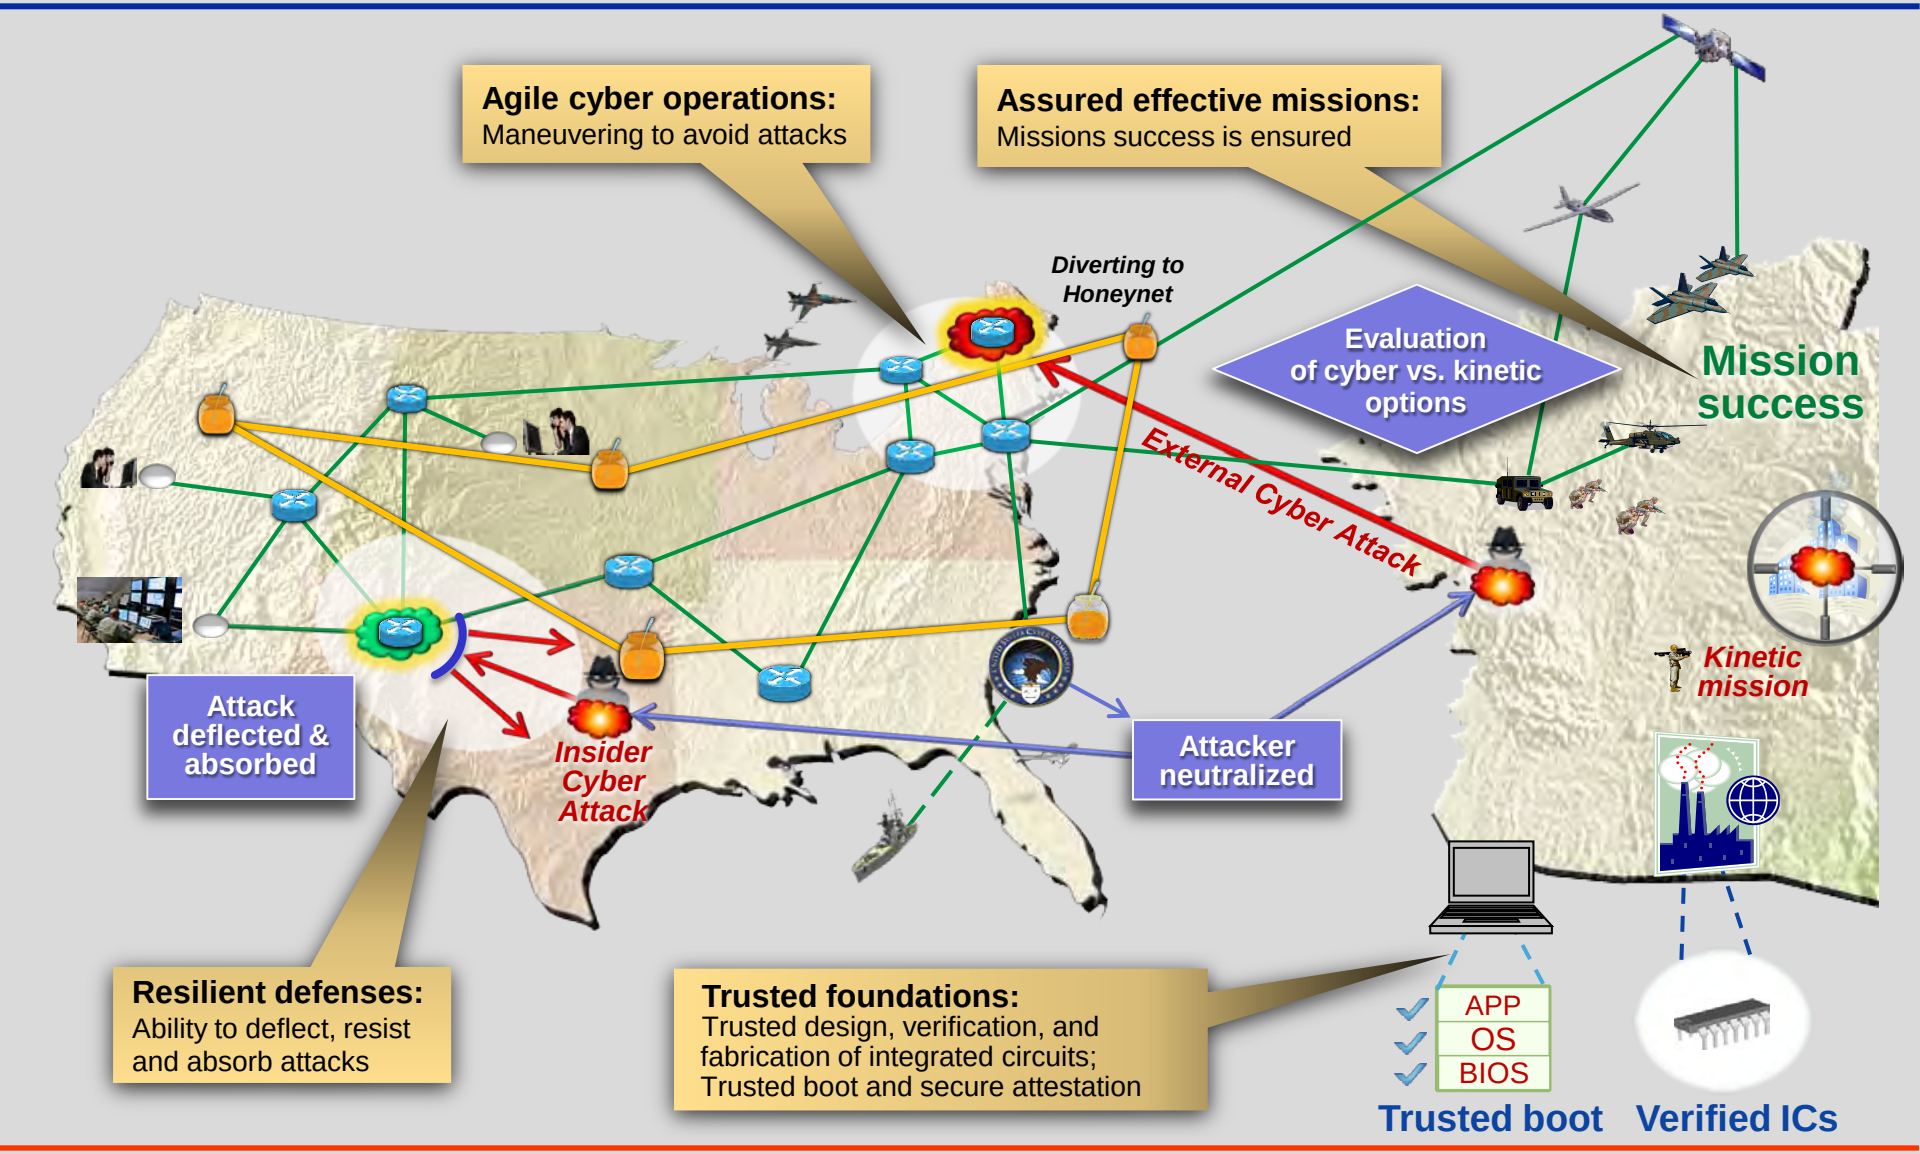
Problem Statement



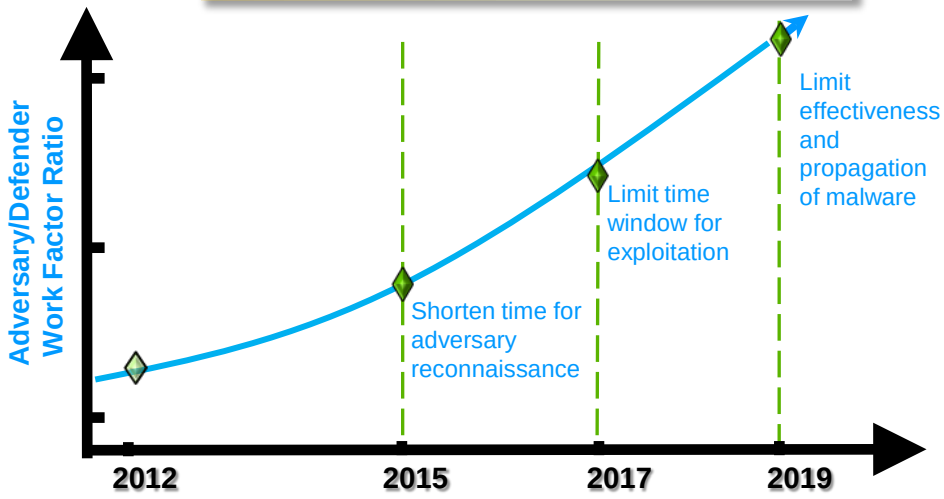
Desired End State



Key Parameter: Work Factor Ratio

- **Missions**
  - Kinetic, cyber, and combined missions will have a cyber dependency
- **Infrastructure**
  - Any element of the cyber infrastructure may be compromised and manipulated
  - DoD will continue to leverage commercial products and services we do not own or control
  - DoD infrastructure defies establishing an all-encompassing static perimeter

Challenge:
Increase Adversary / Defender Relative Work Factor Over Time



Perimeter is not well defined

Four Major 10 Year Objectives

Assuring Effective Missions	Assess and control the cyber situation in mission context
Agile Operations	Dynamically reshape cyber systems as conditions/goals change, to escape harm

Resilient Infrastructure	Withstand cyber attacks, and sustain or recover critical functions
Trust	Establish known degree of assurance that devices, networks, and cyber-dependent functions perform as expected, despite attack or error
