| Report Documentation Page  |                                    |                                     |   | Form Approved<br>OMB No. 0704-0188                  |                                 |
|--|------------------------------------|-------------------------------------|---|---|---------------------------------|
| Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. |                                    |                                     |   |   |                                 |

# Emerging Contaminants (ECs)

- Are chemicals or materials of interest that are characterized by:
  - ▶ a perceived or real threat to human health or environment, and
  - ▶ there is no currently published health standard or there is an existing health standard, but *the standard is evolving or being re-evaluated*.

Source: “Initiation of Emerging Contaminants Characterization and Response Actions for Protection of Human Health” Issue Paper (ECOS & DoD Sustainability Workgroup, 2008)

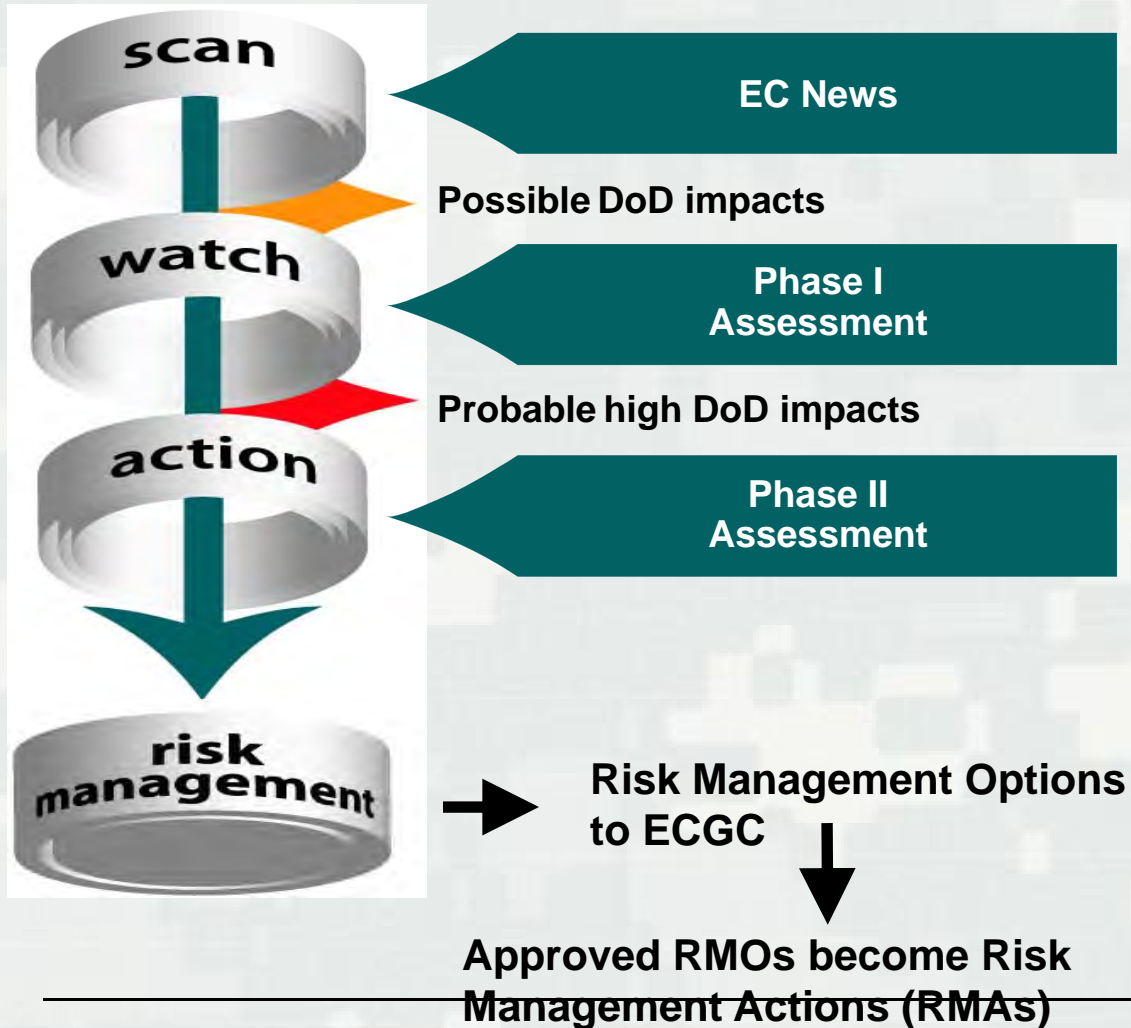

---

**BUILDING STRONG®**

# DoD's Scan, Watch, Action Process: Identifying, Prioritizing & Pursuing Risk Management

Over -the- horizon

Review literature, periodicals, regulatory communications, etc.

Monitor events; Conduct Phase I qualitative impact assessment; Manage obvious risks.

Conduct Phase II quantitative impact assessment; Develop & rank risk management options (RMOs); Implement approved RMOs; Track implementation and reduce high risks; Revisit list annually for risk reduction progress and triggers for listing

**BUILDING STRONG®**

# Trichloroethylene

## Final Sept. 2011

- Kidney cancer in workers basis of cancer toxicity values, adjusted to include liver and non-Hodgkins lymphoma
  - Mutagenic mode of action adjustment applicable only for kidney cancer
- Current drinking water regulation of 5 µg/L used for most cleanups

| Risk-Based Screening Levels* |                   |                          |
|------------------------------|-------------------|--------------------------|
|                              | Res. Water (µg/L) | Air (µg/m <sup>3</sup> ) |
| Non-Cancer Hazard of 1       | 3.4               | 2                        |
| 10 <sup>-6</sup> Cancer Risk | 0.65              | 0.59                     |

# Tetrachloroethylene

- 1998 initiated
- Nat'l Academy Review Feb 2006
- June 2008 external review version released
- If present, common source was dry cleaning facilities

| Risk-Based Screening Levels*   |                      |                          |                                    |
|--|----------------------|--------------------------|------------------------------------|
|  | Res. Soil<br>(mg/kg) | Res. Water Use<br>(µg/L) | Indoor Air<br>(µg/m <sup>3</sup> ) |
| Current  | 0.55                 | 0.11                     | 0.41                               |
| New<br>(draft '08)   | 0.293                | 0.179                    | 0.122                              |
| Sources of current toxicity values include EPA IRIS, ATSDR and CalEPA. Lowest RSL target risk = 10 <sup>-6</sup> . |                      |                          |                                    |

\*Using EPA Regional Screening Level Calculator

# Other Chemicals of DoD Interest Undergoing IRIS Reassessment

- 1,4-Dioxane
- Dioxin
- RDX
- Arsenic
- Benzo(a)pyrene
- Relative potency factors for PAHs

# Shooting Trap and Skeet as Gunnery Training Component

**BUILDING STRONG®**

**Students, Using Shotguns Specially Mounted on Turrets,  
Learn How to Operate the Turrets as they Fire at Clay Pigeons  
Released from 40-foot High Towers**  
*Photos provided by: Kingman Army Airfield Historical Society*

# Target Composition

- Clay and binder; ~30% composition is coal tar pitch especially during 1940s
  - ▶ Provided the right balance between surviving throw and shattering when hit with shot
- Less toxic and more degradable targets now being manufactured
  - ▶ Petroleum pitch, soy etc
    - PAHs ~ 75% lower in petroleum pitch than coal tar pitch

# Coal Tar Pitch

- Coal tar pitch is a complex mixture of organic compounds
- Polycyclic aromatic hydrocarbons (PAHs) chemical class of most concern due to toxicity
- Benzo(a)pyrene most studied
  - ▶ Carcinogen
- Low soil screening level; 15 µg/kg

Source: EPA Regional Screening Level

**BUILDING STRONG®**

# Investigation Strategies

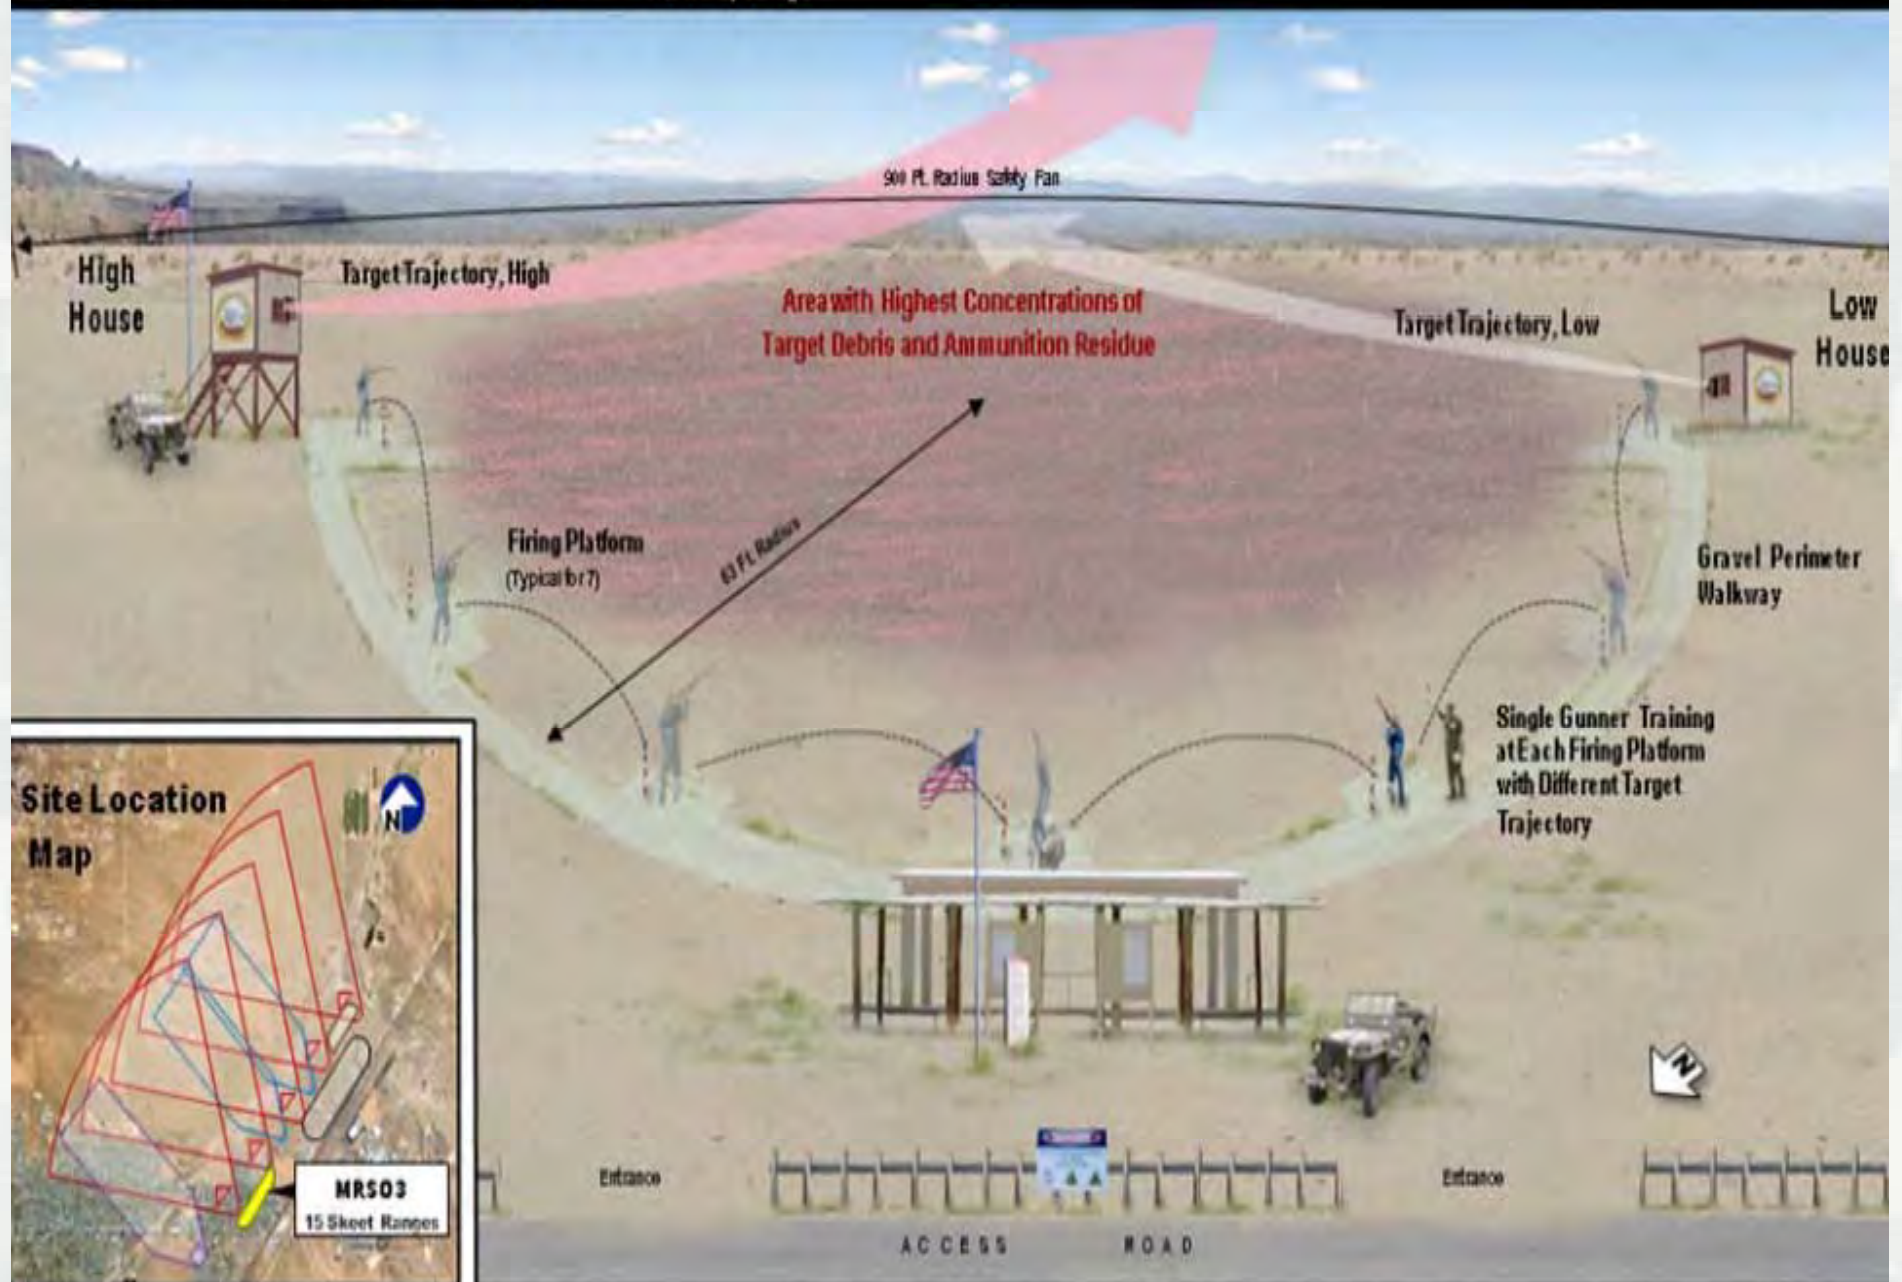

- Conceptual Site Model – consider past and subsequent site use
- PAHs in clay pigeons not highly mobile
  - ▶ Soil/sediment will be media of primary concern
- Consider ambient sources
  - ▶ Roadways
  - ▶ Runoff from surface sealant
  - ▶ Forensics may add value at some sites

# MRS03 - 15 Skeet Ranges

# Emerging Contaminant Issue

- Benzo(a)pyrene under reevaluation by EPA IRIS program
- Another EPA NCEA document:  
“Development of a Relative Potency Factor (RPF) Approach for Polycyclic Aromatic Hydrocarbon (PAH) Mixtures”
  - ▶ EPA Science Advisory Board review complete
  - ▶ RPF approach retained but updated by new data/science

# Carcinogenic PAHs and Relative Potency Factors

|                         | Current RPF | Draft RPF  | $\Delta$ |
|-------------------------|-------------|------------|----------|
| Benzo(a)pyrene          | 1           | 1          |          |
| Benz(a)anthracene       | 0.1         | 0.2        | 2x       |
| Benzo(b)fluoranthene    | 0.1         | <u>0.8</u> | 8x       |
| Benzo(k)Fluoranthene    | 0.01        | 0.03       | 3x       |
| Chrysene                | 0.001       | 0.1        | 100x     |
| Dibenz(a,h)anthracene   | 1           | 10         | 10x      |
| Indeno(1,2,3-c,d)pyrene | 0.1         | 0.07       |          |

BUILDING STRONG®

# Additional PAHs from 2010 RPF Assessment

- Anthanthrene
- Benzo[g,h,i]perylene
- Benzo[j]fluoranthene
- Cyclopenta[c,d]pyrene
- Dibenzo[a,e]fluoranthene
- Dibenzo[a,e]pyrene
- Dibenzo[a,h]pyrene
- Dibenzo[a,i]pyrene
- Dibenzo[a,l]pyrene
- Fluoranthene
- Benz[b,c]aceanthrylene
- Benz[e]aceanthrylene
- Benz[j]aceanthrylene (60x)
- Benz[l]aceanthrylene
- Cyclopenta[d,e,f]chrysene
- Naphtho[2,3-e]pyrene

# Select PAHs from Sampled Areas

# Potential Impacts

| Analyte               | High | Med  | Low | Current RSL | Draft RSL | 10 <sup>-4</sup> RSL | Bkg   |
|-----------------------|------|------|-----|-------------|-----------|----------------------|-------|
| BaP                   | 76.4 | 5.5  | 1.6 | 0.015       | 0.015     | 1.5                  | 0.014 |
| Chrysene              | 77.8 | 5.9  | 1.7 | 15          | 0.15      | 15                   | 0.012 |
| Fluoranthene          | 9.5  | 6.7  | 2.6 |             | 0.188     | 18.8                 | 0.018 |
| Benzo-(g,h,i)perylene | 64.4 | 5    | 1.5 |             | 1.67      | 167                  | 0.032 |
| Benzo(b)fluoranthene  | 128  | 11.5 | 3.3 | 0.15        | 0.019     | 1.9                  | 0.027 |

# Investigation Strategies

- Reduce uncertainty in CSM and in risk assessment; better informed decisions
  - ▶ Location/ size of fragments? Likelihood of exposure?
  - ▶ Are risk assessment assumptions valid and representative of exposure?
  - ▶ Fragment size
  - ▶ Relative bioavailability

**WARNING**  
THE INGESTION OF CLAY TARGETS BY  
LIVESTOCK OR PETS MAY RESULT IN SEVERE  
ILLNESS OR DEATH

**Are PAHs bioaccessible  
and bioavailable in  
weathered clay targets?**

---

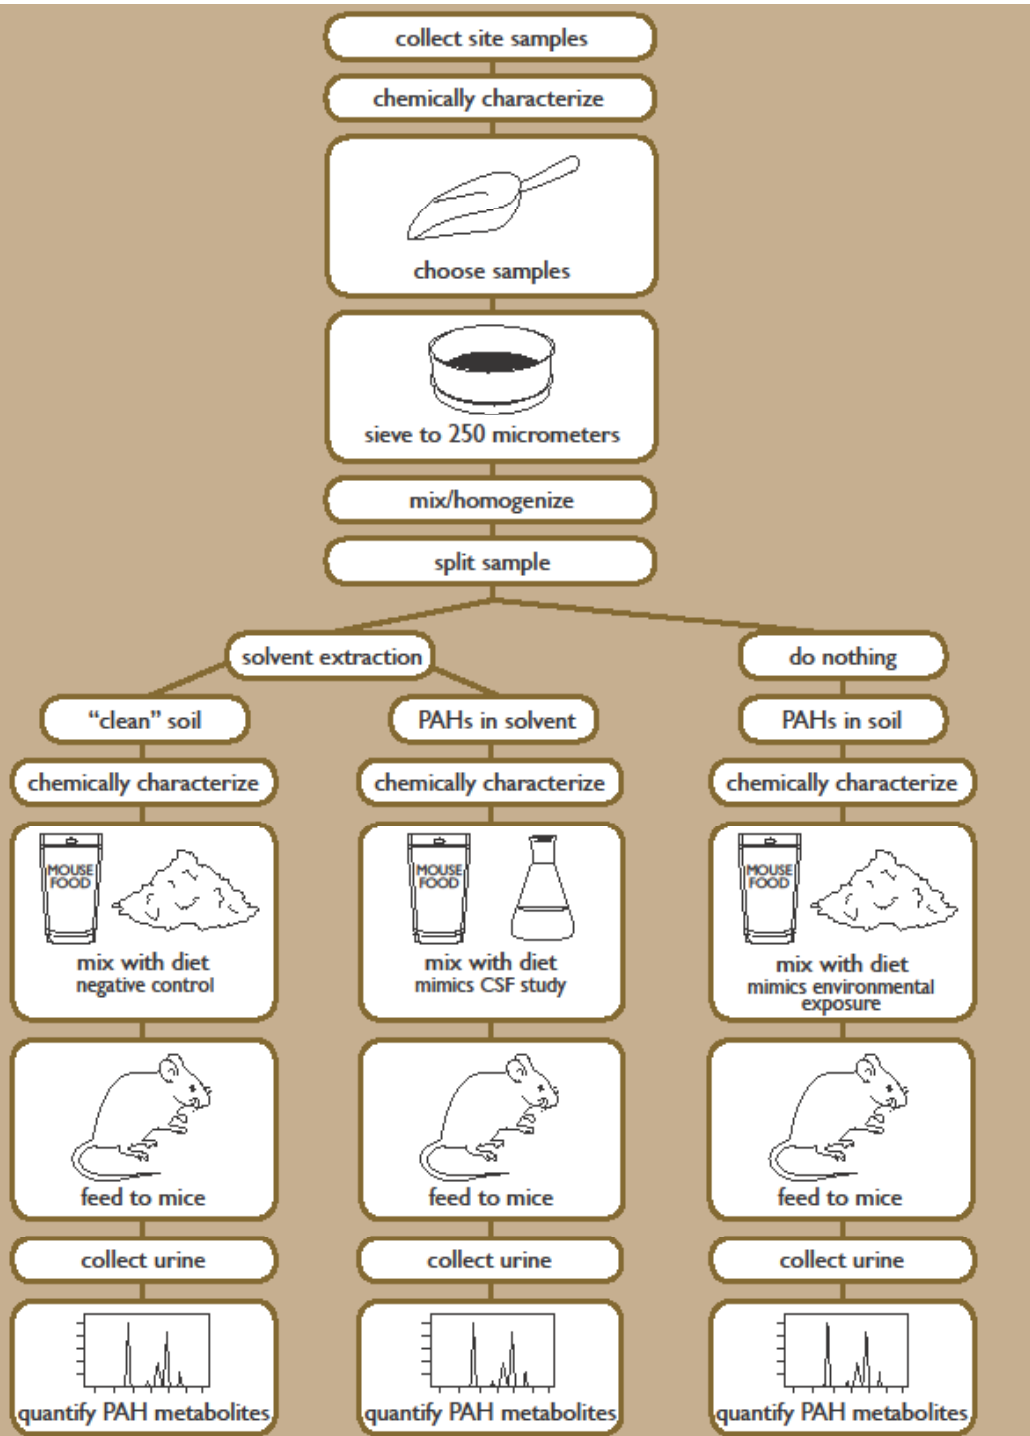

**FRAGILE AS EGGS**

**WARNING**  
THE INGESTION OF CLAY TARGETS BY  
LIVESTOCK OR PETS MAY RESULT IN SEVERE  
ILLNESS OR DEATH
