Report Documentation Page

Form Approved OMB No. 0704-0188

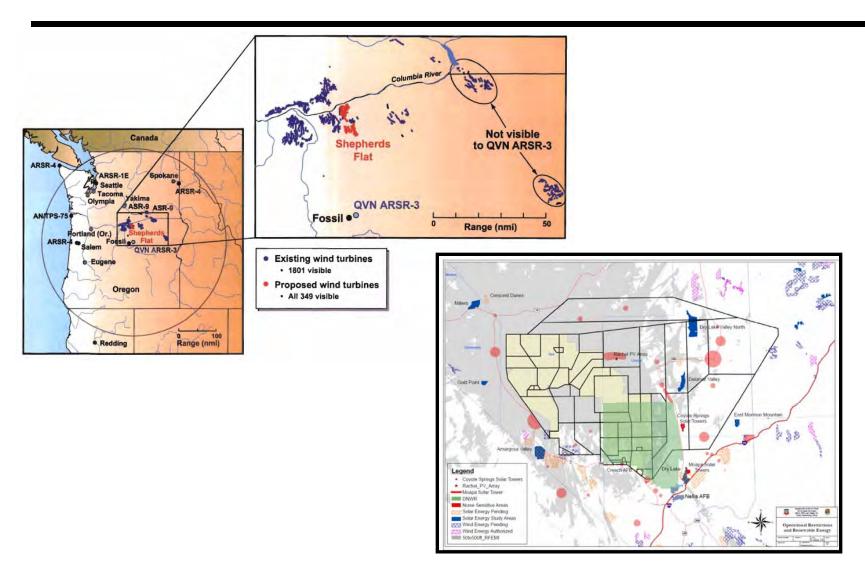

The Nexus of National Security & Renewable Energy

- Unintended Consequences
 - Rapid development of renewable technologies
 - Rapidly changing military technology research & development
- Existing Policy and Processes
 - Not up to date with changing technologies
 - Land use decision-making authorities fragmented across all levels of government

From Nellis to Shepherds Flat: Congressional Push for Action

Congressional Response – FY2011 NDAA, Section 358

- Section 358 "Study Of Effects Of New Construction Of Obstructions On Military Installations And Operations"
 - Integrated review process
 - 180-day backlog assessment
 - Identification of mitigation options
 - Comprehensive strategy for addressing military impacts of projects
 - Limited authority to object to projects
 - Ability to accept voluntary contributions for mitigation

32 CFR Part 211: Mission Compatibility Evaluation Process

- Establishes general procedures on how DoD reviews and comments on applications filed pursuant to 49 U.S.C. § 44718
- Provides information on how developers, local officials, or members of the public can engage the Clearinghouse for early consultation on projects
- Will serve as the foundation for a formal DoD Instruction
- Published in Federal Register on October 20, 2011
 - Comment period ends December 19, 2011

DoD Siting Clearinghouse— Concept of Operations

A Single DoD Voice

- Parallel Multi-Service Review
- Timely, Repeatable, Predictable
 Process
- Promote compatibility between renewable energy & military mission operations
- Oversight and coordination of mitigation negotiation
- Decisions based on empirical data and rigorous science
- Outreach & early consultation with industry, local, state, and Federal stakeholders
- NOT a replacement for OE/AAA,
 NTIA, or NEPA

DoD Siting Clearinghouse— CONOPs continued

Impact Analysis & Tools

- Projects assessed by all DoD
 Components across core
 missions
- Evaluation Criteria:
 - Green: Minor to no impact on military operations
 - Yellow: Major impact: to military operations but mitigation is possible
 - Red: Major impact to military operations that cannot be reasonably mitigated
- Mission Compatibility Awareness Tool (MCAT)
- Operational Impact Assessment Tools
- Preliminary Review: 30 days
- Final Decision: DepSecDef

| 3 x 3 Impact Analysis Matrix | | | | | | |
|------------------------------|-----------------------|---|---|--|--|--|
| | Minor or No Impact | Major Impact, Mitigation Possible | Major Impact, Mitigation NOT Possible | | | |
| Training & Readiness | | | | | | |
| LRR & Surveillance | | | | | | |
| Test & Evaluation | | | | | | |

Early Success:

- **249**: Number of projects delayed due to DoD concerns prior to passage of Section 358 in the FY2011 NDAA
- 229: Number of projects the DoD Siting Clearinghouse and DoD Components found have minor/no impact on military missions
- **20:** Number of projects that may have adverse impacts on military missions and require additional analysis to determine if mitigation is possible
- >10: gigawatts of mission-compatible renewable energy electrical generation capacity (6300+ turbines, 30 solar projects)

Model for Success

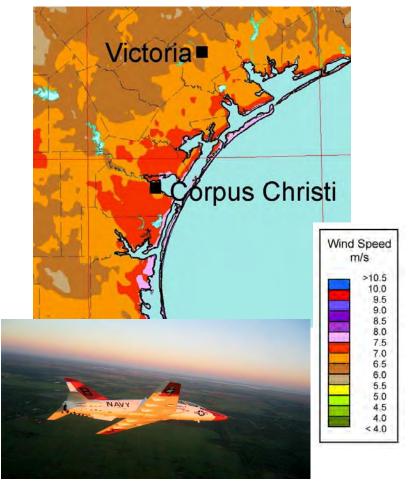

Travis AFB CRADA

- Siting of Turbines created radar tracking issues
- Cooperative Research and Development Agreement (CRADA)
- Multiple Partners including Air Force, utility provider, wind developer, and consultants, plus multiple supporting organizations
- Sensor fusion greatly reduces radar interference
- A partnership is in place to better address future

South Texas Model

- At least 6 onshore, 2 offshore projects built or proposed
- Multiple impacts on Navy radars and training
- FAA controllers and radar also impacted
- OSD and Dept of Navy team is reaching out to developers

Mitigation Response Teams

- Evaluate mitigation options for projects that were deemed to have an impact on military operations, and negotiate implementation with industry and other stakeholders
- Comprised of representatives from all affected DoD Components
- Report to the Mitigation Oversight Committee – Senior Staff from all Clearinghouse Components.

Research & Development

- Wind-Radar Interagency Field Test & Evaluation
 - Multi-agency partnership led by DOE, DoD, DHS, & FAA
 - Through MIT Lincoln Labs and Sandia National Laboratory
 - RFI Closes October 31, 2011
 - Multiple Off-The-Shelf Technologies
 - Baseline radar systems, including air traffic control and homeland defense
 - Test multiple OTS mitigation technologies
 - Tests begin April 2012
- DHS-led Radar Modeling Tool Development
 - Goal: Improve modeling of the effects of wind-turbines on radar systems
 - Focus primarily on Raytheon CARSR & ARSR-11
 - Two-year program expecting December 2012 delivery
 - 3-dimensional models for scatter, clutter and false targets.

DoD Energy Partnerships

le, Right Place light Time

Multiple Goals

- Energy Security
- National Renewable Energy Goals
- Mission Sustainability

Multiple Authorities:

- Power Purchase Agreements (PPAs)
 - Up to 30 years 10 U.S.C. § 2922a
- Enhanced Use Lease (EUL)
 - Consistent with 10 U.S.C § 2662 and 10 U.S.C § 2911
- Energy Savings Performance Contracts (ESPCs)
- Utility Energy Service Contracts (UESCs)
- Contracts signed by Services/Installations
