Welcome to the Air Mobility Command (AMC) environment management portal. This site is the AMC-level clearinghouse to environmental policies, procedures and related documentation. This is the AMC ESOH Council's standard EMS platform to support SAF/CASF Directive to implement an environmental program and reduce redundancy and LEAN processes (Jan 2001). This site also meets the Presidential Federal Mandate to implement an Environmental Management System (EMS) law Executive Order 13423. The ESOH Council, comprised of the AMC Vice Commander and Directors from the A-Staff, SE, SG, JA, and PA, establish eDASH to:

- Support and communicate EMS initiatives and the Environmental Policy Statement throughout the command
- Promote sustainability principles throughout the EMS Demonstrate implementation of command and unit EMS systems
- Satisfy requirements of Executive Orders 13423 and 13514 and the ISO 14001 environmental management standard
- Integrate ESOH tools and resources in a common location across the command
- Assist each AMC base in standing up a Wing ESOH management site (eDASH)

eDASH is built on the ISO standard to standardize environmental programs across the Command as the starting point for an integrated ESOH platform on the portal. Elements of both Safety and Occupational Health are (will be) incorporated when and where possible. The end-state of eDASH will be the Wing and MAJCOM's single source for E, S, and OH processes and information.
