

# SERDP-ESTCP Research and Development in Protective Coatings

**Bruce Sartwell**  
Weapons Systems and Platforms Program Manager

**DOD Vehicle Workshop**  
**June 15, 2010**  
**Grand Rapids, MI**

**SERDP**

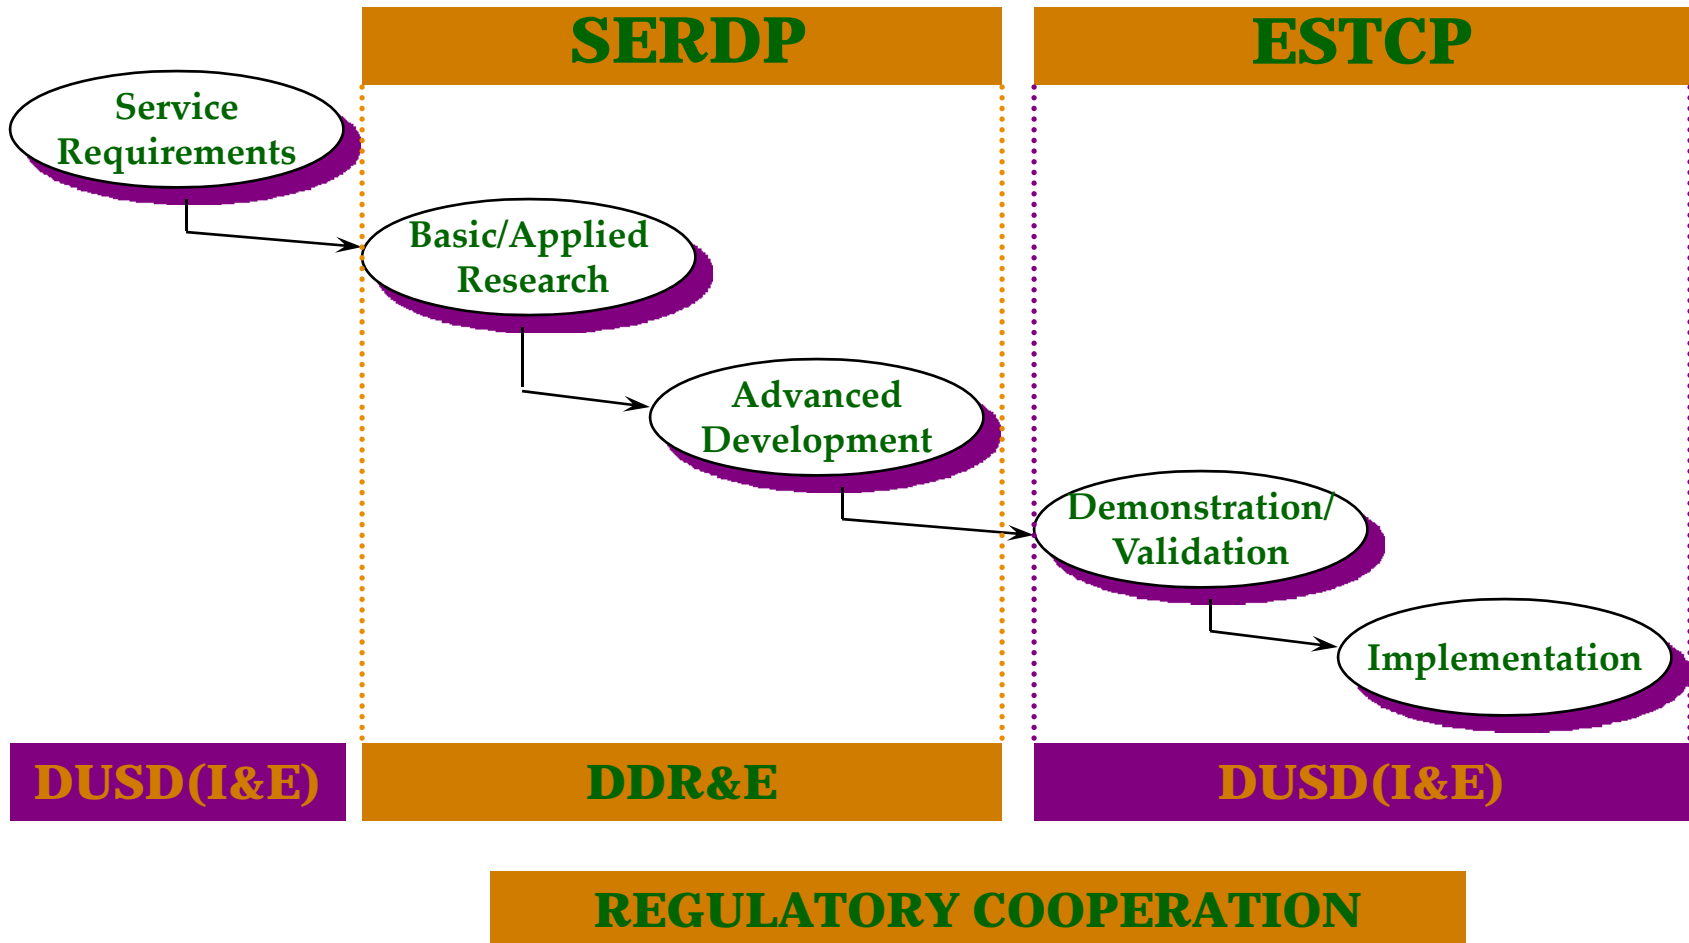

# Report Documentation Page

*Form Approved  
OMB No. 0704-0188*

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

1. REPORT DATE <b>15 JUN 2010</b>		2. REPORT TYPE		3. DATES COVERED <b>00-00-2010 to 00-00-2010</b>	
4. TITLE AND SUBTITLE <b>SERDP-ESTCP Research and Development in Protective Coatings</b>				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) <b>Strategic Environmental Research and Development Program (SERDP), Environmental Security Technology Certification Program (ESTCP), 4800 Mark Center Drive, Suite 17D08, Alexandria, VA, 22350-3605</b>				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT <b>Approved for public release; distribution unlimited</b>					
13. SUPPLEMENTARY NOTES <b>DOD Vehicle Workshop, 15-16 June 2010, Grand Rapids, MI. Sponsored by SERDP/ESTCP.</b>					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT	18. NUMBER OF PAGES	19a. NAME OF RESPONSIBLE PERSON

# Environmental Technology Development Process

# Management Process

# **SERDP Method**

- **Annual Solicitations to Meet DoD Needs**
  - ◆ **Two Solicitations**
  - ◆ **Open to All: Government, Academia, Industry**
- **Competitive Award**
  - ◆ **External Peer Review**
  - ◆ **Internal and Scientific Advisory Board Review**
- **Transition to Demonstration/Validation**

# Environmental Security Technology Certification Program

## PROGRAM GOALS

- **Demonstrate innovative cost-effective environmental technologies**
  - Capitalize on past investments
  - Transition technology out of the lab
- **Promote implementation**
  - Direct technology insertion
  - Gain regulatory acceptance

***Priority: needs of the DoD user community***

# ESTCP Method

- **Partner with stakeholders and test at DoD facilities**
  - ◆ Developer, regulators, end-user
  - ◆ Direct transition
- **Validate operational cost and performance**
  - ◆ Independent test and evaluation
  - ◆ Satisfy regulatory and user communities
- **Identify DoD market opportunities**
  - ◆ Technology transfer across federal and private sector

# Weapons Systems and Platforms

- **Manufacturing and Maintenance**
  - Green materials and processes (principally related to surface engineering technologies)
  - Control and monitoring
    - Depots, Field, Shipyards & OEM
- **Green Energetics**
  - New Materials
  - Alternative Manufacturing
- **Air and Noise Emissions**
  - Diesels and Gas Turbines
  - Weapons and Munitions
  - Ship and Industrial

**Partner with Acquisition  
and  
Maintenance Community**

# **SERDP Statements-of-Need Related to Coatings Since 2003**

## **FY2003**

- **Chromium-Free Coating Systems for DoD Applications**
- **Environmentally Acceptable Alternatives for Liquid Spray Paint Pre-Mix Components**
- **Environmentally Benign Methods for the Removal of Radar Absorbing Material Coatings**

## **FY2004**

- **Environmentally Benign Alternatives for Cadmium Plating on High Strength Steels**

# **SERDP Statements-of-Need Related to Coatings Since 2003**

## **FY2005**

- **Environmentally Benign Medium Caliber Gun Barrels**

## **FY2006**

- **Environmentally Benign Finishing/Coating Systems for DoD Substrates**

## **FY2008**

- **Environmentally Benign, High-Strength Fasteners for Weapons Systems**
- **Scientific Understanding of Non-Chromated Corrosion Inhibitors Function**

# **SERDP Statements-of-Need Related to Coatings Since 2003**

## **FY2009**

- **Dynamic Accelerated Corrosion Test Protocol**
- **Environmentally Acceptable, Direct-to-Substrate Pretreatments for Multi-Material Systems**
- **Understanding the Science Behind How Methylene Chloride/Phenolic Chemical Paint Strippers Remove Coatings**

## **FY2010**

- **Environmentally Benign, High-Performance Non-Media Paint Strippers**

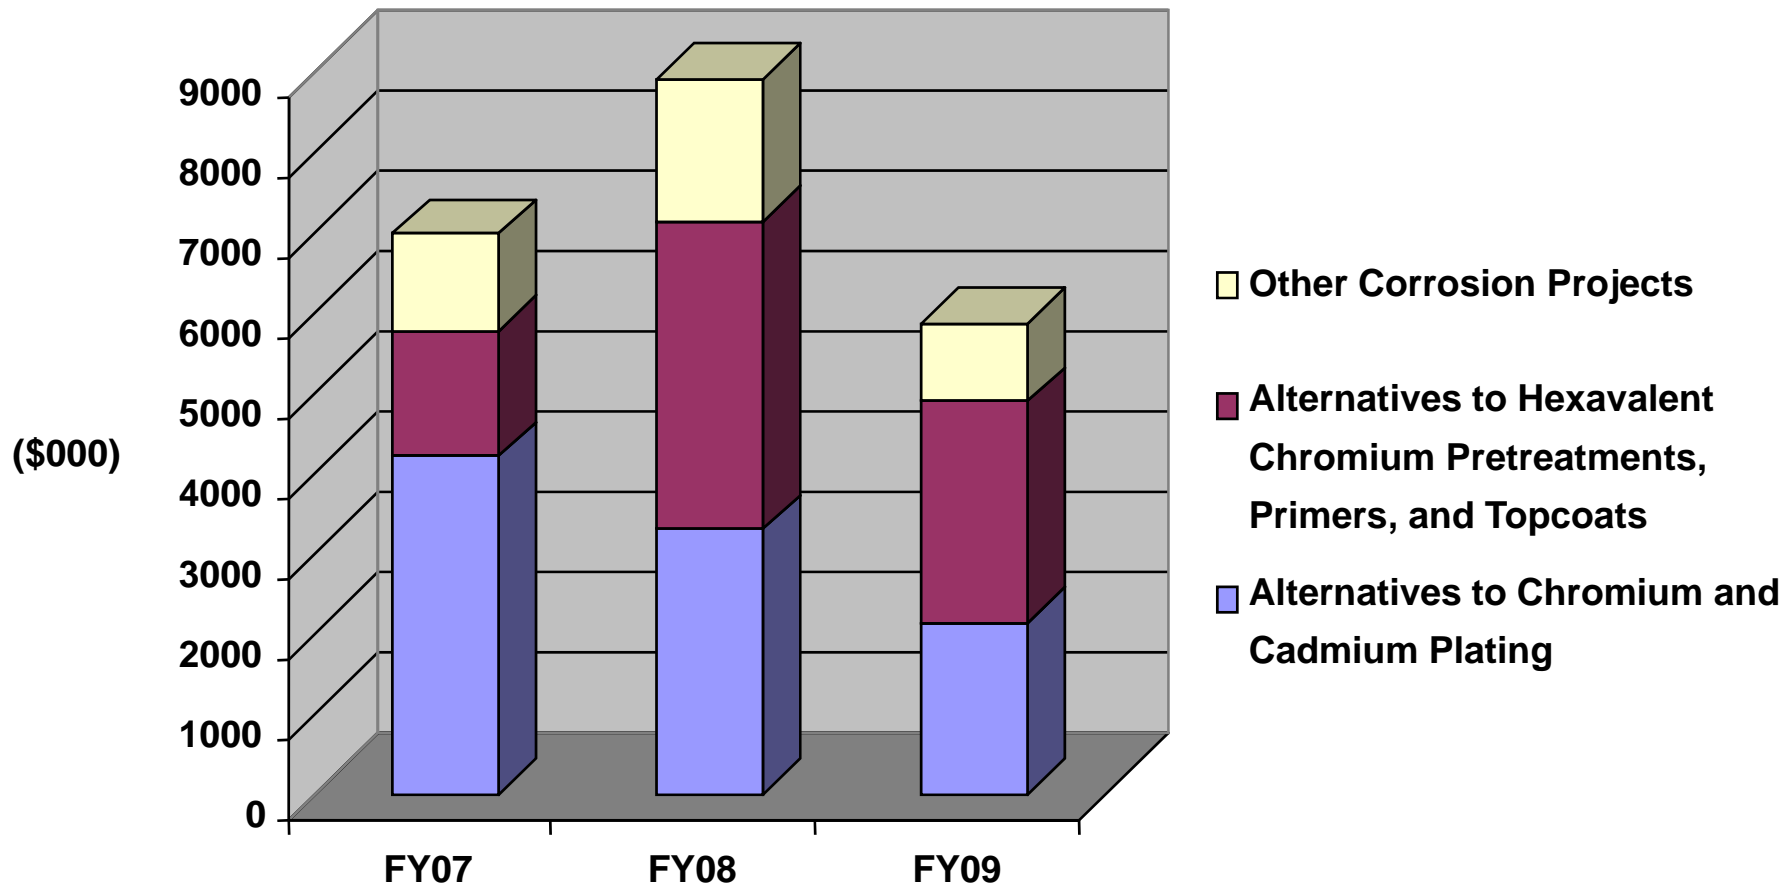

## Selected ESTCP Projects Related to Coatings

- **FY2000: *Non-chromate Aluminum Pre-treatments (NAVAIR Pax River)***
- **FY2001: *Replacement of Hard Chrome Plating on Helicopter Dynamic Components (Naval Research Lab)***
- **FY2005: *Validation of Novel Electroactive Polymers as Environmentally Compliant Coatings for Replacement of Hexavalent Chromium Pretreatments (NAVAIR China Lake)***
- **FY2006: *Supersonic Particle Deposition for Repair of Magnesium Components (Army Research Lab)***
- **FY2006: *Low Temperature Powder Coatings (Hill AFB)***
- **FY2007: *Joint DOD Demonstration and Validation of Magnesium Rich Primer Coating Technology (NAVAIR Pax River)***
- **FY2008: *Ultraviolet Curable Powder Coatings (AFRL)***
- **FY2008: *Ultraviolet Curable Coatings for Aerospace Applications (Hill AFB)***

## Selected ESTCP Projects Related to Coatings

- **FY2009: *Validation/Demonstration of Anti-Corrosion Inhibitor Primer Formulations as Replacements for Hexavalent Chromium Military Primer Coatings (NAVAIR China Lake)***
- **FY2009: *Non-Chromate, ZVOC Coatings for Steel Substrates on Army and Navy Aircraft and Ground Vehicles (Army Research Lab)***
- **FY2009: *Electrodeposition of Nanocrystalline Co-P Coatings as a Hard Chrome Plating Alternative (Naval Air Depot Jacksonville)***
- **FY2010: *Electrocoat Process for Non-Chromate Primers in DoD Manufacturing (NAVAIR Pax River)***
- **FY2010: *Self-Sealing Fastener Technology for Reduction of Hazardous Materials (NAVAIR Pax River)***

# SERDP/ESTCP Investments Related to Corrosion

**\$70M over the last 10 years**

## Qualification of HVOF Coatings on Different Types of Aircraft Components

- Separate ESTCP projects were executed for EHC replacement related to:
  - ◆ Landing Gear
  - ◆ Propeller Hub Components
  - ◆ Hydraulic Actuators
  - ◆ Gas Turbine Engine Components
  - ◆ Helicopter Dynamic Components (rotor heads, transmissions, gearboxes, etc.)
- Projects ran from 1996-2006

*HVOF Thermal Spraying of WC/17Co onto nose landing gear cylinder*

## **HVOF Implementation - Military aircraft**

- **Joint Strike Fighter (F-35) landing gear – all variants**
- **Hill Air Force Base (Ogden Air Logistics Center) putting HVOF into production on hundreds of landing gear components on various types of aircraft**
- **Boeing X-45C UCAV has some HVOF WC-CoCr coated landing gear components**
- **F-18 steering covers and shock absorber piston heads with Tribaloy 400**
- **CH-53 blade damper internal-surface coatings of Tribaloy 400 have been approved**
- **C-17 nose landing gear post: HVOF WC-Co has replaced hard chrome to prevent heat-burning**
- **F-22 convergent nozzle actuators: shafts coated with WC-Co, internal surfaces coated with Tribaloy 400 alloy.**

## HVOF Implementation – Commercial Aircraft

- **All new Canadian landing gear designs specified with HVOF WC-CoCr**
  - ◆ 4 HVOF shops set up to meet demand
- **In commercial use for**
  - ◆ Boeing 767-400
  - ◆ Boeing 787
  - ◆ Airbus A380
- **Maintenance, Repair and Overhaul**
  - ◆ Boeing has approved for thickness < 0.015”
  - ◆ Delta now using for maintenance
  - ◆ HVOF now used for repair of flap tracks

# Hexavalent Chromium Policy Memo

- **Signed by Undersecretary of Defense for Acquisition, Technology and Logistics**
- **Coordinated through the services, DDR&E, and Corrosion Prevention and Control Office**
- **Directs Military Departments to:**
  - ◆ **Invest in R&D**
  - ◆ **Ensure testing and qualification procedures funded for alternatives**
  - ◆ **Approve use of alternatives where they can perform adequately**
  - ◆ **Update technical documents and specs to authorize use of qualified alternatives**
  - ◆ **Document hex-Cr risk analyses in PESHE**
  - ◆ **Require PEO to certify required use of hex-Cr on new systems or for maintenance of legacy systems**

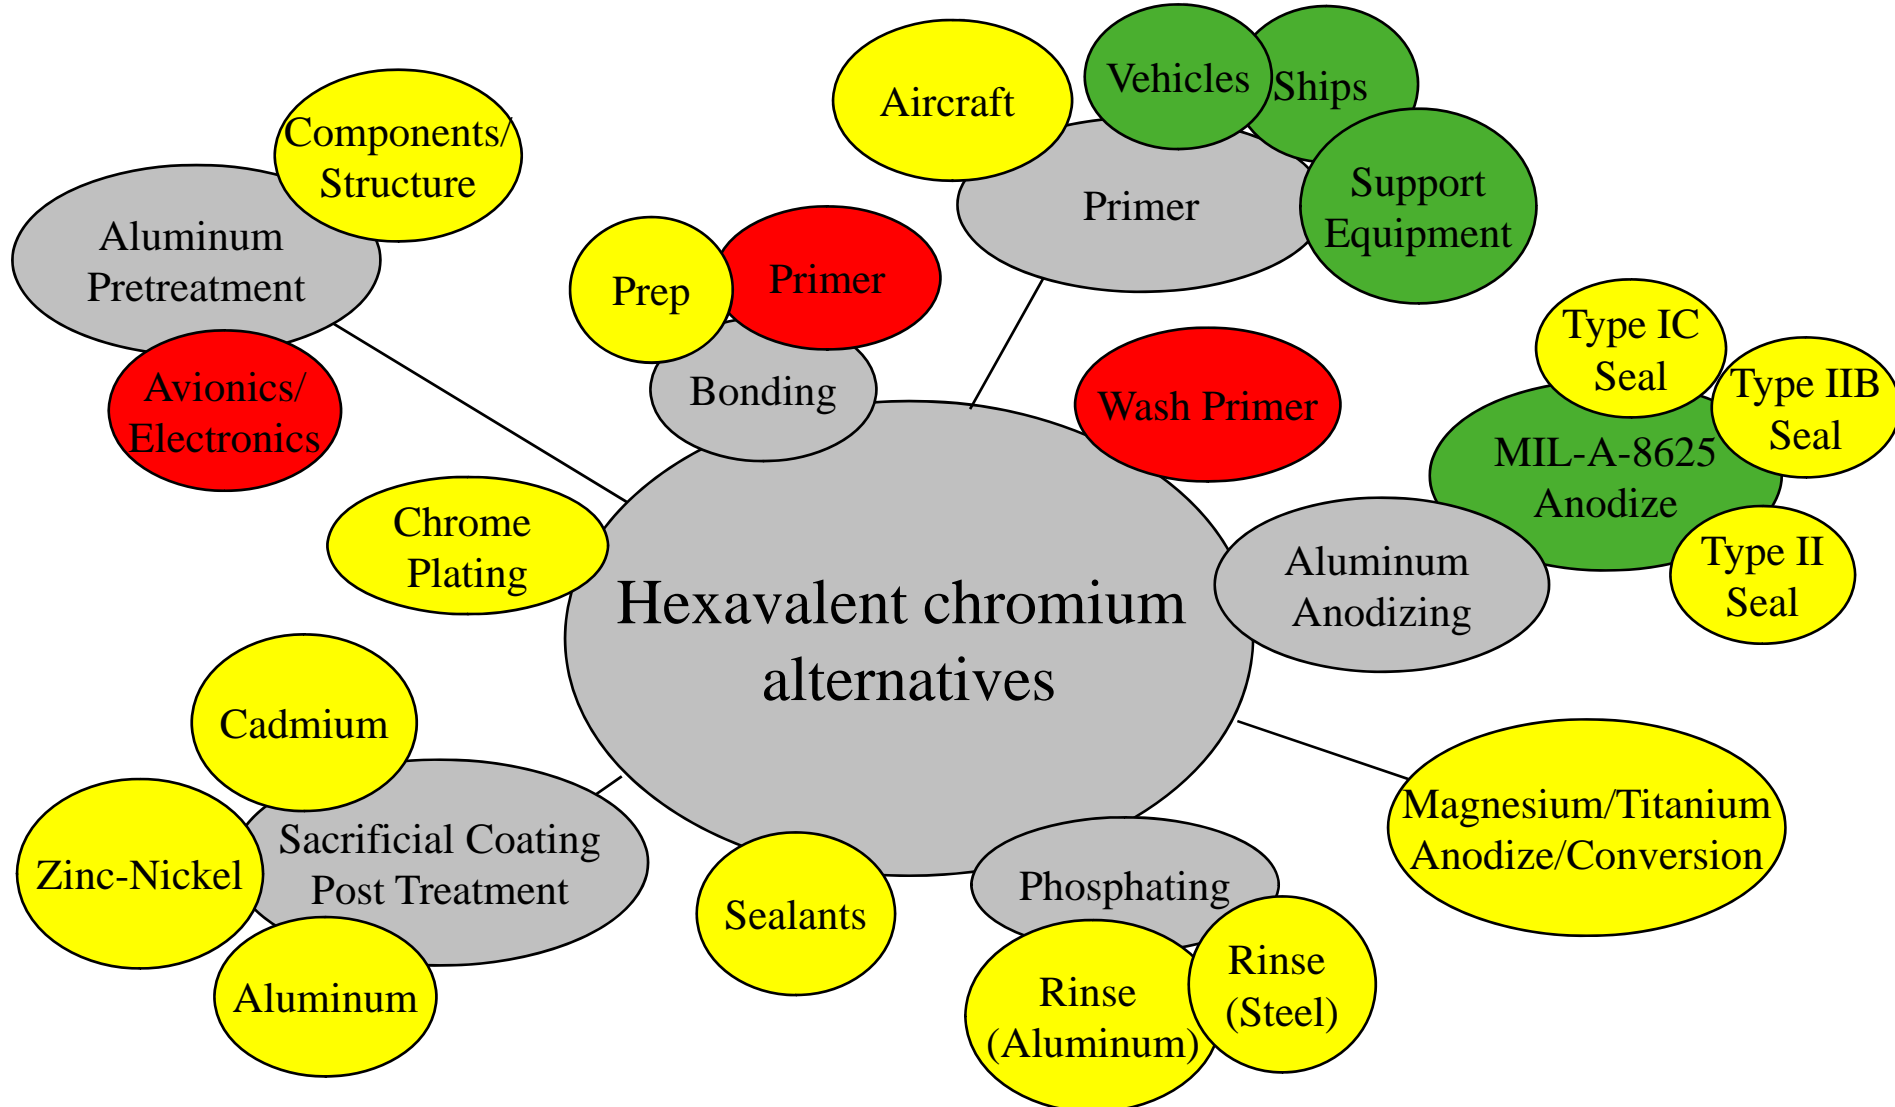

# Application Areas for Chromate Alternatives

**Green:** Alternatives implemented; niche chromate use remains

**Yellow:** Limited implementation; near-term validation

**Red:** No or very limited implementation

# Accelerated Corrosion Testing

- Qualification of alternative corrosion-resistant coating systems requires accelerated test methods that represent real-world conditions and result in same mechanisms of corrosive attack

Allan Grobin, IBM Corporation, member of ASTM Committee G-1 (corrosion-related), October 5, 1977: "The salt spray test while initially developed as a corrosion test was very quickly found not to be a corrosion test. Many of the metal plating specifications disqualified the salt spray test as a corrosion test. It is a comparative test for quality control and should not be used as an evaluator of corrosion resistance. It should not be used to compare the resistance of one type of plating against another."

In 2010, the salt spray test (ASTM B117) is still being specified in qualifying alternative coating systems

Technician loading test panels into salt-fog (salt spray) test cabinet (ASTM B117)

# Dynamic Accelerated Corrosion Test Protocol

Because qualification of alternative coating materials and processes is critical, SERDP decided to issue Statement-of-Need for development of accelerated test methodology

## Objective

- To develop an accelerated corrosion testing protocol that more accurately reflects the operational environments of Department of Defense (DoD) end users and would be acceptable across the DoD.

## Focus

- Stress new protective systems in an effort to understand how they perform compared to the standard systems that are currently in use.
- Use several material “stack-up/mock-up” geometries selected from those currently being used by the military services.
- Ability to adjust protocol to provide accurate predictive data for most operational environments, ranging from land-based ground vehicles to carrier-based aircraft.

# Example of Requirements for New Coating Implementation

- **Implementation Path**
  - ◆ Lab validation – process and product performance
  - ◆ Field validation – process and product performance
- **Implementation**
  - ◆ **Sign-Off**
    - Engineering/Materials
    - Depot/Production
    - Program: Fleet Support Team (FST)/Class Desk/OEM
  - ◆ **Revise specs (Local/MIL/AMS...)**
  - ◆ **Revise General Series and Equipment Manuals**

# SERDP/ESTCP Initiative

- Numerous surface-engineering-related projects executed by SERDP, ESTCP and other organizations to develop and evaluate new technologies that are more environmentally friendly and reduce life-cycle costs
- Problem is that stakeholders and weapons systems owners do not have ready access to data to determine if new technology can be implemented
- ASETSDefense is initiative intended to develop information data bases and organize workshops associated with technologies in the surface engineering field; web site [www.asetdefense.org](http://www.asetdefense.org) is entry point to engineering data and materials selection data bases under development

# www.asetdefense.org

The screenshot shows the ASETDefense website homepage. At the top left is the ASETDefense logo with the tagline 'ADVANCED SURFACE ENGINEERING TECHNOLOGIES FOR A SUSTAINABLE DEFENSE'. To the right is a 'VIEW MORE NEWS' button. Further right are logos for ESTCP and SERDP. A search bar is located in the top right corner. The main heading reads 'Welcome to the ASETDefense website'. Below this is a 'MAIN MENU' with several items: Surface Engineering Database, Clean Alternatives Information, ASETDefense workshops, DoD Policies, Government Regulations, Team workspaces, Tools, Assistance, News, Links, and Contact ASETDefense. The central content area features a section titled 'This site is designed to provide background information and detailed technical data on alternatives to coatings and surface treatments that are environmental or health hazards, such as:' followed by a bulleted list of examples like hexavalent chromium, cadmium, and VOCs. Below this is an 'ASETDefense' section with a paragraph describing the program's mission. To the right of the main text is a 'QUICK INFORMATION on clean alternatives' box with a list of alternatives like Cd plate alternatives, Chromate conversion alternatives, Chromated primer alternatives, Chromic acid anodize alternatives, Hard chrome plate alternatives, and Low VOC topcoat alternatives. At the bottom of the page is a 'Surface Engineering Database' section with a paragraph and a '> more details...' link.
