

# Selected Acquisition Report (SAR)

RCS: DD-A&T(Q&A)823-220

## C-130J Hercules Transport Aircraft (C-130J)

As of FY 2015 President's Budget

Defense Acquisition Management  
Information Retrieval  
(DAMIR)

## Report Documentation Page

*Form Approved*  
*OMB No. 0704-0188*

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

## Mission and Description

The C-130J Hercules Transport Aircraft (C-130J) is a medium-range, tactical airlift aircraft designed primarily for transport of cargo and personnel within a theater of operations. Variants of the C-130J perform other missions including rescue and recovery, air refueling, special operations, fire-fighting and weather reconnaissance.

The C-130J can carry more than 40,000 pounds of cargo (pallets or a varied number of wheeled vehicles) or be configured to carry up to 84 paratroopers. The enhanced cargo handling system reduces crew workload and can be quickly adapted to accommodate any combination of passenger, cargo or aero-medical airlift missions. Two primary methods of aerial delivery are used for equipment delivery: parachutes pulling the load from the aircraft; and the Container Delivery System that uses the force of gravity to pull supplies from the aircraft. The C-130J can also operate from austere landing zones with as little as 3,000 feet of dirt runway.

A stretched version of the C-130J offers aircrews 55 feet of cargo compartment length. The additional 15 feet in length over previous versions of the C-130 translates into 30% more useable volume for increased seating, litters, pallets or airdrop platforms thus providing a significant advantage in the reduction of sorties necessary for mission completion. The C-130J offers a greater value when compared to any other tactical airlifter.

## Executive Summary

The C-130J Program Office continued to support warfighter requirements worldwide. Program Office efforts included continued management of all United States Government (USG) C-130J variant aircraft production and initial sparing, several USG specific modification programs, management of multiple FMS cases and an international development program for block upgrades for the C-130J fleet.

Lockheed Martin (LM) delivered a total of 23 aircraft in Calendar Year (CY) 2013 to USG and FMS customers. Thirteen USG and five FMS C-130J aircraft are estimated for delivery in CY 2014.

In an effort to combat suspect counterfeit parts, the C-130J Program Office and LM established new monitoring and tracking processes of fielded Line Replaceable Units.

All United States Air Force (USAF) C-130J units transitioned to a new maintenance system: Data Transfer and Diagnostics Systems (DTADS) in July 2013. DTADS enabled the elimination of on-site contractor support, which is still required for the legacy maintenance system. The C-130J Program Office put LM on contract in March 2013 to upgrade the DTADS software from Windows XP to Windows 7 which is currently scheduled to be fielded in September 2014.

The Army-led and funded, High Speed Container Delivery System (HSCDS) Joint Concept Technology Demonstration program successfully completed an operational demonstration in September 2013. The HSCDS expands the C-130J airdrop performance envelope and reduces the altitude required for airdrops. This effort supports the rapid fielding of a new capability to accurately deliver up to 16,000 pounds of supplies in one drop while reducing exposure to threats. The full capability was released in March 2014.

The final active USAF C-130J was delivered to Dyess Air Force Base, Texas in July 2013, officially standing up the first full Combat Delivery Wing. Air Mobility Command declared the C-130J weapon system Fully Operationally Capable in August 2013.

International Collaborative Block Upgrade (BU) Programs:

The C-130J International Program Office continues to execute the seven-nation collaborative, cost sharing development of C-130J BU 7.0 and 8.1. The BU 7.0 program brings the war fighter new and improved capability requirements with emphasis on a new Flight Management System and Link 16. This effort maintains access to global airspace, enhances navigational accuracy and aircrew situational awareness, and increases overall operational effectiveness. The BU 7.0 program completed Functional Qualification Testing in August 2013. BU 7.0 common core completion is now estimated for May 2014.

The BU 8.1 program incorporates ten new capabilities with emphasis on the Civil Data Link, Automatic Dependent Surveillance Broadcast-Out, and Identification Friend or Foe Transponder Mode-5. The BU 8.1 program successfully conducted Critical Design Review on July 31, 2013. BU 8.1 common core completion is now estimated for April 2016.

There are no significant software-related issues with the program at this time.

## Foreign Military Sales

Country	Date of Sale	Quantity	Total Cost \$M	Memo
India	12/27/2013	6	1011.6	FMS Case IN-D-SAD
Saudi Arabia	2/6/2013	2	202.8	FMS Case SR-D-SAQ
Norway	7/20/2012	1	122.8	FMS Case NO-D-SAG To replace diverted USAF aircraft. Delivery slated for Air Mobility Command in CY 2015.
Norway	11/24/2011	0	30.5	FMS Case NO-D-QAQ. Capability upgrades only.
Australia	4/13/2010	0	30.5	FMS Case AT-D-QAB. Capability upgrades only.
Israel	3/25/2010	6	322.7	FMS Case IS-D-SAD Denotes 4 full aircraft + long lead for 2 aircraft.
Italy	12/1/2009	0	61.1	FMS Case IT-D-QAB. Capability upgrades only.
Denmark	4/22/2009	0	16.2	FMS Case DE-D-QOH. Capability upgrades only.
Iraq	9/14/2008	6	700.6	FMS Cases IQ-D-SAB, IQ-D-QAO, IQ-D-QAP, G8-D-QAB
India	1/31/2008	6	962.5	FMS Case IN-D-SAA
Norway	6/29/2007	4	491.3	FMS Case NO-D-SAF Amendment 5 signed on July 19, 2012 (drawdown) for closure, Period of Performance ended June 16, 2012.

The C-130J program office continues to manage multiple FMS cases worth \$3.9B on behalf of 8 countries. Production/delivery/retrofit/sustainment activities continue for India, Iraq, Israel, Norway, and the Joint Country Cooperative Effort (JCCE) nations.

On October 1, 2013, a Letter of Offer and Acceptance Amendment #3 under case IS-D-SAD for Israel was signed. This amendment provided authorization and funding to procure full aircraft #4 and Long Lead Advance Procurement for Aircraft #5 and Aircraft #6. The contract option was exercised on November 27, 2013 for full Aircraft #4 and Long Lead Advance Procurement for Aircraft #5 and #6. The aircraft are scheduled for 4th Quarter CY 2015 (AC #4), 2nd Quarter CY 2016 (AC#5) and 3rd Quarter CY 2016 (AC#6).

The second India case, recently signed, has evolved since its inception. First envisioned as an additional six aircraft amended to the previous case, it is now an independent entity. The Indian Air Force will now stand up a new C-130J squadron at Air Force Station (AFS) Panagarh in West Bengal, located approximately 120 kilometers northwest of Kolkata (previously Calcutta). IN-D-SAD will provision the logistical footprint as well. Lockheed Martin will be contracted to construct the facilities. AFS Panagarh currently serves as an ammo storage facility and shares its runway with the Panagarh civil airport. Soon, it will also become the home of 80,000 Army troops of the newly formed 14 Corps.

The FMS cases with Denmark, Australia, Italy, and Norway are for capability upgrades as part of the JCCE only and do not procure aircraft.

## Contracts

### Appropriation: RDT&E

Contract Name	<b>C-130J - BUIC: B1k 8.1</b>
Contractor	Lockheed Martin
Contractor Location	86 South Cobb Drive Marietta, GA 30063-0001
Contract Number, Type	FA8625-04-D-6452/7, CPAF
Award Date	November 18, 2011
Definitization Date	November 18, 2011

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price at Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
166.7	N/A	N/A	160.4	N/A	N/A	166.6	180.7

### Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the test venue change from Edwards Air Force Base to Marietta.

Variance	Cost Variance	Schedule Variance
Cumulative Variances To Date (11/30/2013)	+2.2	-2.9
Previous Cumulative Variances	+2.1	-1.4
Net Change	+0.1	-1.5

### Cost and Schedule Variance Explanations

The favorable net change in the cost variance is due to underruns in the airframe and air vehicle applications work breakdown structure elements.

The unfavorable net change in the schedule variance is due to staffing constraints and supplier challenges in the airframe and air vehicle applications work breakdown structure elements.

**Appropriation: Procurement**

Contract Name	<b>C-130J FYOC III</b>
Contractor	Lockheed Martin
Contractor Location	86 South Cobb Drive Marietta, GA 39963-0290
Contract Number, Type	FA8625-06-C-6456, FFP
Award Date	February 01, 2006
Definitization Date	February 01, 2006

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price at Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
8.5	N/A	N/A	2849.0	N/A	42	2849.0	2849.0

**Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the purchase of aircraft and other contract modifications. The initial contract price reflects only the award of the basic contract for engineering and logistics support.

**Cost and Schedule Variance Explanations**

Cost and Schedule Variance reporting is not required on this FFP contract.

**Appropriation: Procurement**

Contract Name	<b>C-130J FYOC IV</b>
Contractor	Lockheed Martin
Contractor Location	86 South Cobb Drive Marietta, GA 39963-0290
Contract Number, Type	FA8625-11-C-6597, FFP
Award Date	March 16, 2011
Definitization Date	March 16, 2011

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price at Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
6.4	N/A	0	117.6	N/A	1	117.6	117.6

**Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the addition of one FY 2012 funded aircraft buy and support. The initial contract price reflects only the award of the basic contract for engineering and logistics support.

**Cost and Schedule Variance Explanations**

Cost and Schedule Variance reporting is not required on this FFP contract.

**Appropriation: Procurement**

**Cost and Schedule Variance Explanations**

None

**General Contract Variance Explanation**

Cost and Schedule Variance reporting has been waived on this FPIF contract.

**Contract Comments**

This is the first time this contract is being reported.

\$50.762M of FY 2013 Advance Procurement funds were obligated in December 2013 for six FY 2014 C-130J-30 on Contract FA8625-14-C-6450. Target Costs/Prices will be established upon definitization. A Multi-Year Procurement was approved on the FY 2014 Appropriation. This contract will implement the FY 2014-2018 buys.

## Deliveries and Expenditures

The above data is current as of 3/21/2014.

## Operating and Support Cost

### C-130J

#### Assumptions and Ground Rules

##### Cost Estimate Reference:

The information for O&S costs are based on the 2013 Program Office Estimate (POE) completed by the Air Force Life Cycle Management Center / Cost Staff (AFLCMC/FZC).

##### Sustainment Strategy:

The O&S costs are based on an estimated fleet of 168 C-130J aircraft. This bottoms-up estimate covers FY 2000 through FY 2053, assuming a 30 year life span. Average annual cost per aircraft is determined by dividing the base year 1996 total for each cost category by 30 years and 168 aircraft.

##### Antecedent Information:

Average annual cost per aircraft is determined by dividing the base year 1996 total for each cost category by 30 years and 168 aircraft. C-130H1/H2 costs are from the AFTOC database.

Unitized O&S Costs BY1996 \$M		
Cost Element	C-130J Avg Annual Cost per Aircraft	C-130H1 & H2 (Antecedent) Avg Annual Cost per Aircraft
Unit-Level Manpower	2.902	2.969
Unit Operations	1.124	1.115
Maintenance	1.191	1.866
Sustaining Support	0.201	0.035
Continuing System Improvements	0.086	0.001
Indirect Support	0.194	0.282
Other	0.000	0.000
<b>Total</b>	<b>5.698</b>	<b>6.268</b>

##### Unitized Cost Comments:

The unitized cost multiplied by the quantity (168) multiplied by the service life (30 yrs) equals the Total O&S cost in BY\$.
