NINTH EDITION

FOR OFFICIAL USE ONLY

FOREWORD

This is the ninth edition of the USAF Summary. Its coverage has been greatly expanded to include a number of tables from the now defunct USAF STATISTICAL DIGEST, a glossary, charts and observations concerning the tabulated data, an abridged version of the Program Element Monitor Directory, etc.

The present edition consists of some 85 tables which generally track activity for the period FY 1976 to the present. Whenever possible, documentation is provided regarding data sources and a point-of-contact is given.

The present volume represents AF/ACM's response to comments received from the field last year, when a survey of STATISTICAL DIGEST and USAF SUMMARY users was made. And it is only the beginning! Plans include development of more in-depth analyses and periodic publication updates during the fiscal year to keep the field abreast of significant changes.

In order to assure the day-to-day usefulness of this management tool, it is imperative that an open communication channel be maintained between the SUMMARY publishers and users. Please let us hear from you.

TABLE 12

COMMENTS:CONSUMER PRICE INDEX

The Consumer Price Index (CPI) is a measure of the change in prices over time in a fixed market basket of goods and services. In January 1978, the Bureau of Labor Statistics (BLS) began publishing two CPI's: a new CPI-U and a revised CPI-W.

The new CPI for all Urban Consumers (CPI-U) covers approximately 80% of the civilian population.

The revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) represents about half of the population covered by the CPI-U.

The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force.

Composition of the two CPI's is as follows:

<u>Commodity Group</u>	Relative Importance (As of Dec 77)	
	<u>CPI-U</u>	<u>CPI-W</u>
Food & beverages	18.814	20.481
Housing	43.908	40.679
Apparel and upkeep	5.800	5.836
Transportation	18.028	20.234
Medical Care	4.969	4.492
Entertainment	4.086	3.910
Other goods & services	4.395	4.367

Note: Weightings are established by proportion of personal income spent on each group.

TABLE 27 (Cont'd)

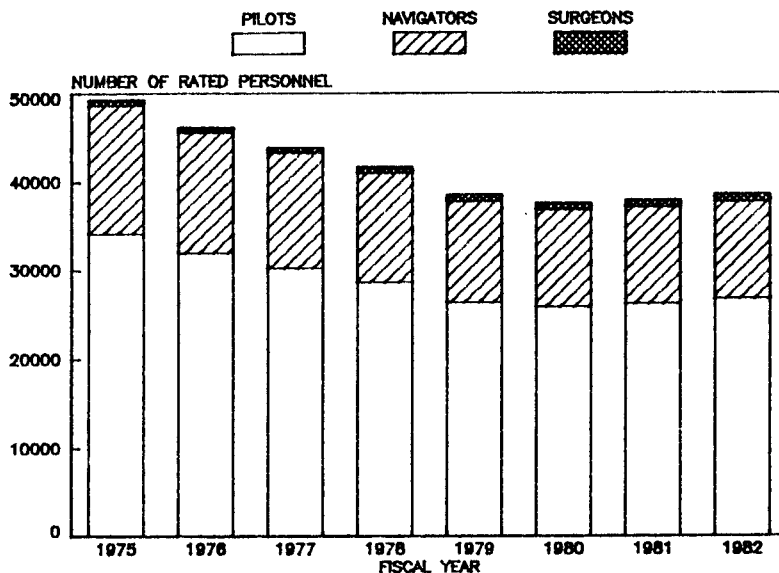

USAF ACTIVE DUTY RATED POPULATION ON FLYING STATUS AND PILOT/NAVIGATOR
TRAINEES BY GRADE: FY75-FY82

ANALYSIS

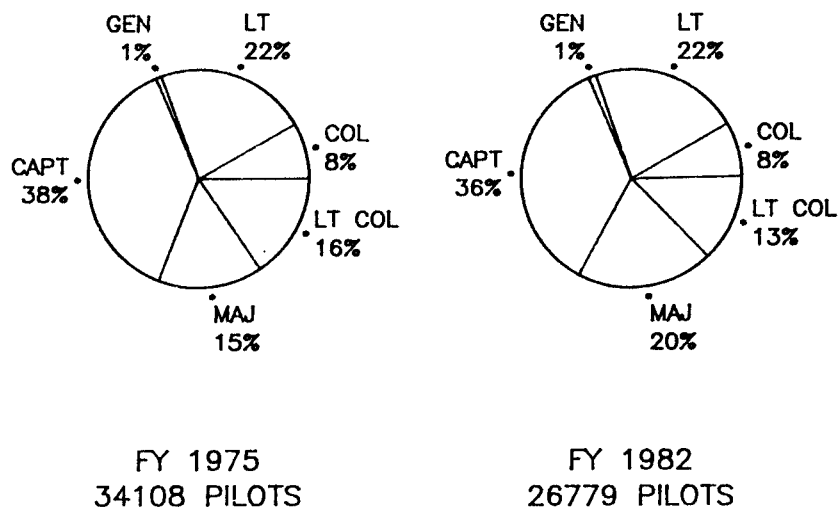

The rated population decreased 23% from FY75 through FY82. This included a 23% decrease in the pilot inventory and 25% decrease in the navigator inventory. The overall decrease reflects both a drawdown from the SEA conflict and a transfer of aircraft from the Active Forces to the Air Force Reserve and the Air National Guard. These two factors decreased the rated requirement which in turn decreased the rated inventory. With the exception of the flight surgeon, approximately 60% of the rated force consists of captains and lieutenants. This reflects the Air Force promotion policy of a captain remaining in grade generally for 7-8 years as well as the typical flying squadron manning consisting of a large number of captains and lieutenants. (Note: Colonels and Generals, while rated, are not included in the Rated Distribution and Training Management flying inventory.)

The number of pilots and navigators increased following a low in FY79. This reflects an increase in undergraduate pilot and navigator training to compensate for the severe loss of captains in the 6-11 year group which occurred in the late 70's. This loss caused rated requirements to exceed the rated inventory. FY81 represents the turnaround year in which the increased training began to narrow the deficit. In the near future the rated inventory should remain stable, with continued increases in the numbers of captains and lieutenants. The navigator deficits should disappear prior to the pilot shortage which is projected to remain throughout the present decade.

TABLE 29 (Cont'd)

ANALYSIS:

The general analysis and comments for Table 27 apply also to this table. Of specific interest concerning the above data is the fact that approximately 60% of the pilots and navigators are under 35 years of age, reflecting Air Force manning policy of filling the cockpit with junior officers. Of equal interest is the 40% decrease in the 25-29 age group from FY76 to FY81, as opposed to the 18% decrease for the total inventory during the same period. This decrease reflects the dramatic decline within the 6-11 year group during the late 70's. The increase in the 20-24 age group beginning in FY80 reflects increased undergraduate pilot and navigator training to compensate for this loss. Future projections indicate a continued increase in the younger age groups, as the Air Force recovers from this low.

RATIO OF RATED PERSONNEL RECEIVING INCENTIVE PAY TO THOSE ACTUALLY FLYING

COMMENTS:

1. In the top chart the number of navigators who are generals or colonels is too small to show up on the chart.
2. The data for navigators who are generals or colonels is not shown in the bottom chart since the ratio is much higher than the other data, starting at 146 to 1 in 1976 and dropping to 21 to 1 in 1982.

AIR FORCE SELECTED ACQUISITION REPORT (SAR) PROGRAMS
OUTYEAR VS PRIOR YEAR FUNDING (THEN-YEAR \$)

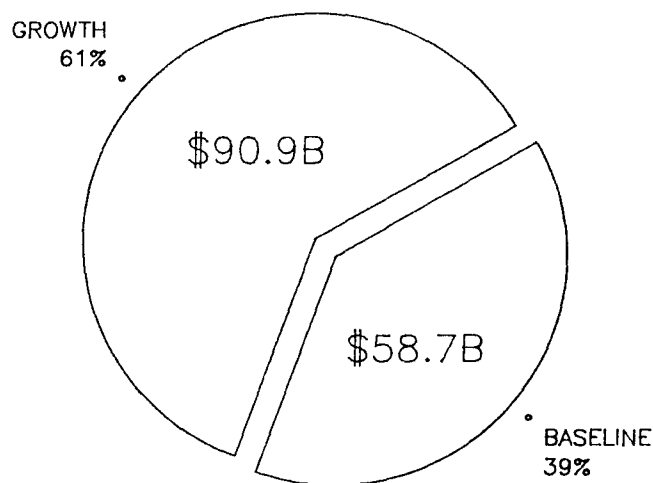

COMMENTS:

1. This chart provides an insight of how much of the workload associated with these systems confronts Air Force management.
2. About 75% of the SAR budget resides in the "Budget & Outyear" category.
3. Big ticket programs in this category are: B-1B at \$27 Billion, F-15 at \$27 Billion and F-16 at \$32 Billion.

SOURCE: Selected Acquisition Reports (SARs) as of 30 September 1982.

FIGURE 32

AIR FORCE SELECTED ACQUISITION REPORT (SAR) PROGRAMS
CURRENT TOTAL COST (THEN-YEAR \$)

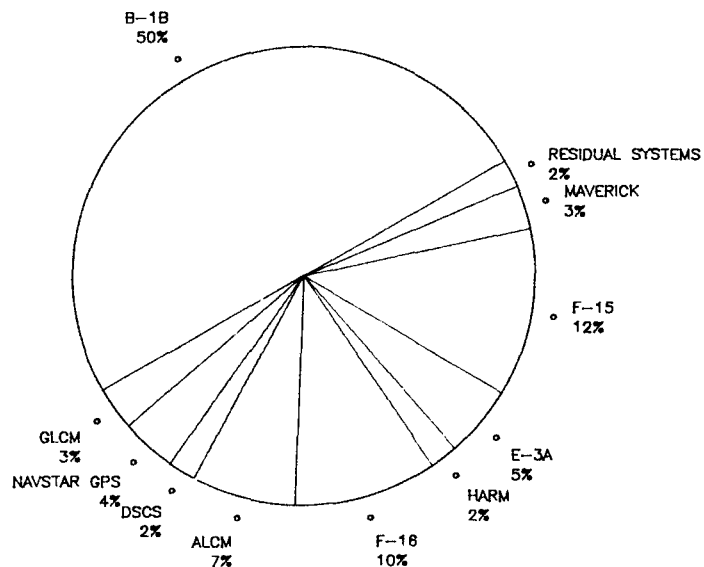

TOTAL BUDGET \$149.6 B

COMMENT: For the 14 SAR systems reported in September, the baseline represents what was originally predicted the programs would cost, adding up the various then-year dollars involved. The difference between total budget and baseline is termed growth.

SOURCE: Selected Acquisition Reports (SARs) as of 30 Sep 82.

FIGURE 33

AIR FORCE SELECTED ACQUISITION REPORT (SAR) PROGRAMS BREAKOUT BY COST

PROGRAMS AS A PERCENTAGE
OF BASELINE

COMMENTS:

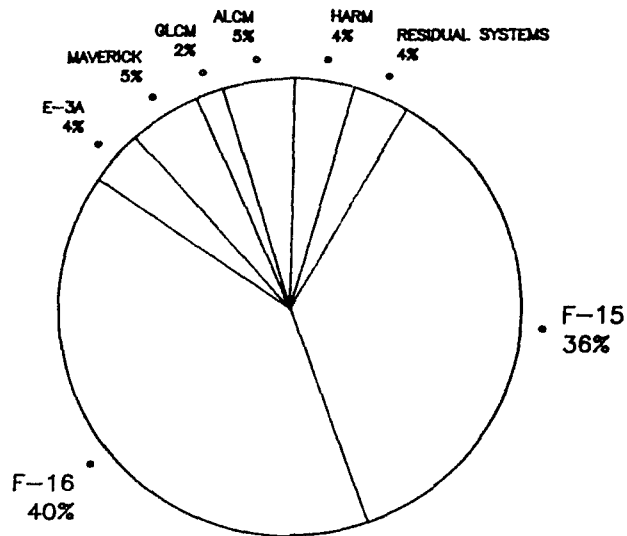

1. This chart reflects the impact of individual systems in the \$58.7B (then-year) baseline total.

2. About 50 percent of the baseline resides in the B-1B weapon system estimate while only 22 percent is taken by the combined value of the F-15 and F-16 systems.

SOURCE: Selected Acquisition Reports (SARs) as of 30 Sep 82.

FIGURE 34

AIR FORCE SELECTED ACQUISITION REPORT (SAR) PROGRAMS COST GROWTH

PROGRAM GROWTH AS A %
OF TOTAL GROWTH

COMMENTS:

1. The growth of the systems shown from original estimates to current estimates is \$90.9B (then-year \$). Two weapon systems, the F-15 and F-16, account for over 75% of the cost growth.

2. Since the B-1B has not encountered significant economic or program changes, it does not appear on this chart.

3. Growth is caused by several factors. Decisions to change the quantity, system or schedule, and economic conditions are the primary ones.

SOURCE: Selected Acquisition Reports (SARs) as of 30 Sep 82.

Military expenditures are for current and capital expenditures to meet the needs of the Armed Forces, including expenditures of national defense agencies for military programs; expenditures for the military components of such mixed activities as atomic energy, space, and research and development; military assistance to foreign countries; and expenditures on paramilitary forces where they contribute substantially to a country's military capability.
