HISTORY
of the
U. S. Army
Artillery and Missile School

Volume III
1945-1957

Fort Sill, Oklahoma

FOREWORD

This summary of the events that took place at the U. S. Army Artillery and Missile School following the end of World War II was undertaken at the direction of the Secretary of the School, Colonel John W. Dean, Jr., in the summer of 1957. First Lieutenant Robert W. Whitfield, Jr. was given the responsibility of preparing the history.

Its purpose was to trace briefly, in the light of national events and policies, the development of the School during the very busy years between 1945 and 1957. Furthermore, it was to reconstruct as well as possible the School's academic records of those years, and to present the organizational and physical growth of the School as it evolved into its present shape -- a broadly oriented and highly technical educational instrument. Finally, it was to record the names of some of the men who had contributed to the School's development during that period.

As such, this collection of data is more a reference book than a history. It is hoped that, in this respect, it will prove useful.

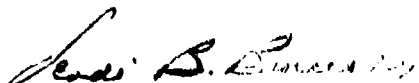

VERDI B. BARNES
Major General, U. S. Army
Commandant

HISTORY OF THE U. S. ARMY ARTILLERY AND MISSILE SCHOOL

1945 - 1957

PART ONE

Narrative History of the U. S. Army Artillery and Missile School from the end of World War II through 1957.

SECTION I

BRIEF DESCRIPTION OF SCHOOL PRIOR TO SEPTEMBER 1945 AND DEMOBILIZATION PERIOD THROUGH OCTOBER 1946.

In July 1940, enrollment at the Field Artillery School, as the U. S. Army Artillery and Missile School was then designated, stood at 409. On 8 September 1940, President Roosevelt proclaimed a limited national emergency and on 27 May of the following year an unlimited national emergency. By the beginning of World War II, in December 1941, enrollment at the Field Artillery School had reached 1,935.¹

During this emergency period and for four months after war was declared, the senior officer present was in command at Fort Sill, according to a policy that had been in effect down through the years. Thus, the Commandant of the Field Artillery School was normally in command of the Post as well. In the spring of 1942, however, the War Department adopted a new policy of placing the operation of posts, camps, and stations under the Army Services Forces. Under this policy the Fort Sill Post Headquarters and the post as such--Quartermaster, Engineer, Finance, etc., was placed under the Eighth Service Command, effective 11 April 1942. Thereafter, and for the duration of the war, the Commandant of the Field Artillery School was responsible for the School alone. During the war the School was under the direct control of the Replacement and School Command which was activated on 27 March 1942. This came shortly after the Office of Chief of Field Artillery, under which the School had previously served, was discontinued on 8 March 1942.² Replacement and School Command, Birmingham, Alabama, was, in turn, directly responsible to the Commanding General, Army Ground Forces, Washington, D. C.

In spite of the expansion of the Field Artillery School during the emergency period preceding World War II, the war brought the necessity for an even more rapid expansion. By October 1942, enrollment had risen to 8,172. The peak enrollment for the war years was 8,902. It was reached in February 1943.³ The School personnel overhead rose accordingly, increasing from 1,441 at which it stood before the war to a peak of 3,473 in September 1944.⁴ During the war a total of 108,999 students attended the Field Artillery School. Included were 35,031 officers. Seventy-two courses were taught during the period, and as many as 35 concurrently.⁵

The Field Artillery School, September 1945

With the cessation of hostilities on 2 September 1945, the School undertook all the problems and difficulties inherent in the transition from a wartime to a peacetime operation. This transition, which included the reduction of the school overhead, the elimination of many wartime courses, the development of the postwar courses, the reestablishment of the Army Extension Course program at the School, and the problems of demobilization in general, was to occupy the School until the fall of 1946. On 1 September 1945, the Field Artillery School was composed of the Staff and Faculty, the Field Artillery School Detachments, and the Field Artillery School troops. The Field Artillery Board at Fort Bragg, North Carolina, and the Rocket Board at Fort Sill were also under the command of the Commandant of the Field Artillery School, Major General Louis E. Hibbs.

The staff consisted of the executive; the usual four staff sections--S1, S2, S3, and S4; and a special staff composed of four sections--Adjutant General, Inspector General, Range Office, and Public Relations.

Under the Assistant Commandant were the seven instructional departments--Air Training, Combined Arms, Communications, Gunnery, Materiel, Motors, and Observation--and the Secretary, Field Artillery School.

The Field Artillery School Detachment was composed of Student Headquarters "A" and "B" and six battalions. All enlisted personnel of the permanent party of the School, exclusive of School Troops, were assigned to the Detachment. All enlisted students were attached to the Detachment, being carried as attached unassigned or attached from other organizations.

The strength of the Staff, Faculty and Detachment (permanent party) on 1 September 1945 was 671 officers, 60 warrant officers, and 1,669 enlisted personnel. The First, Second, and Fourth Battalions of the Detachment were located in the Old Post area; the Third Battalion at Post Field; and the Fifth and Sixth in the Concurrent Camp Area.⁶

The school troops consisted of a headquarters and headquarters detachment, five field artillery training detachments; a field artillery observation training detachment, an infantry training detachment; and field artillery motor, range, airplane maintenance, night vision, and radar maintenance detachments. Its strength stood at 345 officers, 13 warrant officers, and 5,675 enlisted men.⁷ The Commanding General of School Troops was Brigadier General George H. Paine.

Personnel administration for the Staff, Faculty, and Detachment was centralized in the headquarters of the School. Individuals were assigned for duty to the office of the Assistant Commandant, the staff sections, the

instructional departments, and the Detachment. The officers assigned to these various units were under the control of the heads of the units at all times. The enlisted personnel were under such control during duty hours only; at all other times, they were under the control of the Commanding Officer of the Detachment.⁸

The instructional activities of the School, with the exception of Air Training, were carried on in two separate areas--the Cantonment Area, immediately south of the Old Post, and the Concurrent Camp Area, approximately two miles to the southwest of the Old Post. This separation was required by the expansion of the School in the early days of the war, because the only available additional housing facilities were located in the Concurrent Camp Area. The activities of the Departments of Communication, Materiel, and Motors were divided between the two areas, while Combined Arms and Gunnery were located in the Concurrent Camp Area only. The Department of Air Training was located at Post Field, approximately two miles south of the Old Post.⁹

Situation, September 1945

The readjustment to a peacetime operation of the Field Artillery School began in a state of uncertainty produced by the end of the war. Although the student strength had dropped to the comparatively small figure of 2,321, the instructional facilities of the School were geared to handle 5 short courses for personnel undergoing redeployment from the European Theater to the Pacific, as well as 25 other courses still in progress. The 5 short courses were to be short lived as only 8 classes were conducted, with a total enrollment of 109 students. This was due to the small number of troops actually redeployed to the Pacific, coupled with the early intervention of V-J Day. Nevertheless, the School found some readjustments necessary inasmuch as it had anticipated a total course capacity of 218 for the short courses.¹⁰

During the summer of 1945, a large proportion of the experienced officer and enlisted instructors had been lost by overseas shipments and by separation from the service under the provisions of the Redeployment Regulations. By 1 September 1945 many replacements were arriving, but required weeks of orientation, instruction, and instructional experience before they were capable of assuming their full responsibilities.

The School's authorized strength had been reduced gradually as the course capacities moved downward. On 1 September 1945, the authorized course capacity for the School was 4,356. On the basis of a 1.5 to 1 ratio (student capacity to overhead), an authorized overhead strength of 2,904 was indicated. However, the actual authorized strength was 2,379, which had been in effect for some time. Headquarters, Army Ground Forces had declined to increase this figure to keep it in accord with course capacities, because of anticipated reductions. Actual School strength was therefore 2,400 at the close of the war.¹¹

By the end of September 1945 all of the Field Artillery School's 5 short courses for personnel of redeployed units had been terminated. Early in October the School received the first instructions from Replacement and School Command regarding Army Ground Forces tentative plans for the adjustment of the service school programs to a peacetime basis. Three weeks later more detailed plans were received, and a conference of commandants of service schools was called. A detailed study of these plans was made by the School and tentative programs formulated, designed to implement the Army Ground Forces proposals as far as the Field Artillery School was affected. The programs and recommendations of the School, based on this study, were presented to the Commandants' Conference at the headquarters of Replacement and School Command, Birmingham, Alabama, in November 1945 by the Commandant, Assistant Commandant, and Executive of the Field Artillery School.¹²

The immediate result of this conference was the establishment of interim courses for both officers and enlisted personnel at the Field Artillery School, the first of which was to start in January 1946. These courses were as follows:¹³

Field Artillery Officers Course
Officers' Sound and Flash Course
Officers' Signal Communication Course
Officers' Motor Course
Officers' Army Ground Forces Airplane Pilot Course
Enlisted Sound and Flash Course
Enlisted Armorer and Artillery Mechanic Course
Enlisted Motor Course
Enlisted Signal Communication Course
Field Artillery Noncommissioned Officer Course
Enlisted Army Ground Forces Air Mechanics Course

All of the interim courses were similar to courses conducted previously, except the Field Artillery Noncommissioned Officer Course, which had no parallel in the wartime courses. This was a 14-week course which because of its general nature and the disparity of the qualifications and interest of the students was never satisfactory and was discontinued in January 1949.

In addition to these interim courses, two more courses were subsequently prescribed to begin in 1946--the Professor of Military Science and Tactics Orientation Course, and the Ex-Prisoner of War Orientation Course. The latter course was based on a directive of the Commanding General, Army Ground Forces, in May 1945 that all officers captured prior to 1 December 1944 be enrolled in an appropriate course of the service school of his arm or specialty. The purpose of the course was to reorient the

officers and to bring them up to date on weapons, vehicles, equipment, and doctrine that they had lost touch with during their internment. In December 1945, the original directive was augmented for general and field grade officers by prescribing informal courses of 2 weeks duration at each of 5 service schools. To avoid duplication of instruction, the Field Artillery School was later assigned the subjects of artillery weapons and air support to ground forces and air-ground liaison.¹⁴

Establishment of Army Ground Forces Air Training School

In accordance with an Army Ground Forces directive dated 16 November 1945, the Department of Air Training of the Field Artillery School was redesignated the Army Ground Forces Air Training School. The change became effective 7 December 1945.¹⁵

The training offered by the Department of Air Training had been limited to field artillery personnel. With the adoption by the War Department of organic aviation for 5 other ground arms--Infantry, Armored (Tank), Cavalry, Tank Destroyer, and Engineer--the Army Ground Forces Air Training School had been established to give all aviation training for the ground forces.

The new school was placed under the command of the Commandant of the Field Artillery School, with an Assistant Commandant for Air Training in charge. Brigadier General William W. Ford, who had organized the Department of Air Training and had been its director from its inception in June 1942 to 22 October 1943, was designated Assistant Commandant for the newly established Air Training School.

Six classes of the Field Artillery Pilot Course were in session when the organization change took place, and one additional class was subsequently enrolled. The three classes of the Field Artillery Air Mechanic Course in session at this time were continued to completion, but no more were enrolled.

The first class of the Officers' Army Ground Forces Airplane Pilot Course was scheduled to start operational training at Fort Sill, 28 January 1946, but sufficient students were not available until class No. 3, which started on 11 March. The first class of the Enlisted Army Ground Forces Air Mechanic Course started 21 January 1946, as scheduled.

In preparation for the military education of the postwar army, the War Department announced, in December 1945, the re-establishment of army extension courses and the Field Artillery School was advised of the part it would play in this phase of the postwar military educational system.¹⁶

The first definite instructions as to the subcourses to be prepared initially by the School were forthcoming from the Commanding General, Army Ground Forces, in January 1946.¹⁷ Additional instructions were received by the School in March.

Situation, January 1946

Thus, by the beginning of 1946, the major problems of the transition period had been resolved into these areas:

- (1) Establishing the 13 interim courses that had been decided on by the November meeting of the service school commandants, pending a return to the normal school year cycle in September 1946.
- (2) Continuing to conduct five of the established enlisted specialist courses for specialists from replacement training centers.
- (3) Planning for the resumption of the extension course program.
- (4) Preparing for the establishment of the postwar courses in September.
- (5) Preparing for the establishment of the Army Ground Forces Air Training School and the solution of its attendant problems as efficiently as possible.¹⁸

By 1 January 1946, the authorized course capacity of the School had dropped from the 4,356 that it had been on 1 September 1945 to 2,307. Even so a potentially acute personnel situation that developed was relieved only by the fact that the classes of the interim courses were not filled to authorized capacities. During the first four months of the year, the School experienced practically a complete turnover of instructor personnel, both officers and enlisted men. In view of the long period of training required to develop newly assigned personnel into qualified instructors, the anticipated period of instructional inactivity caused by the small interim classes appeared absolutely essential if the School was to be adequately prepared to inaugurate the postwar courses in September with necessary effectiveness.

On 1 February 1946, the flow of students from the replacement training centers ceased, and instructions were to start no more classes in the enlisted specialist courses. Subsequently, however, the School was instructed to continue the Enlisted Motor Course, Enlisted Communication Course, and Enlisted Radio Repairman Course to accommodate the overflow from the interim courses. Actually, the Enlisted Motor Course was not resumed, since the few students reporting for it were absorbed in the interim course.

To provide adequate facilities for the handling of the additional responsibilities placed on the Field Artillery School by the re-establishment of the Army Extension Course program, the Commandant established a Department of Extension Courses, effective 2 April 1946.¹⁹

Although the Department of Extension Courses was responsible for the preparation of the extension courses allotted to the School, much of the actual writing was done in the instructional departments responsible for the subject of the various subcourses. This added duty presented further personnel problems within the departments. Completed subcourses were given nonexpert testing by as many as 50 officers, who were asked to take the subcourse and complete its requirements. Weaknesses thus brought to light were eliminated before the subcourses were submitted to Army Ground Forces. By the end of June, the School had submitted 5 subcourses, 3 of which had been approved for printing.

By May 1946, course capacities in the School had been reduced sufficiently to permit the beginning of a movement to concentrate all instructional activities (except Air Training, which remained at Post Field) in McNair Hall, then the Field Artillery School headquarters building, and the nearby Cantonment Area. This relocation had been completed by the end of June, with the exception of the Department of Communication and the Tractor Section of the Department of Motors.²⁰

Effective 10 April 1946, concurrent with the first redesignation of the School Troops, the Field Artillery School Detachment was eliminated by redesignating each of the six battalions as a detachment. By this process, the First Battalion, Field Artillery School Detachment, became the First Detachment, Field Artillery School.²¹

The Field Artillery School Troops were redesignated twice during the spring and summer of 1946. Late in 1945, the Commandant of the School had proposed that School Troops be reorganized so that the units would more closely approximate table of organization units, including changes in designations. This proposal was approved, and the changes became effective 10 April 1946.²² In general, training detachments became battalions, and the Range Detachment was changed to Range Section; at this time, the Airplane Maintenance Section and the Night Vision Section were organized.

However, this change proved to be temporary. Based on a desire to perpetuate the names of a number of units with distinguished combat records and to dispense with the table of distribution units which, as a wartime expedient, had been functioning as school troops since the early part of 1945, Army Ground Forces directed certain reactivations and redesignations which materially effected the school troops' setup.

The new change became effective 1 August 1946,²³ when table of organization units were activated at Fort Sill, utilizing the personnel of the table of distribution units, all of which concurrently were discontinued (Part Two, section II).

Situation, June 1946

On 18 June 1946, Major General Clift Andrus became Commandant of the Field Artillery School, assuming command of the post at the same time because of the inactivation of Army Service Forces on 11 June 1946. By this time the School had moved a long way toward completing the transition to a peacetime program and the establishment of the postwar courses. Its primary mission, which was the preparation of the postwar courses, was nearing completion. The first course was scheduled to start on 2 August 1946. The routine continuation of courses previously established was, at this time, still the secondary mission of the School. All but one of the interim classes which had begun in January had graduated by 21 June 1946. With the exception of this class, a total of 512 graduated from the 11 courses, and 58 failed.²⁴

The serious personnel situation at the School, caused by the rapid demobilization of the Armed Forces after the war was characteristic of the Army-wide personnel problem that existed at this time.

By June, it had become so acute that Replacement and School Command requested that Army Ground Forces authorize the freezing of instructor personnel at the School for one year. Although it appeared by July that Army Ground Forces would not be able to grant this request, the situation was somewhat relieved by information received that course capacities of several of the postwar courses had been reduced. The overall reduction amounted to approximately 20 percent.²⁵

In addition, the Associate Advanced Course was postponed until March 1947, and only one class was to be conducted during the school year. Also the scope of the Officers' Motor Course was to be limited to wheeled vehicles and tractors. Training on seaplanes was to be eliminated from the Army Ground Forces Airplane Pilot Course and the time devoted to the Brodie Device reduced.²⁶ Further relief was seen in the announcement of the new Officer Candidate School program for the ground forces under which no further classes would be enrolled at Fort Sill after 1 September 1946.²⁷

New overhead allotments and tables of distribution effective 30 June 1946 were received by the School on 22 July. The new allotments fixed the authorized personnel strength of the Staff, Faculty, and detachments at 1,156. This represented a reduction of 193 below the figure established by the 31 March allotment and 1,244 below the overhead in effect at the end

of the war, 10 months previously. The School overhead was to remain approximately at this figure for the next several years, until the expansion of the Army following the Selective Service Act of 1948. This marked the end of the personnel cuts of the demobilization period. The allotments for all elements which went into effect at this time were as follows:

	<u>Officer</u>	<u>Warrant Officer</u>	<u>Enlisted</u>	<u>Civilian</u>	<u>Total</u>
School overhead	317	35	804	139	1295
School troops	207	13	3314		3533
*Printing plant	<u>14</u>	<u>1</u>	<u>68</u>	<u>13</u>	<u>95</u>
	538	49	4185	152	4924

*Includes Printing Plant, Department of Extension Courses, and Training Literature and Visual Aids personnel.

Early in July, work was started at Post Field, which was being used by the Air Training School, on the construction of a concrete runway, 5,000 feet long by 200 feet wide, with taxiways and increased apron space. The sod surface in use had been entirely satisfactory for light airplanes and was preferred for training purposes. It was felt that its use by light planes would be continued. However, heavier aircraft which were using the field in increasing numbers could not utilize it during periods when the ground had been softened by rain, necessitating the construction of the new runway.²⁸

The lack of adequate hanger space at Post Field was emphasized when, on 4 August, a severe thunderstorm, accompanied by high winds and extensive hail, damaged 203 aircraft and halted flight operations for a week. The estimated cost of repairing the damage was \$69,350, and, taking into account the loss of time by flight instructors and student pilots, the total damage amounted to \$80,262. The damage of this nature during the first 8 months of 1946 amounted to approximately \$129,262.

Completion of Transition Period

By the end of August, the first field artillery subcourse of the re-established army extension course program was off the press and ready for distribution. The completion of this subcourse--50-1, Division Artillery in Offensive Action--marked the beginning of the complete operation of the Department of Extension Courses. Preparations were under way for administering the extension courses which would include the enrollment of students, mailing of subcourses, grading of student work, and keeping records of the courses. The efficiency with which this had been accomplished had been materially increased by studies made at La Salle

Extension University in Chicago by Colonel Arthur E. Solem, Executive of the Department, who had spent a week at that institution in the early part of August.

By the middle of September 1946, the postwar courses were established and well underway. These courses were as follows:

Officer

Basic Branch Course
Associate Basic Course
Branch Advanced Course
Associate Branch Advanced Course
Sound and Flash (Radar, Meteorology,
Survey) Course
Motor Course
Communications Course
Army Ground Forces Pilot's Course
(Air Training School)

Enlisted

Noncommissioned Officers' Course
Communication Courses
a. Communication Chief
b. Radio Operator
c. Radio Repairman
Enlisted Motor Course
Sound and Flash (Radar, Meteorology,
Survey) Course
Armorer and Artillery Mechanic Course
Meteorology Course
Radar Course
Air Mechanic (Air Training School)

These 18 courses were to form the basis of the Field Artillery School curriculum in the following 9 years. During this period, approximately 95 courses would be taught.

On 8 October 1946, in compliance with instructions received from the War Department, Headquarters, Fort Sill, and Headquarters, the Field Artillery School, Fort Sill, were consolidated.²⁹ At the same time, the Training Literature and Visual Aids Section was placed under the supervision of the Assistant Commandant. This change was brought about because the work of the section, which had previously been a function of the S-3 Section, was closely related to that of the instructional departments under the direction of the Assistant Commandant.

Thus by the fall of 1946, with this final reorganization, the transition from a wartime to a peacetime operation was concluded. The period had been marked by pressing personnel problems for the School as it had been for the Army in general. The School overhead and student capacity had been reduced by half. However, instruction had been maintained, partially through the use of interim courses, and the postwar courses established as a firm basis for instruction in the future. The extension course program had been reestablished and had become operative, as had the Army Ground Forces Air Training School.

In November, The Artillery Center and The Artillery School would be established and the School would enter the period of deemphasized postwar operation which was to last until the end of 1948.

SECTION II

THE POSTWAR PERIOD, NOVEMBER 1946-JUNE 1950.

The United States Army in 1946 had lost much of the incentive of the World War II army and most of the traditions of the prewar army. The shock of demobilization had left it in need of a definite revitalization. As an indispensable keystone of such a rejuvenating process, a first class school system was required, with a firm foundation in basic subjects. Such a system would help to preclude the possibility of future military catastrophe. Men trained in units are in general only transitory members of the Army team. The consequences of school training are much more often permanent and cumulative.³⁰

Demobilization, with its confusions and uncertainties, had been accomplished to a great extent by 1946, and the Army was faced with the problem of developing the programs and policies with which to carry out its peacetime mission. Furthermore, the mission had to be accomplished in the atmosphere of economy and curtailment of the Armed Forces that existed in the years following the completion of demobilization.

The problem that confronted Army Ground Forces in regard to the Army school system was two-fold: the consolidation of training facilities which were greatly expanded by the war to efficiently satisfy the needs of the peacetime army and the development of an Army school system capable of meeting the demands of the peacetime Army. The major step toward the consolidation of facilities was the decision to combine the Army Ground Forces Schools generally into three centers: The Infantry School (as the school of the Infantry and Airborne Divisions and associated matters) at Fort Benning, Georgia; The Armored School (as the school of the Armored Division and associated matters) at Fort Knox, Kentucky; and, The Artillery School (as the school of fire support and associated matters) at Fort Sill, Oklahoma, with antiaircraft and guided missile firing facilities at Fort Bliss, Texas.³¹ In addition, it was planned to maintain an Intelligence School at Fort Riley, Kansas; the Submarine Mine and Seacoast Radar School at Fort Scott, California; the Mountain and Winter Warfare School at Camp Carson, Colorado; and the Physical Training School at Camp Lee, Virginia.

In order to investigate the means of accomplishing the consolidation of the artillery schools, a board of officers was appointed by Replacement and School Command, at the direction of Headquarters, Army Ground Forces.³² The board met on 30 September 1946 to study and prepare plans

for the consolidation of the Field Artillery School, the Antiaircraft Artillery School, and the Seacoast Artillery School into one Artillery School at Fort Sill. The three schools were visited by the board of officers in order that it might inspect the courses being taught and obtain data on the size of each plant, the equipment, and the probable costs for moving and building operations.

A tentative plan was devised by the board which located the main Artillery School at Fort Sill where all common subjects and theoretical instruction in guns of all calibers and firing of field pieces would be taught. A subschool at Fort Bliss was to conduct all antiaircraft and guided missile firing instruction, and a subschool at Fort Scott was to conduct instruction in submarine mines and seacoast artillery radar.³³

However, prior to the completion of the board's investigation, the board, then at Fort Sill, was visited by General Bruce Clarke. General Clarke presented it with a plan for the consolidation of the schools which closely paralleled that of the board majority and which was subsequently approved without exception by Army Ground Forces before the recommendations of the board were completed. Orders from Army Ground Forces dissolved the board and directed that its records and recommendations be turned over to the Commandant of The Artillery School for study.³⁴

Pursuant to instructions from Headquarters, Army Ground Forces, the anticipated reorganization of the postwar Army school system was effected on 1 November 1946. On that date, The Armored, Artillery and Infantry Centers and the Ground General School Center were established.³⁵ In addition, Replacement and School Command, which had been in charge of the Army school system since its establishment on 27 March 1942, was discontinued; and all Army schools were placed directly under Headquarters, Army Ground Forces.³⁶

The Artillery Center, established at Fort Sill, was composed of The Artillery School, as the Field Artillery School was redesignated, and all Army ground force units at Fort Sill.³⁷ Concurrent with the establishment of The Artillery Center, General Clarke's recommendations were implemented by the consolidation of The Artillery School at Fort Sill with the Coast Artillery School, Fort Scott, California, and The Antiaircraft and Guided Missile Branch of The Artillery School. The two branches were exempted from Army control and placed directly under the control of The Artillery School.³⁸

Major General Clift Andrus assumed command of The Artillery Center immediately upon its establishment and was further designated Commandant of The Artillery School. Under his command were three assistant commandants: The Commandants of the two branches of The Artillery School (Seacoast Branch, TAS; AA&GM Branch, TAS) and the Assistant Commandant in charge of The Artillery School, Fort Sill.

Under the new organization, the instructional departments of The Artillery School were placed under the administrative supervision of the Secretary, who worked under the Assistant Commandant. As a part of the general reorganization of the Army school system, the Army Ground Forces Air Training School was discontinued and Air Training again was established as a department in The Artillery School.³⁹ This department, however, was to offer training in general support for all the ground arms, rather than training restricted to artillery personnel as had been the case prior to its discontinuance on 7 December 1945.

Under the reorganization, The Artillery School Detachments remained unchanged within the organizational framework of the School. However, School Troops, in the sense that they had previously existed as attached to the Field Artillery School, ceased to exist. The 5th FA Group, which continued to support the School, was attached to The Artillery Center and supplied the School's requests for troop support.

In spite of these adjustments, the organization of The Artillery School at Fort Sill was only slightly affected by the consolidation of the artillery schools. However, it quickly became evident that changes within the instructional departments, the composition of the School Troops, and school facilities would be necessary in order to meet the requirements of the new courses that would be taught at Fort Sill. Consequently, studies of personnel, materiel, and facilities needed to meet the requirements of the consolidation were begun under the direction of the Assistant Commandant. Since there were no immediate radical changes in the courses, the ones then in session were continued without major change.

In addition, the consolidation of the three artillery schools had not been as sweeping in its effect as it appeared on the surface and was not regarded as entirely satisfactory by The Artillery School. Based on the results of the investigation conducted by the board of officers appointed previously to the consolidation of the schools, a letter was prepared by the Commandant of The Artillery School to the Commanding General, Army Ground Forces, dated 20 November 1946, presenting the views of the board and the recommendations of the Commandant.⁴⁰ These recommendations called for a more complete consolidation of the schools than had been accomplished. In brief, the main points of difference between the consolidation of the schools as effected by Army Ground Forces and the Commandant's recommendations⁴¹ were that:

(1) The Antiaircraft and Guided Missile Branch of The Artillery School at Fort Bliss, Texas, be abolished and a Department of Anti-aircraft Firing under The Artillery School be established at Fort Bliss.

(2) The Seacoast Branch of The Artillery School at Fort Scott, California, be abolished and a Department of Harbor Defense under The Artillery School be established at Fort Scott.

(3) There be added to The Artillery School at Fort Sill, Oklahoma, a Department of Guided Missiles and a Department of General Subjects and the Department of Observation be redesignated the Department of Survey and Electronics.

(4) An antiaircraft range within 180 miles of Fort Sill, Oklahoma, be procured either by purchase or lease, preferably a range near Childress, Texas, and if this were approved all Artillery School facilities at Fort Bliss be completely eliminated and a Department of Antiaircraft Firing be established there.

(5) The motor specialists courses then being conducted at The Artillery School not be transferred to The Armored School.

In reply, the Commanding General, Army Ground Forces, approved only one of the recommendations--the addition of a Department of General Subjects to The Artillery School.⁴²

As a result of separate correspondence, a further recommendation that the Armorers and Artillery Mechanics Course at The Armored School not be transferred to The Artillery School was approved.⁴³ The changes in the curriculum of The Artillery School that resulted from the consolidation were the discontinuance of the officer's and enlisted motor courses at Fort Sill and the addition of an Observation Battalion Officers Course, an Enlisted Artillery Surveyor Course, and an enlisted Master Gunnery Course.

Although an acute personnel shortage within the School Troops had been a serious problem for the School throughout the fall of 1946 and had actually caused the modification and curtailment of some instruction in the School, a massed fire demonstration (the first of its kind after the end of World War II) was planned and presented by the Department of Gunnery on 20 December 1946.

The final organizational change in The Artillery School that occurred in 1946 was the discontinuance of the Field Artillery Officer Candidate School at Fort Sill, effective 12 December. The discontinuance of the Officer Candidate School program at Fort Sill, which had been established in January 1941 to meet the needs of the Army during World War II, was authorized by Army Ground Forces.⁴⁴

Situation, January 1947

By January 1947, the readjustment required by the consolidation of the three artillery schools and the establishment of The Artillery Center had been completed and the postwar program of The Artillery School was well underway. The School's authorized overhead was 1,433, of which 1,334 were actually assigned. The total enrollment of the 7 officer courses and 9 enlisted courses being taught was 529. There were eight instructional departments in existence--Air Training, Combined Arms, Communications, Gunnery, Materiel, Motors, Observation, and Extension Courses. Demobilization and the fundamental reorganization of the Army school system to satisfy the requirements of the postwar Army had been effected, and, although the School would make further organizational and policy adjustments to the peacetime situation, a solid base for the postwar operation of the School had been established.

On 15 January 1947, Headquarters, Army Ground Forces allocated five positions on the General Staff Corps to The Artillery Center.⁴⁵

The approval given by Army Ground Forces to the Commandant's recommendation that a Department of General Courses be added to the School was implemented by the establishment of that department in January 1947.⁴⁶ The purpose of the new department was to teach all subjects which did not properly belong to any of the other departments of instruction. All subjects of this nature were transferred to the Department of General Subjects immediately upon its establishment. Serving as a nucleus of the Department of General Subjects was the Technique of Instruction Section working under the Assistant Commandant. This section had formerly been a part of the Department of Gunnery.

On 20 March 1947, pursuant to instructions from Headquarters, Army Ground Forces, the Department of Motors was discontinued at The Artillery School.⁴⁷ The specialist motors courses at the School had been discontinued and all motor courses moved to The Armored Center, Fort Knox, Kentucky, thus eliminating the necessity for the department at Fort Sill. The property, records, equipment, and other administrative records of the department were transferred to the Department of Materiel. Subsequently, in order to accommodate the limited amount of motors training included in all general courses at The Artillery School, an Automotive Section was established in the Department of Materiel on 10 December 1948.⁴⁸

The personnel problems of the School Troops, which had reached serious proportions the previous fall, continued into the spring of 1947 and, in April, the School took steps to solve it. During the first part of that month plans were carefully formulated for the use of School Troops by the Specialist and General Courses throughout the remainder of 1947.

After an extensive study of the situation, the periods of instruction in all courses that required the support of School Troops were arranged that all requirements could be efficiently met. However, the plan thus derived was based on an estimate of strength and training of the School Troops that would have allowed them to place a minimum of forty gun or howitzer crews in the field at once. By the end of April, it became evident that the 5th FA Group would be able to man a maximum of only eighteen artillery weapons at one time. This reduction of more than 50 percent of the original estimate made it necessary for the School to take steps to handle the situation.

It became necessary to revise, reduce, and cancel many of the requirements placed on the School Troops. A committee of School Troops, Faculty, and Staff Officers was organized to coordinate these revisions. Meeting a week prior to all contemplated uses of the School Troops, the committee was successful in resolving schedule conflicts throughout May and June, the peak months of student enrollment. By the end of June, the school load had dropped significantly and it again became possible for the 5th FA Group to meet all requirements of the School without the use of the committee.⁴⁹

By the middle of 1947, as the Army settled into its postwar operation, the need for the organization and development of research became apparent. In order to implement this program within The Artillery School, the Department of Analysis and Research was established on 1 July 1947.⁵⁰ This marked a major step toward the elimination of duplication of effort on the part of the departments of the School which, up until this time, had independently conducted research in their fields of instruction. The duties of the new department were generally the channelizing of artillery research within the School and the analysis of artillery doctrine. Specifically, it was charged with:

- (1) the conduct of research from which improved doctrine could be developed;
- (2) the conduct of studies in order to recommend new doctrines that best utilized technical developments in artillery;
- (3) the review of proposed revisions of training literature to determine its consonance with approved doctrine;
- (4) the recommendation of proper interpretation of current doctrine for instruction within the School;
- (5) the conduct of studies into archives of combat reports in order to develop new doctrine;

(6) the maintenance of liaison between The Artillery School and the Department of Analysis and Research of the Command and General Staff College, the various Army Ground Forces Boards, The Infantry School, The Armored School, and Research and New Development Sections of Army Ground Forces and the Department of the Army.

On 30 July 1947, the Office of the Director of Training was established at The Artillery School by the appointment of Colonel William E. Waters to that office on Special Orders of The Artillery Center.⁵¹ The Director of Training, who was subsequently renamed the Director of Instruction, was designated the Executive Officer for the Assistant Commandant and charged with the administration of instruction conducted by The Artillery School. The establishment of this office represented an important organizational development in the School; in effect, the Director of Instruction performed the functions previously assigned to the Assistant Commandant under the organization of the School prior to 1 November 1946 and those functions which would be subsequently performed by the Office, Supervisor of Resident Instruction, and the Office, Deputy Assistant Commandant, upon their establishment. The Director of Instruction, with the assistance of the Editorial Group, was charged with duties including the publication of instructional memorandums of the Assistant Commandant; the coordination and application of approved doctrine as taught within the departments of The Artillery School; the general supervision of the preparation of lesson plans; and direct supervision of schedules of instruction.

With the exception of the transfer of the Book Store and Library to the supervision of the Secretary and the creation of the position of Assistant Secretary, the establishment of the Director of Instruction concluded the organizational changes in the School during 1947. The Artillery School had, in fact, reached the stage of organization which would prove adequate and remain substantially intact until the Korean Emergency in the summer of 1950. On 1 September 1947, Brigadier General Stanley R. Mickelsen succeeded Colonel Thomas E. de Shazo as Assistant Commandant of The Artillery School.

With the beginning of the courses of instruction for the school year 1947-48 in September 1947, which included substantially the same curriculum as the previous year, the School was again confronted with a personnel problem. The student load during the summer months had been reduced to the figure of the previous winter, 529, by the graduation of most of the classes in the school year 1946-47. But, by September, the courses had begun to fill with school year 1947-48 personnel, and the School was faced with a shortage of instructors.

Although the total strength authorization for the School had risen from 1,433 in February 1947 to 1,534 in September, the total assigned strength had only been increased by 41. Of this total strength, the table of distribution authorized The Artillery School 312 officers and 31 warrant officers

for instruction and the command staff. Only 265 officers and 24 warrant officers were actually allowed the School to perform the instructional and administrative functions of the instructional departments.⁵²

During the fall of 1947, the School initiated a detailed study of the situation and arrived at the figure of 395 instructors as the minimum necessary to carry the projected student load. The Artillery School, however, was unable to obtain a significant increase in either authorized or assigned instructors, and instruction was maintained only with the hardships and limitations imposed by this situation.

Situation, January 1948

Thus, by January 1948, the postwar organization and the program of The Artillery School were well established. The establishment of the Director of Instruction in July of 1947 had marked the final adjustment within the School to the necessities of its postwar operation, and the School's organization had settled into the form that it would maintain until the Korean emergency brought about further developments. In charge of The Artillery School at Fort Sill was the Assistant Commandant, Brigadier General Stanley R. Mickelsen, who worked directly under the Commandant, Major General Clift Andrus, as did the Assistant Commandant in charge of the Seacoast Branch and the Antiaircraft and Guided Missile Branch of The Artillery School. Directly under the Assistant Commandant, the Director of Instruction with the assistance of the Editorial Group was in charge of coordinating instruction within the School and supervising the scheduling of classes. The Secretary, also directly responsible to the Assistant Commandant, was in charge of the administrative management of the School and the supervision of the Library and the Book Store. There were nine instructional departments in the School--Air Training, Combined Arms, Communications, General Subjects, Gunnery, Materiel, Observation, Extension Courses, and Analysis and Research. The Artillery School Detachments also operated under the Assistant Commandant.

The total overhead strength of the School was 1,540, of which 1,385 were assigned. There were 352 officers and 31 enlisted men enrolled, which was about 100 spaces below the approximate postwar student strength average. Nine officer and seven enlisted courses were being offered by the School.

The problems that confronted The Artillery School were typical of the postwar period. Lack of instructor and School Troop personnel continued to cause trouble. It was felt that an increase in the size of the School Troops was particularly important in order to make the field exercises of the School more realistic and to increase the amount of practical training.⁵³ An increase in school support would also allow a reduction in lecture

and conference instruction, which was regarded as a further advantage.

The continuity of instruction was being interrupted by the continuous turnover of personnel and the practice of transferring personnel after one year's assignment to the School. For this reason, it was felt that steps should be taken to stabilize the assignment of officers and enlisted men to the Staff and Faculty by increasing their tour from 3 to 4 years. In addition, it was felt that a system of priority assignment of qualified enlisted instructors, especially technical specialists, should be established so that replacements would be immediately available or all personnel of this type reassigned elsewhere. ⁵⁴

The need for new facilities and the improvement of existing facilities had become evident. The Headquarters of The Artillery School was located in McNair Hall, and the departments were still utilizing the rather scattered facilities in the Cantonment and Concurrent Camp Areas to which they had been assigned immediately after the war. The decentralized nature of the classrooms and facilities generated transportation and scheduling problems. In addition, they were not air-conditioned.

As a result of this situation, The Artillery School recommended in 1948 that a new building or an extension of McNair Hall be constructed, embodying up-to-date developments in acoustics, classroom facilities, broadcasting systems, lighting, air-conditioning, and heating. It was further recommended that the new construction include adequate administrative and conference space for the Commandant and the department directors. ⁵⁵

The increase in range of new artillery weapons made it essential that additional land be acquired by The Artillery Center, in addition to the existing range and maneuver areas. Also, there was a necessity that sufficient quarters be constructed or remodeled to house permanently assigned personnel and students assigned for courses of more than five months' duration. ⁵⁶

Besides the problems related to the internal operation of The Artillery School at Fort Sill, the fact that the Antiaircraft and Guided Missile Branch at Fort Bliss had not been physically consolidated with the School continued to cause difficulty. The movement of students from one school to the other during courses which required instruction at each was unsatisfactory because of the cost involved, the loss of time in changing stations, and the loss of continuity of instruction. This situation caused The Artillery School to continue to recommend that the two installations be combined into one school at one station. ⁵⁷

However, with these general problems, which were often serious, as a background, The Artillery School continued to improve its teaching methods and the development of Artillery Research in the postwar years. Based on methods developed during the war, innovations used to improve instruction included "psychodramas," which dramatized the solution of problems in human relationships and leadership; radio quiz programs, which stimulated class interest and participation in subjects involving extensive factual matter; forum and tribunal classes, employed to take advantage of student experience gained in the war; and various forms of oral reviews and examinations utilizing taperecorders and visual equipment. 58

In addition to these methods, the use of training aids in class presentation was increased and improved. The use of graphic charts and illustrations was expanded. "Flip boards" and "slap-up" charts were developed to present lists and diagrams. Filmstrips and slides in conjunction with tape recorded sound effects and information were utilized. Cartoons were used to inject humor into dry subject matter, and ribbons and lights were used to animate charts. 59

It was found that students gave too much attention to taking notes in class thereby missing instruction. To counteract this, the School initiated the policy of furnishing each class a lithographed, expanded outline of the subject matter, so that students might focus their whole attention on the instructor. 60

During this period, The Artillery School continued to conduct research into fields pertinent to the artillery. From recommendations of the General Board, United States Forces European Theater, made immediately after the end of the war, the School initiated an intensive study into methods of improving the observation and conduct of fire. This study led to the adoption, by the artillery, of the target grid system. Improvements also were made in meteorology technique and in the adjustment of friendly fire. 61 A radar technique was developed for hostile rocket and artillery location.

The lines of responsibility and command within the Army school system were reorganized on 5 June 1948 when the major Army schools were classified as class I activities by the Department of the Army and placed under the Commanding General of their respective Army areas. 62 Programs, policies, instruction, doctrine, curricula, and inspections in connection with these matters remained the primary responsibility of the Chief, Army Field Forces, as Headquarters, Army Ground Forces, had been redesignated in March 1948.

The Artillery School was placed under the Commanding General, Fourth Army. However, the School was authorized to deal directly with the Office, Chief, Army Field Forces; the Command and General Staff College; and the two branches of the Command and General Staff College on strictly school matters. School matters were defined to include curricula, doctrine, instruction of resident and non-resident students, exercises, training literature, and extension courses. Matters involving a substantial increase or decrease in school workload, funds, and changes in utilization of School Troops were to be routed through the Commanding General of the Army Headquarters concerned.⁶³ The Artillery School remained under the Commandant, Command and General Staff College, for coordination of instruction and doctrine, programs of instruction, training literature, and other matters pertaining to the scope of instruction.

Effective 19 July 1948, the Training Literature and Visual Aids Section of The Artillery School, which had been working under the Assistant Commandant since October 1946, was established as a department.⁶⁴ Effective 6 June 1948, The Artillery School and The Artillery School Detachments were redesignated the 4011th Army Service Unit.⁶⁵ The School and the Detachment were redesignated the 4051st Army Service Unit on 15 September 1948.⁶⁶

There were no further organizational changes in The Artillery School in 1948. Most of the classes in the school year 1947-48 had graduated by June, and by the end of that month enrollment had dropped to a total of 70. By July, enrollment had been reduced to a total of 48, of which 36 were officers and 12 were enlisted men. By the end of the summer, the School began the planning and scheduling necessary for the courses it would offer during the school year 1948-49. There were to be no significant changes in the curriculum that would be offered with the commencement of the new courses in August. However, the School's plans were complicated by the expansion of the Army which was planned to take place during the fall and winter of 1948.

Expansion of the Army

By the summer of 1948, the cold war between Russia and the free world had begun, and the resultant increase in international tension dictated that the United States expand its armed forces beyond what had originally been thought to be an adequate peacetime defense posture. In order to accomplish the necessary expansion, Congress passed the Selective Service Act of 1948. This act, which became effective with the signature of President Truman on 24 June 1948, was unprecedented in American history; never

before had the country had compulsory military service in peacetime. As of 1 July 1948, the strength of the Army was 552,239. This figure was to be increased by rapid expansion under the Selective Service Act to 900,000 as of 1 July 1949.

Although under the Selective Service Act no personnel were to be inducted until November 1948, preparations by the Army for the problems that the expansion would produce had begun even before the draft law had been passed by Congress. By May 1948, Office, Chief, Army Field Forces, had notified the Commanding General, Fourth Army, and The Artillery Center that significant increases in the student loads of The Artillery School and the Antiaircraft and Guided Missile Branch of the School were anticipated. Thus throughout the summer and fall of 1948, The Artillery School, in conjunction with Fourth Army--Office, Chief, Army Field Forces--and the Department of Army, was formulating plans for the implementation of the expansion at the School.

In May, the Department of Army estimated that the student load at The Artillery School would increase at a constant rate from 890 in October 1948 to 1,450 in March 1949, which would be established as the continuing student load for the School.⁶⁷ It was further planned to include as part of the school curriculum for the school year 1948-49 cadre training courses in materiel and communications for antiaircraft personnel.

The expansion of the antiaircraft artillery in the zone of interior from three battalions to 42 (later reduced to 39) was the largest branch expansion percentagewise within the overall expansion of the Army. There was an absence of qualified cadre men throughout the Army with recent experience in antiaircraft methods. The antiaircraft specialist courses at The Artillery School were, therefore, intended initially to be short refresher courses that would qualify personnel rapidly for use as cadre in the additional antiaircraft units.

In July 1948, it was still not known at The Artillery School whether the expansion of the School program was to be effected by the establishment of new courses or by the expansion of courses already part of the curriculum. However, based on the estimated expansion of enrollment to 1,450, the School conducted an analysis of the anticipated increase in the workload of its instructional departments. The conclusion of this study was that the projected student load would necessitate an increase of 336 in the instructor staff, which then numbered 404.⁶⁸

By September, it had been decided that the School would be expanded primarily through increasing the capacities of courses already authorized and through the antiaircraft cadre courses. Only two new courses were planned as additions. It had also become evident by September that the School would need additional equipment in order to effect the expansion properly, and steps were initiated to obtain this equipment.

These preparations at The Artillery School were incorporated in the Plan for Expansion of The Artillery School,⁶⁹ which was hand-carried by the Chief of Staff, to Fourth Army Headquarters, on 1 October 1948, and then sent to the Office, Chief, Army Field Forces, Fort Monroe, Virginia. This plan represented the School's final recommendations on the expansion program at The Artillery School. It was based on an eventual student load of 1,996 in June 1949, which was a considerable increase over the original Department of the Army estimate of 1,450. The additional student load was the result of establishing courses for radio operators and motor mechanics and additional classes in the Associate Basic Course. These classes were needed to accommodate the anticipated increase in newly commissioned second lieutenants. Because of this increase in the projected student load, the School requested a total overhead increase of 559 (65 officers, 4 warrant officers, 474 enlisted men, and 16 civilians) as compared to the 336 increase in the faculty as had been thought necessary in July. It was stated as imperative that the bulk of this overhead increase be authorized and made available to The Artillery School prior to 1 December 1948 so that on-the-job training might be given the new personnel before their assumption of duties.

The plan included 10 officer and 11 enlisted courses which was only a slight increase over the curriculum of the previous year. At the time of the submission of the plan, The Artillery School was already conducting the refresher courses for communication chiefs, radio operators, radio repairmen, and antiaircraft artillery mechanics for cadre personnel to be used by the Antiaircraft and Guided Missile Center. However, except for an increase in the frequency of Associate Basic Officers' Course classes, no appreciable expansion of the recommended courses was anticipated prior to 1 January 1949. At that time, it was planned that the expansion would take place primarily in the enlisted radio, survey, observation, and artillery mechanic courses. The Antiaircraft and Guided Missile Branch of the School did not have adequate facilities to train specialists in these subjects in numbers necessary for the expansion of the Antiaircraft Artillery Branch. The possibility of including antiaircraft requirements in these courses so that they might be used to train antiaircraft cadre personnel was therefore considered by The Artillery School.

Because of the expansion of these courses, it was anticipated that the major portion of the enlargement of The Artillery School would be accounted for in the Departments of Communications, Observation, and Materiel. The critical necessity for equipment to accomplish this was reemphasized in the School's plan for expansion.

Meanwhile, enrollment in the School had risen to 449 in August as the courses for the school year 1948-49 got underway and to 824 in September with the addition of the antiaircraft cadre refresher courses. Although this student load represented a sizable increase over the maximum student loads of the previous winter, there had been no increase in the authorized overhead of the School, and no significant increase in assigned personnel. Total School overhead was 1,406 in October 1948, of which 108 were assigned to the staff and 622 to the faculty.

Prior to the submission of the plan for expansion by The Artillery School on 1 October, increases in authorization of personnel by Fourth Army had been delayed pending final information as to the degree of expansion anticipated. However, during the months of October and November, after the plan had been submitted to Fourth Army and Office, Chief, Army Field Forces, no information was received by the School concerning either the requested increase in authorized personnel or final acceptance of the plan for expansion. As a result, The Artillery School was unable to make final preparations for the expansion which was scheduled to begin in January 1949.

By the end of November, the situation had become critical. The big increase in School enrollment was expected in little more than a month. Still the School was not in possession of information necessary to begin final scheduling of classes, neither had it received the increase in authorization of personnel necessary to properly conduct instruction for the anticipated expanded courses. In addition, the time in which to train possible forthcoming increases in the School overhead before the advent of the expansion in January was rapidly dwindling.

In view of this situation, the Commandant of The Artillery School wrote urgent letters to Office, Chief, Army Field Forces, and Headquarters, Fourth Army, on 22 and 24 November, respectively, informing them of the School's problem and requesting the necessary information and authorization of personnel. From Army Field Forces notification was received that the School's plan for expansion had been unofficially approved by the Department of the Army and the School was instructed to proceed on that basis. From Fourth Army a reply was received increasing spaces at The Artillery School, but indicating that the expansion might be curtailed below the level anticipated in the School plan.

However, during December the Department of Defense undertook an overall reevaluation of the demands of national security in the light of national economy. The result of this reevaluation was a reduction in the planned expansion of the Army from 900,000 to 677,000. Since it had been known that under the Selective Service Act of 1948 no personnel would be inducted until November, the Army had initiated, immediately following the passage of the act, an intensive recruiting campaign. This, together with the stimulating effect which the passage of the act had upon recruiting, resulted in significant increases in the Army through voluntary enlistments. As a result, the Army's strength was already above the reduced figure of 677,000 when the cutback was announced in December. It was necessary to reduce the January call on Selective Service and to cancel later ones.

This complete reversal of the Army expansion program at the time that it was getting into full operation produced problems in planning and readjustment throughout the Army in the months of December and January. It was therefore necessary for The Artillery School to reevaluate its plans for expansion and to make adjustments to the demands of the new policy.

Situation, January 1949

Thus by January 1949, most of the plans that had been prepared for the expansion of The Artillery School had been nullified by the decision to reduce the projected strength of the Army. The School was faced with the problem of redefining its policies and plans within the framework of the new Defense Department policy. This policy also resulted at The Artillery School, and throughout the Army, in a marked emphasis on economy, and required the School to reassess carefully its operation throughout 1949 in an attempt to increase its efficiency.

An immediate result of the deemphasis of the Army expansion program at The Artillery School was a considerable reduction of the personnel problems which had become acute in December 1948 with the anticipation of the expanded courses scheduled to begin in January. Under the new policy, this expansion had been limited considerably and the necessity for the requested increase in the School overhead removed. Other than the normal personnel fluctuations, The Artillery School overhead was to remain at approximately its strength as of January 1949 until the advent of the Korean Emergency.

Although the student load increased in January and February at approximately the rate that had been planned, the peak projected loads of the spring months were not realized, and it never exceeded the figure of approximately 1,000. But in spite of the cutback, the increase in The Artillery School student output was sizable. A total of 3,003 officers and enlisted men were graduated from the School in 1949 as compared to 1,208 in 1948. This increase was due primarily to the expansion of the specialist courses used to train antiaircraft personnel. The antiaircraft branch expansion had continued in spite of the cutback and these courses were used in addition to the shorter refresher cadre courses to furnish the trained men necessary to the newly activated antiaircraft units. During this period, Antiaircraft Sections were established in the Department of Combined Arms and the Department of Materiel.

Two containing problems of The Artillery School throughout 1949 were the complete reevaluation of its methods in order to effect economies and the difficulty which the Antiaircraft and Guided Missile Center at Fort Bliss encountered in filling antiaircraft personnel quotas established for the specialists courses at Fort Sill.

On 1 June 1949, Major General Joseph M. Swing assumed command of The Artillery Center, replacing Major General Clift Andrus who had served in that capacity since June 1946.

In accordance with instruction from Headquarters, Fourth Army, The Artillery Center, including the activities and functions of the Station Complement and The Artillery School, was designated as the 4050th Area Service Unit, effective 5 July 1949. Area Service Unit numbers 4011 and 4051 previously assigned to the Station Complement and The Artillery School, respectively, were withdrawn.⁷⁰ This redesignation effected a transfer of The Artillery School Detachments from the control of the Assistant Commandant to the supervision of Headquarters, The Artillery Center. The new designation of the 4051st ASU, The Artillery School, was Headquarters, 4050th ASU, The Artillery Center, Staff and Faculty. Under it were a Headquarters Detachment, 4050th ASU, The Artillery Center, established at this time, and the 1st and 2d Detachments, 4050th ASU, The Artillery Center.

Effective 26 September 1949, the Department of Airborne and Special Operations was established at The Artillery School.⁷¹ The department was charged with duties including:

(1) the development of airborne artillery doctrine, policy, procedure, and technique;

(2) the development of the artillery doctrine, policy, procedure, and technique for special operations, such as amphibious, arctic, and desert operations;

(3) the preparation of instructional material for, and conduct of, all airborne and special operations instruction to be presented at The Artillery School;

(4) the planning and supervision of all demonstrations pertaining to airborne and special operations.

To assist in research into airborne artillery operations and the instruction of airborne material at The Artillery School, the School had recommended in its annual reports for the school years 1947-48 and 1948-49 that an airborne artillery battalion be assigned to the School Troops. Although necessary air transport landing facilities and troop housing for such a battalion were available at Fort Sill and terrain and weather conditions were favorable for its use, this proposal was never acted upon.

Since its duties and responsibilities had largely been assumed by the newly established Department of Airborne and Special Operations, the Department of Analysis and Research was discontinued on 31 October 1949. All records and files of the department were forwarded to the Secretary for disposition.⁷²

In addition to these departmental changes, a Department of Special Courses was established in the fall of 1949 and a director assigned to the Special Associate Basic Course, which was conducted by the School from December 1948 to August 1949.⁷³

Enrollment at The Artillery School, which had not fallen below 639 during 1949, rose to 952 in August with the beginning of the courses for the school year 1949-50. This represented a sizable increase over the School student loads at the beginning of previous school years: in September 1948, enrollment had been 824; in September 1947, 479. The assigned School overhead for September 1949 was 1,533, and planned courses of instruction for 1949-50 were essentially the same as those offered for the previous year.

However, in October, as a result of a conference between representatives from the Antiaircraft Artillery and Guided Missile Center and The Artillery School, the special refresher cadre courses for antiaircraft personnel were discontinued at The Artillery School.⁷⁴ A general agreement was reached that the short courses which had been scheduled at

the beginning of the antiaircraft artillery expansion program were no longer necessary in that the antiaircraft artillery expansion had advanced to the point that the longer regular courses could be used. At this time it was also decided that the antiaircraft artillery quotas in the regular courses up until August would have to be increased. It was estimated that during this period a total of 1,946 students would have to attend antiaircraft artillery cadre courses for motor mechanics, communication chiefs, radio repairmen, radio operators, artillery mechanics and meteorologists in order to obtain 1,127 qualified graduates.⁷⁵

The Office of the Director of Instruction was discontinued in November, 1949.⁷⁶ No similar office was created to perform the functions of the Director of Instruction until the establishment of the Office, Supervisor of Resident Instruction on 23 July 1951. However, during the interim, some of the duties of the Director of Instruction were transferred to the Operations Section working under the Secretary of The Artillery School. This section was first headed by a sergeant, later to come under the supervision of a major.

On 30 December 1949, the Commandant of The Artillery Center notified Office, Chief, Army Field Forces, that effective 1 January 1950, all branches of The Artillery School would use the standard method of grading and rating officer students. This method was established by Headquarters, Army Ground Forces, in June 1947,⁷⁷ for all general courses. The method of standard scores, established by Army Field Forces in December 1948, for all specialist and small officer classes,⁷⁸ This notification was the outcome of an evaluation of the methods of grading at Army service schools initiated by Office, Chief of Army Field Forces in September 1949.

In response to the original request for an appraisal of the standard method of grading officer students begun in 1947, The Artillery Center had firmly recommended its discontinuance at The Artillery School.⁷⁹ The standard score system was based on the concept that students were to be measured in terms of their position in their classes with respect to the average of the class and the nature of the deviation of the class from its average. Its use was objected to by The Artillery Center primarily because (1) it lacked reliability in comparing the students in one class with those of another, (2) the system did not provide for a standard of measurement correlated with the requirements of the duties for which personnel were being trained, (3) it permitted a student to pass who was unsatisfactory in a critical portion of the instruction, and (4) it was not satisfactorily applicable to examinations which contained a low number of items. In addition, the standard score

system increased the time and personnel required for the determination of student grades and introduced complexities into their determination, which increased the likelihood of error.

However, in spite of the fact that the standard score system was indorsed only by the Commandants of the Command and General Staff College and The Armored School, Office, Chief, Army Field Forces, authorized its continuance at all Army schools,⁸⁰ and The Artillery School was directed to continue its use.

Situation, 1950

Although the Seacoast Branch of The Artillery School was discontinued on 15 June 1950,⁸¹ no organizational or departmental changes were necessary within The Artillery School during the first half of 1950. Student strength remained at approximately 1,000, reaching a peak of 1,752 in March. Total School overhead was approximately 1,500 during the early part of the year.

On 30 June 1950, United States ground forces entered the Korean Conflict which had been started by the invasion of South Korea by the North Korean Army on 25 June 1950, and The Artillery School entered a period of rapid mobilization.

SECTION III

THE KOREAN EMERGENCY, JUNE 1950-JULY 1953.

National Mobilization

In the year following the outbreak of hostilities in Korea, in June 1950, the Armed Forces of the United States underwent a rapid expansion. This was especially true of the Army which accounted for 83 percent of the forces engaged in the fighting in Korea. On 27 June 1950, President Truman ordered General of the Army Douglas MacArthur to the aid of South Korea, which had been attacked on 25 June by the North Korean Army. On 1 July 1950, the date of entry into the hostilities by Army Ground Forces, the strength of the Army stood at 593,000. It had 10 divisions. Within one year it had been expanded to an effective force of more than 1,531,000 men, organized into 18 divisions and separate combat elements equivalent to 6 additional divisions.

This rapid increase in the size and effectiveness of the Army was achieved through the concept of "creeping mobilization"; the rate of buildup was at all times conditioned and dictated by the course of military operations in Korea. Prior to Korea, mobilization planning concepts had reflected the expansion necessary in total war, based on World War II experience. But after the outbreak of war in Korea there was no declaration of war, nor did the United States enter into full mobilization. This situation produced unique problems. Only partial callups of reserves were made, and difficult decisions on priorities and deferments were necessary.

In order to avoid committing trained reserves in the event of the expansion of the conflict in Korea, the Organized Reserve was allowed to remain virtually intact and men from the Volunteer and Inactive Reserve were activated. The expansion of the Army was initially divided into two stages. First, over 310,000 Reservists and National Guardsmen were called to active duty, both as individuals and in units, as trainers, and for immediate defense missions. The next stage was the absorption of approximately 176,000 volunteers and 587,000 selectees who entered training during the first year of combat. By the end of one year of engagement in Korea, a third stage had begun--the release of reserves and their replacement by the men they had trained. In the

absence of a large pool of trained manpower upon which the Army might have called, it was necessary that large numbers of World War II veterans again serve.

To develop effective soldiers out of recruits and recalled reservists under normal training programs would have taken more time than was available under the emergency circumstances. Consequently, throughout the country, Army training was intensified, nonessentials were eliminated, and more realistic instructional methods were introduced. The length of the training week was increased from 40 to 48 hours. Thirty command installations, including posts, camps, stations, hospitals, depots, and ports of embarkation, were activated or reactivated.

Extensive efforts were made to collect, evaluate, and apply the combat lessons learned in Korea. Trained observers investigated all phases of operations in Korea, and the results of their investigations were incorporated into all training programs. Thousands of officers and enlisted men of all ranks, mostly combat wounded brought back to the United States, were assigned to training duties throughout the Army to carry out the lessons they learned in combat.

Other than Regular Army inductees and enlistment, the manpower increases within the Army were drawn from three sources--the Organized Reserve Corps, the Reserve Officers' Training Corps, and the Army National Guard. During fiscal year 1951, the first year of the Korean conflict, 46,920 officers and 150,807 enlisted men in the Organized Reserve Corps were ordered to extended active duty, and 934 Organized Reserve Corps units were ordered into active Federal military service. The majority of reservists called up were activated as individuals.

At the same time, the Reserve Officers' Training Corps program was expanded. During fiscal year 1951, the number of universities, colleges, and military institutes offering Army ROTC senior division courses was increased from 241 to 271. By the end of 1950, 32,264 students were enrolled in ROTC advanced courses, 10,381 more than the previous year. Approximately 11,500 ROTC graduates were commissioned in September 1950, an increase of 2,000 over the previous year. During the summer and fall of 1950, the ROTC recruiting program was expanded in all communications media.

The first National Guard units were ordered to active military service in August 1950. By June 1951, National Guard organizations from nearly every state and territory, as well as the District of Columbia,

were on active duty. Units not ordered to active duty pursued various training programs.

During the first year of the conflict in Korea, over 100,000 guardsmen entered active military service with inducted units. Organized units increased from 4,863 to 5,016, of which 1,457 were in active military service by the summer of 1950. The National Guard troop basis was revised to include 5,370 units.

Funds were sufficient during fiscal year 1951 to permit the National Guard to approach fulfillment of school training requirements for the first time since 1946. Of 29,427 guardsmen attending schools, 9,212 attended Army service schools, 4,053 attended schools conducted by Army area commanders, and 16,162 attended 2-day unit schools conducted by the various States. Army extension courses were open to all members, and monthly enrollment averaged more than 35,000 guardsmen--10,000 officers and 25,000 enlisted men.

This tremendous mobilization effort placed a great deal of pressure on the United States military establishment as a whole. One of its most immediate effects was that which it had upon the Army school system.⁸² The demands of training the large increases of reserve and National Guard personnel on the individual and unit level and the influx of the selectees and volunteers of the national recruiting programs were felt at the same time that key school personnel were being transferred to the Far East. In the early days of the conflict there was a critical shortage of trained personnel as men and units from installations throughout the country were reassigned to fill positions in Korea. These pressures and difficulties brought about by the advent of war in Korea with which the nation and the armed services were faced were reflected in the operation of The Artillery School during the remainder of 1950 and through 1951.

Expansion of The Artillery School

In June 1950, The Artillery School was composed of ten departments which were directly responsible to the Assistant Commandant--the Departments of Airborne and Special Operations, Communications, Gunnery, Air Training, Extension Courses, Materiel, Combined Arms, General Subjects, Observation, and Training Literature and Visual Aids. The Office of the Secretary was responsible for the administrative functioning of the School and was in charge of the Army Field Printing Plant, the Editorial Group, the Library, the Book Store, and a Supply Section.

An Assistant Secretary was also under the direction of the Secretary. In addition to The Artillery School at Fort Sill, the Antiaircraft Artillery and Guided Missile Branch of The Artillery School at Fort Bliss, Texas, was under the direction of the Commandant of The Artillery School.

Enrollment at The Artillery School in June 1950, which before the graduation of the 1949-50 school year courses had averaged about 1,000 students, stood at 642. The total assigned strength of the Staff and Faculty was 808. Most of the school instruction was located in the Academic Area to the south and southwest of The Artillery School Headquarters at McNair Hall. The projected load, schedules, and requirements of The Artillery School as of 1 June 1950 were based primarily on the experience of the 1949-50 school year, with the exception of the Artillery Officers Basic Course which had been eliminated. On 31 July 1950, The Artillery School received its first information as to the changes in its program that would be made necessary by the Korean emergency in a letter from the Chief of Army Field Forces directing the intensification and acceleration of school training. This letter directed vast changes in schedules and called for sweeping revisions of the programs of instruction, lesson plans, and the general operation of Army schools.

The Artillery School, which had formerly operated on a 40-hour week, was directed to assume a 44-hour week with authorization to place certain critical specialists courses on a 48-hour week, if necessary. A 15 percent calendar reduction in the length of all courses was planned with the exception of the Associate Courses. These courses were authorized to be lengthened, if necessary, so that they might produce officers fully qualified for their primary mission. The 7 holidays, which had been established originally, were subsequently reduced to 4. Christmas vacation was cancelled.

Because of the 15 percent reduction in the length of all courses, it became necessary to reevaluate the planned instruction for the Advanced Course. The benefits of teaching unified artillery training were weighed against the benefits of teaching antiaircraft or field artillery separately in view of the time cut. Since it was necessary that the Artillery Officer Advanced Course graduate be prepared to perform his primary mission in one of the two types of artillery, it was decided at The Artillery School that it would be more expedient under the circumstances to emphasize the separate more specialized training. Consequently, the Commandant proposed to Army Field Forces that the Artillery Officer Advanced Course class be divided, with the field artillery component remaining at Fort Sill and the antiaircraft component returning to Fort

Bliss, Texas, for completion of their training. Verbal approval was obtained from Army Field Forces on 10 August after a brief conference on the matter between Brigadier General J. D. Balmer, the Assistant Commandant of the Antiaircraft and Guided Missile Branch of The Artillery School, and Brigadier General W. H. Colbern, Assistant Commandant of The Artillery School, at Fort Sill. Official approval of the change was forthcoming in September; and, on 11 October 1950, the 123 antiaircraft officers of the Advanced class left Fort Sill to resume their training at Fort Bliss.

In response to the acceleration letter of 31 July 1950, additional classes were added and the student load involved in most of the planned classes increased. These changes in addition to subsequent expansion of classes and student loads amounted to a projected increase of approximately 730 students in the general officer courses.

In addition to the changes made in the officer courses, the rapid expansion of the Army produced an increased demand for school trained enlisted specialists. On 11 August 1950, Army Field Forces directed The Artillery School to submit a plan of expansion to meet the estimated requirements of Army Field Forces in specialists training. This request was later amplified by two additional messages, which resulted in The Artillery School submitting a report on 19 August 1950 outlining proposed changes in schedules and capacities to meet the new requirements and the increases in personnel, facilities, and funds that would be needed to implement the changes. The planned expansion was approved by Office, Chief, Army Field Forces, on 27 September 1950.

On 26 August 1950, The Artillery School announced the establishment of a motor officer, motor sergeant, and motor mechanic course at The Artillery School. Preparations for establishment of these courses at the School had begun three months previously when the Commandant of The Artillery School had recommended to Army Field Forces that an Artillery Motors Course be started at the School. Artillery motor personnel were at that time being trained at Transportation Corps schools, and it was felt that the problems peculiar to artillery motor maintenance justified special training at The Artillery School. In addition it was necessary to complement instruction in the other two elements of field artillery, gunnery and communications, then being taught by the School, with adequate instruction in the third element, motors. After the motors courses were established they were taught by the Motors Section of the Department of Material.

The recall of large numbers of reserve officers, the federalizing of the National Guard, and the intensifying of the training of civilian components were also responsible for sizable changes in the mission and student capacity of The Artillery School. Many special courses, some unofficial, had to be added to the schedule to assist in the accelerated training of the civilian components during the months following the beginning of the school expansion in July.

The Third Army Organized Reserve Corps Special Artillery Orientation Course, originally the responsibility of Third Army, was transferred to The Artillery School in September when it became evident that the Third Army had become too depleted by overseas requirements to conduct the course. The 76 members of the course were flown to Fort Sill, and classes were conducted for a two-week period parallel to the Associate Advanced Course. The major emphasis was placed on staff organization and procedure, gunnery, and artillery tactics.

A National Guard Refresher Training in Army Aviation Tactics Course was established by the Department of Air Training after it was authorized by Office, Chief, Army Field Forces, on 28 August 1950. The additional load of this 4-week refresher course on the Air Training Department led to the authorization of \$105,000 by Office, Chief, Army Field Forces, in October 1950, for the rental of additional aircraft.

On 20 September 1950, Army Field Forces directed The Artillery School to conduct refresher courses for Organized Reserve Corps and National Guard Personnel called to active duty. The Artillery School therefore scheduled 4 classes of 4 weeks each, for approximately 25 people, to commence about 23 October. Informal reading lists for pre-study by officers ordered to these courses were prepared by the School and submitted to Army Field Forces.

Due to the success of the Allentown project (which was a school for the Organized Reserve Corps complete with various levels of courses), it was decided to establish a large number of such schools throughout the nation to aid in the training of the Organized Reserve Corps. In this connection, The Artillery School was required by Army Field Forces to organize a one-week orientation course for Organized Reserve Corps school instructor personnel. This course was successfully conducted during the period 15-21 October for 49 students.

On 18 August 1950, Army Field Forces directed that each Army would provide one team of instructors to train federalized National Guard units in artillery subjects. The teams were to be of 3 officers and 3 enlisted

men for those assigned to the 4 National Guard divisions and 2 officers and 3 enlisted men for those assigned to the National Guard regimental combat teams. The Fourth Army team, which was to train the 45th Division, was selected entirely from qualified personnel of The Artillery School. The other teams were sent to Fort Sill for the period of 5-23 September 1950, during which time The Artillery School gave them a refresher course prior to assignment. The progress of this course and an estimate of the abilities of the students as future instructors were reported to Army Field Forces prior to termination of the course, so that Army Field Forces could direct appropriate personnel changes. Upon completion of the course, the teams went out to their respective divisions. The Artillery School team was returned for active duty at the School on 22 October 1950.

During this period of rapid expansion, The Artillery School increased its workload by unofficially assuming the technical instruction of various reserve and newly activated units at Fort Sill. In this connection, the Department of Observation was particularly active, conducting courses for two observation battalions stationed at Fort Sill.

In addition to instruction for United States Regular Army and civilian component personnel, The Artillery School also had added missions of training a large number of non-Army personnel.

A United States Air Force Pilot Artillery Observation Course was established and scheduled for 4 classes of 5 days each for 10 pilots per class between 6 November 1950 and 23 February 1951. This course in artillery adjustment training for Air Force tactical reconnaissance pilots was organized by The Artillery School in conjunction with the Tactical Air Command.

Upon the request of the Commandant of the Marine Corps, on 26 October 1950, Office, Chief, Army Field Forces, allocated a quota of 55 Marine students to the Associate Field Artillery Battery Officer Courses 7, 8, 9, and 10. In return The Artillery School requested that 23 Marine Corps officers be detailed as instructors during the period that the Marine students attended the School.

During this period of School expansion, between June and October 1950, attendance of allied officers at The Artillery School reached a peak of 72 in both specialists and general courses. As a result of the Mutual Defense Assistance Program, a Special Battery Officer Course was scheduled which was composed exclusively of allied officers. These officers were handled in the same manner as American officers. Mutual Defense Assistance Program funds were provided to start an English language course to assist the officers in this course.

Preliminary Organization Adjustment

Although in the months immediately following the advent of the Korean emergency large additions were made to The Artillery School's curriculum and projected student loads, enrollment at the School remained normal until October. During these months, the School became acquainted as to what new and expanded duties the partial mobilization of the Army would impose upon it and the nature of its mission as redefined by the emergency situation. Some preliminary adjustments were made by the School to the exigencies of Army expansion, both internally and in regard to The Artillery School's relationship to the overall mobilization.

On 29 October 1949, Fourth Army had directed a mobilization designation of Organized Reserve personnel to augment Regular Army table of organization and equipment positions which, through various amendments, directed the designation of certain Organized Reserve Corps units as departments of The Artillery School. In July 1950, Fourth Army designated the actual Organized Reserve Corps units which would augment The Artillery School in the event of full mobilization. Accordingly, the Assistant Commandant directed each department of the School to prepare a course of instruction to assist the augmentation units in preparing themselves for duty at the School. He authorized direct contact between The Artillery School departments and their assigned Organized Reserve Corps augmentation unit. He placed the program under the direction of an Assistant Secretary, The Artillery School, in charge of Civilian Components, a position which was created at this time. Contact and coordination was established with all augmentation units in this manner, and the program was augmented by visits of officers of the Organized Reserve Corps units to The Artillery School. During the visits, these officers were instructed in courses in school organization and operations.

Early in the summer of 1950, a Planning Group composed of two lieutenant colonels was appointed to be part of the Assistant Commandant's office. This group prepared the initial Artillery School mobilization plan. However, it soon became obvious that the requirements were becoming so involved as to go beyond the school level and include The Artillery Center functions, such as housing, transportation, and troops. It was therefore recommended that the Planning Group become a part of The Artillery Center staff. This was approved and the Group passed out of the School's control.

The establishment of the Division of Training Publications on 15 September 1950 represented the first attempt to organize The Artillery School to more efficiently meet the needs and the anticipated problems

of the mobilization period.⁸³ Under the new school organization, the functions and responsibilities of the Department of Extension Courses, the Department of Training Publications and Aids, the Editorial Group, and the Army Field Printing plant were consolidated into a single administrative unit. To accomplish this consolidation, the Departments of Extension Courses and Training Publications and Aids were discontinued and redesignated as the Training Literature Branch, the Training Aids Branch, and the Extension Courses Branch of the Division of Training Publications. The new division absorbed in its table of distribution The Editorial Group, which had formerly been a part of the Secretary's Office, and was given supervisory control of the Army Field Printing Plant. The Director of the Division of Training Publications was made responsible for the training literature and publications of The Artillery School, its extension course program, and the preparation and maintenance of training aids used by the School.

In order to maintain close liaison with the military operations in Korea and to utilize the experience being gained there in The Artillery School instruction, the Director of the Department of Training Literature and Visual Aids was detached to Korea as an observer for The Artillery School on 13 September. He reported back to Fort Sill on 21 October after reporting to the Chief, Army Field Forces. This practice was maintained throughout the war. In addition, by instructions from Army Field Forces in April 1950, The Artillery School established a close liaison with the Royal Canadian School of Artillery in the summer and fall of 1950, which included exchange visits of the immediate commanders as well as important members of both schools. During this period, The Artillery Center Museum was placed under the operational control of the Office of the Secretary, The Artillery School.

On 15 August 1950, the Artillery Replacement Center, which worked in conjunction with The Artillery School for the duration of the war, was established.⁸⁴ On 3 October 1950 the name was changed to the Field Artillery Replacement Training Center.⁸⁵

Personnel, July-December 1950

The Korean emergency required the immediate transfer overseas of most of the troop units in support of The Artillery School. To fill up units going overseas the remaining units were reduced greatly. A 20 percent reduction in regular officers on the staff and faculty was ordered. Although it was planned that the reduction in the staff and faculty would be replaced by reserve officers called to active duty, the significant increases in the mission of The Artillery School during the summer and fall of 1950

produced serious personnel problems. Due to the projected expansion of the school from approximately 3,358 students to an estimated 7,555 students as a result of the mobilization of the Army, the 1950 table of distribution was inadequate. Consequently, a new table of distribution expanding the academic departments and the Division of Training Publications was submitted to the Commanding General, Fourth Army, for approval. The most significant proposed change was the establishment of a Department of Motors, then a section in the Department of Materiel. The new table confirmed in its estimates the transfer of the operations section, Assistant Chief of Staff, G-3, from The Artillery Center to the Office of the Secretary, The Artillery School.

However, because of existing Army regulations governing tables of distribution and the rapid expansion of The Artillery School, neither this table of distribution nor three subsequent tables were acted upon by Army Field Forces. In the meantime, the School was forced to undertake temporary measures to overcome the personnel problems with which it was confronted.

Because of the drastic reduction of School Troops, a continuing study of troop support requirements for all classes was initiated by the School. As a result of the study, similar to one conducted under parallel circumstances in 1946, large revisions in classes and lesson outlines were effected. New units, mostly Reserve units called to active duty and assigned to Fort Sill, were used to supplement troop support as they were trained and became proficient.

On 11 July 1950, Fourth Army directed the Commandant to replace military personnel wherever possible with civilian personnel in order to release military personnel for overseas service. Upon the announcement on 31 July of the projected loss of 20 percent of the Regular Army faculty, The Artillery School commenced screening records of reserve officers who were then on duty as students or formerly assigned to the School. The names of the reserve officers selected to replace the Regular Army personnel were submitted on 30 September 1950.

On 5 October 1950, The Artillery School, after obtaining verbal instructions from Army Field Forces, submitted a list to the National Guard Bureau of Guard officers desired as instructors at the School. In addition, the shortage of enlisted men had not been alleviated by the provisions in regard to instructors. The School, therefore, requested permission to withdraw enlisted personnel from the replacement stream at Fort Sill on 2 October 1950. Approval was granted to assign not more

than 106 enlisted men to The Artillery School. Total enrollment at the School rose to 1,894 in October and to 1,938 in November 1950.

Although lack of instructors and equipment forced The Artillery School to decide against conducting some abbreviated enlisted courses as requested by Army Field Forces in November 1950, some progress was being made in solving the personnel problem within the School. In an effort to relieve the situation, the Secretary of the School flew to Army Field Forces on 27 November to discuss the proposed table of distribution and personnel and supply problems. Final arrangements were made to obtain the 25 National Guard Officers, who had been initially requested on 5 October, from the Associate Field Artillery Battery Officers Course 1 and the Associate Advanced Class. A few Enlisted Reserve Corps personnel had been obtained from Fort Hood and approximately 70 of the 106 Replacement Center personnel at Fort Sill which the School had been authorized. Preliminary studies were underway to secure instructors from the Artillery Officers Advanced Course.

However, in spite of these efforts the personnel situation at The Artillery School remained critical. On 1 December 1950, the School had more than 100 less instructors than on 1 April of the same year, yet the actual student load had more than doubled and the projected student load was expected to be much larger. The new table of distribution had not been approved, and Fourth Army consequently had not allotted additional spaces for The Artillery School.

On 15 December 1950, the School received a letter from Army Field Forces prescribing the projected mobilization load requirement for the School from 1 January 1951 to 30 June 1951. This letter increased capacities in officer courses by 3,660 students and in enlisted courses by 1,626 students. On 16 December, a series of new courses was announced in letters from Army Field Forces. The Assistant Commandant of the School was informed by Army Field Forces on 29 December 1950 that student requirements at The Artillery School would be increased by the additional responsibility for training personnel of the 31st and 47th National Guard Divisions which had been federalized. A total of 197 officers were added to the student load as the result of this development and the Planning Group, The Artillery Center, was given the responsibility of studying classroom space, housing, and other requirements brought about by this increase.

In addition to the problems produced by the increased student load and the number of courses added to the School curriculum in so short a time, preparations for an Officer Candidate Course at Fort Sill were begun at The Artillery School during the months of November and December 1950. The Secretary of the School had previously prepared plans for a program of instruction for an Officer Candidate School course in the event of its possible establishment at Fort Sill. During November, Army Field Forces alerted the School to begin preparation for such a program of instruction, and the School initiated a review of its planned 22-week Officer Candidate Course. This program of instruction was requested on 7 December 1950 by Army Field Forces and informed The Artillery School of the projected student requirements of the course. On 18 December 1950, Office, Chief, Army Field Forces, approved establishment of the Officer Candidate School at Fort Sill.

The final organizational change within The Artillery School during 1950 was the reestablishment of the Department of Motors on 1 December. 86 The addition of many motor courses to the School curriculum and the assumption of the training of all artillery motor personnel by the School had placed requirements on the motors section of the Department of Materiel that could be handled more efficiently by the establishment of a new department. The separation of the newly established Department of Motors from the Department of Materiel was accomplished gradually, under the direction of the Director of the latter department who initially served as director of both departments.

Situation, January 1951

In January 1951, The Artillery School still had not been able to adjust adequately to the vast changes in its mission, student enrollment, and curriculum brought about by the Korean emergency. Its rapid expansion had not, in fact, been completed. It was not until March 1951, when enrollment reached 3,792, that the School reached the approximate level of operation that it would maintain until the end of the emergency period. Enrollment which stood at 1,655 in December 1950, rose to 2,269 and 3,555 in January and February of 1951. This rapid increase in the student load was matched by a similar expansion of The Artillery School courses of instruction for the school year 1950-51. A total of 21 officer and enlisted courses had been offered during the previous year, but during the first year of hostilities in Korea, this number rose to 47. The problems inherent in such a rapid expansion were intensified by the still growing shortage of personnel at the School.

By January, the continuous and serious shortage of instructors and personnel had begun to seriously affect the operation of the School and its standard of instruction. All attempts to remedy the situation had produced only limited results, and the problem had been increased by the fact that the School had received untrained personnel as replacements for losses due to reassignment. It originally had been anticipated that the School was to receive recent School graduates as instructors, and a one-month training program had been prepared as being adequate to train the replacements as instructors. However, the School had received instead unqualified, low ranking, nongraduates of The Artillery School as replacements, and the already critical manpower situation was complicated by the necessity to increase the instructor training course to two months.

In addition to the shortages in the immediate School overhead, troop support for the School which had been drastically curtailed immediately after the outbreak of war in Korea had remained a problem. With the activation and stationing at Fort Sill of many new General Reserve Battalions, The Artillery School had at its disposal in January approximately the equivalent of one division artillery for support. Although this strength was adequate for the January and the projected February school loads it was felt that it would not be adequate for the anticipated peak loads of April and May.

The tremendous expansion of the School, its facilities, and its student load had put a noticeable strain on the organizational framework of the School in spite of the attempt to anticipate the problems of the expansion by reorganization and the establishment of the Division of Training Publications on 15 September 1950. By January 1951, it was apparent that a second reorganization of the School would be necessary if it was to operate efficiently under the emergency conditions. Several reorganization plans were under study by the School at that time.

With the School's expansion in the fall of 1950, it had become necessary to prepare buildings in the western part of the post, in the area used by the School during World War II, to accommodate the Officer Candidate School and several other departments. The coordination of this building program had become a serious problem by January 1951, and an officer in the Operations Section of the Office of the Secretary was appointed as a coordinator. This officer was to handle the conversion of the western area based on the school load through 30 June 1951. However, it soon became apparent that one man could not handle the situation, and the Assistant Commandant appointed a board, consisting of one officer from the Planning Group, The Artillery Center G4, the Post Engineer, and the Secretary of the School, to study the classroom and housing requirements for the projected period and those requirements that would develop

in the event of full mobilization. By January, the School had completed the first of three staging fields which were needed by the Air Training Department because of the expansion.

In addition to the problems that The Artillery School had in the early part of 1951, plans for the Officer Candidate Course which had been authorized by Army Field Forces were reaching the final stage. Supply could not be kept current due to the continual variation in sizes and types of classes.

The solutions to these problems, which had rapidly accumulated after the outbreak of hostilities in June 1950, occupied The Artillery School during the first months of 1951. The suddenness of the expansion program had prevented thorough adjustments to the changing situation during the fall of 1950. However, during the first four months of 1951, as enrollment leveled off and the rapid expansion of the mission and curriculum of the School ceased, the situation stabilized enough to allow the School to effect permanent adjustments.

Personnel

Although it was often necessary for The Artillery School to cancel scheduled classes in many of the courses during the height of the personnel problem in the winter of 1950-51, temporary methods of maintaining instruction were used whenever possible. With courses starting in large quantity one method was to give block instruction for repetitive courses. In this manner, the Associate Battery Officer classes and Officer Candidate classes were planned to be given together. The large number of students reporting for the Artillery Enlisted Communications Courses posed a similar problem for the Department of Communications. The Department solved this problem by giving a series of tests to the students upon their arrival to determine their ability to learn. The less able students were given a basic mathematics and communication course prior to entry into the established communications course. The more able students were placed in a concurrent Artillery Officer Communications class, which had a similar program of instruction.

However, these measures were expedients and the School continued to seek to remedy the personnel situation more permanently. By January, 4 tables of distribution had been submitted to Department of the Army in 4 months in an attempt to obtain personnel. These efforts had proved unsuccessful and additional solutions had been attempted. Early in the fall of 1950, the School had begun to select the 106 basic trainees for

which it had obtained authorization from the Field Artillery Replacement Training Center, and, although it was difficult to find qualified personnel, the program was fairly successful. The appointment of United States Marine Corps instructors had helped relieve the situation for a short period until the additional load of Marine students increased that their effect was largely nullified. These attempts, although partially successful, had not been effective enough to cope with the enrollment increases, and, by January 1951, the situation had become so serious that the Commandant authorized the withdrawal of student officers of the Advanced Class for duty as instructors.

At this point another solution to the problem was attempted when the School requested early in January 1951 the calling to active duty of the Organized Reserve Corps Augmentation Unit of The Artillery School. Although Fourth Army agreed informally in January to implement this proposal by recalling to active duty about three hundred company grade officers in the Augmentation Group, these increases were not to be available until March 1951, and the situation at the School remained critical. It finally became necessary for the Commandant to declare to Army Field Forces that the School was unable to meet the required commitments without relief.

On 1 February 1951, the Department of the Army authorized the increase in the table of distribution necessary for the School to continue and, at the same time, formally authorized the recall of company grade officers of the School's Organized Reserve Corps Augmentation Unit.

The new table of distribution for The Artillery School authorized an increase in officers of from 318 to 623; of warrant officers from 58 to 88; of enlisted men from 526 to 823; and, in addition, authorized 421 civilians. Military fillers were to come largely from the Organized Reserve Corps Augmentation Units. Authorization was given to draw 200 company grade officers and 250 enlisted men from The Artillery School Organized Reserve Corps Augmentation Units. Although these increases were not to be immediately felt by the School (it was necessary to cancel two Battery Officer Course classes at the end of February), the new table of distribution and the authority to call up The Artillery School Organized Reserve Corps marked a significant step toward the solution, or at least a partial solution to the personnel problem.

In March 1951, the authorized strength of the School was again increased when the comptroller, The Artillery Center, authorized a bulk increase of 191 officer spaces and 390 enlisted spaces in the table of distribution for the School. In addition to these authorized increases, the assigned strength of the School was expanded by 2 Marine officers, 60 officers of the Organized Reserve Corps Augmentation Program, and

70 graduates of the Artillery Officer Advanced Class during March. Another 163 officers of the Organized Reserve Corps Augmentation Program were expected in April and May. The strength of the staff and faculty at the School was 1,182 by March 1951, and the School had received personnel authorizations which would allow it to increase that figure to 1,717 by June. This was the approximate strength it would remain for the duration of the emergency. Although lack of personnel would continue to be a problem, by June the School had moved as close to a solution as possible under the mobilization conditions. However, although personnel strength had risen to an adequate figure by then, it was typical of the complexities and difficulties of the period that only 11.4 percent of the total officer authorization of The Artillery School as of 1 July 1951 had completed a minimum of one year with the School.

Construction

In the fall of 1950, it became evident that the tremendous increases in all aspects of The Artillery School's activities would force the School to expand beyond its Academic and Air Training areas. Consequently, phased construction plans were initiated in January 1951 to move part of the School to the Officer Candidate School Area that it had occupied during World War II. This operation, under the direction of the coordinator in the Operations Section of the Office of the Secretary and the board appointed by the Assistant Commandant to study the problem, was in progress during the first months of 1951.

It was decided that the entire Department of Motors would be moved to the 2400 and 3400 areas, and the Department of Materiel, with which it had been working in conjunction, would remain mostly concentrated in the Academic area, south of The Artillery School Headquarters at McNair Hall.

The Officer Candidate Course and the Battery Officer Course were also to be moved to the Officer Candidate School area in the western part of the Post. The Communication Specialists courses were divided between the Communications area, southwest of McNair Hall, and the Officer Candidate School area. The Observation Specialists courses were to be taught in the Gunnery Hill area, and all other courses offered by the School were to remain in the Academic area, with the exception of the Air Training Courses, which stayed in the Air Training Department area near Post Field.

Surveys initiated by The Artillery School showed that all areas except the Officer Candidate School area had adequate facilities, with minor exceptions, to handle the courses and departments assigned to them. In the Officer Candidate School area, three housing areas were established. The barracks of the 2700 area became the Battery Officer Course area, which was designated the 2d Student Officer Battery. The northern half of the barracks of the 2800 area became the Officer Candidate School area, and the southern half became the Enlisted Specialists area.

Thirty-two gunnery type classrooms (35-man) and four 60-man Officer Candidate School classrooms were created by the conversion of 18 mess halls in the 2500 and 2800 area. Four communication 60-man classrooms, two code rooms, a text issue and book store were made from 2700 area mess halls. From post exchanges, recreation halls and former classroom buildings in the 2600, 2900, and 3000 areas, six 120-man gallery-type lecture halls and eight 120-man classrooms with tables were established. The barracks of the 2500 area were converted to offices and supply rooms to furnish administrative space to support the newly established activity in the western part of Fort Sill. Most of the work necessary to effect these changes in the western area of Fort Sill was completed during the first few months of 1951.

Organization

The rapid expansion of the School which had produced the serious personnel problems of 1950-51 and necessitated the construction of new facilities at The Artillery School also revealed significant deficiencies in organization of the School. Consequently, in addition to the problems of personnel and construction with which the School dealt in the first part of 1951, it was faced with the necessity of reorganization. The establishment and incorporation of the Officer Candidate School in the School operation was an important part of this problem.

With the Academic Records Section of the Office of the Secretary working at capacity, the problem arose as to how to admit to Officer Candidate School grades. Officer Candidate School grading requirements differed from the regular School courses in that a constant up-to-date weekly record was necessary so that candidate grades would be ready for consideration by elimination boards. The problem was resolved in January 1951 by having Officer Candidate School headquarters operate its own Academic Records. The Officer Candidate School itself was officially reopened on 21 February 1951,⁸⁷ when the first Officer Candidate School class since World War II reported to Fort Sill. Colonel F. G. Smith was appointed Director of Officer Candidate School. The School was organized along tactical lines.

Concurrent with the opening of the Officer Candidate School Battalion, the 2d Student Officer Battery was opened in the Officer Candidate School area of the Post. This battery was established as an administrative unit for the Battery Officer Course which had been moved to that area of Fort Sill.⁸⁸

At the same time that these changes took place the administrative organization of The Artillery School personnel and students was reorganized. Since the redesignation in July 1949 of The Artillery School and The Artillery School Detachments as units in the 4050th, The Artillery Center, Area Service Unit, the School had not exercised administrative control over its staff or its students. The resultant necessity of having to deal through Headquarters, The Artillery Center, and the resultant lack of effective control, greatly increased the administrative and command problems of The Artillery School during the period of expansion. Consequently, on 21 February 1951, The Artillery Center ordered the creation of The Artillery School Command which was to be directly under the control of the School.⁸⁹ The portion of the 4050th ASU, The Artillery Center, pertaining to The Artillery School units was redesignated the 4051st ASU, and all organizations assigned or attached to The Artillery School were placed within the newly created Artillery School Command. The order directing these changes was effective 5 March 1951.

In addition to these organizational changes it had become apparent by the early part of 1951 that the reorganization of the School, in the fall of 1950 with the establishment of the Division of Training Publications was inadequate to cope with the increasing operational problems of the School. Consequently, on 22 March 1951, the Division of Training Publications was discontinued and a more complete reorganization of the academic functions of the School was effected.⁹⁰ Up until this date, the Office of the Secretary had been the only administrative staff serving the Commandant and Assistant Commandant of the School. As the School mission became larger, it was necessary to expand the office periodically to include an Operations Section, Supply Section, Civilian Components Section, an Academic Records Section, and an equivalent of a visitors' bureau. This expansion of the School operation was in effect making the Office of the Secretary responsible for functions and duties for which it was not intended. Consequently, under the new reorganization the administrative responsibilities of the School instruction were divided and made the responsibility of the newly established Offices of Supervisor of Nonresident Instruction and Supervisor of Resident Instruction. These positions were in effect executive offices to the Assistant Commandant, in charge of their respective areas of The Artillery School instruction.

With the discontinuance of the Division of Training Publications, the activities which had composed it were returned to their original status as the Department of Extension Courses, the Department of Training Publications and Aids, the Army Field Printing Plant, and the Editorial Group and placed under the direction of the Office, Supervisor of Non-resident Instruction, which was established effective 20 March 1951.⁹¹ The duties of the Department of Training Literature and Visual Aids which had been incorporated into the Division of Training Publications were assumed by the Department of Training Publications and Aids, established at this time. The Supervisor of Nonresident Instruction was made responsible for the coordination and control of the departments under his direction and for liaison between them and other agencies.

Concurrent with the establishment of the Office, Supervisor of Non-resident Instruction, the Office, Supervisor of Resident Instruction was unofficially established and charged with the duties of the Operations Section of the Office of the Secretary. Later in 1951, effective 21 July, this office was officially established.⁹² The Supervisor of Resident Instruction was made responsible to the Assistant Commandant for all courses of resident instruction at The Artillery School and, in effect, placed in charge of the departments of instruction at the School. The duties of this office were similar to those of the Office of the Director of Instruction, which had been discontinued in November 1949. These duties included the preparation of programs of instruction, the checking of courses of instruction for scope and doctrine, the scheduling of classes, the coordination of transportation and troop support facilities, and the establishment of grading and evaluation policies.

During this period, the increasing mission of the School made it difficult for the departments to release instructors for research studies or to sit on panels and boards conducting such studies. The establishment of The Artillery School Board to correct this deficiency represented the final step in the reorganization of the School to meet the needs of the emergency operation. The Board, which was established on 13 April 1951,⁹³ was charged with the development of doctrine, policy, procedures, and techniques pertaining to such projects as were assigned by the Assistant Commandant of The Artillery School. The function of The Artillery School Board was similar to that of the Department of Analysis and Research which had been discontinued in October 1949.

During the first half of 1951 while progress was being made toward the solution of the serious problems of personnel, organization, and construction of new facilities with which The Artillery School was confronted,

several organizational and policy decisions of a more minor nature were accomplished. In the fall of 1950, the museum had been placed under the Secretary and plans had first been considered to use it as a training aid and an adjunct to the Library. In order to accomplish this, the museum was closed during the months of January and February of 1951 and re-organized to show a chronological history of the development of field artillery and the personal and unit weapons, clothing, and equipment of the artilleryman. With the reopening of the museum on 22 February 1951, it was officially placed under the Office of the Secretary.

The elimination of the Office of the Chief of Field Artillery, early in World War II, had increased the difficulty of maintaining liaison with ROTC units by the Artillery. This difficulty had been encountered by the other combat branches following the loss of their chiefs, although the technical services which had maintained their chiefs of branch had not been confronted with it. The significant expansion of the ROTC program during the Korean emergency had intensified these problems for the combat branches. Consequently, Army Field Forces, which had become aware of these problems in distributing doctrine, training media, and current information to their ROTC units by the combat branches, directed, early in 1951, that the branch schools be the responsible agencies for the progressive growth and training of the branch ROTC units.

Accordingly, The Artillery School established within the Civilian Components Branch of the Department of Training Publications and Aids, an ROTC liaison section consisting of three officers. The chief of section was made chief advisor in ROTC affairs, maintaining liaison with the Professors of Military Science and Tactics of Artillery ROTC universities. The other two officers were charged with the responsibility for the preparation and dissemination of ROTC subject schedules, training aids, programs of instruction, and instructional material.

In addition to these developments, the rapid expansion of the student load during the mobilization period emphasized the inadequacies of the standard score system of grading used at The Artillery School. This system to which the School had previously objected, was based on the assumption that all classes were homogeneous. However, during the emergency period, large numbers of students attended classes without the required prerequisites and an increasing number were turned back from one class to another, biasing the sample on which the standard scoring system was based. These conditions led to criticism of the School's Academic Evaluation program, and, in February 1951, The Artillery School requested that it be allowed to discontinue the standard

score system. This request was granted in March 1951 by Army Field Forces and the School initiated plans to change to a weighted percentage system. This change affected all classes except those of career-type officer courses, was anticipated to effect a tremendous saving of time in the computation and posting of grades in addition to eliminating the inequities of the system previously in use.

An Academic Evaluation Board, consisting of the executives of the instructional departments, was appointed by the Assistant Commandant to study the best methods of accomplishing the change and on 15 June 1951, the board recommended tentatively the weighted percentage system which was subsequently put into effect at the School.

Beginning in June 1951, The Artillery School Board maintained a liaison officer with the United States Eighth Army in Korea. These officers served a one-month tour in Korea before returning to The Artillery School.

Situation, June 1951

Thus, by June 1951, with the completion of the first year of hostilities in Korea, The Artillery School had completed its adjustment to the increased demands of the emergency period. The rapidly expanding mission of the School, including the great increases in its curriculum and student enrollment, in conjunction with the depletion in school and school support personnel immediately following the outbreak of war had delayed the full adjustment of the School for approximately six months. Preliminary steps taken toward the solution of the problems that grew out of the emergency situation had often proved unsuccessful and temporary. However, by the beginning of 1951, as the increases in mission and student load began to stabilize, more permanent solutions were effected.

By June 1951, all aspects of The Artillery School operation had been reorganized. Administrative control by the School over its faculty personnel and student body had been reestablished. The Officer Candidate program had been established and incorporated into the School operation. A more effective organization of the responsibilities and functions of the resident and nonresident instruction of the School had been accomplished, and the facilities of the School had been expanded to the western part of Fort Sill to accommodate the increased student capacity. Finally, adequate organization and facilities for Artillery research in the School had been provided for. These adjustments of the School's organization and facilities accomplished during the first months of 1951 were permanent. Most of the solutions effected during the period proved effective until the cessation of hostilities in the summer of 1953. Although personnel shortages remained a continuing problem throughout the emergency period, by June the total overhead of The Artillery School had risen to 3,096, and adequate manpower was no longer the critical problem that it had been during the first year of conflict.

School Year 1951-52

With the beginning of the courses of instruction for the school year 1951-52 in August 1951, enrollment at The Artillery School rose, reaching a peak of approximately 4,100 in October and November. Although, the cost accounting system of The Artillery School was completely revised at the beginning of fiscal year 1952, introducing a performance-type budget and station operating accounts, the many changes in facilities, policies, and organization which had characterized the first half of 1951 were absent during the new school year. The Artillery School's adjustment to its increased size and mission had been complete and few serious changes were necessary for the remainder of the emergency. The curriculum offered by the School for 1951-52 was slightly smaller than that of the previous year, 20 officer and 20 enlisted courses being given rather than 22 of each as in the fall of 1950.

However during the remainder of 1951, the expanded operations of The Artillery School continued to produce new problems and situations.

The Extension Course program which had been greatly expanded by the emergency effort reached a total enrollment of 7,326 by August 1951. The administration of this number of courses placed a significant strain on the manpower available to the Division of Nonresident Instruction.

In September, because of Army Training Tests, only four field artillery battalions were available for School support and sizable portions of gunnery instruction had to be curtailed. Instruction in air observer procedure was discontinued for the month, and unobserved fire practice periods were only 70 percent effective. Also, the training efficiency of the school troop units available dropped below minimum standards. Consequently, gunnery instructors were used as safety officers, fire direction personnel, and occasionally as telephone operators. The effectiveness of all firing periods was reduced approximately 25 percent because of this difficulty.

During the fall of 1951, transportation shortages also became a source of difficulties. These shortages produced delays in the delivery of students to field exercises, considerable crowding, and, because of a lack of 1/4- and 3/4-ton transportation, a reduction in the supervision of inexperienced instructors. This problem confronted the School throughout the fall and winter of 1951-52. Although various expedient methods were used to lessen the difficulties of the situation, including the use of cross-seats in 2 1/2-ton trucks, shuttle trips to instruction sites, and the trading of School transportation with other agencies at Fort Sill, the

problem was not solved until March 1951 and then only partially, by the assignment of 2 1/2-ton trucks, M-135's to the post.

In addition to these relatively minor problems that developed during the fall of 1951 and which were typical of the entire emergency period, several additions were made to the School mission during that period. In October, a new load of 3,800 Officer Candidate School students was given given The Artillery School for the calendar year 1952 by Army Field Forces. This increase made it necessary for the School to request an increase in the tactical officers allotted the School but otherwise caused no difficulty.

On 8 October 1951, a course of instruction for 100 battery grade officers of the Republic of Korea was initiated by The Artillery School under the mutual Assistance Program. Instruction for the ROK officers was of 20 weeks' duration and was conducted through 9 ROK interpreters, who arrived at the School in the latter part of August. Instructors' outlines were rewritten in Korean by these interpreters and were printed by the Army Field Printing Plant.

The Commanding General, The Artillery Center, was made responsible for furnishing mobile instructional and demonstration teams for the Organized Reserve Corps in the Fourth Army area in late August 1951. The Artillery Center was to furnish two teams, which were selected from the Department of Combined Arms and the Department of Airborne and Special Operations. Preparations for the material to be used by these teams and for their instructional itinerary were made during the fall months, and the teams were dispatched in the first part of January 1952.

1952

The basic changes and improvements in The Artillery School which took place in the first half of 1951 proved effective throughout 1952, and no important modifications were necessary in either the organization or facilities of the School. Enrollment, which stood at 4,100 in January, declined during the remainder of the year, and although the School continued to be faced by supply, facility, and personnel problems typical of a period of expanded operation, no major difficulties or increases in mission were encountered. The strength of the staff and faculty remained between 1,700 and 1,800 throughout the year. In general, the manpower situation in the Army had stabilized by the early part of 1952. During the second year of the Korean emergency, fiscal year 1952, the net strength of the Army increased only 65,000; in all, 465,000 men entered the Army

and approximately 400,000 were released. The mobilization effort had reached an adequate level to support the Korean War, and the stability of the overall situation was reflected in the operation of The Artillery School throughout 1952.

The expansion of the helicopter training program produced serious problems in equipment and instructor personnel in the Air Training Department in the early months of the year.

During the month of July, The Artillery School conducted an experimental 5-day orientation course in fire support coordination for senior officers of all services. Although it had been felt for some time at the School that a course of this type would be extremely valuable to the services and the efficiency of high level fire planning, no further classes in the course were conducted by the School.

Enrollment at The Artillery School stood at 3,220 with the beginning of the courses of instruction for the school year 1952-53 in September 1952. A total of 16 officer, 16 enlisted, and 3 officer and enlisted courses were offered for fiscal year 1953, which represented a decrease in 7 courses from the previous school year. The strength of the staff and faculty remained at approximately 1,800.

However, in spite of the decrease in the enrollment and curriculum of The Artillery School, several significant developments took place in the fall of 1952. On 8 September 1952, the Departments of Airborne and Special Operations and General Subjects were consolidated.

On 24 November 1952, the Office of the Commandant, Field Artillery Officer Candidate School, was established.⁹⁴ The Commandant of the Officer Candidate School was made directly responsible to the Assistant Commandant, The Artillery School, for the operation of the Officer Candidate School, the instruction of the candidates in the courses prescribed by The Artillery School, the coordination of the academic evaluation program of the candidates, and the maintenance of candidates' academic records.

The Artillery School Board was discontinued on 1 December 1952 and its records and files transferred to the Department of Combat Development, which was established on the same date.⁹⁵ The newly established Department of Combat Development was charged with responsibilities similar to those of The Artillery School Board: to review current

doctrine, develop new doctrine, determine material requirements, and coordinate recommendations of this nature made by the instructional departments dealing with their various fields of instruction.

In addition to these organizational changes, work was begun on a \$2,491,868 academic building for The Artillery School in the first week of December 1952. Completion of the building, which was subsequently named Snow Hall, was scheduled within 430 calendar days of the beginning of construction.

By December 1952, personnel shortages had again become a difficulty at The Artillery School. Of the 816 officers authorized the School, only 669 were assigned; and the projected strength for the first quarter of 1953 including anticipated losses and gains was 595. Out of 1,868 enlisted men authorized the School, only 1,375 were assigned at the end of December. Although higher headquarters were advised of the critical shortage of instructors, there subsequently were only small increases in the staff and faculty strength. School enrollment, however, continued to be relatively low in the early months of 1953, and the problem did not reach serious proportions.

1953

Again, in the early part of 1953, few important changes in the organization of The Artillery School were necessary. The peak of mobilization for the Korean emergency had been passed; during fiscal year 1953, the total strength of the Army decreased by 62,600 to a total figure at the end of the year of 1,533,815, and enrollment at the School continued to decline.

On 16 January 1953, the Army Aviation School was established at Fort Sill by the Department of the Army. The school was planned to conduct tactical training for pilots and mechanics of all branches of the Army using light aircraft or helicopters. The Army Aviation School, which in effect continued the mission previously assigned The Artillery School and the Air Training Department, was planned to use the facilities and equipment utilized by the Department of Air Training. On 1 July 1953, the new School became fully operational and the Department of Air Training, The Artillery School, was discontinued.⁹⁶ The responsibilities for Army aviation training, previously assigned the Commandant, The Artillery School, were thereby transferred to the Commandant, Army Aviation School.

On 1 June 1953, all table of distribution spaces allocated The Artillery Center, including The Artillery School Command, were redesignated as the 4050th Area Service Unit.⁹⁷ The designation 4051st ASU was withdrawn from The Artillery School Command and the administrative control of School personnel again transferred to The Artillery Center.

The Korean Armistice was signed on 27 July 1953, ending the period of emergency operation at The Artillery School.

SECTION IV

POST-KOREAN OPERATION, AUGUST 1953-DECEMBER 1957.

During the fall and winter of 1953, following the signing of the Korean Armistice on 27 July, the defense policies of the United States underwent a thorough review by the Department of Defense. This reevaluation of the country's defense plans was brought about partially by the necessity of effecting an efficient transition from a period of expansion to one of peacetime readiness and partially by the realization that the overall defense planning of the nation needed revision in the light of the world conditions prevalent after the Korean conflict. The concept of defense planning in anticipation of a specific year of crisis was discarded, and the country's defense posture was adjusted to meet the conditions of a prolonged period of world tension. Furthermore, it was necessary that the new policy, which was devised to cope with a major war or local aggression, be maintainable at a cost that would not undermine the social and economic framework of the nation. Consequently, although it was planned that the size of the Armed Forces would be reduced to meet peacetime budget limitations, the reduction would be gradual and would be offset substantially by the introduction of new weapons and concepts into use by the services. No rapid demobilization similar to the one that occurred after World War II was envisaged.

The implementation of the new policies of the Department of Defense was carried out in two phases. The first phase involved the establishment of an interim program for fiscal year 1954; the second consisted of the introduction of newly developed concepts in weapons and organization in fiscal year 1955. The preliminary actions taken during the latter part of 1953 were designed to stimulate greater economy and efficiency in defense operations and to provide time for thorough evaluation of existing programs. During fiscal year 1954, the total strength of the Armed Forces of the country was reduced from 3,550,000 to 3,302,000 men. However, during this period the military strength of the services was maintained by the rapid introduction of new weapons and the more effective use of manpower.

For the Army, the year after the armistice represented a period of adjustment to peacetime strength levels and the reshaping of its activities toward the new national military policy. Some primary programs

were curtailed to meet the lowered expenditure objectives placed on the Army. Planned procurement deliveries were stretched out, with accompanying termination of production at selected facilities. Research and development funds were redistributed to maintain long-range balance. Industrial mobilization emphasis was shifted from expansion to improvement.

During fiscal year 1954, the command strength of the active Army decreased from 1,534,000 to 1,405,000--a decline of only 129,000. However, personnel assigned to the Army's operating forces were increased overall from 52 to 60 percent personnel--a total of 46,400 men. The Army's capabilities were also maintained by the introduction of the 280-mm gun, the Corporal surface-to-surface guided missile, and the Honest John free rocket into operational use. A large number of the antiaircraft battalions were converted to the 75-mm AA gun (Skysweeper) and the Nike guided missile.⁹⁶

As a result of these national policy decisions, the transition from a wartime to a peacetime operation at The Artillery School was not marked by the rapid reductions in mission, enrollment, curriculum, and overhead that had characterized the period immediately following the termination of World War II. Enrollment, which had been gradually decreasing since the beginning of 1952, stood at approximately 2,900 in September 1953 with the beginning of the school year 1953-54 and represented a decrease of only a few hundred from the previous fall. Only four fewer courses were scheduled for the new school year. The most noticeable change occurred in the strength of the staff and faculty which was reduced by about 600 following the signing of the Armistice in July. Only 1,300 fewer students were graduated in fiscal year 1954 than in fiscal year 1953, the last year of the Korean conflict.

In addition to the substantially less abrupt transition period at The Artillery School, the revised national defense policy produced two other noticeable effects on the operation of the School in the years following the Korean War. That aspect of the new defense policy which committed the country to a sustained period of military readiness produced a stability in the military establishment of the country which had not existed since the end of World War II. This stability was reflected in the operation of The Artillery School. The enrollment and the curriculum of the School remained at a relatively constant level in the years following the emergency period, and, after the initial organizational changes and adjustments were made at the School in the fall of 1953, there was little

necessity for the periodic reorganization and adjustment of capacity which had characterized the School's earlier World War II operation. Excluding a few minor revisions, The Artillery School was expanded and improved during the period between 1953 and 1957 with significantly more consistency and continuity than had previously been possible.

In addition to this effect, the element in the revised national defense plan which indicated that reductions in the size of the national military establishment would be offset as much as possible by the introduction of technological improvements in the services through increased research and developments was also felt at The Artillery School. During the period following the Korean War, large advances were made toward incorporating new developments in atomics, rockets, and air operations into the Army's organization, tactics, and equipment. These developments led to an increase in the emphasis on research and development at The Artillery School and eventually to the necessity of increasing the facilities and ranges available to the School for instruction in the surface-to-surface missile program.

Almost immediately after the Korean Armistice, The Artillery School underwent a major reorganization which established the form in which it remained for the next four years. On 1 August 1953, the Office, Supervisor of Resident Instruction, and the Office, Supervisor of Nonresident Instruction were discontinued, and their responsibilities and functions transferred to the Office, Deputy Assistant Commandant, and the Department of Publications and Nonresident Training, which were established on the same date.⁹⁹

The Deputy Assistant Commandant was charged with duties identical to those that had been assigned to the Supervisor of Resident Instruction. In turn these were the same duties that had been charged to the Director of Instruction while that position had existed between 1947 and 1949. The Deputy Assistant Commandant was made responsible to the Assistant Commandant of The Artillery School for the direction of the departments of resident instruction, the preparation and administration of all courses of instruction, the scheduling of classes, and the coordination of School activities with School support units and transportation facilities.¹⁰⁰

The Department of Publications and Nonresident Training assumed many of the responsibilities of the Office, Supervisor of Nonresident Instruction. The establishment of the new department represented a consolidation of most of the functions of the Department of Extension Courses and the Department of Training Publications and Aids which were discontinued on 1 August 1953.¹⁰¹ However, the Training Aids Division of the

Department of Training Publications and Aids was made a separate Training Aids Section and transferred to the supervision of the Secretary. The Army Field Printing Plant, which had also worked under the Supervisor of Nonresident Instruction was also placed under the Office of the Secretary. The Editorial Group was discontinued.

The Department of Publications and Nonresident Training was charged with preparing and reviewing all Artillery School training literature, the Extension Course program, and Staff Training programs for the National Guard and Army Reserve programs. It was to assume the responsibilities of The Artillery School in affairs pertaining to nonresident instruction of the Reserve Officers Training Corps.

The general reorganization of The Artillery School which was effected at this time also included the discontinuance of the Department of Airborne and Special Operations. Its personnel and equipment were assigned to the Department of Combined Arms.¹⁰² On 1 December 1953, the Field Artillery Replacement Training Center was discontinued.¹⁰³

By the end of 1953, The Artillery School was fully operational in the organizational form that it would maintain without serious change until the end of 1957. The Office of the Secretary continued to be responsible for the administrative functioning of the School and was in charge of the Academic Records Section; an Allied Liaison Section; the Army Field Printing Plant; the Book Store; U. S. Air Force, U. S. Coast and Geodetic Survey, U. S. Marine Corps, and British Liaison Officer Sections; the Library; the Registrar; and the Training Aids Section. Under the Deputy Assistant Commandant were the departments of Combined Arms, Communications, General Subjects, Gunnery, Materiel, Motors, Observation, and Publications and Nonresident Training. Responsible directly to the Assistant Commandant of The Artillery School were the Department of Combat Development and the Officer Candidate School.

1954

During 1954, there were few important developments in The Artillery School. Enrollment stabilized between 2,100 and 3,100 established a fairly permanent school load. A total of 9,083 students were graduated from The Artillery School during calendar year 1954 as compared to 9,624 for calendar year 1953. The strength of the staff and faculty remained at about 1,200 throughout the year.

On 1 March 1954, the Department of General Subjects was discontinued at The Artillery School.¹⁰⁴ Its noninstructional functions including the Examination Review Board, The Artillery School Instructor Training Program, and the Corrective Reading Program were transferred to the Office of the Deputy Assistant Commandant, organized into a section and placed under the direction of a Director of Instruction. The Director of Instruction established at this time was designated as the Educational Adviser to The Artillery School. He was made responsible for the supervision and coordination of the policy and operations of all activities relating to instructor and instructional supervisor training and educational testing, evaluation, and research at the School. The Methods of Instruction Division and the Management Division of the Department of General Subjects were transferred to the Department of Combined Arms.

On 1 April 1954, the Department of Combined Arms was redesignated the Department of Tactics and Combined Arms.¹⁰⁵ During the month of April, the Museum was transferred from the supervision of The Artillery School to the supervision of The Artillery Center.

By the beginning of August 1954, the administrative wing of the new school academic building, Snow Hall, had been completed and The Artillery School had begun to move its McNair Hall offices to the new building. During the first weeks of August the offices of the Department of Gunnery and the Department of Tactics and Combined Arms were also moved to the new school academic building. On 14 August 1954, Snow Hall was officially opened. The building, which contained 190,000 square feet of floor space and facilities to accommodate 2,500 students, furnished The Artillery School with a centralized location for both its headquarters and classrooms. Snow Hall, which is air-conditioned and equipped with modern instructional equipment, fulfilled a need which The Artillery School had recognized and sought to alleviate by requests for an adequate academic building since the years immediately following World War II.

On 13 September 1954, classes were begun in the academic wing of Snow Hall. All officer courses were moved to the building. In anticipation of using Snow Hall for classrooms during school year 1954-55, the Battery Officer Course was transferred from the OCS area in the western part of Fort Sill where it had been moved in 1951, and the 2d Officer Student Battery, which had served it, was discontinued on 5 August 1954.¹⁰⁶

In spite of the fact that hostilities had been concluded for more than a year, enrollment at The Artillery School rose to 3,200 in the fall of 1954 as the School adjusted to its expanded peacetime mission. A total of 29 courses were offered by The Artillery School for the school year 1954-55 as compared to 31 courses offered the previous school year.

1955

There were no major developments in The Artillery School during 1955. Enrollment levels and total school output declined slightly during the year as a total of 8,507 students graduated from the School during fiscal year 1955. A total of 9,083 students had graduated from The Artillery School during fiscal year 1954.

However, in the spring of 1955, important changes in the missions of The Artillery School and The Artillery Center were put into effect by the Department of the Army.

Prior to and during World War II, Artillery officers were school-trained in either field artillery or antiaircraft artillery but not in both. After the war, and faced with a rapidly diminishing troop base, the Army determined that maximum utilization and flexibility in assignment of Artillery officers could be achieved best by training them in all weapons of both artilleries. Accordingly, the two branches were merged into a single Artillery branch in 1950 and provisions were made for cross training in the two categories of weapons. The Artillery Center, however, had remained primarily responsible for the development and teaching of field artillery doctrine while the facilities at Fort Bliss were used for the same activities pertaining to antiaircraft artillery. The cross training had been achieved by controlling the input of students and their initial and subsequent assignments to units, by transition courses, and by movement of students in the advanced course between the two schools.

However, in the years following World War II, the Army had undertaken an extensive research and development program in rockets and guided missiles. This activity had been centered in the El Paso, Texas area because of the facilities at White Sands Proving Grounds. By 1955, the program had progressed to the point that the Army had available for operational use two categories of missiles: those designed for use against airborne targets (surface-to-air missiles) and those designed for use against ground targets (surface-to-surface missiles).

As these missiles became operational and production permitted, units were activated, organized, and trained with the new weapons; and as the number of active units increased, it became increasingly clear that the Army could no longer continue to train all Artillery officers in both surface-to-surface and surface-to-air functions. The complexity of equipment related to the new weapons, the differing techniques required, and the economic limitations placed upon the length of time an officer could be retained in student status dictated a change in methods.

The first evidence of the recognition of this necessity by the Army was the redesignation of The Artillery Center and The Artillery School as The Artillery and Guided Missile Center and The Artillery and Guided Missile School respectively on 13 April 1955.¹⁰⁷

Concurrent with the redesignation of The Artillery School, the Anti-aircraft and Guided Missile Branch of The Artillery School was separated and redesignated as The Antiaircraft Artillery and Guided Missile School.¹⁰⁸ The separation and redesignation of The Antiaircraft Artillery and Guided Missile School, however, did not alter its relationship with other Army schools or military agencies.

In May 1955, upon the recommendation of the Commanding General, Continental Army Command, and the Commandants of both artillery schools, the Department of the Army approved the anticipated change in training methods. This change, which was to be partially implemented in fiscal year 1957, provided that as a general policy the school training of artillery officers would be in either surface-to-surface artillery or surface-to-air artillery, but not both, below the advanced course level. The change was designed to apply to all weapons, whether rocket, missiles, or conventional gun, designed to fire on either a surface or an air target.

Initially, because of the proximity of adequate ranges and test facilities, the Army's missile activities had been centered around Fort Bliss, regardless of the particular categories of the missiles. However, as the missile program progressed technically and the need for the development of tactical and organizational doctrine became pressing, it became clear that the school having primary tactical interest in the weapon should be responsible for this aspect of its use. Also, there was a necessity for integrating the particular weapons into the framework of conventional weapons in either field.

Because of these considerations, the Commandant of The Artillery and Guided Missile Center at Fort Sill was given the responsibility for developing tactical and organizational doctrine for surface-to-surface artillery (the Honest John and the Corporal) and conventional field artillery, while the Commandant at Fort Bliss retained the responsibility for surface-to-air artillery. Based on these decisions in the training and development of the surface-to-surface missile program, the Department of the Army also decided to transfer from Fort Bliss to Fort Sill approximately 10 school courses or portions of courses on surface-to-surface subjects and 2 Corporal battalions. Concurrent with the transfer of courses, an appropriate number of staff and faculty members were to be transferred with the training aids and classroom equipment related to the courses. In substance, it was anticipated that the personnel to be transferred would include 33 officers, 16 warrant officers, 117 enlisted men, and 3 civilians. An intraining load of approximately 200 students was also to be transferred.

The reasons for the transfer, which was scheduled to begin in fiscal year 1957, were to place with the appropriate school commandant the instructional responsibility for his assigned field, to further the development of doctrine, and to allow greater emphasis to be placed on both surface-to-air and surface-to-surface artillery.

The transfer of the two Corporal battalions from Fort Bliss to Fort Sill was scheduled to take place prior to the end of fiscal year 1956. This transfer was necessary in order to provide the commandant at Fort Sill with the personnel and equipment necessary to accomplish his mission in the organizational and doctrinal field. Because of the available ranges at Fort Bliss and White Sands Proving Grounds, test activities for both surface-to-air and surface-to-surface remained with Continental Army Command Board No. 4 at Fort Bliss.

On 2 May 1955, the Department of Communications was redesignated the Department of Communication and Electronics.¹⁰⁹

During 1955, the general organizational structure of The Artillery and Guided Missile School remained unchanged. However, several administrative improvements were made within the Office, Deputy Assistant Commandant. A Plans Section and an Operations Section were established under the Deputy Assistant Commandant, and the Training Aids Section was moved from the supervision of the Secretary to that of the Deputy Assistant Commandant.

1956

Again, during 1956, there were no major changes in the organization or the facilities of The Artillery and Guided Missile School. However, in March 1956, a Plans and Programs Division was added to the administrative staff working under the Office of the Secretary. The new division was planned as the focal point for the development, review, and analysis of school programs. The duties of the Plans and Programs Division included the supervision of military and civilian personnel spaces at the School, the staff supervision of the management improvement program of the School, the staff supervision of the extension and use of performance analysis and cost accounting as elements of the Army Command Management System, and the supervision, as the principal staff agency of the Assistant Commandant, of the Assistant Commandant's responsibilities for budget formulation and execution.

Although there were few organizational changes in 1956, during the year, steps were taken to prepare the Artillery and Guided Missile School and the facilities of The Artillery and Guided Missile Center for transfer of the surface-to-surface missile program from Fort Bliss to Fort Sill. Early in February 1956, the U. S. Army District Engineer office at Tulsa, Oklahoma, began purchasing 20,320 acres of privately-owned land west of Fort Sill. The money for this property, which was to be used to extend the usable range at The Artillery and Guided Missile Center to accommodate the missile program, had been appropriated by Congress in the summer of 1955 and allocated by the Bureau of the Budget to the U. S. Corps of Engineers, who conducted the purchase of the land through the district office at Tulsa. In all, 20,240.96 acres were officially transferred to The Artillery and Guided Missile Center by the Tulsa district office on 1 January 1957.

On 9 February 1956, the first guided missile battalion to be assigned to Fort Sill arrived at The Artillery and Guided Missile Center from Fort Bliss. By early April, plans for moving the surface-to-surface courses from Fort Bliss to Fort Sill were reaching the final stages at Fourth Army. It was anticipated that surface-to-surface instruction would cease at Fort Bliss in December 1956 and be resumed at The Artillery and Guided Missile School early in 1957.

In July of 1956, Congress approved a \$4,173,000 construction program at Fort Sill for fiscal year 1957. The construction program included plans for a \$1,563,000 communication and electronics building and a \$2,610,000 addition to the building used by the Department of Materiel. The additions were to be used to accommodate the additional instruction that it would be given by the Departments of Communication and Electronics and Materiel as a part of the missile courses being transferred to The Artillery and Guided Missile School.

In the fall of 1956, enrollment at The Artillery and Guided Missile School rose to approximately 2,200 as the courses of instruction for the school year 1956-57 began. The transfer of the missile courses from Fort Bliss to The Artillery and Guided Missile School was begun ahead of the original schedule, and, during the fall and winter of 1956-57, artillery surface-to-surface missile courses were added to the curriculum of the School.

1957

Effective 1 January 1957, The Artillery and Guided Missile Center and The Artillery and Guided Missile School were redesignated the U. S. Army Artillery and Guided Missile Center and U. S. Army Artillery and Guided Missile School.¹¹⁰ On 1 July 1957, the Center and the School were again redesignated the U. S. Army Artillery and Missile Center and the U. S. Army Artillery and Missile School.¹¹¹

By early 1957, the surface-to-surface missile program at the U. S. Army Artillery and Missile School was well underway, and plans were being made for the addition of Redstone missile courses to the courses already being taught in the Honest John and Corporal.

As a part of the overall transfer of surface-to-surface missile training from Fort Bliss to Fort Sill, the Field Artillery Guided Missile Training Command was activated at Fort Sill on 1 June 1957.¹¹² The newly activated command was made responsible for training enlisted men for duty with Corporal guided missile battalions throughout the Army.

In the fall of 1957, enrollment at the U. S. Army Artillery and Missile School rose to 2,700 as the additional input of the missile courses increased the School capacity to its highest peak since 1954. The greatly increased mission of the School was reflected in its curriculum of 41 courses for the school year 1957-58, which represented the largest curriculum since 1952.

On 1 October 1957, the U. S. Army Artillery and Missile School was reorganized by the establishment of a Deputy Assistant Commandant for Instruction and a Deputy Assistant Commandant for Research and Development.¹¹³ The establishment of these offices, which represented the first major reorganization of the School since the establishment of the Deputy Assistant Commandant in August 1953, was made necessary by the increasing importance of the research program at the U. S. Army Artillery and Missile School.

The establishment of Deputy Assistant Commandant for Instruction represented a redesignation of the previously established Deputy Assistant Commandant, and the duties and responsibilities of the position remained the same.

However, the Deputy Assistant Commandant for Research and Development was an entirely new position. This office was responsible for the coordination of the overall research and development program of the School. The duties of the Deputy Assistant Commandant, Research and Development, included supervision of the long-range development program of the Combat Development Department and the research and review activities of the instructional departments. He was made responsible for presenting a coordinated School position to the Assistant Commandant on all research and development matters. He was also charged with the coordination of the liaison activities between the U. S. Army Artillery and Missile School; U. S. Army Boards; and other military and civilian research, developmental, and manufacturing agencies.

By the end of 1957, the U. S. Army Artillery and Missile School had become, both organizationally and in regard to its physical plant, an efficient instrument of Artillery instruction and research. In the twelve years that had elapsed since the conclusion of World War II, perhaps the most active period in the School's history, it had been confronted with practically all of the problems peculiar to the operation of a service school. During this period the School had undergone a rapid demobilization, a period of extremely curtailed postwar operation, a partial peacetime expansion, the mobilization for the Korean emergency, and finally a period of expanded peacetime operation. Each of these phases of the School's operation reflected the demands of changing national defense and economic policies and were marked by significant alteration in the School's mission and capacity. Each had its characteristic problem. It was through the solution of these problems that the School evolved from the relatively limited establishment that it was immediately following World War II to the effective and more broadly oriented institution of 1957.

But, by 1957, it had become evident that an even more significant expansion of the U. S. Army Artillery and Missile School would be necessary in the future. Technology had become an increasingly important factor in modern warfare, and the introduction of missiles into the field army had changed the scope and the problems of the artillery. By the beginning of 1958, the transition of the School from The Artillery School

to the U. S. Army Artillery and Missile School was well underway. Nevertheless, continued technological developments in the field of missiles made it clear that a sizable expansion of the facilities and curriculum of the School would be necessary if it were to properly fulfill its mission as the primary instrument of the U. S. Army Artillery and Missile Center in the instruction of field artillery employment and the development of adequate technical and tactical doctrine for the United States Artillery in the emerging era of missiles.

The material used in Section 3 dealing with the effect of the Korean Emergency on The Artillery School represents a condensation of the Record of Events kept by Office of the Secretary during the emergency period. This record, which was written by the major agencies of The Artillery Center throughout the period 1 Jun 50-30 Apr 53, was initiated by Headquarters, The Artillery Center, for the purpose of furnishing information to be used for planning in possible future emergencies. With the exception of the first few reports, reference was not made by the Secretary's office to correspondence initiating the developments recorded in the reports. Consequently, complete references have been omitted in this account.

HISTORY OF THE U. S. ARMY ARTILLERY AND MISSILE SCHOOL

1945 - 1957

PART TWO

Organizational Outline and Charts of the
U. S. Army Artillery and Missile School;
Outlines of the School Command, Support
Units, and Existing and Discontinued De-
partments and their Directors.

SECTION I

ORGANIZATIONAL OUTLINE OF THE SCHOOL AND SCHOOL COMMAND, 1945-1957.

1945

At the conclusion of World War II, in September 1945, the Field Artillery School, as the U. S. Army Artillery and Missile School was then officially designated, was operating independently of Post Headquarters according to a policy adopted by the War Department in the spring of 1942 which placed the operation of posts, camps, and stations under the Army Service Forces.¹ The Commandant of the School was responsible only for the school, operating directly under the Commanding General, Replacement and School Command, Birmingham, Alabama, who was, in turn, directly responsible to the Commanding General, Army Ground Forces, Washington, D. C.

Organ-
ization FAS
Sep 1945 The Field Artillery School was composed of the Staff and Faculty, The Field Artillery School Detachment, and the Field Artillery School Troops. The Rocket Board at Fort Sill was also under the Commandant of the Field Artillery School.²

Staff The staff consisted of the Executive; the usual four staff sections, S1, S2, S3, and S4, and a special staff composed of four sections: Adjutant General, Inspector General, Range Officer, and Public Relations. Included in the S3 Section were the Training Literature and Visual Aids Section and the Editorial Group. The Book Store and the Reproduction Plant were a part of the S4 Section.³

Faculty The Faculty, under the direction of the Assistant Commandant, who was assisted by the Executive and the Secretary, consisted of seven instructional departments, each headed by a director. These departments were Air Training, Combined Arms, Communications, Gunnery, Materiel, Motors, and Observation.⁴

FAS De-
tachment

Comprising the Field Artillery School Detachment were Student Headquarters "A" and "B" and six battalions. All enlisted personnel of the permanent party of the School, exclusive of School Troops, were assigned to the Detachment. All enlisted students were attached to the Detachment and carried as attached unassigned or attached from other organizations.⁵

School
Troops

The School Troops, according to a reorganization adopted in February 1945,⁶ consisted of a headquarters detachment; five field artillery training detachments; a field artillery observation training detachment; and field artillery motor, range, airplane maintenance, night vision, and radar maintenance detachments.

Personnel administration for all personnel of the Staff, Faculty, and Detachment was centralized in the headquarters of the School. Individuals were assigned for duty to the Office of the Assistant Commandant, the staff sections, the instructional departments, and the Detachment. The officers assigned to these various units were under the control of the heads of the units at all times. The enlisted personnel were under such control during duty hours only; at all other times they were under the control of the Commanding Officer of the Detachment.⁷

AGF Air
Tng Sch es-
tablished 7
Dec 1945

The first organizational change within the School after the war was the redesignation of the Air Training Department, in accordance with an Army Ground Forces directive dated 16 November 1945,⁸ as the Army Ground Forces Air Training School. This change, which was adopted in order to afford air training for five other ground arms which had been given organic aviation by the War Department, became effective 7 December 1945.

1946

Several important changes took place within the Field Artillery School in 1946 as well as a major reorganization of the Army school system and the integration of the Field Artillery School with the Coast Artillery School and The Antiaircraft Artillery School.

Dept of Ext
Crs reestab-
lished 2 Apr
1946

On 2 April 1946, the Department of Extension Courses, which had been discontinued for the duration of the war, was reestablished at the Field Artillery School.⁹ This was done in order to provide adequate facilities for handling the additional functions placed on the School by the reestablishment of the Army Extension Course program, which had been announced by the War Department in December 1945.¹⁰

FAS De-
tachment re-
designated
10 Apr 1946

During the spring and summer of 1946, the Field Artillery School Detachment and the Field Artillery School Troops were redesignated. The School Troops were renamed twice. Effective 10 April 1946, the Field Artillery School Detachment was eliminated by redesignating each of its six battalions.¹¹ An example of the renaming is: the First Battalion, Field Artillery School Detachment, became the First Detachment, Field Artillery School. The School thus had six detachments, known as the Field Artillery School Detachments.

Sch Troops
redesignated
10 Apr 1946

Concurrent with the redesignation of the School Detachment, on 10 April, the School Troops were redesignated.¹² In order that the training units would more closely approximate table of organization units, including designations, the training detachments were redesignated as battalions. The change, however, proved temporary. In order to perpetuate the names of units with distinguished combat records, the training units were reorganized and activated as table of organization units on 1 Aug 1946.¹³

Sch Troops
redesignated
1 Aug 1946

On 8 October 1946, in compliance with instructions received from the War Department, Headquarters, Fort Sill, and Headquarters, The Field Artillery School, Fort Sill, were consolidated.¹⁴ At the same time the Training Literature and Visual Aids Section was placed under the supervision of the Assistant Commandant.¹⁵ This change was effected because the work of the section, which had previously been a function of the S3 Section, was closely related to that of the instructional departments.

The Artillery Center and The Artillery School Established

TAC and
TAS estab-
lished 1 Nov
1946

On 1 November 1946, The Artillery Center was established at Fort Sill in accordance with instructions from Headquarters, Army Ground Forces. The Armored and Infantry Centers and the Ground General School Center were established at this time under the same authority.¹⁶

The Artillery Center was composed of The Artillery School, as the Field Artillery School had been redesignated, and all Army Ground Force units at Fort Sill on that date. The Artillery Center and the Artillery School continued to operate with the same staff, as consolidated on 8 October 1946.

Replace-
ment and
Sch Comd
discontinued
1 Nov 1946

The establishment of The Artillery Center was a part of a major reorganization of the Army school system and the consolidation of the three artillery schools. The Replacement and School Command under which the School had operated since 27 March 1942 was discontinued concurrently with the establishment of The Artillery Center on 1 November 1946,¹⁷ and The Artillery School was placed under the direct control of the Commanding General, Army Ground Forces.¹⁸ At the same time, The Artillery School, located at Fort Sill, was consolidated with the Coast Artillery School, Fort Scott, California, and The Antiaircraft Artillery School, Fort Bliss, Texas. The two latter schools were redesignated The Seacoast Branch of The Artillery School and The Antiaircraft and Guided Missile Branch of The Artillery School. The two branches were exempted from Army control and placed under the control of The Artillery School.¹⁹

Under the new organization, the Commanding General of The Artillery Center was made Post Commander at Fort Sill and the Commandant of The Artillery School. Under him were three assistant commandants, the Commandants of the two branches of The Artillery School (Seacoast Branch, TAS, and AA&GM Branch, TAS) and the assistant Commandant in direct charge of The Artillery School at Fort Sill.

The Assistant Commandant of The Artillery School was responsible for the activities and functions of the School only. Working directly under the Assistant Commandant, and in charge of the administrative supervision of the instructional departments of the School, was the Secretary.

Air Trng
Dept rees-
tablished
Nov 1946

The reorganization and consolidation of the artillery schools did not necessitate any changes in the departments of instruction in The Artillery School at Fort Sill. However, the Army Ground Forces Air Training School at Fort Sill was discontinued and Air Training reestablished as a department in The Artillery School, in November 1946.²⁰

The reorganization of the Schools did not effect The Artillery School detachments, which remained unchanged within the organizational framework. However, School Troops, in the sense that they had previously existed as being attached to the Field Artillery School, were discontinued. The 5th FA Group, which continued to support the School, was now attached to The Artillery Center and fulfilled school requirements as channelled through the Center.

FA OCS
discontinued
12 Dec 1946

The final School organizational change of 1946 occurred when the Field Artillery Officer Candidate School, which had been established in January 1941 to meet the needs of the Army during World War II, was discontinued on 12 December 1946.²¹ Its discontinuance was authorized by Headquarters, Army Ground Forces.

1947

In 1947, The Artillery School's continued adjustment to its peacetime mission dictated the establishment of several new departments as well as a few organizational changes.

Dir of Instr
established
30 Jul 1947

The most important organizational change that took place during the year was the establishment, on 30 July 1947, of the Office of the Director of Instruction.²² The Director of Instruction, which was for a short time named

the Director of Training, was designated the Executive Officer for the Assistant Commandant and charged with the administration of instruction conducted by The Artillery School. The Director of Instruction was assisted in these duties by an Editorial Group. The only other organizational change in 1947 was the transfer of the Bookstore and the Library to the supervision of the Secretary and the addition of an Assistant Secretary to the administrative staff.

Dept of Gen
Subj estab-
lished Jan
1947

In January 1947, at the request of the Commandant of The Artillery School the addition of the Department of General Subjects to the School was authorized by Headquarters, Army Ground Forces.²³ The nucleus of the department was the Technique of Instruction Section. This section was formerly a part of the Department of Gunnery and was supervised by the Assistant Commandant. The department was made responsible for all subjects which did not properly belong to any of the other departments of instruction.

Dept of Mo-
tors discon-
tinued 20
Mar 1947

On 20 March 1947, pursuant to instructions from Headquarters, Army Ground Forces, the Department of Motors was discontinued at The Artillery School.²⁴ The specialist motors courses at the School had been discontinued, and all motor courses were moved to The Armored Center, Fort Knox, Kentucky, thus eliminating the necessity for the department at Fort Sill. However, the property records, equipment, and other administrative records of the Department of Motors were transferred to the Department of Materiel, and a Motors Section subsequently was established on 10 December 1948.

Dept of
Analysis
and Re-
search es-
tablished
1 Jul 1947

Effective 1 July 1947, the Department of Analysis and Research was established.²⁵ Its duties were to conduct research in new technological developments in Artillery and review past records in order to recommend new artillery doctrine and correct doctrine as taught by The Artillery School. This department was also to maintain liaison between The Artillery School and the research elements of The Command and General Staff College and the various Army Field Boards and branch schools. The establishment of the Department of Analysis and Research was a major

step in the elimination of duplication of effort by the various departments of The Artillery School and toward channelizing of artillery research at the School. It represented the last departmental change in the School during 1947.

By the end of 1947, The Artillery School detachments were so organized as to be composed of a Headquarters, TAS Detachment; the 1st, 2d, 3d, and 4th TAS Detachments; and a Student Officers Detachment.

1948

Dept of
Training
Literature
and Visual
Aids estab-
lished 19
Jul 1948

By 1948 the organizational and departmental structure of The Artillery School had been adjusted to the needs of the postwar situation and few changes were necessary within the School. The only departmental addition during the year took place when The Training Literature and Visual Aids Section was established as a department effective 19 July 1948.²⁶

However, the lines of responsibility and command within the Army school system were reorganized on 5 June 1948 at which time the major Army schools were classified as class I activities by the Department of the Army and placed under the Commanding General of their respective Army areas.²⁷ Programs, policies, instruction, doctrine, and curricula and inspections in connection with these matters still remained the primary responsibility of Army Field Forces, as Army Ground Forces had been redesignated in March 1948. In addition, The Artillery School remained under the Commandant, Command and General Staff College, for coordination of instruction and doctrine, programs of instruction, training literature, and other matters pertaining to the scope or curricula of instruction.

TAS and TAS
Det 4011th
ASU 5 Jun
1948

In June 1948, The Artillery School and The Artillery School detachments were assigned to the 4011th Area Service Unit.²⁸ This unit was redesignated, effective 15 September 1948, as the 4051st Area Service Unit.²⁹ At

TAS and TAS this time the following units were assigned as The Artillery School detachments:

Det 4051st
ASU 15 Sep
1948

4051st ASU, The Artillery School
4051st ASU, 1st Detachment, TAS
4051st ASU, 2d Detachment, TAS
4051st ASU, Enlisted Student Detachment A, TAS
4051st ASU, Enlisted Student Detachment B, TAS
4051st ASU, Art Training Student Officer Detachment, TAS
4051st ASU, Student Officer Detachment, TAS

1949

Dir of
Instr dis-
continued
Nov 1949

The only major organizational change in 1949 was the discontinuance of the Office of the Director of Instruction in November. No similar office was created to perform the functions of the Director of Instruction until the establishment of the Office of Supervisor of Resident Instruction on 23 July 1951.

Dept of Air-
borne and
Special Op-
erations es-
tablished 26
Sep 1949

On 26 September 1949, the Department of Airborne and Special Operations was established.³¹ The department was charged with the development of artillery doctrine, policy, procedure, and technique for airborne operations and special operations including amphibious, arctic, and desert operations. It was responsible for the preparation of instructional material and the conduct of all instruction in the School relating to those subjects. The department also planned and supervised all demonstrations pertaining to airborne and special operations.

Dept of An-
alysis and
Research
discontinued
31 Oct 1949

On 31 October 1949, the Department of Analysis and Research was discontinued and its records and files transferred to the Secretary for disposition.³²

A Department of Special Courses was established in 1949, and a director was designated for the Special Associate Basic Course that was offered allied officers. The 501st Aerial Photograph Interpretation Detachment was attached to the School during the year,³³ and an Operations Section was established under the direction of the Secretary.

TAS and TAS
Det redesignated 4050th
ASU 5 Jul
1949

The Artillery School and its detachments were redesignated again in 1949 at which time The Artillery Center, including the activities and functions of the Station Complement, and The Artillery School were designated as the 4050th Area Service Unit.³⁴ Area Service Unit numbers 4011 and 4051, previously assigned to Station Complement and The Artillery School respectively, were withdrawn effective 5 July 1949. This brought about the following changes in The Artillery School and its detachments:

1950

Seacoast
Br, TAS,
discontinued
15 Jun 1950

Although the Seacoast Branch of The Artillery School was discontinued on 15 June 1950,³⁵ no further organizational changes were necessary within The Artillery School before the outbreak of the Korean War on 25 June 1950. However, the rapid expansion of the Army following the outbreak of war and the resultant increase in the School's

enrollment and mission were responsible for several changes in the School's organization during the remainder of 1950 and in 1951.

Div of Tng
Pub estab-
lished 15 Sep
1950

The first attempt to change the organization of the School to meet the needs of the emergency period was the organization and establishment of the Division of Training Publications on 15 September 1950.³⁶ The establishment of this division represented the consolidation into a single administrative unit of the functions and responsibilities of the Department of Extension Courses, the Department of Training Publications and Aids, the Editorial Group, and the Army Field Printing Plant. To accomplish this consolidation, the Departments of Extension Courses and Training Publications and Aids were discontinued and redesignated as the Training Literature Branch, the Training Aids Branch, and the Extension Courses Branch of the Division of Training Publications.³⁷ The Editorial Group, which had been placed under the Secretary after the discontinuance of the Director of Instruction, and the Army Field Printing Plant were moved under the supervision of the new division. The Director of the Division of Training Publications was made responsible for training literature and publications of the Artillery School, the extension course program, and the preparation and maintenance of training aids used by the School.

Dept of Mo-
tors rees-
tablished 1
Dec 1950
FARTC es-
tablished 15
Aug 1950

On 1 December 1950, the Department of Motors was reestablished.³⁸ Initially, the director of the Department of Materiel served as its director.

Student Detachment A, 4050th ASU, TAC, was discontinued on 18 August 1950. On 15 August 1950, the Artillery Replacement Center, which worked in conjunction with The Artillery School for the duration of the war, was established.³⁹ Its name was changed to the Field Artillery Replacement Training Center on 3 October 1950.⁴⁰

During 1950, an Allied Officer and Civilian Components Section and a Supply Section were added to the Book Store and the Library in the administrative portion of The Artillery School under the supervision of the Secretary.

1951

The steps taken in 1950 to organize The Artillery School along lines adequate to the demands of the emergency situation proved insufficient, and, in 1951, the School underwent a more complete reorganization. Under the reorganization in 1951, the administrative responsibilities of the School were divided into two divisions, one devoted to nonresident instruction and the other to resident instruction.

discontinued
1 Mar 1954

On 1 March 1954, the Department of General Subjects was discontinued.⁶⁶ Its functions including the Examination Review Board, The Artillery School Instructor Training Program, and the Corrective Reading Program were transferred to the Deputy Assistant Commandant, where they were organized into a section under the supervision of a Director of Instruction. The Methods of Instruction Division and Management Division of the Department of General Subjects was transferred to the Department of Combined Arms.

On 1 April 1954, the Department of Combined Arms was redesignated the Department of Tactics and Combined Arms.⁶⁷ The 2d Officer Student Battery, 4050th ASU, was discontinued on 5 August 1954.⁶⁸ During the year, the Signal Corps Engineer Laboratories were added to the administrative staff working under the Secretary, and the museum was transferred to the supervision of the Artillery Center.

1955

TAC and
TAS re-
designated
13 Apr 1955

On 13 April 1955, The Artillery Center and The Artillery School were redesignated The Artillery and Guided Missile Center and The Artillery and Guided Missile School. ⁶⁹

AA&GM Br,
TAS rede-
signed 13
Apr 1955

On the same date, the Antiaircraft and Guided Missile Branch of The Artillery School was redesignated The Antiaircraft Artillery and Guided Missile School. ⁷⁰ The redesignation of The Antiaircraft and Guided Missile School did not alter its relationship with other Army schools or military agencies.

On 3 March 1955, that portion of the unit designation of The Artillery and Guided Missile School Command, 4050th Area Service Unit, which read ASU was altered to read SU. ⁷¹

During 1955, the general organizational structure of the School remained unchanged. However, several administrative improvements were made within the Office, Deputy Assistant Commandant. A Plans Section and an Operations Section were established, and the Training Aids Section was moved from the supervision of the Secretary to that of the Deputy Assistant Commandant.

On 2 May 1955, the Department of Communications was redesignated the Department of Communications and Electronics. ⁷²

1956

Again, in 1956, there were no important organizational changes within The Artillery and Guided Missile School. A Plans and Programs Section was added to the administrative staff working under the Secretary.

1957

On 1 January 1957, The Artillery and Guided Missile Center and The Artillery and Guided Missile School were redesignated the U. S. Army Artillery and Guided Missile Center and the U. S. Army Artillery and Guided Missile School. ⁷³

DAC, R&D
established
1 Oct 1957

The organizational structure of the School, as established in 1953 remained intact. The only significant addition of the School was the establishment on 1 October 1957 of the Deputy Assistant Commandant, Research and Development.⁷⁴ This office was made responsible for the coordination of the overall research and development of the U. S. Army Artillery and Guided Missile School. Concurrent with the establishment of the office, The Deputy Assistant Commandant was redesignated the Deputy Assistant Commandant for Instruction.

During 1957, the School's name was changed again. On 1 July 1957, the word "Guided" was dropped from the name of both the Center and the School. They were redesignated the U. S. Army Artillery and Missile Center and the U. S. Army Artillery and Missile School.⁷⁵

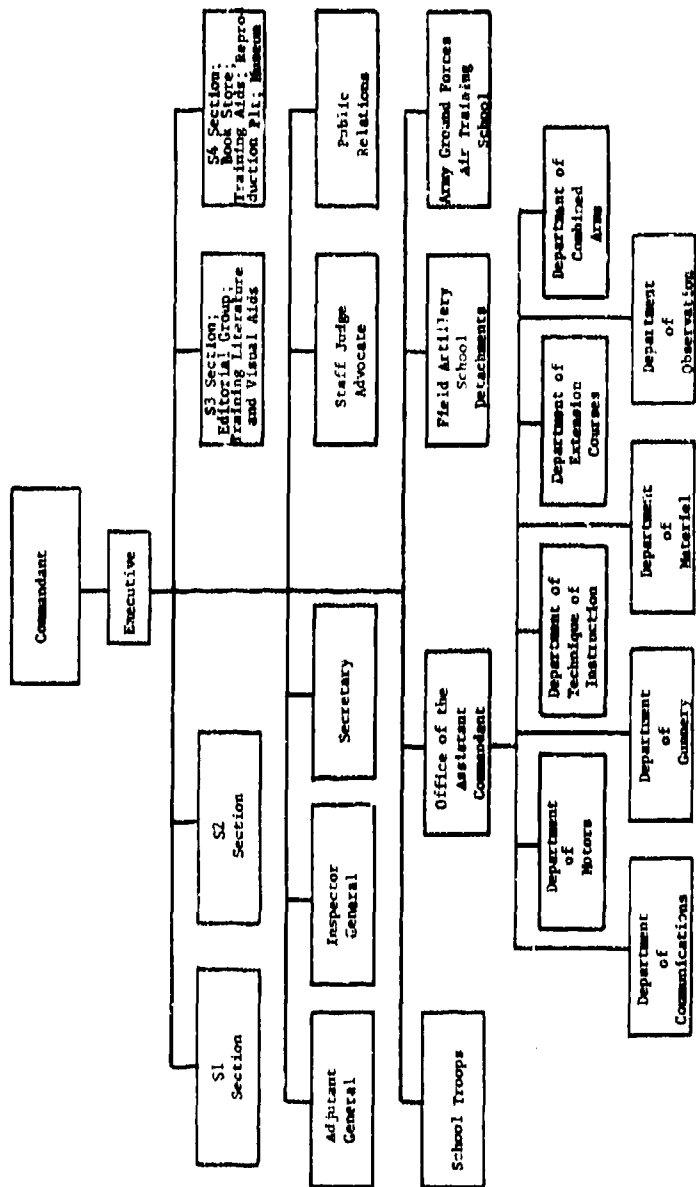

Thus by the end of 1957, the organizational structure of the U. S. Army Artillery and Missile School, which had undergone several major reorganizations since the conclusion of World War II, had stabilized to a degree of permanency. Working directly under the Assistant Commandant were the Deputy Assistant Commandant, Research and Development; the Deputy Assistant Commandant for Instruction; the Commandant, Officer Candidate School; and the Secretary. Only the Office of the Secretary had been in existence in 1945.

Working under the Deputy Assistant Commandant, Research and Development, were the Combat Development Department and the Research and Review sections of the academic departments through their respective department directors.

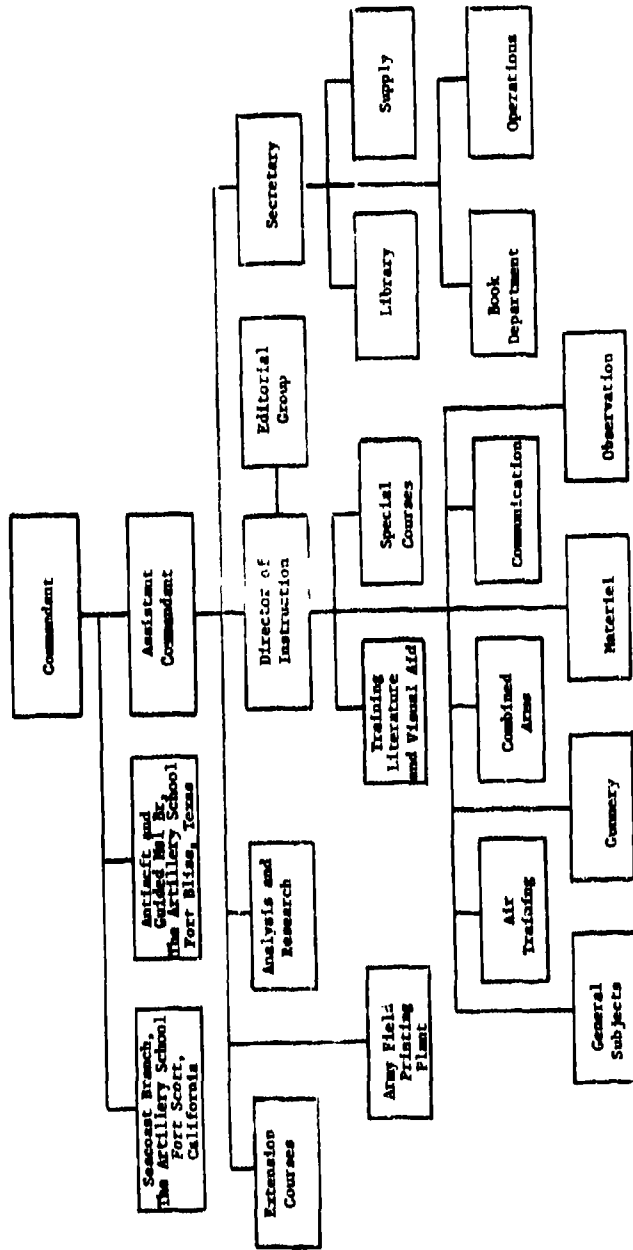

The Deputy Assistant Commandant for Instruction was responsible for the Training Aids Section; the six departments of resident instruction--Communication and Electronics, Gunnery, Materiel, Motors, Observation, and Tactics and Combined Arms; and the Department of Publications and Nonresident Training.

The Secretary was responsible for the administration and correspondence, security, personnel allocation and assignment, the operation of the Army Field Printing Plant, Book Department, School Library, and the Allied Liaison Office. As program director for the School, he directed funding, manpower, management, and other activities of the Army Command Management System.

Organization of the Artillery and Guided Missile School, May 1955

Organization of the U. S. Army Artillery and Missile School, October 1957

SECTION III

SCHOOL SUPPORT UNITS, 1945-1957

During World War II, a great number of field artillery units served the Field Artillery School as school troops, some actually designated as such and others functioning in that capacity while temporarily attached to the School. During the earlier period of World War II the field artillery of various divisions moved into Fort Sill for 30 days at a time for firing. Later they moved in for more extended periods. These units assisted the regularly assigned school troops to fulfill School requirements, particularly service practice.⁷⁶

On 18 April 1940, the 18th Field Artillery Regiment was officially designated as School Troops by the War Department.⁷⁷ On 15 July 1942, the Field Artillery School troops were organized into a groupment.⁷⁸ This arrangement lasted until 19 January 1943 when Headquarters and Headquarters Battery, 17th Field Artillery Brigade, was activated and all school troop units previously included in the groupment attached to it.⁷⁹ In anticipation of the departure of the Headquarters and Headquarters Battery, 17th Field Artillery Brigade, for overseas duty, Headquarters and Headquarters Battery, 31st Field Artillery Brigade, was activated at Fort Sill on 7 December 1943.⁸⁰ On 21 December 1943, a number of units were transferred from the 17th Field Artillery Brigade to the newly organized 31st Field Artillery Brigade so that they might continue to be used in school support.⁸¹

The manpower situation, particularly the need for overseas replacements, prompted Army Ground Forces, in November 1944, to explore the possibility of replacing school troops table of organization units at service schools with permanently assigned training detachments, organized on a table of distribution basis. A study of the proposal was made by the Field Artillery School. The proposed tables of distribution, based on School capacities, was submitted to Army Ground Forces to become effective 1 January 1945.

The proposed training detachments were to be composed of overseas returnees and other personnel not eligible for duty overseas. A large proportion of the personnel of the table of organization units

comprising school troops were then eligible for overseas, and their release for overseas assignment was causing personnel problems in the school support units.⁸²

The plan for the use of training detachments was adopted and became effective in February 1945.⁸³ Most of the table of organization units attached to the Field Artillery School were inactivated and their personnel transferred to the new training detachments. Subsequently, the men eligible for duty overseas were transferred for such duty, and the vacancies thus created were filled by men from various sources who were not eligible for duty overseas.

Each of the field artillery training detachments thus established was equipped with two or more types of artillery weapons and the personnel were trained to serve several different types. The training detachments were similar to battalions, as far as organization was concerned, except that they had no service batteries. The normal service battery functions, as well as personnel administration, were centralized at School Troops Headquarters or at Field Artillery School Headquarters. Unit training, which was difficult to meet when School requirements were heavy, was unnecessary with the training detachments, thus eliminating the extra responsibility that always confronted the table of organization units.

The personnel of these inactivated units were transferred to the training detachments as indicated below:⁸⁴

Inactivated

Organized

Effective 11 February 1945

None

FA Training Detachment Nr 4
FA Motor Pool Detachment

Effective 12 February 1945

Headquarters & Headquarters

Effective 18 February 1945

626th FA Battalion FA Training Detachment Nr 2
Headquarters & Headquarters FA Observation Training Detach-
 Battery, 213th FA Group ment
 Range Detachment, FAS

The Field Artillery School Troops were organized in this form at the conclusion of World War II. However, shortly after the end of the war, the Commandant of the Field Artillery School proposed that the School Troops be reorganized so that the units would more closely approximate table of organization units, including changes in designations. This proposal was approved and the change became effective on 10 April 1946.⁸⁵ In general, training detachments became battalions and the Range Detachment was changed to a Range Section. Following this redesignation, the following units composed the Field Artillery School Troops:⁸⁶

Headquarters & Headquarters Battery, FAS Troops
1st Battalion, FAS Troops
2d Battalion, FAS Troops
3d Battalion, FAS Troops
4th Battalion, FAS Troops
5th Battalion, FAS Troops
Observation Battalion, FAS Troops
Infantry Battalion, FAS Troops
Truck Battalion, FAS Troops

This change, however, proved temporary. In order to perpetuate the names of a number of units with distinguished combat records and to dispense with the table of distribution units which had been established as a wartime expedient in February 1945, Army Ground Forces directed certain reactivations and redesignations effecting the School Troops on 1 August 1946. The following table of organization units were activated at Fort Sill utilizing the personnel of the table of distribution units, all of which were concurrently discontinued:⁸⁷

5th FA Group

17th FA Battalion (105-mm Howitzer)

18th FA Battalion (105-mm Howitzer)
 6th Armored FA Battalion (105-mm Howitzer)
 2d FA Battalion (155-mm Howitzer)
 1st FA Battalion (Observation)
 53d Infantry Battalion (Rifle)
 Headquarters and Headquarters Detachment, 53d Qm Bn,
 Mobile
 164th Qm Tank Company
 377th Qm Tank Company
 521st Qm Tank Company
 522d Qm Tank Company

The only further change in the status of the School Troops occurred when The Artillery Center and The Artillery School were established on 1 November 1946. Previous to the establishment of The Artillery Center, the School Troops units had been attached to the Field Artillery School.

After the establishment of The Artillery Center, the School Troop units were attached to the Center and fulfilled School requests as channelled through The Artillery Center.

Since 1946, the following units have served in the capacity of School Support Units for the U. S. Army Artillery and Missile School:⁸⁸

NOTE: In a number of instances in the following section, complete dates of the establishment, reestablishment or discontinuance of certain departments of the School were not available. Also in some instances the authority for these actions was missing. In all cases an asterisk (*) appears where the information could not be found.

SECTION IV

EXISTING DEPARTMENTS AND OFFICES--DESCRIPTION, BACKGROUND, AND DIRECTORS -1940-1957.

COMMANDING GENERAL AND COMMANDANT, U. S. ARMY ARTILLERY AND MISSILE CENTER AND SCHOOL

The position of Commandant of the U. S. Army Artillery and Missile School has existed since the School was founded in 1911. The Commandant of the School was made Commanding General of the U. S. Army Artillery and Missile Center on its establishment 1 November 1946.

CURRENT MISSION: To command all elements of the U. S. Army Artillery and Missile Center; to serve as Commandant, the U. S. Army Artillery and Missile School; to command all units and personnel assigned or attached to the U. S. Army Artillery and Missile School for the purpose of providing administrative and logistic support to the U. S. Army Artillery and Missile School and its personnel; and to furnish administrative and logistic support to Civilian Component training activities as directed.

COMMANDANTS:

19 Jul 1911 - 15 Sep 1914	Capt Dan T. Moore, FA
15 Sep 1914 - 26 Jun 1916	Lt Col Edward F. McGlachlin, Jr., FA
27 Jul 1917 - 26 Sep 1917	Col William J. Snow, FA
26 Sep 1917 - 11 May 1918	Brig Gen Adrian S. Fleming
11 May 1918 - 18 Dec 1918	Brig Gen Laurin L. Lawson
24 Dec 1918 - 10 Jun 1919	Brig Gen Dennis H. Currie
25 Oct 1919 - 1 Jul 1923	Maj Gen Ernest Hinds
1 Jul 1923 - 1 Apr 1928	Maj Gen George LeR. Irwin
6 Apr 1928 - 12 Dec 1929	Brig Gen Dwight E. Aultman

8 Feb 1930 - 31 Jul 1934	Brig Gen William Cruikshank
17 Sep 1934 - 10 May 1936	Brig Gen Henry W. Butner
29 Jun 1936 - 31 Jul 1940	Col Augustine McIntyre, FA
1 Aug 1940 - 22 Dec 1940	Brig Gen Donald C. Cubbison
20 Jan 1941 - 31 Jun 1942	Brig Gen George R. Allin
1 Jul 1942 - 11 Jan 1944	Brig Gen Jesmond D. Balmer
12 Jan 1944 - 30 Oct 1944	Maj Gen Orlando Ward
31 Oct 1944 - 30 Aug 1945	Maj Gen Ralph McT. Pennell
30 Aug 1945 - 4 Jun 1946	Maj Gen Louis E. Hibbs
18 Jun 1946 - 9 Apr 1949	Maj Gen Clift Andrus
1 Jun 1949 - 31 Mar 1950	Maj Gen Joseph M. Swing
2 Apr 1950 - 16 Nov 1953	Maj Gen Arthur M. Harper
4 Jan 1954 - 28 May 1954	Maj Gen Charles E. Hart
25 May 1954 - 24 Feb 1956	Maj Gen Edward T. Williams
12 Mar 1956 -	Maj Gen Thomas E. de Shazo

ASSISTANT COMMANDANT

CURRENT MISSION: To assist the Commandant, the U. S. Army Artillery and Missile School, and act for him in his absence, to assist the Commanding General of Troops in coordinating the support of the U. S. Army Artillery and Missile School Command to the U. S. Army Artillery and Missile School; to direct, control, and supervise the activities of all academic departments and other agencies assigned or attached to the U. S. Army Artillery and Missile School; to effect disciplinary actions with respect to delinquencies of students incident to instruction; and to conduct required individual training for personnel of the U. S. Army Artillery and Missile School Command and the U. S. Army Artillery and Missile School.

ORGANIZATION: The Office of the Assistant Commandant is responsible for the USAAMS Command, Deputy Assistant Commandant of Research and Development, Deputy Assistant Commandant for Instruction, Officer Candidate School and Secretary; Training Aids; Administration; Allied Liaison; Plans and Programs; Academic Records; Library; Army Field Printing Plant; Book Department and the Departments of Combat Development, Communications and Electronics, Gunnery, Materiel, Motors, Observation, Tactics and Combined Arms and Publications and Non-resident Training.

ASSISTANT COMMANDANTS:

24 Nov 1917 - 3 May 1918	Col Oliver L. Spaulding
4 May 1918 - 25 Oct 1918	Brig Gen William Bryden
26 Oct 1918 - 25 May 1919	Col Rene E. De R. Hoyle
24 Jun 1919 - 14 Nov 1919	Maj John W. Kilbreth
15 Nov 1919 - 28 Jul 1920	Maj Augustine McIntyre
28 Jul 1920 - 30 Jun 1924	Col Henry W. Butner
22 Jul 1924 - 25 Jun 1925	Col Daniel W. Hand
26 Jul 1925 - 22 Jul 1929	Lt Col William P. Ennis
23 Jul 1929 - 30 Jun 1933	Lt Col Leslie J. McNair

28 Jun 1933 - 15 Jun 1937	Col Charles S. Blakely
1 Aug 1937 - 30 Jun 1938	Col Donald C. Cubbison
15 Aug 1938 - 12 Nov 1938	Col Maxwell Murray
12 Dec 1938 - 17 Feb 1941	Brig Gen Leroy P. Collins
17 Mar 1941 - 24 Jun 1941	Col Mert Proctor
4 Jul 1941 - 20 Feb 1942	Col James A. Lester
21 Feb 1942 - 2 Sep 1942	Col Theodore L. Futch
7 Nov 1942 - 28 Nov 1943	Col Lawrence B. Bixby
1 Dec 1943 - 3 Oct 1944	Col Einar B. Gjelsteen
16 Oct 1944 - 10 Oct 1947	Col Thomas E. de Shazo
1 Sep 1947 - 1 Oct 1949	Brig Gen Stanley R. Mickelsen
9 Jan 1950 - 1 Feb 1952	Brig Gen William H. Colbern
19 Mar 1952 - 31 Jul 1953	Brig Gen J. F. Brittingham
1 Aug 1953 - 31 Jul 1955	Brig Gen Thomas M. Watlington
1 Aug 1955 - 8 Jul 1956	Maj Gen John E. Theimer
9 Jul 1956 - 2 Sep 1957	Brig Gen Paul A. Gavan
30 Aug 1957	Brig Gen Philip C. Wehle

DEPUTY ASSISTANT COMMANDANT, INSTRUCTION

Established 1 August 1953 (GO 78, 1 August 1953)

The Deputy Assistant Commandant was made responsible for the duties previously charged to the Supervisor of Resident Instruction upon the establishment of the Office, Deputy Assistant Commandant. The same general order which established the Deputy Assistant Commandant also discontinued the Office, Supervisor of Resident Instruction, and the Office, Supervisor of Nonresident Instruction, and established the Department of Publications and Nonresident Training, which was charged with the duties of the Supervisor of Nonresident Instruction.

CURRENT MISSION: To assist the Assistant Commandant and act for him in his absence, to supervise and coordinate all instruction at the U. S. Army Artillery and Missile School, and to exercise direct supervision over the Training Aids Division.

ORGANIZATION: The Office of the Deputy Assistant Commandant, Instruction, consists of the Deputy Assistant Commandant, Executive, and Secretary; and the Plans Division, Operations Division, and Director of Instruction Division.

DEPUTY ASSISTANT COMMANDANT:

1 Aug 1953	Col G. D. Crosby
1 Oct 1954	Col Edward T. Whiting
26 Mar 1956	Col Charles H. White, Jr.
28 Jan 1958	Col Gordon W. Seaward

**DEPUTY ASSISTANT COMMANDANT
RESEARCH AND DEVELOPMENT**

Established 1 October 1957 (Memo 32, USAAMS, 30 Sep 1957)

CURRENT MISSION: Responsible to the Assistant Commandant for the coordination of the overall research and development program of the U. S. Army Artillery and Missile School; to supervise the long-range development program of the Department of Combat Development and the research and review activities of the academic departments; to present a coordinated school position to the Assistant Commandant on all research and development matters; and to coordinate liaison activities between the U. S. Army Artillery and Missile School, U. S. Army Boards, and other military and civilian research and development agencies.

DEPUTY ASSISTANT COMMANDANTS, RESEARCH AND DEVELOPMENT:

1 Oct 1957

Col G. de W. W. Lang

SECRETARY

CURRENT MISSION: To serve as the executive officer to the Assistant Commandant and to coordinate and direct those activities normally performed by a complete staff; to supervise and coordinate the procurement and assignment of military and civilian personnel and supervise other personnel activities in accordance with policies established by the Assistant Commandant; to supervise and coordinate programming, budgeting, management engineering, cost and performance reporting, and manpower activities throughout the School; to maintain custody of resident student academic records; to furnish staff supervision for the Army Field Printing Plant, Library, and Book Department; and to coordinate and supervise the activities of the Liaison Office.

ORGANIZATION: The Office of the Secretary consists of the Secretary, Assistant Secretary, Foreign Liaison Officers, and Attached Liaison Officers, the Administration Allied Liaison, Plans and Programs, Academic Records Division, Army Field Printing Plant, Library, and Book Department.

SECRETARIES:

10 Jul 1911	1st Lt Ralph McT. Pennell
27 May 1915	Capt William Bryden
25 Jun 1916	(Vacant)
25 Jul 1917	Capt Ralph McT. Pennell
30 Sep 1917	Capt Louie A. Beard
3 Nov 1917	Maj Rene E. de R. Hoyle
31 May 1918	Maj Lewis H. Harper
2 Aug 1918	Maj Frank W. Bryant
6 Apr 1919	Maj Marvin C. Heyser
28 Apr 1919	Capt Charles E. West
7 Jun 1919	Capt Harold W. Huntley

24 Jun 1921	Maj William H. Shepherd
5 Aug 1921	Maj Harry J. Malony
12 Jul 1924	1st Lt Jonathan Hunt
11 Aug 1924	Capt Harry B. Allen
2 Jul 1926	Capt William F. Daugherty
26 Jun 1927	Unknown
1 Sep 1927	Maj Harry B. Allen
15 Jun 1928	1st Lt Thomas F. Hickey
21 Aug 1929	1st Lt Jesmond D. Balmer
12 Jun 1932	Capt Frederick H. Black
28 Jun 1936	Capt Charles P. Nicholas
22 Jun 1939	Maj Edward T. Williams
14 Apr 1941	Lt Col Harry Mc K. Roper
13 Nov 1941	Maj Donald G. McLennan
28 Jan 1942	Unknown
8 Apr 1942	Maj Elmer H. Harrelson
6 May 1942	Lt Col Houston L. Whiteside
27 Nov 1942	Maj Donald G. McLennan
18 Aug 1943	Maj Herbert L. Herberts
1 May 1944	Lt Col Thomas W. McCaw
14 Nov 1945	Col Beverly E. Powell
9 Jun 1947	Lt Col John G. Benner

1 Jun 1949	Lt Col Harry H. Critz
1 Feb 1950	Lt Col John A. Seitz
1 Jun 1952	Maj Bill James Tutin (acting Secretary)
1 Aug 1952	Col Wilbur Maben Griffith
31 Jul 1953	Lt Col Allen C. Martin
10 Sep 1953	Col John R. Brindley
28 Sep 1954	Col George A. Carver
3 Jun 1955	Col James E. Norvell
2 Feb 1956	Col John W. Dean, Jr.

DEPARTMENT OF GUNNERY

Established 3 June 1911

The Department of Gunnery has always existed in the School.

CURRENT MISSION: To direct and supervise the activities and functions of gunnery research and gunnery instruction. To effect liaison and coordination as necessary on gunnery matters with agencies outside the U. S. Army Artillery and Missile School, particularly the U. S. Army Artillery Board, Ordnance Ballistic Research Laboratories, and Aberdeen Proving Ground.

ORGANIZATION: The Department of Gunnery consists of the Director and Executive and the Administrative Division, Operations Division, Resident Instruction Division, and Research and Review Division.

DEPARTMENT DIRECTORS:

2 Aug 1939	Col Henry L. C. Jones
21 Mar 1941	Col George V. Keyser
16 Jun 1942	Col Francis W. Farrell
14 Dec 1942	Col Einar B. Gjelsteen
30 Jun 1943	Col Francis M. Day
1 Oct 1943	Col George D. Crosby
9 Sep 1944	Col Newton W. Jones
27 Nov 1944	Col Lewis B. Griffing
27 Aug 1945	Col Norman E. Poinier
18 Oct 1945	Col Lewis B. Griffing
11 Jun 1946	Col Thomas W. Dunn
Aug 1946	Col A. P. O'Meara
Apr 1947	Col B. Hamlett

Feb 1949	Col C. C. Blanchard
Apr 1950	Col J. F. Brittingham
4 Nov 1950	Col Berton E. Spivy, Jr.
24 Jul 1953	Col Dale E. Means
25 May 1956	Col Walter E. Tardy
17 Jul 1956	Col Wilbur E. Showalter

DEPARTMENT OF MATERIEL

Established 3 June 1911

The Department of Materiel has always existed in the School.

CURRENT MISSION: To instruct officers, officer candidates, and enlisted men in field artillery weapons, ammunition, on-carriage fire control equipment, and mine warfare materiel. To analyze and evaluate new developments, doctrine, techniques and materiel pertaining to subject taught.

ORGANIZATION: The Department of Materiel consists of a Director, a Deputy Director, and an Executive Director and the Administrative Division, Operations Division, Supply Division, Cannon and Free Rocket Division, Corporal Division, Plans and Research Division, and Special Weapons Division.

DEPARTMENT DIRECTORS:

4 Nov 1940	Lt Col John P. Eckert
24 Dec 1941	Col William L. Coughlin
3 Feb 1943	Col Claude F. Burbach
15 Dec 1943	Col William C. Huggins
18 Oct 1945	Col Norman E. Poinier
Sep 1947	Lt Col E. H. Almquist
Feb 1949	Col H. J. Crigger
21 May 1951	Col Harold S. Whiteley
14 Jul 1954	Col T. H. Daly
16 Sep 1957	Col Horace L. Sanders

DEPARTMENT OF MOTORS

Established 1 September 1940*

Discontinued 20 March 1947 (GO 10, 19 March 1947)

Reestablished 1 December 1950 (GO 121, 28 December 1950)

The Department of Motors was established on 1 September 1940 as the Department of Motor Transport, having previously been a section of the Department of Materiel. On 22 August 1944, its name was changed to Department of Motors. The Department was discontinued on 20 March 1947. On 10 December 1948, a Motors Section was established in the Department of Materiel. The Department of Motors was reestablished on 1 December 1950.

CURRENT MISSION: To instruct officers, officer candidates, and enlisted specialists and to develop new doctrine and techniques in the mechanical procedures and administrative methods used to employ and maintain, on organizational level, organic vehicles of antiaircraft and field artillery units.

ORGANIZATION: The Department of Motors consists of a Director and an Executive and the Administrative Division, Instruction Division, Operations Division, Logistics and Management Division, and Research and Development Division.

DEPARTMENT DIRECTORS:

26 Jul 1940	Col Leon R. Cole
1 Apr 1941	Col Clyde M. Hallam
15 Feb 1944	Col Herman J. Grigger
21 Aug 1945	Lt Col Oliver S. Hulley
7 Jan 1946	Col Maurice K. Kurtz
1 Dec 1950	Col Herman J. Grigger
15 Nov 1951	Lt Col Walter J. Preston
21 Aug 1952	Col John W. Hansborough
26 Nov 1952	Lt Col Joseph Safer

2 Jan 1953	Col J. W. Hansborough
23 Apr 1955	Col James W. Milner
9 Aug 1957	Col W. W. Beverly

DEPARTMENT OF TACTICS AND COMBINED ARMS

Established 15 November 1941*

Prior to 3 April 1944, the Department of Tactics and Combined Arms bore the name Department of Tactics, which had been a part of the Department of Tactics and Communication before 15 November 1941. On 3 April 1944, the name was changed to the Department of Combined Arms. On 1 April 1954, the name was changed to the Department of Tactics and Combined Arms (GO 49, 26 Mar 1954).

CURRENT MISSION: To teach resident instruction of, and prepare non-resident instructional material for, students in field artillery and surface-to-surface missile tactics; artillery staff and management; airborne and special operations; special weapons employment; familiarization with organization and employment of air defense artillery units, to include surface mission; tactics of infantry and armor; engineer support in combat; chemical, biological and radiological warfare; mine and atomic warfare; and general subjects such as methods of instruction, leadership, military justice and foreign armies. To perform research and review in the development of new artillery tactics, organization, and equipment requirements; to establish the USAAMS position on these matters; and to make appropriate recommendations to higher headquarters thereon. To set up administratively, coordinate with other departments and present special courses of instruction, conferences, seminars, and briefings as required by the Assistant Commandant, USAAMS.

ORGANIZATION: The Department of Tactics and Combined Arms consists of the Director, Deputy Director, Executive, Secretary, and Deputy Director Instruction and the Research and Review Division, Artillery Tactics Division, Associate Arms Division, General Subjects Division, and Plans and Operation Division.

DEPARTMENT DIRECTORS:

3 Apr 1944	Col Charles A. Pyie
1 Jun 1944	Col Paul C. Boylan
Sep 1945	Col Paul C. Boylan
Jan 1946	Col R. E. Hallock

Sep 1947	Col P. W. Edwards
Feb 1949	Col E. S. Molitor
Apr 1950	Col J. R. Burrill
27 Jun 1952	Col George Ruhlen
24 Jun 1953	Col Frank Q. Goodell
Oct 1954	Col Worth L. Kindred
29 Mar 1955	Col John R. Brindley
	Col Charles Blake
15 Jul 1955	Col Charles H. White
26 Mar 1956	Col Ferdinand T. Unger
26 Jul 1957	Col B. E. Powell

DEPARTMENT OF COMMUNICATION AND ELECTRONICS

Established 15 November 1941*

The Department of Communication and Electronics was established 15 November 1941, previously having been a part of the Department of Tactics and Communication. Its name was changed to the Department of Communication and Electronics on 2 May 1955.

CURRENT MISSION: To advise the Assistant Commandant on all matters pertaining to field artillery communication and basic electronics, to provide instruction in communication and basic electronics fields to resident students of the school, to develop doctrine for the employment of field artillery communication personnel and equipment, to provide public address and radio monitor services to the school, and to operate the post Military Affiliate Radio System station.

ORGANIZATION: The Department of Communication and Electronics consists of the Director, Deputy Director, and Executive and the Administrative Division, Supply and Maintenance Division, Research Division, Operations Division, Electronics Division, Specialist Course Division, and General Course Division.

DEPARTMENT DIRECTORS:

21 Nov 1941	Maj William W. Ford
9 Jan 1942	Col Ralph R. Mace
20 Apr 1944	Col James R. Wheaton
4 Apr 1945	Col John F. Roehm
29 Mar 1946	Col Ralph R. Mace
1 Sep 1947	Lt Col J. J. Davis
25 Feb 1949	Lt Col J. E. Holley
1 Oct 1952	Col Walter F. Gallup
9 Aug 1952	Col Fredrick O. Stritzinger
9 Jul 1956	Col Gordon W. Seaward
27 Jan 1958	Col James E. Norvell

DEPARTMENT OF OBSERVATION

Established 1 December 1943*
Discontinued 14 February 1944*
Reestablished 20 March 1945*

An observation section was established within the Department of Gunnery 15 June 1942. On 1 December 1943, the section was separated from the Department of Gunnery and established as the Department of Observation. The Department of Observation ceased to exist as such 14 February 1944, becoming a section within the Department of Tactics. The Department of Observation was again established 20 March 1945.

CURRENT MISSION: To instruct officers, officer candidates, and enlisted specialists in sound ranging and flash ranging, radar, battlefield illumination, survey, ballistic meteorology, and missile guidance systems; to review, analyze, evaluate, and revise doctrine, organization, materiel, procedures, and techniques in the observation field.

ORGANIZATION: The Department of Observation consists of the Director, Deputy Executive, and Liaison Officer and the Administrative Division, Supply Maintenance Division, Operations Division, Research Division, Meteorology Division, Missile Guidance Division, Radar Division, Sound and Flash Division, and Survey Division.

DEPARTMENT DIRECTORS:

1 Dec 1943	Col Paul P. Walters
31 Aug 1945	Col William C. Bullock
Oct 1947	Col Mercer E. Walter
Apr 1950	Col G. B. Coverdale
7 Jul 1950	Col L. Spinks
15 Oct 1952	Col Warren H. Hoover
12 Jul 1954	Col William A. Hadfield
9 Jan 1957	Col E. G. Hahney

DEPARTMENT OF COMBAT DEVELOPMENT

Established 1 December 1952 (GO 119, 20 Nov 1952)

All records and files of the Artillery School Board were transferred to the Department of Combat Development, The Artillery School.

CURRENT MISSION: To develop new doctrine, tactics, organizational and operational concepts, and materiel requirements for the field artillery of the future; to maintain liaison between the U. S. Army Artillery and Missile School, CONARC Boards, and other military and civilian research and development agencies; and to conduct research in the comparative effectiveness of field artillery weapons systems.

ORGANIZATION: The Department of Combat Development consists of the Director, Deputy Director, Executive, and Secretary and the Doctrine, Policy, and Tactics Division, Weapons and Equipment Division, and Technical Analysis Division.

DEPARTMENT DIRECTORS:

1 Dec 1952	Col Robert P. Clay
30 Jul 1955	Col Ferdinand T. Unger
26 Mar 1956	Col George C. Cassaday

DEPARTMENT OF PUBLICATIONS AND NONRESIDENT TRAINING

Established 1 August 1953 (GO 78, 1 Aug 1953)

Except for the activities of the Army Field Printing Plant and the Training Aids Section which were transferred to the supervision of the Secretary, the Department of Publications and Nonresident Training was charged with the responsibilities previously assigned the Office, Supervisor of Nonresident Instruction. The Office, Supervisor of Nonresident Instruction was discontinued by the same General Orders which established the Department of Publications and Nonresident Training.

CURRENT MISSION: To fulfill the responsibilities of the U. S. Army Artillery and Missile School in all matters pertaining to the preparation, review, and revision of training literature; the conduct of all phases of the Army Extension Course program; and the nonresident instructional support of the Reserve Components.

ORGANIZATION: The Department of Publications and Nonresident Training consists of the Director, Executive, Secretary, Assistant Director (P & A), and Assistant Director (NRT) and the Publications Division, Editorial Division, Distribution Supply Division, Reserve Components Division, Extension Courses Division, and ROTC Division.

DEPARTMENT DIRECTORS:

1 Aug 1953	Col Merle L. Fisher
4 Jun 1954	Col G. G. Warner
15 Jun 1956	Col Albert S. Britt
7 Oct 1957	Col Maxwell H. Thompson

U. S. ARMY ARTILLERY AND MISSILE OFFICER CANDIDATE SCHOOL

Office of the Commandant

Established June 1941*

Discontinued 12 December 1946 (GO 2, 9 Jan 1947)

TA & GM OCS reestablished 5 March 1951 (GO 15, Mar 1951)

Office of Commandant TA & GM OCS established 24 November 1952

(GO 122, 24 Nov 1952)

Effective 5 March 1951, General Orders 15, The Artillery Center, reestablished the Field Artillery Officer Candidate School by the activation of Headquarters and Headquarters Battery, Officer Candidate School. General Orders 122, 24 November 1952, established the Office of the Commandant, Field Artillery Officer Candidate School, and outlined the duties charged to the School.

CURRENT MISSION: To produce junior officers who have the required knowledge, character, and capabilities for practical leadership to the extent that they can lead artillery and missile elements successfully in combat.

ORGANIZATION: The U. S. Army Artillery and Missile Officer Candidate School consists of the Commandant, Assistant Commandant, Administrative Officer, S1, S2, S3, and S4 and the Personnel Section, Headquarters Battery, Mess Section, and three batteries.

COMMANDANTS:

Jan 1951	Col Franklin G. Smith
27 Jun 1952	Col Joseph R. Burrill
2 Mar 1953	Lt Col Benjamin D. Capshaw (acting commandant)
8 May 1953	Col Harold E. Liebe
22 Jul 1954	Col W. A. Enemark
1 Aug 1956	Col Charles M. Symbroski
16 Sep 1957	Col W. J. Gallagher

NOTE: In a number of instances in the following section, complete dates of the establishment, reestablishment or discontinuance of certain departments of the School were not available. Also in some instances the authority for these actions was missing. In all cases an asterisk (*) appears where the information could not be found.

SECTION V

DISCONTINUED DEPARTMENTS AND OFFICES--DESCRIPTION, BACKGROUND, AND DIRECTORS--1940-1957.

DEPARTMENT OF GENERAL SUBJECTS

Established January 1947 (Ltr, Hq, AGF, 320.2, 23 Dec 1946)
Discontinued 1 March 1954 (GO 2B, TAC, 23 Feb 1954)

The Department of General Subjects was established in January 1947. The nucleus of the department was the technique of instruction section, which had formerly been a part of the Department of Gunnery, but was under the supervision of the Assistant Commandant at the time of the establishment of the Department of General Subjects. It was made responsible for teaching all subjects which did not properly belong to any of the other departments of instruction. When this department was discontinued on 1 March 1954, its functions including the Examination Review Board, The Artillery School Instructor Training Program, and the Corrective Reading Program, were transferred to the Deputy Assistant Commandant. At this time, the responsibilities included in the Methods of Instruction Division and Management Division were transferred to the Department of Combined Arms.

DEPARTMENT DIRECTORS:

Jan 1947	Lt Col Adams
Feb 1949	Col F. H. Chaffee
Apr 1950	Lt Col S. L. Morrow
8 Aug 1950	Lt Col H. S. Sundt
18 Sep 1950	Lt Col D. C. Sweger
30 Oct 1951	Col Edward T. Whiting

SUPERVISOR OF RESIDENT INSTRUCTION

Established 23 July 1951 (GO 83, 21 Jul 1951)
Discontinued 1 August 1953 (GO 78, 1 Aug 1953)

GENERAL ORDER NUMBER 83, 21 July 1951--The Supervisor of Resident Instruction, The Artillery School, was responsible to the Assistant Commandant for all courses of resident instruction. Specific duties in discharge of his responsibilities included--

a. Supervision and coordination of Departments of Resident Instruction, The Artillery School, to assure--

- (1) Adequacy of scope.**
- (2) Correctness of doctrine.**
- (3) Avoidance of duplication.**
- (4) Proper presentation of all instruction and instructional material offered by the School.**

b. Coordination of planning for courses of resident instruction.

c. Planning and preparation of programs of instruction.

d. Conduct of surveys and staff studies and making such recommendations for revisions in academic procedures and courses of instruction as are considered advisable.

e. Coordination and scheduling of courses of instruction to include the school facilities, transportation, and troop support required for support of schedules.

f. Coordination of grading plan and academic evaluation program.

g. Allocation of ammunition and maintenance of ammunition status records.

h. Evaluation of instruction and instructional methods.

i. Broad supervision of the Examination Review Board.

j. Preparation of itineraries for special visitors as requested by the Assistant Commandant.

k. Such other functions as may be assigned by the Assistant Commandant.

DEPARTMENT DIRECTORS:

23 Jul 1951 Col Marion P. Echols

 Col G. D. Crosby

SUPERVISOR OF NONRESIDENT INSTRUCTION

Established 20 March 1951 (GO 116, 10 Oct 1951)
Discontinued 1 August 1953 (GO 78, 1 Aug 1953)

Upon its establishment, the Supervisor of Nonresident Instruction was made responsible for the duties previously charged to the Division of Training Publications. The Division of Training Publications had been discontinued by the rescission of General Orders 78, 12 September 1950, by General Orders 29, 22 March 1951.

SECTION I, GENERAL ORDER NUMBER 116, 10 October 1951--The Supervisor of Nonresident Instruction, The Artillery School, was responsible to the Assistant Commandant for coordination and control of the activities of the Army Field Printing Plant, Editorial Group, Department of Extension Courses, and Department of Training Publications and Aids. His specific duties included--

- a. Coordination of planning and operations of departments under his supervision.
- b. Survey of current procedures of departments under his supervision and recommendations for appropriate revisions of policy to improve these procedures.
- c. Coordination of liaison with agencies other than The Artillery School on matters pertaining to the departments under his supervision.
- d. Editorial review of training literature and other manuscripts prepared by the departments under his supervision.
- e. Such other functions as may be assigned by the Assistant Commandant.

DEPARTMENT DIRECTORS:

20 Mar 1951

Col Frank Q. Goodell

DEPARTMENT OF EXTENSION COURSES

Established 1934*
Discontinued 1941*

Reestablished 2 April 1946 (FAS ltr, 2 Apr 1946; Army Extension Crs Memorandum formally established 30 April 1946 Number 19, Office of the Commandant, Field Artillery School.)

Discontinued 15 September 1950 (GO 78, 12 Sep 1950)
Reestablished 20 March 1951 (GO 116, 10 Oct 1951)
Discontinued 1 August 1953 (GO 78, 1 Aug 1953)

Although the Department of Extension Courses existed before World War II, it was discontinued for the duration of the war. The department was reestablished on 2 April 1946. Effective 15 September 1950, it was again discontinued and redesignated as the Extension Courses Branch, Division of Training Publications, which was established at that time. It was reestablished as the Department of Extension Courses and placed under the direction of the Office, Supervisor of Nonresident Instruction, effective 20 March 1951. On 1 August 1953, the Department of Extension Courses was again discontinued and its duties transferred to the Department of Publications and Nonresident Training, which was established on that date.

SECTION III, GENERAL ORDER NUMBER 116, 1 October 1951 -The Department of Extension Courses was charged with conducting the Army Extension Courses program of The Artillery School as prescribed by current directives, including--

a. Preparing and revising extension courses of The Artillery School, in coordination with the Antiaircraft and Guided Missiles Branch, paralleling resident instruction as far as practicable and insuring conformity to current doctrine.

b. Administering that part of the Army Extension Courses program for which The Artillery School is responsible by processing student enrollments, awarding exemptions, stocking and distributing extension course materials, grading lessons, maintaining appropriate academic and administrative records, awarding certificates, and notifying proper authority of student's progress and credit.

Personnel assigned to Extension Courses Branch, Division of Training Publications, are assigned to the Department of Extension Courses, The Artillery School.

DEPARTMENT DIRECTORS:

Sep 1946	Col A. E. Kastner
Sep 1947	Col A. E. Solem
1950	Lt Col D. E. Means
20 Mar 1951	Lt Col C. Lynn, Jr.
13 Apr 1951	Lt Col H. T. Smith

DEPARTMENT OF TRAINING PUBLICATIONS AND AIDS

Established 20 March 1951 (GO 116, 10 Oct 1951)

Discontinued 1 August 1953 (GO 78, 1 Aug 1953)

SECTION II, GENERAL ORDER NUMBER 116, 10 October 1951--The Department of Training Publications and Aids was charged with-

a. Preparing, reviewing, and revising all training literature, including field manuals, technical manuals, training circulars, and special texts, for which The Artillery School is responsible. Training literature dealing with a subject which is the responsibility of a resident department of instruction will be prepared in draft by that department but will be reviewed and prepared in final manuscript by the Department of Training Publications and Aids.

b. Serving as The Artillery School coordinating agency for training films and filmstrips.

c. Processing all matters concerning the field artillery career field.

d. Reviewing and making recommendations on new or proposed tables of organization and equipment.

e. Coordinating debriefing of selected personnel returned from combat areas.

f. Coordinating matters pertaining to standardization programs between the United States, the United Kingdom, and Canada, insofar as they pertain to The Artillery School.

g. Preparing and processing all correspondence, instructional material, and training aids pertaining to nonresident instruction of civilian components for which The Artillery School is responsible, except that which applies to the Department of Extension Courses.

h. Preparing, installing, and repairing training aids and devices for The Artillery School and preparing authorized items for civilian components.

i. Preparing original art work for publications for which The Artillery School is responsible.

Personnel assigned to Training Literature Branch and Training Aids Branch, Division of Training Publications, were assigned to the Department of Training Publications and Aids.

DEPARTMENT DIRECTORS:

20 Mar 1951

Col Merle L. Fisher

DEPARTMENT OF TRAINING LITERATURE AND VISUAL AIDS

Established 19 July 1948 (Cir No 1, TAC, 19 Jul 1948)

Discontinued 15 September 1950 (GO 78, 15 Sep 1950)

The Training Literature and Visual Aids Section, which had been a part of the S3 Section of the Field Artillery School during World War II, was placed under the supervision of the Assistant Commandant on 8 October 1946. On 19 July 1948, this section was established as the Department of Training Literature and Visual Aids. Its mission was to recommend, prepare, review, and revise training literature; to prepare all graphic teaching aids required by instructors of The Artillery Center; and to construct, repair, and install training devices required by The Artillery Center.

Effective 15 September 1950, the Department of Training Literature and Visual Aids was discontinued and redesignated as the Training Literature Branch and the Training Aids Branch of the Division of Training Publications, which was established on the same date.

These two branches of the Division of Training Publications, originally components of the Department of Training Literature and Visual Aids, were incorporated into the Department of Training Publications and Aids, which was established on 20 March 1951, concurrent with the discontinuance of the Division of Training Publications and the establishment of the Supervisor of Nonresident Instruction.

DEPARTMENT DIRECTORS:

19 Jul 1948

Col W. D. Williams

AIRBORNE AND SPECIAL OPERATIONS

Established 26 September 1949 (GO 90, 23 Sep 1949)
Discontinued 1 August 1953 (GO 78, 1 Aug 1953)

GENERAL ORDERS NUMBER 90, 23 September 1949--Department of Airborne and Special Operations was charged with the--

- a. Development of airborne artillery doctrine, policy, procedure, and technique.
- b. Development of the artillery doctrine, policy, procedure, and technique for special operations, such as amphibious, arctic, and desert operations.
- c. Preparation of instructional material for and conduct of all airborne and special operations instruction to be presented at The Artillery School.
- d. Planning and supervision of all demonstrations pertaining to airborne and special operations.

DEPARTMENT DIRECTORS:

26 Sep 1949	Col F. A. March
1 Feb 1951	Lt Col James E. Goodwin
21 Aug 1951	Col George S. Speidel
13 Dec 1951	Lt Col Franklin L. Wilson
8 Sep 1952	Col Edward T. Whiting

DEPARTMENT OF AIR TRAINING

Established 6 June 1942*

Discontinued 7 December 1945 (AGF ltr 352, 16 Nov 1945)

Reestablished November 1946*

Discontinued 1 July 1953 (GO 58, 22 Jun 1953)

The Department of Air Training was established 6 June 1942 and discontinued 7 December 1945 when the Army Ground Forces Air Training School was established at Fort Sill. The Department was reestablished in November 1946 with the establishment at The Artillery Center and The Artillery School and the discontinuance of the Army Air Training School. On 1 July 1953, the Army Aviation School became fully operative and the Department of Air Training was again discontinued.

The Department of Air Training originally offered training to qualify pilots and maintenance personnel for use by the field artillery. However, after the department was reestablished in November 1946, its training in Army aviation fixed-wing and helicopter tactics and maintenance was of a more general nature, designed to qualify personnel for general army ground support.

DEPARTMENT DIRECTORS:

6 Jun 1942	Col William W. Ford
15 Jan 1944	Col Gordon J. Wolf
3 Nov 1945	Brig Gen William W. Ford
Nov 1946	Col G. I. Hutton
Apr 1950	Col Hopkins
5 Oct 1951	Col Israel B. Washburn

ARTILLERY SCHOOL BOARD

Established 12 April 1951 (GO 39, 13 Apr 1951)
Discontinued 1 December 1952 (GO 119, 20 Nov 1952)

GENERAL ORDERS NUMBER 39, 13 April 1951--The Artillery School Board was charged with the development of doctrine, policy, procedures, and techniques pertaining to projects assigned by the Assistant Commandant, The Artillery School.

Personnel to constitute The Artillery School Board were assigned as directed by the Assistant Commandant.

DEPARTMENT DIRECTORS:

12 Apr 1951	Col George S. Spidel
21 Aug 1951	Col Russell L. Mabie
10 Sep 1951	Col George S. Spidel
27 Jun 1952	Col Robert P. Clay

DIVISION OF TRAINING PUBLICATIONS

Established 15 September 1950 (GO 78, 12 Sep 1950)
Rescinded 22 March 1951 (GO 29, 22 Mar 1951)

GENERAL ORDER NUMBER 78, 12 September 1950--The Division of Training Publications was composed of the following sections:

<u>Old designation</u>	<u>New designation</u>
Training Literature Section, Department of Training Literature and Visual Aids	Training Literature Branch, Division of Training Publications
Training Aids Section, Department of Training Literature and Visual Aids	Training Aids Branch, Division of Training Publications
Department of Extension Courses	Extension Courses Branch, Division of Training Publications
Editorial Group	Editorial Group, Division of Training Publications
Army Field Printing Plant	Army Field Printing Plant

The Division of Training Publications was charged with the--

- a. Preparation, review, and revision of training literature and other publications.
- b. Preparation and administration of nonresident courses of instruction for artillery officers of all components of the Army of the United States.
- c. Preparation of self-study guides for enlisted personnel in furtherance of their military education and preparation of artillery career field examinations in accordance with instructions from Chief, Army Field Forces.

d. Preparation of graphic aids and the construction, installation, and repair of training devices for The Artillery School.

e. Supervision of the Army Field Printing Plant.

DEPARTMENT DIRECTORS:

15 Sep 1950 Col W. D. Williams

11 Dec 1950 Col F. Q. Goodell

DEPARTMENT OF ANALYSIS AND RESEARCH

Established 1 July 1947 (GO 30, 1 Jul 1947)

Discontinued 31 October 1949 (GO 96, 28 Oct 1949)

GENERAL ORDER NUMBER 30, 1 July 1947. The Department of Analysis and Research was charged with the following:

- a. Conduct research from which improved doctrine may be developed.
- b. Conduct research studies of new developments and recommend appropriate doctrine.
- c. Review proposed revision of existing training literature to determine whether or not it is in accord with approved doctrine and make appropriate recommendations.
- d. Recommend interpretation of approved doctrine for instruction within The Artillery School.
- e. Conduct research studies into archives of combat reports and recommend improved doctrine.
- f. Maintain liaison between The Artillery School and the Department of Analysis and Research of the Command and General Staff College, the various Army Ground Forces Boards, The Infantry School, The Armored School, and, where appropriate, Research and New Developments Sections of Army Ground Forces and the War Department and other agencies as directed.
- g. Conduct such other research studies as may be directed by the Commandant, The Artillery School.

DEPARTMENT DIRECTORS:

1 July 1947

Col W. C. Bullock

DIRECTOR OF INSTRUCTION

Established 30 July 1947 (SO 165, 31 Jul 1947)
Discontinued Nov 1949*

On 30 July 1947, the Office of the Director of Training was established at which time Colonel William E. Waters, FA, was appointed to that office of Special Orders of The Artillery Center. The title of this office was changed to Director of Instruction.

The Director of Instruction was designated the Executive Officer for the Assistant Commandant and charged with the administration of instruction conducted by The Artillery School to include--

- a. The publication of instructional memorandums of the Assistant Commandant.
- b. Coordination and application of approved doctrine as taught within the departments of The Artillery School.
- c. General supervision of preparation of lesson plans.
- d. Direct supervision of schedules of instruction.

DEPARTMENT DIRECTORS:

31 July 1947 Col W. R. Waters

HISTORY OF THE U. S. ARMY ARTILLERY AND MISSILE SCHOOL

1945 - 1957

PART THREE

**Statistical Report of Comparative Strengths,
Students, Staff, and Faculty of the School;
and Reports of Attendance in Major Courses,
1947 through 1957.**

OFFICER AND ENLISTED GRADUATES
PER FISCAL YEAR

<u>Fiscal year</u>	<u>Graduates</u>
1947-----	2, 242
1948-----	1, 220
1949-----	1, 895
1950-----	3, 247
1951-----	8, 183
1952-----	11, 952
1953-----	10, 328
1954-----	9, 033
1955-----	8, 562
1956-----	7, 313
1957-----	7, 046

OFFICER GRADUATES AND FAILURES PER FISCAL YEAR

Fiscal year	Graduates	Failures	Percentages	
			Graduates	Failures
1947	988	15	98.5	1.5
1948	831	26	96.9	3.1
1949	918	28	97.1	2.9
1950	1741	52	97.0	2.9
1951	3777	284	93.1	6.9
1952	5423	520	91.3	8.7
1953	4970	247	95.3	4.7
1954	4076	79	98.1	1.9
1955	4338	43	99.1	.9
1956	3723	48	98.7	1.3
1957	4058	144	96.6	3.4

ENLISTED GRADUATES AND FAILURES PER FISCAL YEAR

Fiscal year	Graduates	Failures	Percentages	
			Graduates	Failures
1947	1436	171	89.4	10.6
1948	389	73	84.2	15.8
1949	977	281	77.7	22.3
1950	1506	165	90.1	9.9
1951	4406	551	88.9	11.1
1952	6529	833	88.7	11.3
1953	5358	576	90.3	9.7
1954	4957	449	91.7	8.3
1955	4224	319	92.9	7.1
1956	3590	232	93.9	6.1
1957	2988	266	91.3	8.7

TOTAL GRADUATES AND TOTAL FAILURES PER FISCAL YEAR

Fiscal year	Graduates	Failures	Percentages	
			Graduates	Failures
1947	2242	166	93.1	6.9
1948	1220	99	92.5	7.5
1949	1895	309	86.0	14.0
1950	3247	217	93.7	6.3
1951	8183	835	90.7	9.3
1952	11952	1353	89.8	10.2
1953	10328	823	92.6	7.4
1954	9033	528	94.5	5.5
1955	8562	362	95.9	4.0
1956	7313	280	96.3	3.7
1957	7046	410	94.5	5.5

HISTORY OF THE U. S. ARMY ARTILLERY AND MISSILE SCHOOL

1945 - 1957

PART FOUR

**Description of Existing and Discontinued
Courses--Attendance and Scope of Instruction.**

SECTION I.

Officer Courses

ARTILLERY BATTERY OFFICER

6-0-1

Army School Catalog, June 1954

Duration of course: Aug 1946-Jul 1954

Length: 28 weeks.

Purpose: To provide branch training to officers so that they are thoroughly grounded in the duties and responsibilities appropriate to battery grade artillery officers.

MOS for which trained: None.

Scope: Field artillery and antiaircraft gunnery, materiel, communications and tactics; radar and guided missiles; combined arms; observation; motors; Army aviation; airborne and special operations; and general subjects.

Prerequisites: Commissioned officer. Member of the Regular Army or a Reserve component officer in an active status or on active duty whose assignment, actual or anticipated, is to artillery duties. Minimum of 2 years but not more than 5 years of commissioned service (including only promotion list service for Regular Army officers).

Security clearance to include SECRET.

FIELD ARTILLERY OFFICER BASIC

6-A-C1

Former Nr 5-0-2

Army School Catalog, May 1957

Duration of course: Mar 1947-

Length: 17 weeks.

Purpose: To provide basic branch training for newly commissioned officers in the duties of field artillery forward observers and assistant executives and to familiarize them with other duties normally performed by field artillery battery grade officers.

MOS for which trained: None.

Scope: Field artillery tactics, communications, gunnery, survey, material, motors, observation battalion, and searchlight battery; associated arms; command, staff, and management procedures.

Prerequisites: Newly commissioned second lieutenant from any source, other than Field Artillery Officer Candidate School, whose actual or anticipated assignment is to field artillery.

Security clearance required: CONFIDENTIAL.

FIELD ARTILLERY BATTERY OFFICER

6-A-C2

Army School Catalog, May 1957

Duration of course: Sep 1956-

Length: 36 weeks.

Purpose: To provide branch training to officers so that they will be thoroughly grounded in the duties and responsibilities appropriate to field artillery and surface-to-surface missile battery grade officers.

MOS for which trained: None.

Scope: Artillery tactics; associated arms; command and staff; atomic and CBR warfare; foreign armies; general administrative subjects; map reading; methods of instruction; special operations; gunnery; communications and electronics; motor observation; Corporal ground handling equipment and maintenance; Corporal guidance platoon; materiel.

Prerequisites: Commissioned officer. Member of the Regular Army or a Reserve component officer in an active status or on active duty whose assignment, actual or anticipated, is to field artillery or surface-to-surface missile duties. Minimum of 2 years but not more than 5 years of commissioned service (including only promotion list service for Regular Army officers).

Security clearance required: SECRET (interim).

ASSOCIATE FIELD ARTILLERY OFFICER, ADVANCED

6-A-C5A

Former Nr 6-0-4

Army School Catalog, May 1957

Duration of course: Mar 1947-

Length: 18 weeks.

Purpose: To provide branch training to officers so that they will have a working knowledge of the duties and responsibilities appropriate to field grade field artillery officers.

MOS for which trained: Prefix digit 5 added to current MOS.

Scope: Special and joint operations; command and staff procedures; special weapons effects; associated arms; field artillery tactics; communications; gunnery to include firing battery, fire direction, and observed fires; motors; radar and observation; atomic weapons; new developments in field artillery weapons.

Prerequisites: Commissioned officer. A reserve component officer in an active status or on active duty whose assignment, actual or anticipated, is to a field artillery gun or howitzer unit; or a Regular Army officer who requires refresher training and whose assignment, actual or anticipated, is to a field artillery gun or howitzer unit; or an officer who is assigned to a branch other than Artillery or to an Artillery Branch function other than field artillery (gun or howitzer) who requires supplemental training. Credit for an artillery officer basic course or an artillery battery officer regular or associate course.

Security clearance required: SECRET (interim).

FIELD ARTILLERY RADAR OFFICER

6-A-0140

Former Nr 6-0-10

Army School Catalog, May 1957

Duration of course: Oct 1950-

Length: 5 weeks.

Purpose: To train commissioned officers in the tactical and technical employment of field artillery radar as applied to gunnery, weapons location, position fixing and vectoring of light Army aircraft and to supervise operation and maintenance.

MOS for which trained: Radar Officer (0140).

Scope: Division and corps counterbattery organization and functions; communications system of division artillery and the field artillery observation battalion; use of logarithmic tables, military slide rule, and aiming circle for traverse computation; synchronization of recorder RD-54; theory of plot interpretation, to include low-angle plots; review of fundamentals of gunnery and fire direction procedures; radar high-burst and center-of-impact registrations; radar adjustments of fire; radar firing charts; position fixing and vectoring of light Army aircraft.

Prerequisites: Commissioned officer in grade of captain or below. Member of the Regular Army or a Reserve component officer in an active status or on active duty whose assignment, actual or anticipated, is to field artillery radar duties. Credit for the Field Artillery Officer Basic course or an artillery battery officer regular or associate course, or a graduate of the artillery Officer Candidate School.

Security clearance required: None.

ARTILLERY SURVEY OFFICER

6-A-1183

Former Nr 6-0-11

Army School Catalog, May 1957

Duration of course: Jan 1951-

Length: 8 weeks.

Purpose: To train commissioned officers so that they will be well grounded in traverse, triangulation, resection, astronomy, mathematics, and map reading required for artillery survey and be able to plan, coordinate, and supervise artillery survey operations.

MOS for which trained: Reconnaissance and Survey Officer (1183).

Scope: Survey records and equipment; traverse; triangulation; resection; field artillery battalion survey; observation battalion and division artillery surveys; astronomic observation for artillery; mathematics, map and aerial photograph reading; artillery communications.

Prerequisites: Below the grade of major as a commissioned officer. Member of the Regular Army or a Reserve component officer on active duty (excluding those on active duty for training only) whose actual or anticipated assignment is to artillery survey duty. Credit for courses in algebra or trigonometry. Credit for one of the following courses: Field Artillery Officer Basic, 6-A-C1 (formerly 6-A-C1A); Field Artillery Battery Officer, 6-A-C2; Associate Field Artillery Battery Officer, 6-A-C3 (formerly 6-A-C3A), or a graduate of the Field Artillery Officer Candidate course, 6-N-F1.

Security clearance required: None.

ARTILLERY NONCOMMISSIONED OFFICERS

6-E-7

Army School Catalog, March 1948 Duration of course: Sep 1948-Jan 1949

Length: 18 weeks.

Purpose: To train selected noncommissioned officers for tactical and general administrative duties within the artillery in the grade of staff sergeant or higher. Successful completion of this course does not entitle the student to an MOS other than one for which he has previously qualified.

Prerequisites: Above NCO grade E-5. AGCT score of 90. Must possess the necessary qualities of leadership and physical capacity for eventual appointment to NCO grade 1, 2, or 3 in an artillery unit.

ANTIAIRCRAFT WEAPONS MAINTENANCE AND REPAIR

6-E-7

Army School Catalog, July 1949 Duration of course: Sep 1948-Apr 1951

Length: 19 weeks.

Purpose: To train selected enlisted personnel as antiaircraft weapons mechanics and as instructors in the care and maintenance of antiaircraft weapons.

MOS for which trained: Artillery Mechanic, Antiaircraft (Automatic Weapons) Minor Maintenance (833); Artillery Mechanic, Antiaircraft (Gun) Minor Maintenance (834).

Scope: Fundamentals of artillery weapons; lubrication and care of artillery, tools, and equipment; small arms; carpentry and metal work; technique of instruction; ammunition general and explosives; artillery loading; rigging; power plants; light AA weapons; heavy AA weapons; FA weapons; electricity.

Prerequisites: Must be below grade E-3. Must have standard score of 105 or higher on aptitude area VI. Qualified as Automotive Mechanic (Second Echelon) (COS or MOS 014), Utility Repairman (COS or MOS 121), or Armorer (MOS 511) or have experience in the maintenance and repair of mechanical devices. Credit for courses in shop mechanics and machine shop.

With the consent of Army Field Forces, The Artillery School discontinued the instruction of Artillery Wheel Vehicle Maintenance and turned that instruction over to the Artillery Replacement Training Center in June 1951. Thus the Artillery Vehicle Maintenance Course (Wheel and Track 6-E-9) was discontinued. Army Field Forces approved the Program of instruction for the new Artillery Track Vehicle Maintenance Course 6-E-21, which was established at the Artillery School during the same month.

ARTILLERY VEHICLE MAINTENANCE SUPERVISION

6-R-631.6

6-R-632.6

Former Nr 6-E-10

Army School Catalog, May 1957 Duration of course: Oct 1950-

Length: 12 weeks.

Purpose: To train qualified motor mechanics in the supervision of organizational maintenance, to include turret maintenance and operation of automotive equipment in artillery units; and to provide training on new vehicles and new administrative procedures for maintenance supervisory personnel.

MOS for which trained: Wheel Vehicle Mechanic (631.6) and Track Vehicle Mechanic (632.6).

Scope: Introduction; engines; track vehicle electrical circuits; track and suspension system; chassis and power train; auxiliary engine equipment; preventive maintenance; maintenance administration; associated ground handling equipment; turret maintenance; demonstrations.

Prerequisites: Grade E-4 or above. Qualified as a Track Vehicle Mechanic (632.1) or have had a minimum of 1 year of experience as a mechanic in an artillery unit. 11 months or more of active duty service remaining after completion of course. Qualified as driver and hold military vehicle operator's permit for all vehicles with which his unit is equipped. Standard score of 90 or higher in aptitude area MM.

HELICOPTER TRANSPORT PILOT TRAINING, WARRANT OFFICERS
AND ENLISTED

6-E-18

Army School Catalog, June 1951 Duration of course: Aug 1951-Oct 1952

Length: 19 weeks.

Purpose: To train warrant officers and enlisted personnel to pilot Army transport helicopters for duty with Transportation Corps helicopter companies.

MOS for which trained: Helicopter Pilot (8996).

Scope: Flight fundamentals; advanced flight techniques; theory of flight; navigation; meteorology; maintenance; map and photograph reading; helicopter transport subjects; and transitional flight training.

Prerequisites: (warrant officer): At least 20 years and 6 months of age and not have reached 30th birthday at time of application for training. Maximum height 72 inches. Maximum weight 180 pounds. Meet the general physical standards prescribed in SR 40-110-1 for class I or 1B. Possess currently valid Civil Aeronautics Administrations Airman's Certificate of private pilot or higher, and have officially logged a minimum of 60 solo hours, of which 5 have been flown within the 6 months' preceding date of application, or have equivalent experience acquired in any of the Armed Forces.

Prerequisites: (enlisted): Qualification for warrant officer stated above. Completion of basic training. Citizen of the United States or an alien who has made legal declaration to become a citizen. Good moral character, and no record of any conviction by any type of military or civil court for other than a minor traffic violation. Volunteer to accept temporary warrant officer appointment and to serve 30 months as a warrant officer on active duty after successful completion of course. Standard score of 110 or higher in aptitude areas II and VIII.

FIELD ARTILLERY RADAR OPERATIONS

6-R-211.1
Former Nr 6-E-22

Army School Catalog, May 1957 Duration of course: Jul 1956-

Length: 8 weeks.

Purpose: To train enlisted personnel in the operation and tactical employment of countermortar and counterbattery radar.

MOS for which trained: Field Artillery Radar Crewman (211.1).

Scope: Fundamentals of plotting; basic map reading and survey; radar and associated equipment; weapons location; tactics; position fixing, radar gunnery, and rawin; communications and electronic warfare.

Prerequisites: Minimum physical profile serial 222111. 9 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area CO.

Security clearance required: None.

FIELD ARTILLERY OFFICER CANDIDATE (RESERVE COMPONENT)

6-N-F2
Former Nr 6-E-34

Army School Catalog, May 1957 Duration of course: Jun 1954-

Length: 11 weeks.

Purpose: To develop personnel to be second lieutenants who will be capable of performing duties appropriate to their grade in field artillery units of the U. S. Army Reserve or National Guard.

MOS for which trained: None.

Scope: Communication equipment, procedures and security, and systems; firing battery, observed fire, and fire direction; characteristics of field artillery cannon and miscellaneous subjects; field artillery survey; light, medium, and heavy cannon materiel; officer indoctrination; field artillery tactics; associated arms; associated motors subjects; map and aerial photograph reading; field bivouac.

Prerequisites: National Guard Personnel: Must meet requirements for National Guard officer candidate training as specified in appropriate National Guard Bureau Bulletin for this course. (Selection will be made by the National Guard Adjutant General of the state to which application is submitted.)

U. S. Army Reserve Personnel: Must meet requirements for application for Army Reserve officer candidates training as specified by AR 140-50.

Security clearance required: CONFIDENTIAL.

FIELD ARTILLERY MECHANICAL MAINTENANCE (CORPORAL)

6-R-222.2A
Former Nr 6-E-42

Army School Catalog, May 1957 Duration of course: Jan 1957-May 1957

Length: 8 weeks.

Purpose: To train enlisted personnel to assemble, install, maintain, and adjust Corporal mechanical on-missile guidance control systems and associated test equipment and to assemble missiles and perform required checks on Corporal propulsion and mechanical systems.

MOS for which trained: Surface-to-Surface Missile Mechanical Assembler (222.2).

Scope: Basic electricity; radio and radar electronics; Corporal organization; basic tools and test equipment; Corporal missile orientation; propulsion system, missile uncrating and assembly, and service area checkout; Corporal missile ground handling equipment maintenance; demonstrations.

Prerequisites: Grade E-6 or below. Credit for courses in algebra and trigonometry and have some background in general science, or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. 9 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area EL.

Security clearance required: CONFIDENTIAL.

RADIO OPERATOR

Army School Catalog, September 1946 Duration of course: Sep 1947-Jan 1947

Length: 18 1/2 weeks.

Purpose: To train enlisted men of the field artillery as radio operators.

Scope: Signal Corps symbols, traffic, and circuit diagrams. Radio net charts. Line route maps. Familiarization with the installation and use of telephones and switchboards employed by the field artillery. Installation, maintenance, and operation of field artillery radio equipment including tactical traffic and anti-jamming measures. Use of SOI and SSL. International Morse Code (to attain a minimum code speed of 18 words per minute), visual signaling, radio and telephone procedure.

Prerequisites: AGCT score of 90; high school graduate or equivalent knowledge; character rating of excellent; satisfactory grade on code aptitude test; desire to attend course.

RADAR COURSE

Army School Catalog, September 1946 Duration of course: Sep 1946-Jun 1947

Length: 18 1/2 weeks.

Purpose: To train selected enlisted personnel in the general principles of radar including the functioning, tactical operation, and maintenance of radar equipment of field artillery units.

Scope: Review of mathematics and physics required for an understanding of radar, basic electronics, electricity, transmission systems and antennas, theory, operation and repair of SCR-784; theory, operation, and repair of plotting board T14E1; information and education, leadership, and methods of instruction.

Prerequisites: Desire to attend course; character rating of excellent; high school graduate or equivalent; minimum AGCT score of 90; background of mathematics and physics; experience in computing desirable; must have at least 1 year to serve after completion of the course.

ENLISTED MOTOR COURSE

Army School Catalog, September 1946 Duration of course: Sep 1946-Feb 1947

Length: 18 1/2 weeks.

Purpose: To train selected enlisted men to perform first- and second-echelon maintenance on vehicles issued to field artillery units.

Scope: Operation and maintenance of vehicles. Organization and the administrative details necessary for operation of a motor pool, to include supply forms, dispatching records, and duty roster. Proper methods of driver selection and training. Technique of driving under various conditions. Convoy planning and operation and the loading of vehicles. Essential nomenclature. Chassis units and fundamental engine operating principles. Performance of scheduled preventive maintenance inspections and servicings. Trouble diagnosis, emergency repairs, and unit replacements. Field expedients. Methods of instruction.

Prerequisites: Desire to attend the course; minimum MAT score of 90; minimum AGCT score of 90; character rating of excellent; possess motor vehicle operator's permit; grammar school education or equivalent; a minimum of 1 years' experience as motor mechanic in civilian life or completion of a motor mechanics course at a post motor school is highly desirable.

AIR MECHANIC

Army School Catalog, September 1946 Duration of course: Jan 1946-Mar 1948

Length: 13 weeks.

Purpose: To train students as mechanics in the repair and maintenance of the Army Ground Forces airplanes and engines.

Scope: Construction, repair, and maintenance of the Army Ground Forces' airplanes and engines. Employment of liaison airplanes in the field. Aerodynamics, function of airfoils, and control surfaces. Wood and metal wing repair. Fuselage, Fuel systems and rigging. Radio installation. Propellers. Mooring. Fuels. Loading. Cleaning. Disassembly and assembly of engine. Engine operation. Selection and development of landing fields. Construction and function of aircraft instruments.

Prerequisites: One year's experience with internal combustion engines required. Desire to attend course; minimum score of 90 on AGCT; minimum score of 100 on MAT.

ARTILLERY COUNTERMORTAR AND COUNTERBATTERY RADAR

6-OE-22
Former Nr 6-E-22

Army School Catalog, June 1954 Duration of course: Jan 1951-

Length: 7 weeks.

Purpose: To train officer and enlisted personnel in the operation and tactical employment of counter mortar and counterbattery radar.

MOS for which trained: Officer: None.

Enlisted personnel: Radar Operator (1514) (4514); grade E-4 or below.

Scope: Mathematics; plotting; map reading; radar fundamentals; radar operation, to include technique of weapons location and radar gunnery.

Prerequisites: Commissioned officer: Grade of captain or below. Member of the Regular Army or a Reserve component officer in an active status or on active duty whose assignment, actual or anticipated, is to counter mortar and counterbattery radar duties. Credit for the Field Artillery Officer Basic course or an artillery battery officer regular or associate course, or be a graduate of the Artillery Officer Candidate School since 1951.

Enlisted personnel: Grade E-4 or below. Two years of high school education or equivalent. Minimum physical profile serial 222111. Standard score of 100 or higher in aptitude area II.

ARTILLERY MISSILE ASTRONOMIC SURVEY

6-OE-30

Army School Catalog, June 1954 Duration of course: June 1953-

Length: 2 weeks.

Purpose: To train selected personnel to plan, supervise, coordinate, and participate in the operations of a guided missile astronomic survey party.

MOS for which trained: None.

Scope: Artillery missile survey principles, requirements, organization, and accuracies; explanation of deflection of the vertical; care and use of theodolites, chronometers, barometers, thermometers, and radios; machine calculations; calibration of striding level; review of basic astronomy; star charts and tables; preparation of star lists; observing and computing procedures for determination of astronomic longitude and azimuth.

Prerequisites: Commissioned officer: Below the grade of captain. Member of the Regular Army or a Reserve component officer on active duty (excluding those on active duty for training only) whose assignment, actual or anticipated, is to field artillery guided missile survey duty. Satisfactory completion of course 6-O-16, Artillery Survey, Officer, not more than one year prior to attending this course.

Warrant officer: Must have actual or anticipated assignment to field artillery guided missile duty. Satisfactory completion of course 6-O-11, Artillery Survey, Officer, or course 6-E-16, Artillery Survey Supervision, not more than one year prior to attending this course.

Enlisted personnel: Grade E-5 or above. Qualified as Artillery Survey Specialist (1577). Minimum physical profile serial 222211. Normal color and depth perception. Satisfactory completion of course 6-E-16, Artillery Survey Supervision, not more than one year prior to attending this course. Standard score of 100 or higher in aptitude area II.

CORPORAL FIRE CONTROL SYSTEM MAINTENANCE

6-N-228.2
Former Nr 6-OE-31

Army School Catalog, May 1957 Duration of course: Feb 1957-

Length: 32 weeks.

Purpose: To train warrant officers and enlisted personnel to adjust, maintain, and operate the fire control system for the Corporal missile.

MOS for which trained: Warrant officer: Surface-to-Surface Missile Fire Control Assistant, Corporal (1186). Enlisted personnel: Surface-to-Surface Missile Fire Control Crewman.

Scope: Mathematics; electricity; radio electronics; radar electronics; adjustment, maintenance, and operation of radar set AN/MPQ-25, computer AN/MSA-6, and radio set (Doppler) AN/MRQ-7; employment of the Corporal fire control system; organization and nonfire control equipment of the Corporal battalion.

Prerequisites: Warrant officer: Must have actual or anticipated assignment to duty involving maintenance of the fire control system for the Corporal missile. Credit for courses in algebra and trigonometry and have some background in general science or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. Must sign 2-year service commitment statement as prescribed in paragraph 7a (2), section I, DA Pamphlet 20-21.

Enlisted personnel: Credit for courses in algebra and trigonometry and have some background in general science or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. 24 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area EL.

Security clearance required: SECRET (interim).

CORPORAL ELECTRONIC MATERIEL MAINTENANCE

6-N-224.2
Former Nr 6-OE-33

Army School Catalog, May 1957 Duration of course: Nov 1956-

Length: 28 weeks.

Purpose: To train warrant officers and enlisted personnel to assemble, install, calibrate, adjust, and maintain on-missile electronic guidance control components and systems and associated electronic test equipment for the Corporal II missile.

MOS for which trained: Warrant officer: Surface-to-Surface Missile Materiel Assistant, Corporal (1192). Enlisted personnel: Surface-to-Surface Missile Electronic Assembler (242, 2).

Scope: Mathematics; electricity; general electronics; radar electronics; on-missile guidance system and auxiliary test equipment for Corporal missile; guided missile firing procedures; associated ground launching; Corporal warhead.

Prerequisites: Warrant officer: Must have actual or anticipated assignment to duty involving maintenance of the electronic components of the Corporal II missile and missile handling equipment. Credit for courses in algebra and trigonometry and have some background in general science, or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. Must sign 2-year service commitment statement as prescribed in paragraph 7a (2), section I, DA Pamphlet 20-21.

Enlisted personnel: Credit for courses in algebra and trigonometry and have some background in general science, or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. 23 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area EL.

Security clearance required: SECRET (interim).

ARTILLERY BALLISTIC METEOROLOGY

6-N-215.2
Former Nr 6-E-5, 6-OE-35

Army School Catalog, May 1957 Duration of course: Sep 1946-

Length: 11 weeks.

Purpose: To train warrant officers and enlisted personnel in the installation and operation of a visual or electronic meteorological station.

MOS for which trained: Warrant officer: None. Enlisted personnel: Weather Observer (215. 2).

Scope: Mathematics; elementary meteorology; ballistic meteorology; visual station instruments and equipment; visual methods; radiosonde and accessory equipment; radiosonde recorder; radiosonde data; rawin set and data; radar winds; air weather service; team training; and field exercises.

Prerequisites: Warrant officer: Must have actual or anticipated assignment to artillery ballistic meteorology duties. Credit for courses in trigonometry or plane geometry at high school level. Normal color perception. Minimum physical profile serial 222211. Warrant officers who are scheduled for enrollment in the Weather Equipment Maintenance course, 6-N-8219, immediately following this course must sign a 2-year service commitment statement as prescribed in paragraph 7a (2), section I, DA Pamphlet 20-21.

Enlisted personnel: Credit for courses in trigonometry or plane geometry at high school level. Normal color perception. Minimum physical profile serial 222211. 10 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area EL.

WEATHER EQUIPMENT MAINTENANCE

6-N-215.3

Former Nr 6-E-23, 6-OE-36

Army School Catalog, May 1957 Duration of course: Oct 1951-

Length: 14 weeks.

Purpose: To train warrant officers and enlisted personnel to repair and maintain electrical and electronic meteorological equipment used in artillery ballistic meteorology sections.

MOS for which trained: Warrant officer: Weather Officer (8219). Enlisted personnel: Weather Observer (215.3).

Scope: Fundamentals of electricity; fundamentals of radio; special basic radar circuits; rawin set AN/GMD-1(); radiosonde recorder AN/TMQ-5 () and rawinsonde auxiliary equipment; field exercises.

Prerequisites: Warrant officer: Must have actual or anticipated assignment to an artillery ballistic meteorology section. Must have satisfactorily completed course 6-N-215.2, Artillery Ballistic Meteorology.

Enlisted personnel: Qualified as Weather Observer (215.2). Normal color perception. Minimum physical profile series 222211. 13 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area EL.

FIELD ARTILLERY RADAR MAINTENANCE (ADVANCED)

6 N-211.6
Former Nr 6-OE-37

Army School Catalog, May 1957 Duration of course: Aug 1956..

Length: 24 weeks.

Purpose: To train warrant officers and enlisted personnel to supervise the operation, adjustment, and maintenance of field artillery radar equipment.

MOS for which trained: Warrant officer: Artillery Electronic Fire Control Assistant (1121). Enlisted personnel: Field Artillery Radar Crewman (211.6).

Scope: Mathematics; electricity; radio electronics; radar electronics; communication security and electronic warfare; radar ANMP-10A and recorder RD-54; power unit PU-26A/U, operation and employment of counter mortar AN/MPQ-10A; demonstrations.

Prerequisites: Warrant officer: Actual or anticipated assignment to field artillery radar duty. Credit for courses in algebra and trigonometry and have some background in general science, or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. Minimum physical profile serial 222111. Must sign 2-year service commitment statement as prescribed in paragraph 7a (2), section I, DA Pamphlet 20-21.

Enlisted personnel: Grade E-4 or above. Credit for courses in algebra and trigonometry and have some background in general science, or have a standard score of 45 or higher on GED tests 3 and 5, high school level. Normal color perception. Minimum physical profile serial 222111. 20 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area EL.

ATOMIC PROJECTILE ASSEMBLY (T-317)

6-D-F7
Format No. C-OE-38

Army School Catalog, May 1957 Duration of course: Oct 1956-

Length: 1 week.

Purpose: To train commissioned officers and enlisted personnel in the mechanical assembly, disassembly, and prefiring preparation of the T-317 atomic projectile.

MOS for which trained: None.

Scope: History, nomenclature, functioning, safety, handling and storage procedures, and background material of the T-317 projectile; practical work to develop proficiency in the mechanical assembly and disassembly of the T-317 projectile.

Prerequisites: Commissioned officer: Member of the Regular Army or a Reserve component officer on active duty (excluding those on active duty for training only) whose actual or anticipated assignment is to a field artillery unit utilizing the T-317 atomic projectile.

Enlisted personnel: Qualified as Field Artillery Crewman (141.1). Actual or anticipated assignment to a field artillery unit utilizing the T-317 atomic projectile. 9 months or more of active duty service remaining after completion of course. Standard score of 100 or higher in aptitude area CO.

Security clearance required: SECRET (interim).

ATOMIC PROJECTILE ASSEMBLY (280-mm Gun)

6-D-F4
Former Nr 6-OE-39

Army School Catalog, May, 1957 **Duration of course: Oct 1952-**

Length: 1 week.

Purpose: To train commissioned officers and enlisted personnel in the mechanical assembly, disassembly, and prefiring preparation of the atomic projectile for the 280-mm gun.

MOS for which trained: None.

Scope: History, nomenclature, functioning, safety, handling and storage procedures, and background material of the atomic projectile for the 280-mm gun; practical work in the mechanical assembly and disassembly of the projectile.

Prerequisites: Commissioned officer: Member of the Regular Army or a Reserve component officer on active duty (excluding those on active duty for training only) whose actual or anticipated assignment is to a field artillery battalion (280-mm gun) or to a headquarters normally charged with supervision of training and tactical employment of 280-mm gun battalions.

Enlisted personnel: Qualified as Field Artillery Crewman (141.1). Actual or anticipated assignment to a field artillery battalion (280-mm gun). 9 months or more of service remaining after completion of the course. Standard score of 100 or higher in aptitude area CO.

Security clearance required: SECRET (interim).

ATOMIC WARHEAD ASSEMBLY (HONEST JOHN)

6-D 147.2
Former Nr 6 OE-40

Army School Catalog, May 1957 Duration of course: Oct 1956-

Length: 2 weeks.

Purpose: To train commissioned officers and enlisted personnel in pre-launch procedures involving assembly and electrical and mechanical tests of the atomic warhead for the 762-mm rocket.

MOS for which trained: Officer: None. Enlisted personnel: Heavy Rocket Crewman (147.2).

Scope: Nomenclature, functioning, and testing of 762-mm rocket warhead section, to include necessary background data pertaining to implosion-type weapons and effects of atomic bursts. Practical exercises to develop proficiency and instill confidence in accomplishing prelaunch procedures.

Prerequisites: Commissioned officer: Member of the Regular Army or a Reserve component officer on active duty (excluding those on active duty for training only) whose actual or anticipated assignment is to a field artillery rocket battalion (762-mm rocket) or to a headquarters normally charged with supervision of training and tactical employment of 762-mm rocket battalions.

Enlisted personnel: Qualified as Heavy Rocket Crewman (147.1). 9 months or more of active duty service remaining after completion of the course. Standard score of 100 or higher in aptitude area EL.

Security clearance required: SECRET (interim).

CORPORAL ATOMIC WARHEAD ASSEMBLY

6-D-226.2, 6-D-224.3
Former Nr 6-OE-43

Army School Catalog, May 1957 Duration of course: Apr 1957-

Length: 2 weeks.

Purpose: To train commissioned officers and enlisted personnel in pre-launch procedures involving assembly and electrical and mechanical tests of the atomic warhead for the Corporal missile.

MOS for which trained: Officer: None. Enlisted personnel: Surface-to-Surface Missile Electronic Assembler (224.3) and Surface-to-Surface Missile Launching Crewman (226.2).

Scope: Nomenclature, functioning, and testing of the Corporal warhead section to include necessary background data pertaining to implosion-type weapons and effects of atomic bursts. Practical exercises to develop proficiency and instill confidence in accomplishing final assembly tests and prelaunch procedures.

Prerequisites: Commissioned officer: Member of the Regular Army or a Reserve component officer on active duty (excluding those on active duty for training only) whose assignment, actual or anticipated, is to an SSM battalion or to a headquarters normally charged with supervision of training and tactical employment of SSM battalions.

Enlisted personnel: Qualified as Surface-to-Surface Missile Electronic Assembler (224.2) or Surface-to-Surface Missile Launching Crewman (226.1). 9 months or more of active duty service remaining after completion of the course. Standard score of 100 or higher in aptitude area CO.

Security clearance required: SECRET (interim).

Note: The program of instruction for this course is the same as for course 6-D-224.3A.

Allied Officer Courses

51-55 Allied Associate Field Artillery Battery Officer
53- Special Allied Officer Field Artillery Advanced
54- Allied Artillery Antiaircraft Weapons Automatic Basic
(Officer)

Motors Courses

52-53 Basic Automotive Mechanics
49-50 Artillery Motor Mechanics Course

Short Courses

50- Special Associate Field Artillery Officer Advanced
48-49 Special Associate Basic
51- Antiaircraft Artillery Officer Refresher
52- Fire Support Coordination
50-51 United States Air Force Pilot Artillery Observation
50- Orientation Course for ORC School Instructor Personnel
50- Regular Army Instructor Teams for National Guard
54- Field Artillery Battalion UNG Officer Refresher Course
52- Army Airframe Mechanic
51- Canadian Instructor Course
51- Special Course for Aircraft Mechanics

ORGANIZED RESERVE AND NATIONAL GUARD REFRESHER COURSES

On 20 September 1950, Army Field Forces directed The Artillery School to conduct refresher courses for Organized Reserve Corps and National Guard personnel called to active duty. The Artillery School accordingly established this one week course. Similar refresher and indoctrination courses had been conducted in 1947 and 1948.

CADRE COURSES

In 1948 and 1949, The Artillery School conducted short refresher courses for radio repairmen, radio operators, enlisted communications personnel, antiaircraft artillery mechanics, and enlisted observation personnel. These courses were used to train personnel for the Anti-aircraft and Guided Missile Center, which needed cadre personnel for antiaircraft units activated in the expansion of that branch which took place at that time. These short refresher courses were used primarily to qualify cadre personnel at the beginning of the expansion program. After the program got underway, it was possible to enroll increasing numbers of the prospective cadre personnel in the longer regular courses in these subjects being taught by The Artillery School. For this reason, the short cadre courses were discontinued in the fall of 1949.

ANTIAIRCRAFT ARTILLERY OFFICER REFRESHER COURSE

Duration of course: Aug 1951-Oct 1951

Length: 4 weeks,

Purpose: To fulfill the requirements as set forth by the Office of the Chief, Army Field Forces, in July 1951, the Antiaircraft Artillery Officer Refresher course was scheduled for the purpose of instructing antiaircraft officers in field artillery techniques. The course was of four week's duration.

FIRE SUPPORT COORDINATION

Duration of course: Jul 1952-Jul 1952

Office, Chief of Army Field Forces confirmed the date of 14 July for the Fire Support Coordination Course to be taught at The Artillery School to senior officers of all services. Maximum participation of officers of other branches (Infantry and Armored) and other services (USAF and USMC) as well as of the British Liaison officer was encouraged for this course. All efforts were made to give this 5-day orientation course VIP status.

ORIENTATION COURSE FOR ORC SCHOOL INSTRUCTOR PERSONNEL

Duration of course: Oct 1950-Oct 1950

Purpose: Due to the success of the Allentown project (which was a school for the ORC, complete with various levels of courses), it was decided to institute a large number of such schools throughout the nation to aid in the training of the Organized Reserve Corps. In this connection, The Artillery School was required by Army Field Forces to set up a one-week orientation course for ORC school instructor personnel.

REGULAR ARMY INSTRUCTOR TEAMS FOR NATIONAL GUARD

Duration of course: Sep 1950-Sep 1950

On 18 August 1950, Army Field Forces directed that each Army would provide one team of instructors to train federalized National Guard units in artillery subjects. The teams were to consist of 3 officers and 3 enlisted men for those assigned to the 4 National Guard divisions and of 2 officers and 3 enlisted men for those assigned to the National Guard Regimental Combat teams. The Fourth Army team, to train the 45th Division, was selected entirely from The Artillery School and hence were qualified personnel. The other teams were sent to Fort Sill for the period 5 September 1950 to 23 September 1950 during which time The Artillery School gave them a refresher course prior to assignment. The progress of this course and an estimate of the abilities of the students as future instructors were reported to Army Field Forces prior to termination of the course so that Army Field Forces could direct desired personnel changes.
