OPERATION SEA LORDS SUITARY April 1969	UNANNOUNCED				

Coordinated efforts of units from the three major in-country U.S. Navy task forces together with other U.S. and Vietnamese armed forces continued to maintain pressure on the enemy in each SEA LORDS campaign during April. In general enemy opposition declined during the month with the GIANT SLINGSHOT operations continuing to make contact most frequently. In this operation along the Vam Co Tay and Vam Co Dong rivers some enemy initiated activity was encountered daily, but there were a number of days with only one minor incident.

Operations in the other interdiction campaigns of EARRIER REFF, TRAN HUNG DAO, and SEARCH TURN, as well as certain rivers who weakET THE "Raiders" operated on a near daily basis, followed a general pattern wherein enemy initiated fire fight activity was not encountered for a week or more, only to be followed by = sizeable engagement with well emplaced and heavily armed Viet Cong units. Prompt reaction by fixed wing aircraft and/or helicopters providing air cover coupled with frequent insertion of reaction troops already embarked in the patrol craft and employment of other supporting arms remained the best counter to these attacks. The shift of night patrol tactics toward establishing night ambush positions at likely crossing points in lieu of random patrol continued to show good results in the number of friendly initiated contacts.

Giant Slingshot Camprism

River patrol craft, river assault craft, mineoweeping craft, and supporting units from XF 116 and TF 117 continued GIALT SLEGSHOT interdiction operations along the Van Co Tay and Van Co Dong Rivers as elements of 1G 194.9. Until 7 April "Swift" boats of TF 115 carried out patrols on the Vam Co River when this segment of GIALT SLINGSHOT was taken over by PER's in order to allow increased "Swift" boat patrols on the lower Ham Luong and Co Chien rivers in the normal GALE WANDER area of operations. Also participating in this interdiction campaign were ViJ: River Assault and Interdiction Divisions 70 and 71 (RAID-70 and 71). As in prior months numerous operations were carried out in support of friendly ground sweeps and patrols of the river banks.

The amount of energy opposition increased slightly during April with the number of energy initiated hostile fire incidents up to 74 from 65 in March. The focus of energy attention a so appeared to be shifting from the Vam Co Dong to the Vam Co Tay, possibly indicating a ranjor change in energy infiltration routes. There were also five energy attacks on GIANT SLLIGSHOT bases and su port elements or nearby friendly installations. Friendly casualties during april included 6 USN killed and 69 wounded. Other forces working with 0. 5. Navy units lost 7 killed and 77 wounded. Damage was received by 29 USN and 7 VAN water craft with 5 of them damaged extensively. One incident resulted in the loss of two USN helicopters and damage to a supporting U. S. Army helicopter.

Enclosure (1)

CASSIFIED

Contraction States States

Right ambush tactics by patrol units were employed frequently . again in April resulting in 88 contacts which made up the bulk of Navy inflicted energy casualties. Routine patrols also engaged evading junks or sampans at least 16 times with good results. Reactions to hostile fire, targets of opportunity, 1d tactical intelligence in the form of naval gunfire, artillery fire, and strikes by helicopters or fixed wing aircraft numbered nearly 100 for the nonth. Including the results of ground sweeps supported by GIANT SLEGSHOT units plus air strikes and artillery fire the enemy lost 504 killed (367 body count plus 137 probable), 21 wounded, and 39 captured. Material losses came to 26 junks or sampans and 215 structures / cstroyed with another 2 craft damaged and 16 captured plus 9 structures damaged. Ground sweeps uncovered 3 anna caches in the GIALT SLALGSHOT area during April. These caches plus arus capturcu in direct combat totaled 76 individual and 12 crewserved weapons. Some 90 B-40 rounds, nearly 50 mortar/recoilless rifle rounds, approximately 100 grenades, and miscellaneous mines and explosives were also included in the captured munitions.

On 2 April, two ASPB's were trans ting south on the Van Go Dong river when they came under 3-40 rocket-grenzde and automatic-weapons attack at 1420, three and a half miles southeast of Tra Cu (XS 529 945). One ASFB took a rocket hit in the after gam station which was seen to detonate in the immediate vicinity of LCDE C. L. PETERSON, USA, killing hit. LCDR PELSES, was Commander River Squadron 57 and Van Co Dong on-

> Enclosure (1) CO.FIDENTIAL

scene containder. His body was lost overboard during the ensuing battle. In addition, two USE were soriously wounded, one of the casualties being LT Lavid L. BES (10), USER, from YEE-16. FBE's of TU 194.1 were scraubled to assist in the counter attack and artillery fire was placed on the ambush area within eight minutes. Seavolves arrived and provided cover for dustoff, as the wounded were medevaced to the Army evacuation hospital at Cu Chi by 1500. Energy casualties were unknown. LODR Peterson's body was subsequently found.

Just after midnight on 2 April, PBR's 740 and 769 were in waterborne ambush position about 3½ miles south of Go Dau Ha (XY 398 190) and detected a sampan with eight to 10 personnel crossing from west to east. They took the sampan under fire and destroyed it. Energy casualties were listed as eight killed and two probably killed. There were no U. S. casualties.

On April 6, while in night waterborne ambush position on the Van Go Long river, 4 miles northeast of the Ben Luc Bridge, (XS 557 807), two ASFB's of Task Unit 194.9.5 detected two sampans travelling north along the west bank. The sampans were illuminated and taken under fire at a range of about 20 feet at 2100, resulting in three Viet Cong killed and the capture of energy arms, food and equipment.

On 9 April PBA's 82 and 14) in waterborne ambush on the south bank of the Van Co Tay River, 4 miles northeast of Tuyen Khon, observed six Viet Cong approaching the bank. When the energy closed to 10 meters,

> Enclosure (1) CO.FIDENTIAL

COLFIDELTIAL

the FBR's opened fire and then cleared to the west. A red light was observed in the ambush area and the units returned for another firing run. A sampan with four Viet Cong was observed attempting to cross the river and enter a canal on the south bank. The boats took the sampan and both banks under fire. The sampan exploded with a series of fireballs 75 feet high. A large secondary explosion which caused a large fire was observed on the north bank. The FBR's made three firing runs through the area and received light automatic weapons fire from the north bank. On the last firing run an explosion lifted the stern of FBR 149 out of the water and caused the boat to start filling with water. The boat was beached, pumped out, and then returned to base for repairs (later it was returned to duty). Enemy losses were seven killed and an additional three listed as probables and one sampan destroyed. There were no friendly personnel casualties.

Five RAID 71 units were in transit from Tra Cu to Ben Luc on 9 April when they spotted a sampan crossing the river from east to west (XS 530 932). Warning shots were fired but the sampan attempted to evade and the boats commenced firing at the sampan. Although the sampan overturned before the Vietnamere sailors reached it, they recovered the four dead occupants, four knives, and some miscellaneous clothing. In the afternoon two of the units were returning to Tra Cu when they came under rocket and automatic weapons fire (XS 546 925). Although they returned and suppressed the fire, one sailor was wounded and one boat

> Enclosure (1) CCUFIDENTIAL

BEINGREE HALF TEATONS A.S.

- 5

took a B-40 rocket hit that disabled both engines. The stricken vessel was taken in tow by the other units and they cleared the area to the south. U. S. PBR's arrived on the scene and placed fire on two Viet Cong that were spotted by aircraft. The ambush site was flamed by a U. S. Zippo boat that was dispatched to the area.

On 10 April FBR's on routine patrol of the Van Co Dong River came under rocket and automatic weapons attack five miles southeast of Tra Cu. The cover boat, FBR 96, received two B-40 hits simultaneously. One rocket hit the communin flat and killed the captain instantly. The second rocket struck just aft of the coxswain's flat blowing down into the engine compartment, injuring the entire boat crew. The boat ran out of control and beached on the bank opposite from the enemy ambush. The lead boat, while still under fire, reversed course, returned to the beached boat, and removed the wounded personnel but was unable to recover the boat captain's body because of intense enemy fire. The lead boat cleared the kill some to the south to a medevac position where the wounded were dusted off. Additional PBR's were scrambled from Tra Cu to go to the assistance of the engaged units. Three PBR's pulled the beached boat free and towed it back to Tra Cu with Seawolves providing air cover. Artillery fire and LHFT strikes were placed on the enemy positions when the friendly forces were clear. Energy casualties were unknown, while U. S. casualties were one killed and five wounded.

At 1910 on 12 April, a routine patrol for reconnaissance of water-

Encrosure (1) CONFIDENTIAL

وأخدمت بالترج ألحارة

borne ambush positions, consisting of two FEA's, two ASFB's, four ATC's and a monitor, was attacked by B-40 and automatic weapons fire from the west bank of the upper Vam Co Dong, 11 miles northwest of Tra Cu (XT 392 176). Two ATC's received hits at the waterline and left the scene to effect temporary repairs. Fire was returned and artillery was called in. Three ATC's which had been diverted from a regular patrol to assist in placing haransment and interdiction fire arrived at the aubush site at 2056 and immediately received enemy fire from both banks. Two of these ATC's received hits causing minor material damage. Eelo gunships were scrambled and placed strikes on the enemy positions until 2236. Nine sailors were wounded (one serious, three minor and five slight) in the action and enemy casualties were unknown.

During the period 181922H to 190805H, two ATC's inserted, supported and extracted SO U. S. Army Ninth Infantry Division troops in the Vam Co Dong River, 42 miles southeast of the Ben Luc Bridge (XS 655 688). During the operation the ground troops unde contact with a North Vietnamese Arry force unich resulted in five NVA killed.

On the evening of 27 April, a PBR patrol sighted a sampan with eight men crossing the Vam Co Dong River one mile north of Ben Luc (XS 603 772). As warning shots were fired the occupants of the sampan jumped into the river. Attempts by the patrol to capture the swimmers met with no success when the swimmers refused to surrender willingly. Two additional PBR's were scrambled to assist in the capture operation. As

> Enclosure (1) COLVIDE:TIAL

the enemy began to reach the river bank they were taken under fire and killed when capture was impossible and escape was imminent. The patrol did manage to capture two Viet Cong from the waters edge and one wounded Viet Cong from the bank. Two of the Viet Cong made the shore and were 10 meters inland when they were fired upon and killed by the reinforcing PBA's. At the same time one Maxyman was wounded by a booby trap on the beach as three of the crewmon attempted to take prisoners. Seavolves were scrambled to assist in the encounter and put a strike in the field surrounding the action. U. S. casualties were limited to the one wounded man. Encay casualties were five killed and three captured (one of these wounded). One of the FOM's was a North Vietnamese regular.

In the morning of 26 April, Seawolves 37 and 36 engaged a target of opportunity, consisting of numerous sampans, about 7 miles northeast of Noc Nos (XS 140 950). They placed strikes on the target and received no return fire. While turning away from the target so as to clear the Cambodiau border, the wing aircruft, Seawolf 37, received destructive fire and radioed he was going down. The aircraft crashed and exploded on contact. The lead aircraft spotted one crewman of the downed helo attempting to clear the wreckage and turned to provide cover and extinction. At this point the lead helo received fire that damaged the cill system and caused a forced lauding about 35 note s from the crash site. The crewmen evacuated the aircraft and set up a defense perimeter. the man raced to the burning helo to aid the zam attempting to free himself. An Arny Slick

Anclosure (1)

arrived on the scene and made a run in to pick up the down personnel. Heavy automatic weapons fire wounded both door gummers of the Slick. As the personnel were loaded aboard the Slick, one man from Seavolf 38 was killed by enemy fire after he was seated in the rescue aircraft. U. S. casualties were four killed, and four wounded, including the Slick door gunners. Seavolf 38 was observed to be hit by an unknown mortar and burst into flames from a direct hit. Both aircraft had gune down just inside the Cambodian border.

Barrior Reef Cuppairn

Routine interdiction patrols and floating night ambushes continued as standard operating procedure for the forces involved in Barrier Reef east and west along the Lagrange, Ong Lon, Dong Tien Canals. Enemy contact was in general very light throughout the month with only four enemy initiated fire fights being recorded. Enemy casualties for April were 23 killed (12 probable) and one wounder. There were two structures and one sampan damaged during encounters. Navy casualties were three wounded.

On 2 April, TU 194.6.2 relieved TU 194.6.4 on Barrier Reaf West and USS GARRETT COUNTY with RIVDIV 554 departed the area. From six through 11 April intensified patrols and night ambushes were conducted in Barrier Reaf West in support of 44th Special Tactical Zone operations. Troop insertions were conducted by TU 194.6.2 on five occasions. All resulted in negative contact. There were no mining incidents during

> Enclosure (1) CONFIDENTIAL

÷.

Same

1

the month. On two occasions Barrier Reef West forces came to the assistance of friendly forces engaged with the enemy.

TE 194.9.3.1 (PBR's 148 and 78) units provided a blocking force for Kien Tuong PRU Team in contact with an estimated 40 Vist Cong on 18 April, approximately 4 miles southwest of Ap Bac (XS 100 689). The PRU's requested assistance and Semelves were scrambled and placed a strike on the energy positions. An OV-10A on visual reconnaissance flight was diverted to the scene and placed a strike on the energy forces while the Seawolves had withdrawn to rearm. The Seawolves returned to place a second strike on the area. The PRU's were subsequently extracted by an Army Slick. There were no friendly casualties. Energy casualties were three killed by the PRU's and two killed by the OV-10A. This was the first use of coordinated air support using Seawolves and OV-10A's in this area.

On 25 April a farmer reported to Vielnamese authorities in Tram Chim *Lat 100 Viet Cong were moving east about three miles to the southeast (WS 650 760). One PBR patrol with an ASPB and an ATC fired into the area. The naval units were able to see the Viet Cong in the fields during the attack. During the attack the Viet Cong retreated south into a nearby village. After firing, one PBH with the ASPB departed the area and the other two boats assumed ambush positions along the Dong Tien Canal. These units observed a Vietnamese outpost (WS 668 793) under fire at 0315 on the 26th and responded by providing support fire. At this time the boats received small arms and mortar fire from the north bank of the canal. The other half of the patrol

> Enclosure (1) CONFLOENTIAL

arrived on the scene and joined the firefight. One NSD, two PBR's and an ASPB were scrambled from Tram Chim and supported the units under fire. Seawolves were scrambled and placed strikes on both sides of the canal at the estimated enemy positions. The enemy fire was suppressed. One Navyman had been wounded on the ATC and was medewaced by the NSD. Seven Vietnamese at the outpost were medewaced by PBR. Enemy casualties were unknown. It is believed that the first Vist Cong fired on were enroute to ambush PBR's when they were surprised and changed their plans, attacking instead the outpost for possible future use as a position for PBR ambush, after assuming the boat patrol had left the area. The Vist Cong had used .30 and .50 caliber machineguns in their attack on the outpost and had succeeded in cutting the perimeter wire and entering the compound before they were driven back.

TRAN HUNG DAD Compains

The routine patrols of U. S. and VAN Swift boats, U. S. PBR's and VNN junks and FON's (French river patrol boats) on the Rach Giang Thanh and Vinh Te Canal were carried out with almost no interruptions from the enemy. Special SEAL, IDNN and reaction team operations had similar results. Five enemy initiated fire fights and two fire fights initiated by friendly forces occurred during the month. Friendly casualties for the month included three VNM and one PF killed and three VNN, one U. S. SEAL, and one local soldier wounded. Enemy casualties were unknown.

> Enclosure (1) CONFIDENTIAL

n

Although the level of energy activity was lower than previous months, there were several incidents when friendly forces did detect energy movements. On 2 April VNN reaction troops and local PF's were sweeping the morth bank of the Vinh Te Ganal 5 miles southwest of Chau Doc (WS 065 807) when they came under some automatic and rifle grenade fire. The troops returned the fire and advanced toward the Viet Cong. The chase ended very quickly as the energy fled across the border into Cambodis.

Shortly after dark on 5 April VNN reaction troop and CIDG forces sighted four Viet Cong who were attempting to cross the canal (VS 590 633) in inner tubes. Taking them under fire the friendly troops case under B-41 rocket grenade, small arms, and mortar attack from an unknown number of Viet Cong on the north bank. VNN junks proceeded to the ambush site and provided gunfire support. Contact was broken off and the troops were extracted. Later the same evening, the troops were inserted for a sweep of the area while U. S. and VNN PCP's provided illumination. The Viet Cong had fled the area as nothing was found.

VNN junks and reaction troops had set a routine ambush on the early morning of 21 A; "il when they received word that the reaction force base camp southwest of Chau Doc (WS 082 798) was under RPG and mortar attack. The ambush team moved their position in order to cut off a possible Viet Cong retreat route and one command junk commenced firing 81-mm illumination rounds. Around 0400 they secured the ambush to search for three missing VNN troops. All three were later found dead.

> Enclosure (1) CONFIDENTIAL

SEARCH TURN Campaign

Operations by patrol craft of TU 116.1.3 in the routine patrol area on the Rach Gia-Long Xuyen and Rach Soi canals made no contact with enemy forces during April. Routine patrols by PBR's continued in the shallow coastal areas of Rach Gia Bay. Numerous spucial patrols on escort missions were carried out on adjoining and interconnecting waterways such as the Bo The, Tri Ton, Rach Gia-Ha Tien, and Can Gao canals and Cai Be and Cai Lon rivers. During thuse operations hostile fire was encountered three times during the month resulting in three PBR crewmen wounded and minor damage to two craft. Firing on four suspected enemy positions and one evading sampan the patrol units killed one Viet Cong, destroyed five and damaged three structures, and detained a sampan with one female suspect and 1,500 pounds of rice, while keeping the waterways open to commerce and denying their use to the enemy.

In Kien Giang Province, approximately 16 kilometers north of Rach Gia (WS 071 246), elements of TU 116.1.3 came under enemy B-40 rocket and automatic weapons fire of about five minutes duration at 2240 on 1 Å ril. Seawolves were scrambled and placed the first of two strikes at 2340. The PER's exited the firing area at 2350. Three Navymen were wounded and medevaced as a result of the attack. Two PER's were damaged but repairable. Enemy casualties were unknown. The area of the attack has been suspected as a Viet Cong crossing point for the inland supply route through Kien Giang Province. Novement of known enemy units and

> Enclosure (1) CONFLUENTIAL

Ì

CONFIDENTIAL

the appearance of an unknown unit of an approximate 80-man strength indicates that a load of supplies was due to be moved along the route. PBR patrol tactics may have interrupted an enemy crossing attempt.

Just before midnight on 14 April, a PBR patrol on the Cai Lon River, 20 miles southeast of Rach Gia (WR 197 770), sighted a sampan with two occupants. When the sampan was hailed, one occupant jumped over the side and swam toward the beach. He was taken under fire and probably killed. The remaining occupant was taken into custody along with the sampan which contained 1500 pounds of rice. There were no U. & casualties.

MARKET TIME Raider Campaign

Enemy base areas and fortifications along the navigable waterways open to coastal waters along IV Corps were hit frequently by the combined sea, ground and air punch of the Swift boat river incursion 'operations. Operations on rivers such as the Bay Ha;, Cua Lon and Bo De continued on an almost daily basis and included several night patrols employing night ambush tactics. Enemy opposition was generally light with hostile fire being suppressed without friendly casualties in all but three of 18 incidents. Including one river incursion and troop support mission carried out by the Ham Luong and Co Chien River patrols, two by Third Coastal Zone WPB's and one river probe in the First Coastal Zone (in addition to SEA TIGER operations), a total of 49 special river operations were carried out during April.

> Enclosure (1) CONFIDENTIAL

CONFLUENTIAL

1

One of three series of Swift boat river incursions (mission number 422) in support of Operation SILVER MACE II in southern Ca Mau Peninsula from 12 through 15 April employed as many as 13 craft at one time and encountered the strongest enemy opposition. In one encounter one Swift boat was destroyed, four damaged, three crewmen killed, and another 33 wounded. (This action is discussed in the SILVEM MACE II Campaign section.) MARKET TIME Raider mission number 416 on the Song Bay Hap on 9 and 10 April and mission number 424 on the Song Cua Lon and adjoining waterways on 17 and 18 April also were conducted in support of SILVER MACE II.

Additional friendly casualties included six craft damaged and three crowmen wounded by hostile fire. Supporting aircraft came under fire eight times with one helicopter receiving minor electrical damage from an automatic weapons hit. Troops embarked in the Swift boats or supported during sweep operations lost three killed and 16 wounded during the river incursions. Enemy damage and casualties were substantially higher as naval gunfire and ground forces combined to clear the area south of the Cua Lon River of several enemy held villages. During April naval gunfire by Swift boats and off shore support units killed 55 Viet Cong (12 body count plus 43 estimated) and wounded 10. A total of 582 craft were destroyed or heavily damaged and another 1,397 structures or bunkers were destroyed and damaged.

On the afternoon of the 4th, PCF's 56, 57, 95 and 102 made a two-hour transit of the Kinh Quan Chanh Bo and six connecting canals and rivere

Enclosure (1) CONFIDENTIAL

from the lower Bassac to the South China Sea through the Long Toam Secret Zone. Entering the canal 40 miles southeast of Can The (XR 412 627) the four craft took targets of opportunity under fire is they moved along the Kinh Quan Chanh Bo, Kinh Lang Sec, Rech Lang Sac, Rach An, Rach Saw, Song Lang Chim, and Song Lang Muoc. By the time they reached the open sea 70 miles south of Saigon (XR 730 720) the river probe accounted for 11 sampane and 7 bunkers isotroyed and one structure damaged.

On the morning of 9 April PCP's 21, 23, 31, 93 and 103 entered the Song Ong Doc (VQ 7998) with Mobile Strike Force (MSF) troops embarked. As they proceeded up river light small arms fire was received from the river bank. At a point seven miles up river (VE 908 005) the force came under small arms, automatic weapons, and recoilless rifle fire. One recoilless rifle round hit PCF 31 but failed to detonate causing only a small hole at the waterline. After suppressing the energy fire and clearing the area PCF 31 was escorted back to see by two additional Swift boats sent up river. Strikes by an Army LHFT and naval gunfire from USCGC MENDOTA (WHEC 69) were placed on the energy position. More small arms was encountered by the PCP's still on the river and the LHFT without friendly casualties. After leaving the river to rearm the Swift boats proceeded 5 miles up river (VE 885 002) and put the MSF ashore on the south bank in mid-afternoon. Following the departure of these units from the river at the completion of the ground sweep.

> Enclosure (1) CONFIDENTIAL

.

PCF's 22, 67, and 94 entered the river to establish night blocking patrols. The purpose of the operation was to intercept Viet Cong which might attempt to head north across the river as they evaded the forces of SILVER MACE II operating to the south. Early on the 10th PCF's 31, 36, 43, and 71 took over the continuing blocking patrol. At a point about 6 miles up river PCF 71 received minor damage from a recoilless rifle hit and one MSF was wounded. Other than light small arms fire the patrols continued without incident until termination that evening. In addition to suppressing hostile fire the Swift boats, MSF, LHFT, and fixed wing aircraft took targets of opportunity under fire in what local authorities had declared a totally restricted some along the river. Results included 17 structures and nine sumpane destroyed, 15 structures and 2 sampans damaged, and one Viet Cong estimated killed in action.

On 10 April three PCF's supported by a LHFT made the deepest penetration to date of the Song My Thanh proceeding inland to within a few miles of Bac Lieu (WR 8328). Shortly after PCF's 35, 54, and 96 entered the river 48 miles southeast of Can The (XR 3141) the LHFT encountered anti-aircraft fire from enemy positions south of the river. USCGC POINT GREY was standing by off shore and quickly suppressed the hostile fire with her mortar and machine guns. No other contact was made during the transit which disclosed several AKVN troops and Vietnamese flags along the pacified sections of the waterway. Taking targets of opportunity under fire which were sighted from the river or by a spotter aircraft overhead in prearranged free fire sone the

> Enclosure (1) CONFIDENTIAL

following results were recorded: 32 sampans and 18 structures destroyed, 6 compans and 91 structures damaged, and 5 Viet Cong killet (2 body count plus 3 probable).

SILVER MACE II Campaign

An extensive and coordinated SEA LORDS strike operation of limited duration took place from 7-18 April as U. S. Navy and Vietnamese Navy and Marine Corps forces combined to invade deep into the Viet Cong santuary in the Nam Can Forest area of the Ca Mau Peninsula at the southern tip of Vietnam. Under the tactical command of CTG 194.7, participating forces included 29 river assault craft of River Assault Squadron (HAS) 13, three battalions of Vietnamese Marines (about 2400 troops), 25 Vietnamese River Assault Group boats, 13 PCF's of TG 194.5, and various gunfire and logistical support units such as USS CARRONADE (IFS-1), CROCKETT (PG-88), MERCER (ABP-39), WESTCHESTER COUNTY (IST -1169), HAMPSHIRE COUNTY (IST-819), SATYR (ARL-23), KRISHNA (ARL-36), Navy Seawolf helicopters, SEAL and EOD teams, and a substantial force of Vietnamese supply vessels. A U. S. Army surgical team and medevac helo were aboard MERCER to render medical assistance.

Units rendezvoused in the Gulf of Thailand off the western mouth of the Cua Lon River and on the opposite side of the peninsula in the South China Sea east of the Bo De River in preparation for scheduled beach assault landings on 7 April. After airstrikes and Naval beach preparation fire, riverine assault landings commenced as the 4th Battalion VNMC went ashore

> Enclosure (1) CONFIDENTIAL

in the vicinity of Nam Can or one Song Cua Lon (VQ 986 667) and 6th Battalion VNMC troops were landed near Tan An on the Song 50 De (WQ 215 684). All landings were unopposed and without incident. The first enemy initiated incident of the campaign occurred at 1050 on the 7th on the Song Dam Noi (WQ 263 830) when a command detonated mine exploded 30 feet astern of one of four PCF's escorting a Vietnamese re-supply force from Ca Man to the operating area. No personnel or material casualties were sustained. The same task element later received heavy automatic weapons fire further downstream (WQ 270 785) at 1130. One MSF troop aboard a PCF was slightly wounded but no material damage was sustained as the boats continued toward the AO.

È,

The only significant enemy ground contact of the campaign occurred on 8 April as 4th Battalion VNMC troops established contact twice, first with a Viet Cong squad in the morning; and at 1355 when heavy contact was gained with an estimated platoon sig. element near the south beach of the Song Cua Lon 3 miles east of Man Can (WQ 040 674). A LHFT and fixed wing aircraft placed a strike consisting of bombs, napalm, and strafing fire on the enemy position at 1900 with unknown results.

Reconnaissance in force operations continued as over 60 assault landings (6 by PCF) were made throughout the area of operations during the campaign. Further enemy contact was very light as VNHC troops swept the area discovering substantial weapons caches, destroying Viet Cong bunkers and structures and detaining suspicious persons. RAC operations included KARE (Riverine Assault Reconnaissance Element) Eagle Float, PSTOPS, and blocking

> Enclosure (1) CONFIDENTIAL

force actions as they supported units of the 1st, 4th, and 6th battalions of the VNHC (The 6th Battalions VNHC was replaced by the 1st Battalion on 12 April.). PCF's conducted gunfire support, river raid, and troop lift activity throughout the campaign. Wide areas along the Bachs Ong Quyen, Ba Thank, Cai Chon, Duong Keo, Cai Nhap and the Songs Bo De, Dam Noi and along the Qua Lon and navigable streams in the southeast Cau Kau area were searched out by the U.S./Vietnamese Navy and VNHC teams.

Eight PCP's, with 6th Battalion VNMC troops embarked, sailed the Duong Keo River during late afternoon on 12 April for sweep operations in the day's objective area. At 1734, a large scale enemy initiated firefight by an estimated two Vist Cong companies was unleashed as the PCP's in column formation reached a position 4 miles upstream from the river mouth (VQ 046 544). Detonation of two claymore mines from the northwest bank was immediately followed by intensive B-40 rocket, recoilless rifle (R/R), .30 and .50 caliber machine-gun, rifle-grenade and small-arms fire. PCF 43 was hit by R/R and B-40 rounds which disabled her steering gear and fatally wounded the boat skipper, LTJG D. G. DROZ. The boat beached at high speed in the center of the ambush site, as B-40 rockets continued to smash into her. Uninjured crewmen and UDT personnel aboard set up a hasty perimeter around the boat as PCF's 5 and 31 returned alongside to assist the stricken PCF 43, at the same time maintaining a heavy volume of fire. Sezwolves reacted in five minutes and placed heavy machine gun

> Enclosure (1) CONFIDENTIAL

1

fire into the area. Enemy fire was suppressed. All personnel were removed from PGF 43 and PGF's 5 and 31 cleared the area. Later, a fire in PGF 43 reached WDT ammunition stores on board and created an explosion which destroyed the craft. Final results of the disaster were three U. S. Mavy personnel killed and 33 wounded and two Vietnamese Marines killed and 13 wounded. One PGF (43) was destroyed, two others were badly damaged, and two others received moderate damage. Enemy losses were 18 Viet Cong killed (2 body count and 16 estimated).

During an overflight of the operations area in a light observation hele at O845 on 16 April, the Commander of TG 194.7 spotted energy personnel setting up a probable ambush on the Song Cua Lon (WQ 198 715). RAC units transiting the area at the time were halted and VNMC artillery was called in on the site, causing two secondary explosions. RAC then landed one company of the 6th Battalion VNMC on the site at O952 but no contact was gained. A potential ambush of the RAC was thus ' sverted.

Operations concluded on 18 April as all units departed the area. Demonstrated again was the capability of riverine forces to conduct conventional anohibious operations in conjunction with riverine operations in a remote area with a minimum of outside logistical support. Results of the operation showed 38 Viet Cong killed (21 body count and 17 probable) and 47 sampane and 209 structures destroyed. In excess of 4,400 assorted rounds types of enemy ammunition, and over 380 enemy weapons, were captured. Seven hostile fire incidents were encountered in the campaign, including an

21

Enclosure (1) CUNFIDENTIAL

ENIFF on the Song Cai Tu in Chuong Thien Province on 22 April as RAC were enroute to the MRB after completion of the SILVER MACE II Compaign (Six USN were wounded in this encounter.).

Operation SEA LORDS Campaign in Engary Base Area 480

CTG 194.7, with 20 RAC of River Assault Squadron 15 and the 6th Battalion Vietnamese Marine Corps, commenced an operation SEA LARDS riverine assault and interdiction operation in the Twin rivers area (enemy base area 480) of Chuong Thien Province on 25 April. As in previous operations in this area, the mission was assigned to interdict enemy forces using the area as a staging and support base for the conduct of offensive operations in adjoining provinces.

The RAC/VNMC combination conducted unopposed landings along the Rach Nga Ba Dinh (WR 318 618) to begin the campaign. Ground contact with the enemy was insignificant as assault operations spread to areas along the Song Cai Tu, Rach Cai Ion and Kinh Xang Cut.

Confrontation with the enemy were not absent, however, as four enemy initiated firefights took place in April. ASPB-132-3 was sunk by a watermine explosion beneath its stern on 29 April on the Song Cai Tu 10 miles southwest of Vu Thanh. Another ASPB was lightly damaged as the second RAC transited in company with Vietnamese RAG 25 units. One sailor was killed, one declared missing and 10 wounded in the mine blast.

As the operation continued into May enemy casualties included seven Viet Cong killed (6 body count plus 1 probable) and 12 captured.

COASTAL SURVEILLANCE FURCE SUMMANY April 1969

Detections of junks and sampans by MARKET TIME surveillance units increased again in April as weather and sea conditions continued to improve in the coastal waters of South Vietnam. The total of 49,258 detections in April represents a 13 percent rise in coastal activity over March. Patrol effectiveness improved significantly as the percentage of detected craft which were checked by inspection or boarding rose from 63 percent in March to 73 percent in April. A total of 26,064 inspections and 10,088 boardings of junks and sampans resulted in the detention of 960 persons, including 54 Viet Cong suspects. In addition, Swift boat patrols on the Van Co River supporting Operation GIANT SLINGSHOT until 7 April and in the normal GAME WARDEN river patrol areas of the lower Ham Luong and Co Chien rivers detected 9,075 craft, inspected 2,622 and boarded 4,905. Steel hull detections in MARKET TIME patrol areas came to 1,144 with no suspicious activity disclosed by 838 inspections and 61 boardings.

Other routing river patrol operations continued on the Rach Giang Thanh as part of Operation TRAN HUNG DAO and in the First Coastal Zone on the Cua Dai River. The latter river patrol campaign, extending 8 miles into an area haboring strong enemy units, was given the code name Operation SEA TIGER in April. During the month activity on the Cua Dai River increased sharply with the two boat patrols carrying

GROUP 4 Downgraded at 3 year intervals Declassified after 12 years Enclosure (3) CONFIDENTIAL

aut 78 gunfire support missions, including 16 instances of hostile fire suppression; two evading sampans were taken under fire, and seven ground operations along the river were supported. In addition to receiving rocket and automatic weapons fire 16 times, the SEA TIGER patrols encountered two enemy water mine sttacks. However, friendly casualties were less than in March with four creamen wounded and three Swift boats receiving moderate damage. Enemy material losses were up reflecting the increase in SEA TIGER naval gunfire. A total of 48 junks and sempans and 34 structures were destroyed and three craft and 34 structures received heavy demage. In addition, Swift boat mortar and gunfire killed at less 10 Viet fong (1 body count plus 9 probable).

Navel gunfire support missions carried out during normal MARKET TIME petrols during April totale§ 452. This includes 20 cases of hostile fire suppression and mix evading craft taken under fire. MARKET TIME patrols also provided blocking petrols or inserted troops along the coast in direct support of 10 ground operations. Material losses inflicted on the energy totaled 79 junks or sampans and 14 basket boats destroyed and another 37 craft damaged. In addition a total of 151 structures were destroyed and another 196 heavily damaged. Energy casualties came to 38 killed (17 body count plus 21 probable) and 26 wounded. There were no friendly casualties or material losses due to energy action in normal MARKET TIME operations. As in previous months since the beginning of Operation SEA LORDS the river incursions by

> Enclosure (3) CONFIDENTIAL

CONFLORMAL

ないない。ななないとなって、ためのなかがなる

"Bwiff boats continued to score heavily sgainst energy units along the rivers and comals of IV Corps.

During April SEAL units attached to TF 115 carried out 12 special operations in the coastal area. Hostile fire was encountered once with no friendly losses. During these operations five Viet Gong were killed and one wounded by the SRALs. In addition, one structure was destroyed and two sampans were damaged.

On the evening of 7 April USCOC POINT PATRIDGE was on patrol in the mouth of the Ham Luong River when six people were sighted in a clearing on the south bank (XR 764 900). They were taken under fire from a range of 5,000 yards with sector approval and confirmation that no friendly units were in the area. Expending 11 rounds of mortar fire the cutter covered the target area well and observed two energy killed and the other four were estimated to have been either killed or wounded.

While on routine SLA TIGER patrol on 13 April PGF's 61 and 70 received small arms fire from a point 3 miles up the north channel of the Gua Dai River. The hostile fire was returned with mortar and machine gun fire and sampane and structures in the area were also taken under fire. The Swift boats destroyed four hootches, three bunkers, and four sampane while damaging five hootches and six bunkers. There were no friendly casualties.

On 15 April USCGC MENDUTA (WHEC 61) engaged enemy troops, bunkers and structures along the Song Ung Doc (VL 868 987) with the aid of an

> Enclosure (3) CONFIDENTIAL

and the second

Army spotter aircraft. Expending 139 rounds from her five-inch gun the cutter destroyed nine structures and four bunkers, damaged another four structures and two sampans, ignited a large secondary fire, and killed eight Viet Cong (3 by body count and 5 estimated). During the mission a nearby junk apparently interpreted the cutter¹Å² gunfire as a signal to come along side for boardi¹; because it closed the cutter twice only to be turned away by .50 caliber rounds fired across its bow. After the second pass the junk master put away the registration papers he had been holding up and left the area, possibly slightly confused.

On the afternoon of the 19th PCF's 24 and 79 on SEA TIGER patrols were headed east about 2 miles from the river mouth (BT 186 545) when they came under rocket and automatic weapons fire from the shore about 30 yards away. One 82-mm recoilless rifle round penetrated the engine compartment of PCF 79 causing minor damage and both craft were hit by numerous small caliber rounds. Three Navymen suffered minor wounds and one Viet Cong was killed by the return fire from the patrol craft.

On the evening of 22 April USCGC POINT MARONE fired on enemy structures and personnel 24 miles southwest of Bac Lieu (WR 498 005) with good effect. Expanding 59 mortar rounds and 500 rounds of .50 caliber the cutter started three large fires, destroyed two structures, damaged one bunker and two structures, killed an estimated two Viet Cong and probably wounded three others.

On the night of Li-15 April SEALs were inserted at the tip of the Ca Mau Peninsula (VG 696 507) in order to capture a man from a village at VQ 699506 and patrolled for several hours without finding signs of habitation. Early on the morning of the 15th the team fired on two sampans after the occupants signted the SEALs probing further down the coast. The two sampans were damaged and all five occupants were killed.

CONFIDENTIAL

RIVER PATROL FORCE SURMARY April 1969

GAME WARDEN forces continued operations throughout the Makong Delta and the Rung Sat Special Zone. In addition to their major task of population and resources control along the major waterways, PBR's participated in random canal incursions, MEDCAPs, and psychological warfare operations. Units of the forces were also involved in special interdiction campaigns including GIANT SLINGSHOT, BARRIER REEP, TRAN HUNG DAO and Rach Gia. At the end of the month 70 PBR's were assigned to support TF 194 operations. The remaining 144 boats assigned to TF 116 supported normal GAME WARDEN operations and those portions of the interdiction campaigns that came under the operational control of CTP 116. These expanded operations, which necessitated the relocation of some patrol craft from the major Dolta waterways, brought about a re-alignment of forces which occurred on 20 April. The new structure was as follows: TG 116.1 - Lower Bassac Patrol Group; TG 116.3 - Central Delta Patrol Group; TG 116.5 -Upper Delta Patrol Group; and TG 116.9 - RSSZ Patrol Group. Examples of the employment of the assigned task groups are given below.

Task Group 116.1 conducted evaluation and indoctrination of RUDD (Remote Underwater Datection Device) in the Bassac River, quick reaction operations, as contingencies arose, utilizing Kinh Phong Regional Forces, interdiction patrols and support of Kien Giang Province operations in the Rach Gia area, intensive evaluation of STAB (Strike Assault Boats)

GROUP 4 Downgraded at 3 year intervals Declassified after 12 years Enclosure (4) CUNFIDENTIAL

(

using these recently delivered ISSC's (Light SEAL Support Graft) on patrols of restricted Bassac tributaries, support of sector sweeps, and intensified patrols of the Can The crossing to provide better coverage of this critical area.

1

Task Group 116.3 units supported U. S. Minth Infantry Division LHRP (Long Range Reconnaissance Patrols) operations in interdicting suspected commo-liaison routes and in establishing anti-infiltration positions along the My Tho River, supported random PBR/PRU operations utilizing Ben Tre PRU organisation reacting to tactical intelligence, and joined with the National Maritime Police for a combined blockade of Thoi Son Island from 0600-1700 on 28 April.

Task Group 116.5 units conducted joint USN/VNN operations in the Upper Mekong/Bassac region concentrating on infiltration interdiction from Base Area 704 (located in Cambodia in the region where the Mekong crosses the border), conducted border patrol operations with two FBR's on station continuously in the vicinity of Tan Chau District of Chau Duc Province to prevent inadvertent border crossings by U. S. personnel and craft, and on 28 April commenced a five day incursion/patrol of Tri Ton Canal for the purpose of interdicting crossings, monitoring waterborne traffic and training USN and ACTOV personnel in live firing FBR ambush tactics.

Task Group 116.7 (disestablished on 20 April) units provided night cover patrol for a dredge located near Vinh Long (IS 042 342), conducted support operations with the U. S. Ninth Division, and employed RUDD on

> Enclosure (4) CONFIDENTIAL

night ambushes across known Viet Cong infiltration routes from Base Area 470 (located in Dinh Tuong Province).

Task Group 116.9 units provided support for PRU, SEAL, and RF company operations and continued to conduct USN/VHN operations to ensure safe passage of free world shipping in the Long Tau Channel to Saigon.

On 19 April Light Attack Squadron FOUR (VAL-4) became operational. Utilizing OV-10A's, the squadron consists of two detachments of five aircraft each, positioned at Vung Tau (TE 194.9.8.2) in support of GIANT SLINGSHOT operations and Binh Thuy (TU 116.8) supporting GANE WARDEN operations. Commanding Officer VAL-4 assumed the designator CTG 116.4. These 10 aircraft were supplemented by a minimum.

On 9 April, the Havy Unit Commendation was awarded to USS GARRETT COUNTY (IST 786), USS HARRETT COUNTY (IST 821), USS HUNTERDON COUNTY (IST 838), and USS JENNINGS COUNTY (IST 846) for their meritorious service from 10 November 1966 to 30 January 1968 and from 1 March 1968 to 30 September 1968 while serving as Mobile Support Bases for GAME WARDEN forces.

PBR's accounted for over 2,500 two-boat patrols during April. Detections, inspections, and boardings increased appreciably over last month's totals standing at 227,306, 50,582 and 70,838 respectively. The UH-1B and OV-10A aircraft assigned to GAME WARDEN forces accumulated 310 hours in pre-planned strikes, 53 hours in reaction strikes, 208 hours

> Enclosure (4) CONFIDENTIAL

on targets of opportunity and 183 hours on support strikes for a total of 754 hours of combat.

PER. UH-1B. and OV-10A GANE WARDEN Operations

Two PBR's escorting TLLC-5 on the afternoon of 1 April came under mortar and automatic weapons fire 13 miles southwest of My Tho (XS 300 383). The units immediately returned fire and were joined by two Seawolves who had been on a routine patrol. After repeated coordinated firing runs by the PBR's and Semvolves the enemy fire was suppressed. Troops from Hem Long Sub Sector who were operating in the area subsequently conducted a sweep through the embush area and found that seven Viet Cong had been killed in the fire fight. There were no friendly casualties.

Seawolves on a routine My Tho patrol in the early evening of 8 April received clearance to place strikes on an estimated platoon of Viet Cong located 8 miles west of Truc Giang (XS 378 323). Moderate to heavy small arms fire was received from the area during the strikes. One secondary explosion resulted from a Seawolf .50 caliber hit. Enemy casualties were estimated as 10 Viet Cong probably killed and an additional four wounded. There were no U. S. casualties.

Just before 1800 on 9 April, PBR's 756 and 842 came under enemy fire while transiting the Dong Tran Canal, $15\frac{1}{2}$ miles southeast of Saigon (YS 092 740). Both boats were operating at top speed and were on opposite sides of the canal when four B-40 rockets were fired at them from the north bank. Only the second rocket scored a hit when it penetrated the gun tub

Enclosure (4)

CONTINUITAL

and killed the forward gunner on PBR 756 which had been traveling along the north bank. PBR 842 moved from the south bank to the energy firing position and reconned the area. At this point 842 came under automatic weapons fire from both banks and received damage. As a Navy LHFT was being scrambled to their assistance, the two PBR's reversed course and made another firing run through the Viet Cong positions. Additional PBR's then arrived on the scene to escort the damaged boats back to Nha Be. The LHFT, after placing strikes in the area, remained to provide cover for a planned insertion of PRU's. The PRU insertion was cancelled, however, due to approaching darkness and the lack of a safe landing sone. The LHFT then placed an additional strike on the enemy positions. Once all units were clear of the area, Arey artillery commenced to saturate the probable energy positions. After the barrage, a VNN LSSL fired 3-inch H and I fire into the suspected positions for almost an hour. Enemy canualties were unknown. Friendly casualties were one USN killed and three wounded; one VNN riding in the PBR's was also wounded.

Late on the morning of 24 April, OV-10A's of TU 115.4.8 placed a strike on a target-of-opportunity enemy position approximately 7 miles southeast of Sa Dec. During the attack no enemy fire was received and there were no U. S. casualties. Enemy casualties were listed as two Viet Cong probably killed and six wounded. Enemy material casualties were six structures and seven bunkers destroyed and three structures damaged.

PBR's on petrol in the ESSZ, 21 miles southeast of Saigon (IS 217 715),

Enclosure (4) CONFIDENTIAL

observed A sampan with three occupants at 2100 on 25 April. The sampan attempted to evade after warning shots had been fired and was taken under fire. One of the Vist Cong were killed and the other two captured. The sampan was subsequently destroyed and one AK-47 captured. There were no U. S. casualties.

"Swift" Boat Game Warden Operations

During April the number of "Swift" boats on patrol of the lower Ham Luong and Co Chien rivers was increased from two to three in order to provide better coverage of these heavily traveled waterways. At the beginning of the month the PCP patrol on the Soi Rap was shifted to the Van Co until the 7th when this area was taken over by PER's. Swift boats on river patrols in normal GAME WARREN areas detected 9,075 craft, of which 2,622 were inspect.⁴ and 4,905 were boarded. While operating on the rivers the PCF's carried out 58 gunfire support missions and participated im 15 ground operations by traveling up adjoining canals and rivers to insert, support, and extract troops. Included in the naval gunfire missions are three cases of hostile fire suppression. No friendly losses resulted from these encounters. Enemy losses to the Swift boat operations totaled three killed (body count), two wounded, 15 craft destroyed and one captured, 18 structures destroyed, and 25 structures damaged.

On the night of the 6th, PCF 54 carried out harassment and interdiction fire on a suspected Viet Cong concentration 18 miles up the Ham Luong River. Firing 30 rounds from her 61-mm mortar the Swift best killed one and wounded two Viet Cong.

and the second

المرقور معا المكاهد الألك

On 28 April Co Chien River patrol units participated in a sweep by the 246th RF Company along the Khen Thuyen River. The troops were picked up by PCF's 56, 57 and 95 at Ap Thuan An (XR 656 959) and taken about 4 miles up the Khen Thuyen to JK 774924. During preparation fire on the landing area and while engaging targets of opportunity upon leaving the river the three Swifts destroyed 12 structures/bunkers, damaged another 38, destroyed eight sampans, and damaged one other sampan.

الماري والمسترقية والمتنا والمنافق والمتلقي

SEAL Operations

On 1 April, five SEALs and 10 PRU's were inserted by sampan 4 miles northeast of Sa Dec (WS 901 389) on a recommaissance mission. Proceeding 300 meters up a canal they captured one Viet Cong and one Viet Cong suspect. Leaving three PRU's to guard the prisoners the remainder of the group continued on up the canal where they began a house search. While taking two captives from one house they observed a man evading into a canal. He was taken under fire. The SEALs then came under small area and automatic weapons fire from both banks of the canal and the treeline. In the ensuing firefight, three Viet Cong in one of the housee were killed. Semvolves were scrambled and the SEALs broke contact and proceeded down the canal for extraction by LCPL. The Seawolves then placed a strike on the ensuy positions. There were no friendly casualties. Enemy casualties were four Viet Cong killed with an additional three listed as probably killed, three captured and one suspect detained.

PBR's inserted a SEAL team 16 miles south of Saigon (IS 876 619) on

Enclosure (4) CONFIDENTIAL

the night of 22 April. As the SEALS patrolled inland, three Viet Cong with weapons were observed moving northeast past the rear of the SEAL position. The Viet Cong spotted the SEAL rear security and evaded into a treeline where four additional Viet Cong were observed. The SEALs then moved south where they came under enery fire from the mortheast and northwest. As they continued to move south under fire, additional energy fire was received from the southeast. ESSE TOO was requested to scremble a Slick for extraction. A Nevy HHTT was also some and placed strikes around the SEAL perimeter. Having SUDDressed the energy fire, the LEPT provided odver for the SEALS as they moved to the FBB Yendesvous point where they were safely extincted. The additional tweets sent by ESSE TOG assisted in placing N and I fire into the suspected energy positions. There were no friendly Gasualties: Enury consulties were two killed by the SEALs and three probably killed by the LETT.

On the evening of 23 April; SEALe, PEU's and two LDNN's were inserted by truck, 13 miles northwest of My Tho. They moved northeast and set a security position at a house near a primary PRU objective. At O315; they received heavy small arms fire from the area west of the house. They returned and suppressed the enemy fire. One SEAL received alight shrepnel wounds and a MERCITAS was ordered. The group patrolled wouth under cover of gunships and the dust off was completed. Friendly casualfies were one Mevyman wounded, one PRU killed and two PRU's wounded. Six Viet Cong were Filled in the insounter.

> Enclowere (4) CONFIDENTIAL

COLFIDERTIAL

F:

A team of Sikis with two hoi Chanhs, reacting to intelligence provided by the Soi Gnanks, departed Can The late on the afternoon of 29 April. At their first stop the SEALs waited at a hootch (WR 823 954) while the Hoi Chanhs walked on to a market to pick up two females who were supposedly Vict Cong Medics. At 1800 the Hoi Chanhs returned with the suspects and the entire group moved by truck to Cai Tac Village Police Station (WR796 977). From here the Hoi Chanhs set out for their second target where they observed two males in a hootch and a third man moving 105-mm artillery rounds to a cache site. They took the third man under fire and killed him and received fire from the hootch. The Hoi Chanhs withdrew taking four 105-ma rounds with these. A third target had to be aborted when it was learned that friendly operations were being conducted in the area. The group remained overnight at the police station and the next morning, at 0730, the Hoi Chauhs set out for the Cai Tac market in search of three VCI members. At 0830 they returned with the three suspluts. The original two detainces from the first stop were released when it was decided that they had been set up for capture after having wronged the Viet Cong. The remaining detainees and the captured rounds were subsequently taken to Can Tho. There were no friendly casualties.

Energy Attacks on Nerchant Vessels

During the month, there was a dramatic decrease in the number of attacks on allied merchant vessels on the Long Tau. Only four such incidents occurred throughout the month. Three of these, 5 April against SS BUCYRUS VIC.CHY, 15 April against the Vietnamese merchant ship PHU QUCC, and 29

> Enclosure (4) CONFIDELTIAL

COUP INSTIAL

April against 33 Fuestherr Plands missed their targets. The USHS FedSEUS use hit on 27 April but only minor material damage resulted. In all instances there was installed response to the attacks which was instrumental in suppressing additional fire.

1

HIVERINE ASSAULT PORCE SUMMARY April 1969

Neval units of the Mobile Riverine Force participated in operations which were characteristically diversified as to type of mission and area of employment during April. Reconnaissance in force, search and destroy, patrol, ambush, troop lift, inspection, Kagle Float, fire support, blocking force, secont and payope duties were carried out by river assault craft often in conjunction with U. S. Army or Vietnamese forces as they operated from the GIANT SLINGSHOT Campaign area (the northern most area of Mavy involvement in the Delta region) to the southern most reaches of the Cau Mau Peninsula (SILVER MACE II Campaign). The long term riverine assault operations in Kien Hos Province continued as the combined Army/Navy units again inflicted severe losses on the energy.

The following table indicates the distribution and employment of river assault craft on a typical day in April:

ACTIVITY/OPERATION		-	MRP	CRAPT A	SSIGNED	
	ASPB	ATC	HON	<u>CCB</u>	REFUELER	TOTALS
2nd Brigade, U.S. 9th Infantry Division	12	36	9	5	1	63

2.2.

CONFIDENTIAL

The recurring danger of energy eximer/sapper activity against river craft was in evidence again this month as three mining incidents or attempts were recorded against MRF craft operating in Kien Hoa Province and enery Base Area 480. On 22 April, while transiting enery Base Area 480 enroute to the MRB after completion of Operation SILVER MACE II, RAD 132 assault craft were engaged in an energy initiated firefight on the Song Cai Tu 8g miles southwest of Vi Thanh (NR 420 756). During the action a watermine exploded 60 feet off the starboard bow of CCB-132-1 and caused minor flooding which was brought under control. Potential disaster was averted on 24 April when a Viet Cong command detonated "ine was discovered attached to the anti-swimmer net of APL-26 between the bow and pontoon. The homemade mine, weighing approximately 150-175 pounds, was discovered at 0730. Fish fleats were seen attached to the barrier while it was being reised prior to getting underway; inspection by ECD personnel revealed the mine with the detonator lead severed. Speculation was that the detonator wire was cut during a minesweep petrol by a base defense boat. Lastly, ASPB-132-3 was sunk on 29 April on the Cai Tu River as an enery mine of unknown type was detonated beneath its storn during the operation in enemy Base Area 480 in Chuong Thien Province. A second ASPB, 132-1 was damaged as a result of the explosion. (This incident is described in the SEA LORDS section under Operations in Enomy Base Area 480.) The sunken ASPB was already hauled up on a beach by 30 April as the timely salvage operations continued.

> Enclosure (5) CONFIDENTIAL

Salvage operations on Monitor 111-1 which was sunk as a result of battle damage on the Van Co Tay River, 42 miles northwest of Moc Hoa were completed on 20 April and the craft was towed to Nha Be. The extensive repairs necessary are estimated to require use of out of country facilities. The monitor had sunk on 31 May.

River Assault Division 92 commenced six days of training for Vietnamese Navy boat crews on 28 April under the Accelerated Turnover Program (ACTOV). This training is in connection with a scheduled incremental turnover of RAC to the VAN in June.

Loudspeaker payops broadcasts were an important aspect of RAC activity as tapes were played in all operating areas, at times during insertion/extraction of troops and immediately after firefights.

TASK GROUP 117.1 Operations

The concerted efforts of the MRP in Kien Hoa Province and adjacent areas again resulted in a record number of enemy casualties as aggressive search and destroy tactics accounted for 1155 Viet Cong killed during April. Side thrusts of a few days duration were also made by MRP forces into Go Cong and Vinh Binh Provinces during tho month.

Encry initiated activity during April diminished somewhat as hostile fire incidents directed against TG 117.1 RAC were encountered on eight occasions as compared to 21 such incidents last month. U. S. Navy casualties during these actions were 27 wounded.

River assault craft of River Assault Divisions (RAD) 131, 132, and

Enclosure (5) CONFILENTIAL

151 supported the 3/47th, 4/47th, 3/60th and 6/31th Infantry battalions of the U. S. Army Minth Division at various times throughout the month as assault landings were conducted along numerous rivers and canals throughout the operating area. RAD 92 as utility division provided frequent escort services, supported the 3/34th Artillery Battalion at fire support bases and commenced ACTOV training with the VNM. RAD 152 acted as base defense division. On 25 April RAD 132 relieved RAD 111 in the GLANT SLINGSHOT area.

On 2 April, nine BAC of RAD 131 (with one company each of 4/47th & 3/60 infantry and the headquarters company of the 3/34 Artillery embarked) were engaged in an enemy initiated firefight on the Bach No Cay, 13 miles south of My Tho (23 468 206) while escorting 3/34th artillery barges. About eight B-40 rockets and heavy automatic weapons were fired at the boats resulting in one rocket hit each on Monitor 151-1 and ATH 131-12 and minor material damage. Fire was immediately returned and suppressed by the boat column and LHFT overhead. Nine Navymen were wounded (all minor); one soldier was killed and four were wounded in the attack. Enemy casualties were one killed with other results of suppressive fire unknown.

Seven RAD 92 units, engaged primarily in fire support base (FSB) security operations during April, were enroute on 16 April from the mobile riverine base at Dong Tam to FSB Khan when they received five recoilless rounds from the south bank of the Song Ben Tre, 8 miles southeast of My Tho (XS 532 313) at 0935 Monitor 92-1 and Refueler 112-1 were

> Enclosure (5) CONFIDENTIAL

hit by one round each wounding three sailors. All units returned and suppressed the fire. The refueler was carrying Mogas in the well-deck; this was ignited and the boat became engulfed in flames. The blasing boat was immediately beached and the crew evacuated to ATC's 92-7 and 92-3. Firing commenced immediately and was aided by the quick arrival of additional equipment and firefighting foam flown to the scene by an Army helo. The fire was extinguished at 1115. An Army LHFT came on station immediately and Army 1st Air Cavalry troops arrived within 10 minutes to provide security for salvage operations. The boat was towed to Dong Tam for repairs.

On 26 April ATC's 152-7 and 152-13, while on base defense patrol, sighted a total of five persons at two locations on the south bank of the My The River (XS 383 406 and XS 400 407) two miles southwest on Dong Tam. The Viet Cong were spotted in a free fire some with a night observation device. The RAC took the Viet Cong under fire resulting in two probable kills.

CONTINENTIAL

NAVAL ADVISORY GLOUP April 1969

Vistnemess Navy

Developments in the Accelerated Turnover Program (ACTOV) and re-Inted projects that are designed to increase the role of the Vietnamese Navy moved smoothly forward in April. Aside from some minor equipment problems and the lack of a technical English vocabulary, the Vi PBR trainees have performed well in active patrols. The enthusiastic and eagor sailors are quickly learning proper procedures for firing and clearing weapons, searching untercraft, and cleaning weapons. The USCG WEB's POINT GARDER and POINT LEAGUE sailed for MARKET TIME patrols on 6 and 18 April, respectively, entirely manned by VNN personnel with the exception of the Commanding Officer. Known as the SCATTOR Program (Smill Craft Assets, Training, and Turnover of Resources), VM sailors relieve their USCG counterparts on the WPB's one at a time until the entire crew except for the Commanding Officer is manned by the VMM. The US Commanding Officers are relieved by a VAM counterpart when the boats are officially turned over to the Vietnamese Havy.

With the exception of the night of 10 - 11 April, Vill confrontations with the energy were light and scattered during the month. Almost completely avoiding any rajor contact with government forces, the energy appeared to limit his activities to sporadic atlacks by fire, minor ground probes, terrorist actacks, and increased siming attempts. While

GROUP 4 Doungraded at 3 year intervals Declassified after 12 years Enclosure (7) CONFIDENTIAL

patroling an average of fourteen HARKET TIME stations, Fleet Command ships searched 6,593 junks and 23,497 people. Eleven of these junks and Al people were detained. This represented increases of 49.25 and 44.55 in comparison to the figures for March. During the month Fleet Command Units fired 61 NGFS missions. The LSSL's and LSIL's accounted for the sajority of them while firing harrassment and interdiction missions into suspected VC locations along the Ham Luong , Co Chien, My Tho, and Hau Gian Rivers and in the Rung Sat Special Zone. In addition to the routine patrols conducted by the LSSL's and LSIL's in the Long Tan, Hy The, and Bassac Rivers, one LSEL and one LSEL, along with two LCH's and RAG 21/33 units, they provided troop lifts, logistic services, and NOFS for Operation SILVER MACE II on the lower Can Mau Peninsula. During routine sweeps of the Long Tau, Dong Hai and Saigon Rivers Mik's and LCHM's. recovered electrical cable from their successing gear on three occasions and on 12 April two MLN's received small arms fire from the west bank of the Dong Nai River, (YS 045915) that resulted in two small holes in the bow of one boat.

VN FBR's of River Patrol Group 51 (RPG 51) were involved in nine incidents and fire fights during troop insertions and while engaged in the three daily and five nightly patrols on the Long Tau and Soirap Rivers. The FBR's accounted for six VC killed, four VC captured, and one VC who rallied. On 29 April two VN FBR's with VN Rangers embarked were conducting a recommensance mission with helo escort ten miles southeast

> Enclosure (7) CONFIDENTIAL

7

of Saigon on the Ong Keo stream. After completing the mission, the PBA's started back to Dong Tranh when a mine detonated under the lenā boat, initiating a heavy B-40 and B-41 rocket attack (IS 036762). The boat occupants were knocked down and the boat went out of control and proceeded ten meters inland before coming to rest. The cover boat medevaced the four VAR, six VA Rangers, and US Ranger advisor who were wounded to Wha De. One Ranger was killed and the beached FBR was extensively damaged.

There were 67,943 junks and 214,918 people searched in April by Coastal Group units of all four Coastal Zones. This represented a 1.45 and 7.9% increase in comparison to the March statistics. Detainments increased from 80 to 181 junks and from 646 to 941 persons. The first three coastal zone junks were credited with 95% of the junks and 88% of the persons detained.

The Cua Dai River area remained the center of energy activity for junks of the First Coastal Zone. On the morning of 11 April Coastal Group (CG) 14 units were sweeping Thuan Thinh Island (BT 170550) when they engaged the energy. Three VC were killed and one VC was captured. Late in the afternoon the coastal group conducted another insertion (BT 102550) on the island and this time one VC was killed. On 18 April CG 34 units inserted four RF companies and one AKV: eleven miles south of Den Tre on the Xam Luong River (XS 600130, 630150, 600190) on three different occasions. While the ground forces swept the area, the junks

CONFIDENTIAL

COSPIDE:TIAL

acted as a blocking force on the adjacent river. During the day the combined force accounted for twenty one VC killed, twenty one VC captured, and two suspects VC stained. Several personal weapons, the short wave radios, and some medical supplies were uncovered. The VN sailors were credited with one VC killed and four VC captured (included in total) and the destruction of three enemy sampans.

Fatrolling six miles south of their base camp (CQ 155777) on 27 April, CG 23 junks spotted two people on the beach who ran and hid in the nearby rocks after being sighted. Responding to the VM call for fire support, U.S. PCF 49 jointed with the VM units to place machine-gun fire on the beach. A VM landing party went ashore and found one VC and trails of three others who were wounded. Several fifles, a quantity of rice and medicine, two satchel charges and some miscellaneous pieces of cloth were confiscated.

In operation Tran Hung Dao an average of two VE PCF's and ten Fourth Coastal Zone junks patroled the Hach Giang Ethanh and Vinh Te Canal from Ha Tien to a point twenty miles upstream (VS 690629). Reaction troops, junks, LDNE, U.S. Seals, and TF 116 PBR's carried out ambush patrols and sweeping operations south from Chau Doc. There were several small akirmishes and fire fights during the month but generally routine patrols were the order of the day.

In the Third and Fourth Riverine areas VII River Assault Groups (RAG's) were involved in troop lifts, amphibious operations, convoy

Enclosure (7)

COLFIDENTIAL

CONFILETIAL

escorts, blocking missions, Psyops, civic action, medewacs, and fire support. From 21 - 25 April RAG 26, U.S. Army, and local troops conducted river control operations on the Saigon River twolve to twenty five miles northwest of the capital city (from XT 750176 to XT 53:366). Enemy forces, utilizing a combination of B-40 rockets, mortar, small arms and one command detonated water mine, initiated fire fights on four separate occasions. Two U.S. advisors, three U.S. soldiers, two VNI smilors, and one civilian were wounded during these incidents. One of the seven VC killed by friendly forces had in his possession an order to stop the VNN units in the area.

Eiver Assault and Interdiction Divisions 70 and 71 (RAID 70 and 71) continued to improve their effectiveness in GIANT SLING SHOT Operations on the Vam Co Dong and Vam Co Tay Rivers. On 24 April the tactical area from 2nn An up the Can Co Tay to Moc Hoa was assigned to RAID 70 and the RAID commander assumed CTU 194.9.3. This new responsibility involved a shift in the RAID assets. RAID 70 was assigned six ASF3's five ATC's, one monitor, and one CC3 at Tan An and two ASFB's, three ATC's, and one monitor at Tuyen Nhon. RAID 71 has four ASFB's, three ATC's and one monitor at Ben Luc and four ASFB's and two ATC's at Tra Cu. The VX recorded ninoteen fire fights initiated by the enemy and eight initiated by Vietnances forces in GIANT SLENG SHOT Operations. Coordinated operations with FAID's were responsible for 92 VC killed, ten VC and three suspected VC captured. Friendly forces operating with the VAN suffered

Enclosure (7)

COFIDERTIAL

CONFIDE: TIAL >

four killed and twenty-one wounded. The RAID's had only three wounded.

Vietnamese Marine Corps

There was light to moderate energy activity reported by the Vietnamese Harines in April resulting from operations conducted in III and IV CTZ.

Brighde A, comprised of the Brigade Huadquarters, the Third Infantry Battalion, and Battery A of the WHC Artillery-Battalion, continued reconnaissance in force and tank - infantry operations in Binh Duong Province (approx. XT 580150) under the operational control of the 5th A.J. Division. Several light and scattered combat incidents accounted for sixteen VC killed and three captured at the expense of three VM Harines killed and another twenty wounded.

On 7 April Brigade B, including Brigade Headquarters, the Fourth and Sixth Infantry Battalions, and Battery B of the VEU Artillery Eattalion, commenced riverine/reconnaissance in force operations entitled SILVER MAGE II in Nam Can and Dan Doi Districts of An Engen Province within the control of the 21st ARVN Division. While utilizing the U.S. RAC's and PCF's and VN RAG boats for transportation on the Cua Lon and Bo De Rivers, the Marines Sought out the energy throughout the tactical area. Upon conclusion of the operation on 18 April, the Marines accounted for eighteen VC killed and twelve confirmed VC and 19 suspected VC taken into cuntody. A large number of bunkers, structures, and suppars were destroyed and several amunition cashes were uncovered, confiscated or destroyed. Marine casualties were three killed and twenty-six wounded.

Enclosure (7)

COUPIDENTIAL

UNCLASSIELED

The Brigade stood down until 24 April when they noved into Kien Hung District of Chuong Thien Province for more riverine and recommissance in force operations. Activity for the remainder of the month was negligible to light.

The First Infantry Battalion relieved the Fourth Battalion on 12 April and remained with Brigade B through 30 April. The Fourth Battalion returned to its base camp at Vung Tax. On 23 April operational control changed to the Joint General Staff and the Fourth Mattalion moved to Thu Duo to act as a reserve unit and to conduct refresher training for the rest of the month.

The Second Infantry Battalion continued company size reconnaiseance operations for the 18th ARVE Division near Long Thanh (IS 140920) in Bien Hos Province with negligible results. The battalion was put under the control of the Long Bien Special Zone and helolifted into a new operational area north of the Dang Nai River on 18 and 19 April. With artillery support from battery D the marines carried out recommaissance in force operations in the area for the rest of the month yielding negative contact. The VC had definitely b en in the area as energy mines killed two marines and wounded another twenty-six.

Security and reconnaissance missions were performed by the Fifth Battalion for the ANV: Airborn Division just north of Saigon with negative results for the entire month.

Battery C stood down at Thu Due the first half of the month. On 15 April the artillery units moved into two fire support bases under the

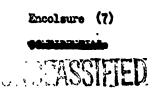

Enclosure (7)

PSYCHOLOGICAL AND CIVIC ACTION SUMMARY April 1969

The U. S. and Vietnamese Navy accounted for 25 Hoi Chanhs in April. Four of these, including one NVA regular, rallied to GIANT SLINGSHOT forces. SEA LORDS operations in the Ca Mau Peninsula area were given partial credit for the increase in rallies to the Nam Can district capital from seven in March to 13 in April.

Interrogation of Hoi Chanhs and POW indicated that almost all of them had been exposed to U. S. or government PsyOps programs. Fear, hunger, personal hardships, and disillusionment with the enemy cause were common reasons for rallying to the government cause.

Sniper attacks on the PsyOps and Medcap teams and the Viet Congs' own Chieu program are indicative of the devastating effect that PsyOps is having on the enemy's effort. The Viet Cong have published a Chieu Hoi leaflet and have gone so far as to accept Hoi Chanhs back into their ranks if they renounce their mistakes.

Both PsyOps and Medcap operations were well received in April. The Navy Medcap program alone Treated approximately 25,000 Vietnamese. The Vietnamese always gathered in large crowds to hear the loudspeaker broadcasts and to receive the wide variety of PsyOps material including food, newspapers, magazines, Chieu Hoi leaflets, soaps and cooking oils.

The Naval Support Activity at Danang reported that there were 174 self-help projects underway and that significant progress had been made

> Enclosure (9) UNCLASSIFIED

UNCLA SSIFLED

on two special projects, the removation of the Chan Museum and a general grounds improvement of the ARVN amputes hospital. The Javal Support Activity detachment at Tam My reported the commencement of construction on two school classrooms.

Seabee teams continued their active participation in Civic Action and MEDCAP programs. Seabee corpanen examined and treated some 12,400 patients. throughout South Vistnam. Seabee Team 0604 completed one Vistnamese high school and one Vistnameze elementary school in Long An Province in April. An open air market was built by Seabee Team 0810 in Phong Dinh Province and Seabee Team 0913 finished work on the Xom Bo Accelerated Pacification Project that included work on roads, the public markets, a health station, and some rice drying courts.
