100 COMPANIES AND AFFILIATES LISTED ACCORDING TO
NET VALUE OF MILITARY PRIME CONTRACT AWARDS

1 July 1957 - 30 June 1958^{FY-}

Net awards to the 100 companies and their 130 affiliates which received the largest volume of military prime contract awards during Fiscal Year 1958 (1 July 1957 to 30 June 1958) amounted to 74.2% of the U. S. total. This ratio compares with 68.4% received by the top 100 companies and 153 affiliates in Fiscal Year 1957.

The amount of awards to these companies reflects a 25% increase in the proportion of defense contracts awarded for aircraft and guided missiles. In Fiscal Year 1958 procurement of aircraft and missiles accounted for 50% of all military prime contract awards of \$10,000 or more, compared to 39% in Fiscal Year 1957.

The increase in the percent of total awarded to the first two companies on the list, Boeing Airplane Co. and General Dynamics Corporation, was as large as the net increase in the entire list of 100. Contracts with Boeing increased from \$907 million in Fiscal Year 1957 to \$2,131 million in Fiscal Year 1958. Practically all of the Boeing awards were in the programs for B-52 bombers, KC-135 jet tankers, and the Bomarc missile. Most of the General Dynamics awards, which increased from \$1,018 million to \$1,383 million, were for work of the Convair Division on the Atlas Missile program, certain Navy missiles, the F-102 and F-106 fighter aircraft, and the B-58 bomber, with smaller amounts going to Electric Boat and other divisions for submarines and other products. The percent of total awarded to these two companies increased from 10.2% in Fiscal Year 1957 to 16.2% in Fiscal Year 1958.

There were many upward and downward shifts in awards to other companies, and 20 companies on the Fiscal Year 1957 list are not among the top 100 in Fiscal Year 1958. Douglas Aircraft obtained 1.1% more of the U. S. total than in Fiscal Year 1957 and General Electric obtained 1.0% less. No other shifts in awards to listed companies involved more than 7/10 of 1% of the total.

Twenty-four of the top 25 companies are engaged mainly in the missile and aircraft programs. Their awards amounted to 56% of the value of all defense contracts of \$10,000 or more. Aircraft and missile production is the major part of the military business of more than half of the 100 companies on the list, and most of the others appear on the list because of their contracts in related programs, such as electronics, fuels and propellants, and the construction of airfields, missile bases and warning systems. Many of these companies have committed all or the principal part of their plants and facilities, located in many communities throughout the country, to these programs of production for modern defense.

A very substantial portion of the prime contract awards to these large manufacturers is subcontracted out to other concerns for components, parts and services. The prime contractors on this list who participate in the Department of Defense Small Business Subcontracting Program account for 90% of the total awards to the top 100 companies. Reports received from these companies show that in Fiscal Year 1958 54% of their military receipts were subcontracted out, and that more than one-third of the subcontracted amounts went to small business firms. Thus less than half of the prime contract funds were retained by these manufacturers for work in their own plants.

The list of 100 for Fiscal Year 1958 is shown in Table 1 attached, and the list for Fiscal Year 1957 is shown in Table 2.

FOOTNOTES:

a/ New value of new procurement actions minus cancellations, terminations and other credit transactions. The data include debit and credit procurement actions of \$10,000 or more, under military supply, service and construction contracts for work in the U. S., plus awards to listed companies and other identifiable U.S. companies for work overseas.

Procurement actions include definitive contracts, the obligated portions of letters of intent and letter contracts, purchase orders, job orders, task orders, delivery orders, and any other orders against existing contracts, and debit and credit actions that amend, cancel or terminate contracts. The data do not include that part of open-end or indefinite quantity contracts that have not been translated into specific orders on business firms. The data do not include purchase commitments or pending cancellations that have not yet become mutually binding agreements between the government and the company.

b/ The assignment of subsidiaries to parent companies is based on stock ownership of 50% or more by the parent company, as indicated by data published in standard industrial reference sources. The company totals do not include contracts made by other U.S. Government agencies and financed with Defense Department funds, or contracts awarded in foreign nations through their respective governments. The company names and corporate structures are those in effect as of 30 June 1958. Only those subsidiaries are shown for which procurement actions have been reported.

c/ Less than \$50,000.

d/ Less than 0.05%.

e/ Stock ownership is equally divided between General Motors Corp. and Standard Oil Co. of New Jersey; half of the total military awards is shown under each of the parent companies.

f/ Stock ownership is equally divided between Standard Oil Co. of New Jersey and Socony Mobil Oil Co.; half of the total of military awards is shown under each of the parent companies.
