THE COST AND GEOGRAPHIC DISTRIBUTION
OF SELECTED CHAMPUS CARDIOVASCULAR SURGICAL CARE
IN DOD REGION 7

A PATIENT TREATMENT EPISODE ANALYSIS

SUMMARY

Introduction: This report presents a detailed analysis of selected CHAMPUS cardiovascular surgery care in Department of Defense (DoD) Region 7 paid for during FY 1990-1991. The five states specifically analyzed in Region 7 include Mississippi, Alabama, Florida, Georgia, and Tennessee. This analysis was requested by Keesler USAF Medical Center, MS and USAF Air Training Command, Randolph AFB, TX to assist in determining the potential return on investment if Keesler Medical Center was approved as a Specialized Treatment Center (STF) in cardiovascular surgery care in DoD Region 7. All beneficiaries regardless of billable branch of service were included in the analysis. The episode cost of cardiovascular surgery care was examined by both diagnosis group and patient zip code. Cardiovascular care was analyzed utilizing a patient treatment episode approach which specifically analyzed not only the sum of institutional and professional services costs during the actual surgical hospitalization, but also both preoperative and post-operative ambulatory professional services performed as part of the overall treatment episode.

Selection of the specific cardiovascular care was based on selection criteria supplied by Keesler USAF Medical Center. Due to this selection criteria it should be emphasized that the cost per case enumerated in this report is not necessarily the total cost of care, but rather that portion of that care which can be reliably determined to be a direct part of the cardiovascular surgery treatment process. In initially deriving the inpatient treatment episodes the following specific selection criteria were employed. Patients were identified who had any of the following surgical procedures during FY 1990-1991:

- a. ICD-9-CM: 3500-3999, 8850-8857
- b. The following exclusions were employed:
3541, 3542, 3552, 3553, 3554, 3563, 3580-3599, 3727, 3734,
3750, 3764, 3797, 3798, 3799, 3800, 3801, 3822, 3840, 3841,
3892, 3900, 3910, 3921, 3923, 3928, 3951, 3952, 3955, 3959,
3965, 3997, 3966, 3999, 8851, 8852
- c. CPT-4: 33010-35910
- d. The following exclusions were employed:
33250, 33251, 33260, 33261, 33471, 33472, 33474, 33476,
33478, 33520, 33525, 33528, 33649, 33660, 33656, 33670,
33684, 33688, 33690, 33692, 33694, 33696, 33730-33814,
33840-33855, 33930-33945, 34001

The above procedure exclusions were specified by Keesler medical staff and reflected the capacity of Keesler Medical Center to perform these surgical procedures. Following extraction of data

from FY 1990-1991, patient episodes were derived and summarized. To estimate the cost of care only associated with the cardiovascular surgery episode, in addition to the surgical codes already discussed above, the following criteria were used to extract professional services to build the inpatient treatment episodes:

- a. Medicine: 92950-93650,90000-90080,90600-90654
- b. Anesthesia: 00100-01999
- c. Radiology: 75500-75552,75750-75767,78414-78489 (excluding 78415,78435-78479)

To build the preoperative ambulatory cardiovascular professional services episodes specific selection criteria were utilized. Any preoperative visits to a cardiologist or cardiovascular surgeon during the two months prior to the cardiovascular surgery, or any preoperative services rendered in the following codes: 78460-78465,78472-78479,93015-93018,93305-93350,93501-93562, during the same time frame were extracted. Post-operatively any visits to a cardiologist or cardiovascular surgeon during the six months following cardiovascular surgery, or any services rendered in the same codes as listed for preoperative selection were also extracted. Professional services not meeting the specialty and/or procedure criteria listed above but within the time periods specified were defined as "other" professional services and included in the report for information purposes, but were not included when computing total treatment episode costs discussed below.

Results: The analysis of cardiovascular care is presented in Tables 1-5 and Appendix A. Table 1 (pp. 1-1 to 1-3) presents a summary of the selected cardiovascular care by Region 7 sub-state two digit zipcode group. For each zipcode group the following data are presented:

- a. Number of hospital episodes, days and the computed length of stay (LOS).

- b. The total treatment episode cost to the government and the total government pay per treatment episode. Total treatment episode includes the total of government payments for inpatient institutional and professional services, as well as ambulatory cardiovascular services within the criteria specified above.

- c. The sources of payments for actual hospitalization include payments made by the government, patient and other sources, such as other third-party payers.

- d. Inpatient professional services include the number of services, total government pay, government pay per service, and payments made by the patient and other sources.

- e. Ambulatory episode services data include the ambulatory professional services performed meeting the criteria specified above. Workload is separated into whether the care performed was cardiovascular or other professional workload. For both cardio-

vascular and other ambulatory professional services, data include the number of services, payments by government, patient and other sources, as well as the government pay per service.

In Table 2 (pp. 2-1 to 2-27), the same Region 7 cardiovascular treatment episode costs and workload are presented by ICD-9-CM diagnosis group. Three digit diagnosis groups were used to limit table output and were considered sufficiently specific for planning purposes. In addition to the data described above for Table 1, ICD-9-CM group code and name are also presented. Diagnosis groups are sorted by descending total treatment episode government pay. In Appendix A (pp. A-1 to A-101) cardiovascular surgery care is summarized by both patient zipcode group as well as ICD-9-CM diagnosis group.

In Tables 3 and 4 (pp. 3-1 to 3-19, 4-1 to 4-18), the professional services are itemized in detail. Professional services are presented separately for two categories of workload. Table 3 presents professional services performed during the actual hospital stay, and Table 4 presents professional services performed within two months prior to hospitalization to six months following hospitalization. Within each code both the total number of services as well as the number of visits (if any) are presented. Also presented are the government, patient, and other source payments as well as the computed government per service cost. Each category of professional services are presented by CPT-4 code and sorted by descending professional services government pay.

Date of care was used to determine whether a professional service was part of the hospitalization or within the expanded window of two months preoperative and six months post-operative. To guarantee that the total cost of care would be as complete as possible for the period of analysis (FY 1990-1991), it is possible that incomplete institutional data particularly at the beginning or end of the period of analysis may be present in the report. In addition, it is possible that a patient/professional services provider may submit a cardiovascular professional services claim with no institutional charges ever made. This situation may occur for a patient with extensive other insurance which would pay the entire institutional charge making it unnecessary to even file a claim through OCHAMPUS. Due to the presence of this incomplete/missing institutional data a few professional services were not classified as hospital professional services when it is obvious that these services would only be done on an inpatient basis. Although this misclassification was unavoidable it exerted only a minor effect on the overall analysis. These services are listed in Table 5 (pp. 5-1 to 5-2).

Summary of results. During FY 1990-1991 there were 6,717 hospital episodes generating 54,977 hospital days. The total treatment episode government pay totaled \$58.4 million (M). The source of payments for the hospitalizations (including professional services) were government: \$42.9M, patient: \$15.2M and other sources: \$9.7M, while for hospital professional services

the source of payments included government: \$14.7M, patient: \$4.2M and other sources: \$2.1M. Cardiovascular ambulatory service payments within the expanded window discussed above totaled \$812.2 thousand (K) by the government, patient: \$236.3K and other sources: \$200.3. Other ambulatory services payment by the government, patient and other sources totaled \$990.2K, \$313.6K and \$288.0K respectively. Diagnostically, the cardiovascular workload within this region was diverse covering over 290 ICD-9-CM groups (Table 2). The most costly diagnostic condition was chronic or acute ischemic heart disease which accounted for over 33% of all total treatment episode government payments. Professional services procedures performed, both while the patient was hospitalized as well as preoperative and post-operative on an ambulatory basis also demonstrated marked diversity (Tables 3, 4). Coronary artery dilation, angiography, and bypass together constituted over 38% of government payments for professional services rendered to hospitalized patients (Table 3). The most commonly rendered services to patients outside the hospitalization for both cardiovascular as well as other care were various office visits (Table 4). The cardiovascular stress test demonstrated the highest total payment of any code within the expanded window cardiovascular procedure category (\$98,648). Table 5 (pp. 5-1 to 5-2) presents those hospital services which were classified as either cardiovascular or other ambulatory services within the expanded window. There were 265 services totaling \$218.6K in government pay.

MEMORANDUM FOR Defense Technical Information Center, ATTN: DTIC-
OCC, Catalog Branch, Building 5, Cameron Station,
Alexandria, VA 22304-6145

SUBJECT: Release of Limited Reports in DTIC

1. Enclosed is a list of reports submitted by Health Care Studies and Clinical Investigation. At the time of submission we requested these documents be limited to DOD agencies only. This limitation no longer applies. Please remove the limitation on all the listed reports (enclosed). These reports should now be "Unlimited, Available for Public Use."
2. By lifting the limitation on this reports, will they now be provided to National Technical Information Service? This agency would like these documents placed with NTIS for a wider audience.
3. Point of contact is Beverly Rakowitz DSN 471-0047/9610 or commercial 210-221-0047/9610. Mailing address is Directorate of Health Care Studies and Analyses, Cdr, AMEDDC&S, ATTN: HSHN-R, 1608 Stanley Road, Fort Sam Houston, TX 78234-6125.
