References marked with an asterisk (*) are those which are available for loan in the Fort Detrick Technical Library. This bibliography is being kept up to date by a file of current references which is available in the Library.

This bibliography contains journal references covering the years 1940 to October 1957. A few earlier references will be noted from time to time. Main sources of references were: Biological Abstracts; Bulletin of Hygiene; Current List of Medical Literature; Excerpta Medica (Sections IV, V, VI); Index Catalogue of the Surgeon-General's Office; Quarterly Cumulative Index Medicus; Veterinary Bulletin; and Zentralblatt fuer Bakteriologie, Parasitenkunde, Infektionskrankheiten und Hygiene, Abt. I., Referate.

References listed in this bibliography have been located through the bibliographic tools available in this library; it is not claimed to be a complete bibliography on the subject.

When abstracts were located they have been cited. It is hoped that there are no serious errors either in classification or by way of omissions.
