EUROPEAN, AND CHINESE LITERATURE IN MEDICAL
ENTOMOLOGY

SUPPLEMENT V

CONTROL MEASURES FOR ARTHROPODS OF MEDICAL IMPORTANCE

This investigation was supported by the U. S. Army Medical
Research and Development Command, Department of the Army,
under Research Contract No. DA-49-193-MD-2238.

1968

INTRODUCTION

This volume represents the fifth of the supplements to the Index Catalogue to Russian, Central and Eastern European, and Chinese Literature in Medical Entomology, which consisted of the following eleven volumes: Vol. 1, Diptera; Vol. 2, Ticks; Vol. 3, Fleas; Vol. 4, Mites; Vol. 5, Miscellaneous Arthropods; Vol. 6, Bacterial and Spirochaetal Diseases; Vol. 7, Protozoan Diseases; Vol. 8, Rickettsial Diseases; Vol. 9, Viral Diseases; Vol. 10, Miscellaneous Arthropod-Borne and Arthropod-Associated Diseases; and Vol. 11, Control Measures for Arthropods of Medical Importance. The eleven volumes of the Index Catalogue were comprised of the backlog of references on hand up to the time of publication, while the supplements contain those references which have become available since publication of the original volumes. The previously published supplements are as follows: Supplement 1, Diptera; Supplement 2, Ticks; Supplement 3, Fleas, Mites and Miscellaneous Arthropods; and Supplement 4, Arthropod-Borne and Arthropod-Associated Diseases.

No claim is made for completeness in this volume or in the succeeding volumes, although an effort has been made to locate as many references as possible. Notice of errors or omissions will be received gratefully. A number of references on control measures for arthropods of veterinary importance have been included in this supplement, particularly those relating to diseases of domestic animals living in close association with man.

This work has been prepared in the Department of Zoology with the cooperation and interest of the following individuals to whom special acknowledgement is due: Vivian N. Andrews, Allie Mae Brown, Marie P. Daston, Virginia D. Kates, Steven E. Lockard, Margaret B. Mace, Victor Montviloff, Anita M. Schindler, and Robert Richard Thacker.

George Anastos
Professor and Head
