Common Acronyms and Abbreviations for MDAP Programs

Acq O&M - Acquisition-Related Operations and Maintenance

ACAT - Acquisition Category

ADM - Acquisition Decision Memorandum

APB - Acquisition Program Baseline

APPN - Appropriation

APUC - Average Procurement Unit Cost

\$B - Billions of Dollars

BA - Budget Authority/Budget Activity

Blk - Block

BY - Base Year

CAPE - Cost Assessment and Program Evaluation

CARD - Cost Analysis Requirements Description

CDD - Capability Development Document

CLIN - Contract Line Item Number

CPD - Capability Production Document

CY - Calendar Year

DAB - Defense Acquisition Board

DAE - Defense Acquisition Executive

DAMIR - Defense Acquisition Management Information Retrieval

DoD - Department of Defense

DSN - Defense Switched Network

EMD - Engineering and Manufacturing Development

EVM - Earned Value Management

FOC - Full Operational Capability

FMS - Foreign Military Sales

FRP - Full Rate Production

FY - Fiscal Year

FYDP - Future Years Defense Program

ICE - Independent Cost Estimate

IOC - Initial Operational Capability

Inc - Increment

JROC - Joint Requirements Oversight Council

\$K - Thousands of Dollars

KPP - Key Performance Parameter

LRIP - Low Rate Initial Production

\$M - Millions of Dollars

MDA - Milestone Decision Authority

MDAP - Major Defense Acquisition Program

MILCON - Military Construction

N/A - Not Applicable

O&M - Operations and Maintenance

ORD - Operational Requirements Document

OSD - Office of the Secretary of Defense

O&S - Operating and Support

PAUC - Program Acquisition Unit Cost

PB - President's Budget

PE - Program Element

PEO - Program Executive Officer

PM - Program Manager

POE - Program Office Estimate

RDT&E - Research, Development, Test, and Evaluation

SAR - Selected Acquisition Report

SCP - Service Cost Position

TBD - To Be Determined

TY - Then Year

UCR - Unit Cost Reporting

U.S. - United States

USD(AT&L) - Under Secretary of Defense (Acquisition, Technology and Logistics)

Defense Acquisition Executive (DAE) Approved Acquisition Program Baseline (APB) dated June 16, 2004

Mission and Description

Mission

The Cooperative Engagement Capability (CEC) increases overall Naval Air Defense capabilities by integrating sensors and weapon assets into a single, integrated, real-time network which expands the battlespace; enhances situational awareness; increases depth of fire and enables longer intercept ranges; and improves decision and reaction times.

Description

CEC is a real-time sensor netting system that enables high quality situational awareness and Integrated Fire Control (IFC) capability, which revolutionizes Naval Air Defense by providing improved accuracy, continuity, and identification consistency. This sensor netting system significantly improves Naval Carrier and Expeditionary Strike Group's Area Air Defense capabilities by extracting and distributing sensor-derived information such that the superset of this data is available to all participating CEC Cooperating Units (CUs). CEC fuses the distributed data from shipboard, airborne, Composite Tracking Network (CTN) ground mobile units, Joint Land Attack Cruise Missile Defense Elevated Netted Sensor System (JLENS), and select coalition partners into a single fire control quality air track picture. Radar measurement data from individual CUs within a CEC equipped force are transmitted to other CUs using the Line-Of-Sight Data Distribution System. A variety of automated network configurations are possible since CEC terminals provide highly directional, point-to-point data exchanges.

The CEC system distributes data between sensor and weapon assets to create a single, distributed, integrated air picture that supports and enables IFC. Individual sensors on all platforms in a CEC network are used in a cooperative manner as a distributed system to obtain track information to form a single, real-time composite track. This real-time composite tracking enables CEC to support Theater Air and Missile Defense allowing coordination of Naval and Joint sensor system assets among CEC-equipped ships, aircraft, and land platforms and joint operational access to engage cruise missiles that threaten joint forces in a denied access environment.

CEC consists of the following variants:

AN/USG-2: Shipboard designation of CEC deployed aboard the Aegis Guided Missile Cruisers (CG), Aegis Guided Missile Destroyers (DDG), Aircraft Carriers (CVN) and Amphibious Transport Dock (LPD)/Amphibious Assault (LHD) ships

AN/USG-3: Airborne designation of CEC deployed in E-2C and E-2D aircraft

AN/USG-4: United States Marine Corps (USMC) CTN platform

AN/USG-5: United States Army JLENS platform

AN/USG-6/7/8/10: FMS

AN/USG-9: CEC with USMC Common Aviation Command and Control System

Executive Summary

The CEC program achieved a Milestone III FRP decision in April 2002 for the AN/USG-2 shipboard variant and is continuing development efforts to keep pace with the security threats and ensure producibility. The program remains focused on ensuring compatibility, appropriate maintenance, and ultimate disposal.

The Assistant Secretary of the Navy (Research, Development and Acquisition) Memorandum for PEO for Integrated Warfare Systems, dated April 14, 2014, authorized FRP for the CEC AN/USG-3B (E-2D Airborne Variant) System in support of E-2D Advanced Hawkeye FRP.

The CEC program has developed a three phase approach to resolve interoperability issues.

- Phase 1 Near Term of the Track File Concurrence software updates to resolve software shortfalls discovered during Development Test (DT-IIID)/Operational Test (OT-IIIF) testing for the CEC AN/USG-3B (E-2D Airborne Variant) System were fielded in FY 2014.
- Phase 2 Accelerated Mid-Term Interoperability Improvement Project (AMIIP) (FY 2011 FY 2019) corrects interoperability, including Dual Tracks improvements, and is certified within Aegis, Ship Self Defense System, and E-2C Hawkeye 2000 combat systems. Fleet delivery of AMIIP to Aegis Cruisers and Destroyers is ongoing. E-2C fielding is complete. E-2D AMIIP development has started and delivery is planned in FY 2019. AMIIP design was included in Common Aviation Command and Control System (CAC2S) Phase 2 during the design phase. CAC2S Phase 2 is conducting DT now, with OT scheduled in second quarter FY 2016. DDG 1000 has not included the AMIIP features in their design and there is no plan to include AMIIP in DDG 1000.
- Phase 3 Far Term Interoperability Improvement Project (Far Term Host Combat System Design Changes) are in early planning stages and will be influenced by the results obtained from AMIIP. There is no funding allocated beyond FY 2016. However, Program Objective Memorandum (POM) issues were submitted in POM 16, POM 17 and POM 18 for the Far Term Interoperability Improvement Project efforts.

The RDT&E FY 2016 Congressional reduction will delay the development of the Common Array Block antenna that replaces Planar Array Antenna Assembly (PAAA) antennas. This reduction will cause a four-month delay in the delivery of the Common Array Block Functional Design Package for Aegis Flight III ships which will compromise the Flight III schedule. CEC will not be able to produce PAAA antennas beyond FY 2016 and an additional program cost of \$14M will be incurred in order to qualify a second vendor for PAAA antennas, if necessary.

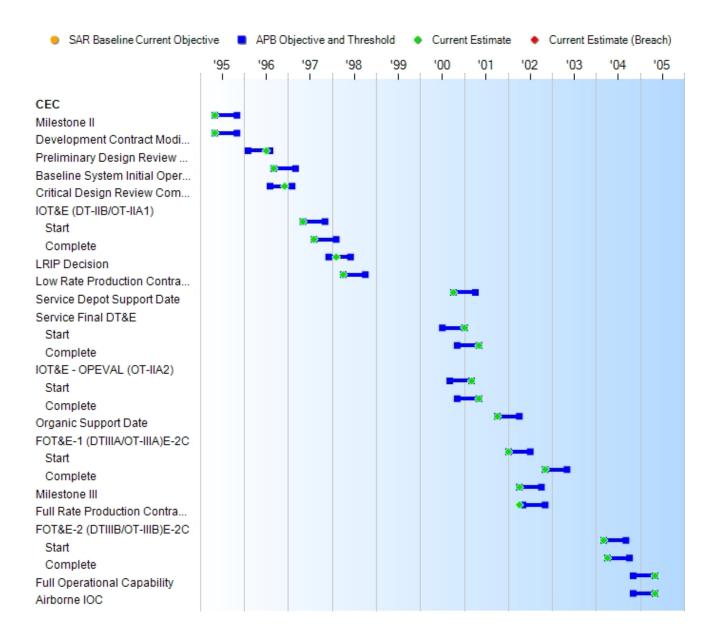

CEC continues to follow an evolutionary acquisition process, delivering capability in increments of hardware and/or software upgrades. This evolutionary approach acknowledges the need for future capability improvements to pace evolutionary trends.

There are no significant software-related issues with this program at this time.

Change Explanations

None

Notes

The AN/USG-2/2A legacy shipboard systems Demonstrated Performance changed from 0.91 to 0.89 due to an increase in MDT resulting from aging assemblies including the Antenna Environmental Control Units which are beyond their intended service life. AN/USG-2/2A re-utilization assets made available from AN/USG-2B back fits are being used to minimize MDT. The AN/USG-2/2A systems are being backfitted with the AN/USG-2B systems and will no longer be in use after CY 2020. The AN/USG-2B will start reporting sustainment metrics by mid FY 2016.

The following Demonstrated Performance for the AN/USG-3 and AN/USG-3B is provided since the Performance characteristics table above only identifies the AN/USG-2/2A Demonstrated Performance.

The AN/USG-3 Demonstrated Performance of 0.61 is due to extended MDT resulting directly from the Naval Sea Systems Command's lack of funding and Naval Supply Systems Command contracting issues with Raytheon, the Original Equipment Manufacturer, since the NAVSUP Performance Based Logistics contract expired in April 2012. The MDT is expected to decrease over time since NAVSUP signed a repair BOA on December 8, 2014 with Raytheon and NAVSEA has a repair BOA in place with Raytheon.

The AN/USG-3B Demonstrated Performance is 0.95. The AN/USG-3B is the latest airborne system. The AN/USG-3 legacy airborne system is being retired and will no longer be in use after CY 2023.

Acronyms and Abbreviations

BOA - Basic Order Agreement IER - Information Exchange Requirements

MDT - Mean Down Time NAVSUP - Naval Supply Systems Command

Low Rate Initial Production

Item	Initial LRIP Decision	Current Total LRIP
Approval Date	3/2/1998	10/31/2013
Approved Quantity	7	84
Reference	LRIP 1 ADM	LRIP 14 ADM
Start Year	1998	1998
End Year	1998	2013

The Current Total LRIP Quantity is more than 10% of the total production quantity due to the requirements (1) to meet ship installation schedules, (2) to outfit Land Based Test Sites in preparation for completion of Operational Testing (OT), and (3) to maintain the Minimum Sustaining Rate for production of CEC systems pending completion of OT and entry into FRP.

Foreign Military Sales

Classified FMS information is provided in the classified annex to this submission.

Contracts

Contract Identification

Contract Number:

Appropriation: Procurement

Contract Name: CEC Signal Data Processor-Sierra (SDP-S) Production

Sechan Electronics Inc. Contractor: **Contractor Location:** 525 Furnace Hills Pike Lititz, PA 17543-8902

N00024-12-D-5203/1 **Contract Type:** Indefinite Delivery Indefinite Quantity (IDIQ), Firm Fixed Price (FFP)

Award Date: December 20, 2011 **Definitization Date:** December 20, 2011

Contract Price							
Initial Contract Price (\$M) Current Contract Price (\$M) Estimated Price At					ice At Completion (\$M)		
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
13.8	N/A	84	64.2	N/A	244	64.2	64.2

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the award of Delivery Orders 0001, 0002, 0003, and 0004.

Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (IDIQ/FFP) contract.

Notes

This is a Delivery Order contract to procure SDP-S. Production units are FFP, the engineering support services are Cost Plus Fixed-Fee. This is an IDIQ contract, therefore, the estimated ceiling price at completion is not applicable.

Appropriation: RDT&E

Contract Name: Design Agent/Engineering Services (FY 2014 - FY 2018)

Contractor: Raytheon - Network Centric Systems

Contractor Location: 8333 Bryan Dairy Road

Largo, FL 33777-1444

Contract Number: N00024-13-C-5212/0

Contract Type: Cost Plus Fixed Fee (CPFF)

Award Date: September 27, 2013

Definitization Date: September 27, 2013

Contract Price								
Initial Contract Price (\$M) Current Contract Price (\$M)				Estimated Pr	ice At Completion (\$M)			
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager	
32.8	N/A	0	157.5	N/A	0	288.6	288.6	

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to exercising options for FY 2014, FY 2015, and FY 2016 Design Agent/Engineering Services (DA/ES) efforts.

Contract Variance								
Item	Cost Variance	Schedule Variance						
Cumulative Variances To Date (12/31/2015)	+96.7	0.0						
Previous Cumulative Variances	+77.0	-20.0						
Net Change	+19.7	+20.0						

Cost and Schedule Variance Explanations

The favorable net change in the cost variance is due to the Program Management and administrative support functions continuing to be shared resources across the entire DA/ES contract rather than solely being functions of the Design Agent effort.

The favorable net change in the schedule variance is due to the placement of the purchase order of the software license renewal previously delayed. This delay caused the unfavorable schedule variance in the previous SAR.

Notes

The FY 2014 - FY 2018 DA/ES contract was awarded September 27, 2013 and is the follow-on contract to the FY 2008 - FY 2013 DA/ES contract. The current end date including all option years is September 26, 2018.

This follow-on effort includes labor, facilities, engineering, and technical support services required for CEC System Design Agent Services, support equipment, and computer program installations as well as Engineering and Technical services in support of existing CEC assets, auxiliary equipment, and stand alone equipment.

Appropriation: Procurement

Contract Name: CEC Production (FY 2012 - FY 2016)
Contractor: Raytheon - Network Centric Systems

Contractor Location: 8333 Bryan Dairy Road

Largo, FL 33777-1444

Contract Number: N00024-12-C-5231/0
Contract Type: Firm Fixed Price (FFP)
Award Date: September 28, 2012

Definitization Date: May 01, 2013

Contract Price								
Initial Contract Price (\$M) Current Contract Price (\$M)					Estimated Pr	rice At Completion (\$M)		
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager	
20.3	N/A	0	131.6	N/A	28	267.1	267.1	

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to incorporating following year production efforts.

Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (FFP) contract.

Notes

FY 2012 - FY 2016 CEC production contract was awarded September 28, 2012 and is the follow-on contract to FY 2008-FY 2011 CEC production. This contract includes production requirements for CEC systems requirements for associated Installations and Checkout Kits and Planar Array Antenna Assemblies back-fit and other ancillary equipment are also included.

Appropriation: RDT&E

Contract Name: Common Array Block (CAB) Antenna Development and Production

Contractor: Raytheon

Contractor Location: 8333 Bryan Dairy Road

Largo, FL 33777-1444

Contract Number: N00024-13-C-5230/0

Contract Type: Cost Plus Incentive Fee (CPIF)

Award Date: September 27, 2013

Definitization Date: September 27, 2013

Contract Price							
Initial Contract Price (\$M) Current Contract Price (\$M)				(\$M)	Estimated Price At Completion (\$M)		
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
7.3	N/A	6	20.2	N/A	6	59.1	59.1

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to exercising Year 1 options.

Contract Variance								
Item	Cost Variance	Schedule Variance						
Cumulative Variances To Date (1/26/2016)	-1.0	-1.2						
Previous Cumulative Variances	+0.2	0.0						
Net Change	-1.2	-1.2						

Cost and Schedule Variance Explanations

The unfavorable net change in the cost variance is due to being behind plan performance on the Hardware and Firmware detail design and development for several efforts. Although the efforts are progressing they have proven to be more complex than planned resulting in negative cost and schedule trends. Labor usage is also a contributing factor to the negative cost trend.

The unfavorable cumulative schedule variance is due to being behind plan performance on the Hardware and Firmware design and development efforts. Labor usage is also a contributing factor to the negative schedule variance due to designs being more complex than originally planned in the Integrated Master Schedule Discussion Analysis, Data Item Description.

Notes

This contract is for development and production of the next generation CEC antenna.

Appropriation: Procurement

Contract Name: CEC Production (FY 2015- FY2021)

Contractor: DRS Laurel Technologies

Contractor Location: 246 Airport Rd

Johnstown, PA 15904-7224

Contract Number: N00024-15-C-5228/0
Contract Type: Firm Fixed Price (FFP)
Award Date: February 25, 2015
Definitization Date: February 25, 2015

Contract Price							
Initial Contract Price (\$M) Current Contract Price (\$M)				(\$M)	Estimated Price At Completion (\$M)		
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
2.0	N/A	2	13.9	N/A	8	227.0	227.0

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to increase of six CEC systems procured since initial contract.

Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (FFP) contract.

Notes

This is the first time this contract is being reported.

The FFP portion of this contract includes production and testing for AN/USG-2B, AN/USG-3B, AN/USG-4B CEC systems as well as AN/USG -2/2A to 2B backfit kits. The CPFF portion of the contract includes Engineering Services in support of the manufacture, assembly, and testing of the CEC production systems under the contract.

Deliveries and Expenditures

Deliveries								
Delivered to Date Planned to Date Actual to Date Total Quantity Percent								
Development	30	30	30	100.00%				
Production	162	151	253	59.68%				
Total Program Quantity Delivered	192	181	283	63.96%				

Expended and Appropriated (TY \$M)			
Total Acquisition Cost	5299.1	Years Appropriated	23
Expended to Date	4080.5	Percent Years Appropriated	69.70%
Percent Expended	77.00%	Appropriated to Date	4306.9
Total Funding Years	33	Percent Appropriated	81.28%

The above data is current as of February 09, 2016.

Operating and Support Cost

Cost Estimate Details

Date of Estimate: February 05, 2016

Source of Estimate: POE
Quantity to Sustain: 283
Unit of Measure: System
Service Life per Unit: 20.00 Years

Fiscal Years in Service: FY 1994 - FY 2046

The quantity to sustain changed from 264 to 283 due to the increase of 19 systems. The unit of measure is the AN/USG-2/2A/2B Shipboard variant and AN/USG-3/3B Airborne Variant.

The sustainment strategy costs includes: prime contractor and government in-service engineering support, continuing engineering support for Navy in-house facilities and software maintenance, depot repairs of CEC equipment, modification kit procurements and installations, and fleet recurring training.

Sustainment Strategy

Sustainment strategy efforts include: Maintenance and repair of CEC fielded systems (AN/USG-2, Land Based Test Sites, AN/USG-3), Integrated Logistics Support, Software Trouble Reports, Original Equipment Manufacturer Design Agent support, In-Service Engineering, Diminishing Manufacturing Supply Material Shortages, Obsolescence Management.

Antecedent Information

No Antecedent

Annual O&S Costs BY2002 \$K							
Cost Element	CEC Average Annual Cost Per System	No Antecedent (Antecedent) N/A					
Unit-Level Manpower	0.000	0.000					
Unit Operations	8.100	0.000					
Maintenance	111.200	0.000					
Sustaining Support	96.700	0.000					
Continuing System Improvements	175.600	0.000					
Indirect Support	0.000	0.000					
Other	0.000	0.000					
Total	391.600						

	Total O&S Cost \$M						
Item	CEC	No Antecedent					
	Current Production APB Objective/Threshold		Current Estimate	(Antecedent)			
Base Year	N/A	N/A	2189.3	N/A			
Then Year	N/A	N/A	3045.9	N/A			

Equation to Translate Annual Cost to Total Cost

An equation would not accurately depict the total cost since platform (Airborne/Shipboard) service is not always 20 years. The service life per platform (Airborne/Shipboard) varies anywhere from five years to 20 years.

O&S Cost Variance		
Category	BY 2002 \$M	Change Explanations
Prior SAR Total O&S Estimates - Dec 2014 SAR	1912.8	
Programmatic/Planning Factors	0.0	
Cost Estimating Methodology	276.5	A revised cost model was used to account for varying service-life years per system which reflects a more accurate O&S cost estimate. This is due to additional platforms with required maintenance. The quantity to sustained changed from 264 to 283 due to increased of 19 systems.
Cost Data Update	0.0	
Labor Rate	0.0	
Energy Rate	0.0	
Technical Input	0.0	
Other	0.0	
Total Changes	276.5	
Current Estimate	2189.3	

Disposal Estimate Details

Date of Estimate: February 05, 2016

Source of Estimate: POE

Disposal/Demilitarization Total Cost (BY 2002 \$M): Total costs for disposal of all System are 28.1

Disposal costs are based on an estimated 20-year service-life and not included in the unitized cost.
