PREFACE

The Census of U.S. Civil Aircraft contains an annual count of all registered civil aircraft in the United States. This information is disseminated by the Federal Aviation Administration to serve as an up-to-date reference on the U.S. civil aircraft fleet, its size and composition. Historical series are presented to enable industry and other aviation groups to evaluate aviation progress, determine past trends, and estimate future trends. This publication contains data for calendar year 1975.

The data comprising this report were compiled from official aircraft registration and airman certification records maintained by the Data Services Division, FAA Aeronautical Center and from official airport records maintained by the System Planning Division, Airports Service.

The Census of U.S. Civil Aircraft is prepared by the Information Operations Branch, information and Statistics Division, Office of Management Systems by Betty V. Cayce. Suggestions and comments on the scope and content of this report are requested and will be given careful consideration in planning future editions.

(For regional boundaries of above listed regions, see MIM Chart 11.08).

I. METHODOLOGY

U.S. registered aircraft include aircraft of the U.S. air carriers and those in general aviation. This report will present tables on both groups separately, and combined when necessary.

Understanding the methodology of the collection of this data in use since 1970 is important to the user; therefore, a resume of this process will be presented here. Of special importance is the method used to estimate flight hours for the general aviation fleet.

Source of data. In January of each year, owners of all aircraft registered as of December 31 of the prior year receive an Aircraft Registration Eligibility, Identification, and Activity Report, AC Form 8050-73 (see Appendix). In Part 1, mandatory under Federal Air Regulation (FAR) 47.44, the owner is required to verify or cancel the registration of the aircraft. If the owner does not submit the form, the aircraft registration is revoked, and it is then illegal to fly that aircraft. The aircraft is excluded from the official count of the following year. In Part 2 of the form, general aviation aircraft owners are requested to supply various information, including the number of flight hours in each of several use categories for the prior year.

Part 1 is used to verify the aircraft registration for the year in which the form is mailed. Part 2 is used to collect activity data for the year prior to which the form is mailed.

Classification of aircraft fleet. Aircraft are classified into two major categories based on the number of flight hours either reported or estimated.

1. *Active* – All legally registered civil aircraft for which one or more flight hours are reported.

2. *Inactive* – All legally registered civil aircraft for which zero flight hours are reported.

Flight hours for nonrespondents. Flight hours are estimated and assigned to nonrespondents if there is no reported activity data for an aircraft. The situation occurs when the owner does not complete Part 2 of the registration verification form, or when the owner has not returned the form before the activity statistics are compiled.

1. Each aircraft, reported or not reported, is assigned a random number.

2. All aircraft are then grouped by manufacturer, model, and series.

3. Aircraft within the groups are sequenced by the random number assigned in Step 1.

4. Aircraft in each group having no activity data are assigned the number of hours in the same use categories as the aircraft preceding it in the sequence.

5. The aircraft for which activity data were assigned are identified as "imputes".

In this way, an aircraft may be classified as active with a positive number of flight hours assigned to it or as inactive with zero hours assigned.

The methodology implies that the nonresponding owners use their aircraft in exactly the same pattern as owners who do respond; that is, the aircraft are flown approximately the same number of hours and in the same use categories.

Geographical location of aircraft. The region, state, and county of an aircraft is dependent upon the location of the airport at which the aircraft is based. However, if an owner completes Part 2 of the registration form by entering "None" or "Not based at an Airport", the aircraft is assigned to the state and county of the owner's address.

If the base airport is unknown because the owner did not respond to Part 2 or did not return the form before the activity statistics are compiled, a base airport is assigned to the aircraft.

1. All aircraft are sequenced according to the region, state, county and zip code of the owner's address.

2. Aircraft that have an unknown base airport are assigned to the same base airport as the aircraft preceding it in the sequence. Please note that this procedure allows a base airport of "None" to be assigned.

This method implies that aircraft owners base their aircraft at the same airport used by their neighbors. The procedure is designed so that the aircraft may not be assigned to an airport outside the owner's region; and so that the base airport of an owner in one state may not be used to assign base airport for an owner living in another state.

Base airport for aircarrier aircraft has no meaning. Therefore, these aircraft are excluded from all geographical tables.

II. U.S. REGISTERED CIVIL AIRCRAFT

TABLE 1 – U.S. REGISTERED CIVIL AIRCRAFT: DECEMBER 31, 1974-75

Type of Aircraft	Total	
	1975	1974
Total	**196,342**	**188,008**
Fixed-wing	186,788	179,423

IV. GENERAL AVIATION AIRCRAFT

Estimate of general aviation aircraft for 1975 shows a total of 193.7 thousand as compared to 185.3 thousand in 1974; of the 193.7 thousand, 168.5 thousand were counted as active aircraft (see Methodology). Estimated hours flown in 1975 totaled 34.2 million and 32.5 in 1974.

Total estimated data for general aviation consists of reported data obtained from AC Form 8050-73, and estimates by FAA for nonrespondents. It must be emphasized that these measures of general aviation activity are estimated. The accuracy of these estimates are dependent upon (1) the quality and quantity of the activity data reported by aircraft owners, and (2) the validity of the assumption regarding the usage patterns of the non-respondent owners.

TABLE 17 – ESTIMATED GENERAL AVIATION AIRCRAFT ACTIVITY: CALENDAR YEARS 1972 THROUGH 1975

Item	Number of Aircraft			Total Hours Flown (Million Hours)
	Total (000)	Active (000)	Inactive (000)	
Reported Data[1]				
1972	120.7	103.6	17.1	19.6
1973	132.2	114.0	18.2	22.6
1974	134.8	116.8	18.0	24.1
1975	138.6	120.6	18.0	25.2
Estimated for Nonrespondents[2]				
1972	47.4	41.4	6.0	7.4
1973	44.8	39.5	5.3	7.4
1974	50.4	44.6	5.8	8.3
1975	55.1	47.9	7.2	9.0
Total Estimate[3]				
1972	168.1	145.0	23.1	27.0
1973	177.0	153.5	23.5	30.0
1974	185.3	161.5	23.8	32.5
1975	193.7	168.5	25.2	34.2

1/From AC Form 8050-73.

2/Estimated by FAA.

3/The sum of reported data and data estimated for nonrespondents.

END OF LISTING

U.S. REGISTERED CIVIL AIRCRAFT BY MANUFACTURER AND MODEL, NUMBER OF SEATS, AND POWER PLANT

December 31, 1975

LEGEND

Tables 23-28

The codes used in machine processing to indicate the six basic types of aircraft have been retained in this report. Codes and interpretations are shown below.

Basic aircraft type (first position):

Glider	1
Balloon	2
Dirigible	3
Single-engine fixed-wing	4
Multiengine fixed-wing	5
Rotorcraft	6

Type powerplant

Piston	1
Turboprop	2
Turboshaft	3
Turbojet	4
Turbine air-generator	5
Ramjet	6

Examples: 51 – fixed-wing multiengine, piston-powered airplane

54 – fixed-wing multiengine, turbojet airplane

52 – fixed-wing multiengine, turboprop airplane

The three items reported in the "Powerplant" column are: (1) the make of the engine, (2) the number of engines, and (3) the power range.

END OF LISTING

GLOSSARY

AERIAL APPLICATION – Aerial application in agriculture consists of those activities that involve the discharge of materials from aircraft in flight and a miscellaneous collection of minor activities that do not require the distribution of any materials.

AIR CARRIER – The term "Air Carrier", as used in this report, refers to aircraft operators certificated by the Federal Aviation Administration for the transportation by air of persons, property, and mail.

AIR CARRIER OPERATIONS – Aircraft operating under certificates of public convenience and necessity, issued by the CAB, authorizing the performance of scheduled air transportation over specified routes and a limited amount of nonscheduled operations.

AIRCRAFT MANUFACTURERS – Establishments primarily engaged in manufacturing or assembling complete aircraft such as airplanes, gliders, dirigibles, and balloons, and which may also manufacture aircraft parts and auxiliary equipment.

AIR TAXI OPERATIONS – Air taxi operations and commuter air carrier operations (takeoffs and landings) carrying passengers, mail or cargo for revenue in accordance with FAR Part 135 or Part 121.

AMATEUR-BUILT AIRCRAFT – Aircraft built from purchased kits, drawings, etc., and aircraft individually designed and built.

BALLOON – A lighter-than-air aircraft that is not engine driven.

BUSINESS TRANSPORTATION – Any use of an aircraft not for compensation or hire by an individual for the purposes of transportation required by a business in which he is engaged.

CERTIFICATED PILOT – A person who holds a certificate issued by FAA, which qualifies him to operate aircraft within the limitations prescribed on the certificate.

CERTIFICATED ROUTE AIR CARRIER – An air carrier holding a Certificate of Public Convenience and Necessity issued by the CAB to conduct scheduled services over specified routes. Certain nonscheduled or charter operations may also be conducted by these carriers.

COMMERCIAL OPERATOR – One of a class of air carriers operating on a *private* for-hire basis, as distinguished from a public or common air carrier, holding a commercial operator certificate, issued by the Administrator of the Federal Aviation Administration (pursuant to Part 45 of the Civil Air Regulations) authorizing it to operate aircraft in air commerce for the transportation of goods or passengers for compensation or hire.

DIRIGIBLE – A lighter-than-air aircraft, engine propelled, with an inward metal frame which maintains its shape.

EXECUTIVE TRANSPORTATION – Any use of an aircraft by a corporation, company or other organization for the purposes of transporting its employees and/or property not for compensation or hire and employing professional pilots for the operation of the aircraft.

FAA – Federal Aviation Administration.

FIXED-WING AIRCRAFT – Aircraft having wings fixed to the airplane fuselage and outspread in flight, i.e., nonrotating wings.

GENERAL AVIATION AIRCRAFT – All civil aircraft except those classified as air carrier.

GENERAL AVIATION FLYING – All civil flying except that classified as air carrier.

HELICOPTER – See ROTORCRAFT.

HELICOPTER CARRIERS – Domestic certificated route air carriers employing helicopter aircraft for their primary operations.

HELIPORT – An area of land, water, or any structure approved by the Administrator for the landing and takeoff of helicopters.

HORSEPOWER – The measure of power for piston engines.

INDUSTRIAL/SPECIAL – Any use of an aircraft for specialized work allied with industrial activity; excluding transportation and aerial application. (Examples: pipe line patrol; survey; advertising; photography; helicopter hoist; etc.)

INSTRUCTIONAL FLYING – Any use of an aircraft for the purposes of formal instruction with the flight instructor aboard, or with the maneuvers on the particular flight(s) specified by the flight instructor.

PISTON-POWERED AIRCRAFT – An aircraft operated by engines in which pistons moving back and forth work upon a crank shaft or other device to create rotational movement.

PERSONAL AND PLEASURE FLYING – Any use of an aircraft for personal purposes not associated with business or profession, and not for hire. This includes maintenance of pilot proficiency.

REGISTERED AIRCRAFT – Aircraft registered with FAA.

ROTORCRAFT – A heavier-than-air aircraft that derives lift from one or more revolving "wings", or blades, engine-driven about an approximately vertical axis. A rotorcraft does not have conventional fixed wings, nor in any but some earlier models is it provided with a conventional propeller, forward thrust and lift being furnished by the rotor. The powered rotor blades also enable the machine to hover, and to land and take off vertically.

SCHEDULED AIR LINE – See CERTIFICATED ROUTE AIR CARRIER.

SCHEDULED OPERATION – Transport operations performed over an air carrier's certificated route, based on published flight schedules, including extra sections.

SUPPLEMENTAL AIR CARRIER – One of a class of air carriers now holding certificates of public convenience and necessity issued by the Civil Aeronautics Board, authorizing them to perform passenger and cargo charter services supplementing the scheduled service of the certificated route air carriers. Both international and domestic charter operations are for a temporary period. The authority of supplemental air carriers to engage in military charters is of an indefinite period. In addition, they can perform on an emergency basis, as may be authorized by the CAB, scheduled operations including the transportation of individually ticketed passengers and individually waybilled cargo.

TURBINE-POWERED AIRCRAFT – Includes aircraft with either turbojet, turbofan, turboprop, or turboshaft engines.

TURBOJET – Aircraft operated by jet engines incorporating a turbine-driven air compressor to take in and compress the air for the combustion of fuel, the gases of combustion (or the heated air) being used both to rotate the turbine and to create a thrust-producing jet.

TURBOPROP – Aircraft in which the main propulsive force is supplied by a gas turbine driven conventional propeller. Additional propulsive force may be supplied from the discharge turbine exhaust gas.

U.S. CIVIL AIRCRAFT FLEET – All aircraft under U.S. registry exclusive of the Military.

APPENDIX

Please read the instructions at the beginning of each part and on the reverse side before completing this form.

AC FORM 8050-73 (8-75) SUPERSEDES PREVIOUS EDITION (0052-00-549-3005)

After completion & signature, mail the original copy to: Department of Transportation, FAA Aircraft Registry, AAC-259, P. O. Box 26045, Oklahoma City, Okla. 73126

NOTE: Entries made on the original will appear on the second copy without using carbon paper. The second copy of this form should be retained by the aircraft owner as evidence of submission. Shaded areas are for FAA use only.

INSTRUCTIONS FOR COMPLETING AND SIGNING THE FORM ON THE REVERSE.

For your convenience this form has been preprinted with all available information in FAA records as of December 31. Where the preprinted information is correct, no entry is needed. Where the information is incorrect or out-of-date insert the correct information in the space provided. Where no information is preprinted please enter the information requested in the space provided.

Part 1. The purpose of Part 1 is to maintain the Civil Aircraft Registry. It is used to verify continued eligibility for aircraft registration. Refusal or failure to submit this part may be cause for suspension or revocation of the holder's Certificate of Aircraft Registration and loss of the aircraft registration number.

Part 2. The purpose of Part 2 is to gather general aviation aircraft fleet statistical information. It will be used to develop statistics for FAA publications and analytical studies. Individual aircraft information is available on magnetic tape at cost. There is no penalty for failure to complete this part of the form.

GUIDELINES FOR COMPLETING SIGNATURE BLOCKS 17 AND 18.

1. If this aircraft is still eligible for registration, and you wish to continue its registration, sign Block 18 and enter the date in Block 20. Follow the guidelines for signature below.
2. If the aircraft is now ineligible for registration in your name or you wish to cancel its registration for other reasons, complete and sign Block 17 and enter the date in Block 20, following the guidelines for signature below.

GUIDELINES FOR SIGNATURE

1. INDIVIDUAL OWNER. An individual owner whose name appears in Block 12 must sign his name.
2. PARTNERSHIP. Any general partner may sign for the partnership but must show his title "partner."
3. CORPORATIONS. Any corporate officer or person holding a managerial position with the corporation may sign for the corporation. He must also indicate the title of his office below his signature.
4. CO-OWNER. Unless cancellation of registration is requested, any co-owner may sign certifying citizenship and ownership for all co-owners. If cancellation is requested, the signature of each co-owner must appear on this form or on an attached sheet.
5. GOVERNMENT. Any authorized person may sign showing his title.

IMPORTANT NOTE – AIRWORTHINESS DIRECTIVES may not be received by the aircraft lessee/operator, unless blocks 57 through 61 are completed by the registered owner, as requested.

After you complete and sign the form send the original (first copy) to:

DEPARTMENT OF TRANSPORTATION
FAA AIRCRAFT REGISTRY AAC-259
P.O. BOX 26045
OKLAHOMA CITY, OKLAHOMA 73126

THIS IS AN ANNUAL REPORTING FORM ONLY AND IS NOT TO BE SUBMITTED WITH OTHER AIRCRAFT REGISTRATION DOCUMENTS OR MONEY.
