The materials have been selected from the holdings of the Morris Swett library on training and combat as applied to the mountain situation.		

391 320

FOREWORD

This bibliography presents books and periodical articles on the subject of mountain warfare. Because they are there, mountain combat has long been an important part of war, whether as the ultimate end or as a means to some further objective.

This number is arranged in two parts. Part One covers book-type coverage as distinct from periodicals. The latter section is divided in two parts. Section one covers the executionary, and section two the preparatory or training/learning phase. By no means is this number intended to indicate complete coverage on the subject. Inclusion of an item, or omission, does not imply USAFAS indorsement or sanction of the compiler's point-of-view nor does it guarantee accuracy of content. Comment and criticism concerning this list is solicited.
