SECURITY GLASHFICATION OF THIS PAGE(When Date Entered)

FOREWORD

The project, "Application of a System Approach to the Navy Medical Department Education and Training Programs," was initiated in May of 1969 as a realistic, comprehensive response to certain objectives set forth in ADO 43-03X, and to memoranda from both the Secretary of Defense and the Assistant Secretary of Defense, Manpower and Reserve Affairs. The Secretary's concern was stated in his memorandum of 29 June 1965, "Innovation in Defense Training and Education." More specific concerns were stated in the Assistant Secretary's memorandum of 14 June 1968, "Application of a System Approach in the Development and Management of Training Courses." In this he called for "vigorous and imaginative effort," and an approach "characterized by an organized training program with precise goals and defined operational interrelation among instructional system components." He also noted, "Job analyses with task descriptions expressed in behavioristic terms are basic and essential to the development of precise training goals and learning objectives."

The Project

System survey and analysis was conducted relative to all factors affecting education and training programs. Subsequently, a job-analysis sub-system was defined and developed incorporating a series of task inventories "...expressed in behavioristic terms..." These inventories enabled the gathering of job activity data from enlisted job incumbents, and data relating to task sharing and delegation from officers of the Medical, Nurse and Dental Corps. A data management sub-system was devised to process incumbent data, then carry out needed analyses. The development of initial competency curricula based upon job analysis was implemented to a level of methodology determination. These methods and curriculum materials constituted a third (instructional) sub-system.

Thus, as originally proposed, a system capability has been developed in fulfillment of expressed need. The system, however, remains untested and unevaluated. ADO 43-03X called for feasibility tests and cost-effectiveness determination. The project was designed to so comply. Test and evaluation through the process of implementation has not proved feasible in the Navy Medical Department within the duration of the project. As designed and developed the system does have "...precise goals and defined operational interrelation among instructional system components." The latter has been achieved in terms of a recommended career structure affording productive, rewarding manpower utilization which bridges manpower training and health care delivery functions.

Data Management Sub-System

Job analysis, involving the application of comprehensive task inventories to thousands of job incumbents, generates many millions of discrete bits of response data. They can be processed and manipulated only by high speed computer capability using rigorously designed specialty programs. In addition to numerical data base handling, there is the problem of rapidly and accurately manipulating a task statement data base exceeding ten thousand carefully phrased behavioral statements. Through the use of special programs, task inventories are prepared, printouts for special purposes are created following a job analysis application, access and retrieval of both data and tasks are efficiently and accurately carried out, and special data analyses conducted. The collective programs, techniques and procedures comprising this sub-system are referred to as the Navy Occupational Data Analysis Language (NODAL).

Job Analysis Sub-System

Some twenty task inventory booklets (and associated response booklets) were the instruments used to obtain job incumbent response data for more than fifty occupations. An inventory booklet contains instructions, formatted questions concerning respondent information ("bio-data"), response dimension definitions, and a list of tasks which may vary in number from a few hundred to more than a thousand per occupational field.

By applying NODAL and its associated indexing techniques, it is possible to assemble modified or completely different inventories than those used in this research. Present inventories were applied about three years ago. While they have been rendered in operational format, they should not be re-applied until their task content is updated.

Response booklets were designed in OPSCAN mode for ease of recording and processing responses.

Overall job analysis objectives and a plan of administration were established prior to inventory preparation, including the setting of provisional sample target sizes. Since overall data attrition was forecast to approximate twenty percent, final sample and sub-sample sizes were adjusted accordingly. Stratified random sampling techniques were used. Variables selected (such as rating, NEC, environment) determined stratifications, together with sub-population sizes. About fifteen percent of large sub-populations were sought while a majority or all members of small sub-populations were sought.

Administration procedures were established with great care for every step of the data collecting process, and were coordinated with sampling and data analysis plans. Once set, the procedures were formalized as a protocol and followed rigorously.

Instructional Sub-System

Partial "competency curricula" have been composed as an integral sub-system bridging what is required as performance on the job with what is, accordingly, necessary instruction in the training process. Further, curriculum materials were developed to meet essential requirements for implementing the system so that the system could be tested and evaluated for cost effectiveness. However, due to the fact that test and evaluation was not feasible in the Navy Medical Department within the duration of the project, it was not possible to complete the development of the system through the test and evaluation phase. The inability to complete this phase also interrupted the planned process for fully developing the curricula; therefore, instead of completed curricula ready for use in the system, the curricula were partially developed to establish the necessary sub-system methodology. The competency curricula are based on tasks currently performed by job incumbents in 1971. (The currency of a given curriculum depends upon periodic analysis of incumbents' jobs, and its quality control resides in the evaluation of the performance competency of the program's graduates.)

A competency curriculum provides a planned course of instruction or training program made up of sequenced competency units which are, in turn, comprised of sequenced modules. These modules, emphasizing performance objectives, are the foundation of the curriculum.

A complete module would be comprised of seven parts: a cluster of related tasks; a performance objective; a list of knowledges and skills implied by the objective; a list of instructional strategies for presenting the knowledges and skills to the learner; an inventory of training aids for supporting the instructional strategies; a list of examination modes; and a statement of the required training time. In this project, curriculum materials have been developed to various levels of adequacy, and usually comprise only the first three parts; the latter four need to be prepared by the user.

The performance objective, which is the most crucial part of the module, is the basis for determining curriculum content. It is composed of five essential elements: the stimulus which initiates the behavior; the behavior; the conditions under which the behavior takes place; the criteria for evaluating the behavior; and the consequence or results of the behavior. A sixth element, namely next action, is not essential; however, it is intended to provide linkage for the next behavior.

Knowledges and skills listed in the module are those needed by the learner for meeting the requirements of the performance objective.

Instructional strategies, training aids, examination modes and training time have been specified only for the Basic Hospital Corps Curriculum. The strategies, aids and modes were selected on the basis of those considered to be most supportive in presenting the knowledges and skills so as to provide optimum learning effectiveness and training efficiency. The strategies extend from the classroom lecture as traditionally presented by a teacher to the more sophisticated mediated program for selfinstruction. The training aids, like strategies, extend from the traditional references and handout material in the form of a student syllabus to mediated programs for self-instruction supported by anatomical models. Examination modes extend from the traditional paper and pencil tests to proficiency evaluation of program graduates on the job, commonly known as feedback. Feedback is essential for determining learning effectiveness and for quality control of a training program. The kind of instructional strategies, training aids and examination modes utilized for training are limited only by such factors as staff capability and training budget.

The training time specified in the Basic Hospital Corps Curriculum is estimated, based upon essential knowledge and skills and program sequence.

The competency curriculum module, when complete, provides all of the requirements for training a learner to perform the tasks set forth in the module. A module may be used independently or related modules may be re-sequenced into modified competency units to provide training for a specific job segment.

Since the curricula are based upon tasks performed by job incumbents in 1971, current analysis of jobs needs to be accomplished using task inventories that have been updated to reflect changes in performed tasks. Subsequent to job analysis, a revision of the curricula should be accomplished to reflect task changes. When the foregoing are accomplished, then faculty and other staff members may be indoctrinated to the competency curricula and to their relationship to the education and training system.

In addition to the primary use for the systematic training of job incumbents, these curricula may be used to plan for new training programs, develop new curricula, and revise existing curricula; develop or modify performance standards; develop or modify proficiency examinations; define billets; credentialize training programs; counsel on carcers; select students; and identify and select faculty.

The System

Three sub-systems, as described, comprise the proposed system for Education and Training Programs in The Navy Medical Department. This exploratory and advanced developmental research has established an overall methodology for improved education and training incorporating every possible means of providing bases for demonstrating feasibility and cost effectiveness. There remains only job analysis sub-system updating, instructional sub-system completion, and full system test and evaluation.

Acknowledgements

The authors wish to acknowledge the invaluable participation of the several thousands of Naval personnel who served as respondents in inventory application. The many military and civilian personnel who contributed to developmental efforts are cited by name in the Final Report.

The authors also wish to acknowledge former colleagues for singularly important contributions, namely, Elias H. Porter, Ph.D., Carole K. Kauffman, R.N., M.P.H., Mary Kay Munday, B.S.N., R.N., Gail Zarren, M.S.W., and Renee Schick, B.A.

Identity and acknowledgement of the project Advisory Group during the project's final year is recorded in the Final Report.

Lastly, the project could not have been commenced nor carried out without the vision, guidance and outstanding direction of Ouida C. Upchurch, Capt., NC, USN, Project Manager.

NAVY MEDICAL DEPARTMENT

TASK INVENTORY BOOKLET
PREVENTIVE MEDICINE

CONSTRAINTS AND ETHICAL USE

This task inventory was developed three years ago in a first-version key punch format for education and training research purposes.

The present "operational" format, using a mark-sense response booklet (Opscan), is recommended for future applications. The task and equipment statements comprising the bulk of the inventory are precisely the same (less duplicate entries) as in the original research tools but rearranged for Opscan mode. Biographical data questions have also been reformatted for Opscan (NEC codes should be updated).

The processing, administering and formatting of this inventory have thus been readied for operational application.

It is strongly recommended that this inventory be updated in its task and equipment statement sections before actual operational use. These reasons pertain:

- Changes in medical or related procedures or techniques
- Some tasks may violate current policy or be obsolete
- *Equipment changes may have occurred
- The objective of task comprehensiveness may change
- •Objectives may shift to embrace manpower utilization as well as education and training

In the latter regard, the present operational format includes a "time to perform" dimension (as well as frequency of performance and two additional optional blank response dimension fields). As a response dimension, "time to perform" has been validated within the context of inventories for professional personnel where the objectives embraced utilization (i.e., time associated with shared and delegable tasks). The original Enlisted inventory content was directed to education and training factors only. If "time to perform" is to be used operationally, each task and equipment statement should be examined by expert job incumbents to remove possible overlaps which could confound "time to perform" data. This review process would also serve other purposes cited above.

A general precaution is in order.

When task analysis inventories are poorly prepared, loosely administered, administered according to less than rigorous sampling, or are handled casually in processing or interpretation, they will inevitably produce poor or questionable data, at best. At worst, such practices will result in loss of money and time, and produce dangerous data. Inventories should be prepared, applied, processed and interpreted only by knowledgeable professional and technical personnel. As in the cases of ethically controlled behavior tests, inventories should not be casually copied or distributed, and should remain under the control of authorized, trained personnel. Factors effecting reliability and validity should be fully appreciated.

GENERAL INSTRUCTIONS

There are two parts to be completed for this survey:

Part I Career Background Information (answers to be recorded in this TASK BOOKLET)

Part II A List of Tasks (answers to be recorded on the accompanying RESPONSE BOOKLET)

B List of Instruments and Equipment (answers to be recorded on the accompanying RESPONSE BOOKLET)

Each part is preceded by a set of instructions. Be sure to read them carefully before you start answering each part. All instructions are found on the tinted pages.

PLEASE USE ONLY NUMBER 2 LEAD PENCILS. ERASE ALL CHANGES CAREFULLY AND COMPLETELY. DO NOT PUT ANY MARKS OTHER THAN YOUR ANSWERS ON EACH RESPONSE PAGE.

DO NOT FOLD, WRINKLE, CREASE OR DETACH PAGES FROM EITHER TASK BOOKLET OR RESPONSE BOOKLET.

WHEN RECORDING YOUR ANSWERS YOU MAY WANT TO USE A RULER TO READ ACROSS ANSWER AND QUESTION COLUMNS.

WHEN YOU HAVE COMPLETED YOUR RESPONSES, PUT THE TASK INVENTORY BOOKLET AND THE RESPONSE BOOKLET IN THE ENCLOSED SELF-ADDRESSED ENVELOPE. SEAL AND RETURN TO THE OFFICER WHO GAVE YOU THIS PACKAGE. COMPLETED BOOKLETS SHOULD BE RETURNED WITHIN ONE WEEK OF RECEIPT.

RESPONSE BOOKLET INSTRUCTIONS

- To complete Part II, you need this TASK BOOKLET and the accompanying RESPONSE BOOKLET. Record all your answers to Part II in the RESPONSE BOOKLET.
- All pages of the RESPONSE BOOKLET are machine readable.
 In order for responses to be properly read, please be sure to:
 - 1. Use a No. 2 pencil only
 - 2. Carefully and completely shade the number corresponding to your answer under each column.
- Complete Page 00 of the RESPONSE BOOKLET first. Follow instructions given on the page. Fill in Line 1, and Boxes 2, 3, 4, and 5. Ignore all other boxes. BE SURE TO ENTER YOUR SOCIAL SECURITY NUMBER (WRITE DOWNWARD) IN THE BLANK SPACES IN BOX 3: then darkly shade the corresponding number on each line. An example of a completed Page 00 is shown on the next page (the handwritten notes in this example are for clarification only. Please do not make similar notes on your RESPONSE BOOKLET.)
- After completing Page 00, carefully read and follow instructions given on pages x through xiv.
- PLEASE HANDLE YOUR RESPONSE BOOKLET CAREFULLY. KEEP IT CLEAN AND AWAY FROM CHEMICALS. DO NOT DETACH, FOLD, WRINKLE OR CROSS OUT ANY PAGE.

INSTRUCTIONS

- 1. Use No. 2 pencil ONLY.
- 2. Indicate responses with solid black mark in space provided.
- 3. Erase COMPLETELY all changes.
- 4. Do not detach forms from packet.
- 5. Answer questions 2 through 5 below.
- 6. See Task Statement Booklet for further instructions for completing boxes to the right.

PART II

PART II A LIST OF TASKS

PART II B LIST OF INSTRUMENTS AND EQUIPMENT

HOW TO RESPOND TO TASK STATEMENTS AND INSTRUMENTS

Your responses to each statement should be marked on the corresponding page, column and item number in your RESPONSE BOOKLET.

Note that each page in your RESPONSE BOOKLET has two response blocks. The left-hand block (items 1-25) is for entering responses to statements printed on LEFT pages of this TASK BOOKLET; the right-hand block (items 26-50) is for the responses to statements printed on RIGHT pages. Make sure that your answers are recorded in the appropriate block on every page. DO NOT MAKE ANY MARKS OTHER THAN YOUR ANSWERS!

Each time you start a new page in your RESPONSE BOOKLET, check the page on your TASK BOOKLET. See that the numbers match; then mark the page number in "Box X" in the response page (see instructions at the top of response page.) This is necessary for computer processing.

Tear the Response Guide (p. xiii) at the perforation, and use the correct side to respond to each task or instrument found on the following white pages. Note the following detailed explanation of responses. Column A - (the responses to Column A differ for Part II A and Part II B, be sure to use the appropriate set of responses.)

Part II A

How often did you do this task within the last month? (If you were on leave, consider your immediate past working month.)

- 0 = Did not do
- 1 Did less than 5 times
- 2 = Did 5 to 20 times
- 3 = Did 21 to 50 times
- 4 = Did 51 to 100 times
- 5 = Did more than 100 times

Part II B

How often did you use this instrument or piece of equipment within the last month? (If you were on leave, consider your immediate past working month.)

- 0 Did not use
- 1 = Used less than 5 times
- 2 = Used 5-20 times
- $3 \approx \text{Used } 21-50 \text{ times}$
- 4 = Used 51-100 times
- 5 Used more than 100 times

If answer in Column A is 0, go to the next statement. If answer is 1, 2, 3, 4 or 5, answer also Columns B, C & D.

Column B

Indicate the approximate time you spent on a <u>single</u> performance the last time you performed this task.

- 0 = less than one minute
- 1 = 1 to 4 minutes
- 2 = 5 to 10 minutes
- 3 = 11 to 20 minutes
- 4 = 21 to 30 minutes
- 5 = 31 to 60 minutes
- 6 = 1 to 2 hours
- 7 = more than 2 hours

Column C

Do you feel you need additional training to perform this task?

- 0 = No
- 1 = Yes

LIST OF TASKS

EFT PAGE	OI PREVENTIVE MED TASK BOOKLET
TASK NO.	I ENTER RESPONSES TO STATEMENTS BELOW IN LEFT SIDE OF PAGE OF OF RESPONSE BOOKLET
1	ICLEAN AND DISINFECT WORKING AREA
2	I ICHEMICALLY TREAT EXCRETA FROM ISOLATION UNITS FOR DISPOSAL
3	 DETERMINE AND CONTROL SOURCES OF BACTERIAL CONTAMINATION
4	REVIEW AND EVALUATE BACTERIAL DESONTAMINATION PROCEDURES
5	 REVIEW AND EVALUATE ASEPTIC TECHNIQUES
6	I RECOMMEND CONCURRENT/TERMINAL DISINFECTION METHODS FOR CONTAGION WARD
7	FOG AREA WITH BACTERICIDE
8	I HOUSEKEEPING/CLEANING DUTIES
9	
10	 MONITOR CONTRACT HOUSEKEEPING SERVICES
11	INSPECT SPACES FOR CLEANLINESS
12	INSPECT TRASH AND GARBAGE DISPOSAL FACILITIES
13	SPECIFY TREATMENT OF GARBAGE FOR DISPOSAL
14	INSPECT GARBAGE DISPOSAL OPERATIONS
15	INSPECT SEWAGE DISPOSAL SYSTEMS
16	INSPECT SEWAGE DISPOSAL/TREATMENT OPERATIONS
17	INSPECT SCHOOLS/NURSERIES FOR HYGIENIC CONDITIONS
18	INSPECT BEAUTY SHOP
19	INSPECT BARBER SHOP
20	I INSPECT WORKING AREAS TO ENSURE THEY MEET INDUSTRIAL HYGIENE SPECIFICATIONS
21	I INSPECT WORKING AREAS TO ENSURE THEY MEET SANITARY STANDARDS
22	INSPECT BERTHING AREAS
23	JUDGE THE HABITABILITY OF OFFICER AND ENLISTED LIVING QUARTERS
24	100 CHLORINATION OF POOL WATER
25	SUPERVISE CHLORINATION OF SWIMMING POOL WATER
	GO TO RIGHT HAND PAGE

26	DRAIN AND CLEAN SWIMMING POOL
27	INSPECT SWIMMING POOL AND BATHHOUSE
28	INSPECT SHOWER FACILITIES
29	IINSPECT TOILETS AND WASHROOMS
30	I INSPECT RECREATIONAL FACILITIES FOR HYGIENIC CONDITIONS
31	
32	COORDINATE WITH HOUSING OFFICER FOR PMO HYGIENE INSPECTIONS
33	INSPECT BUILDINGS FOR ADHERENCE TO SANITARY BUILDING CODES
34	INSPECT SPACES FOR ADEQUATE VENTILATION
35	INSPECT SPACES FOR ADEQUATE LIGHTING
36	PROVIDE ADVICE ON IMPROVING HYGIENIC CONDITIONS
37	PROVIDE ADVICE ON SHIPBOARD HYGIENE AND SANITATION
38	PROVIDE ADVICE ON CONSTRUCTION OF SEWAGE TREATMENT SYSTEM FOR SHIPBOARD USE
39	
40	SET UP/REVIEW RECORD KEEPING AND CONTROL OF DOMESTIC ANIMAL INNOCULATION
41	GIVE PET RABIES VACCINATIONS
42	ADMINISTER INTERNATIONAL QUARANTINE OF ANIMALS (PETS)
43	GIVE PET'S LEPTOSPIROSIS SHOTS
44	GIVE PET'S DISTEMPER SHOTS
45	BAIT/TRAP ANIMALS FOR RABIES CONTROL PROGRAM
46	CHECK ANIMAL FOR PRESENCE OF ECTOPARASITE
47	REVIEW AND EVALUATE ANIMAL/INSECT BITE INCIDENT REPORTS
48	NOTIFY HEALTH AUTHORITIES OF ANIMAL BITE INCIDENTS
49	IDENTIFY SPECIES OF SNAKE SUSPECTED OF INFLICTING BITE
50	
	TURN PAGE

LEFT PAGE	02 PREVENTIVE MED TASK BOOKLET

1	EXAMINE ANIMAL OR HUMAN BITES
2	LEXAMINE FOR SYMPTOMS OF SNAKE BITES
3	COORDINATE LARGE SCALE VECTOR CONTROL PROGRAM
4	
5	INSPECT SPACES FOR RODENT INFESTATION
6	IINSPECT SPACES FOR INSECT INFESTATION
7	INSPECT SPACES FOR ECTOPARASITE INFESTATION
8	DETERMINE KIND OR SPECIES OF PEST INFESTATION
9	DETERMINE EXTENT OF PEST INFESTATION
10	SELECT TYPE OF PESTICIDE TO BE USED FOR EXTERMINATION
11	ICALCULATE AMOUNT OF PESTICIDE FOR USE IN SPECIFIC AREAS
12	
13	
14	SPRAY INFESTED AREAS
15	 FOG AREA WITH PESTICIDE/INSECTICIDE
16	 SANITIZE AREA USING STEAM
17	 PERFORM FUMIGATION PROCEDURES
18	
19	I IDO BEDBUG EXTERMINATION
20	 DD TERMITE EXTERMINATION
21	 DD ECTOPARASITE EXTERMINATION
22	DO LIVE TRAPPING OF RODENTS
23	DO RODENT EXTERMINATION
24	USE RIFLE/SHOTGUN/HANDGUN TO DESTROY RODENTS AND ANIMALS
25	CONSTRUCT BAIT STATIONS
į

	ENTER RESPONSES TO STATEMENTS BELOW IN RIGHT SIDE OF PAGE 02 OF RESPONSE BOOKLET
	CONDUCT/SUPERVISE WATER AREA INFESTATION SURVEYS, E.G. SNAILS, MOSQUITOES
27	CONDUCT MOSQUITO LANDING AND BITING COUNT SURVEYS
28	CONSULT ON RODENT PROOFING OF BUILDINGS
29	PROVIDE ADVICE ON VECTOR/RODENT CONTROL
30 I	INSTRUCT PERSONNEL ON PEST CONTROL PROCEDURES
31 (MAINTAIN ENTOMOLOGICAL REFERENCE COLLECTION
32 i	RECOMMEND METHOD OF DISPOSAL OF INFESTED MATERIALS
33	CONDUCT SURVEYS OF SHIPBOARD DISEASE VECTORS
34	CONDUCT SHIP DERATIZATION INSPECTIONS
35	CONDUCT SHIP DERATIZATION EXEMPTION INSPECTION
36	INSPECT AND CERTIFY RETROGRADE CARGO
37	COMPOUND EMULSIONS
38	PREPARE EMULSIONS
39	PREPARE MIXTURES
40	COMPOUND INSECTICIDES/RODENTICIDES
41	ISSUE/DISTRIBUTE INSECTICIDES/PESTICIDES
42	PREPARE RODENTICIDES AND INSECTICIDES FOR USE
	 CONVERT SOLUTION CONCENTRATIONS FROM GM/MG % TO MEQ/L AND VICE VERSA
44	 CALCULATE AND PREPARE PERCENT SOLUTIONS
45	 DETERMINE IF FOOD IS FIT/UNFIT FOR HUMAN CONSUMPTION
46	INVESTIGATE/DETERMINE CAUSES OF FOOD POISONING
47	INSPECT FOOD FOR PEST INFESTATION
48	INSPECT FOOD HANDLERS FOR PERSONAL HYGIENE
49	INSPECT KITCHENS FOR CLEANLINESS
50	INSPECT COFFEE MESS/DINING ROOM
