Approved for public release; distribution is unlimited.

17. DISTRIBUTION STATEMENT *(of the abstract entered in Block 20, if different from Report)*

18. SUPPLEMENTARY NOTES

19. KEY WORDS *(Continue on reverse side if necessary and identify by block number)*

Directories; Host Administrators; Host Technical Liaisons; User registration; Arpanet; Milnet; Minet; Host computers; DDN Network Information Center; Terminal Access Controllers (TACS); Communication Networks

20. ABSTRACT *(Continue on reverse side if necessary and identify by block number)*

An introductory section outlines services and documents available from the DDN Network Information Center, information about user registration, TAC access, DDN policies and procedures and contact names. The directory gives names, online and geographic mail addresses, and telephones of authorized users. Other useful sections include Host names and addresses for Host administrators and Host Technical Liaisons; host accronyms and host configurations.

Additional copies of this directory may be obtained from the DDN Network Information Center, SRI International, 333 Ravenswood Avenue, Room EJ291, Menlo Park, California 94025. Price is $12.00 to cover reproduction and handling.

The DDN Directory was published by the DDN Network Information Center using Tymshare's AUGMENT system for text processing and formatting. Camera ready copy was produced with a laser printer from Imagen Corporation, Los Altos, CA, and final printing was done by Consolidated Printers, Inc. of Berkeley, CA.

Date: June 1984

ACKNOWLEDGEMENTS

The DDN Directory was prepared by the DDN Network Information Center for the Defense Data Network Program Management Office of the Defense Communications Agency under contract number DCA-200-83-C-0025. The editors wish to thank Elizabeth Feinler, Susan Kahn, Johanna Landsbergen and Francine Perillo of the Network Information Center for their assistance in the production of this directory.

Explanation of this Directory

ATTENTION

The DDN Directory is the property of the Department of Defense. It is to be used solely for the conduct of, or in support of, official U.S. government business. The use of this book or its database for advertising, commercial mail distribution lists, or for any other unauthorized purpose is strictly prohibited.

NIC INFORMATION

Services and documents available from the DDN Network Information Center (NIC) are described in this section of the Directory.

USER REGISTRATION

This section describes who must register with the NIC and how to do so.

DDN INFORMATION

General information, useful definitions, policies, and procedures for using the DDN are included in this section.

GENERAL NETWORK CONTACTS

This section lists contacts for obtaining general network information.

INDIVIDUALS

Individuals who are authorized DDN users and who have supplied the proper information to the NIC are listed alphabetically by last name in the INDIVIDUALS section of the directory in the format

INDIVIDUAL'S NAME (NETWORK MAILBOX)
U.S. MAIL ADDRESS
PHONE NUMBER

where

NETWORK MAILBOX = USER-NAME@HOST-NAME.DOMAIN

NETWORK HOST ADMINISTRATORS AND TECHNICAL LIAISONS

This table lists the Host Administrator and Host Technical Liaison for every ARPANET, MINET and MILNET host. The table is organized by network, and by official host name within each network.

INTRODUCTION

NETWORK AND ASSOCIATE ORGANIZATIONS

Hosts are computers connected to the DDN. The organizations at which these computers are located are referred to as network organizations. Each host on the DDN has a host name acronym which often indicates the organization at which the host is located and gives other information about that host, e.g., SRI-AI is a host located at the SRI International Artificial Intelligence Center used for artificial intelligence research. Associate organizations are organizations that may have users on the DDN but do not have hosts connected to the DDN. Host and associate acronyms are listed by host acronym in the format

OFFICIAL HOST NAME	ORGANIZATION NAME ORGANIZATION ADDRESS

or by associate acronym in the format

ASSOCIATE ACRONYM	ORGANIZATION NAME ORGANIZATION ADDRESS

and by organization name in the format

ORGANIZATION NAME ORGANIZATION ADDRESS	OFFICIAL HOST NAME or ASSOCIATE ACRONYM

where

OFFICIAL HOST NAME = a unique acronym by which the organization is known on the DDN.

ASSOCIATE ACRONYM = an identification acronym for associate organizations, assigned by the NIC, by which hosts are known on the DDN.

COMPUTERS

The computer tables show what computers are in use on the DDN. One table indicates computer configuration, if more than one computer is accessible via the DDN, or if the host computer is a front-end to another machine or machines. The representation scheme is approximate, and does not necessarily include all the internetwork connections. The other table shows computers by manufacturer.

HOSTS BY LOCATION

This table organizes hosts, gateways and TACs by their geographic location. The exact location of any host can be checked by looking up the host name acronym in the Host Acronyms section of the Directory.

Network Information Center Services

WHAT THE DDN NETWORK INFORMATION CENTER (NIC) DOES

The NIC serves as a center for collection and dissemination of information about both DDN and ARPANET. It is located at SRI International in Menlo Park, California, and is funded by the Defense Communications Agency (DCA) to provide the services and publications outlined below.

PUBLICATIONS

The Network Information Center publishes the following documents:

The DDN DIRECTORY - A directory of users and hosts on the DDN which includes the name, online and U.S. mail address, and phone number of individual DDN users, as well as useful contacts and summary tables of host information.

NEW USER GUIDE - An introductory document geared toward the new network user which describes commonly-used services of the DDN, such as FTP, Telnet and electronic mail.

INTERNET PROTOCOL Books - A collection of current ARPANET, Internet, and DoD network communication protocols. Internet Protocol Transition Workbook, Internet Protocol Implementation Guide, Internet Mail Protocols, Internet Telnet Protocol and Options, and Miscellaneous Protocols make up the Internet protocol suite. Implementation of these protocols is required for interconnection of hosts to the network.

The TCP/IP IMPLEMENTATIONS AND VENDORS LIST - A list of implementations and products associated with the TCP/IP protocols. An online file is available from SRI-NIC as NETINFO:TCP-IP-IMPLEMENTATIONS.TXT.

DDN MANAGEMENT BULLETINS - The DDN Management Bulletin is published by the NIC under DCA contract as a means of communicating official policy, procedures and other information of concern to management personnel at DDN facilities. The bulletin is sent online to Host Administrators, Host Technical Liaison and other DDN contacts.

DDN NEWSLETTERS - A newsletter distributed online by the NIC on behalf of DCA to Host Administrators, Host Technical Liaison and other interested people. The DDN Newsletter is a vehicle for topics of general interest to the network community and does not necessarily represent official DDN policy.

NOTE: DDN users who wish to receive the DDN Newsletter online, should send a message to NIC@SRI-NIC.ARPA asking to be put on the distribution list. The Network Newsletter is not published in hardcopy.

ONLINE REFERENCE FILES AND SERVICES

THE OFFICIAL DOD HOST NAMES TABLE

An ASCII sequential file available from SRI-NIC (10.0.0.51 or 26.0.0.73) as
NETINFO:HOSTS.TXT
This file contains the official list of host names and host addresses for hosts attached to the network. It consists of host name, host address, host nickname, if any, and other host attributes as specified in RFC 810, "The DoD Internet Host Table Specification". It is accessible to any network user via the NIC Host Name Server (described below), and may also be accessed via FTP using USERNAME 'anonymous' and PASSWORD 'guest'. The table is machine translatable and is mainly used to update local host name recognition tables.

NIC HOST NAME SERVER

As of June 1982 the NIC has provided an Internet Host Name Server on SRI-NIC (10.0.0.51 or 26.0.0.73), TCP port 101 decimal. This server delivers machine-translatable host name/address/attribute information describing networks, gateways, and hosts within the DDN/Internet environment. The server can deliver a single response or the entire host table, depending upon the type of query sent. The server provides the information outlined in RFC 810, "DoD Internet Host Table Specification", and is itself described in RFC 811, "Hostnames Server", both available from the NIC.

THE OFFICIAL DDN LIAISON LISTS

Each host on the DDN has a contact known as the Host Technical Liaison. The Liaison files contain the name, U. S. mail address, network mailbox, phone, and host affiliation for each Host Technical Liaison. These ASCII sequential files available from SRI-NIC (10.0.0.51 or 26.0.0.73) may be FTP'd to a local host using USERNAME 'anonymous' and PASSWORD 'guest':

NETINFO:ARPA-LIAISON.TXT
  contains Liaison information for ARPANET hosts
NETINFO:MIL-LIAISON.TXT
  contains Liaison information for MILNET hosts
NETINFO:MIN-LIAISON.TXT
  contains Liaison information for MINET hosts

THE OFFICIAL DDN HOST ADMINISTRATOR LISTS

Each host on the DDN has a contact known as the Host Administrator. The Host Administrator files contain the name, U. S. mail address, network mailbox, phone, and host affiliation for each Host Administrator. These ASCII sequential files available from SRI-NIC (10.0.0.51 or 26.0.0.73) may be FTP'd to a local host using USERNAME 'anonymous' and PASSWORD 'guest':

NETINFO:ARPA-HOST-ADMINISTRATORS.TXT
  contains Host Administrator information for ARPANET hosts
NETINFO:MIL-HOST-ADMINISTRATORS.TXT
  contains Host Administrator information for MILNET hosts
NETINFO:MIN-HOST-ADMINISTRATORS.TXT
  contains Host Administrator information for MINET hosts

THE NODE SITE COORDINATORS (NSC) NETWORK MAIL DISTRIBUTION LIST

An ASCII sequential file available from SRI-NIC (10.0.0.51 or 26.0.0.73) as
  NETINFO:NSC.DIST
This file contains network mail addresses for all Node Site Coordinators formatted for online group distribution of messages via most mail programs. This file may be FTP'd from the SRI-NIC host to a local host using USERNAME 'anonymous' and PASSWORD 'guest'.

THE LIAISON NETWORK MAIL DISTRIBUTION LIST

An ASCII sequential file available from SRI-NIC (10.0.0.51 or 26.0.0.73) as
  NETINFO:LIAISON.DIST
This file contains network mail addresses for all Host Technical Liaison formatted for online group distribution of messages via most mail programs. This file may be FTP'd from the SRI-NIC host to a local host using USERNAME 'anonymous' and PASSWORD 'guest'.

TAC LOCATION FILE

A list of DDN TACs organized by geographic location including the name, online mailbox and phone number of the Node Site Coordinator for each TAC. The file NETINFO:TAC-LOCATION.TXT may be obtained via FTP from SRI-NIC (10.0.0.51 or 26.0.0.73).

TAC TELEPHONE NUMBERS

The NIC maintains an online table of telephone numbers arranged by geographical location for MILNET TAC dial-in. For the most up-to-date listing of TAC telephone numbers, FTP the file NETINFO:TAC-PHONES.LIST from SRI-NIC.

REQUESTS FOR COMMENTS (RFCs)

Network technical notes, known as Requests for Comments or RFCs, are available online at SRI-NIC (10.0.0.51 or 26.0.0.73). Dr. Jon Postel is currently serving as Editor-in-Chief for the RFCs. To submit an RFC for publication contact POSTEL@USC-ISIF.ARPA. To be added to the notification list for new RFC announcements, contact NIC@SRI-NIC.ARPA. RFCs may be FTP'd from SRI-NIC to a local host using USERNAME 'anonymous' and PASSWORD 'guest'. To FTP an RFC, use the pathname RFC:RFCnnn.TXT, where 'nnn' is the RFC number. There is an online RFC Index in the file RFC:RFC-INDEX.TXT on SRI-NIC. Contact NIC@SRI-NIC.ARPA if you cannot locate a particular RFC online.

INTERNET EXPERIMENT NOTES (IENS)

Internet Working Group technical notes, known as Internet Experiment Notes or IENs, are kept online at SRI-NIC (10.0.0.51 or 26.0.0.73). Individuals wishing to be added to the IEN notification list or to submit an IEN for publication, should contact POSTEL@USC-ISIF.ARPA. Each IEN remains online at the NIC for at least 21 days to give users a chance to obtain copies. IENs may be FTP'd from SRI-NIC to a local host using USERNAME 'anonymous' and PASSWORD 'guest'. To FTP an IEN, use the pathname IEN:IENnnn.TXT, where 'nnn' is the IEN number. There is an online IEN Index in the file IEN:IEN-INDEX.TXT on SRI-NIC.

NETWORK SPECIAL INTEREST GROUP (SIG) NOTES

The NIC is also a depository for many of the network special interest group notes, such as TCP/IP Digest, Info-VAX, and others. To be added to the distribution list for any network SIG, contact the SIG coordinator - the NIC does not control the SIG distribution lists. Check with the NIC if you are looking for back files of SIG documents. If we do not have them, we will attempt to direct you to the proper contact.

NIC PROTOCOL REPOSITORY

The NIC collects information on ARPANET, Internet, DDN, and related protocols, including official specifications, obsolete versions, modifications, contacts, specific implementations, user access programs, architectures, models, and general folklore. Please send any contributions to NIC@SRI-NIC.ARPA. If you do not know the right contact for questions about a particular protocol, contact NIC@SRI-NIC.ARPA. We will attempt to point you to the proper contact or documentation, if known to us.

NIC/QUERY

NIC/Query is a program which allows network users to view information contained in an online database located on the NIC host computer. The information describing hosts, protocols, computers on the network and other useful topics is formatted in structured files and is presented in menu form. The query program is designed for novice or casual users and is available to all network users. (See ACCESS TO NIC/QUERY below.)

ACCESS TO NIC/QUERY

To access NIC/QUERY, connect to SRI-NIC (10.0.0.51 or 26.0.0.73) and type:

[@]nic <CR>

where [@] = the SRI-NIC prompt
<CR> = carriage return typed by the user

then follow the instructions that are printed out.

NOTE: Users may use this account for viewing reference files in the NIC/QUERY program only. It cannot be used to access other programs, to connect to other directories, or to link or send messages.

REGISTER SERVICE

The NIC maintains a DDN user registration server to facilitate updates to the NIC user registration database. Hosts may choose to make use of this server in their user registration procedures.

On hosts that do not incorporate user registration at the NIC in their local procedures, users can register themselves by using the Register program at the SRI-NIC machine to submit a user registration template. (See ACCESS TO REGISTER PROGRAM below, and also USER REGISTRATION section.)

ACCESS TO REGISTER PROGRAM

To access the REGISTER program, connect to SRI-NIC (10.0.0.51 or 26.0.0.73) and type:

[@]register <CR>

For help in using the REGISTER program, type:

[@]register <SP> help <CR>

and follow the instructions that are printed out.

WHOIS SERVER

The NIC has implemented a DDN 'white-pages' server called WHOIS (referred to as NICNAME on some hosts) to deliver the data in the NIC user registration database to network users via a fast query/response transaction across the network. Hosts are urged to make this service available to their local users. See RFC 812, "NICNAME/WHOIS", for a more detailed description of the WHOIS server.

All individuals with accounts on DDN hosts, who are capable of passing traffic across the network, are requested by DCA to be registered in the NIC user registration database. To add your name to this database, send your full name, middle initial, U.S. mail address (i.e., your business address without abbreviations or acronyms and including mail stops), network mailbox and telephone to REGISTRAR@SRI-NIC.ARPA. Users requiring MILNET TAC Access must contact their local Host Administrator for authorization before being registered. (See USER REGISTRATION section.)

ACCESS TO WHOIS

To access WHOIS from a host on which WHOIS resides, log in, and then type:

whois <SP> LASTNAME <CR>

For help, type:

whois <SP> help <CR>

To access WHOIS from a host that does not have the WHOIS program installed, Telnet to SRI-NIC (10.0.0.51 or 26.0.0.73) and type:

[@]whois <SP> LASTNAME <CR>

To get help, type:

[@]whois <SP> help <CR>

Contact your local operator or user representative if WHOIS is not available directly on your machine. The NIC can provide sample user access programs for TOPS20, TENEX, and UNIX operating systems on request.

NEWS SERVERS

The NIC TACNEWS server provides access to DDN Management Bulletins and Newsletters from a TAC. This same type of service will be directly accessible from local hosts in the near future.

HARDCOPY DOCUMENT DISTRIBUTION

The NIC maintains files of many hardcopy documents pertaining to the DDN. Although the NIC (since 1974) does not officially distribute hardcopy reprints to network users, it will attempt to honor Interlibrary Loan requests for items in the NIC collection that are not available in the open literature. This service is provided to the extent that funds and staff permit and is not guaranteed.

CORRESPONDING WITH THE NIC

Users are encouraged to correspond with the NIC concerning network information matters. If there is no entry in this Directory for you or your host, or if the entry is incorrect or should be removed, please let us know. Suggestions from users are welcome.

To correspond with the NIC, use any one of the following methods of contact:

via network mail to:

NIC@SRI-NIC.ARPA
For general reference questions and document requests

REGISTRAR@SRI-NIC.ARPA
For WHOIS updates, user registration questions

HOSTMASTER@SRI-NIC.ARPA
For questions about host changes and updates

via U. S. mail to:

DDN Network Information Center
SRI International
333 Ravenswood Avenue, Room EJ291
Menlo Park, California 94025

via phone to: (415) 859-3695
or (800) 235-3155

via Telex to: 334463

NOTE: Network mail is preferred.

User Registration and TAC Access

USER REGISTRATION

Many Host Administrators register their users by submitting user registration templates to the NIC via network mail as part of the procedure of establishing user accounts on their host. On hosts that do not incorporate NIC user registration in their local procedures, users can register themselves by using the Register program at the SRI-NIC machine to submit a user registration template. (See the section on NIC INFORMATION for instructions on the Register program.) An alternate way that users can register themselves is by FTP'ing the user registration template to their local hosts from the file NETINFO:USER-TEMPLATE.TXT on the SRI-NIC machine, filling out the template with a local editor, and submitting the template via network mail. However, users are cautioned that if they choose to register themselves by FTP'ing the user registration template, they should read the submission instructions carefully. If MILNET TAC access is required, the template must be sent to the Host Administrator who will forward it to the NIC; if MILNET TAC access is not required, the user registration template should be sent directly to REGISTRAR@SRI-NIC.ARPA.

MILNET TAC ACCESS

The TAC Access Control System (TACACS) went into operation on MILNET in February, 1984. TACACS uses a login procedure to control access to MILNET. When a MILNET TAC user attempts to open a connection to a host, the TAC prompts for the user's TAC User ID and Access Code.

The responsibility for authorizing MILNET TAC access rests with Host Administrators. Each Host Administrator must decide which users of the host he or she administers should be authorized for MILNET TAC use. This decision should be guided, in part, by the intended TAC user's willingness to use the access privileges responsibly, and for official use only.

The authorization process is incorporated into the user registration procedure. The user registration template includes a field for TAC access authorization. For a user to be authorized for MILNET TAC access, the TAC access field of the template must be filled in.

Each authorized MILNET TAC user is issued a TAC Access Card by the NIC containing the user's TAC User ID and Access Code. When the NIC receives a user registration template requesting MILNET TAC access, a TAC Access card is issued and mailed directly to the user. Host Administrators are sent a list of all users who have been issued TAC access cards on their hosts. Each holder of a TAC Access Card is personally responsible for its use and safekeeping. Lost or stolen cards must be reported to the NIC either by the user or the Host Administrator. Replacement cards will be issued upon request.

All communications about user registration or TAC access cards should be sent to REGISTRAR@SRI-NIC.ARPA.

ARPANET TAC ACCESS

TACACS is scheduled for implementation on ARPANET in late 1984. The procedures for authorizing ARPANET TAC access and for obtaining ARPANET User IDs and Access Codes may differ from the procedures for MILNET. ARPANET users may contact the NIC for further information.

DDN General Information

USEFUL DEFINITIONS

INTERFACE MESSAGE PROCESSOR (IMP)

A store and forward packet switch which can accommodate up to four or more host computers. The original IMPs and TIPs were Honeywell 316 and 516 machines which have been replaced by C/30 machines produced by Bolt Beranek and Newman, Inc. (BBN) for the Defense Communications Agency (DCA).

TERMINAL ACCESS CONTROLLER (TAC)

A standalone terminal controller attached to an IMP as a local or distant host. Several TACs may be attached to a single IMP thus providing an expanded capability for terminal access. The TAC is equipped with internet protocols, improved auto speed detect to higher baud rates, and increased character buffering for terminals. It can be combined with an internet private line interface (IPLI) for secure terminal traffic and programmed for other functions.

HOST

A customer-owned computer which is connected to a host port on an IMP.

TERMINAL

A teletypewriter, CRT, or similar unit which is connected to a terminal port of a TAC.

MODEM

A device which converts signals from a digital device into analog form for transmission over telephone lines.

INTERSWITCH TRUNKS

A circuit between packet switches which is used to pass packets through the network.

ACCESS LINE

A circuit from a TAC or host computer to an IMP, or a circuit from terminal to a TAC. The circuit may be a local cable or a transmission facility requiring modems.

ARPANET/DDN BACKBONE

The nodes (IMPs and TACs), interfaces, communication lines interconnecting the IMPs and/or TACs, maintained by a Network Monitoring Center (NMC) for each network.

NODE

The packet switch, also known as an IMP, TAC and/or mail bridge. A node may have a combination or multiple of this equipment.

PREVIOUS PAGE IS BLANK

DDN INFORMATION

WHAT THE DDN IS

The ARPANET orginated as a purely experimental network in late 1969 under a research and development program sponsored by the Defense Advanced Research Projects Agency (DARPA) to advance the state-of-the-art in computer networking. The network was successfully designed to provide efficient communications between heterogeneous computers so that hardware, software, and data resources could be conveniently and economically shared by a wide community of users.

The Defense Data Network (DDN) was created in 1982 in anticipation of providing an administrative umbrella over existing and planned DoD networks. The DDN includes several operational, resource sharing, host-to-host networks linking a wide variety of computers at DoD facilities and non-DoD research centers in continental United States, Hawaii, Korea and Europe. In 1983, the ARPANET was logically divided into two separate unclassified networks, ARPANET and MILNET, to serve the needs of two different communities of interest. The ARPANET serves primarily as an experimental research and development network while the MILNET serves as an operational military network. Resources are shared between the two networks. In October 1984 there will be a physical split of these two networks. Communication between them will continue, but will be subject to administrative and protocol control.

The DDN is managed by the Defense Data Network Program Management Office (DDN PMO) of the Defense Communications Agency (DCA). The ARPANET is also managed by the DDN PMO, although administration and policy for this network is set by the Defense Advanced Research Projects Agency (DARPA).

DDN POLICIES

All orders for communications lines are placed through DCA Code 647 with the Defense Commercial Communications Office (DECCO), and appropriate charges are billed to the sponsoring *service or agency.*

Host equipment, host interface hardware and software, base level cabling for host-to-IMP communications and site preparation are the responsibility of the user.

For testing new concepts and developments in data communications and computer networking, interconnection of the DDN with other networks is authorized. DCA elements, DARPA, and others coordinate these plans with the DDN PMO.

WHO MAY BE A SUBSCRIBER ON THE DDN

Only users engaged in U.S. Government business or research, or who are directly involved with providing operations or system support for government-owned or government-sponsored computer communications equipment are authorized to use the DDN.

The DDN is an operational DoD network and is not intended to compete with comparable commercial service. It is intended to be used solely for the conduct of or in support of official U.S. Government business. The use of the DDN must not violate applicable privacy laws.

BRINGING A HOST ONTO THE DDN

If an organization wants to bring a host computer onto the DDN, a request for service must be sent to the organization's serving Telecommunication O&M Command who will submit a TSR to DCA Code B628. The DDN PMO will then determine which node(s) in the requestor's area has the capacity to accommodate the requirement. Host connections are completed by the DDN PMO. TCP/IP protocols must be implemented and host approval and registration procedures must be followed. The DDN PMO sets guidelines for cost reimbursements and length of service for the host port access.

Military contractors wishing to bring a host onto the DDN should contact their contracting organization who must then contact their serving Telecommunications O&M Commmand for instructions.

DARPA contractors wishing to bring a host computer onto the ARPANET should contact ARPANETMGR@DDN1.ARPA If the contractor does not have online access, he or she should contact DCA Code B646, Operations Branch, phone (703) 285-5233, or the NIC for further instructions.

GETTING A USER ACCOUNT ON THE NETWORK

Individuals involved with U.S. government contracts wishing to use the DDN must obtain permission from DCA via the Host Administrator at the site where access is needed.

DARPA contractors or Internet Working Group participants must obtain permission from DARPA in order to use the net. This can be done by contacting the Host Administrator at the site where the user wishes to be associated.

Some sites provide account time for a fee. Check with your local Host Administrator for information about his or her site.

ACCESS CONTROL

It is the duty of the Host Administrators to insure that only authorized users are allowed access to hosts through network nodes. Name, U.S. mail address, network mailbox, and phone should be on record with the NIC for each network user. (See also USER REGISTRATION section.)

It is the responsibility of the Host Administrator to see that only validated accounts are established for users, that login/password mechanisms are satisfactory, and to insure that users who no longer require access are removed from the net.

If abuse of this policy is noted, the DDN PMO will contact the Host Administrator. If corrective action is not taken in a reasonable time, the DDN PMO reserves the right to disconnect the host/terminal from the network.

The IMPs and TACs are owned, controlled and maintained by DCA. The DDN PMO has assignment control authority over the ports on their equipment.

HOST ADMINISTRATORS

Host Administrators have local administrative authority over policies, practices and user access. They authorize and register users who need MILNET TAC access. Host Administrators provide network information to local users and other personnel. They coordinate with the DDN PMO the implementation, installation, removal or changes of a host. They are responsible for proper implementation of DDN protocols at the host level and are responsible for investigative work in the case of host break-ins.

HOST TECHNICAL LIAISON

Host Technical Liaison are the people to contact for answers to technical questions concerning hardware or software at a host site. They provide technical assistance concerning host performance, network access, network protocols and host software and hardware to the Host Administrators.

NODE SITE COORDINATORS

Node Site Coordinators are the local node representatives for matters concerning access control, accountability for DDN hardware and software, and coordination responsibility for the DDN circuits located at a DDN node site.

INTERNET DOMAIN NAMES

The ARPA Internet is currently engaged in changing over to a "Domain Naming System", which is a new method of associating names with hosts. As part of this development, all network mail addresses must use a domain specification instead of a host name; for example, the form "NIC@SRI-NIC.ARPA" must be used, instead of "NIC@SRI-NIC". However, for convenience, all host tables in this directory omit the ".ARPA"; all hosts as of this writing are still in the single ARPA domain. For further information on domain names, see RFCs 882 and 883. The current timetable for implementation may be found in RFC 897. These RFCs may be FTP'd to your local host from the SRI-NIC host using USERNAME 'anonymous' and PASSWORD 'guest' and specifying the pathname RFC:RFCnnn.txt, where 'nnn' is the RFC number.

General Network Contacts

DDN MANAGEMENT, POLICY AND SERVICE

Questions regarding policy or access to the DDN should be sent to the DDN PMO.

Operational matters concerning the MILNET should be referred to the MILNET Manager at the DDN PMO.

Network mail: MILNETMGR@DDN1.ARPA
Phone: (703) 285-5228, (AV) 356-5228

Operational matters concerning the ARPANET should be referred to the ARPANET Manager at the DDN PMO.

Network mail: ARPANETMGR@DDN1.ARPA
Phone: (703) 285-5233, (AV) 356-5233

NETWORK OPERATION AND TRAFFIC

Bolt Beranek and Newman (BBN) is responsible for hardware and software maintenance of the MILNET and ARPANET backbone under contract to the DDN PMO.

Contact the appropriate Network Monitoring Center (NMC) for all network hardware problems, for hardware field service, problems with host interfaces, or suspected IMP/TAC software problems. Inform the NMC of any extended outages at your site, especially those that will affect the IMP. NMC services are available 24 hours a day, 7 days a week.

Network mail: CONTROL@BBN-UNIX.ARPA
Phone: (617) 661-0100 or (617) 497-3571

IMP PROBLEMS

Any problem resulting from using network IMPs should be directed to the appropriate Network Monitoring Center.

Network mail: GRIPES@BBN-UNIX.ARPA

TAC PROBLEMS

Any problems resulting from using network TACs should be directed to the DDN User Assistance Service at the DDN Network Information Center.

DDN NETWORK INFORMATION CENTER

The DDN User Assistance Service at the DDN Network Information Center provides assistance to both MILNET and ARPANET users. The NIC publishes network documents and provides information on the latest DoD protocols. See section on NIC INFORMATION for more details.

Network mail: NIC@SRI-NIC.ARPA

HOST CONFIGURATIONS

EXPLANATION: For each host listed, alphabetically by network, there is a description of the computer configuration for that host. The first computer mentioned in this description is attached to the IMP and is by definition the 'front-end' computer. Other computers are attached to the front-end computer as indicated by the arrows. The configuration of machines on the ARPANET and MILNET change often, so this table undoubtedly contains inaccuracies. Also, the configuration indicated by the arrows is an approximate representation that does not include all the internetwork, local network, and gateway connections. Send corrections or additions to HOSTMASTER@SRI-NIC.ARPA.
