INTRODUCTION

We compiled this list in response to a flurry of reference questions posed to the HQ TRADOC Technical Library concerning recent military operations. We found that questions weren't so easy to answer, because there is no one source which provides basic information about who went where and did what to whom. We began by creating a simple list of operations giving the year and geographic region covered. This list generated even more questions, so we began gathering more specific details about each operation.

The task was surprisingly difficult because little has been written about many of the events identified here. As the results were needed rather quickly, we did not attempt to find the definitive work on each mission, but to make use of material on hand. In many cases, "material on hand" boiled down to the NEXIS service; news stories and wire reports were the only sources found. This was sufficient for our purposes, as we did not want to create a classified document, or one which would have to be limited in distribution.

We made every effort to be accurate, and we hope this list will save others some time and effort. Your comments and suggestions are welcome.
