PREFACE

This report presents the results of an Air Force Occupational Survey of the Services career ladder (AFSC 3M0X1). Authority to conduct occupational surveys is contained in AFI 36-2623. Computer products used in this report are available for use by operations and training officials.

Chief Master Sergeant Jeffrey L. Milligan, Inventory Development Specialist, developed the survey instrument. Mr. James B. Keeth, Occupational Analyst, analyzed the data, and wrote the final report. Mr. Wayne Fruge provided computer programming support, and Ms. Linda McDonald provided administrative support. Major Randall C. Agee, Chief, Airman Analysis Section, Occupational Analysis Flight, Air Force Occupational Measurement Squadron (AFOMS), reviewed and approved this report for release.

Copies of this report are distributed to Air Staff sections, major commands, and other interested training and management personnel. Additional copies are available upon request to the AFOMS, Attention: Chief, Occupational Analysis Flight (OMY), 1550 5th Street East, Randolph AFB, Texas 78150-4449 (DSN 487-6623).

SUMMARY OF RESULTS

1. **Survey Coverage:** The Services career ladder (AFSC 3M0X1) was surveyed to obtain current job and task data for use in examining training programs. Survey results are based on responses from 3,279 AFSC 3M0X1 personnel, which represents 62 percent of the assigned population.
2. **Career Ladder Structure:** Structure analysis identified 14 very diverse jobs: Cooks, Storeroom, Accountants, Managers, Supervisors and Superintendents, Contingency, Search and Recovery, Mortuary Affairs, Dorm Managers, Quality Assurance Evaluation (QAE), Linen Exchange, Fitness and Recreation, Lodging, and SIMS Administrators. Very little overlap in tasks performed was found across the 14 jobs.
3. **Career Ladder Progression:** A clear pattern of job progression is noted. Members at the 3-skill level tend to work primarily in the cooking function, with smaller numbers of personnel also working in the fitness, recreation, and lodging jobs. At the 5-skill level, job possibilities open up sharply, with members moving away from the cooking area and going to work in any one of nine other areas. This broadening of job experience continues into the 7-skill level, including an increase in personnel working in supervisory jobs. It is only at the 9- and CEM levels that the job of a Services incumbent clearly becomes that of a manager, with very little, if any, technical work being performed. The AFMAN 36-2108 *Specialty Description* provides a broad and accurate overview of tasks and duties performed within the career ladder, as well as the primary responsibilities of members in the 14 jobs identified by the job structure analysis process.
4. **Training Analysis:** Data from this occupational survey were used in a Services Utilization and Training Workshop (U&TW) held 11-14 October 1994 at HQ AFSVA in San Antonio, Texas. The STS for the DAFSC 3M031 resident course was reviewed for adequacy and compliance with OSR findings. Several training areas were changed based on a review of the OSR data.
5. **Job Satisfaction Analysis:** In general, job satisfaction among most AFSC 3M0X1 personnel is good, with the lowest satisfaction found among first-enlistment personnel. When compared to previous OSRs, most indicators in the current study reflected higher satisfaction than was seen in the 1980 Food Service survey, but in many instances, show a drop when compared to the 1986 Services and 1987 Fitness and Recreation surveys. As for job satisfaction for the major jobs identified, Linen Exchange, Cook, Dorm Manager, and Storeroom jobs showed the lowest job interest, while SIMS Administrator, Contingency, and Mortuary Affairs jobs had the highest job interest.

6. **Implications:** The AFSC 3M0X1 career ladder reflects a wide diversity and variety of jobs being performed. Almost 40 percent of career ladder members work in the Food Service or Storeroom areas. Other large job areas included Fitness and Recreation and Lodging. Other members work either in a supervisory or management job or in one of many specialized jobs. Despite the diversity of work found in the career ladder, job progression shows a distinct pattern as one moves from the 3-skill level to the 9-skill and CEM levels. The AFMAN 36-2108 *Specialty Description* broadly describes the jobs performed. Training provided in the 3-skill level resident course was revised to better reflect utilization patterns in the field. Job satisfaction is fairly good for career ladder incumbents, with only a few weak areas noted.

**OCCUPATIONAL SURVEY REPORT
SERVICES CAREER LADDER
(AFSC 3M0X1)**

INTRODUCTION

This is a report of an occupational survey of the Services career ladder conducted by the Occupational Analysis Flight, Air Force Occupational Measurement Squadron (AFOMS). The current Services career ladder was created following a series of mergers that began in April 1988 with the merger of Food Services (AFSC 622X0) and Services (AFSC 611X0) into AFSC 623X0. Personnel in this AFSC worked in Air Force dining facilities, billeting offices, dormitory management, linen exchange, and mortuary affairs. On 31 October 1992, the Services career ladder (AFSC 623X0) merged with the Recreation and Fitness career ladder (AFSC 741X1) and became AFSC 781X0. Personnel in this new AFSC, in addition to working in the Services areas above, also became involved with fitness centers, community activity centers, base hobby shops, and outdoor recreation areas such as marinas and beaches. In October of 1993, the AFSC designation was changed to 3M0X1 as part of the revamping of the Air Force classification system.

In October 1994, additional changes relating to the Services career ladder were made. The Dormitory Management function was deleted from DAFSC 3M0X1 and placed in Reporting Identifier 9D000, Dormitory Manager. In addition, troop support functions were added to the Services specialty as the result of a merger of the 3M0X1 and 3K0X1 (Subsistence Operations) career ladders.

This is the first survey of the newly merged 3M0X1 specialty. At the time of the survey administration, the dormitory manager job was still being performed by Services personnel and is identified in this OSR as a Services function. Also, the troop support function was not yet a part of the Services specialty, thus that function is not addressed. Essentially, this Services OSR addresses only the functions that resulted from the merger of the Food Service, Services, and Fitness and Recreation AFSCs. The last OSR published for each of the three merged AFSCs are listed below:

AFSC 622X0 (Food Service) - September 1980
AFSC 611X0 (Services) - June 1986
AFSC 741X1 (Fitness and Recreation) - December 1987

APPROVED FOR PUBLIC RELEASE; DISTRIBUTION UNLIMITED

Data obtained from this survey were used to support a Utilization and Training Workshop (U&TW) conducted 11-14 October 1994 in San Antonio, Texas. Current utilization patterns among Services personnel were examined by workshop participants and training requirements for the 3-skill level awarding course were modified based on these utilization patterns. Results from this U&TW will be discussed in more detail in the Training Analysis section of this OSR.

Background

As described in the AFMAN 36-2108 *Specialty Description* for AFSC 3M0X1, dated October 1993, Services members manage, supervise, and administer or operate appropriated and nonappropriated fund food facilities; transient and temporary lodging facilities; fitness and recreation programs and facilities; mortuary affairs administration; operational support; training and supervising search and recovery teams; training, scheduling, and overseeing honor guard teams; training and advising unit fitness managers in fitness evaluation procedures and conducting fitness improvement training programs; selecting, procuring, and controlling equipment and supplies; providing lodging, feeding, and recreation services in fixed and bare base facilities; providing liaison support to the Defense Commissary Agency and the Army and Air Force Exchange Service; performing quality assurance functions when areas of responsibility are performed by contract; and operating and administering information management systems used to support functional responsibilities.

The Services career ladder is a contingency-related field. Personnel serving in this career ladder may participate in recovery operations as a result of natural and manmade disasters. Also, they may be subject to deployment and employment in hostile environments. Personnel should have knowledge and proficiency using specialized equipment and procedures required to provide food, shelter, laundry, first aid, field sanitation and hygiene, mortuary service, recreation, and physical fitness to deployed forces.

Entrants into the AFSC 3M0X1 career ladder must complete the Services Apprentice course (L3ABR3M031 001) at Lackland AFB TX. This is a 31-day course and covers Services Operations, Fundamentals of Food Preparation, Techniques of Preparing Food, and 48 hours of Readiness training. A 10-day Services Craftsman course (L3AAR3M071 000) is also required for SSgt's in 7-skill level upgrade training.

Several other resident courses are also available for career ladder members. A 5-day Cycle Ergometry course (L3AZR3M051 002) targets installation fitness program trainers. A 10-day Fitness Specialist course (L3AZR3M051 001) is also available which targets 5-skill level workers in fitness centers. Normally, this course is scheduled sequentially with the cycle ergometry course.

Entry into this career ladder currently requires a General Armed Forces Vocational Aptitude Test Battery (ASVAB) score of 30, and a Strength Factor of "H" (weight lift of 50 lbs).

SURVEY METHODOLOGY

Inventory Development

The data collection instrument for this occupational survey was USAF Job Inventory AFPT 90-781-022, dated December 1993. A tentative task list was prepared after reviewing pertinent career ladder publications and directives, and tasks from previous applicable OSRs. The preliminary task list was refined and validated through personal interviews with 44 Subject Matter Experts (SMEs) at the following locations:

<u>BASE</u>	<u>ORGANIZATION VISITED</u>
Lackland AFB TX	394 MWRS
Lowry AFB CO	3440 TCHTS (formerly the tech training center for this AFSC)
FE Warren AFB WY	90 MWRS
Randolph AFB TX	12 MWRS
Nellis AFB NV	554 MWRS
Travis AFB CA	60 MWRS

Others contacted included Air Force Military Personnel Center (AFMPC) classification personnel, functional and resource managers, and the Air Force Career Field Manager (AFCFM).

The resulting Job Inventory contains a comprehensive listing of 919 tasks grouped under 23 duty headings, with a background section requesting grade, job title, time in present job, time in service, job satisfaction, previous AFSC, time spent baking, automated systems used, and forms used.

Survey Administration

From March through July 1994, Military Personnel Flights at operational bases worldwide administered the inventory to all eligible DAFSC 3M0X1 personnel. Members eligible for the survey consisted of the total assigned population of the career ladder, excluding the following: (1) hospitalized personnel; (2) personnel in transition for a permanent change of station; (3) personnel retiring within the time the inventories were administered to the field; and (4) personnel in their jobs less than 6 weeks. Participants were selected from a computer-generated mailing list obtained from personnel data tapes maintained by the Air Force Military Personnel Center, Randolph Air Force Base, Texas.

Each individual who completed the inventory first filled in an identification and biographical information section and then checked each task performed in his or her current job. After checking tasks performed, each individual rated the tasks checked on a 9-point scale showing relative time spent on that task, compared to other tasks performed. The ratings ranged from 1 (very small amount time spent) to 9 (very large amount time spent).

To determine relative time spent for each task, all of the incumbent's ratings are assumed to account for 100 percent of time spent on the job and are summed. Each task rating is then divided by the total task ratings and multiplied by 100 to provide a relative percentage of time spent on each task.

Survey Sample

Personnel were selected to participate in this study so as to ensure an accurate representation across MAJCOMs and paygrades. Table 1 reflects the percentage distribution, by MAJCOM, of assigned and sampled individuals in AFSC 3M0X1 as of March 1994. Table 2 reflects paygrade distributions. Survey results are based on responses from 3,279 AFSC 3M0X1 personnel (62 percent of the assigned population). As shown by both tables, the survey sample accurately reflects the overall AFSC 3M0X1 population.

Task Factor Administration

Job descriptions alone do not provide sufficient data for making decisions about career ladder documents or training programs. Task factor information helps to complete analysis of the career ladder. To obtain the needed task factor data, selected senior AFSC 3M0X1 personnel (generally E-6 or E-7 craftsmen) also completed a second booklet for either training emphasis (TE) or task difficulty (TD). The TE and TD booklets were processed separately from the job inventories. This information is used in a number of analyses discussed in more detail within this report.

Training Emphasis (TE). Individuals completing TE booklets were asked to rate tasks on a 10-point scale from no training required to extremely high amount of training emphasis. TE is a rating of which tasks require emphasis in structured training for first-term personnel. Structured training is defined as training provided by resident technical schools, field training detachments, mobile training teams, formal OJT, or any other organized training method. TE data were independently collected from 95 experienced 7-skill level personnel stationed worldwide. In order for TE data to be reliable and reportable, sufficient rater agreement must exist. In this study, there was a wide range of rating policies, due primarily to the wide degree of diverse functions found in this career ladder. As a result, raters were unable to agree sufficiently on a training policy. In an attempt to obtain reliable data, raters were further broken out by former AFSC (i.e. Food Service, Services, or Fitness and Recreation). Rater responses for each of these three groupings were examined separately. The resultant groups still failed to yield sufficient agreement, and hence no TE data is reported in this survey.

Task Difficulty (TD). Task difficulty is defined as an estimate of how much time the average airman needs to learn to perform each task satisfactorily. Eighty-four experienced AFSC 3M0X1 supervisors rated each task's difficulty using a 9-point scale ranging from 1 (extremely low) to 9 (extremely high). Despite the wide diversity of functions found within the career ladder, interrater agreement among these respondents was sufficiently high to report TD ratings. TD ratings are normally adjusted so tasks of average difficulty have a value of 5.00 and a standard deviation of 1.00. Any task with a difficulty of 6.00 or greater is considered difficult to learn.

When used in conjunction with the primary criterion of percent members performing, TD can provide insight into first-enlistment personnel training requirements. Such insights may suggest a need for lengthening or shortening portions of instruction supporting Air Force Specialty entry-level jobs.

SPECIALTY JOBS (Career Ladder Structure)

The first step in the analysis process is to identify the structure of career ladders in terms of jobs performed by respondents. The Comprehensive Occupational Data Analysis Programs (CODAP) assists by creating an individual job description for each respondent based on tasks performed and relative amount of time spent on these tasks. The CODAP automated job clustering program then compares all the individual job descriptions, locates the two descriptions with the most similar tasks and time spent ratings, and combines them to form a composite job description. In successive stages, CODAP either adds new members to this initial group, or forms new groups based on the similarity of tasks and time spent ratings.

The basic group used in the hierarchical clustering process is the **job**. When two or more jobs have a substantial degree of similarity in tasks performed and time spent on tasks, they are grouped together and identified as a **cluster**. The structure of the career ladder is then defined in terms of jobs and clusters of jobs.

Overview of Specialty Jobs

Based on the analysis of tasks performed and the amount of time spent performing each task, 14 jobs were identified within the surveyed career ladders. Figure 1 illustrates the jobs performed by AFSC 3M0X1 personnel.

Career Ladder Structure

Figure 1

A listing of these jobs and job clusters is provided below. The stage (STG) number shown beside each title references computer printed information, the letter "N" represents the number of personnel in each group.

- I. COOKS (STG039, N=1,015)
 - A. Bakers (STG371, N=29)
 - B. Dining Hall Cooks (STG272, N=718)
 - C. Missile Site Cooks (STG297, N=122)
 - D. In-Flight Kitchen Cooks (STG137, N=99)
- II. STORE ROOM (STG324, N=234)
- III. ACCOUNTANTS (STG048, N=50)
- IV. MANAGERS (STG051, N=56)
- V. SUPERVISORS AND SUPERINTENDENTS (STG088, N=335)
- VI. CONTINGENCY (STG214, N=103)
- VII. SEARCH AND RECOVERY (STG153, N=16)
- VIII. MORTUARY AFFAIRS (STG136, N=51)
- IX. DORM MANAGERS (STG091, N=45)
- X. QUALITY ASSURANCE EVALUATORS (STG067, N=76)
- XI. LINEN EXCHANGE (STG130, N=52)
- XII. FITNESS AND RECREATION (STG061, N=505)
- XIII. LODGING (STG050, N=350)
- XIV. SIMS ADMINISTRATORS (STG046, N=130)

The respondents forming these groups account for 92 percent of the survey sample. The remaining 8 percent were performing tasks that did not group with any of the other defined jobs. Many of these respondents have been in the career field for a short amount of time, and perform only a limited number of tasks. It is anticipated that, with more experience, these personnel would group with one of the identified jobs.

Group Descriptions

The following paragraphs contain brief descriptions of the 14 jobs identified through career ladder structure analysis. Appendix A lists representative tasks performed by identified job groups. Table 3 displays time spent on duties, while Table 4 provides demographic information for each job discussed within this report.

Another way to illustrate these jobs is to summarize tasks performed into groups of tasks (task modules). This allows for a concise display of tasks where job incumbents spend most of their time, and develops a comprehensive overview of each job. The display shows the number of tasks included in a module, the average percent time spent on that module, a cumulative amount of time spent on the listed modules, and finally, an average percent members performing the particular task module. These modules were identified through CODAP co-performance clustering, which calculates the probability that members who perform one task will also perform a second task or group of related tasks. Representative task modules are listed as part of the job description. The list of modules with respective tasks is presented in Appendix B.

I. COOKS (STG039). The members of this cluster represent nearly one-third of the survey sample. These personnel are primarily responsible for the preparation of food at various sites throughout the Air Force. Sixty-seven percent of the job time is spent cooking foods, preparing serving lines, or serving foods. Representative tasks performed by members of this cluster include:

- Monitor food temperatures
- Wrap food items
- Boil eggs
- Deep fat fry meats, seafoods, poultry, vegetables, or fruits
- Bake meats, seafoods, poultry, vegetables, or fruits
- Oven fry meats, seafoods, poultry, or vegetables
- Test cooked foods by taste or smell

Within this cluster, four major jobs were identified. The largest job involved cooks who worked in the typical base dining hall. Most of these personnel identified themselves as "Cook" "First Cook," "Shift Leader," or "Shift Supervisor." Typical tasks involved the preparation of breakfast, lunch, or dinner meals, the ordering or receiving of subsistence from the storeroom, setting up serving lines, and serving food. A second job involved cooks who worked in launch control facility (LCF) kitchens at various missile bases. These cooks generally performed the same tasks performed by those working in the base dining hall. A third job identified was that of In-Flight Kitchen Cooks. This job differed from the typical dining hall cooks job in that these personnel are more involved with flight, alert, or Iron Eagle food service activities. Distinguishing tasks performed by these members include:

- assemble flight meals
- assemble box lunches
- assemble ground meals
- package sandwich meals
- distribute individual meals, such as box lunches, ground meals,
or flight meals

The fourth job within this cluster was that of Bakers. These personnel, although performing some of the same tasks as dining hall cooks, were distinguished from other cooks in that they specialized in baking or pastry functions. Differentiating tasks for personnel in this job included:

- bake breads or pastries, other than prepackaged mixes
- prepare pies
- prepare puddings or custards
- prepare yeast dough for baking
- prepare bread, rolls, or cakes from prepackaged mixes

decorate cakes
prepare quick breads
design cake decorations

Ninety-five percent of the job incumbents in this cluster hold either a 3- or 5-skill level, with 77 percent being in paygrade E-4 or below. Respondents in this cluster are the least experienced of any identified job group, averaging only 62 months TAFMS. Fifty-one percent are in their first enlistment (see Table 4).

II. STOREROOM (STG324). The 234 members of this job represent 7 percent of the survey sample. Most of these members work in the dining facility where they order subsistence and issue needed supplies to the dining hall. Sixty-five percent of their time is spent performing supply and storeroom activities. Representative tasks performed by members of this job include:

Issue subsistence
Inventory subsistence
Inspect incoming stock or property for quantity or condition
Post inventories to records
Place subsistence in storage
Monitor expiration dates of dairy products
Prepare foods for thawing
Verify accuracy of inventories

The task modules for this job show members work primarily with subsistence, spending 53 percent of their job time on the 24 tasks comprising the subsistence task module. Representative task modules include:

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0012	Subsistence	24	78	53
0013	Stock Control	4	52	4

Members of this job primarily hold the 5-skill level (64 percent), with 96 percent having a paygrade of E-5 or below. Thirty-seven percent are in their first enlistment, with members having an average of 73 months time in service.

III. ACCOUNTANTS (STG048). The 50 members of this job represent only 2 percent of the survey sample. Performing an average of only 28 tasks, members of this rather specialized job perform essentially no food preparation, cooking, or serving tasks. Fifty-four percent of their job time is spent performing administrative and support activities, and 22 percent is spent receiving and disbursing cash. Representative tasks performed by members of this job include:

Accountants

- Prepare cash collection vouchers
- Reconcile cash collections with headcount tallies using AF Forms 79 (Cash Collection Record)
- Prepare cash collection records
- Prepare basic daily food allowance computation forms
- Prepare monthly monetary records
- Prepare registers of cash collection sheets
- Count cash
- Reconcile cash collections with headcount tallies using cash register reports
- Maintain records on meal card control activities

As for predominant task modules for this job, two modules dealing with cash collections and cash funds head the list:

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent of Members Performing</u>	<u>Percent Time Spent</u>
0015	Cash Collections	11	64	35
0017	Cash Funds	18	26	18
0013	Stock Control	4	9	1

Members of this job are largely 5-skill level personnel (82 percent), with 92 percent being in paygrades E-5 and below. Only 22 percent are in their first enlistment, and they average 80 months time in service.

IV. MANAGERS (STG051). The 56 members of this job represent 2 percent of the survey sample. Members in this job are senior-level personnel who primarily manage functions within the career field. Typical job titles include Food Services Superintendent; Food Service Manager; Chief, Plans Force Management Flight; Lodging Manager; Senior Enlisted Manager; Chief of Services; Lodging Superintendent; and Training Manager. Fifty-one percent of their job time is spent organizing and planning (Duty A). Only 39 percent indicated they directly supervise other personnel. The job performed by these members is extremely specialized, averaging only 20 tasks. This is the lowest number of tasks performed of any job identified. Representative tasks performed include:

Managers	
Number of members	56

 Determine budget or financial requirements
 Determine requirements for space, personnel, equipment, or supplies
 Plan or prepare briefings
 Assign personnel to duty positions
 Coordinate contingency exercises with appropriate agencies
 Conduct staff assistance visits

The predominant task module for this job, shown below, relates to supervision and management, with job members spending 44 percent of their job time on the 31 tasks within that module.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0007	Supervision and Management	31	24	44
0008	Contingency Planning	6	20	7
0009	Training	20	4	4

This is the second most experienced group identified, averaging 181 months time in service. Seventy-two percent hold either a 7- or 9-skill level. Seventy-five percent are in the paygrade of E-6 and above.

V. SUPERVISORS AND SUPERINTENDENTS (STG088).

The 335 members of this job represent 10 percent of the survey sample. Unlike the Managers job discussed above, members of this job are primarily supervisors. Eighty-one percent indicate they supervise others (compared to only 39 percent for the Managers group). Sixty-nine percent of their job time is spent on duties involving organizing and planning, directing and implementing, inspecting and evaluating, and training (see Table 3, Duties A, B, C, and D). Common job titles include Food Service Supervisor, Dining Hall Supervisor, NCOIC Dining Facility, Asst Dining Hall Supervisor, In-Flight Kitchen Supervisor, NCOIC Flight Kitchen, NCOIC Lodging, and Food Service NCOIC. Representative tasks performed by members of this job include:

Supervisors and Supts

Determine work priorities
 Write EPRs
 Write recommendations for awards or decorations
 Counsel subordinates on personal or military-related matters
 Assign personnel to duty positions
 Plan or schedule work assignments or priorities
 Orient newly assigned personnel

As with the Managers job above, the predominant task module for this job relates to supervision and management, with other modules relating to OJT training and civilian supervision.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0007	Supervision and Management	31	64	32
0009	Training	20	30	10
0016	Menus and Recipes	12	34	5
0008	Contingency Planning	6	27	2
0010	Civilian Supervision	9	22	2

This is the most experienced job identified, averaging 186 months time in service. Eighty percent of these members hold either a 5- or 7-skill level, with only 18 percent holding the 9-skill level. Predominant paygrades range from E-5 through E-8.

VI. CONTINGENCY (STG214). The 103 members of this job account for 3 percent of the survey sample. Forty-seven percent of their time is spent performing contingency activities. Another 34 percent of the job time is spent in supervisory duties (see Table 3, Duties A, B, C, and D). Representative tasks performed by personnel in this job include:

- Set up or dismantle M-2 burners
- Perform user maintenance on M-2 burners
- Set up or break down mobile kitchen trailers (MKTs)
- Assemble or disassemble general purpose medium tents
- Set up or dismantle M-59 field ranges
- Perform user maintenance on M-59 field ranges
- Perform military field sanitation and hygiene techniques
- Prepare field kitchen burner units for use

Contingency	
Number of members	103
Percent of total sample	3%
Average number of tasks performed	86
Average TAFMS	133 mos
Percent in First Enlistment	5%
Percent with 1-12 Months TICF	4%

This is a very specialized job group, with the largest percentage of time being spent on the Contingency task module, as shown below.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0030	Contingency	23	80	36
0008	Contingency Planning	6	44	4
0031	Field Mortuaries	5	58	4
0032	Field Kitchen Waste Disposal Pits	4	35	2
0009	Training	20	30	8
0033	Search and Recovery	19	20	3

Very few of these incumbents are in their first enlistment (5 percent). Their average time in service is 133 months. Ninety-one percent hold either the 5- or 7-skill level and are in paygrades E-4 through E-7.

VII. SEARCH AND RECOVERY (STG153). The 16 members of the Search and Recovery job represent less than 1 percent of the survey sample. Twenty-six percent of their job time is spent performing search and recovery of accident victims, 16 percent is spent performing contingency activities, and 35 percent is spent on supervisory duties. Representative tasks performed by members of this job include:

Search and Recovery	
Number of members	16
Percent of total sample	Less than 1%
Average number of tasks performed	46
Average TAFMS	145 mos
Percent in First Enlistment	5%
Percent with 1-12 Months TICF	0%

Stake, bag, and tag human remains
 Collect and tag personal effects of accident victims
 Brief search and recovery teams
 Train search and recovery teams
 Maintain search and recovery kits
 Maintain search and recovery team member folders
 Maintain or update grid maps
 Initiate identification processing by fingerprinting human remains

Again, this job is highly specialized, with the search and recovery task module being very predominant.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent of Members Performing</u>	<u>Percent Time Spent</u>
0033	Search and Recovery	19	65	26
0008	Contingency Planning	6	30	4
0030	Contingency	23	26	13
0031	Field Mortuaries	5	24	3
0009	Training	20	20	10
0035	Mortuary Affairs	47	10	9

Sixty-two percent of these members hold the 5-skill level, but average 145 months time in service. Predominant paygrades are E-5 and E-6. Only 6 percent are in their first enlistment and very few supervise other subordinates.

VIII. MORTUARY AFFAIRS (STG136). The 51 members of this job represent 2 percent of the survey sample. Members of this senior-level job spend 51 percent of their job time managing mortuary affairs duties, 10 percent performing contingency activities, and 8 percent performing search and recovery of accident victims. Much of the job involves tasks associated with protocol and maintaining various forms and documents, such as death certificates, disposition of personal property, and cemetery registers. Also included in this job are members of the Honor Guard. Representative tasks performed by personnel in this job are:

Mortuary Affairs	
Number of members	51
Percent of total sample	2%
Average number of tasks performed	84
Average TAFMS	162 mos
Percent in First Enlistment	2%
Percent with 1-12 Months TICE	0%

Prepare status of human remains messages or reports
 Maintain mortuary affairs equipment or supplies
 Furnish burial clothing, insignia, or equipment for deceased military personnel
 Complete current deaths checklists
 Brief next-of-kin on interment or mortuary services provided
 Prepare requests for travel orders for special details, such as escorting human remains or briefing next-of-kin
 Coordinate releases or transfers of human remains to funeral homes
 Evaluate eligibility of individuals for mortuary benefits

The top three task modules for this job group are listed below. Forty-two percent of the job time is spent on tasks in the Mortuary Affairs task module.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0035	Mortuary Affairs	47	66	42
0034	Honor Guard	6	61	7
0008	Contingency	6	40	4

Members of this job group show a high level of experience, averaging 162 months TAFMS. Members hold primarily the 5- or 7-skill level, with paygrades ranging from E-4 through E-7.

IX. DORM MANAGERS (STG091). The 45 members of this group represent only 1 percent of the survey sample. This function was designated for deletion from this AFSC effective in October of 1994. Primary duties of these job incumbents are in the areas of performing dormitory management activities (43 percent), performing general MWRS activities (12 percent), and organizing and planning (12 percent). Representative tasks performed by personnel in the job are:

Dorm Managers	
Number of members	45
Percent of total sample	1%
Average number of tasks performed	45
Average TAFMS	141 mos
Percent in First Enlistment	6%
Percent with 1-12 Months TICF	0%

Report to BCE customer service units work requirements related to buildings and installed equipment
Brief first sergeants and squadron commanders on problem areas
Establish or maintain locator boards for dormitory occupants
Report occupancy status to billeting operations or services offices
Assign detail personnel to maintain dormitory grounds and parking areas
Brief detail personnel on areas of work responsibility
Establish housekeeping standards for dormitory occupants
Issue confirmations of clearance to members upon termination

This is also a very specialized job, with 43 percent of the job time spent in one task module (dorm management).

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0038	Dorm Management	17	75	43
0007	Supervision and Management	31	28	17
0014	Supply	8	17	2

Members of this job primarily hold a 5-skill level (71 percent), with only 6 percent being in their first enlistment. Most members are in paygrades E-4 through E-6, and have an average of 141 months time in service.

X. QUALITY ASSURANCE EVALUATORS (QAE)
(STG067).

The 76 members of this job account for 2 percent of the survey sample. The job involves monitoring of contractors for compliance with contracts, documenting contractor defects, and preparing much of the paperwork required in establishing or monitoring contracts. Much of the job time is spent in performing quality assurance evaluator (QAE) activities (48 percent) and performing administrative and support activities (8 percent). Representative tasks performed by personnel in this job are:

Quality Assurance Evaluator (QAE)	
Number of members	76
Percent of total sample	2%
Average number of tasks performed	40
Average TAFMS	127 mos
Percent in First Enlistment	9%
Percent with 1-12 Months TICF	3%

Evaluate contractor personnel for compliance with performance or work standards
 Evaluate contractors with compliance with contracts
 Evaluate sanitation practices
 Document contractor defects
 Prepare contracting monthly QAE evaluation schedules
 Evaluate quality control or quality assurance procedures
 Coordinate contract issues with appropriate agencies
 Prepare CDRs

The two major task modules for this job are listed below. Not surprisingly, the top module involves contracts and contractors.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0011	Contracts and Contractors	19	68	48
0007	Supervision and Management	31	18	31

Most of the personnel in this job hold either a 5-skill level (64 percent) or a 7-skill level (34 percent), and average 127 months time in service. Very few members are in their first enlistment. Most are in paygrades E-4 through E-7.

XI. LINEN EXCHANGE (STG130). The 52 members of this job account for 2 percent of the survey sample. The primary function of this job is the operation of base linen exchange activities. This involves not only the receiving and dispensing of linen exchange items, but also the maintenance of supply accounts and monitoring of linen exchange-related contracts. Representative tasks performed by personnel in this job are:

- Identify and remove worn or torn linens from inventories
- Exchange linen with authorized customers
- Maintain hand receipts or accountable records on linen exchange items
- Receive organizational clothing, such as parkas or flight suits, for cleaning
- Exchange linen with laundry or dry cleaning contractors
- Verify authorized items of linen exchange
- Bag or bundle laundry or dry cleaning items
- Review laundry or dry cleaning contracts

Linen Exchange	
Number of members	52
Percent of total sample	2%
Average number of tasks performed	44
Average TAFMS	94 mos
Percent in First Enlistment	25%
Percent with 1-12 Months TICF	6%

Representative task modules show the work almost exclusively deals with linen exchange duties and contracts and contractors.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0037	Linen Exchange	33	53	55
0011	Contracts and Contractors	19	27	11

These members primarily hold a 5-skill level (62 percent) or a 3-skill level (32 percent), and are predominantly in paygrades E-4 or E-5. Twenty-five percent are in their first enlistment. Average time in service is 94 months.

XII. FITNESS AND RECREATION (STG061). The 505 members of this job account for 15 percent of the survey sample. This job represents the second largest job within the career ladder, behind Cooks. This rather large and diverse job involves managing fitness, sports, and athletic programs, and running community activity centers. Many of the members work in fitness centers or base gymnasiums, community activity centers, and various base clubs. They also work outdoors maintaining ballfields or outdoor recreation areas. Primary duties performed include performing general MWRS activities (31 percent), receiving and disbursing cash (18 percent), and managing Air Force fitness and athletic programs (14 percent). Representative tasks performed by personnel in this job are:

Fitness and Recreation	
Number of members	505
Percent of total sample	15%
Average number of tasks performed	92
Average TAFMS	106 mos
Percent in First Enlistment	24%
Percent with 1-12 Months T1CF	7%

Count cash
 Perform patron identification (ID) checks
 Monitor MWRS facilities, such as base gyms or TV rooms
 Handle customer complaints
 Assign lockers to patrons
 Clean or launder athletic uniforms or towels
 Instruct patrons on proper use of equipment
 Inspect barbells, weights, or other exercise equipment
 Certify patrons qualified to use MWRS equipment, such as nautilus or hobby shop equipment

Representative task modules for this job are listed below. The task modules reflect a broad job that can range from working in the gym to handling money or dealing with sports and athletic or physical fitness programs.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0023	Gym Duties	10	47	9
0019	General MWRS Functions	8	56	7
0017	Cash Funds	18	46	12
0024	Ballfield Maintenance	4	32	2
0021	Sports or Athletic Programs	23	33	9
0025	Physical Fitness Programs	4	23	1
0007	Supervision and Management	31	31	8

Although 62 percent of the job members hold the 5-skill level, members also hold a 3- or 7-skill level (see Table 4). Predominant paygrades involve E-7 and below. Twenty-four percent are in their first enlistment, with group members averaging 106 months time in service.

XIII. LODGING (STG050). The 350 members of this job account for 11 percent of the survey sample. Primary duties performed by job incumbents include operating lodging activities (52 percent) and receiving and disbursing cash (22 percent). Representative tasks performed by personnel in this job are:

- Assign temporary or contract quarters
- Perform checkout procedures
- Confirm or deny reservations
- Provide wake-up service
- Relay messages, mail, or lost luggage to assigned occupants or guests
- Operate telephone switchboards
- Prepare authorization forms for contract quarters
- Inform housekeeping personnel of checkouts

Percent of total sample	11%
Average number of tasks performed	51
Average TAFMS	87 mos
Percent in First Enlistment	30%
Percent with 1-12 Months TICF	8%

As with many of the jobs within this career ladder, the Lodging job is very specialized. The predominant task module describing the job is lodging desk functions.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0028	Lodging Desk Functions	14	77	35
0017	Cash Funds	18	37	16

Members of this job are basically younger members of the career field, with 86 percent holding a 3- or 5-skill level (see Table 4). Sixty-nine percent hold a paygrade of E-4 or E-5. Average time in service is 87 months, with 30 percent being in their first enlistment.

XIV. SIMS ADMINISTRATOR (STG046). The 130 members in this job are involved with computers and the Services Information Management System (SIMS). Seventy-two percent of their time is spent performing SIMS administrator activities. Many of their tasks involve troubleshooting computer problems and working with the computer mainframe. Typical tasks performed by these members include:

- Add personnel to security or Wang offices
- Backup software
- Troubleshoot printer problems
- Perform full-volume backups or restores
- Re initial-program-load (IPL) services information management systems (SIMS)
- Load system software releases or updates
- Update system information, such as system users or passwords
- Troubleshoot hardware problems, other than printers

SIMS Administrators	
Number of members	130
Percent of total sample	4%
Average number of tasks performed	64
Average TAFMS	117 mos

Representative task modules show the work is almost exclusively involved with the SIMS function.

<u>TM</u>	<u>Module title</u>	<u>No. of Tasks</u>	<u>Average Percent Members Performing</u>	<u>Percent Time Spent</u>
0029	SIMS	32	85	51
0007	Supervision and Management	31	18	8

Incumbents in this job are somewhat experienced personnel, averaging 117 months in service. Only 9 percent are in their first enlistment. Most hold either a 5- or 7-skill level, with 73 percent having a paygrade of E-4 or E-5.

Comparison to Previous Survey

The results of the specialty job analysis were compared to the last three OSRs for Food Service (AFPT 90-622-405, dated September 1980), Services (AFPT 90-611-524, dated June 1986), and Fitness and Recreation (AFPT 90-741-564, dated December 1987). Table 5 lists the jobs identified in the current study and their equivalent jobs from the three OSRs listed above.

Overall, there has been no appreciable changes in jobs performed by personnel in each of the three areas involved (food service, services, and fitness and recreation). Most jobs identified in the three separate OSRs were identified in the current study. This finding indicates that when the three AFSCs were consolidated into the one AFSC of 3M0X1, the various jobs were retained as separate jobs and were not consolidated or merged to create a less diverse AFSC structure.

There were, however, several jobs identified in the current study that were not specifically identified in any of the previous studies. These jobs included Search and Recovery, Contingency, and SIMS Administrators.

ANALYSIS OF DAFSC GROUPS

An analysis of DAFSC groups, in conjunction with the analysis of the career ladder structure, is an important part of each occupational survey. The DAFSC analysis examines differences in tasks performed between skill levels. This information may then be used to evaluate how well career ladder documents, such as AFMAN 36-2108 *Specialty Descriptions*, reflect what career ladder personnel are actually doing in the field.

The distribution of AFSC 3M0X1 skill-level groups across career ladder jobs is displayed in Table 6. Although personnel across the various skill-levels perform a wide variety of jobs, a clear pattern of job progression is noted. These progression patterns will be discussed in more detail in the following section.

Table 7 offers another perspective by displaying relative time spent on duties across skill level groups. Members across the 3- and 5-skill levels spend the majority of their time performing technical tasks. At the 7-, 9-, and CEM skill levels, personnel begin to perform more supervisory and management duties.

Skill-Level Descriptions and Comparisons

DAFSC 3M031.

Three-skill level personnel spend 40 percent of their job time cooking foods, preparing serving lines, or serving foods. Fifty-four percent grouped in the Cooks job, 16 percent were in the Fitness and Recreation job, 10 percent were in Lodging, and 9 percent fell into the Storeroom job. Examples of tasks DAFSC 3M031 airmen are likely to perform are listed in Table 8. Not surprising, most are food-related.

DAFSC 3M051.

Five-skill level members perform a wider variety of jobs than those at the 3-skill level. Whereas 54 percent of 3-skill level personnel grouped in the Cooks job, only 29 percent of 5-skill level personnel fell into that job group. Many members at this skill level are now beginning to branch out into many of the other areas of the Services career ladder, such as the SIMS Administrator, Accountant, QAE, Contingency, Dorm Manager, and Mortuary Affairs jobs. Also, the percentage of 5-skill levels working in the Fitness and Recreation job area is higher than at the 3-skill level (see Table 6).

Examples of tasks these airmen are likely to perform are found in Table 9. The wider diversity of jobs performed at this level is clearly reflected by the percent members performing the various tasks. With only 38 percent performing the top task "Count Cash," it is quite evident that 5-skill levels are not performing many tasks in common across the many jobs in which they work.

DAFSC 3M071.

Seven-skill level personnel tend to hold both technical and supervisory jobs, as seen in Table 6. Thirty-two percent are found in the Supervisor and Superintendent job, with smaller percentages found in most of the other 13 job groups. The percentage of 7-skill level members working in the Cooking and Storeroom jobs decreases quite dramatically, while increases in the percentages can be seen in the Manager, Contingency, Mortuary Affairs, and QAE jobs. A fairly high percentage of 7-skill levels (16 percent) is still working in the Fitness and Recreation job.

Examples of tasks 7-skill level airmen are likely to perform are listed in Table 10. These tasks are primarily supervisory and training tasks. Due to the wide diversity of job-specific tasks performed among the nonsupervisory jobs, none of these tasks appear in the list of top tasks. This again reflects the wide diversity of work being performed within the career ladder.

DAFSC 3M091.

Unlike their counterparts in the lower skill levels, 9-skill level members primarily function as supervisors of the career field. Sixty-one percent of the members were found in the Supervisors and Superintendents job group, compared to only 32 percent of the 7-skill level members. Smaller percentages were found in the Manager, Fitness and Recreation, and Contingency jobs. As seen in Table 7, 73 percent of their job time is spent on supervisory duties (Duties A through D). Commonly performed tasks are listed in Table 11. As would be expected, all are supervisory-related tasks.

DAFSC 3M000.

The final skill level group examined is the DAFSC 3M000 group. The 26 members in our survey sample clearly have the role of manager and supervisor. Sixty-five percent of these senior members grouped in the Supervisor and Superintendent job, and 31 percent were found in the Manager job. None of the CEMs were found in any other job identified in the career ladder structure analysis. In addition, 86 percent of their job time is spent on supervisory duties (see Table 7, Duties A through D). Table 12 lists the tasks commonly performed by CEM personnel. This list shows a distinct supervisory and managerial nature.

Summary

In summary, a clear pattern of progression is seen in the Services specialty. Members at the 3-skill level tend to work primarily in the Cooking function, with members also filling some fitness and recreation or lodging jobs. At the 5-skill level, job possibilities open up sharply, with members moving away from the cooking area and going to work in any one of nine other areas. This broadening of job experience continues into the 7-skill level, with an increase in personnel working in supervisory jobs. It is only at the 9-skill level or the CEM level that the job of a Services incumbent clearly becomes that of a supervisor or manager, with very little, if any, technical work being performed.

AFMAN 36-2108 *Specialty Description Analysis*

Survey data were compared to the AFMAN 36-2108 *Specialty Description* for Services personnel, effective 31 October 1993. The overall specialty description for the 3-, 5-, 7-, 9-, and CEM-skill levels was generally accurate, depicting both the technical and managerial and supervisory responsibilities previously described in the DAFSC analysis. The description also captures in a broad sense the primary responsibilities of members in the 14 jobs identified by the job structure analysis process.

TRAINING ANALYSIS

Occupational surveys provide information that can be useful in the development and revision of relevant training programs. Primary factors used in this study to evaluate entry-level training include jobs being performed by personnel during their first 12 months out of tech training (i.e., those with 1-12 months Time in Career Field (TICF)), jobs performed by personnel during their first enlistment (1-48 months TAFMS), and relative task difficulty ratings. As mentioned earlier, training emphasis ratings are not available for this specialty due to the wide diversity of jobs within the career ladder and a general lack of agreement among career ladder personnel as to what tasks to train.

Task Difficulty Data

Task difficulty (TD) data can help training development personnel decide which tasks to train in entry-level training. TD ratings, based on the judgments of senior career ladder NCOs at operational units, provide a rank-ordering of tasks by the relative difficulty of those tasks. When combined with data on the percentages of first-enlistment personnel performing tasks, comparisons can be made to determine if training adjustments are necessary. For example, tasks receiving high TD ratings, accompanied by moderate to high percentages of first-enlistment personnel performing, may warrant resident training. Those tasks receiving high TD ratings, but low percentages performing, may be more appropriately planned for OJT programs. Low TD ratings may highlight tasks best omitted from training for first-enlistment personnel. These decisions must be weighed against percentages of personnel performing the tasks, command concerns, and criticality of the tasks.

As explained in the introduction, no TE data are reported in this survey due to insufficient rater agreement. The Services career field is extremely diverse, with almost no overlap in tasks performed across jobs. Consequently training needs are highly dependent upon specific job needs.

Table 13 lists the tasks with the highest TD ratings. The majority of these tasks deal with performing SIMS administrator activities, mortuary affairs functions, and supervisory duties. Most of these functions are performed by senior level incumbents, with low percentages of first-job, first-enlistment, 5-, and 7-skill level members performing these tasks.

First-Enlistment Personnel Analysis

In this study, there are 976 AFSC 3M0X1 members in their first enlistment (1-48 months TAFMS), representing 30 percent of all surveyed AFSC 3M0X1 personnel. The majority of first-enlistment members work in the Cooks job (53 percent), with another 9 percent working in the Storeroom job (see Figure 2). In addition, 16 percent work in the Recreation and Fitness job,

and 11 percent work in the Lodging job area. The remaining first-enlistment personnel are scattered across several of the remaining jobs identified in the career ladder structure analysis. These included such jobs as Accountant, Linen Exchange, and SIMS Administrator.

First-Enlistment Personnel Jobs

Figure 2

Not surprising, when looking at the relative percent time spent across duties, Table 14 shows first-enlistment personnel spend approximately 39 percent of their time performing technical duties relating to cooking foods, preparing serving lines, or serving foods. They also spend four percent of their time performing flight, alert, or Iron Eagle food service activities. Table 15 displays representative tasks performed by first-enlistment AFSC 3M0X1 personnel. The diversity of jobs being performed by all first-enlistment personnel can be seen in the low percent members performing the tasks listed. As expected, all tasks shown relate to cooking.

1-12 Month TICF Analysis

At the request of the tech school, an analysis was also conducted as to what jobs personnel went into after graduation from the basic Services course. This analysis was extremely helpful in evaluating how the school curriculum should be structured. Per considerations made at the time of the original merger of Food Service and Services functions in 1988, training in the 3-skill level resident course was initially limited to cooking functions since most new Services personnel were to begin in the cooking arena and migrate into other jobs over time. However, due to real-world constraints and dictates, it was not possible for everyone coming out of the school house to be assigned to a food service facility. Thus, some graduates of the course wound up in lodging or other jobs. With the additional merger of fitness and recreation functions into the AFSC, the need to add additional training on these functions became a major consideration. The overall problem for career field managers was how to proportion out the training across the various functions where first-job personnel would be working. Thus, data from this occupational survey became extremely useful in identifying job areas where personnel were being assigned after tech school and identifying corresponding tasks being performed. Data concerning these issues were presented at the Services Utilization and Training Workshop held 11-14 October 1994 in San Antonio, Texas. A summary of that workshop is presented later.

Table 16 displays general information relating to the 306 Services personnel with 1-12 months TICF. As can be seen, the majority (64 percent) are in paygrade E-2. Eighty-seven percent hold the 3-skill level. Sixty-four percent indicated they had completed the resident tech training course.

As to the jobs or work areas where these incumbents worked, Table 16 also provides data on the work title of these personnel, as well as their work area. As shown, 26 percent said they held the job title of "First Cook." However, this is misleading, since 32 percent indicated "Other" as their work title. In reviewing the write-in sheets of these personnel, many indicated other variations related to "Cook." Thus, the actual percentage of personnel who had a title relating to "Cook" is much higher.

As for work area, 64 percent of the 1-12 month TICF respondents indicated a work area relating to food service. These included such areas as alert kitchen, dining hall, field kitchen, in-flight kitchen, launch control facility kitchen, missile site feeding operations, pastry kitchen, and site kitchen. The storeroom area is closely related to food service and accounted for 4 percent of the respondents. Another 15 percent indicated their work area as fitness and recreation. This included athletic office, community activity center, fitness center, MWRS equipment rental, outside maintenance crew, and ticket and tour operations. Another 10 percent indicated lodging as their work area.

From the above data, it would seem appropriate that training in the 3-skill level resident course would closely follow these percentages: Food Service (68 percent), which would include storeroom functions; Fitness and Recreation (15 percent); and Lodging (10 percent).

Services Utilization and Training Workshop (U&TW)

11-14 October 1994

As mentioned earlier, data from this occupational survey were used to support a Services U&TW in October 1994. The purpose of the U&TW was to discuss career field training needs for the Services career field. Representatives from every major command reviewed the Specialty Training Standard (STS) for AFSC 3M031 and data from this occupational survey. Survey data, compiled in the form of a special data package, were provided to workshop participants and included information relating to survey sample, job structure, skill level progression, first-job and first-enlistment personnel utilization, and job satisfaction.

Based on the review of the OSR data, the U&TW focus groups concluded the following apprentice training areas required change:

- (1) Food service storeroom training, utilizing SIMS, needed strengthening
- (2) Increased training, at performance levels, was required for front desk and reservation operations in lodging
- (3) Apprentice training in fitness and sports required a major overhaul. In the current course, this area was taught to familiarization levels only and did not match career field utilization rates or needs
- (4) After review of the detailed task lists for Fitness and Recreation, the group concluded that the majority of tasks performed were either fitness or sports related. Tasks associated with recreation were deemed inappropriate for training in the resident course. Furthermore, recreation training in the 5-and 7-skill level career development courses (CDCs) will be deleted over the next 3 to 5 years.

The STS for the 3-skill level resident course was reviewed for adequacy and compliance with the OSR findings. As noted above, changes were made based on the recommendations of the focus groups.

JOB SATISFACTION ANALYSIS

An examination of responses to the job satisfaction questions can be very useful for career ladder managers as they attempt to determine possible factors affecting job performance of career ladder airmen. The survey booklet included questions covering job interest, perceived utilization of talents and training, sense of accomplishment from work, and reenlistment

intentions. The responses of the current survey sample were then analyzed by making several comparisons: (1) among TAFMS groups of the AFSC 3M0X1 career ladder; (2) between current and previous survey TAFMS groups; and (3) across specialty job groups.

Table 17 shows the comparison of TAFMS group data of AFSC 3M0X1 personnel. Overall, job satisfaction for all three TAFMS groups is satisfactory. First-enlistment personnel tend to reflect the lowest satisfaction of the three groups displayed. As personnel gain experience in the Services career ladder, their job interest tends to increase across all indicators.

An indication of changes in job satisfaction perceptions within the career ladder is provided in Table 18, which presents TAFMS group data for current survey respondents and data from respondents to the previous surveys of the Food Service, Services, and Recreation and Fitness career ladders. Overall, job satisfaction over time shows mixed results. For example, most indicators reflect a higher job satisfaction today than was seen in the 1980 Food Service survey, but in many instances shows a drop when compared to the 1986 Services and 1987 Fitness and Recreation surveys.

An examination of job satisfaction data across the various jobs in the current survey can be extremely useful to career ladder managers. Table 19 presents job satisfaction data for the major jobs identified in the career ladder structure for AFSC 3M0X1. The jobs showing the lowest job interest were the Linen Exchange, Cooks, Dorm Manager, and Storeroom jobs. The jobs with the highest job interest were the SIMS Administrator, Contingency, and Mortuary Affairs jobs. Perceived use of training was lowest for the Dorm Manager and Linen Exchange jobs. Sense of accomplishment from the job was lowest for the Cooks and Linen Exchange jobs.

IMPLICATIONS

From the standpoint of data gathered during this OSR, the AFSC 3M0X1 career ladder structure reflects a wide diversity and variety of jobs performed by career ladder members. Almost 40 percent of career ladder members spend their time in the Food Service or Storeroom areas. The other large jobs being performed within the career ladder included Fitness and Recreation and Lodging. Other members either work in a supervisory or management job or in one of several specialized jobs. Despite the diversity of work found in the career ladder, job progression shows a distinct pattern as one moves from the 3-skill level to the 9-skill and CEM levels. The AFMAN 36-2108 *Specialty Description* broadly describes the jobs performed. Job satisfaction is fairly good for career ladder incumbents, with only a few weak areas noted. The October 1994 Services U&TW reviewed the 3-skill level STS against the OSR data and made appropriate changes in the resident school training program.

APPENDIX B

LISTING OF MODULES AND TASK STATEMENTS

THIS PAGE INTENTIONALLY LEFT BLANK

These task modules (TMs) were developed to organize and summarize the extensive task information for the 3M0X1 specialty. The TMs were derived by statistical clustering of the tasks in terms of which tasks are performed by the same incumbents. For example, if an individual performs one cooking task or one lodging task, the probability is very high that the individual will perform other cooking or lodging tasks. Thus, each of the modules can be viewed as a "natural group" of associated or related tasks. The statistical clustering generally approximates these "natural groupings."

The title of each TM is our best estimate as to the general subject content of the group of tasks. The TMs are useful for organizing the task data into meaningful units and as a way to concisely summarize the extensive job data. However, TMs are only one way to organize the information. Other strategies may also be valid.
