SUMMARY TABLES

Table 1.	Summary of aircraft departures, enplaned revenue passengers, and enplaned revenue tons of cargo and mail by type of service, by carrier group, and by air carrier	1–1
Table 2.	Summary of aircraft departures, enplaned passengers, and enplaned revenue tons of cargo and mail by type of service, by state and U.S. Area	2–1
Table 3.	Aircraft departures, enplaned revenue passengers, and enplaned revenue tons of cargo and mail in total operations, all services at large air traffic hubs	3–1
Table 4.	Aircraft departures, enplaned revenue passengers, and enplaned revenue tons of cargo and mail in total operations, all services at medium air traffic hubs	4–1
Table 5.	Aircraft departures, enplaned revenue passengers, and enplaned revenue tons of cargo and mail in total operations, all services at small air traffic hubs	5–1

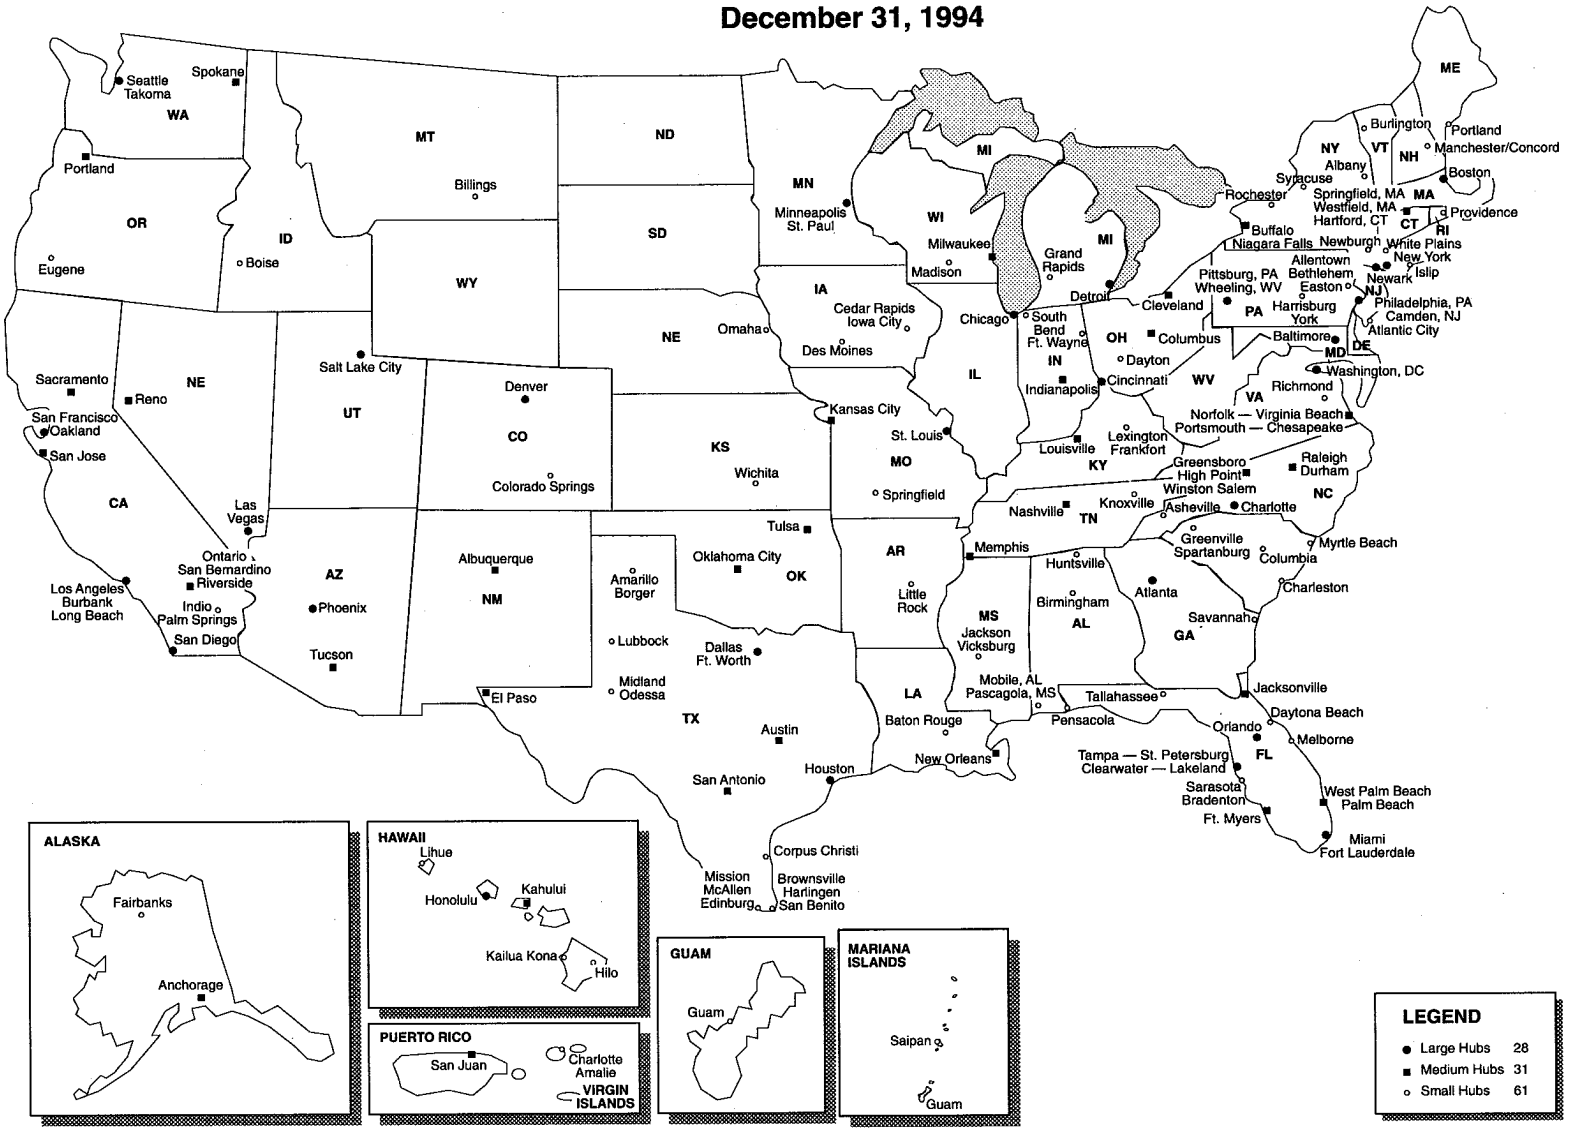
DETAILED TABLES

Table 6.	Enplaned revenue passengers, enplaned tons of cargo and mail, and air traffic hub classifications, by type of service, by community, and by carrier	6–1
Table 7.	Aircraft departures scheduled and aircraft departures performed, by aircraft type, by community, and by carrier	7–1

DISTRIBUTION: ZMS–348A

Air Traffic Hubs

December 31, 1994



FAA Air Hubs–Map Disk

INTRODUCTION

Beginning with the publication ending calendar year 1993, all scheduled and nonscheduled service traffic statistics performed by large certificated U.S. air carriers are presented. Prior to that year, only scheduled and some nonscheduled emplanements for scheduled air carriers were included; no emplanements were included for nonscheduled service air carriers (charter service only).

There were also changes in this publication due to the T–100 data collection system for U.S. air carriers which began January 1, 1990. The format was changed to comply with 14 CFR 241.19.6 that the restrict public disclosure of T–100 detail and summary international data. Non U.S. airport data does not appear. Data are no longer broken out by domestic or international operations at airports, only system operations are shown.

This edition presents the volume of revenue passenger, freight, and mail traffic handled by the nation's large certificated air carriers at each airport served during the 12 months ending December 31, 1994. In addition, a presentation of aircraft departures is shown including detail by aircraft type for total departures performed in scheduled, nonscheduled, and all services.

Large certificated air carriers hold Certificates of Public Convenience and Necessity issued by the Department of Transportation (DOT) authorizing the performance of air transportation. Large certificated air carriers operate aircraft with seating capacity of more than 60 seats or a maximum payload capacity of more than 18,000 pounds. Data for commuter, intra-state, and foreign-flag air carriers are not included in this publication.

SOURCE OF DATA

The data in this publication are compiled from information reported to the DOT by the large certificated air carriers on Schedules T–100 and T–3, RSPA Form 41, Uniform Systems of Accounts and Reports for Large Certificated Air Carriers.

PRESENTATION OF DATA

The data in this publication are presented in seven tables. The first two tables contain summary data by type of service for carrier groups and individual air carriers and summary figures by area and state. Tables, 3, 4, and 5 show activity in air carrier system operations at large, medium, and small air traffic hubs. The last two tables in the publication present detailed statistics by community and airport. In addition, the last table has a presentation of total aircraft departures performed by specific aircraft type. In this table, an asterisk printed to the left of the aircraft designation denotes that the statistics shown relate to all cargo service.

In Tables 6 and 7, each community is listed under the state in which it is located without regard to the location of the airport. Cincinnati, Ohio, for example, is shown under Ohio although the Greater Cincinnati Airport is located in Covington, Kentucky. An exception to this policy occurs in those cases where a hyphenated point shown in a Certificate of Public Convenience and Necessity is serviced by a single airport and a state line separates the communities named. In those cases, the data are listed under the state in which the airport serving the communities is located. For example, Quincy, Illinois/Hannibal, Missouri, is a hyphenated point. Since the airport is located in Quincy, Illinois, the data for both communities are shown under that city and state. In this publication, some community groupings have been made in accordance with the Federal Aviation Administration's (FAA's) concept of the air traffic hub structure. (See AIR TRAFFIC HUBS.)

AIR TRAFFIC HUBS

DEFINITION

The air traffic structure was developed by the FAA and is used to measure the concentration of all civil air traffic. The hub structure is FAA's principal operations control and the fundamental control for most of the FAA's economic and operations research procedure. Within this one medium are consolidated the social and economic factors that influence a community's ability to generate air carrier or general aviation traffic.

AIR TRAFFIC HUBS—Continued

Air traffic hubs are geographical areas, and are based on the percentage of total passengers enplaned in the area. A hub may have more than one airport in it. This definition of hub should not be confused with the definition being used by the airlines in describing their 'hub and spoke' route structures.

These geographical areas are the cities and Standard Metropolitan Statistical Areas (SMSA) requiring aviation services. An SMSA is a county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000 plus any contiguous counties that are metropolitan in character and have similar economic and social relationships. These metropolitan areas constitute a primary focal point for the transportation research program of the FAA, and the analyses of individual cities within an area are treated in relationship to the entire area. In those instances where two or more individually certificated communities are located in a SMSA, those communities are grouped under the SMSA definition throughout this publication.

CLASSIFICATION

Individual communities fall into four hub classifications as determined by each community's percentage of the total enplaned revenue passengers in all services and all operations of U.S. certificated route are carriers within the 50 States, the District of Columbia, and other U.S. areas designated by the FAA. Table 6 contains the type of hub for each community: 'L' (large), 'M' (medium), 'S' (small), and 'N' (nonhub). Classifications in this issue are based on 508,458,194 total enplaned revenue passengers.

The percentage and number of enplaned passengers in the hub classifications for 12 months ending December 31, 1994 are:

Hub Classification	Percent of total enplaned passengers	Number of enplaned passengers
Large (L)	1.00 or more	5,084,582 or more
Medium (M)	0.25 to 0.9999	1,271,145 to 5,084,582
Small (S)	0.05 to 0.249	254,229 to 1,271,145
Nonhub (N)	Less than 0.05	Less than 254,229

AIR TRAFFIC HUBS—Continued

HUB RESULTS

During 1994 there were 122 air traffic hubs representing 19% of the 652 air traffic hubs and nonhubs in the 50 States, the District of Columbia, and other U.S. areas receiving air carrier service during the year. The dominance of the hubs in air traffic patterns is brought out by the fact that almonst 98% of passenger enplanements were recorded at the 122 hubs. The table below shows the number of hubs/nonhubs and the number and percentage of passenger enplanements at the hubs/nonhubs.

Hub Classification	Number of Hubs/nonhubs	Number of Airports	Passengers Enplaned	Passengers Percent
Large	28	71	372,731,005	73.31
Medium	33	57	88,601,244	17.43
Small	61	75	34,443,996	6.77
Nonhub	530	562	12,681,949	2.49
TOTALS	652	765	508,458,194	100.00

CITY CROSS REFERENCE LIST

Cities not listed in alphabetic order or not specifically noted	Included in:

GLOSSARY

aircraft departure—An aircraft takeoff made at an airport.

aircraft type—A distinctive model of an aircraft as designated by the manufacturer.

airport—A landing area regularly used by aircraft for receiving or discharging passengers or cargo.

air traffic hub—Air traffic hubs are not airports; they are the cities and Standard Metropolitan Statistical Areas requiring aviation services. Communities fall into four classes as determined by each community's percentage of the total enplaned passengers in scheduled and nonscheduled service of the domestic certificated route air carriers in the 50 States, the District of Columbia, and other U.S. areas designed by the FAA. Tables 3, 4 and 5 contain the type of hub for each community; 'L' (large), 'M' (medium), 'S' (small), and 'N' (non-hub).

all services—The total of scheduled and nonscheduled transport services.

carrier group—A grouping of large certificated air carriers determined by annual operating revenues as shown below:

Carrier Group	Annual Operating Revenues
Majors	over one billion dollars
Nationals	100 million to one billion dollars
Large regionals	20 to 100 million dollars
Medium regionals	up to 20 million dollars

Certificate of Public Convenience and Necessity—A certificate issued to an air carrier under Section 401 of the Federal Aviation Act by DOT authorizing the carrier to engage in air transportation.

certificated—Holding a currently valid Certificate of Public Convenience and Necessity.

certificated air carrier—An air carrier holding a Certificate of Public Convenience and Necessity issued by DOT to engage in air transportation.

community—A city, group of cities, or a Standard Metropolitan Statistical Area receiving scheduled air service by a certificated route air carrier.

departure—See 'aircraft departure'.

domestic operation—In general, operations within and between the 50 States of the United States, the District of Columbia, American Samoa, Caroline Islands, Guam Island, Johnston Island, Marianna Islands, Midway Island, Puerto Rico, U.S. Virgin Islands and Wake Island.

enplaned passengers—The total number of revenue passengers boarding aircraft.

enplaned revenue tons of freight and mail—The number of revenue tons of freight and mail loaded on an aircraft including originating and transfer tons.

freight—Property transport by air. (Excludes mail and passenger baggage.)

hub type—See 'air traffic hub'.

hyphenated point—Basically two or more neighboring communities which, in terms of authorization shown in a carrier's Certificate of Public Convenience and Necessity, are treated as a single community.

International operations—In general, operations outside territory of the United States, including operations between the United States and foreign countries.

GLOSSARY—Continued

large air traffic hub—A community enplaning 1.00 percent or more of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the FAA. Also see 'air traffic hub'.

large regionals—See 'carrier group'.

majors—See 'carrier group'.

medium air traffic hub—A community enplaning from 0.25 to 0.99 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

medium regionals—See 'carrier group'.

national—See 'carrier group'.

nonhub—A community enplaning less than 0.05 percent of the total enplaned passengers in all services and all operations all communities within the 50 States, and District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

revenue—Pertaining to transport activities for which remuneration is received by the carrier.

revenue passenger—Person receiving air transportation from an air carrier for which renumeration is received by the carrier. Air carrier employees or other receiving air transportation against whom token service charges are levied are considered nonrevenue passengers. Infants for whom token fares are charged are not counted as passengers.

scheduled service—Transport service operated over an air carrier's routes, based on published flight schedules, including extra sections.

small air traffic hub—A community enplaning from 0.05 to 0.24 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the FAA. Also see 'air traffic hub'.

standard metropolitan statistical area—A county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships.

total departures performed in all services—The total number of aircraft takeoffs made in scheduled and nonscheduled service.

total departures performed in nonscheduled service—The total number of aircraft takeoffs made in nonscheduled service.

total departures performed in scheduled service—The total number of aircraft takeoffs made in scheduled service including extra sections.

Note: The terms in this Glossary are defined as they pertain to this publication.
