Simulation
    Simulation of the seasonal arctic sea-ice cover with a dynamic
        imulation of the seasonal arctic sea-ne con-
thermodynamic sea-ice model. Holland, D.M., et al,
50-5186
        [1993,eng]
    Singularities in simulation of ice sheet-solid impact regime.
        Darr, D.G., et al. [1995,eng]
    Slow dynamics of water molecules in supercooled states. Gallo,
        P., et al. [1996,eng]
   Small ice cap instability in the presence of fluctuations. Lee,
W.H., et al, [1995,eng] $0-641
    Snow and ice cover and climate sensitivity. Oerlemans, J., et al,
        [1995,eng]
   Solvation of hydrogen halides on the surface of ice. Robertson S.H., et al, [1995,eng] 50-6069
                                                                                                                 50-6069
    Some effects of conductor twisting on galloping. Richardson
        A.S., Jr., [1980,eng]
   Sorption of nonpolar organic vapors by ice and snow. Hoff, J.T., et al, [1995,eng] 50-644
   Spectra of mixed ices on Io. Dahmani, R., et al, [1996,eng]
                                                                                                                50-6071
    Spectroscopy of freezing mechanisms of sulfuric acid aerosols
   Bertram, A.K., et al, [1996,eng] 50-4143
Sputtering of water ice surfaces and the production of extended
        neutral atmospheres. Shi, M., et al, [1995,eng]
                                                                                                               50-2774
   Straight line measurements of an open four-sided figure. Hof-
        mann, W., [1958,ger]
   Structure of amphiphile monolayer adsorbed on ice Ih. Bell, K.P., et al. [1996,eng] 50-4023
    Structures and phase transitions of amorphous ices. Okabe, I., et
       al, [1996,eng]
                                                                                                               50-5103
   Study of H<sub>2</sub>O contamination on a cooled optical surface. Guo, Q., et al, [1995,eng] 50-6527
  Subgrid parameterization of surface heat and momentum fluxes over polar oceans. Vihrna, T., [1995,eng] 50-2110. Sublimation of dry ice pellets used for cloud seeding. Kochtubajda, B., et al. [1985,eng] 50-44593
   Sulfuric acid monohydrate: formation and heterogeneous chem-
       istry in the stratosphere. Zhang, R.Y., et al, [1995,eng]
  Surface features of interstellar ice. McCoustra, M., et al, 50-5244
                                                                                                                  50-635
    Surface layers on ice. Knight. C.A., [1996,eng]
                                                                                                               50-6058
  Suspended sediment weathering in alpine glacial meltwater.

Brown, G.H., et al. [1996,eng] 50-6088

Temperature dependence of static charging in ice growing by
       riming. Avila, E.E., et al, [1995,eng]
                                                                                                               50-3004
   Temperature elevation effects on arctic soil insects. Coulson,
       S.J., et al, [1996,eng]
                                                                                                               50.3529
  Testing facilities—self refrigerating units. Frost cabinet temperature distribution. Hill, J., [1977,eng] 50-2314
                                                                                                              50-2314
  Theory of lattice Boltzmann simulations of glacier flow Bahr.
  D.B., et al. [1995,eng] 50-1883
Thermal conductivity of model ice comet surfaces. Ibadinov,
                                                                                                              50-1883
  Kh.I., et al, [1987,eng]

Thermodynamic stability of hydrates for ethane, ethylene, et
                                                                                                              50-1770
 Thermodynamic stability of hydrates for entant, constant carbon dioxide. Kvamme, B., et al. [1996,eng] 50-5019

Three-layer model of flow under the ice cover in rivers.

Debol'skii, V.K., et al. [1995,eng] 50-352
