BUSINESS

Getting to Know the President: CIA Briefings of Presidential Candidates 1952-1992

John Helgerson, CIA's Deputy Director for Intelligence during the Bush administration and head of the team that briefed Bill Clinton after the 1992 election, offers a first-time eyewitness history of the early encounters between 10 presidents and the CIA. Helgerson notes, and former presidents agree, that each candidate who went on to become president had a distinctly different level of knowledge and experience regarding intelligence. *Getting to Know the President* is a riveting account of how CIA briefers have attempted, with varying success, to adapt briefings to the differing experiences, priorities and work patterns of individual presidential candidates from 1952 to the present.

Global Communications: Opportunities for Trade and Aid *Office of Technology Assessment, Washington, D.C.*

This document examines the question of how telecommunication-related aid policies might be designed to support both U.S. trade and foreign aid goals. By targeting poor and underserved areas, telecommunication-based aid programs have the potential to enhance U.S. trade opportunities in developing countries, and promote competition and telecommunications regulatory reform, while at the same time providing for the communities and people most in need. The report examines the likely scenarios for the deployment of communication and information technologies in support of global trade; identifies the policy issues, market failures, and regulatory barriers that need to be overcome; and identifies and analyzes telecommunications-related foreign aid strategies that the federal government might pursue to address these problems.

HEALTH

By the Sweat and Toil of Children, Volumes I & II

U.S. Department of Labor

Two Congressionally mandated reports by the U.S. Department of Labor on the exploitation of child labor are now available through NTIS: *By the Sweat and Toil of Children, Volume I: The Use of Child Labor in U.S. Manufactured and Mined Products*, considered child labor in manufacturing and mining industries exporting to the U.S. *By the Sweat and Toil of Children, Volume II: The Use of Child Labor in U.S. Agricultural Imports and Forced and Bonded Child Labor* is newly released. It addresses children working in commercial agriculture and fishing, and child slavery. While few major changes have occurred in the countries reviewed, the issue of child slavery is receiving heightened attention from the public, the media, governments, donor agencies and international organizations. This interest is beginning to produce action by governments, industry and consumers worldwide. The United Nations Children's Fund, in testimony at the Department of Labor's hearings, stated that "we are now seeing growing commitment and increased action toward the goal of eliminating exploitative child labour--although there is no question that progress remains uneven and we obviously have a very long way to go to win back childhood for the world's labouring children...."

NTIS has an excellent collection of videos on substance abuse which are available for school or home viewing!

Olympic Spirit: Building Resiliency in Youth (Video)

Department of Education, Washington, DC

Alcohol, tobacco, and drug abuse is the top problem facing our nation's schools. It affects young people from elementary school through high school. Help your children value their health and understand the dangers of drug and alcohol use. This exceptional video provides teachers a creative and engaging supplement to classroom drug and violence prevention lessons. The theme was taken from the 1996 Summer Olympics and Special Olympics world games. It is centered around the Olympic ideals of cooperation and teamwork, citizenship, fair play, and goal setting. Suggested activities engage students in a variety of information, problem solving, and service learning projects that are appropriate for all students, including students with disabilities. Designed for middle school, junior and senior high school students.

This VHS video is 1/2-inch, color with playing time of 16 minutes. Package also includes a 36-page activity guide, two posters and a bookmark. Cleared for TV. Can be duplicated with no restrictions.

Directory of Polish Officials

A Reference Aid

Information available as of April 1989
was used in the preparation of this publication.

Preface

This edition of the *Directory of Polish Officials* supersedes LDA 87-10997, produced in April 1987. It identifies individuals who hold positions in selected party, government, economic, scientific, and other public organizations. It also provides a guide to the internal structure of some of these organizations.

Dates of Information. The date an individual either assumed or was first identified in a position is listed in the "position" column. Dates of birth are listed in the "birth" column for selected officials.

Transliteration. The Polish language uses the Latin alphabet with the addition of a variety of diacritics to indicate pronunciation. This directory, however, omits all diacritics. It follows the system authorized by the US Board on Geographic Names for transliteration of place names, except in instances where another word is more easily recognized and commonly used, such as "voivodship" instead of "wojewsdztwo."

Personal Names. Polish names consist of a family name and a given name. A surname ending in the suffix -ski is changed to -ska for women. This publication lists the full name of each individual whenever it is known. The family name appears first in bold type, followed by the given name. In rare instances a family name consists of a double name that appears in a hyphenated form or as two words.

Additional Directory Entries. The directory includes political party affiliation for each individual whenever it is known or can be assumed by the position held. It also lists some academic degrees and military, police, security, and ecclesiastical ranks. The names of organizational components are standardized. Street addresses, transliterated names are provided for some organizations. Many economic and commercial organizations are listed by a cable designation or by a commonly known transliterated name.

An index of major organizations and a personality index follow the directory listing. Duplicate names in the personality index refer to different individuals.

3. Parliament

Sejm

The modern Sejm evolved from Poland's medieval parliament of nobles. Following a national referendum in mid-1946, it became unicameral when the senate was abolished. Controlled national parliamentary elections in January 1947 resulted in Communist domination of the Sejm and gave the Communists legal control of the government. Nominally the highest organ of state authority, the Sejm approves the constitution and selects the chairman and members of the Council of State and Council of Ministers.

5. Provincial Party and Government Officials

Poland is divided into 49 provinces (voivodships), each of which is named for its capital city. Each province has a governor (appointed by the Prime Minister and responsible to the local people's council), a PZPR organization, a government apparatus (Provincial People's Council), minority parties, a mass organization unit (PRON), and a youth league committee (ZSMP).
