The World Factbook 1999

In general, information available as of 1 January 1999 was used in the preparation of this edition.

The World Factbook is prepared by the Central Intelligence Agency for the use of US Government officials, and the style, format, coverage, and content are designed to meet their specific requirements. Information is provided by the Bureau of the Census (Department of Commerce), Bureau of Labor Statistics (Department of Labor), Central Intelligence Agency, Council of Managers of National Antarctic Programs, Defense Intelligence Agency (Department of Defense), Defense Threat Reduction Agency (Department of Defense), Department of State, Fish and Wildlife Service (Department of the Interior), Maritime Administration (Department of Transportation), National Imagery and Mapping Agency (Department of Defense), Antarctic Information Program (National Science Foundation), Naval Facilities Engineering Command (Department of Defense), Office of Insular Affairs (Department of the Interior), Office of Naval Intelligence (Department of Defense), US Board on Geographic Names (Department of the Interior), and other public and private sources.

The *Factbook* is in the public domain. Accordingly, it may be copied freely without permission of the Central Intelligence Agency (CIA). The official seal of the CIA, however, may **NOT** be copied without permission as required by the CIA Act of 1949 (50 U.S.C. section 403m). Misuse of the official seal of the CIA could result in civil and criminal penalties.

Comments and queries are welcome and may be addressed to:

A Brief History of Basic Intelligence and *The World Factbook*

*The Intelligence Cycle is the process by which information is acquired, converted into intelligence, and made available to policymakers. **Information** is raw data from any source, data that may be fragmentary, contradictory, unreliable, ambiguous, deceptive, or wrong. **Intelligence** is information that has been collected, integrated, evaluated, analyzed, and interpreted. **Finished intelligence** is the final product of the Intelligence Cycle ready to be delivered to the policymaker.*

The three types of finished intelligence are: basic, current, and estimative. Basic intelligence provides the fundamental and factual reference material on a country or issue. Current intelligence reports on new developments. Estimative intelligence judges probable outcomes. The three are mutually supportive: basic intelligence is the foundation on which the other two are constructed; current intelligence continually updates the inventory of knowledge; and estimative intelligence revises overall interpretations of country and issue prospects for guidance of basic and current intelligence. *The World Factbook*, *The President's Daily Brief*, and the *National Intelligence Estimates* are examples of the three types of finished intelligence.

The United States has carried on foreign intelligence activities since the days of George Washington, but only since World War II have they been coordinated on a governmentwide basis. Three programs have highlighted the development of coordinated basic intelligence since that time: (1) the *Joint Army Navy Intelligence Studies* (JANIS), (2) the *National Intelligence Survey* (NIS), and (3) *The World Factbook*.

During World War II, intelligence consumers realized that the production of basic intelligence by different components of the US Government resulted in a great duplication of effort and conflicting information. The Japanese attack on Pearl Harbor in 1941 brought home to leaders in Congress and the executive branch the need for integrating departmental reports to national policymakers. Detailed coordinated information was needed not only on such major powers as Germany and Japan, but also on places of little previous interest. In the Pacific Theater, for example, the Navy and Marines had to launch amphibious operations against many islands about which information was unconfirmed or nonexistent. Intelligence authorities resolved that the United States should never again be caught unprepared.

In 1943, Gen. George B. Strong (G-2), Adm. H. C. Train (Office of Naval Intelligence—ONI), and Gen. William J. Donovan (Director of the Office of Strategic Services—OSS) decided that a joint effort should be initiated. A steering committee was appointed on 27 April 1943 that recommended the formation of a Joint Intelligence Study Publishing Board to assemble, edit, coordinate, and publish the *Joint Army Navy Intelligence Studies* (JANIS). JANIS was

the first interdepartmental basic intelligence program to fulfill the needs of the US Government for an authoritative and coordinated appraisal of strategic basic intelligence. Between April 1943 and July 1947, the board published 34 JANIS studies. JANIS performed well in the war effort, and numerous letters of commendation were received, including a statement from Adm. Forrest Sherman, Chief of Staff, Pacific Ocean Areas, which said, "JANIS has become the indispensable reference work for the shore-based planners."

The need for more comprehensive basic intelligence in the postwar world was well expressed in 1946 by George S. Pettee, a noted author on national security. He wrote in *The Future of American Secret Intelligence* (Infantry Journal Press, 1946, page 46) that world leadership in peace requires even more elaborate intelligence than war. "The conduct of peace involves all countries, all human activities—not just the enemy and his war production."

The Central Intelligence Agency was established on 26 July 1947 and officially began operating on 18 September 1947. Effective 1 October 1947, the Director of Central Intelligence assumed operational responsibility for JANIS. On 13 January 1948, the National Security Council issued Intelligence Directive (NSCID) No. 3, which authorized the *National Intelligence Survey* (NIS) program as a peacetime replacement for the wartime JANIS program. Before adequate NIS country sections could be produced, government agencies had to develop more comprehensive gazetteers and better maps. The US Board on Geographic Names (BGN) compiled the names; the Department of the Interior produced the gazetteers; and CIA produced the maps.

The Hoover Commission's Clark Committee, set up in 1954 to study the structure and administration of the CIA, reported to Congress in 1955 that: "The National Intelligence Survey is an invaluable publication which provides the essential elements of basic intelligence on all areas of the world. . . . There will always be a continuing requirement for keeping the Survey up-to-date." The *Factbook* was created as an annual summary and update to the encyclopedic NIS studies. The first classified *Factbook* was published in August 1962, and the first unclassified version was published in June 1971. The NIS program was terminated in 1973 except for the *Factbook*, map, and gazetteer components. The 1975 *Factbook* was the first to be made available to the public with sales through the US Government Printing Office (GPO). The 1996 edition was printed by GPO and the 1997 edition was reprinted by GPO. The year 1999 marks the 52nd anniversary of the establishment of the Central Intelligence Agency and the 56th year of continuous basic intelligence support to the US Government by *The World Factbook* and its two predecessor programs.

Notes and Definitions

In addition to the updating of information, the following changes have been made in this edition of *The World Factbook*. The name Wake Island has been officially changed to Wake Atoll. The **Historical perspective** and **Current issues** entries in the **Introduction** category have been combined into a new **Background** entry. It appears in only a few country profiles at this time. There are new entries on **Population below poverty line**, **Household income or consumption by percentage share**, **Electricity—production by source** (fossil fuel, hydro, nuclear, other), **Electricity—exports**, and **Electricity—imports**. A new reference map of Kosovo has been included and terrain has been added to most of the reference maps. A new physical map of the world has also been added.

Abbreviations: This information is included in **Appendix A: Abbreviations**, which includes all abbreviations and acronyms used in the *Factbook*, with their expansions.

Administrative divisions: This entry generally gives the numbers, designatory terms, and first-order administrative divisions as approved by the US Board on Geographic Names (BGN). Changes that have been reported but not yet acted on by BGN are noted.

Age structure: This entry provides the distribution of the population according to age. Information is included by sex and age group (0-14 years, 15-64 years, 65 years and over). The age structure of a population affects a nation's key socioeconomic issues. Countries with young populations (high percentage under age 15) need to invest more in schools, while countries with older populations (high percentage ages 65 and over) need to invest more in the health sector. The age structure can also be used to help predict potential political issues. For example, the rapid growth of a young adult population unable to find employment can lead to unrest.

Agriculture—products: This entry is a rank ordering of major crops and products starting with the most important.

Airports: This entry gives the total number of airports. The runway(s) may be paved (concrete or asphalt surfaces) or unpaved (grass, dirt, sand, or gravel surfaces), but must be usable. Not all airports have facilities for refueling, maintenance, or air traffic control.

Airports—with paved runways: This entry gives the total number of airports with paved runways (concrete or asphalt surfaces). For airports with more than one runway, only the longest runway is included according to the following five groups—(1) over 3,047 m, (2) 2,438 to 3,047 m, (3) 1,524 to 2,437 m, (4) 914 to 1,523 m, and (5) under 914 m. Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control.

Airports—with unpaved runways: This entry gives the total number of airports with unpaved runways (grass, dirt, sand, or gravel surfaces). For airports with more than one runway, only the longest runway is included according to the following five groups—(1) over 3,047 m, (2) 2,438 to 3,047 m, (3) 1,524 to 2,437 m, (4) 914 to 1,523 m, and (5) under 914 m. Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control.

Appendixes: This section includes *Factbook*-related material by topic.

Notes and Definitions *(continued)*

Area: This entry includes three subfields. *Total area* is the sum of all land and water areas delimited by international boundaries and/or coastlines. *Land area* is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). *Water area* is the sum of all water surfaces delimited by international boundaries and/or coastlines, including inland water bodies (lakes, reservoirs, rivers).

Area—comparative: This entry provides an area comparison based on total area equivalents. Most entities are compared with the entire US or one of the 50 states based on area measurements (1990 revised) provided by the US Bureau of the Census. The smaller entities are compared with Washington, DC (178 sq km, 69 sq mi) or The Mall in Washington, DC (0.59 sq km, 0.23 sq mi, 146 acres).

Background: This entry usually highlights major historic events, current issues, and may include a statement about one or two key future trends. This entry appears for only a few countries at the present time, but will be added to all countries in the future.

Birth rate: This entry gives the average annual number of births during a year per 1,000 persons in the population at midyear; also known as crude birth rate. The birth rate is usually the dominant factor in determining the rate of population growth. It depends on both the level of fertility and the age structure of the population.

Budget: This entry includes revenues, total expenditures, and capital expenditures. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Capital: This entry gives the location of the seat of government.

Climate: This entry includes a brief description of typical weather regimes throughout the year.

Coastline: This entry gives the total length of the boundary between the land area (including islands) and the sea.

Communications: This category deals with the means of exchanging information and includes the telephone, radio, and television entries.

Communications—note: This entry includes miscellaneous communications information of significance not included elsewhere.

Constitution: This entry includes the dates of adoption, revisions, and major amendments.

Country map: Most versions of the *Factbook* provide a country map in color. The maps were produced from the best information available at the time of preparation. Names and/or boundaries may have changed subsequently.

Country name: This entry includes all forms of the country's name approved by the US Board on Geographic Names (Italy is used as an example): *conventional long form* (Italian Republic), *conventional short form* (Italy), *local long form* (Repubblica Italiana), *local short form* (Italia), *former* (Kingdom of Italy), as well as the *abbreviation*. Also see the **Terminology** note.

Notes and Definitions *(continued)*

Currency: This entry identifies the national medium of exchange and its basic subunit.

Data code: This entry gives the official US Government digraph that precisely identifies every land entity without overlap, duplication, or omission. AF, for example, is the data code for Afghanistan. This two-letter country code is a standardized geopolitical data element promulgated in the *Federal Information Processing Standards Publication (FIPS) 10-4* by the National Institute of Standards and Technology at the US Department of Commerce and maintained by the Office of the Geographer and Global Issues at the US Department of State. The data code is used to eliminate confusion and incompatibility in the collection, processing, and dissemination of area-specific data and is particularly useful for interchanging data between databases. **Appendix F** cross-references various country data codes and **Appendix G** does the same thing for hydrographic data codes.

Data codes—country: This information is presented in **Appendix F: Cross-Reference List of Country Data Codes** which includes the US Government approved Federal Information Processing Standards (FIPS) codes, the International Organization for Standardization (ISO) codes, and Internet codes for land entities.

Data codes—hydrographic: This information is presented in **Appendix G: Cross-Reference List of Hydrographic Data Codes** which includes the International Hydrographic Organization (IHO) codes, Aeronautical Chart and Information Center (ACIC; now National Imagery and Mapping Agency or NIMA) codes, and Defense Intelligence Agency (DIA) codes for hydrographic entities. The US Government has not yet approved a standard for hydrographic data codes similar to the FIPS 10-4 standard for country data codes.

Date of information: In general, information available as of 1 January 1999, was used in the preparation of this edition.

Death rate: This entry gives the average annual number of deaths during a year per 1,000 population at midyear; also known as crude death rate. The death rate, while only a rough indicator of the mortality situation in a country, accurately indicates the current mortality impact on population growth. This indicator is significantly affected by age distribution, and most countries will eventually show a rise in the overall death rate, in spite of continued decline in mortality at all ages, as declining fertility results in an aging population.

Debt—external: This entry gives the total amount of public foreign financial obligations.

Dependency status: This entry describes the formal relationship between a particular nonindependent entity and an independent state.

Dependent areas: This entry contains an alphabetical listing of all nonindependent entities associated in some way with a particular independent state.

Diplomatic representation: The US Government has diplomatic relations with 184 independent states, including 178 of the 185 UN members (excluded UN members are Bhutan, Cuba, Iran, Iraq, North Korea, former Yugoslavia, and the US itself). In addition, the US has diplomatic relations with 6 independent states that are not in the UN—Holy See, Kiribati, Nauru, Switzerland, Tonga, and Tuvalu.

Notes and Definitions *(continued)*

Diplomatic representation from the US: This entry includes the *chief of mission*, *embassy address*, *mailing address*, *telephone number*, *FAX number*, *branch office locations*, *consulate general locations*, and *consulate locations*.

Diplomatic representation in the US: This entry includes the *chief of the foreign mission*, *chancery address*, *telephone number*, *FAX number*, *consulate general locations*, *consulate locations*, *honorary consulate general locations*, and *honorary consulate locations*.

Disputes—international: This entry includes a wide variety of situations that range from traditional bilateral boundary disputes to unilateral claims of one sort or another. Information regarding disputes over international terrestrial and maritime boundaries has been reviewed by the US Department of State. References to other situations involving borders or frontiers may also be included, such as resource disputes, geopolitical questions, or irredentist issues; however, inclusion does not necessarily constitute official acceptance or recognition by the US Government.

Economic aid—donor: This entry refers to net official development assistance (ODA) from OECD nations to developing countries and multilateral organizations. ODA is defined as financial assistance that is concessional in character, has the main objective to promote economic development and welfare of LDCs, and contains a grant element of at least 25%. The entry does not cover other official flows (OOF) or private flows.

Economic aid—recipient: This entry, which is subject to major problems of definition and statistical coverage, refers to the net inflow of Official Development Finance (ODF) to recipient countries. The figure includes assistance from the World Bank, the IMF, and other international organizations and from individual nation donors. Formal commitments of aid are included in the data. Omitted from the data are grants by private organizations. Aid comes in various forms including outright grants and loans. The entry thus is the difference between new inflows and repayments.

Economy: This category includes the entries dealing with the size, development, and management of productive resources, i.e., land, labor, and capital.

Economy—overview: This entry briefly describes the type of economy, including the degree of market orientation, the level of economic development, the most important natural resources, and the unique areas of specialization. It also characterizes major economic events and policy changes in the most recent 12 months and may include a statement about one or two key future macroeconomic trends.

Electricity—consumption: This entry consists of total electricity generated annually plus imports and minus exports, expressed in kilowatt hours.

Electricity—exports: This entry is the total exported electricity in kilowatt hours.

Electricity—imports: This entry is the total imported electricity in kilowatt hours.

Electricity—production: This entry is the annual electricity generated expressed in kilowatt hours.

Notes and Definitions *(continued)*

Electricity—production by source: This entry indicates the percentage share of annual electricity production of each energy source. These are fossil fuel, hydro, nuclear, and other (solar, geothermal, and wind).

Elevation extremes: This entry includes both the *highest point* and the *lowest point*.

Entities: Some of the independent states, dependencies, areas of special sovereignty, and governments included in this publication are not independent, and others are not officially recognized by the US Government. "Independent state" refers to a people politically organized into a sovereign state with a definite territory. "Dependencies" and "areas of special sovereignty" refer to a broad category of political entities that are associated in some way with an independent state. "Country" names used in the table of contents or for page headings are usually the short-form names as approved by the US Board on Geographic Names and may include independent states, dependencies, and areas of special sovereignty, or other geographic entities. There are a total of 266 separate geographic entities in *The World Factbook* that may be categorized as follows:

Environment—current issues: This entry lists the most pressing and important environmental problems.

Environment—international agreements: This entry separates country participation in international environmental agreements into two levels—*party to* and *signed but not ratified*. Agreements are listed in alphabetical order by the abbreviated form of the full name.

Environmental agreements: This information is presented in **Appendix D: Selected International Environmental Agreements**, which includes the name, abbreviation, date opened for signature, date entered into force, objective, and parties by category.

Ethnic groups: This entry provides a rank ordering of ethnic groups starting with the largest and normally includes the percent of total population.

Notes and Definitions (continued)

Exchange rates: This entry provides the official value of a country's monetary unit at a given date or over a given period of time, as expressed in units of local currency per US dollar and as determined by international market forces or official fiat.

Executive branch: This entry includes several subfields. *Chief of state* includes the name and title of the titular leader of the country who represents the state at official and ceremonial functions but may not be involved with the day-to-day activities of the government. *Head of government* includes the name and title of the top administrative leader who is designated to manage the day-to-day activities of the government. *Cabinet* includes the official name for this body of high-ranking advisers and the method for selection of members. *Elections* includes the nature of election process or accession to power, date of the last election, and date of the next election. *Election results* includes the percent of vote for each candidate in the last election. In the UK, the monarch is the chief of state, and the prime minister is the head of government. In the US, the president is both the chief of state and the head of government.

Exports: This entry provides the total US dollar amount of exports on an f.o.b. (free on board) basis.

Exports—commodities: This entry provides a rank ordering of exported products starting with the most important; it sometimes includes the percent of total dollar value.

Exports—partners: This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Fiscal year: This entry identifies the beginning and ending months for a country's accounting period of 12 months, which often is the calendar year but which may begin in any month. FY93/94 refers to the fiscal year that began in calendar year 1993 and ended in calendar year 1994. All yearly references are for the calendar year (CY) unless indicated as a noncalendar fiscal year (FY).

Flag description: This entry provides a written flag description produced from actual flags or the best information available at the time the entry was written. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

Flag graphic: Most versions of the *Factbook* include a color flag at the beginning of the country profile. The flag graphics were produced from actual flags or the best information available at the time of preparation. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

GDP: This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. GDP dollar estimates in the *Factbook* are derived from purchasing power parity (PPP) calculations. See the note on **GDP methodology** for more information.

GDP methodology: In the **Economy** section, GDP dollar estimates for all countries are derived from purchasing power parity (PPP) calculations rather than from conversions at official currency exchange rates. The PPP method involves the use of standardized international dollar price weights, which are applied to the quantities of final goods and services produced in a given economy. The data

Notes and Definitions *(continued)*

derived from the PPP method provide the best available starting point for comparisons of economic strength and well-being between countries. The division of a GDP estimate in domestic currency by the corresponding PPP estimate in dollars gives the PPP conversion rate. Whereas PPP estimates for OECD countries are quite reliable, PPP estimates for developing countries are often rough approximations. Most of the GDP estimates are based on extrapolation of PPP numbers published by the UN International Comparison Program (UNICP) and by Professors Robert Summers and Alan Heston of the University of Pennsylvania and their colleagues. In contrast, currency exchange rates depend on a variety of international and domestic financial forces that often have little relation to domestic output. In developing countries with weak currencies the exchange rate estimate of GDP in dollars is typically one-fourth to one-half the PPP estimate. Furthermore, exchange rates may suddenly go up or down by 10% or more because of market forces or official fiat whereas real output has remained unchanged. On 12 January 1994, for example, the 14 countries of the African Financial Community (whose currencies are tied to the French franc) devalued their currencies by 50%. This move, of course, did not cut the real output of these countries by half. One important caution: the proportion of, say, defense expenditures as a percentage of GDP in local currency accounts may differ substantially from the proportion when GDP accounts are expressed in PPP terms, as, for example, when an observer tries to estimate the dollar level of Russian or Japanese military expenditures. Note: the numbers for GDP and other economic data can *not* be chained together from successive volumes of the *Factbook* because of changes in the US dollar measuring rod, revisions of data by statistical agencies, use of new or different sources of information, and changes in national statistical methods and practices. For statistical series on GDP and other economic variables, see the *Handbook of International Economic Statistics* available from the same sources as *The World Factbook*.

GDP—composition by sector: This entry gives the percentage contribution of *agriculture, industry, and services* to total GDP.

GDP—per capita: This entry shows GDP on a purchasing power parity basis divided by population as of 1 July for the same year.

GDP—real growth rate: This entry gives GDP growth on an annual basis adjusted for inflation and expressed as a percent.

Geographic coordinates: This entry includes rounded latitude and longitude figures for the purpose of finding the approximate geographic center of an entity and is based on the *Gazetteer of Conventional Names*, Third Edition, August 1988, US Board on Geographic Names and on other sources.

Geographic names: This information is presented in **Appendix H: Cross-Reference List of Geographic Names** which indicates where various geographic names—including alternate names, former names, political or geographical portions of larger entities, and the location of all US Foreign Service posts—can be found in *The World Factbook*. Spellings are normally, but not always, those approved by the US Board on Geographic Names (BGN). Alternate names are included in parentheses, while additional information is included in brackets.

Geography: This category includes the entries dealing with the natural environment and the effects of human activity.

Notes and Definitions *(continued)*

Geography—note: This entry includes miscellaneous geographic information of significance not included elsewhere.

GNP: Gross national product (GNP) is the value of all final goods and services produced within a nation in a given year, plus income earned by its citizens abroad, minus income earned by foreigners from domestic production. The *Factbook*, following current practice, uses GDP rather than GNP to measure national production. However, the user must realize that in certain countries net remittances from citizens working abroad may be important to national well-being.

Government: This category includes the entries dealing with the system for the adoption and administration of public policy.

Government type: This entry gives the basic form of government (e.g., republic, constitutional monarchy, federal republic, parliamentary democracy, military dictatorship).

Government—note: This entry includes miscellaneous government information of significance not included elsewhere.

Gross domestic product: see GDP

Gross national product: see GNP

Gross world product: see GWP

GWP: This entry gives the gross world product (GWP) or aggregate value of all final goods and services produced worldwide in a given year.

Heliports: This entry gives the total number of established helicopter takeoff and landing sites (which may or may not have fuel or other services).

Highways: This entry includes the *total* length of the highway system as well as the length of the *paved* and *unpaved* components.

Household income or consumption by percentage share: Data on household income or consumption come from household surveys, the results adjusted for household size. Nations use different standards and procedures in collecting and adjusting the data. Surveys based on income will normally show a more unequal distribution than surveys based on consumption. The quality of surveys is improving with time, yet caution is still necessary in making inter-country comparisons.

Illicit drugs: This entry gives information on the five categories of illicit drugs—narcotics, stimulants, depressants (sedatives), hallucinogens, and cannabis. These categories include many drugs legally produced and prescribed by doctors as well as those illegally produced and sold outside of medical channels.

Cannabis (*Cannabis sativa*) is the common hemp plant, which provides hallucinogens with some sedative properties, and includes marijuana (pot, Acapulco gold, grass, reefer), tetrahydrocannabinol (THC, Marinol), hashish (hash), and hashish oil (hash oil).

Coca (mostly *Erythroxylum coca*) is a bush with leaves that contain the stimulant used to make cocaine. Coca is not to be confused with cocoa, which comes from cacao seeds and is used in making chocolate, cocoa, and cocoa butter.

Notes and Definitions *(continued)*

Cocaine is a stimulant derived from the leaves of the coca bush.

Depressants (sedatives) are drugs that reduce tension and anxiety and include chloral hydrate, barbiturates (Amytal, Nembutal, Seconal, phenobarbital), benzodiazepines (Librium, Valium), methaqualone (Quaalude), glutethimide (Doriden), and others (Equanil, Placidyl, Valmid).

Drugs are any chemical substances that effect a physical, mental, emotional, or behavioral change in an individual.

Drug abuse is the use of any licit or illicit chemical substance that results in physical, mental, emotional, or behavioral impairment in an individual.

Hallucinogens are drugs that affect sensation, thinking, self-awareness, and emotion. Hallucinogens include LSD (acid, microdot), mescaline and peyote (mesc, buttons, cactus), amphetamine variants (PMA, STP, DOB), phencyclidine (PCP, angel dust, hog), phencyclidine analogues (PCE, PCPy, TCP), and others (psilocybin, psilocyn).

Hashish is the resinous exudate of the cannabis or hemp plant (*Cannabis sativa*).

Heroin is a semisynthetic derivative of morphine.

Mandrax is a trade name for methaqualone, a pharmaceutical depressant.

Marijuana is the dried leaves of the cannabis or hemp plant (*Cannabis sativa*).

Methaqualone is a pharmaceutical depressant, referred to as mandrax in Southwest Asia.

Narcotics are drugs that relieve pain, often induce sleep, and refer to opium, opium derivatives, and synthetic substitutes. Natural narcotics include opium (paregoric, parepectolin), morphine (MS-Contin, Roxanol), codeine (Tylenol with codeine, Empirin with codeine, Robitussin AC), and thebaine. Semisynthetic narcotics include heroin (horse, smack), and hydromorphone (Dilaudid). Synthetic narcotics include meperidine or Pethidine (Demerol, Mepergan), methadone (Dolophine, Methadose), and others (Darvon, Lomotil).

Opium is the brown, gummy exudate of the incised, unripe seedpod of the opium poppy.

Opium poppy (*Papaver somniferum*) is the source for the natural and semisynthetic narcotics.

Poppy straw concentrate is the alkaloid derived from the mature, dried opium poppy.

Qat (kat, khat) is a stimulant from the buds or leaves of *Catha edulis* that is chewed or drunk as tea.

Quaaludes is the North American slang term for methaqualone, a pharmaceutical depressant.

Stimulants are drugs that relieve mild depression, increase energy and activity, and include cocaine (coke, snow, crack), amphetamines (Desoxyn, Dexedrine), phenmetrazine (Preludin), methylphenidate (Ritalin), and others (Cylert, Sanorex, Tenuate).

Imports: This entry provides the total US dollar amount of imports on a c.i.f. (cost, insurance, and freight) or f.o.b. (free on board) basis.

Imports—commodities: This entry provides a rank ordering of imported products starting with the most important; it sometimes includes the percent of total dollar value.

Imports—partners: This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Notes and Definitions (continued)

Independence: For most countries, this entry gives the date that sovereignty was achieved, and from which nation, empire, or trusteeship. For the other countries, the date given may not represent "independence" in the strict sense, but rather some significant nationhood event such as traditional founding date, date of unification, federation, confederation, establishment, fundamental change in the form of government, or state succession. Dependent areas include the notation "none" followed by the nature of their dependency status. Also see the **Terminology** note.

Industrial production growth rate: This entry gives the annual percentage increase in industrial production (includes manufacturing, mining, and construction).

Industries: This entry provides a rank ordering of industries starting with the largest by value of annual output.

Infant mortality rate: This entry gives the number of deaths of infants under one year old in a given year per 1,000 live births in the same year. This rate is often used as an indicator of the level of health in a country.

Inflation rate (consumer prices): This entry furnishes the annual percent change in consumer prices compared with the previous year's consumer prices.

International disputes: see **Disputes—international**

International organization participation: This entry lists in alphabetical order by abbreviation those international organizations in which the subject country is a member or participates in some other way.

International organizations: This information is presented in **Appendix C: International Organizations and Groups** which includes the name, abbreviation, address, telephone, FAX, date established, aim, and members by category.

Introduction: This category includes one entry, **Background**. At present it appears in only a few country profiles, but will be added to others in the future.

Irrigated land: This entry gives the number of square kilometers of land area that is artificially supplied with water.

Judicial branch: This entry contains the name(s) of the highest court(s) and a brief description of the selection process for members.

Labor force: This entry contains the total labor force figure.

Labor force—by occupation: This entry contains a rank ordering of component parts of the labor force by occupation.

Land boundaries: This entry contains the total length of all land boundaries and the individual lengths for each of the contiguous border countries.

Land use: This entry contains the percentage shares of total land area for five different types of land use. *Arable land*—land cultivated for crops that are replanted after each harvest like wheat, maize, and rice. *Permanent crops*—land cultivated for crops that are not replanted after each harvest like citrus, coffee, and rubber. *Permanent pastures*—land permanently used for herbaceous forage crops. *Forests and woodland*—land under dense or open stands of trees. *Other*—any land type not specifically mentioned above, such as urban areas, roads, desert, etc.

Notes and Definitions *(continued)*

Languages: This entry provides a rank ordering of languages starting with the largest and sometimes includes the percent of total population speaking that language.

Legal system: This entry contains a brief description of the legal system's historical roots, role in government, and acceptance of International Court of Justice (ICJ) jurisdiction.

Legislative branch: This entry contains information on the structure (unicameral, bicameral, tricameral), formal name, number of seats, and term of office. *Elections* includes the nature of election process or accession to power, date of the last election, and date of the next election. *Election results* includes the percent of vote and/or number of seats held by each party in the last election.

Life expectancy at birth: This entry contains the average number of years to be lived by a group of people born in the same year, if mortality at each age remains constant in the future. The entry includes total population as well as the male and female components. Life expectancy at birth is also a measure of overall quality of life in a country and summarizes the mortality at all ages. It can also be thought of as indicating the potential return on investment in human capital and is necessary for the calculation of various actuarial measures.

Literacy: This entry includes a definition of literacy and Census Bureau percentages for the total population, males, and females. There are no universal definitions and standards of literacy. Unless otherwise specified, all rates are based on the most common definition—the ability to read and write at a specified age. Detailing the standards that individual countries use to assess the ability to read and write is beyond the scope of the *Factbook*. Information on literacy, while not a perfect measure of educational results, is probably the most easily available and valid for international comparisons. Low levels of literacy, and education in general, can impede the economic development of a country in the current rapidly changing, technology-driven world.

Location: This entry identifies the country's regional location, neighboring countries, and adjacent bodies of water.

Map references: This entry includes the name of the *Factbook* reference map on which a country may be found. The entry on **Geographic coordinates** may be helpful in finding some smaller countries.

Maritime claims: This entry includes the following claims: contiguous zone, continental shelf, exclusive economic zone, exclusive fishing zone, extended fishing zone, none (usually for a landlocked country), other (unique maritime claims like Libya's Gulf of Sidra Closing Line or North Korea's Military Boundary Line), and territorial sea. The proximity of neighboring states may prevent some national claims from being extended the full distance.

Merchant marine: Merchant marine may be defined as all ships engaged in the carriage of goods; all commercial vessels (as opposed to all nonmilitary ships), which excludes tugs, fishing vessels, offshore oil rigs, etc.; or a grouping of merchant ships by nationality or register. This entry contains information in two subfields—*total* and *ships by type*. *Total* includes the total number of ships (1,000 GRT or over), total DWT for those ships, and total GRT for those ships. *Ships by type* includes a listing of barge carriers, bulk cargo ships, cargo ships, combination bulk carriers, combination ore/oil carriers, container ships, intermodal ships, liquefied gas tankers, livestock carriers, multifunction large-load carriers, oil

Notes and Definitions *(continued)*

tankers, passenger ships, passenger-cargo ships, railcar carriers, refrigerated cargo ships, roll-on/roll-off cargo ships, short-sea passenger ships, specialized tankers, tanker tug-barges, and vehicle carriers.

A captive register is a register of ships maintained by a territory, possession, or colony primarily or exclusively for the use of ships owned in the parent country; it is also referred to as an offshore register, the offshore equivalent of an internal register. Ships on a captive register will fly the same flag as the parent country, or a local variant of it, but will be subject to the maritime laws and taxation rules of the offshore territory. Although the nature of a captive register makes it especially desirable for ships owned in the parent country, just as in the internal register, the ships may also be owned abroad. The captive register then acts as a flag of convenience register, except that it is not the register of an independent state.

A flag of convenience register is a national register offering registration to a merchant ship not owned in the flag state. The major flags of convenience (FOC) attract ships to their registers by virtue of low fees, low or nonexistent taxation of profits, and liberal manning requirements. True FOC registers are characterized by having relatively few of the registered ships actually owned in the flag state. Thus, while virtually any flag can be used for ships under a given set of circumstances, an FOC register is one where the majority of the merchant fleet is owned abroad. It is also referred to as an open register.

A flag state is the nation in which a ship is registered and which holds legal jurisdiction over operation of the ship, whether at home or abroad. Maritime legislation of the flag state determines how a ship is crewed and taxed and whether a foreign-owned ship may be placed on the register.

An internal register is a register of ships maintained as a subset of a national register. Ships on the internal register fly the national flag and have that nationality but are subject to a separate set of maritime rules from those on the main national register. These differences usually include lower taxation of profits, use of foreign nationals as crew members, and, usually, ownership outside the flag state (when it functions as an FOC register). The Norwegian International Ship Register and Danish International Ship Register are the most notable examples of an internal register. Both have been instrumental in stemming flight from the national flag to flags of convenience and in attracting foreign-owned ships to the Norwegian and Danish flags.

A merchant ship is a vessel that carries goods against payment of freight; it is commonly used to denote any nonmilitary ship but accurately restricted to commercial vessels only.

A register is the record of a ship's ownership and nationality as listed with the maritime authorities of a country; also, it is the compendium of such individual ships' registrations. Registration of a ship provides it with a nationality and makes it subject to the laws of the country in which registered (the flag state) regardless of the nationality of the ship's ultimate owner.

Military: This category includes the entries dealing with a country's military structure, manpower, and expenditures.

Military branches: This entry lists the names of the ground, naval, air, marine, and other defense or security forces.

Military expenditures—dollar figure: This entry gives current military expenditures in US dollars; the figure is calculated by multiplying the estimated defense spending in percentage terms by the gross domestic product (GDP) calculated on an exchange rate basis *not* purchasing power parity (PPP) terms.

Notes and Definitions *(continued)*

The figure should be treated with caution because of different price patterns and accounting methods among nations, as well as wide variations in the strength of their currencies.

Military expenditures—percent of GDP: This entry gives current military expenditures as an estimated percent of gross domestic product (GDP).

Military manpower—availability: This entry gives the total numbers of males and females age 15-49 and assumes that every individual is fit to serve.

Military manpower—fit for military service: This entry gives the number of males and females age 15-49 fit for military service. This is a more refined measure of potential military manpower availability which tries to correct for the health situation in the country and reduces the maximum potential number to a more realistic estimate of the actual number fit to serve.

Military manpower—military age: This entry gives the minimum age at which an individual may volunteer for military service or be subject to conscription.

Military manpower—reaching military age annually: This entry gives the number of draft-age males and females entering the military manpower pool in any given year and is a measure of the availability of draft-age young adults.

Military—note: This entry includes miscellaneous military information of significance not included elsewhere.

Money figures: All money figures are expressed in contemporaneous US dollars unless otherwise indicated.

National holiday: This entry gives the primary national day of celebration - usually independence day.

Nationality: This entry provides the identifying terms for citizens - *noun* and *adjective*.

Natural hazards: This entry lists potential natural disasters.

Natural resources: This entry lists a country's mineral, petroleum, hydropower, and other resources of commercial importance.

Net migration rate: This entry includes the figure for the difference between the number of persons entering and leaving a country during the year per 1,000 persons (based on midyear population). An excess of persons entering the country is referred to as net immigration (e.g., 3.56 migrants/1,000 population); an excess of persons leaving the country as net emigration (e.g., -9.26 migrants/1,000 population). The net migration rate indicates the contribution of migration to the overall level of population change. High levels of migration can cause problems such as increasing unemployment and potential ethnic strife (if people are coming in) or a reduction in the labor force, perhaps in certain key sectors (if people are leaving).

People: This category includes the entries dealing with the characteristics of the people and their society.

People—note: This entry includes miscellaneous demographic information of significance not included elsewhere.

Notes and Definitions *(continued)*

Personal Names—Capitalization: The *Factbook* capitalizes the surname or family name of individuals for the convenience of our users who are faced with a world of different cultures and naming conventions. An example would be President SADDAM Husayn of Iraq. Saddam is his name and Husayn is his father's name. He may be referred to as President SADDAM Husayn or President SADDAM, but **not** President Husayn. The need for capitalization, bold type, underlining, italics, or some other indicator of the individual's surname is apparent in the following examples: MAO Zedong, Fidel CASTRO Ruz, William Jefferson CLINTON, and TUNKU SALAHUDDIN Abdul Aziz Shah ibni Al-Marhum Sultan Hisammuddin Alam Shah. By knowing the surname, a short form without all capital letters can be used with confidence as in President Saddam, President Castro, Chairman Mao, President Clinton, or Sultan Tunku Salahuddin. The same system of capitalization is extended to the names of leaders with surnames that are not commonly used such as Queen ELIZABETH II.

Personal Names—Spelling: The romanization of personal names in the *Factbook* normally follows the same transliteration system used by the US Board on Geographic Names for spelling place names. At times, however, a foreign leader expressly indicates a preference for, or the media or official documents regularly use, a romanized spelling that differs from the transliteration derived from the US Government standard. In such cases, the *Factbook* uses the alternative spelling.

Personal Names—Titles: The *Factbook* capitalizes any valid title (or short form of it) immediately preceding a person's name. A title standing alone is lowercased. Examples: President YEL'TSIN and President CLINTON are chiefs of state. In Russia, the president is chief of state and the premier is the head of the government, while in the US, the president is both chief of state and head of government.

Pipelines: This entry gives the lengths and types of pipelines for transporting products like natural gas, crude oil, or petroleum products.

Political parties and leaders: This entry includes a listing of significant political organizations and their leaders.

Political pressure groups and leaders: This entry includes a listing of organizations with leaders involved in politics, but not standing for legislative election.

Population: This entry gives an estimate from the US Bureau of the Census based on statistics from population censuses, vital statistics registration systems, or sample surveys pertaining to the recent past and on assumptions about future trends. The total population presents one overall measure of the potential impact of the country on the world and within its region. Note: starting with the 1993 *Factbook*, demographic estimates for some countries (mostly African) have taken into account the effects of the growing incidence of AIDS infections. These countries are Botswana, Brazil, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Ethiopia, Guyana, Haiti, Honduras, Kenya, Lesotho, Malawi, Namibia, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Thailand, Uganda, Zambia, and Zimbabwe.

Notes and Definitions *(continued)*

Population below poverty line: National estimates of the percentage of the population lying below the poverty line are based on surveys of sub-groups, with the results weighted by the number of people in each group. Definitions of poverty vary considerably among nations. For example, rich nations generally employ more generous standards of poverty than poor nations.

Population growth rate: The average annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative. The growth rate is a factor in determining how great a burden would be imposed on a country by the changing needs of its people for infrastructure (e.g., schools, hospitals, housing, roads), resources (e.g., food, water, electricity), and jobs. Rapid population growth can be seen as threatening by neighboring countries.

Ports and harbors: This entry lists the major ports and harbors selected on the basis of overall importance to each country. This is determined by evaluating a number of factors (e.g., dollar value of goods handled, gross tonnage, facilities, military significance).

Radio broadcast stations: This entry includes the total number of AM, FM, and shortwave broadcast stations.

Radios: This entry gives the total number of radio receivers.

Railways: This entry includes the *total* length of the railway network and component parts by gauge: *broad, dual, narrow, standard, and other.*

Reference maps: This section includes world, regional, and special or current interest maps.

Religions: This entry includes a rank ordering of religions starting with the largest and sometimes includes the percent of total population.

Sex ratio: This entry includes the number of males for each female in five age groups—at birth, under 15 years, 15-64 years, 65 years and over, and for the *total population*. Sex ratio at birth has recently emerged as an indicator of certain kinds of sex discrimination in some countries. For instance, high sex ratios at birth in some Asian countries are now attributed to sex-selective abortion and infanticide due to a strong preference for sons. This will affect future marriage patterns and fertility patterns. Eventually it could cause unrest among young adult males who are unable to find partners. The sex ratio at birth for the World is 1.06 (1999 est.).

Suffrage: This entry gives the age at enfranchisement and whether the right to vote is universal or restricted.

Telephone numbers: All telephone numbers in the *Factbook* consist of the country code in brackets, the city or area code (where required) in parentheses, and the local number. The one component that is not presented is the international access code, which varies from country to country. For example, an international direct dial telephone call placed from the US to Madrid, Spain, would be as follows:

011 [34] (1) 577-xxxx, where
011 is the international access code for station-to-station calls
(01 is for calls other than station-to-station calls),
[34] is the country code for Spain,
(1) is the city code for Madrid,
577 is the local exchange, and
xxxx is the local telephone number.

Notes and Definitions (continued)

An international direct dial telephone call placed from another country to the US would be as follows:

international access code + [1] (202) 939-xxxx, where
[1] is the country code for the US,
(202) is the area code for Washington, DC,
939 is the local exchange, and
xxxx is the local telephone number.

Telephone system: This entry includes a brief characterization of the system with details on the *domestic* and *international* components. The following terms and abbreviations are used throughout the entry:

Arabsat—Arab Satellite Communications Organization (Riyadh, Saudi Arabia).

Autodin—Automatic Digital Network (US Department of Defense).

CB—citizen's band mobile radio communications.

cellular telephone system—the telephones in this system are radio transceivers, with each instrument having its own private radio frequency and sufficient radiated power to reach the booster station in its area (cell), from which the telephone signal is fed to a regular telephone exchange.

Central American Microwave System—a trunk microwave radio relay system that links the countries of Central America and Mexico with each other.

coaxial cable—a multichannel communication cable consisting of a central conducting wire, surrounded by and insulated from a cylindrical conducting shell; a large number of telephone channels can be made available within the insulated space by the use of a large number of carrier frequencies.

Comsat—Communications Satellite Corporation (US).

DSN—Defense Switched Network (formerly Automatic Voice Network or Autovon); basic general-purpose, switched voice network of the Defense Communications System (US Department of Defense).

Eutelsat—European Telecommunications Satellite Organization (Paris).

fiber-optic cable—a multichannel communications cable using a thread of optical glass fibers as a transmission medium in which the signal (voice, video, etc.) is in the form of a coded pulse of light.

HF—high-frequency; any radio frequency in the 3,000- to 30,000-kHz range.

Inmarsat—International Mobile Satellite Organization (London); provider of global mobile satellite communications for commercial, distress, and safety applications at sea, in the air, and on land.

Intelsat—International Telecommunications Satellite Organization (Washington, DC).

Intersputnik—International Organization of Space Communications (Moscow); first established in the former Soviet Union and the East European countries, it is now marketing its services worldwide with earth stations in North America, Africa, and East Asia.

landline—communication wire or cable of any sort that is installed on poles or buried in the ground.

Marecs—Maritime European Communications Satellite used in the Inmarsat system on lease from the European Space Agency.

Marisat—satellites of the Comsat Corporation that participate in the Inmarsat system.

Medarabel—the Middle East Telecommunications Project of the International Telecommunications Union (ITU) providing a modern telecommunications network, primarily by microwave radio relay, linking Algeria, Djibouti, Egypt, Jordan, Libya, Morocco, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, and

Notes and Definitions *(continued)*

Yemen; it was initially started in Morocco in 1970 by the Arab Telecommunications Union (ATU) and was known at that time as the Middle East Mediterranean Telecommunications Network.

microwave radio relay—transmission of long distance telephone calls and television programs by highly directional radio microwaves that are received and sent on from one booster station to another on an optical path.

NMT—Nordic Mobile Telephone; an analog cellular telephone system that was developed jointly by the national telecommunications authorities of the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden).

Orbita—a Russian television service; also the trade name of a packet-switched digital telephone network.

radiotelephone communications—the two-way transmission and reception of sounds by broadcast radio on authorized frequencies using telephone handsets.

satellite communication system—a communication system consisting of two or more earth stations and at least one satellite that provides long distance transmission of voice, data, and television; the system usually serves as a trunk connection between telephone exchanges; if the earth stations are in the same country, it is a domestic system.

satellite earth station—a communications facility with a microwave radio transmitting and receiving antenna and required receiving and transmitting equipment for communicating with satellites.

satellite link—a radio connection between a satellite and an earth station permitting communication between them, either one-way (down link from satellite to earth station—television receive-only transmission) or two-way (telephone channels).

SHF—super-high-frequency; any radio frequency in the 3,000- to 30,000-MHz range.

shortwave—radio frequencies (from 1.605 to 30 MHz) that fall above the commercial broadcast band and are used for communication over long distances.

Solidaridad—geosynchronous satellites in Mexico's system of international telecommunications in the Western Hemisphere.

Stasionar—Russia's geostationary system for satellite telecommunications.

submarine cable—a cable designed for service under water.

TAT—Trans-Atlantic Telephone; any of a number of high-capacity submarine coaxial telephone cables linking Europe with North America.

telefax—facsimile service between subscriber stations via the public switched telephone network or the international Datel network.

telegraph—a telecommunications system designed for unmodulated electric impulse transmission.

telex—a communication service involving teletypewriters connected by wire through automatic exchanges.

tropospheric scatter—a form of microwave radio transmission in which the troposphere is used to scatter and reflect a fraction of the incident radio waves back to earth; powerful, highly directional antennas are used to transmit and receive the microwave signals; reliable over-the-horizon communications are realized for distances up to 600 miles in a single hop; additional hops can extend the range of this system for very long distances.

trunk network—a network of switching centers, connected by multichannel trunk lines.

UHF—ultra-high-frequency; any radio frequency in the 300- to 3,000-MHz range.

VHF—very-high-frequency; any radio frequency in the 30- to 300-MHz range.

Telephones: This entry gives the total number of subscribers.

Notes and Definitions *(continued)*

Television—broadcast stations: This entry gives the total number of separate broadcast stations plus any repeater stations.

Televisions: This entry gives the total number of television sets.

Terminology: Due to the highly structured nature of the *Factbook* database, some collective generic terms have to be used. For example, the word **Country** in the **Country name** entry refers to a wide variety of dependencies, areas of special sovereignty, uninhabited islands, and other entities in addition to the traditional countries or independent states. **Military** is also used as an umbrella term for various civil defense, security, and defense activities in many entries. The **Independence** entry includes the usual colonial independence dates and former ruling states as well as other significant nationhood dates such as the traditional founding date or the date of unification, federation, confederation, establishment, or state succession that are not strictly independence dates. Dependent areas have the nature of their dependency status noted in this same entry.

Terrain: This entry contains a brief description of the topography.

Total fertility rate: This entry gives a figure for the average number of children that would be born per woman if all women lived to the end of their childbearing years and bore children according to a given fertility rate at each age. The total fertility rate is a more direct measure of the level of fertility than the crude birth rate, since it refers to births per woman. This indicator shows the potential for population growth in the country. High rates will also place some limits on the labor force participation rates for women. Large numbers of children born to women indicate large family sizes that might limit the ability of the families to feed and educate their children.

Transnational Issues: This category includes only two entries at the present time—**Disputes—international** and **Illicit drugs**—that deal with current issues going beyond national boundaries.

Transportation: This category includes the entries dealing with the means for movement of people and goods.

Transportation—note: This entry includes miscellaneous transportation information of significance not included elsewhere.

Unemployment rate: This entry contains the percent of the labor force that is without jobs. Substantial underemployment might be noted.

United Nations System: This information is presented in **Appendix B: United Nations System** as a chart, table, or text (depending on the version of the *Factbook*) that shows the organization of the UN in detail.

Waterways: This entry gives the total length and individual names of navigable rivers, canals, and other inland bodies of water.

Weights and measures: This information is presented in **Appendix E: Weights and Measures** and includes mathematical notations (mathematical powers and names), metric interrelationships (prefix; symbol; length, weight, or capacity; area; volume), and standard conversion factors.

Notes and Definitions *(continued)*

Years: All year references are for the calendar year (CY) unless indicated as fiscal year (FY). The calendar year is an accounting period of 12 months from 1 January to 31 December. The fiscal year is an accounting period of 12 months other than 1 January to 31 December. FY93/94 refers to the fiscal year that began in calendar year 1993 and ended in calendar year 1994.

Note: Information for the US and US dependencies was compiled from material in the public domain and does not represent Intelligence Community estimates.

definition: age 15 and over can read and write

total population: 31.5%

male: 47.2%

female: 15% (1995 est.)

Government

Country name:

conventional long form: Islamic State of Afghanistan;

note - the self-proclaimed Taliban government refers to the country as Islamic Emirate of Afghanistan

conventional short form: Afghanistan

local long form: Dowlat-e Eslami-ye Afghanistan

local short form: Afghanistan

former: Republic of Afghanistan

Data code: AF

Government type: transitional government

Capital: Kabul

Administrative divisions: 30 provinces (velayat, singular - velayat); Badakhshan, Badghis, Baghlan, Balkh, Bamian, Farah, Faryab, Ghazni, Ghowr, Helmand, Herat, Jowzjan, Kabul, Kandahar, Kapisa, Konar, Kondo, Laghman, Lowgar, Nangarhar, Nimruz, Oruzgan, Paktia, Paktika, Parvan, Samangan, Sar-e Pol, Takhar, Vardak, Zabol
note: there may be two new provinces of Nurestan (Nuristan) and Khowst

Independence: 19 August 1919 (from UK control over Afghan foreign affairs)

National holiday: Victory of the Muslim Nation, 28 April; Remembrance Day for Martyrs and Disabled, 4 May; Independence Day, 19 August

Constitution: none

Legal system: a new legal system has not been adopted but all factions tacitly agree they will follow Shari'a (Islamic law)

Suffrage: undetermined; previously males 15-50 years of age

Executive branch: on 27 September 1996, the ruling members of the Afghan Government were displaced by members of the Islamic Taliban movement; the Islamic State of Afghanistan has no functioning government at this time, and the country remains divided among fighting factions
note: the Taliban have declared themselves the legitimate government of Afghanistan; the UN has deferred a decision on credentials and the Organization of the Islamic Conference has left the Afghan seat vacant until the question of legitimacy can be resolved through negotiations among the warring factions; the country is essentially divided along ethnic lines; the Taliban controls the capital of Kabul and approximately two-thirds of the country including the predominately ethnic Pashtun areas in southern Afghanistan; opposing factions have their stronghold in the ethnically diverse north

Legislative branch: non-functioning as of June 1993

Judicial branch: non-functioning as of March 1995, although there are local Shari'a (Islamic law) courts throughout the country

Political parties and leaders: Taliban (Religious Students Movement) [Mohammad OMAR]; United Islamic Front for the Salvation of Afghanistan comprised of Jumbesh-i-Melli Islami (National Islamic Movement) [Abdul Rashid DOSTAM]; Jamiat-i-Islami (Islamic Society) [Burhanuddin RABBANI and Ahmad Shah MASOOD]; and Hizbi Wahdat-Khalili faction (Islamic Unity Party) [Abdul Karim KHALILI]; other smaller parties are Hizbi Islami-Gulbuddin (Islamic Party) [Gulbuddin HIKMATYAR faction]; Hizbi Islami-Khalis (Islamic Party) [Yunis KHALIS faction]; Ittihad-i-Islami Barai Azadi Afghanistan (Islamic Union

Afghanistan (continued)

for the Liberation of Afghanistan) [Abdul Rasul SAYYAF]; Harakat-Inqilab-i-Islami (Islamic Revolutionary Movement) [Mohammad Nabi MOHAMMADI]; Jabha-i-Najat-i-Milli Afghanistan (Afghanistan National Liberation Front) [Sibghatullah MOJADDEDI]; Mahaz-i-Milli-Islami (National Islamic Front) [Sayed Ahamad GAILANI]; Hizbi Wahdat-Akbari faction (Islamic Unity Party) [Mohammad Akbar AKBARI]; Harakat-i-Islami (Islamic Movement) [Mohammed Asif MOHSENI]

Political pressure groups and leaders: tribal elders represent traditional Pashtun leadership; Afghan refugees in Pakistan, Australia, US, and elsewhere have organized politically; Peshawar, Pakistan-based groups such as the Coordination Council for National Unity and Understanding in Afghanistan or CUNUA [Ishaq GAILANI]; Writers Union of Free Afghanistan or WUFA [A. Rasul AMIN]; Mellat (Social Democratic Party) [leader NA]

International organization participation: AsDB, CP, ECO, ESCAP, FAO, G-77, IAEA, IBRD, ICAO, ICRM, IDA, IDB, IFAD, IFC, IFRCS, ILO, IMF, Intelsat, IOC, IOM (observer), ITU, NAM, OIC, OPCW, UN, UNCTAD, UNESCO, UNIDO, UPU, WFTU, WHO, WMO, WTO

Diplomatic representation in the US:

note: embassy operations suspended 21 August 1997
chief of mission: Ambassador (vacant)

chancery: 2341 Wyoming Avenue NW, Washington, DC 20008

telephone: [1] (202) 234-3770

FAX: [1] (202) 328-3516

consulate(s) general: New York

Diplomatic representation from the US: the US embassy in Kabul has been closed since January 1989 due to security concerns

Flag description: three equal horizontal bands of green (top), white, and black with a gold emblem centered on the three bands; the emblem features a temple-like structure with Islamic inscriptions above and below, encircled by a wreath on the left and right and by a bolder Islamic inscription above, all of which are encircled by two crossed scimitars

note: the Taliban uses a plain white flag

Economy

Economy - overview: Afghanistan is an extremely poor, landlocked country, highly dependent on farming and livestock raising (sheep and goats). Economic considerations have played second fiddle to political and military upheavals during two decades of war, including the nearly 10-year Soviet military occupation (which ended 15 February 1989). During that conflict one-third of the population fled the country, with Pakistan and Iran sheltering a combined peak of more than 6 million refugees. Now, only 750,000 registered Afghan refugees remain in Pakistan and about 1.2 million in Iran. Another 1 million have probably moved into and around urban areas within Afghanistan. Gross domestic product has fallen substantially over the past 20 years because of the loss of labor and capital and the disruption of trade

and transport. Much of the population continues to suffer from insufficient food, clothing, housing, and medical care. Inflation remains a serious problem throughout the country, with one estimate putting the rate at 240% in Kabul in 1996. International aid can deal with only a fraction of the humanitarian problem, let alone promote economic development.

Government efforts to encourage foreign investment have not worked. The economic situation did not improve in 1998. Numerical data are likely to be either unavailable or unreliable.

Fiscal year: 21 March - 20 March

Communications

Telephones: 31,200 (1983 est.)

Telephone system:

domestic: very limited telephone and telegraph service; in 1997, telecommunications links were established between Mazar-e Sharif, Herat, Kandahar, Jalalabad, and Kabul through satellite and microwave systems

international: satellite earth stations - 1 Intelsat (Indian Ocean) linked only to Iran and 1 Intersputnik (Atlantic Ocean region); commercial satellite telephone center in Ghazni

Radio broadcast stations: AM 6 (5 are inactive), FM 1, shortwave 3 (1998)

Radios: 1.67 million (1998 est.)

Television broadcast stations: NA

note: in 1997, there was a station in Mazar-e Sharif reaching four northern Afghanistan provinces; also, the government ran a central television station in Kabul and regional stations in nine of the 30 provinces; it is unknown if any of these stations currently operate

Televisions: 100,000 (1998 est.)

Transportation

Railways:

total: 24.6 km

broad gauge: 9.6 km 1.524-m gauge from Gushgy (Turkmenistan) to Towraghondi; 15 km 1.524-m gauge from Termiz (Uzbekistan) to Kheyraabad transshipment point on south bank of Amu Darya

Highways:

total: 21,000 km

Economy

Economy - overview: An extremely poor country by European standards, Albania is making the difficult transition to a more open-market economy. The economy rebounded in 1993-95 after a severe depression accompanying the collapse of the previous centrally planned system in 1990 and 1991. However, a weakening of government resolve to maintain stabilization policies in the election year of 1996 contributed to renewal of inflationary pressures, spurred by the budget deficit which exceeded 12%. The collapse of financial pyramid schemes in early 1997 - which had attracted deposits from a substantial portion of Albania's population - triggered severe social unrest which led to more than 1,500 deaths, widespread destruction of property, and an 8% drop in GDP. The new government installed in July 1997 has taken strong measures to restore public order and to revive economic activity and trade. The economy continues to be bolstered by remittances of some 20% of the labor force which works abroad, mostly in

Greece and Italy. These remittances supplement GDP and help offset the large foreign trade deficit. Most agricultural land was privatized in 1992, substantially improving peasant incomes. In 1998, Albania probably recovered most if not all of the 7% drop in GDP of 1997.

Economy

Economy - overview: The hydrocarbons sector is the backbone of the economy, accounting for roughly 52% of budget revenues, 25% of GDP, and over 95% of export earnings. Algeria has the fifth-largest reserves of natural gas in the world and is the second largest gas exporter; it ranks fourteenth for oil reserves. Algiers' efforts to reform one of the most centrally planned economies in the Arab world began after the 1986 collapse of world oil prices plunged the country into a severe recession. In 1989, the government launched a comprehensive, IMF-supported program to achieve economic stabilization and to introduce market mechanisms into the economy. Despite substantial progress toward economic adjustment, in 1992 the reform drive stalled as Algiers became embroiled in political turmoil. In September 1993, a new government was formed, and one priority was the resumption and acceleration of the structural adjustment process. Burdened with a heavy foreign debt, Algiers concluded a one-year standby arrangement with the IMF in April 1994 and the following year signed onto a three-year extended fund facility which ended 30 April 1998. Progress on economic reform, a Paris Club debt rescheduling in 1995, and oil and gas sector expansion have contributed to a recovery since 1995. Investments in developing hydrocarbon resources have spurred growth, but the economy remains heavily dependent on volatile oil and gas revenues. The government has continued efforts to diversify the economy by attracting foreign and domestic investment outside the energy sector in order to reduce high unemployment and improve living standards.

Economy

Economy - overview: This is a traditional Polynesian economy in which more than 90% of the land is communally owned. Economic activity is strongly linked to the US, with which American Samoa conducts the great bulk of its foreign trade. Tuna fishing and tuna processing plants are the backbone of the private sector, with canned tuna the primary export. Transfers from the US Government add substantially to American Samoa's economic well-being. According to one observer, attempts by the government to develop a larger and broader economy are restrained by Samoa's remote location, its limited transportation, and its devastating hurricanes. Tourism, a developing sector, may be held back by the current financial difficulties in East Asia.

Economy

Economy - overview: Tourism, the mainstay of Andorra's tiny, well-to-do economy, accounts for roughly 80% of GDP. An estimated 10 million tourists visit annually, attracted by Andorra's duty-free status and by its summer and winter resorts. Andorra's comparative advantage has recently eroded as the economies of neighboring France and Spain have been opened up, providing broader availability of goods and lower tariffs. The banking sector, with its "tax haven" status, also contributes substantially to the economy. Agricultural production is limited by a scarcity of arable land, and most food has to be imported. The principal livestock activity is sheep raising. Manufacturing consists mainly of cigarettes, cigars, and furniture. Andorra is a member of the EU Customs Union and is treated as an EU member for trade in manufactured goods (no tariffs) and as a non-EU member for agricultural products.

National holiday: Independence Day, 11 November (1975)

Constitution: 11 November 1975; revised 7 January 1978, 11 August 1980, 6 March 1991, and 26 August 1992

Legal system: based on Portuguese civil law system and customary law; recently modified to accommodate political pluralism and increased use of free markets

Suffrage: 18 years of age; universal

Executive branch:

chief of state: President Jose Eduardo DOS SANTOS (since 21 September 1979); note - the president is both chief of state and head of government

head of government: President Jose Eduardo DOS SANTOS (since January 1999); note - the president is both chief of state and head of government
cabinet: Council of Ministers appointed by the president

elections: President DOS SANTOS originally elected without opposition under a one-party system and stood for reelection in Angola's first multiparty elections in 28-29 September 1992, the last elections to be held (next to be held NA)

election results: DOS SANTOS received 49.6% of the total vote, making a run-off election necessary between him and second-place finisher Jonas SAVIMBI; the run-off was not held and SAVIMBI's National Union for the Total Independence of Angola (UNITA) repudiated the results of the first election; the civil war resumed

Legislative branch: unicameral National Assembly or Assembleia Nacional (220 seats; members elected by proportional vote to serve four-year terms)

elections: last held 29-30 September 1992 (next to be held NA)

election results: percent of vote by party - MPLA 54%, UNITA 34%, others 12%; seats by party - MPLA 129, UNITA 70, PRS 6, FNLA 5, PLD 3, others 7

Judicial branch: Supreme Court or Tribunal da Relacao, judges of the Supreme Court are appointed by the president

Political parties and leaders: Popular Movement

for the Liberation of Angola or MPLA [Jose Eduardo DOS SANTOS] ruling party in power since 1975; National Union for the Total Independence of Angola or UNITA [Jonas SAVIMBI], largest opposition party engaged in years of armed resistance before joining the current unity government in April 1997; Social Renewal Party or PRS [leader NA]; National Front for the Liberation of Angola or FNLA [leader NA]; Liberal Democratic Party or PLD [leader NA]

note: about a dozen minor parties participated in the 1992 elections but won few seats and have little influence in the National Assembly

Political pressure groups and leaders: Front for the Liberation of the Enclave of Cabinda or FLEC
note: FLEC is waging a small-scale, highly factionalized, armed struggle for the independence of Cabinda Province

Economy

Economy - overview: Angola is an economy in disarray because of more than 20 years of nearly continuous warfare. Despite its abundant natural resources, output per capita is among the world's lowest. Subsistence agriculture provides the main livelihood for 85% of the population. Oil production and the supporting activities are vital to the economy, contributing about 45% to GDP. Notwithstanding the signing of a peace accord in November 1994, sporadic violence continues, millions of land mines remain, and many farmers are reluctant to return to their fields. As a result, much of the country's food must still be imported. To take advantage of its rich resources - gold, diamonds, extensive forests, Atlantic fisheries, arable land, and large oil deposits - Angola

will need to implement the peace agreement and reform government policies. The increase in the pace of civil warfare in late 1998 dims economic prospects for 1999 especially if the oil sector were to be damaged.

Economy

Economy - overview: Anguilla has few natural resources, and the economy depends heavily on luxury tourism, offshore banking, lobster fishing, and remittances from emigrants. The economy, and especially the tourism sector, suffered a setback in late 1995 due to the effects of Hurricane Luis in September but recovered in 1996. Increased activity in the tourism industry, which has spurred the growth of the construction sector, contributed to economic growth in 1997-98. Anguillian officials have put substantial effort into developing the offshore financing sector. A comprehensive package of financial services legislation was enacted in late 1994. In the medium term, prospects for the economy will depend on the tourism sector and, therefore, on continuing income growth in the industrialized nations.

note: second-smallest continent (after Australia)

Area - comparative: slightly less than 1.5 times the size of the US

Land boundaries: 0 km

note: see entry on International disputes

Coastline: 17,968 km

Maritime claims: none, but see entry on International disputes

Climate: severe low temperatures vary with latitude, elevation, and distance from the ocean; East Antarctica is colder than West Antarctica because of its higher elevation; Antarctic Peninsula has the most moderate climate; higher temperatures occur in January along the coast and average slightly below freezing

Terrain: about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to about 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Elevation extremes:

lowest point: Indian Ocean 0 m

Natural hazards: katabatic (gravity-driven) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise along the coast; volcanism on Deception Island and isolated areas of West Antarctica; other seismic activity rare and weak

Environment - current issues: in 1998, NASA satellite data showed that the antarctic ozone hole was the largest on record, covering 27 million square kilometers; researchers in 1997 found that increased ultraviolet light coming through the hole damages the DNA of icefish, an antarctic fish lacking hemoglobin; ozone depletion earlier was shown to harm one-celled antarctic marine plants

Environment - international agreements:

party to: none of the selected agreements

signed, but not ratified: none of the selected agreements

Geography - note: the coldest, windiest, highest, and driest continent; during summer, more solar radiation reaches the surface at the South Pole than is received at the Equator in an equivalent period; mostly uninhabitable

People

Population: no indigenous inhabitants, but there are seasonally staffed research stations

note: approximately 29 nations, all signatory to the Antarctic Treaty, send personnel to perform seasonal (summer) and year-round research on the continent and in its surrounding oceans; the population of persons doing and supporting science on the continent and its nearby islands south of 60 degrees south latitude (the region covered by the Antarctic Treaty) varies from approximately 4,000 in summer to 1,000 in winter; in addition, approximately 1,000 personnel including ship's crew and scientists doing onboard research are present in the waters of the treaty region; Summer (January) population - 3,687 total; Argentina 302, Australia 201, Belgium 13, Brazil 80, Bulgaria 16, Chile 352, China 70, Finland 11, France 100, Germany 51, India 60, Italy 106, Japan 136, South Korea 14, Netherlands 10, NZ 60, Norway 40, Peru 28, Poland 70, Russia 254, South Africa 80, Spain 43, Sweden 20, UK 192, US 1,378 (1998-99); Winter (July) population - 964 total; Argentina 165, Australia 75, Brazil 12, Chile 129, China 33, France 33, Germany 9, India 25, Japan 40, South Korea 14, NZ 10, Poland 20, Russia 102, South Africa 10, UK 39, US 248 (1998-99); year-round stations - 42 total; Argentina 6, Australia 4, Brazil 1, Chile 4, China 2, Finland 1, France 1, Germany 1, India 1, Italy 1, Japan 1, South Korea 1, NZ 1, Norway 1, Poland 1, Russia

Government type: Antarctic Treaty Summary - the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, establishes the legal framework for the management of Antarctica. Administration is carried out through consultative member meetings - the 22nd Antarctic Treaty Consultative Meeting was in Norway in May 1998. At the end of 1998, there were 43 treaty member nations: 27 consultative and 16 acceding. Consultative (voting) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 20 nonclaimant nations. The US and some other nations that have made no claims have reserved the right to do so. The US does not recognize the claims of others. The year in parentheses indicates when an acceding nation was voted to full consultative (voting) status, while no date indicates the country was an original 1959 treaty signatory. Claimant nations are - Argentina, Australia, Chile, France, New Zealand, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1983), Bulgaria (1978), China (1985), Ecuador (1990), Finland (1989), Germany (1981), India (1983), Italy (1987), Japan, South Korea (1989), Netherlands (1990), Peru (1989), Poland (1977), Russia, South Africa, Spain (1988), Sweden (1988), Uruguay (1985), and the US. Acceding (nonvoting) members, with year of accession in parentheses, are - Austria (1987), Canada (1988), Colombia (1988), Cuba (1984), Czech Republic (1993), Denmark (1965), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Papua New Guinea (1981), Romania (1971), Slovakia (1993), Switzerland (1990), Turkey (1995), and Ukraine (1992). Article 1 - area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2 - freedom of scientific investigation and cooperation shall continue; Article 3 - free exchange of information and personnel in cooperation with the UN and other international agencies; Article 4 - does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5 - prohibits nuclear explosions or disposal of radioactive wastes; Article 6 - includes under the treaty all land and ice shelves south of 60 degrees 00 minutes south; Article

7 - treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all activities and of the introduction of military personnel must be given; Article 8 - allows for jurisdiction over observers and scientists by their own states; Article 9 - frequent consultative meetings take place among member nations; Article 10 - treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11 - disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14 - deal with upholding, interpreting, and amending the treaty among involved nations. Other agreements - some 200 recommendations adopted at treaty consultative meetings and ratified by governments include - Agreed Measures for the Conservation of Antarctic Fauna and Flora (1964); Convention for the Conservation of Antarctic Seals (1972); Convention on the Conservation of Antarctic Marine Living Resources (1980); a mineral resources agreement was signed in 1988 but was subsequently rejected; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through five specific annexes on marine pollution, fauna, and flora, environmental impact assessments, waste management, and protected areas; it prohibits all activities relating to mineral resources except scientific research.

Legal system: US law, including certain criminal offenses by or against US nationals, such as murder, may apply to areas not under jurisdiction of other countries. Some US laws directly apply to Antarctica. For example, the Antarctic Conservation Act, 16 U.S.C. section 2401 et seq., provides civil and criminal penalties for the following activities, unless authorized by regulation of statute: the taking of native mammals or birds; the introduction of nonindigenous plants and animals; entry into specially protected or scientific areas; the discharge or disposal of pollutants; and the importation into the US of certain items from Antarctica. Violation of the Antarctic Conservation Act carries penalties of up to \$10,000 in fines and one year in prison. The Departments of Treasury, Commerce, Transportation, and Interior share enforcement responsibilities. Public Law 95-541, the US Antarctic Conservation Act of 1978, requires expeditions from the US to Antarctica to notify, in advance, the Office of Oceans and Polar Affairs, Room 5801, Department of State, Washington, DC 20520, which reports such plans to other nations as required by the Antarctic Treaty. For more information, contact Permit Office, Office of Polar Programs, National Science Foundation, Arlington, Virginia 22230 (703) 306-1031, or see their website at www.nsf.gov.

Economy

Economy - overview: No economic activity is conducted at present, except for fishing off the coast

and small-scale tourism, both based abroad. Antarctic fisheries in 1997-98 reported landing 92,456 metric tons. Unregulated fishing landed five to six times more than the regulated fishery, and allegedly illegal fishing in antarctic waters in 1998 resulted in the seizure (by France and Australia) of at least eight fishing ships. A total of 9,604 tourists visited in the 1997-98 summer, up from the 7,413 who visited the previous year. Nearly all of them were passengers on 13 commercial (nongovernmental) ships that made 92 trips during the summer. Around 200 tourists were on yachts or commercial aircraft. Most tourist trips lasted approximately two weeks.

Military

Military - note: the Antarctic Treaty prohibits any measures of a military nature, such as the establishment of military bases and fortifications, the carrying out of military maneuvers, or the testing of any type of weapon; it permits the use of military personnel or equipment for scientific research or for any other peaceful purposes

Transnational Issues

Disputes - international: Antarctic Treaty defers claims (see Antarctic Treaty Summary above); sections (some overlapping) claimed by Argentina, Australia, Chile, France (Adelie Land), New Zealand (Ross Dependency), Norway (Queen Maud Land), and UK; the US and most other nations do not recognize the territorial claims of other nations and have made no claims themselves (the US reserves the right to do so); no formal claims have been made in the sector between 90 degrees west and 150 degrees west

Economy

Economy - overview: Tourism continues to be by far the dominant activity in the economy accounting directly or indirectly for more than half of GDP. Increased tourist arrivals have helped spur growth in the construction and transport sectors. The dual island nation's agricultural production is mainly directed to the domestic market; the sector is constrained by the limited water supply and labor shortages that reflect the pull of higher wages in tourism and construction. Manufacturing comprises enclave-type assembly for export with major products being bedding, handicrafts, and electronic components. Prospects for economic growth in the medium term will continue to depend on income growth in the industrialized world, especially in the US, which accounts for about half of all tourist arrivals.

Illicit drugs: over the long-term, considered a relatively minor transshipment point for narcotics bound for the US and Europe and recently, a transshipment point for heroin from Europe to the US; potentially more significant as a drug-money-laundering center

Arctic Ocean

Geography

Location: body of water mostly north of the Arctic Circle

Geographic coordinates: 90 00 N, 0 00 E

Map references: Arctic Region

Area:

total: 14,056 million sq km

note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Area - comparative: slightly less than 1.5 times the size of the US; smallest of the world's four oceans (after Pacific Ocean, Atlantic Ocean, and Indian Ocean)

Coastline: 45,389 km

Climate: polar climate characterized by persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain: central surface covered by a perennial drifting polar icepack that averages about 3 meters in thickness, although pressure ridges may be three times that size; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonsov Ridge)

Elevation extremes:

lowest point: Fram Basin -4,665 m

highest point: sea level 0 m

Natural resources: sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals and whales)

Natural hazards: ice islands occasionally break away from northern Ellesmere Island; icebergs calved from glaciers in western Greenland and extreme northeastern Canada; permafrost in islands; virtually icelocked from October to June; ships subject to superstructure icing from October to May

Environment - current issues: endangered marine species include walrus and whales; fragile ecosystem slow to change and slow to recover from disruptions or damage

Environment - international agreements:

party to: none of the selected agreements

signed, but not ratified: none of the selected agreements

Geography - note: major chokepoint is the southern Chukchi Sea (northern access to the Pacific Ocean via the Bering Strait); strategic location between North America and Russia; shortest marine link between the extremes of eastern and western Russia; floating research stations operated by the US and Russia; maximum snow cover in March or April about 20 to 50 centimeters over the frozen ocean; snow cover lasts about 10 months

Government

Data code: none; the US Government has not approved a standard for hydrographic codes - see the Cross-Reference List of Hydrographic Data Codes appendix

Economy

Communications

Telephone system:

international: no submarine cables

Transportation

Ports and harbors: Churchill (Canada), Murmansk (Russia), Prudhoe Bay (US)

Transportation - note: sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Eurasia) are important seasonal waterways

Transnational Issues

Disputes - international: some maritime disputes (see littoral states); Svalbard is the focus of a maritime boundary dispute between Norway and Russia

Argentina

Introduction

Background: A part of the Spanish empire until independence in 1816, Argentina subsequently experienced periods of internal political conflict between conservatives and liberals and between civilian and military factions. Meantime, thanks to rich natural resources and foreign investment, a modern agriculture and a diversified industry were gradually developed. After World War II, a long period of Peronist dictatorship was followed by rule by a military junta. Democratic elections finally came in 1983, but both the political and economic atmosphere remain susceptible to turmoil.

Economy

Economy - overview: Argentina benefits from rich natural resources, a highly literate population, an export-oriented agricultural sector, and a diversified industrial base. However, when President Carlos MENEM took office in 1989, the country had piled up huge external debts, inflation had reached 200% per month, and output was plummeting. To combat the economic crisis, the government embarked on a path of trade liberalization, deregulation, and privatization. In 1991, it implemented radical monetary reforms which pegged the peso to the US dollar and limited the growth in the monetary base by law to the growth in reserves. Inflation fell sharply in subsequent years. The Mexican peso crisis produced capital flight, the loss of banking system deposits, and a severe, but short-lived, recession in 1995; a series of reforms to bolster the domestic banking system followed. Real GDP growth recovered strongly, reaching almost 9% in 1997. In 1998, increasing investor anxiety over Brazil, its largest trading partner, produced the highest domestic interest rates in more than three years and slowed growth to 4.3%. Despite the relatively high level of growth in recent years, double-digit unemployment rates have persisted, largely because of rigidities in Argentina's labor laws.

Armenia

Introduction

Background: Armenia was one of the 15 successor republics to the USSR in December 1991. Its leaders remain preoccupied by the long conflict with Azerbaijan over the Nagorno-Karabakh enclave. Although a cease-fire has been in effect since May 1994, the sides have not made substantial progress toward a peaceful resolution. In January 1998, differences between President TER-PETROSSIAN and members of his cabinet over the Nagorno-Karabakh peace process came to a head. With the prime minister, defense minister, and security minister arrayed against him, an isolated TER-PETROSSIAN resigned the presidency on 3 February 1998. Prime Minister Robert KOCHARIAN was elected president in March 1998. Concerns about Armenia's economic performance have continued since 1997 with a slowdown in growth and the serious impact of the 1998 financial crisis in Russia.

Economy

Economy - overview: Under the old Soviet central planning system, Armenia had developed a modern industrial sector, supplying machine tools, textiles, and other manufactured goods to sister republics in exchange for raw materials and energy. Since the implosion of the USSR in December 1991, Armenia has switched to small-scale agriculture away from the large agroindustrial complexes of the Soviet area. The agricultural sector has long-term needs for more investment and updated technology. The privatization of industry has been at a slower pace, but has been given renewed emphasis by the current

Armenia (continued)

administration. Armenia is a food importer, and its mineral deposits (gold, bauxite) are small. The ongoing conflict with Azerbaijan over the ethnic Armenian-dominated region of Nagorno-Karabakh and the breakup of the centrally directed economic system of the former Soviet Union contributed to a severe economic decline in the early 1990s. By 1994, however, the Armenian Government had launched an ambitious IMF-sponsored economic program that has resulted in positive growth rates in 1995-98. Armenia also managed to slash inflation and to privatize most small- and medium-sized enterprises. The chronic energy shortages Armenia suffered in recent years have been largely offset by the energy supplied by one of its nuclear power plants at Metsamor. The Russian financial crisis generated concerns about Armenia's economic performance in 1998. Although inflation dropped to 10% and GDP grew about 6%, the industrial sector remained moribund. Much of Armenia's population remains heavily dependent on remittances from relatives abroad, and remittances from Russia fell off sharply in 1998.

Economy

Economy - overview: Tourism is the mainstay of the Aruban economy, although offshore banking and oil refining and storage are also important. The rapid growth of the tourism sector over the last decade has resulted in a substantial expansion of other activities. Construction has boomed, with hotel capacity five times the 1985 level. In addition, the reopening of the country's oil refinery in 1993, a major source of employment and foreign exchange earnings, has

further spurred growth. Aruba's small labor force and less than 1% unemployment rate have led to a large number of unfilled job vacancies, despite sharp rises in wage rates in recent years.

Atlantic Ocean

Geography

Location: body of water between Africa, Europe, Antarctica, and the Western Hemisphere

Geographic coordinates: 0 00 N, 25 00 W

Map references: World

Area:

total: 82,217 million sq km

note: includes Baltic Sea, Black Sea, Caribbean Sea, Davis Strait, Denmark Strait, Drake Passage, Gulf of Mexico, Mediterranean Sea, North Sea, Norwegian Sea, Scotia Sea, Weddell Sea, and other tributary water bodies

Area - comparative: slightly less than nine times the size of the US; second-largest of the world's four oceans (after the Pacific Ocean, but larger than Indian Ocean or Arctic Ocean)

Coastline: 111,866 km

Climate: tropical cyclones (hurricanes) develop off the coast of Africa near Cape Verde and move westward into the Caribbean Sea; hurricanes can occur from May to December, but are most frequent from August to November

Terrain: surface usually covered with sea ice in Labrador Sea, Denmark Strait, and Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic; counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Elevation extremes:

lowest point: Milwaukee Deep in the Puerto Rico Trench -8,605 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, marine mammals (seals and whales), sand and gravel aggregates, placer deposits, polymetallic nodules, precious stones

Natural hazards: icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic Ocean

from February to August and have been spotted as far south as Bermuda and the Madeira Islands; icebergs from Antarctica occur in the extreme southern Atlantic Ocean; ships subject to superstructure icing in extreme northern Atlantic from October to May and extreme southern Atlantic from May to October; persistent fog can be a maritime hazard from May to September

Environment - current issues: endangered marine species include the manatee, seals, sea lions, turtles, and whales; drift net fishing is hastening the decline of fish stocks and contributing to international disputes; municipal sludge pollution off eastern US, southern Brazil, and eastern Argentina; oil pollution in Caribbean Sea, Gulf of Mexico, Lake Maracaibo, Mediterranean Sea, and North Sea; industrial waste and municipal sewage pollution in Baltic Sea, North Sea, and Mediterranean Sea

Environment - international agreements:

party to: none of the selected agreements
signed, but not ratified: none of the selected agreements

Geography - note: major chokepoints include the Dardanelles, Strait of Gibraltar, access to the Panama and Suez Canals; strategic straits include the Strait of Dover, Straits of Florida, Mona Passage, The Sound (Oresund), and Windward Passage; the Equator divides the Atlantic Ocean into the North Atlantic Ocean and South Atlantic Ocean

Government

Data code: none; the US Government has not approved a standard for hydrographic codes - see the Cross-Reference List of Hydrographic Data Codes appendix

Economy

Economy - overview: The Atlantic Ocean provides some of the world's most heavily trafficked sea routes, between and within the Eastern and Western Hemispheres. Other economic activity includes the exploitation of natural resources, e.g., fishing, the dredging of aragonite sands (The Bahamas), and production of crude oil and natural gas (Caribbean Sea, Gulf of Mexico, and North Sea).

Communications

Telephone system:

international: numerous submarine cables with most between continental Europe and the UK, between North America and the UK, and in the Mediterranean; numerous direct links across Atlantic via satellite networks

Transportation

Australia

Introduction

Background: Australia became a British commonwealth in 1901. Blessed by rich natural resources, the country enjoyed rapid gains in herding, agriculture, and manufacturing and made a major contribution to the British effort in World Wars I and II. Australia subsequently developed its minerals, metals, and fossil fuel markets, all of which have become key Australian exports. Long-term concerns include pollution, particularly depletion of the ozone layer, and management and conservation of coastal areas, especially the Great Barrier Reef. Sydney will host the 2000 summer Olympics.

Geography

Location: Oceania, continent between the Indian Ocean and the South Pacific Ocean

Geographic coordinates: 27 00 S, 133 00 E

Map references: Oceania

Area:

total: 7,686,850 sq km

land: 7,617,930 sq km

water: 68,920 sq km

note: includes Lord Howe Island and Macquarie Island

Area - comparative: slightly smaller than the US

Land boundaries: 0 km

Coastline: 25,760 km

Maritime claims:

contiguous zone: 24 nm

continental shelf: 200 nm or to the edge of the continental margin

exclusive economic zone: 200 nm

territorial sea: 12 nm

Climate: generally arid to semiarid; temperate in south and east; tropical in north

Terrain: mostly low plateau with deserts; fertile plain in southeast

Elevation extremes:

lowest point: Lake Eyre -15 m

highest point: Mount Kosciuszko 2,229 m

Natural resources: bauxite, coal, iron ore, copper, tin, silver, uranium, nickel, tungsten, mineral sands, lead, zinc, diamonds, natural gas, petroleum

Land use:

arable land: 6%

permanent crops: 0%

permanent pastures: 54%

forests and woodland: 19%

other: 21% (1993 est.)

Irrigated land: 21,070 sq km (1993 est.)

Natural hazards: cyclones along the coast; severe droughts

Environment - current issues: soil erosion from overgrazing, industrial development, urbanization, and poor farming practices; soil salinity rising due to the use of poor quality water; desertification; clearing for agricultural purposes threatens the natural habitat of many unique animal and plant species; the Great Barrier Reef off the northeast coast, the largest coral reef in the world, is threatened by increased shipping and its popularity as a tourist site; limited natural fresh water resources

Environment - international agreements:

party to: Antarctic-Environmental Protocol, Antarctic Treaty, Biodiversity, Climate Change, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: Climate Change-Kyoto Protocol, Desertification

Geography - note: world's smallest continent but sixth-largest country; population concentrated along the eastern and southeastern coasts; regular, tropical, invigorating, sea breeze known as "the Doctor" occurs along the west coast in the summer

Economy

Economy - overview: Australia has a prosperous Western-style capitalist economy, with a per capita GDP at the level of the four dominant West European economies. Rich in natural resources, Australia is a major exporter of agricultural products, minerals, metals, and fossil fuels. Commodities account for 57% of the value of total exports, so that a downturn in world commodity prices can have a big impact on the economy. The government is pushing for increased exports of manufactured goods, but competition in international markets continues to be severe.

Australia has suffered from the low growth and high unemployment characterizing the OECD countries in the early 1990s, but the economy has expanded at reasonably steady rates in recent years. Canberra's emphasis on reforms is a key factor behind the economy's resilience to the regional crisis and its stronger than expected growth rate that reached 4.5% last year. After a slow start in 1998, exports rebounded in the second half of the year because of a sharp currency depreciation and a redirection of sales to Europe, North America, and Latin America.

Austria

Introduction

Background: Once the center of power for the large Austro-Hungarian empire, Austria was reduced to a small republic after its defeat in World War I. After the annexation to Nazi Germany in 1938 and subsequent occupation by the victorious Allied powers, Austria's 1955 State Treaty declared the country "permanently neutral" as a condition of the Soviet military withdrawal. The Soviet collapse relieved the external pressure to remain unaligned, but neutrality had evolved into a part of Austrian cultural identity, which has led to an ongoing public debate over whether Vienna legitimately can remain outside of European security structures. A wealthy country, Austria joined the European Union in 1995 and, like many EU members, is adjusting to the new European currency and struggling with high unemployment.

Economy

Economy - overview: Austria has a well-developed market economy with a high standard of living. As a member of the European Monetary Union (EMU), Austria's economy is closely integrated with other EU member countries, especially with Germany. Austria's membership in the EU has drawn an influx of foreign investors attracted by Austria's access to the single European market. Through privatization efforts, the 1996-98 budget consolidation programs, and austerity measures, Austria brought its total public sector deficit down to 2.5% of GDP in 1997 and public debt - at 66% of GDP in 1997 - more or less in line with the 60% of GDP required by the EU's Maastricht criteria. Cuts mainly affect the civil service and Austria's generous social system, the two major causes of the government deficit. To meet increased competition from both EU and Central European countries, Austria will need to emphasize knowledge-based sectors of the economy and deregulate the service sector, particularly telecommunications and energy. The strong GDP growth of 1998 is expected to dwindle back to 2.3% in 1999, and observers caution that this projection may be revised downwards in view of the Asian and Brazilian crises and Germany's lower growth projection.

Azerbaijan

Introduction

Background: In 1806, Azerbaijan, a region of Turkic Muslim people, was conquered by the Russians. In 1918, Azerbaijan declared independence from Russia, but was incorporated into the Soviet Union in 1920. It again declared its independence in 1991, following the collapse of the USSR. The conflict between Azerbaijan and Armenia over the Nagorno-Karabakh region is still unresolved after 10 years and Baku has yet to settle disputes with its neighbors over oil rights in the Caspian Sea. During the war, Karabakh Armenians declared independence and seized almost 20% of the country's territory, creating some 750,000 Azerbaijani refugees in the process. Both sides have generally observed a Russian-mediated cease-fire in place since May 1994.

Geography

Location: Southwestern Asia, bordering the Caspian Sea, between Iran and Russia

Geographic coordinates: 40 30 N, 47 30 E

Map references: Commonwealth of Independent States

Area:

total: 86,600 sq km

land: 86,100 sq km

water: 500 sq km

note: includes the exclave of Naxcivan Autonomous Republic and the Nagorno-Karabakh region; the region's autonomy was abolished by Azerbaijani Supreme Soviet on 26 November 1991

Area - comparative: slightly smaller than Maine

Land boundaries:

total: 2,013 km

border countries: Armenia (with Azerbaijan-proper) 566 km, Armenia (with Azerbaijan-Naxcivan exclave) 221 km, Georgia 322 km, Iran (with Azerbaijan-proper) 432 km, Iran (with Azerbaijan-Naxcivan exclave) 179 km,

Russia 284 km, Turkey 9 km

Coastline: 0 km (landlocked)

note: Azerbaijan borders the Caspian Sea (800 km, est.)

Maritime claims: none (landlocked)

Climate: dry, semiarid steppe

Terrain: large, flat Kur-Araz Ovaligi (Kura-Araks Lowland) (much of it below sea level) with Great Caucasus Mountains to the north, Qarabag Yaylasi (Karabakh Upland) in west; Baku lies on Abseron Yasaqligi (Apsheron Peninsula) that juts into Caspian Sea

Elevation extremes:

lowest point: Caspian Sea -28 m

highest point: Bazarduzu Dagı 4,485 m

Natural resources: petroleum, natural gas, iron ore, nonferrous metals, alumina

Land use:

arable land: 18%

permanent crops: 5%

permanent pastures: 25%

forests and woodland: 11%

other: 41% (1993 est.)

Irrigated land: 10,000 sq km (1993 est.)

Natural hazards: droughts; some lowland areas threatened by rising levels of the Caspian Sea

Environment - current issues: local scientists consider the Abseron Yasaqligi (Apsheron Peninsula) (including Baku and Sumqayıt) and the Caspian Sea to be the ecologically most devastated area in the world because of severe air, water, and soil pollution; soil pollution results from the use of DDT as a pesticide and also from toxic defoliants used in the production of cotton

Environment - international agreements:

party to: Climate Change, Desertification, Ozone Layer Protection

signed, but not ratified: Biodiversity

Geography - note: landlocked

Economy

Economy - overview: Azerbaijan is less developed industrially than either Armenia or Georgia, the other Caucasian states. It resembles the Central Asian states in its majority Muslim population, high structural unemployment, and low standard of living. The economy's most prominent products are oil, cotton, and natural gas. Production from the Caspian oil field declined through 1997 but registered an increase in 1998. Negotiation of more than a dozen production-sharing arrangements (PSAs) with foreign firms, which have thus far committed \$30 billion to oil field development, should generate the funds needed to spur future industrial development. Oil production under the first of these PSAs, with the Azerbaijan International Operating Company, began in November 1997. Azerbaijan shares all the formidable problems of the former Soviet republics in making the transition from a command to a market economy, but its considerable energy resources brighten its long-term prospects. Baku has only recently begun making progress on economic reform, and old economic ties and structures are slowly being replaced. A major short-term obstacle to economic progress, including stepped up foreign investment, is the continuing conflict with Armenia over the Nagorno-Karabakh region. Trade with Russia and the other former Soviet republics is declining in importance while trade is building up with Turkey, Iran, the UAE, and the nations of Europe. A serious long-term challenge is the maintenance of the competitiveness of non-oil exports in world markets.

Economy

Economy - overview: The Bahamas is a stable, developing nation with an economy heavily dependent on tourism and offshore banking. Tourism alone accounts for more than 60% of GDP and directly or indirectly employs 40% of the archipelago's labor force. Moderate growth in tourism receipts and a boom in construction of new hotels, resorts, and residences led to an increase of the country's GDP by an estimated 4% in 1998. Manufacturing and agriculture together contribute less than 10% of GDP and show little growth, despite government incentives aimed at those sectors. Overall growth prospects in the short run will depend heavily on the fortunes of the tourism sector and continued income growth in the US, which accounts for the majority of tourist visitors.

Economy

Economy - overview: In Bahrain, petroleum production and processing account for about 60% of export receipts, 60% of government revenues, and 30% of GDP. Economic conditions have fluctuated with the changing fortunes of oil since 1985, for example, during and following the Gulf crisis of 1990-91. With its highly developed communication and transport facilities, Bahrain is home to numerous multinational firms with business in the Gulf. A large share of exports consists of petroleum products made from imported crude. Construction proceeds on several major industrial projects. Unemployment, especially among the young, and the depletion of both oil and underground water resources are major long-term economic problems.

Economy

Economy - overview: Despite sustained domestic and international efforts to improve economic and demographic prospects, Bangladesh remains one of the world's poorest, most densely populated, and least developed nations. The economy is largely agricultural, with the cultivation of rice the single most important activity in the economy. Major impediments to growth include frequent cyclones and floods, the inefficiency of state-owned enterprises, a rapidly growing labor force that cannot be absorbed by agriculture, delays in exploiting energy resources (natural gas), inadequate power supplies, and slow implementation of economic reforms. Prime Minister Sheikh HASINA Wajed's Awami League government has made some headway improving the climate for foreign investors and liberalizing the capital markets; for example, it has negotiated with foreign firms for oil and gas exploration, better countrywide distribution of cooking gas, and the construction of natural gas pipelines and power plants. Progress on other economic reforms has been halting because of opposition from the bureaucracy, public sector unions, and other vested interest groups. Severe floods, lasting from July to October 1998, endangered the livelihoods of more than 20 million people. Foodgrain production fell by 4 million tons, forcing Dhaka to triple its normal foodgrain imports and placing severe pressure on Bangladesh's balance of payments. The floods increased the country's reliance on large-scale

international aid. So far the East Asian financial crisis has not had major impact on the economy.

Economy

Economy - overview: Historically, the Barbadian economy had been dependent on sugarcane cultivation and related activities, but production in recent years has diversified into manufacturing and tourism. The start of the Port Charles Marina project in Speightstown helped the tourism industry continue to expand in 1996-98. Offshore finance and informatics are important foreign exchange earners, and there is also a light manufacturing sector. The government continues its efforts to reduce the unacceptably high unemployment rate, encourage direct foreign investment, and privatize remaining state-owned enterprises.

Belarus

Introduction

Background: For centuries Byelorussia has been fought over, devastated, and partitioned among Russia, Poland, Lithuania, and, in World Wars I and II, Germany. After seven decades as a Soviet republic, the newly named Belarus declared its independence in August 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. On 25 December 1998, Russian President Boris YELTSIN and Belarusian President Aleksandr LUKASHENKO signed several agreements intended to provide greater political, economic, and social integration while preserving both states' sovereignty.

Economy

Economy - overview: Belarus has seen little structural reform since 1995, when President LUKASHENKO launched the country on the path of "market socialism". In keeping with this policy, LUKASHENKO re-imposed administrative controls over prices and currency exchange rates and expanded the state's right to intervene in the management of private enterprise. This produced a climate hostile to private business, inhibiting domestic and foreign investment. The Government of Belarus has artificially revived economic output since mid-1996 by pursuing a policy of rapid credit expansion. In a vain attempt to keep the rapidly rising inflation in check, the government placed strict price controls on food and consumer products, which resulted in food shortages. Long lines for dairy products, chicken, and pork became common in the closing months of 1998. With the goal of slowing down the devaluation of the Belarusian ruble, LUKASHENKO in 1997 introduced a new, complex system of legal buying/selling hard currencies. The new "command" system proved to be totally unworkable and resulted in galloping devaluation. In addition to the burdens imposed on businesses by

Belarus (continued)

high inflation and an artificial currency regime, businesses have also been subject to pressure on the part of central and local governments, e.g., arbitrary changes in regulations, numerous rigorous inspections, and retroactive application of new business regulations prohibiting practices that had been legal. A further economic problem is the sizable trade deficit.

Belgium

Introduction

Background: Belgium became independent from the Netherlands in 1830 and was occupied by Germany during World Wars I and II. In the half century following, it has prospered as a small, modern, technologically advanced European state and member of the European Union. Its unique political circumstance is the long-standing differences between the wealthier Dutch-speaking Flemings of the north and the poorer French-speaking Walloons of the south, differences that are becoming increasingly acute.

Geography

Location: Western Europe, bordering the North Sea, between France and the Netherlands

Geographic coordinates: 50 50 N, 4 00 E

Map references: Europe

Area:

total: 30,510 sq km

land: 30,230 sq km

water: 280 sq km

Area - comparative: about the size of Maryland

Land boundaries:

total: 1,385 km

border countries: France 620 km, Germany 167 km, Luxembourg 148 km, Netherlands 450 km

Coastline: 64 km

Maritime claims:

continental shelf: median line with neighbors

exclusive fishing zone: median line with neighbors (extends about 68 km from coast)

territorial sea: 12 nm

Climate: temperate; mild winters, cool summers; rainy, humid, cloudy

Terrain: flat coastal plains in northwest, central rolling hills, rugged mountains of Ardennes Forest in southeast

Elevation extremes:

lowest point: North Sea 0 m

highest point: Signal de Botrange 694 m

Natural resources: coal, natural gas

Land use:

arable land: 24%

permanent crops: 1%

permanent pastures: 20%

forests and woodland: 21%

other: 34%

Irrigated land: 10 sq km including Luxembourg (1993 est.)

Natural hazards: flooding is a threat in areas of reclaimed coastal land, protected from the sea by concrete dikes

Environment - current issues: the environment is exposed to intense pressures from human activities: urbanization, dense transportation network, industry, intense animal breeding and crop cultivation; air and water pollution also have repercussions for neighboring countries; uncertainties regarding federal and regional responsibilities (now resolved) have impeded progress in tackling environmental challenges

Environment - international agreements:

party to: Air Pollution, Air Pollution-Sulphur 85, Antarctic-Environmental Protocol, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands

signed, but not ratified: Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulphur 94, Air Pollution-Volatile Organic Compounds, Climate Change-Kyoto Protocol

Geography - note: crossroads of Western Europe; majority of West European capitals within 1,000 km of Brussels which is the seat of both the EU and NATO

Economy

Economy - overview: This highly developed private enterprise economy has capitalized on its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the populous Flemish area in the north, although the government is encouraging reinvestment in the southern region of Wallonia. With few natural resources, Belgium must import substantial quantities of raw materials and export a large volume of manufactures, making its economy unusually dependent on the state of world markets. Two-thirds of its trade is with other EU countries. Belgium's public debt fell from 127% of GDP in 1996 to 122% of GDP in 1998 and the government is trying to control its expenditures to bring the figure more into line with other industrialized countries. Belgium became a charter member of the European Monetary Union (EMU) in January 1999. **GDP:** purchasing power parity - \$236 billion (1998 est.)

Economy

Economy - overview: The small, essentially private enterprise economy is based primarily on agriculture, agro-based industry, and merchandising, with tourism and construction assuming greater importance.

Sugar, the chief crop, accounts for nearly half of exports, while the banana industry is the country's largest employer. The government's tough austerity program in 1997 resulted in an economic slowdown that continued in 1998. The trade deficit has been growing, mostly as a result of low export prices for sugar and bananas. The new government faces important challenges to economic stability. Rapid action to improve tax collection has been promised, but a lack of progress in reigning in spending could bring the exchange rate under pressure.

Economy

Economy - overview: The economy of Benin remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Growth in real output has averaged a sound 4% in 1990-95 and 5% in 1996-98. Rapid population growth has offset much of this growth in output. Inflation has subsided over the past three years. Commercial and transport activities, which make up a large part of GDP, are vulnerable to developments in Nigeria, particularly fuel shortages. Support by the Paris Club and official bilateral creditors has eased the external debt situation in recent years. The government, still burdened with money-losing state enterprises and a bloated civil service, has been gradually implementing a World

Economy

Economy - overview: Bermuda enjoys one of the highest per capita incomes in the world, having successfully exploited its location by providing financial services for international firms and luxury tourist facilities for 360,000 visitors annually. The tourist industry, which accounts for an estimated 28% of GDP, attracts 84% of its business from North America. The industrial sector is small, and agriculture is severely limited by a lack of suitable land. About 80% of food needs are imported. International business contributes over 60% of Bermuda's

economic output; a failed independence vote in late 1995 can be partially attributed to Bermudian fears of scaring away foreign firms.

Economy

Economy - overview: The economy, one of the world's smallest and least developed, is based on agriculture and forestry, which provide the main livelihood for 90% of the population and account for about 40% of GDP. Agriculture consists largely of subsistence farming and animal husbandry. Rugged mountains dominate the terrain and make the building of roads and other infrastructure difficult and expensive. The economy is closely aligned with India's through strong trade and monetary links. The industrial sector is technologically backward, with most production of the cottage industry type. Most development projects, such as road construction, rely on Indian migrant labor. Bhutan's hydropower potential and its attraction for tourists are key resources. The Bhutanese Government has made some progress in expanding the nation's productive base and improving social welfare. Model education, social, and environment programs in Bhutan are underway with support from multilateral development organizations. Each economic program takes into account the government's desire to protect the country's environment and cultural traditions. Detailed controls and uncertain policies in areas like industrial licensing, trade, labor, and finance continue to hamper foreign investment.

Introduction

Background: Bolivia broke away from Spanish rule in 1825. Its subsequent history has been marked by a seemingly endless series of coups, counter-coups, and abrupt changes in leaders and policies. Comparatively democratic civilian rule was established in the 1980s, but the leaders have faced difficult problems of deep-seated poverty, social unrest, strikes, and drug dealing. Current issues include encouraging and negotiating the terms for foreign investment; strengthening the educational system; continuing the privatization program; pursuing judicial reform and an anti-corruption campaign.

Economy

Economy - overview: With its long history of semifeudal social controls, dependence on mineral exports, and bouts of hyperinflation, Bolivia has remained one of the poorest and least developed Latin American countries. However, Bolivia has experienced generally improving economic conditions since the PAZ Estenssoro administration (1985-89) introduced market-oriented policies which reduced inflation from 11,700% in 1985 to about 20% in 1988. PAZ Estenssoro was followed as president by Jaime PAZ Zamora (1989-93) who continued the free-market policies of his predecessor, despite opposition from his own party and from Bolivia's once powerful labor movement. President SANCHEZ DE LOZADA (1993-1997) vowed to advance the market-oriented economic reforms he helped launch as PAZ Estenssoro's planning minister. His successes included the signing of a free trade agreement with Mexico and the Southern Cone Common Market (Mercosur) as well as the privatization of the state airline, telephone company, railroad, electric power company, and oil company. Hugo BANZER Suarez has tried to further improve the country's investment climate with an anticorruption campaign. With the scheduled completion of a \$2 billion natural gas pipeline to Brazil in 1999, Bolivia hopes to become an energy hub in the region.

overall cultivation of coca from 1996 levels; Bolivia, however, is the second-largest producer of coca leaf; even so, farmer abandonment and voluntary and forced eradication programs resulted in leaf production dropping from 75,100 metric tons in 1996 to 73,000 tons in 1997, a 3% decrease from 1996; government considers all but 12,000 hectares illicit; intermediate coca products and cocaine exported to or through Colombia, Brazil, Argentina, and Chile to the US and other international drug markets; alternative crop program aims to reduce illicit coca cultivation

Bosnia and Herzegovina

Introduction

Background: On 21 November 1995, in Dayton, Ohio, the former Yugoslavia's three warring parties signed a peace agreement that brought to a halt over three years of interethnic civil strife in Bosnia and Herzegovina (the final agreement was signed in Paris on 14 December 1995). The Dayton Agreement, signed then by Bosnian President IZETBEGOVIC, Croatian President TUDJMAN, and Serbian President MILOSEVIC, divides Bosnia and Herzegovina roughly equally between the Muslim/Croat Federation and the Republika Srpska while maintaining Bosnia's currently recognized borders. In 1995-96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission is to deter renewed hostilities. SFOR remains in place. A High Representative appointed by the UN Security Council is responsible for civilian implementation of the accord, including monitoring implementation, facilitating any difficulties arising in connection with civilian implementation, and coordinating activities of the civilian organizations and agencies in Bosnia. The Bosnian conflict began in the spring of 1992 when the government of Bosnia and Herzegovina held a referendum on independence and the Bosnian Serbs - supported by neighboring Serbia - responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "greater Serbia." In March 1994, Bosnia's Muslims and Croats reduced the number of warring factions from three to two by signing an agreement in Washington creating their joint Muslim/Croat Federation of Bosnia and Herzegovina. The Federation, formed by the Muslims and Croats in March 1994, is one of two entities (the other being the Bosnian Serb-led Republika Srpska) that comprise Bosnia and Herzegovina.

Government - note: Until declaring independence in spring 1992, Bosnia and Herzegovina existed as a republic in the former Yugoslavia. Bosnia was partitioned by fighting during 1992-95 and governed by competing ethnic factions. Bosnia's current governing structures were created by the Dayton Agreement, the 1995 peace agreement which was officially signed in Paris on 14 December 1995 by then Bosnian President IZETBEOVIC, Croatian President TUDJMAN, and then Serbian President MILOSEVIC. This agreement retained Bosnia's exterior border and created a joint multi-ethnic and democratic government. This national government - based on proportional representation similar to that which existed in the former socialist regime - is charged with conducting foreign, economic, and fiscal policy. The Dayton Agreement also recognized a second tier of government, comprised of two entities - a joint Muslim/Croat Federation and the Bosnian Serb Republika Srpska (RS) - each presiding over roughly one-half the territory. The Federation and RS governments are charged with overseeing internal functions.

Economy

Economy - overview: Bosnia and Herzegovina ranked next to The Former Yugoslav Republic of Macedonia as the poorest republic in the old Yugoslav federation. Although agriculture has been almost all in private hands, farms have been small and inefficient, and the republic traditionally has been a net importer of food. Industry has been greatly overstaffed, one reflection of the rigidities of communist central planning and management. TITO had pushed the development of military industries in the republic with the result that Bosnia hosted a large share of Yugoslavia's defense plants. The bitter interethnic warfare in Bosnia caused production to plummet by 80% from 1990 to 1995, unemployment to soar, and human misery to multiply. With an uneasy peace in place, output has recovered in 1996-98 at high percentage rates on a low base, but remains far below the 1990 level. Key achievements in 1998 included approval of privatization legislation, the introduction of a national currency - the convertible mark, agreement

Bosnia and Herzegovina (continued)

with the Paris Club to reschedule official debt, and the conclusion of a Standby Agreement with the IMF. Economic data are of limited use because, although both entities issue figures, national-level statistics are not available. Moreover, official data do not capture the large share of activity that occurs on the black market. The country receives substantial amounts of reconstruction assistance and humanitarian aid from the international community. Wide regional differences in war damage and access to the outside world have resulted in substantial variations in living conditions among local areas and individual families. In 1999, Bosnia's major goals are to implement privatization and make progress in fiscal reform and management. In addition, Bosnia will have to prepare for an era of declining assistance from the international community.

Economy

Economy - overview: Agriculture still provides a livelihood for more than 80% of the population but supplies only about 50% of food needs and accounts for only 4% of GDP. Subsistence farming and cattle raising predominate. Diamond mining and tourism also are important to the economy. The sector is plagued by erratic rainfall and poor soils. Substantial mineral deposits were found in the 1970s and the mining sector grew from 25% of GDP in 1980 to 35% in 1997. Unemployment officially is 21% but unofficial estimates place it closer to 40%.

Economy

Economy - overview: Possessing large and well-developed agricultural, mining, manufacturing, and service sectors, Brazil's economy outweighs that of all other South American countries and is expanding its presence in world markets. Prior to the institution of a stabilization plan - the Plano Real (Real Plan) in mid-1994, stratospheric inflation rates had disrupted economic activity and discouraged foreign investment. Since then, tight monetary policy has brought inflation under control - consumer prices increased by 2% in 1998 compared to more than 1,000% in 1994. At the same time, GDP growth slowed from 5.7% in 1994 to about 3.0% in 1997 due to tighter credit. The Real Plan faced its strongest challenge in 1998, as the world financial crisis caused investors to more closely examine the country's structural weaknesses. The most severe spillover for Brazil - after Russia's debt default in August 1998 - created unrelenting pressure on the currency which forced the country to hike annual interest rates to 50%. Approximately \$30 billion in capital left the country in August and September. After crafting a fiscal adjustment program and pledging progress on structural reform, Brazil received a \$41.5 billion IMF-led international support program in November 1998. Capital continued to leach out of the country, and investors, concerned about the rising mountain of debt and currency widely-viewed as overvalued, stayed on the sidelines. In January 1999, Brazil made an abrupt shift of course in exchange rate policy, abandoning the strong currency anti-inflation anchor of the Real Plan. On 13 January 1999, Central Bank officials announced a one-time 8% devaluation of the real, and on 15 January 1999, the currency was declared to be freely floating. President CARDOSO remains committed to limiting inflation and weathering the financial crisis through austerity and sacrifice as the country rides out a deep recession. He hopes the country will resume economic growth in the second half of 1999, so that he can once again focus on his longer-term goal of reducing poverty and income inequality. CARDOSO still hopes to address mandated revenue sharing with the states and cumbersome procedures to amend the constitution before the end of his second term.

Economy

Economy - overview: The economy, one of the most prosperous in the Caribbean, is highly dependent on tourism, which generates an estimated 45% of the national income. In the mid-1980s, the government began offering offshore registration to companies wishing to incorporate in the islands, and incorporation fees now generate substantial revenues. An estimated 250,000 companies were on the offshore registry by yearend 1997. The adoption of a comprehensive insurance law in late 1994, which

provides a blanket of confidentiality with regulated statutory gateways for investigation of criminal offenses, is expected to make the British Virgin Islands even more attractive to international business. Livestock raising is the most important agricultural activity; poor soils limit the islands' ability to meet domestic food requirements. Because of traditionally close links with the US Virgin Islands, the British Virgin Islands has used the dollar as its currency since 1959. **GDP:** purchasing power parity - \$183 million (1997 est.)

Economy

Economy - overview: This small, wealthy economy is a mixture of foreign and domestic entrepreneurship, government regulation and welfare measures, and village tradition. It is almost totally supported by exports of crude oil and natural gas, with revenues from the petroleum sector accounting for over half of GDP. Per capita GDP is far above most other Third World countries, and substantial income from overseas investment supplements income from domestic production. The government provides for all medical services and subsidizes food and housing. The government is beginning to show progress on its basic policy of diversifying the economy away from oil and gas. Brunei's leaders are concerned that steadily increased integration in the world economy will undermine internal social cohesion. Because of low world oil prices and the Asian crisis, growth in 1999 is expected to be moderate.

Bulgaria

Introduction

Background: A Slavic state, Bulgaria achieved independence in 1908 after 500 years of Ottoman rule. Bulgaria fought on the losing side in both World Wars. After World War II it fell within the Soviet sphere of influence. Communist domination ended in 1991 with the dissolution of the USSR, and Bulgaria began the contentious process of moving toward political democracy and a market economy. In addition to the problems of structural economic reform, particularly privatization, Bulgaria faces the serious issues of keeping inflation under control and unemployment, combatting corruption, and curbing black-market and mafia-style crime.

Economy

Economy - overview: In April 1997, the current ruling Union of Democratic Forces (UDF) government won pre-term parliamentary elections and introduced

an IMF currency board system which succeeded in stabilizing the economy. The triple digit inflation of 1996 and 1997 has given way to an official consumer price increase of 1% in 1998. Following declines in GDP in both 1996 and 1997, the economy grew an officially estimated 4% in 1998. In September 1998, the IMF approved a three-year Extended Fund Facility, which provides credits worth approximately \$864 million, designed to support Bulgaria's reform efforts. The government's structural reform program includes: (a) privatization and, where appropriate, liquidation of state-owned enterprises (SOEs); (b) liberalization of agricultural policies, including creating conditions for the development of a land market; (c) reform of the country's social insurance programs; and, (d) reforms to strengthen contract enforcement and fight crime and corruption.

Economy

Economy - overview: One of the poorest countries in the world, landlocked Burkina Faso has a high population density, few natural resources, and a fragile soil. About 85% of the population is engaged in (mainly subsistence) agriculture which is highly vulnerable to variations in rainfall. Industry remains dominated by unprofitable government-controlled corporations. Following the African franc currency devaluation in January 1994 the government updated its development program in conjunction with international agencies, and exports and economic growth have increased. Maintenance of its macroeconomic progress in 1999-2000 depends on continued low inflation, reduction in the trade deficit, and reforms designed to encourage private investment.

Economy

Economy - overview: Burma has a mixed economy with private activity dominant in agriculture, light industry, and transport, and with substantial

state-controlled activity, mainly in energy, heavy industry, and the rice trade. Government policy in the last 10 years, 1989-98, has aimed at revitalizing the economy after three decades of tight central planning. Thus, private activity has markedly increased; foreign investment has been encouraged, so far with moderate success; and efforts continue to increase the efficiency of state enterprises. Published estimates of Burma's foreign trade are greatly understated because of the volume of black-market trade. A major ongoing problem is the failure to achieve monetary and fiscal stability. Although Burma remains a poor Asian country, its rich resources furnish the potential for substantial long-term increases in income, exports, and living standards. The short-term outlook is for continued sluggish growth because of internal unrest, minimal foreign investment, and the large trade deficit.

Burundi

Introduction

Background: Since the end of the Belgian trusteeship in 1962, Burundi has suffered from ethnic uprisings, coups, and other societal dislocations. In a series of waves since October 1993, hundreds of thousands of refugees have fled the ethnic violence between the Hutu and Tutsi factions in Burundi and have crossed into Rwanda, Tanzania, and Zaire (now called the Democratic Republic of the Congo or DROC). Since October 1996, an estimated 120,000 Burundian Hutu refugees from the DROC have been compelled to return to Burundi because of insecurity in the region. Continuing ethnic violence with the Tutsi has caused additional Hutu to flee to Tanzania, thus raising their numbers in the United Nations Office of the High Commissioner for Refugees (UNHCR) camps in that country to about 260,000. Burundian troops have joined armies from Rwanda and Uganda and Congolese Tutsi in trying to overthrow DROC President KABILA and restore security to their borders with the Democratic Republic of the Congo.

Economy

Economy - overview: Burundi is a landlocked, resource-poor country with a poorly developed manufacturing sector. The economy is predominately agricultural with roughly 90% of the population dependent on subsistence agriculture. Its economic health depends on the coffee crop, which accounts for 80% of foreign exchange earnings. The ability to pay for imports therefore rests largely on the vagaries of the climate and the international coffee market. Since October 1993 the nation has suffered from massive ethnic-based violence which has resulted in the death of perhaps 250,000 persons and the displacement of

about 800,000 others. Foods, medicines, and electricity remain in short supply.

Economy

Economy - overview: After four years of solid macroeconomic performance, Cambodia's economy slowed dramatically in 1997-98 due to the regional economic crisis, civil violence, and political infighting. Foreign investment fell off, and tourism has declined from 1996 levels. Also, in 1998 the main harvest was hit by drought. The long-term development of the economy after decades of war remains a daunting challenge. Human resource levels in the population are low, particularly in the poverty-ridden countryside. The almost total lack of basic infrastructure in the countryside will continue to hinder development. Recurring political instability and corruption within government discourage foreign investment and delay foreign aid. Even so, growth may resume in 1999 at, say, 2%.

Economy

Economy - overview: Because of its oil resources and favorable agricultural conditions, Cameroon has one of the best-endowed primary commodity economies in sub-Saharan Africa. Still, it faces many of the serious problems facing other underdeveloped countries, such as a top-heavy civil service and a generally unfavorable climate for business enterprise. Since 1990, the government has embarked on various IMF and World Bank programs designed to spur business investment, increase efficiency in agriculture, improve trade, and recapitalize the nation's banks. The government, however, has failed to press forward vigorously with these programs. The latest enhanced structural adjustment agreement was signed in October 1997; the parties hope this will prove more successful, yet government mismanagement and corruption remain problems. Inflation has been brought back under control.

Progress toward privatization of remaining state industry may support economic growth in 1999-2000.

Canada

Introduction

Background: A land of vast distances and rich natural resources, from 1867 on Canada has enjoyed de facto independence while retaining, even to the present day, certain formal ties to the British crown. Economically and technologically the nation has developed in parallel with the US, its neighbor to the south across an unfortified border. Its paramount political problem continues to be the relationship of the province of Quebec, with its French-speaking residents and unique culture, to the remainder of the country.

Geography

Location: Northern North America, bordering the North Atlantic Ocean and North Pacific Ocean, north of the conterminous US

Geographic coordinates: 60 00 N, 95 00 W

Map references: North America

Area:

total: 9,976,140 sq km

land: 9,220,970 sq km

water: 755,170 sq km

Area - comparative: slightly larger than the US

Land boundaries:

total: 8,893 km

border countries: US 8,893 km (includes 2,477 km with Alaska)

Coastline: 243,791 km

Maritime claims:

continental shelf: 200 nm or to the edge of the continental margin

exclusive fishing zone: 200 nm

territorial sea: 12 nm

Climate: varies from temperate in south to subarctic and arctic in north

Terrain: mostly plains with mountains in west and lowlands in southeast

Elevation extremes:

lowest point: Atlantic Ocean 0 m

highest point: Mount Logan 5,950 m

Natural resources: nickel, zinc, copper, gold, lead, molybdenum, potash, silver, fish, timber, wildlife, coal, petroleum, natural gas

permanent crops: 0%

permanent pastures: 3%

forests and woodland: 54%

other: 38% (1993 est.)

Irrigated land: 7,100 sq km (1993 est.)

Natural hazards: continuous permafrost in north is a serious obstacle to development; cyclonic storms form east of the Rocky Mountains, a result of the mixing of air masses from the Arctic, Pacific, and North American interior, and produce most of the country's rain and snow

Environment - current issues: air pollution and resulting acid rain severely affecting lakes and damaging forests; metal smelting, coal-burning utilities, and vehicle emissions impacting on agricultural and forest productivity; ocean waters becoming contaminated due to agricultural, industrial, mining, and forestry activities

Environment - international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulphur 85, Air Pollution-Sulphur 94, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Marine Dumping, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Climate Change-Kyoto Protocol, Law of the Sea, Marine Life Conservation

Geography - note: second-largest country in world (after Russia); strategic location between Russia and US via north polar route; nearly 90% of the population is concentrated within 160 km of the US/Canada border

Economy

Economy - overview: As an affluent, high-tech industrial society, Canada today closely resembles the US in its market-oriented economic system, pattern of production, and high living standards. Since World War II, the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. Real rates of growth have averaged nearly 3.0% since 1993. Unemployment is falling and government budget surpluses are being partially devoted to reducing the large public sector debt. The 1989 US-Canada Free Trade Agreement (FTA) and 1994 North American Free Trade Agreement (NAFTA) (which included Mexico) have touched off a dramatic increase in trade and economic integration with the US. With its great natural resources, skilled labor force, and modern capital plant Canada can anticipate solid economic prospects in the future. The continuing constitutional impasse between English- and French-speaking areas is raising the possibility of a split in the federation, making foreign investors somewhat edgy.

Economy

Economy - overview: Cape Verde's low per capita GDP reflects a poor natural resource base, including serious water shortages exacerbated by cycles of long-term drought. The economy is service-oriented, with commerce, transport, and public services accounting for almost 70% of GDP. Although nearly 70% of the population lives in rural areas, the share of agriculture in GDP in 1995 was only 8%, of which fishing accounts for 1.5%. About 90% of food must be imported. The fishing potential, mostly lobster and tuna, is not fully exploited. Cape Verde annually runs a high trade deficit, financed by foreign aid and remittances from emigrants; remittances constitute a supplement to GDP of more than 20%. Economic reforms, launched by the new democratic government in 1991, are aimed at developing the private sector and attracting foreign investment to diversify the economy. Prospects for 1999 depend heavily on the maintenance of aid flows, remittances, and the momentum of the government's development program.

Central African Republic

Introduction

Background: In 1996, the country experienced three mutinies by dissident elements of the armed forces, which demanded back pay as well as political and military reforms. Subsequent violence between the government and rebel military groups over pay issues, living conditions, and lack of opposition party representation in the government, destroyed many businesses in the capital, reduced tax revenues, and exacerbated the government's problems in meeting expenses. African peacekeepers restored order in 1997; in April 1998 the United Nations Mission in the Central African Republic (MINURCA) assumed responsibility for peacekeeping operations.

Economy

Economy - overview: Subsistence agriculture,
together with forestry, remains the backbone of the
economy of the Central African Republic (CAR), with
more than 70% of the population living in outlying
areas. The agricultural sector generates half of GDP.
Timber has accounted for about 16% of export
earnings and the diamond industry for nearly 54%.
Important constraints to economic development
include the CAR's landlocked position, a poor
transportation system, a largely unskilled work force,
and a legacy of misdirected macroeconomic policies.
The 50% devaluation of the currencies of 14
Francophone African nations on 12 January 1994 had
mixed effects on the CAR's economy. Diamond,
timber, coffee, and cotton exports increased, leading
an estimated rise of GDP of 7% in 1994 and nearly 5%
in 1995. Military rebellions and social unrest in 1996
were accompanied by widespread destruction of

property and a drop in GDP of 2%. Ongoing violence
between the government and rebel military groups
over pay issues, living conditions, and political
representation has destroyed many businesses in the
capital and reduced tax revenues for the government.
The IMF approved an Extended Structure Adjustment
Facility in 1998.

Chad

Introduction

Background: In 1960, Chad gained full independence from France. In December 1990, after Chad had endured three decades of ethnic warfare as well as invasions by Libya, former northern guerrilla leader Idriss DEBY seized control of the government. His transitional government eventually suppressed or came to terms with most political-military groups, settled the territorial dispute with Libya on terms favorable to Chad, drafted a democratic constitution which was ratified by popular referendum in 1996, held multiparty national presidential elections in 1996 (DEBY won with 69% of the vote), and held multiparty elections for the National Assembly in 1997 (DEBY's Patriotic Salvation Movement won a majority of the seats). But by the end of 1998, DEBY was beset with numerous problems including heavy casualties in the Democratic Republic of the Congo where Chadian troops had been deployed to support embattled President KABILA, a new rebellion in northern Chad, and further delays in the Doba Basin oil project in the south.

Economy

Economy - overview: Landlocked Chad's economic development suffers from its geographic remoteness, drought, lack of infrastructure, and political turmoil.

About 85% of the population depends on agriculture, including the herding of livestock. Of Africa's Francophone countries, Chad benefited least from the 50% devaluation of their currencies in January 1994. Financial aid from the World Bank, the African Development Fund, and other sources is directed largely at the improvement of agriculture, especially livestock production. Lack of financing and low oil prices, however, are stalling the development of an oil field in the Doba Basin and the construction of a proposed oil pipeline through Cameroon.

Economy

Economy - overview: Chile has a prosperous, essentially free market economy. Civilian governments - which took over from the military in March 1990 - have continued to reduce the government's role in the economy while shifting the emphasis of public spending toward social programs. Growth in real GDP averaged more than 7.0% in 1991-1997 but fell to about half of that average in 1998 because of spillover from the global financial crisis. Inflation has been on a downward trend and hit a 60-year low in 1998. Chile's currency and foreign reserves also are strong, as sustained foreign capital inflows - including significant direct investment - have more than offset current account deficits and public debt buy-backs. President FREI, who took office in March 1994, has placed improving Chile's education system and developing foreign export markets at the top of his economic agenda. The Chilean economy remains largely dependent on a few sectors - particularly copper mining, fishing, and forestry. Success in meeting the government's goal of sustained annual economic growth of 5% depends largely on world prices for these commodities, continued foreign investor confidence, and the government's ability to maintain a conservative fiscal stance. In 1996, Chile became an associate member of Mercosur and concluded a free trade agreement with Canada.

Introduction

Background: For most of its 3,500 years of history, China led the world in agriculture, crafts, and science, then fell behind in the 19th century when the Industrial Revolution gave the West clear superiority in military and economic affairs. In the first half of the 20th century, China continued to suffer from major famines, civil unrest, military defeat, and foreign occupation. After World War II, the Communists under MAO Zedong established a dictatorship that, while ensuring China's autonomy, imposed strict controls over all aspects of life and cost the lives of tens of millions of people. After 1978, his successor DENG Xiaoping decentralized economic decision making; output quadrupled in the next 20 years. Political controls remain tight at the same time economic controls have been weakening. Present issues are: incorporating Hong Kong into the Chinese system; closing down inefficient state-owned enterprises; modernizing the military; fighting corruption; and providing support to tens of millions of displaced workers.

Economy

Economy - overview: Beginning in late 1978 the Chinese leadership has been trying to move the economy from a sluggish Soviet-style centrally planned economy to a more market-oriented economy but still within a rigid political framework of Communist Party control. To this end the authorities switched to a system of household responsibility in agriculture in place of the old collectivization, increased the authority of local officials and plant managers in industry, permitted a wide variety of small-scale enterprise in services and light manufacturing, and opened the economy to increased foreign trade and investment. The result has been a quadrupling of GDP since 1978. Agricultural output doubled in the 1980s, and industry also posted major gains, especially in coastal areas near Hong Kong and opposite Taiwan, where foreign investment helped spur output of both domestic and export goods. On the darker side, the leadership has often experienced in

China (continued)

its hybrid system the worst results of socialism (bureaucracy, lassitude, corruption) and of capitalism (windfall gains and stepped-up inflation). Beijing thus has periodically backtracked, retightening central controls at intervals. In late 1993 China's leadership approved additional long-term reforms aimed at giving still more play to market-oriented institutions and at strengthening the center's control over the financial system; state enterprises would continue to dominate many key industries in what was now termed "a socialist market economy". In 1995-97 inflation dropped sharply, reflecting tighter monetary policies and stronger measures to control food prices. At the same time, the government struggled to (a) collect revenues due from provinces, businesses, and individuals; (b) reduce corruption and other economic crimes; and (c) keep afloat the large state-owned enterprises, most of which had not participated in the vigorous expansion of the economy and many of which had been losing the ability to pay full wages and pensions. From 60 to 100 million surplus rural workers are adrift between the villages and the cities, many subsisting through part-time low-paying jobs. Popular resistance, changes in central policy, and loss of authority by rural cadres have weakened China's population control program, which is essential to maintaining growth in living standards. Another long-term threat to continued rapid economic growth is the deterioration in the environment, notably air pollution, soil erosion, and the steady fall of the water table especially in the north. China continues to lose arable land because of erosion and economic development. The next few years may witness increasing tensions between a highly centralized political system and an increasingly decentralized economic system. Economic growth probably will slow to more moderate levels in 1999-2000.

Economy

Economy - overview: Colombia ended 1998 in recession with 0.2% GDP growth due to a combination of low world oil prices, reduced export demand, guerrilla violence, and diminished investment flows. The Central Bank resorted to interest rate hikes and tight monetary policy to defend the peso against pressure from Colombia's worsening trade and fiscal deficits. President PASTRANA'S well-respected financial team is working to deal with the myriad economic problems the country faces, including the highest unemployment level in decades and a fiscal deficit of close to 5% of GDP in 1998. The government implemented austerity measures, declared emergency measures to guard against a potential banking crisis resulting from the country's economic slowdown, and is seeking international assistance to fund a peace plan with the guerrillas. Guerrilla violence and low world oil prices will likely continue to undermine the economy in 1999.

Comoros

Introduction

Background: Comoros has had difficulty in achieving political stability, having endured 18 coups or attempted coups since receiving independence from France in 1975. Most recently, in August 1997, the islands of Anjouan and Moheli declared their independence from Comoros. An attempt in September 1997 by the government to reestablish control over the rebellious islands by force failed, and presently the Organization of African Unity is brokering negotiations to effect a reconciliation.

note: there are also four municipalities named Domoni, Fomboni, Moroni, and Moutsamoudou

Independence: 6 July 1975 (from France)

National holiday: Independence Day, 6 July (1975)

Constitution: 20 October 1996

Legal system: French and Muslim law in a new consolidated code

Suffrage: 18 years of age; universal

Executive branch:
chief of state: Interim President TADJIDDINE Ben Said Massounde (since 6 November 1998); *note* - President Mohamed TAKI Abdulkarim died in office 6 November 1998 and was succeeded by Interim President MASSOUNDE
head of government: Prime Minister Abbas DJOUSSOUF (since 22 November 1998)
cabinet: Council of Ministers appointed by the president
elections: president elected by popular vote to a five-year term; election last held 16 March 1996 (next to be held NA); prime minister appointed by the president
election results: Mohamed TAKI Abdulkarim elected president; percent of vote - 64%
note: the Comoran constitution stipulates that upon the death of the president, a new president is to be elected within 90 days; however, Interim President TADJIDDINE has stated that a new election cannot be held until Anjouan is reunited with the rest of the country

Legislative branch: bicameral legislature consists of the Senate (15 seats; members selected by regional councils for six-year terms) and a Federal Assembly or Assemblée Federale (43 seats; members elected by popular vote to serve four-year terms)
elections: Federal Assembly - last held 1 and 8 December 1996 (next to be held NA)
election results: Federal Assembly - percent of vote by party - NA; seats by party - RND 39, RND candidate running as independent 1, FNJ 3

Judicial branch: Supreme Court or Cour Supremes, two members are appointed by the president, two members are elected by the Federal Assembly, one by the Council of each island, and former presidents of the republic

Comoros (continued)

Political parties and leaders: Rassemblement National pour le Développement or RND, party of the government [leader NA]; Front National pour la Justice or FNJ, Islamic party in opposition [leader NA] *note:* under a new constitution ratified in October 1996, a two-party system was established; former President Mohamed TAKI Abdulkarim called for all parties to dissolve and join him in creating the RND; the constitution stipulates that only parties that win six seats in the Federal Assembly (two from each island) are permitted to be in opposition, but if no party accomplishes that the second most successful party will be in opposition; in the elections of December 1996 the FNJ appeared to qualify as opposition

Diplomatic representation from the US: the US does not have an embassy in Comoros; the ambassador to Mauritius is accredited to Comoros

Flag description: green with a white crescent in the center of the field, its points facing downward; there are four white five-pointed stars placed in a line between the points of the crescent; the crescent, stars, and color green are traditional symbols of Islam; the four stars represent the four main islands of the archipelago - Mwali, Njazidja, Nzwani, and Mayotte (a territorial collectivity of France, but claimed by Comoros); the design, the most recent of several, is described in the constitution approved by referendum on 7 June 1992

Economy

Economy - overview: One of the world's poorest countries, Comoros is made up of three islands that have inadequate transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a subsistence level of economic activity, high unemployment, and a heavy dependence on foreign grants and technical assistance. Agriculture, including fishing, hunting, and forestry, is the leading sector of the economy. It contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The government is struggling to upgrade education and technical training, to privatize commercial and industrial enterprises, to improve

health services, to diversify exports, to promote tourism, and to reduce the high population growth rate. Continued foreign support is essential if the goal of 4% annual GDP growth is to be maintained.

Economy

Economy - overview: The economy of the Democratic Republic of the Congo - a nation endowed with vast potential wealth - has declined significantly since the mid-1980s. The new government instituted a tight fiscal policy that initially curbed inflation and currency depreciation, but these small gains were quickly reversed when the foreign-backed rebellion in the eastern part of the country began in August 1998. The war has dramatically reduced government revenue, and increased external debt. Foreign businesses have curtailed operations due to uncertainty about the outcome of the conflict and because of increased government harassment and restrictions. Poor infrastructure, an uncertain legal framework, corruption, and lack of transparency in government economic policy remain a brake on investment and growth. A number of IMF and World Bank missions have met with the new government to help it develop a coherent economic plan but associated reforms are on hold.

Economy

Economy - overview: The economy is a mixture of village agriculture and handicrafts, an industrial sector based largely on oil, support services, and a government characterized by budget problems and overstaffing. Oil has supplanted forestry as the mainstay of the economy, providing a major share of government revenues and exports. In the early 1980s, rapidly rising oil revenues enabled the government to finance large-scale development projects with GDP growth averaging 5% annually, one of the highest rates in Africa. Subsequently, falling oil prices cut GDP growth by half. Moreover, the government has mortgaged a substantial portion of its oil earnings, contributing to the government's shortage of revenues. The 12 January 1994 devaluation of Franc Zone currencies by 50% resulted in inflation of 61% in 1994 but inflation has subsided since. Economic reform efforts continued with the support of international organizations, notably the World Bank and the IMF. The reform program came to a halt in June 1997 when civil war erupted. Denis

SASSOU-NGUESSO, who returned to power when the war ended in October 1997, publicly expressed interest in moving forward on economic reforms and privatization and in renewing cooperation with international financial institutions. However, economic progress was badly hurt by slumping oil prices in 1998, which worsened the Republic of the Congo's budget deficit. A second blow was the resumption of armed conflict in December 1998.

Cook Islands

(self-governing in free association with New Zealand)

Introduction

Background: Named after Captain Cook, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand. Residents chose self-government with free association with New Zealand in 1965. The emigration of Cook Islanders to New Zealand in large numbers and resulting loss of skilled labor and government deficits are continuing problems.

Economy

Economy - overview: Like many other South Pacific island nations, the Cook Islands' economic development is hindered by the isolation of the country from foreign markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Agriculture provides the economic base with major exports made up of copra and citrus fruit. Manufacturing activities are limited to fruit-processing, clothing, and handicrafts. Trade deficits are made up for by remittances from emigrants and by foreign aid,

overwhelmingly from New Zealand. In 1996, the government declared bankruptcy, citing a \$120 million public debt. Efforts to exploit tourism potential and expanding the mining and fishing industries have not been enough to adequately deal with the financial crisis. In an effort to stem further erosion of the economy, the government slashed public service salaries by 50%, condensed the number of government ministries from 52 to 22, reduced the number of civil servants by more than half, began selling government assets, and closed all overseas diplomatic posts except for the one in New Zealand. **GDP:** purchasing power parity - \$79 million (1994 est.)

Costa Rica

Introduction

Background: Costa Rica declared its independence from Spain in 1821. After a turbulent beginning it inaugurated an era of peaceful democracy in 1889, subsequently interrupted only twice, by a dictatorial interlude in 1917-19 and an armed uprising in 1948. Increasing the role of the private sector while maintaining the government's social safety net and keeping under control the budget deficit, unemployment, and inflation are key current issues.

Economy

Economy - overview: Costa Rica's basically stable economy depends on tourism, agriculture, and electronics exports. Poverty has been substantially reduced over the past 15 years and a strong social safety net has been put into place. Economic growth

has rebounded from -0.9% in 1996 to 3% in 1997 and an estimated 5.5% in 1998. Inflation rose to 22.5% in 1995, dropped to 11.1% in 1997, and reached an estimated 12% in 1998. Unemployment appears moderate at 5.6%, but substantial underemployment continues. Furthermore, large government deficits - fueled by interest payments on the massive internal debt - have undermined efforts to maintain the quality of social services. Curbing inflation, reducing the deficit, and improving public sector efficiency remain key challenges to the government. President RODRIGUEZ has called for an increased economic role for the private sector, but political resistance to privatization has stalled much of his economic program.

Economy

Economy - overview: Cote d'Ivoire is among the world's largest producers and exporters of coffee, cocoa beans, and palm oil. Consequently, the economy is highly sensitive to fluctuations in international prices for these products and to weather conditions. Despite attempts by the government to diversify the economy, it is still largely dependent on agriculture and related activities, which engage roughly 68% of the population. After several years of lagging performance, the Ivorian economy began a comeback in 1994, due to the devaluation of the CFA franc and improved prices for cocoa and coffee, growth in nontraditional primary exports such as pineapples and rubber, limited trade and banking liberalization, offshore oil and gas discoveries, and generous external financing and debt rescheduling by multilateral lenders and France. The 50% devaluation of Franc Zone currencies on 12 January 1994 caused

a one-time jump in the inflation rate to 26% in 1994, but the rate fell sharply in 1996-98. Moreover, government adherence to donor-mandated reforms led to a jump in growth to 6% annually in 1996-98. Growth may slow in 1999-2000 because of the difficulty of meeting the conditions of international donors and continued low prices of key exports.

Economy

Economy - overview: Before the dissolution of Yugoslavia, the Republic of Croatia, after Slovenia, was the most prosperous and industrialized area, with a per capita output perhaps one-third above the Yugoslav average. Croatia faces considerable economic problems stemming from: the legacy of longtime communist mismanagement of the economy; damage during the internecine fighting to bridges, factories, power lines, buildings, and houses; the large refugee and displaced population, both Croatian and Bosnian; and the disruption of economic ties. Western aid and investment, especially in the tourist and oil industries, would help restore the economy. The government has been successful in some reform efforts - partially macroeconomic stabilization policies - and it has normalized relations with its creditors. Yet it still is struggling with privatization of large state enterprises and with bank reform. In 1998, Croatia made progress in reducing its current account deficit to about 8% of GDP from 12% the previous year. Economic growth continues to lag, however, and growing levels of inter-enterprise debt plague the domestic economy. Four commercial banks were put under government control and a major conglomerate is teetering on collapse.

Cuba

Introduction

Background: Fidel CASTRO led a rebel army to victory in 1959, and his guiding vision has defined Cuba's Communist revolution while his iron will has held the country together for more than four decades. CASTRO brought Cuba onto the world stage by inviting Soviet support in the 1960s, inciting revolutionary movements throughout Latin America and Africa in the 1970s, and sending his army to fight in Angola in the 1980s. At home, Havana provided Cubans with high levels of healthcare, education, and social security while suppressing the Roman Catholic Church and arresting political dissidents. Cuba is slowly recovering from severe economic recession following the withdrawal of former-Soviet subsidies, worth \$4billion-\$6 billion per year, in 1990.

Economy

Economy - overview: The state plays the primary role in the economy and controls practically all foreign trade. The government has undertaken several reforms in recent years to stem excess liquidity, increase labor incentives, and alleviate serious shortages of food, consumer goods, and services. The liberalized agricultural markets introduced in October 1994, at which state and private farmers sell above-quota production at unrestricted prices, have broadened legal consumption alternatives and reduced black market prices. Government efforts to lower subsidies to unprofitable enterprises and to shrink the money supply caused the semi-official exchange rate for the Cuban peso to move from a peak of 120 to the dollar in the summer of 1994 to 21 to the dollar by yearend 1998. New taxes introduced in 1996 helped drive down the number of self-employed workers from 208,000 in January 1996 to 155,000 by July 1998. Havana announced in 1995 that GDP declined by 35% during 1989-93, the result of lost Soviet aid and domestic inefficiencies. The drop in GDP apparently halted in 1994, when Cuba reported 0.7% growth, followed by increases of 2.5% in 1995 and 7.8% in 1996. Growth slowed again in 1997 and 1998 to 2.5% and 1.2% respectively. Export earnings declined 22% in 1998, to \$1.4 billion, the result of lower sugar export volume and lower world prices for nickel and sugar. Import expenditures also fell 15% to \$3.0 billion, in part due to lower world oil prices. Tourism and remittances play a key role in foreign currency earnings. Living standards for the average Cuban remain at a depressed level compared with 1990.

Economy

Economy - overview: Economic affairs are dominated by the division of the country into the southern (Greek) area controlled by the Cyprus Government and the northern Turkish

Cypriot-administered area. The Greek Cypriot economy is prosperous but highly susceptible to external shocks. Erratic growth rates in the 1990s reflect the economy's vulnerability to swings in tourist arrivals, caused by political instability on the island and fluctuations in economic conditions in Western Europe. Economic policy in the south is focused on meeting the criteria for admission to the EU. As in the Turkish sector, water shortage is a growing problem, and several desalination plants are planned. The Turkish Cypriot economy has about one-fifth the population and one-third the per capita GDP of the south. Because it is recognized only by Turkey, it has had much difficulty arranging foreign financing, and foreign firms have hesitated to invest there. The economy remains heavily dependent on agriculture and government service, which together employ about half of the work force. Moreover, the small, vulnerable economy has suffered because the Turkish lira is legal tender. To compensate for the economy's weakness, Turkey provides direct and indirect aid to nearly every sector, e.g. tourism, education, and industry.

Czech Republic

Introduction

Background: Once part of the Holy Roman Empire and, later, the Austro-Hungarian monarchy, Czechoslovakia became an independent nation at the end of World War I. Independence ended with the German takeover in 1939. After World War II, Czechoslovakia fell within the Soviet sphere of influence, and in 1968 an invasion by Warsaw Pact troops snuffed out anti-communist demonstrations and riots. With the collapse of Soviet authority in 1991, Czechoslovakia regained its freedom. On 1 January 1993, the country peacefully split into its two ethnic components, the Czech Republic and Slovakia. The Czech Republic, largely by aspiring to become a NATO and EU member, has moved toward integration in world markets, a development that poses both opportunities and risks. But Prague has had a difficult time convincing the public that membership in NATO is crucial to Czech security. At the same time, support for eventual EU membership is waning. Coupled with the country's worsening economic situation, Prague's political scene, troubled for the past three years, will remain so for the foreseeable future.

Economy

Economy - overview: Political and financial crises in 1997 shattered the Czech Republic's image as one of the most stable and prosperous of post-Communist states. Delays in enterprise restructuring and failure to develop a well-functioning capital market played major roles in Czech economic troubles, which culminated in a currency crisis in May. The currency was forced out of its fluctuation band as investors worried that the current account deficit, which reached nearly 8% of GDP in 1996, would become unsustainable. After expending \$3 billion in vain to support the currency, the central bank let it float. The growing current account imbalance reflected a surge in domestic demand and poor export performance, as wage increases outpaced productivity. The government was forced to introduce two austerity packages later in the spring which cut government spending by 2.5% of GDP. A tough 1998 budget continued the painful medicine. These problems were compounded in the summer of 1997 by unprecedented flooding which inundated much of the eastern part of the country. Czech difficulties contrast with earlier achievements of strong GDP growth, a balanced budget, and inflation and unemployment that were among the lowest in the region. The Czech economy's transition problems continue to be too much direct and indirect government influence on the privatized economy, the sometimes ineffective management of privatized firms, and a shortage of experienced financial analysts for the banking system. The country slipped into a mild recession in 1998, but hopes to rebound with 1% growth in 1999.

Economy

Economy - overview: This thoroughly modern market economy features high-tech agriculture, up-to-date small-scale and corporate industry, extensive government welfare measures, comfortable living standards, and high dependence on foreign trade. Denmark is a net exporter of food. The

Denmark (continued)

center-left coalition government will concentrate on reducing the persistently high unemployment rate and the budget deficit as well as following the previous government's policies of maintaining low inflation and a current account surplus. The coalition also vows to maintain a stable currency. The coalition has lowered marginal income taxes while maintaining overall tax revenues; boosted industrial competitiveness through labor market and tax reforms and increased research and development funds; and improved welfare services for the neediest while cutting paperwork and delays. Denmark chose not to join the 11 other EU members who launched the euro on 1 January 1999. Because of the global slowdown, GDP growth may fall to 1% in 1999.

Economy

Economy - overview: The economy is based on service activities connected with the country's strategic location and status as a free trade zone in northeast Africa. Two-thirds of the inhabitants live in the capital city, the remainder being mostly nomadic herders. Scanty rainfall limits crop production to fruits and vegetables, and most food must be imported. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. It has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects. An unemployment rate of 40% to 50% continues to be a major problem. Per capita consumption dropped an estimated 35% over the last seven years because of recession, civil war, and a high population growth rate (including immigrants and refugees). Also, renewed fighting between Ethiopia and Eritrea has disturbed normal external channels of commerce. Faced with a multitude of economic difficulties, the government has fallen in arrears on long-term external debt and has been struggling to meet the stipulations of foreign aid donors.

Economy

Economy - overview: The economy depends on agriculture and is highly vulnerable to climatic

Dominica (continued)

conditions, notably tropical storms. Agriculture, primarily bananas, accounts for 20% of GDP and employs 40% of the labor force. Development of the tourist industry remains difficult because of the rugged coastline, lack of beaches, and the lack of an international airport. Hurricane Luis devastated the country's banana crop in September 1995; tropical storms had wiped out one-quarter of the crop in 1994 as well. The economy began to recover in mid-1998, fueled by increases in construction, soap production, and tourist arrivals. The government is attempting to develop an offshore financial industry in order to diversify the island's production base.

Economy

Economy - overview: In December 1996, incoming President FERNANDEZ presented a bold reform package for this Caribbean economy - including the devaluation of the peso, income tax cuts, a 50% increase in sales taxes, reduced import tariffs, and increased gasoline prices - in an attempt to create a

Dominican Republic (continued)

market-oriented economy that can compete internationally. Even though most reforms are stalled in the legislature, the economy grew vigorously in 1997-98, with tourism and telecommunications leading the advance. The government is working to increase electric generating capacity, a key to continued economic growth, but the privatization of the state electricity company has met numerous delays. In late September 1998, Hurricane Georges caused approximately \$1.3 billion in damages, largely to agriculture and infrastructure.

Economy

Economy - overview: Ecuador has substantial oil resources and rich agricultural areas. Because the country exports primary products such as oil, bananas, and shrimp, fluctuations in world market prices can have a substantial domestic impact. Ecuador joined the World Trade Organization in 1996, but has failed to comply with many of its accession commitments. In recent years, growth has been uneven due to ill-conceived fiscal stabilization measures. The populist government of Abdala BUCARAM Ortiz proposed a major currency reform in 1996, but popular discontent with BUCARAM'S austerity measures and rampant official corruption led to his replacement by National Congress with Fabian ALARCON in February 1997. ALARCON adopted a minimalist economic program that put off necessary reforms until August 1998 when President Jamil MAHUAD was elected. MAHAUD inherited an economy in crisis due to mismanagement, El Nino damage to key export sectors such as agriculture, and low world commodity prices in the wake of the Asian financial crisis. MAHAUD announced a fiscal austerity package and expressed interest in an IMF agreement but faces major difficulties in promoting economic growth, including possible political objections to further reform.

Egypt

Introduction

Background: One of the four great ancient civilizations, Egypt, ruled by powerful pharaohs, bequeathed to Western civilization numerous advances in technology, science, and the arts. For the last two millennia, however, Egypt has served a series of foreign masters - Persians, Greeks, Romans, Byzantines, Arabs, Turks, and the British. Formal independence came in 1922, and the remnants of British control ended after World War II. The completion of the Aswan High Dam in 1981 altered the time-honored place of the Nile River in the agriculture and ecology of Egypt. A rapidly growing population will stress Egyptian society and resources as it enters the new millennium.

Economy

Economy - overview: At the end of the 1980s, Egypt faced problems of low productivity and poor economic management, compounded by the adverse social effects of excessive population growth, high inflation, and massive urban overcrowding. In the face of these pressures, in 1991 Egypt undertook wide-ranging macroeconomic stabilization and structural reform measures. This reform effort has been supported by three IMF arrangements, the last of which expired in September 1998. Egypt's reform efforts - and its participation in the Gulf war coalition - also led to massive debt relief under the Paris Club arrangements. Substantial progress has been made in improving macroeconomic performance. Cairo tamed inflation, slashed budget deficits, and built up foreign reserves to an all-time high. Although the pace of structural reforms - such as privatization and new business legislation - has been slower than envisioned under the IMF program, Egypt's steps toward a more market-oriented economy have prompted increased foreign investment. The November 1997 massacre of foreign tourists in Luxor affected tourism enough to slow the GDP growth rate for 1998 compared to earlier projections. Tourism's slow recovery, coupled with low world oil prices, caused a downturn in foreign exchange earnings in 1998, but external payments are not in crisis.

Economy

Economy - overview: In recent years inflation has fallen to unprecedented levels, and exports have grown substantially. Even so, El Salvador has experienced sizable deficits in both its trade and its fiscal accounts. The trade deficit has been offset by remittances from the large number of Salvadorans living abroad and from external aid. El Salvador sustained damage from Hurricane Mitch, but not as much as other Central American countries. Inflation and the trade deficit are expected to rise somewhat as a result.

Economy

Economy - overview: The discovery and exploitation of large oil reserves have contributed to dramatic economic growth in recent years. Several large oil companies are expected to bid on oil licenses by May 1999. Forestry, farming, and fishing are also major components of GDP. Subsistence farming predominates. Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the deterioration of the rural economy under successive brutal regimes has diminished potential for agriculture-led growth. A number of aid programs sponsored by the World Bank and the IMF have been cut off since 1993 because of the government's gross corruption and mismanagement. Businesses, for the most part, are owned by government officials and their family members. Undeveloped natural resources include titanium, iron ore, manganese, uranium, and alluvial gold. The country responded favorably to the devaluation of the CFA franc in January 1994.

Eritrea

Introduction

Background: On 29 May 1991, ISAIAS Afworki, secretary general of the People's Front for Democracy and Justice (PFDJ), which then served as the country's legislative body, announced the formation of the Provisional Government in Eritrea (PGE) in preparation for the 23-25 April 1993 referendum on independence from Ethiopia. The referendum resulted in a landslide vote for independence, which became effective on 24 May 1993.

Economy

Economy - overview: With independence from Ethiopia on 24 May 1993, Eritrea faced the bitter economic problem of a small, desperately poor African country. The economy is largely based on subsistence agriculture, with over 70% of the population involved in farming and herding. The small industrial sector consists mainly of light industries with outmoded technologies. Domestic output (GDP) is substantially augmented by worker remittances from abroad. Government revenues come from custom duties and taxes on income and sales. Road construction is a top domestic priority. Eritrea has long-term prospects for revenues from the development of offshore oil, offshore fishing, and tourism. Eritrea's economic future depends on its ability to master fundamental social and economic problems, e.g., overcoming illiteracy, promoting job creation, expanding technical training, attracting foreign investment, and streamlining the bureaucracy. The most immediate threat to the economy, however, is the possible expansion of the armed conflict with Ethiopia.

Estonia

Introduction

Background: In and out of Swedish and Russian control over the centuries, this little Baltic state was re-incorporated into the USSR after German occupation in World War II. Independence came with the collapse of the USSR in 1991; the last Russian troops left in 1994. Estonia thus became free to promote economic and political ties with Western Europe. The position of ethnic Russians (29% of the population) remains an issue of concern to Moscow. European Union (EU) membership negotiations, which began in 1998, remain a domestic issue.

Economy

Economy - overview: Estonia's continued adherence to market reforms, disciplined fiscal and monetary policies, and a liberal free trade regime resulted in GDP growth in 1998 of 5.5% and a decrease in inflation to 6.5% from 11.2% in 1997. A high but slightly decreased current account deficit was estimated at 8.6%. The fall in GDP growth is largely due to the impact of Russia's financial crisis and reduced investment in emerging markets in the wake of the Asian financial crisis. Like other small emerging markets, Estonia will face difficulties in 1999 as a result of continuing fallout from Asia. Key events of 1998 were the start of official EU accession talks, banking sector consolidation - nine banks were reduced to five - and the important role that Swedish capital played in the large banks (Swedbank's acquisition of a majority stake in Hansapank has accounted for the large increase in foreign direct investment). The IMF urged Estonia to maintain a stable economy and good reputation in international markets and to avoid populist policies in the run-up to March 1999 parliamentary elections. The government completed restructuring of state-controlled Estonian Telecom, the sale of 49% of which will be the flagship privatization in 1999 and the largest public equity transaction in the Baltics. Estonia expects to join the World Trade Organization in 1999.

Economy

Economy - overview: Ethiopia remains one of the least developed countries in the world. Its economy is based on agriculture, which accounts for more than half of GDP, 90% of exports, and 80% of total employment; coffee generates 60% of export earnings. The agricultural sector suffers from frequent periods of drought, poor cultivation practices, and deterioration of internal security conditions. The manufacturing sector is heavily dependent on inputs from the agricultural sector. Over 90% of large-scale industry, but less than 10% of agriculture, is state-run. The government is considering selling off a portion of state-owned plants and is implementing reform measures that are gradually liberalizing the economy. A major medium-term problem is the improvement of roads, water supply, and other parts of an

infrastructure badly neglected during years of civil strife. Renewed fighting with Eritrea dims economic prospects for 1999.

E c o n o m y

Economy - overview: The economy was formerly based on agriculture, mainly sheep farming, but today fishing contributes the bulk of economic activity. In 1987 the government began selling fishing licenses to foreign trawlers operating within the Falklands exclusive fishing zone. These license fees total more than \$40 million per year, which goes to support the island's health, education, and welfare system. Squid accounts for 75% of the fish taken. Dairy farming supports domestic consumption; crops furnish winter fodder. Exports feature shipments of high-grade wool to the UK and the sale of postage stamps and coins. To encourage tourism, the Falkland Islands Development Corporation has built three lodges for visitors attracted by the abundant wildlife and trout fishing. The islands are now self-financing except for defense. The British Geological Survey announced a 200-mile oil exploration zone around the islands in 1993, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day; to date no exploitable site has been identified. An agreement between Argentina and the UK in 1995 seeks to defuse licensing and sovereignty conflicts that would dampen foreign interest in exploiting potential oil reserves.

Economy

Economy - overview: After the severe economic
troubles of the early 1990s, brought on by a drop in the
vital fish catch, the Faroe Islands have come back in
the last few years, with unemployment down to 5% in
mid-1998. Nevertheless the total dependence on
fishing means the economy remains extremely

vulnerable. The Faroese hope to broaden their
economic base by building new fish-processing
plants. Oil finds close to the Faroese area give hope
for deposits in the immediate Faroese area, which
may lay the basis for sustained economic prosperity.
The Faroese are supported by a substantial annual
subsidy from Denmark.

developed of the Pacific island economies, though still with a large subsistence sector. Sugar exports and a growing tourist industry are the major sources of foreign exchange. Sugar processing makes up one-third of industrial activity. Roughly 250,000 tourists visit each year. Political uncertainty and drought, however, contribute to substantial fluctuations in earnings from tourism and sugar and to the emigration of skilled workers. Fiji's growth slowed in 1997 because the sugar industry suffered from low world prices and rent disputes between farmers and landowners. Drought in 1998 further damaged the sugar industry. Overall growth in 1991-98 has averaged less than 2% per year, with long-term problems of low investment and uncertain property rights. The central bank predicts growth of 2% to 3% in 1999.

Finland

Introduction

Background: Long ruled by foreign powers, including Sweden and the pre-revolutionary Russian Empire, Finland finally declared independence in 1917. During World War II, Finland fought the USSR twice and then the Germans toward the end of the war. In the following half-century, the Finns made a remarkable transformation from a farm/forest economy to a diversified modern industrial economy. Per capita income has risen to the West European level; Finland is a member of the European Union and is the only Nordic state to join the euro system at its initiation in January 1999.

Economy

Economy - overview: Finland has a highly industrialized, largely free-market economy, with per capita output roughly that of the UK, France, Germany, and Italy. Its key economic sector is manufacturing - principally the wood, metals, engineering, telecommunications, and electronics industries. Trade is important, with the export of goods representing about 30% of GDP. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export earner, provides a secondary occupation for the rural population. The economy has come back from the recession of 1990-92, which had been caused by economic overheating, depressed foreign markets, and the dismantling of the barter system between Finland and the former Soviet Union. Rapidly increasing integration with Western Europe - Finland was one of the 11 countries joining the euro monetary system (EMU) on 1 January 1999 - will dominate the economic picture over the next several years. Growth in 1999 probably will slow, perhaps to 3%, a barrier to any substantial drop in unemployment.

France

Introduction

Background: Although ultimately a victor in World Wars I and II, France lost many men, much wealth, its extensive empire, and its rank as a dominant nation-state. France has struggled since 1958 - arguably with success - to construct a presidential democracy resistant to the severe instabilities inherent in the parliamentary democracy of early 20th century France. In recent years, its reconciliation and cooperation with Germany have proved central to the economic integration of Europe, including the advent of the euro in January 1999.

Economy

Economy - overview: One of the four West European trillion-dollar economies, France matches a growing services sector with a diversified industrial

base and substantial agricultural resources. Industry generates one-quarter of GDP and more than 80% of export earnings. The government retains considerable influence over key segments of each sector, with majority ownership of railway, electricity, aircraft, and telecommunication firms. It has been gradually relaxing its control over these sectors since the early 1990s. The government is slowly selling off its holdings in France Telecom, in Air France, and in the insurance, banking, and defense industries.

Meanwhile, large tracts of fertile land, the application of modern technology, and subsidies have combined to make France the leading agricultural producer in Western Europe. A major exporter of wheat and dairy products, France is practically self-sufficient in agriculture. The economy expanded by 3% in 1998, following a 2.3% gain in 1997. Persistently high unemployment still poses a major problem for the government. France has shied away from cutting exceptionally generous social welfare benefits or the enormous state bureaucracy, preferring to pare defense spending and raise taxes to keep the deficit down. The JOSPIN administration has pledged both to lower unemployment and trim spending, pinning its hopes for new jobs on economic growth and on legislation to gradually reduce the workweek from 39 to 35 hours by 2002. France joined 10 other EU members to launch the euro on 1 January 1999.

Economy

Economy - overview: The economy is tied closely to that of France through subsidies and imports. Besides the French space center at Kourou, fishing and forestry are the most important economic activities, with exports of fish and fish products (mostly shrimp) accounting for more than 60% of total revenue in 1992. The large reserves of tropical hardwoods, not fully exploited, support an expanding sawmill industry which provides sawn logs for export. Cultivation of crops is limited to the coastal area, where the population is largely concentrated; sugar cane is the major cash crop. French Guiana is heavily dependent on imports of food and energy. Unemployment is a serious problem, particularly among younger workers. **GDP:** purchasing power parity - \$1 billion (1998 est.) **GDP - real growth rate:** NA% **GDP - per capita:** purchasing power parity - \$6,000 (1998 est.)

Economy

Economy - overview: Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. Tourism accounts for about 20% of GDP and is a primary source of hard currency earnings. The small manufacturing sector primarily processes agricultural products. The territory benefited from a five-year (1994-98) development agreement with France aimed principally at creating new jobs.

Economy

Economy - overview: Gabon enjoys a per capita income four times that of most nations of sub-Saharan Africa. This has supported a sharp decline in extreme poverty; yet because of high income inequality a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The oil sector now accounts for 50% of GDP. Gabon continues to face fluctuating prices for its oil, timber, manganese, and uranium exports. Despite the abundance of natural wealth, the economy is hobbled by poor fiscal management. In 1992, the fiscal deficit widened to 2.4% of GDP, and Gabon failed to settle arrears on its bilateral debt, leading to a cancellation of rescheduling agreements with official and private creditors. Devaluation of its Francophone currency by 50% on 12 January 1994 sparked a one-time inflationary surge, to 35%; the rate dropped to 6% in 1996. The IMF provided a one-year standby arrangement in 1994-95 and a three-year Enhanced Financing Facility (EFF) at near commercial rates beginning in late 1995. Those agreements mandate progress in privatization and fiscal discipline. France provided additional financial support in January 1997 after Gabon had met IMF targets for mid-1996. In 1997, an IMF mission to Gabon criticized the government for overspending on off-budget items, overborrowing from the central bank, and slipping on its schedule for privatization and administrative reform. Growth in 1999 will depend mainly on how world oil prices move.

Economy

Economy - overview: The Gambia has no important mineral or other natural resources and has a limited agricultural base. About 75% of the population depends on crops and livestock for its livelihood. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. Reexport trade normally constitutes a major segment of economic activity, but the 50% devaluation of the CFA franc in January 1994 made Senegalese goods more competitive and hurt the reexport trade. The Gambia has benefited from a rebound in tourism after its decline in response to the military's takeover in July 1994. Short-run economic progress remains highly dependent on sustained bilateral and multilateral aid and on responsible government economic management as forwarded by IMF technical help and advice.

Gaza Strip

Introduction

Background: The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements ("the DOP"), signed in Washington on 13 September 1993, provides for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Permanent status negotiations began on 5 May 1996, but have not resumed since the initial meeting. Under the DOP, Israel agreed to transfer certain powers and responsibilities to the Palestinian Authority, which includes a Palestinian Legislative Council elected in January 1996, as part of interim self-governing arrangements in the West Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, and the Israel-PLO 23 October 1998 Wye River Memorandum. The DOP provides that Israel will retain responsibility during the transitional period for external security and for internal security and public order of settlements and Israelis. Permanent status is to be determined through direct negotiations.

Economy

Economy - overview: Economic conditions in the Gaza Strip - under the responsibility of the Palestinian Authority since the Cairo Agreement of May 1994 - have deteriorated since the early 1990s. Real per capita GDP for the West Bank and Gaza Strip (WBGs) declined 36% between 1992 and 1996 owing to the combined effect of falling aggregate incomes and robust population growth. The downturn in economic activity was largely the result of Israeli closure policies - the imposition of generalized border closures in response to security incidents in Israel - which disrupted previously established labor and commodity market relationships between Israel and the WBGs. The most serious negative social effect of this downturn has been the emergence of chronic unemployment; average unemployment rates in the WBGs during the 1980s were generally under 5%, by the mid-1990s this level had risen to over 20%. Since 1997 Israel's use of comprehensive closures has decreased and, in 1998, Israel implemented new policies to reduce the impact of closures and other security procedures on the movement of Palestinian goods and labor. These positive changes to the conduct of economic activity, combined with international donor pledges of over \$3 billion made to the Palestinian Authority in November, may fuel a moderate economic recovery in 1999.

Georgia

Introduction

Background: Beset by ethnic and civil strife since independence from the Soviet Union in December 1991, Georgia began to stabilize in 1994. Political settlements for separatist conflicts in South Ossetia and Abkhazia remain elusive. The conflict in South Ossetia has been dormant since spring 1994, but sporadic violence continues between Abkhaz forces and Georgian partisans in western Georgia. Russian peacekeepers are deployed in both regions and a UN Observer Mission is operating in Abkhazia. As a result of these conflicts, Georgia still has about 250,000 internally displaced people. In 1995, Georgia adopted a new constitution and conducted generally free and fair nationwide presidential and parliamentary elections. In 1996, the government focused its attention on implementing an ambitious economic reform program and professionalizing its parliament. Violence and organized crime were sharply curtailed in 1995 and 1996, but corruption remains rife. Georgia has taken some steps to reduce its dependence on Russia, acquiring coastal patrol boats in 1997 to replace Russian border units along the Black Sea coast. In 1998, Georgia assumed control of its Black Sea coast and about half of its land border with Turkey in line with a June 1998 agreement with Russia. Since 1997, Georgia's parliament has sharpened its rhetoric against Russia's continued military presence on Georgian territory. In February 1998 an assassination attempt was made against President SHEVARDNADZE by supporters of the late former president Zviad GAMSAKHURDIA. In October 1998, a disaffected military officer led a failed mutiny in western Georgia; the armed forces continue to feel the ripple effect of the uprising. Georgia faces parliamentary elections this fall, and presidential elections next spring. After two years of robust growth, the economy, hurt by the financial crisis in Russia, slowed in 1998.

Economy

Economy - overview: Georgia's economy has traditionally revolved around Black Sea tourism; cultivation of citrus fruits, tea, and grapes; mining of manganese and copper; and output of a small industrial sector producing wine, metals, machinery,

chemicals, and textiles. The country imports the bulk of its energy needs, including natural gas and oil products. Its only sizable internal energy resource is hydropower. Despite the severe damage the economy has suffered due to civil strife, Georgia, with the help of the IMF and World Bank, made substantial economic gains since 1995, increasing GDP growth and slashing inflation. The Georgian economy suffered some setbacks in late 1998, including a large budget deficit due to a failure to collect tax revenue and to the impact of the Russian economic crisis. Georgia also still suffers from energy shortages; it privatized the distribution network in 1998, and deliveries are steadily improving. Georgia is pinning its hopes for long-term recovery on the development of an international transportation corridor through the key Black Sea ports of P'ot'i and Bat'umi. The construction of a Caspian oil pipeline through Georgia - scheduled to open in early 1999 - should spur greater Western investment in the economy. The global economic slowdown, a growing trade deficit, continuing problems with corruption, and political uncertainties cloud the short-term economic picture.

Germany

Introduction

Background: Germany - first united in 1871 - suffered defeats in successive world wars and was occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the beginning of the Cold War and increasing tension between the US and Soviet Union, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The newly democratic FRG embedded itself in key Western economic and security organizations, the EU and NATO, while the Communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the Soviet Union and end of the Cold War cleared the path for the fall of the Berlin Wall in 1989 and German re-unification in 1990. Germany has expended considerable funds - roughly \$100 billion a year - in subsequent years working to bring eastern productivity and wages up to western standards, with mixed results. Unemployment - which in the east is nearly double that in the west - has grown over the last several years, primarily as a result of structural problems like an inflexible labor market. In January 1999, Germany and 10 other members of the EU formed a common European currency, the euro, and the German government is now looking toward reform of the EU budget and enlargement of the Union into Central Europe.

Economy

Economy - overview: Germany possesses the world's third most powerful economy, with its capitalist market system tempered by generous welfare benefits. On 1 January 1999, Germany and 10 other European Union countries launched the European Monetary Union (EMU) by permanently fixing their

bilateral exchange rates and giving the new European Central Bank control over the zone's monetary policy. Germans expect to have the new European currency, the euro, in pocket by 2002. Domestic demand contributed to a moderate economic upswing in early 1998, although unemployment remains high.

Job-creation measures have helped superficially, but structural rigidities - like high wages and costly benefits - make unemployment a long-term, not just a cyclical, problem. Although minimally affected by the Asian crisis in 1998, Germany revised its 1999 forecast downward at the beginning of the year to reflect anticipated effects from the global economic slowdown. Over the long term, Germany faces budgetary problems - lower tax revenues and higher pension outlays - as its population ages. Meanwhile, the German nation continues to wrestle with the integration of eastern Germany, whose adjustment may take decades to complete despite annual transfers from the west of roughly \$100 billion a year. **GDP:** purchasing power parity - \$1.813 trillion (1998 est.)

Economy

Economy - overview: Well endowed with natural resources, Ghana has twice the per capita output of the poorer countries in West Africa. Even so, Ghana remains heavily dependent on international financial and technical assistance. Gold, timber, and cocoa production are major sources of foreign exchange. The domestic economy continues to revolve around subsistence agriculture, which accounts for 41% of GDP and employs 60% of the work force, mainly small landholders. In 1995-97, Ghana made mixed progress under a three-year structural adjustment program in cooperation with the IMF. On the minus side, public sector wage increases and regional peacekeeping commitments have led to continued inflationary deficit financing, depreciation of the cedi, and rising public discontent with Ghana's austerity measures. Power shortages also helped slow growth in 1998.

Economy

Economy - overview: Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. The British military presence has been sharply reduced and now contributes about 11% to the local economy. The financial sector accounts for 15% of GDP; tourism (more than 5 million visitors in 1995), shipping services fees, and duties on consumer goods also generate revenue. Because more than 70% of the economy is in the public sector, changes in government spending have a major impact on the level of employment.

Economy

Economy - overview: Greece has a mixed capitalist economy with the public sector accounting for about half of GDP, although the government plans to privatize some leading state enterprises. Tourism is a key industry, providing a large portion of GDP and foreign exchange earnings. Greece is a major beneficiary of EU aid, equal to about 4% of GDP. The economy has improved steadily over the last few years, as the government has tightened policy with the goal of qualifying Greece to join the EU's single currency (the euro) in 2001. In particular, Greece has cut its budget deficit to just over 2% of GDP and tightened monetary policy, with the result that inflation fell below 4% by the end of 1998 - the lowest rate in 26 years. The outlook for 1999 is good with the budget deficit and inflation both expected to decline further, while GDP growth stays near 3% and the current account deficit remains below 2% of GDP.

Economy

Economy - overview: Greenland suffered negative economic growth in the early 1990s, but since 1993 the economy has improved. The Greenland Home Rule Government (GHRG) has pursued a light fiscal policy since the late 1980s which has helped create surpluses in the public budget and low inflation. Since 1990, Greenland has registered a foreign trade deficit following the closure of the last remaining lead and zinc mine in 1989. Greenland today is critically dependent on fishing and fish exports; the shrimp fishery is by far the largest income earner. Despite resumption of several interesting hydrocarbon and minerals exploration activities, it will take several years before production can materialize. Tourism is the only sector offering any near-term potential and even this is limited due to a short season and high costs. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. About half the government revenues come from grants from the Danish Government, an important supplement of GDP.

Flag description: a rectangle divided diagonally into yellow triangles (top and bottom) and green triangles (hoist side and outer side), with a red border around the flag; there are seven yellow, five-pointed stars with three centered in the top red border, three centered in the bottom red border, and one on a red disk superimposed at the center of the flag; there is also a symbolic nutmeg pod on the hoist-side triangle (Grenada is the world's second-largest producer of

nutmeg, after Indonesia); the seven stars represent the seven administrative divisions

Economy

Economy - overview: In this island economy progress in fiscal reforms and prudent macroeconomic management have boosted annual growth to nearly 5% in 1997-98. The increase in economic activity has been led by construction and trade. Tourist facilities are being expanded; tourism is the leading foreign exchange earner. Major short-term concerns are the rising fiscal deficit and the deterioration in the external account balance.

Grenada shares a common central bank and a common currency with seven other members of the Organization of Eastern Caribbean States (OECS).

Economy

Economy - overview: The economy depends on agriculture, tourism, light industry, and services. It also depends on France for large subsidies and imports. Tourism is a key industry, with most tourists from the US; an increasingly large number of cruise ships visit the islands. The traditional sugarcane crop is slowly being replaced by other crops, such as bananas (which now supply about 50% of export earnings), eggplant, and flowers. Other vegetables and root crops are cultivated for local consumption, although Guadeloupe is still dependent on imported food, mainly from France. Light industry features sugar and rum production. Most manufactured goods and fuel are imported. Unemployment is especially high among the young.

Economy

Economy - overview: The economy depends mainly on US military spending and on tourist

Guam (continued)

revenue. Over the past 20 years, the tourist industry has grown rapidly, creating a construction boom for new hotels and the expansion of older ones. More than 1 million tourists visit Guam each year. The industry suffered a setback in 1998 because of the continuing Japanese recession; the Japanese normally make up almost 90% of the tourists. Most food and industrial goods are imported. Guam faces the problem of building up the civilian economic sector to offset the impact of military downsizing.

Economy

Economy - overview: The agricultural sector accounts for one-fourth of GDP and two-thirds of exports and employs more than half of the labor force. Coffee, sugar, and bananas are the main products.

Guatemala (continued)

Manufacturing and construction account for one-fifth of GDP. Since assuming office in January 1996, President ARZU has worked to implement a program of economic liberalization and political modernization. The signing of the peace accords in December 1996, which ended 36 years of civil war, removed a major obstacle to foreign investment. In 1998, Hurricane Mitch caused relatively little damage to Guatemala compared to its neighbors. Nevertheless, growth will be somewhat smaller due to the storm. Remaining challenges include increasing government revenues, and negotiating a program with the IMF.

Economy

Economy - overview: Financial services - banking, fund management, insurance, etc. - account for about 55% of total income in this tiny Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the rules of the game under which Guernsey operates.

Economy

Economy - overview: Guinea possesses major mineral, hydropower, and agricultural resources, yet remains a poor underdeveloped nation. The agricultural sector employs 80% of the work force. Guinea possesses over 25% of the world's bauxite reserves and is the second largest bauxite producer. The mining sector accounted for about 75% of exports in 1998. Long-run improvements in government fiscal arrangements, literacy, and the legal framework are needed if the country is to move out of poverty. The government made encouraging progress in budget management in 1997-98. Except in the mining industry, foreign investment remains minimal but is expected to pick up in 1999.

Economy

Economy - overview: One of the 20 poorest countries in the world, Guinea-Bissau depends mainly on farming and fishing. Cashew crops have increased remarkably in recent years, and the country now ranks sixth in cashew production. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy in 1998. Before the war, trade reform and price liberalization were the most successful part of the country's structural adjustment program under IMF sponsorship. The tightening of monetary policy and the development of the private sector had also begun to reinvigorate the economy. Inflation dropped sharply in the first quarter of 1997. Membership in the WAMU (West African Monetary Union), begun in May 1997, was expected to support 5% annual growth and contribute to fiscal discipline. Because of high costs, the development of petroleum, phosphate, and

other mineral resources was not a near-term prospect.

Economy

Economy - overview: In 1997, Guyana, one of the poorest countries in the Western Hemisphere, posted its sixth straight year of economic growth of 5% or better, with the advance led by gold and bauxite mining and by sugar growing. Favorable growth factors have included expansion in the key agricultural and mining sectors, a more favorable atmosphere for business initiative, a more realistic exchange rate, a moderate inflation rate, and the continued support of international organizations. However, a severe drought and political turmoil following the 1997 elections contributed to a negative growth rate for 1998. Serious underlying economic problems will continue. Electricity has been in short supply and constitutes a major barrier to future gains in national output. The government must persist in efforts to manage its sizable external debt and extend its privatization program.

Economy

Economy - overview: About 75% of the population lives in abject poverty. Nearly 70% of all Haitians

depend on the agriculture sector, which consists mainly of small-scale subsistence farming and employs about two-thirds of the economically active work force. The country has experienced little job creation since President PREVAL took office in February 1996, although the informal economy is growing. Failure to reach agreements with international sponsors have denied Haiti badly needed budget and development assistance. Meeting aid conditions in 1999 will be especially challenging in the face of mounting popular criticism of reforms.

Holy See (Vatican City)

Introduction

Background: Popes in their secular role ruled much of the Italian peninsula, including Rome, for about a thousand years, until 1870. A dispute between a series of popes and Italy was settled in 1929 by treaties that recognized the Vatican City as an independent sovereignty and gave Roman Catholicism special status in Italy. The US established formal diplomatic relationships with the Vatican in 1984. Present issues in the Vatican concern the ill health of Pope John Paul II, who turns 79 on 20 May 1999, inter-religious dialogue and reconciliation, and the adjustment of church doctrine in an era of rapid change. About 1 billion people worldwide profess the Roman Catholic faith.

Economy

Economy - overview: Prior to Hurricane Mitch in the fall of 1998, Honduras had been pursuing a moderate economic reform program and had posted strong annual growth numbers. The storm has dramatically changed economic forecasts for Honduras, one of the poorest countries in Central America and the hardest hit by Mitch. Honduras sustained approximately \$3 billion in damages and will probably see GDP shrink by 2% in 1999 and unemployment rise. Hardest hit was the all-important agricultural sector, which is responsible for the majority of exports. As a result, the trade deficit is likely to balloon in 1999 to \$445 million.

Honduras (continued)

However, significant aid has helped to stabilize the country. In addition, the Paris Club and bilateral creditors have offered substantial debt relief, and Tegucigalpa is currently under consideration for inclusion in the IMF-World Bank Highly Indebted Poor Countries Initiative (HIPC). Additional financing will be needed to restore the economy to its pre-Mitch level.

Hong Kong

(special administrative region of China)

Introduction

Background: Pursuant to the agreement signed by China and the UK on 19 December 1984, Hong Kong became the Hong Kong Special Administrative Region (SAR) of China on 1 July 1997. Under the terms of this agreement, China has promised that under its "one country, two systems" formula its socialist economic system will not be practiced in Hong Kong, and that Hong Kong shall enjoy a high degree of autonomy in all matters except foreign and defense affairs.

Economy

Economy - overview: Hong Kong has a bustling free market economy highly dependent on international trade. Natural resources are limited, and food and raw materials must be imported. Indeed, imports and exports, including reexports, each exceed GDP in dollar value. Even before Hong Kong reverted to Chinese administration on 1 July 1997 it had extensive trade and investment ties with China. Real GDP growth averaged a remarkable 8% in 1987-88 and a still strong 5% in 1989-97. The widespread Asian economic difficulties in 1998 hit this trade-dependent economy quite hard, with GDP down 5%.

Hungary

Introduction

Background: After World War II Hungary became part of Soviet-dominated Eastern Europe, and its government and economy were refashioned on the communist model. Increased nationalist opposition, which culminated in the government's announcement of withdrawal from the Warsaw Pact in 1956, led to massive military intervention by Moscow and the swift crushing of the revolt. In the more open GORBACHEV years, Hungary led the movement to dissolve the Warsaw Pact and steadily moved toward multiparty democracy and a market-oriented economy. Following the collapse of the USSR in 1991, Hungary has developed close political and economic relations with western Europe and is now being considered a possible future member of the European Union.

Economy

Economy - overview: Hungary has consolidated its March 1995 stabilization program and undergone enough restructuring to become an established market economy. The country appears to have entered a period of sustainable growth, gradually falling inflation, and stable external balances. The government's main economic priorities are to complete structural reforms, particularly the implementation of the 1997 pension reform act (the first in the region), taxation reform, and planning for comprehensive health care, local government finance reform, and the reform of education at all levels. Foreign investment has totaled more than \$17 billion through 1998. In recognition of Hungary's improved macroeconomic situation, all major credit-rating agencies listed the country's foreign currency debt issuances as investment grade in 1996. The current IMF stand-by arrangement expired in February 1998, and Budapest and the IMF agree that there is no need to renew it. The OECD welcomed Hungary as a member in May 1996, and in December 1997 the EU invited Hungary to begin the accession process. Forecasters expect 4%-5% growth in 1999.

Iceland

Introduction

Background: Iceland boasts the oldest surviving parliament in the world, the Althing, established in 930. Subsequently this Nordic island, whose small population has largely depended on fishing and sheep-herding for a living, came under the rule of Norway and then Denmark. It gained home rule in 1874 and full independence in 1944. Literacy, longevity, and social cohesion are topnotch by world standards. Tensions continue with Norway, Russia, and other nearby countries over fishing rights in the North Atlantic and adjacent seas.

Economy

Economy - overview: Iceland's Scandinavian-type economy is basically capitalistic, yet with an extensive welfare system, low unemployment, and remarkably even distribution of income. The economy depends heavily on the fishing industry, which provides 75% of export earnings and employs 12% of the work force. In the absence of other natural resources - except energy - Iceland's economy is vulnerable to changing world fish prices. The economy remains sensitive to declining fish stocks as well as to drops in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. The center-right government plans to continue its policies of reducing the budget and current account deficits, limiting foreign borrowing, containing inflation, revising agricultural and fishing policies, diversifying the economy, and privatizing state-owned industries. The government remains opposed to EU membership, primarily because of Icelanders' concern about losing control over their fishing resources. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, and new developments in software production, biotechnology, and financial services are

taking place. The tourism sector is also expanding, with the recent trends in ecotourism and whale-watching. Growth is likely to slow in 1999, to a still respectable 4.6%.

Economy

Economy - overview: India's economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of support services. 67% of India's labor force work in agriculture, which contributes 25% of the country's GDP. Production, trade, and investment reforms since 1991 have provided new opportunities for Indian businesspersons and an estimated 300 million middle class consumers. New Delhi has avoided debt rescheduling, attracted foreign investment, and revived confidence in India's economic prospects since 1991. Many of the country's fundamentals - including savings rates (26% of GDP) and reserves (now about \$30 billion) - are healthy. Even so, the Indian Government needs to restore the early momentum of reform, especially by continuing reductions in the extensive remaining government regulations. India's exports, currency, and foreign

institutional investment were affected by the East Asian crisis in late 1997 and 1998; but capital account controls, a low ratio of short-term debt to reserves, and enhanced supervision of the financial sector helped insulate it from near term balance-of-payments problems. Exports fell 5% in 1998 mainly because of the fall in Asian currencies relative to the rupee.

Energy, telecommunications, and transportation bottlenecks continue to constrain growth. A series of weak coalition governments have lacked the political strength to push reforms forward to address these and other problems. Indian think tanks project GDP growth of about 4.5% in 1999. Inflation will remain a worrisome problem.

Transnational Issues

Disputes - international: boundary with China in dispute; status of Kashmir with Pakistan; water-sharing problems with Pakistan over the Indus River (Wular Barrage); a portion of the boundary with Bangladesh is indefinite; dispute with Bangladesh over New Moore/South Talpatty Island

Illicit drugs: world's largest producer of licit opium for the pharmaceutical trade, but an undetermined quantity of opium is diverted to illicit international drug markets; major transit country for illicit narcotics produced in neighboring countries; illicit producer of hashish and methaqualone; cultivated 2,050 hectares of illicit opium in 1997, a 34% decrease from 1996, with a potential production of 30 metric tons, a 36% decrease from 1996

Indian Ocean

Geography

Location: body of water between Africa, Antarctica, Asia, and Australia

Geographic coordinates: 30 00 S, 80 00 E

Map references: World

Area:

total: 73.6 million sq km

note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Great Australian Bight, Gulf of Aden, Gulf of Oman, Mozambique Channel, Persian Gulf, Red Sea, Strait of Malacca, and other tributary water bodies

Area - comparative: slightly less than eight times the size of the US; third-largest ocean (after the Pacific Ocean and Atlantic Ocean, but larger than the Arctic Ocean)

Coastline: 66,526 km

Climate: northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Terrain: surface dominated by counterclockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes:

lowest point: Java Trench -7,258 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Indian Ocean (continued)

Natural hazards: ships subject to superstructure icing in extreme south near Antarctica from May to October

Environment - current issues: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Environment - international agreements:
party to: none of the selected agreements
signed, but not ratified: none of the selected agreements

Geography - note: major chokepoints include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

Government

Data code: none; the US Government has not approved a standard for hydrographic codes - see the Cross-Reference List of Hydrographic Codes appendix

Economy

Economy - overview: The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

Indonesia

Introduction

Background: Indonesia declared its independence in 1945 from the Netherlands, a claim disputed, then recognized by the Dutch in 1949. In 1975 Indonesian troops occupied Portuguese East Timor. Current issues include implementing IMF-mandated reforms (particularly restructuring and recapitalizing the insolvent banking sector), effecting a transition to a popularly elected government, addressing longstanding grievances over the role of the ethnic Chinese business class and charges of cronyism and corruption, alleged human rights violations by the military, the role of the military and religion in politics, and growing pressures for some form of independence or autonomy by Aceh, Irian Jaya, and East Timor.

Economy

Economy - overview: The collapse of the rupiah in late 1997 and early 1998 caused GDP to contract by an estimated 13.7% in 1998 because of Indonesian firms' reliance on short-term dollar-denominated debt and high levels of nonperforming loans in the banking sector. The Indonesian Government initially wavered on meeting the conditions it agreed to in exchange for a \$42 billion IMF assistance package, contributing to further loss in investor confidence and outflows of capital. Riots that in many cases targeted ethnic Chinese business owners also set back chances that Indonesia would quickly stabilize its financial crisis and contributed to President SOEHARTO's resignation on 21 May 1998. His successor, B.J. HABIBIE, improved cooperation with the IMF. The money supply - which expanded rapidly early in the year to prop up banks hit by deposit runs - was tightened within a few months, and by October, inflation - which reached a 77% annual rate - was significantly dampened. The government also announced a bank recapitalization program in late 1998, but by early 1999 the plan faced growing challenges over its reliance on public funds. Doubts about whether the program is adequate underlie forecasts of continued - although much less severe - GDP contraction for 1999. Signs of spreading unrest and sectarian violence and concern that social instability will increase as the 7 June 1999 national election approaches also contribute to pessimism about the economy, particularly because foreign investors remain reluctant to begin to increase capital inflows again. The next government will face the challenge of establishing a macroeconomic policy

Economy

Economy - overview: Iran's economy is a mixture of central planning, state ownership of oil and other large enterprises, village agriculture, and small-scale private trading and service ventures. President KHATAMI has continued to follow the market reform plans of former President RAFSANJANI and has indicated that he will pursue diversification of Iran's oil-reliant economy although he has made little progress toward that goal. In the early 1990s, Iran experienced a financial crisis and was forced to reschedule \$15 billion in debt. The strong oil market in 1996 helped ease financial pressures on Iran and allowed for Tehran's timely debt service payments. Iran's financial situation tightened in 1997 and deteriorated further in 1998 because of lower oil prices. As a result Iran has begun to cut imports and fall into arrears on its debt payments.

Transnational Issues

Disputes - international: Iran and Iraq restored diplomatic relations in 1990 but are still trying to work out written agreements settling outstanding disputes from their eight-year war concerning border demarcation, prisoners-of-war, and freedom of navigation and sovereignty over the Shatt al Arab waterway; Iran occupies two islands in the Persian Gulf claimed by the UAE: Lesser Tunb (called Tunb as Sughra in Arabic by UAE and Jazireh-ye Tonb-e Kuchek in Persian by Iran) and Greater Tunb (called Tunb al Kubra in Arabic by UAE and Jazireh-ye Tonb-e Bozorg in Persian by Iran); it jointly administers with the UAE an island in the Persian Gulf claimed by the UAE (called Abu Musa in Arabic by UAE and Jazireh-ye Abu Musa in Persian by Iran) -

over which Iran has taken steps to exert unilateral control since 1992, including access restrictions and a military build-up on the island; the UAE has garnered significant diplomatic support in the region in protesting these Iranian actions; Caspian Sea boundaries are not yet determined among Azerbaijan, Iran, Kazakhstan, Russia, and Turkmenistan

Illicit drugs: despite substantial interdiction efforts, Iran remains a key transshipment point for Southwest Asian heroin to Europe; domestic consumption of narcotics remains a persistent problem and Iranian press reports estimate that there are at least 1.2 million drug users in the country

Iraq

Introduction

Background: Iraq lies in the lower part of the Tigris-Euphrates valley, the heart of one of the four great ancient civilizations. The area was overrun by Arab, Mongol, and Turkish conquerors and became a British mandate following World War I. Independence came in 1932. Iraq's pro-Western stance ended in 1958 with the overthrow of the monarchy. Its subsequent turbulent history has witnessed the dictatorship of SADDAM Husayn, civil war with the Kurds, a bloody conflict with neighboring Iran, and, in 1990, an invasion of Kuwait, swiftly turned back by a Western coalition led by the US. Noncooperation with UN Security Council resolution obligations and the UN's inspection of Iraq's nuclear, chemical, biological, and long-range missile weapons programs remain major problems.

Geography

Environment - current issues: government water control projects have drained most of the inhabited marsh areas east of An Nasiriyah by drying up or diverting the feeder streams and rivers; a once sizable population of Shi'a Muslims, who have inhabited these areas for thousands of years, has been displaced; furthermore, the destruction of the natural habitat poses serious threats to the area's wildlife populations; inadequate supplies of potable water; development of Tigris-Euphrates Rivers system contingent upon agreements with upstream riparian Turkey; air and water pollution; soil degradation (salination) and erosion; desertification

Environment - international agreements:

Economy

Economy - overview: Iraq's economy has been dominated by the oil sector, which has traditionally provided about 95% of foreign exchange earnings. In the 1980s, financial problems caused by massive expenditures in the eight-year war with Iran and damage to oil export facilities by Iran led the government to implement austerity measures, borrow heavily, and later reschedule foreign debt payments; Iraq suffered economic losses of at least \$100 billion from the war. After the end of hostilities in 1988, oil

Iraq (continued)

exports gradually increased with the construction of new pipelines and restoration of damaged facilities. Iraq's seizure of Kuwait in August 1990, subsequent international economic embargoes, and military action by an international coalition beginning in January 1991 drastically reduced economic activity and increased prices. The Iraqi Government has been unwilling to abide by UN resolutions so that the economic embargo could be removed. The government's policies of supporting large military and internal security forces and of allocating resources to key supporters of the regime have exacerbated shortages. The implementation of the UN's oil-for-food program in December 1996 has helped improve economic conditions. For the first three six-month phases of the program, Iraq was allowed to export \$2 billion worth of oil in exchange for food, medicine, and other humanitarian goods. The UN allowed Iraq to export \$5.2 billion of oil beginning with the fourth phase of the program in May 1998. At an average volume of 1.9 million barrels per day during the last half of 1998, oil exports are about three-quarters their prewar level. Per capita food imports have increased significantly, while medical supplies and health care services are steadily improving. Per capita output and living standards are still well below the prewar level, but any estimates have a wide range of error.

Transnational Issues

Disputes - international: Iran and Iraq restored diplomatic relations in 1990 but are still trying to work out written agreements settling outstanding disputes from their eight-year war concerning border demarcation, prisoners-of-war, and freedom of navigation and sovereignty over the Shatt al Arab waterway; in November 1994, Iraq formally accepted the UN-demarcated border with Kuwait which had been spelled out in Security Council Resolutions 687 (1991), 773 (1993), and 883 (1993); this formally ends earlier claims to Kuwait and to Bubiyan and Warbah islands although the government continues periodic rhetorical challenges; dispute over water development plans by Turkey for the Tigris and Euphrates Rivers

Ireland

Introduction

Background: Growing Irish nationalism resulted in independence from the United Kingdom in 1921, with six largely Protestant northern counties remaining within the UK. After World War II bloody strife between Catholics and Protestants over the status of Northern Ireland cost thousands of lives. In 1998, substantial steps toward peace were agreed to by the British and Irish governments and the Roman Catholics and Protestants of Northern Ireland.

Economy

Economy - overview: Ireland is a small, modern, trade-dependent economy with growth averaging 9.5% in 1995-98. Agriculture, once the most important sector, is now dwarfed by industry, which accounts for 39% of GDP, about 80% of exports, and employs 28% of the labor force. Although exports remain the primary engine for Ireland's robust growth, the economy is also benefiting from a rise in consumer spending and recovery in both construction and business investment. Over the past decade, the Irish government has implemented a series of national economic programs designed to curb inflation, reduce

government spending, and promote foreign investment. Although the unemployment rate has been halved, it remains high, and job creation is a primary concern of government policy. Recent efforts have concentrated on improving workers qualifications and the education system. Ireland joined in launching the euro currency system in January 1999 along with 10 other EU nations.

(also see separate Gaza Strip and West Bank entries)

Introduction

Background: The territories occupied by Israel since the 1967 war are not included in the data below, unless otherwise noted. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations are being conducted between Israel and Palestinian representatives, and Israel and Syria, to achieve a permanent settlement between them. On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace treaty. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace.

Economy

Economy - overview: Israel has a technologically advanced market economy with substantial government participation. It depends on imports of crude oil, grains, raw materials, and military equipment. Despite limited natural resources, Israel has intensively developed its agricultural and industrial sectors over the past 20 years.

Manufacturing and construction employ about 28% of Israeli workers; agriculture, forestry, and fishing 2.6%; and services the rest. Israel is largely self-sufficient in food production except for grains. Diamonds, high-technology equipment, and agricultural products (fruits and vegetables) are leading exports. Israel usually posts sizable current account deficits, which are covered by large transfer payments from abroad and by foreign loans. Roughly half of the government's external debt is owed to the US, which is its major source of economic and military aid. The influx of Jewish immigrants from the former USSR topped 750,000 during the period 1989-98, bringing the population of Israel from the former Soviet Union to one million, one-sixth of the total population and adding scientific and professional expertise of

Israel (continued)

substantial value for the economy's future. The influx, coupled with the opening of new markets at the end of the Cold War, energized Israel's economy, which grew rapidly in the early 1990s. But growth began slowing in 1996 when the government imposed tighter fiscal and monetary policies and the immigration bonus petered out.

Italy

Introduction

Background: Italy failed to secure political unification until the 1860s, thus lacking the military and imperial power of Spain, Britain, and France. The fascist dictatorship of MUSSOLINI after World War I, led to the disastrous alliance with HITLER's Germany and defeat in World War II. Italy was a founding member of the European Economic Community (EEC) and joined in the growing political and economic unification of Western Europe, including the introduction of the euro in January 1999. On-going problems include illegal immigration, the ravages of organized crime, high unemployment, and the low incomes and technical standards of Southern Italy compared with the North.

Geography

Economy

Economy - overview: Since World War II, the Italian economy has changed from one based on agriculture into a ranking industrial economy, with approximately the same total and per capita output as France and the UK. This basically capitalistic economy is still divided into a developed industrial north, dominated by private companies, and a less developed agricultural south, with large public enterprises and more than 20% unemployment. Most raw materials needed by industry and over 75% of energy requirements must be imported. In the second half of 1992, Rome became unsettled by the prospect of not qualifying to participate in EU plans for economic and monetary union later in the decade; thus, it finally began to address its huge fiscal imbalances. Subsequently, the government has adopted fairly stringent budgets, abandoned its inflationary wage indexation system, and started to scale back its generous social welfare programs, including pension and health care benefits. In December 1998, Italy adopted a budget compliant with the requirements of

the European Monetary Union (EMU); representatives of government, labor, and employers agreed to an update of the 1993 "social pact," which has been widely credited with having brought Italy's inflation into conformity with EMU requirements. In 1999, Italy must adjust to the loss of an independent monetary policy, which it has used quite liberally in the past to help cope with external shocks. Italy also must work to stimulate employment, promote wage flexibility, and tackle the informal economy.

Economy

Economy - overview: Key sectors in this island economy are bauxite (alumina and bauxite account for more than half of exports) and tourism. Since assuming office in 1992, Prime Minister PATTERSON has eliminated most price controls, streamlined tax schedules, and privatized government enterprises. Continued tight monetary and fiscal policies have helped slow inflation - although inflationary pressures are mounting - and stabilize the exchange rate, but have resulted in the slowdown of economic growth (moving from 1.5% in 1992 to 0.5% in 1995). In 1996, GDP showed negative growth (-1.4%) and remained negative through 1998. Serious problems include: high interest rates; increased foreign competition; the weak financial condition of business in general resulting in receiverships or closures and downsizings of companies; the shift in investment portfolios to non-productive, short-term high yield instruments; a pressured, sometimes sliding, exchange rate; a widening merchandise trade deficit; and a growing internal debt for government bailouts to various ailing sectors of the economy, particularly the financial sector. Jamaica's medium-term prospects will depend upon encouraging investment in the productive sectors, maintaining a competitive exchange rate, stabilizing the labor environment, selling off

reacquired firms, and implementing proper fiscal and monetary policies.

Economy

Economy - overview: Government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) have helped Japan advance with extraordinary rapidity to the rank of second most powerful economy in the world. One notable characteristic of the economy is the working together of manufacturers, suppliers, and distributors in closely knit groups called keiretsu. A second basic feature has been the guarantee of lifetime employment for a substantial portion of the urban labor force; this guarantee is eroding. Industry, the most important sector of the economy, is heavily dependent on imported raw materials and fuels. The much smaller agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. Usually self-sufficient in rice, Japan must import about 50% of its requirements of other grain and fodder crops. Japan maintains one of the world's largest fishing fleets and accounts for nearly 15% of the global catch. For three decades overall real economic growth had been spectacular: a 10% average in the 1960s, a 5% average in the 1970s, and a 4% average in the 1980s. Growth slowed markedly in 1992-95 largely because of the aftereffects of overinvestment during the late 1980s and contractionary domestic policies intended to wring speculative excesses from the stock and real estate markets. Growth picked up to 3.9% in 1996, largely a reflection of stimulative fiscal and monetary policies as well as low rates of inflation. But in 1997-98 Japan experienced a wrenching recession, centered about financial difficulties in the banking system and real estate markets and exacerbated by rigidities in corporate structures and labor markets. In early 1999 output has started to stabilize as emergency government spending begins to take hold. The crowding of habitable land area and the aging of the population are two major long-run problems.

Economy

Economy - overview: The economy is based largely on financial services, agriculture, and tourism. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export earner. Milk products go to the UK and other EU countries. In 1996 the finance sector accounted for about 60% of the island's output. Tourism, another mainstay of the economy, accounts for 24% of GDP. In recent years, the government has encouraged light industry to locate in Jersey, with the result that an electronics industry has developed alongside the traditional manufacturing of knitwear. All raw material and energy requirements are imported, as well as a large share of Jersey's food needs. Light tax and death duties make the island a popular tax haven.

Economy

Economy - overview: Jordan is a small Arab country with inadequate supplies of water and other natural resources such as oil and coal. Jordan benefited from increased Arab aid during the oil boom of the late 1970s and early 1980s, when its annual real GNP growth averaged more than 10%. In the remainder of the 1980s, however, reductions in both Arab aid and worker remittances slowed real economic growth to an average of roughly 2% per year. Imports - mainly oil, capital goods, consumer durables, and food - outstripped exports, with the difference covered by aid, remittances, and borrowing. In mid-1989, the Jordanian Government began debt-rescheduling negotiations and agreed to implement an IMF-supported program designed to gradually reduce the budget deficit and implement badly needed structural reforms. The Persian Gulf crisis that began in August 1990, however, aggravated Jordan's already serious economic problems, forcing the government to shelve the IMF program, stop most debt payments, and suspend rescheduling negotiations. Aid from Gulf Arab states, worker remittances, and trade contracted; and refugees flooded the country, producing serious balance-of-payments problems, stunting GDP growth, and straining government resources. The economy rebounded in 1992, largely due to the influx of capital

Jordan (continued)

repatriated by workers returning from the Gulf, but recovery was uneven. A preliminary agreement with the IMF in early 1999 will provide new loans over the next three years. Sluggish growth, along with debt, poverty, and unemployment are fundamental ongoing economic problems.

Kazakhstan

Introduction

Background: As a republic within the USSR (1920-91), Kazakhstan suffered greatly from Stalinist purges, from environmental damage, and saw the ethnic Russian portion of its population rise to 37% while other non-Kazakhs made up almost 20%. Current issues include the pace of market reform and privatization; fair and free elections and democratic reform; ethnic differences between Russians and Kazakhs; environmental problems; and how to convert the country's abundant energy resources into a better standard of living.

Geography

Location: Central Asia, northwest of China
Geographic coordinates: 48 00 N, 68 00 E

permanent pastures: 57%
forests and woodland: 4%
other: 16% (1996 est.)

Irrigated land: 22,000 sq km (1996 est.)

Natural hazards: earthquakes in the south, mudslides around Almaty

Environment - current issues: radioactive or toxic chemical sites associated with its former defense industries and test ranges are found throughout the country and pose health risks for humans and animals; industrial pollution is severe in some cities; because the two main rivers which flowed into the Aral Sea have been diverted for irrigation, it is drying up and leaving behind a harmful layer of chemical pesticides and natural salts; these substances are then picked up by the wind and blown into noxious dust storms; pollution in the Caspian Sea; soil pollution from overuse of agricultural chemicals and salination from faulty irrigation practices

Environment - international agreements:
party to: Biodiversity, Climate Change, Desertification, Ozone Layer Protection, Ship Pollution
signed, but not ratified: none of the selected agreements

Economy

Economy - overview: Kazakhstan, the second largest of the former Soviet republics in territory, possesses enormous untapped fossil fuel reserves as

well as plentiful supplies of other minerals and metals. It also has considerable agricultural potential with its vast steppe lands accommodating both livestock and grain production. Kazakhstan's industrial sector rests on the extraction and processing of these natural resources and also on a relatively large machine building sector specializing in construction equipment, tractors, agricultural machinery, and some defense items. The breakup of the USSR and the collapse of demand for Kazakhstan's traditional heavy industry products have resulted in a sharp contraction of the economy since 1991, with the steepest annual decline occurring in 1994. In 1995-97 the pace of the government program of economic reform and privatization quickened, resulting in a substantial shifting of assets into the private sector. The December 1996 signing of the Caspian Pipeline Consortium agreement to build a new pipeline from western Kazakhstan's Tengiz oil field to the Black Sea increases prospects for substantially larger oil exports in several years. Kazakhstan's economy turned downward in 1998 with a 2.5% decline in GDP growth due to slumping oil prices and the August financial crisis in Russia. 1999 will also be a difficult year.

Economy

Economy - overview: Since 1993, the government of Kenya has implemented a program of economic liberalization and reform. Steps have included the removal of import licensing and price controls, removal of foreign exchange controls, fiscal and monetary restraint, and reduction of the public sector through privatizing publicly owned companies and downsizing the civil service. With the support of the World Bank, IMF, and other donors, these reforms have led to a turnaround in economic performance following a period of negative growth in the early

Kenya (continued)

1990s. Kenya's real GDP grew at 5% in 1995 and 4% in 1996, and inflation remained under control. Growth slowed in 1997-98. Political violence damaged the tourist industry, and the IMF allowed Kenya's Enhanced Structural Adjustment Program to lapse due to the government's failure to enact reform conditions and to adequately address public sector corruption. Moreover, El Nino rains destroyed crops and damaged an already crumbling infrastructure in 1997 and 1998. Long-term barriers to development include electricity shortages, the government's continued and inefficient dominance of key sectors, endemic corruption, and the country's high population growth rate.

Economy

Economy - overview: A remote country of 33 scattered coral atolls, Kiribati has few national resources. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. The financial sector is at an early stage of development as is the expansion of private sector initiatives. Foreign financial aid, largely from the UK and Japan, is a critical supplement to GDP, equal to 25%-50% of GDP in recent years. Remittances from workers abroad account for more than \$5 million each year.

Korea, North

Introduction

Background: At the end of World War II, the US and the Soviet Union agreed that US troops would accept the surrender of Japanese forces south of the 38th parallel and the Soviet Union would do so in the north. In 1948, the UN proposed nationwide elections; after P'yongyang's refusal to allow UN inspectors in the north, elections were held in the south and the Republic of Korea was established. The Democratic People's Republic of Korea was established the following month in the north. Communist North Korean forces invaded South Korea in 1950. US and other UN forces intervened to defend the South and Chinese forces intervened on behalf of the North. After a bitter three-year war, an armistice was signed in 1953, establishing a military demarcation line near the 38th parallel. The North's heavy investment in military forces has produced an army of 1 million troops equipped with thousands of tanks and artillery pieces. Despite growing economic hardships, North Korea continues to devote a significant portion of its scarce resources to the military.

Economy

Economy - overview: North Korea is the world's most centrally planned economy. Agricultural land is collectivized, state-owned industry produces nearly all manufactured goods, and heavy and military industries have long been developed at the expense of light and consumer industries. Open-air markets since 1995 have gained increasing importance in the distribution of food and consumer goods but private production remains extremely limited. Total economic

Korea, North (continued)

output has fallen steadily since 1991 - perhaps by as much as one-half - when the country's economic ties to the Soviet Union and Eastern Bloc collapsed. The slide has also been fueled by serious energy shortages, aging industrial facilities, and a lack of maintenance and new investment. The leadership has tried to maintain a high level of military spending but the armed forces have nonetheless been affected by the general economic decline. Although North Korea has long depended on imports to meet food needs, serious fertilizer shortages in recent years have combined with structural constraints - such as a shortage of arable land and a short growing season - to reduce staple grain output to more than 1 million tons below what the country needs to meet even minimal demand. Widespread famine and disease have cost the lives of hundreds of thousands of North Koreans in 1994-98. The US, China, the international community, and nongovernmental organizations have sent aid but the problems remain extremely serious. **GDP:** purchasing power parity - \$21.8 billion (1998 est.)

Introduction

Background: At the end of World War II, the US and the Soviet Union agreed that US troops would accept the surrender of Japanese forces south of the 38th parallel and the Soviet Union would do so in the north. In 1948, the UN proposed nationwide elections; after P'yongyang's refusal to allow UN inspectors in the north, elections were held in the south and the Republic of Korea was established. The Democratic People's Republic of Korea was established the following month in the north. Communist North Korean forces invaded South Korea in 1950. US and other UN forces intervened to defend the South and Chinese forces intervened on behalf of the North. After a bitter three-year war, an armistice was signed in 1953, establishing a military demarcation line near the 38th parallel. Thereafter, South Korea achieved amazing economic growth, with per capita output rising to 13 times the level in the North. Since late 1997, however, the nation has suffered widespread financial and organizational difficulties. Continuing tensions between North and South have raised concerns of provocative military actions by the North.

Economy

Economy - overview: As one of the Four Dragons of East Asia, South Korea has achieved an incredible record of growth. Three decades ago its GDP per capita was comparable with levels in the poorer countries of Africa and Asia. Today its GDP per capita is seven times India's, 13 times North Korea's, and already near the lesser economies of the European Union. This success through the late 1980s was achieved by a system of close government business ties, including directed credit, import restrictions, sponsorship of specific industries, and a strong labor effort. The government promoted the import of raw materials and technology at the expense of consumer goods and encouraged savings and investment over consumption. The Asian financial crisis of 1997-98 exposed certain longstanding weaknesses in South Korea's development model, including high debt/equity ratios, massive foreign borrowing, and an undisciplined financial sector. By the end of 1998 it had recovered financial stability, rebuilding foreign exchange reserves to record levels by running a current account surplus of \$40 billion. As of December 1998, the first tentative signs of a rebound in the economy emerged, and most forecasters expect GDP growth to turn positive at least in the second half of 1999. Seoul has also made a positive start on a program to get the country's largest business groups to swap subsidiaries to promote specialization, and the administration has directed many of the mid-sized conglomerates into debt-workout programs with creditor banks. Challenges for the future include cutting redundant staff, which reaches 20%-30% at most firms and maintaining the impetus for structural reform.

Economy

Economy - overview: Kuwait is a small and relatively open economy with proved crude oil reserves of about 94 billion barrels - 10% of world reserves. Petroleum accounts for nearly half of GDP, 90% of export revenues, and 75% of government income. Kuwait lacks water and has practically no arable land, thus preventing development of agriculture. With the exception of fish, it depends almost wholly on food imports. About 75% of potable water must be distilled or imported. The economy improved moderately in 1994-97, but in 1998 suffered from the large decline in world oil prices. The Kuwaiti cabinet approved a reform package in January 1999, including reducing subsidies and increasing taxes on large consumer goods. Nevertheless, Kuwait anticipates continuing budget deficits for the next few years. Kuwait is attracting foreign oil companies to develop fields in the northern part of the country.

Kyrgyzstan

Introduction

Background: A country of incredible natural beauty and proud nomadic traditions, Kyrgyzstan became part of the Russian empire in 1864. In the Czarist and Soviet periods, Russian managers and technicians were sent to Kyrgyzstan and have recently made up more than one-fifth of the population. Many Russians have been returning home since Kyrgyzstan gained its independence in 1991 when the USSR collapsed. Privatization of state-owned enterprises, expansion of democracy and political freedoms, and inter-ethnic relations are current issues.

Economy

Economy - overview: Kyrgyzstan is a small, poor, mountainous country with a predominantly agricultural economy. Cotton, wool, and meat are the main agricultural products and exports. Industrial exports include gold, mercury, uranium, and hydropower. Kyrgyzstan has been one of the most progressive countries of the former Soviet Union in carrying out market reforms. Following a successful stabilization program, which lowered inflation from 88% in 1994 to 15% for 1997, attention is turning toward stimulating growth. Much of the government's stock in enterprises has been sold. Drops in production have been severe since the breakup of the Soviet Union in December 1991, but by mid-1995 production began to recover and exports began to increase. Pensioners, unemployed workers, and government workers with salary arrears continue to suffer. Foreign assistance played a substantial role in the country's economic turnaround in 1996-97. The government has adopted a series of measures to combat some of the severe economic problems such as excessive debt and inadequate revenue collection, encountered in 1998. **GDP:** purchasing power parity - \$9.8 billion (1998 est.)

Economy

Economy - overview: The government of Laos - one of the few remaining official communist states - has been decentralizing control and encouraging private enterprise since 1986. The results, starting from an extremely low base, have been striking - growth averaged 7% in 1988-96. Because Laos depends heavily on its trade with Thailand, it fell victim to the financial crisis in the region beginning in 1997. Laos is a landlocked country with a primitive infrastructure. It has no railroads, a rudimentary road system, and limited external and internal telecommunications. Electricity is available in only a few urban areas. Subsistence agriculture accounts for half of GDP and provides 80% of total employment. The predominant crop is glutinous rice. In non-drought years, Laos is self-sufficient overall in food, but each year flood, pests, and localized drought cause shortages in various parts of the country. For the foreseeable future the economy will continue to depend on aid from the IMF and other international sources; Japan is currently the largest bilateral aid donor; aid from the former USSR/Eastern Europe has been cut sharply. As in many developing countries, deforestation and soil erosion will hamper efforts to regain a high rate of GDP growth.

Latvia

Introduction

Background: Along with most of the other small nations of Europe, Latvia shares a history of invasion by a succession of expansionist nations, e.g., Sweden, Poland, Germany, and Russia. After a brief period of independence between the two World Wars, Latvia was annexed by the USSR in 1940 under the Molotov-Ribbentrop Pact. The USSR recaptured Latvia from its German occupiers in 1944. Latvia reestablished its independence in August 1991, a few months prior to the collapse of the Soviet Union; the last Russian troops left in 1994. The status of ethnic Russians, who make up 30% of the population, is an issue of concern to Moscow. Unemployment has become a growing problem and Latvia hopes to receive an invitation to begin EU accession talks by the end of 1999.

Economy

Economy - overview: Developments in 1998 include an invitation to join the World Trade Organization (the first Baltic country invited), GDP growth of 3.6% (down from 6% in 1997), and reduced inflation at 4.7% (from 8.4% in 1997). The drop in GDP growth is largely attributable to the impact of Russia's financial crisis and reduced investment in emerging markets following the Asian financial troubles. Unofficial sanctions that Russia imposed in the spring initially hit Latvia's exporters - Russia is among Latvia's top three trade partners - but also prompted them to seek alternative markets. Latvia continued its strict fiscal and monetary policy, including its second balanced budget and had a 1.8% budget surplus. Its draft 1999 budget is based on conservative projections of 2% to 4% GDP growth and 4.5% inflation. Unemployment climbed to 9.2% in 1998, a considerable increase over the 6.7% rate in 1997. Latvia continued to have a high current account deficit, estimated at about 9%. Privatization of large state utilities - especially the energy sector - was postponed and is unlikely to resume before late 1999. EU accession remains Latvia's top priority, and Latvia expects to be invited to start EU accession talks by the end of 1999. Continued troubles in the Russian and East Asian economies probably will hold growth to around 2.5% in 1999.

Introduction

Background: Lebanon has made progress toward rebuilding its political institutions and regaining its national sovereignty since the end of the devastating 16-year civil war, which ended in 1991. Under the Ta'if Accord - the blueprint for national reconciliation - the Lebanese have established a more equitable political system, particularly by giving Muslims a greater say in the political process while institutionalizing sectarian divisions in the government. Since the end of the civil war, the Lebanese have formed six cabinets, conducted two legislative elections, and held their first municipal elections in 35 years. Most of the militias have been weakened or disbanded. The Lebanese Armed Forces (LAF) has seized vast quantities of weapons used by the militias during the war and extended central government authority over about one-half of the country. Hizballah, the radical Shi'a party, retains its weapons. Foreign forces still occupy areas of Lebanon. Israel maintains troops in southern Lebanon and continues to support a proxy militia, the Army of South Lebanon (ASL), along a narrow stretch of territory contiguous to its border. The ASL's enclave encompasses this self-declared security zone and about 20 kilometers north to the strategic town of Jazzin. Syria maintains about 25,000 troops in Lebanon based mainly in Beirut, North Lebanon, and the Bekaa Valley. Syria's deployment was legitimized by the Arab League during Lebanon's civil war and in the Ta'if Accord. Citing the continued weakness of the LAF, Beirut's requests, and failure of the Lebanese Government to implement all of the constitutional reforms in the Ta'if Accord, Damascus has so far refused to withdraw its troops from Lebanon.

Economy

Economy - overview: The 1975-91 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and all but ended Lebanon's position as a Middle Eastern entrepot and banking hub. Peace has enabled the central government to restore control in Beirut, begin collecting taxes, and regain access to key port and government facilities. Economic recovery has been helped by a financially sound banking system and resilient small- and medium-scale manufacturers, with family remittances, banking services, manufactured and farm exports, and international aid as the main sources of foreign exchange. Lebanon's economy has made impressive gains since the launch of "Horizon 2000," the government's \$20 billion reconstruction program in 1993. Real GDP grew 8% in 1994 and 7% in 1995 before Israel's Operation Grapes of Wrath in April 1996 stunted economic activity. During 1992-98, annual inflation fell from more than 100% to 5%, and foreign exchange reserves jumped to more than \$6 billion from \$1.4 billion. Burgeoning capital inflows have generated foreign payments surpluses, and the Lebanese pound has remained relatively stable. Progress also has been made in rebuilding Lebanon's war-torn physical and financial infrastructure. Solidere, a \$2-billion firm, is managing the reconstruction of Beirut's central business district; the stock market reopened in January 1996; and international banks and insurance companies are returning. The government nonetheless faces serious challenges in the economic arena. It has had to fund reconstruction by tapping foreign exchange reserves and boosting borrowing. Reducing the government budget deficit is a major goal of the LAHUD government. The stalled peace process and ongoing violence in southern Lebanon could lead to wider hostilities that would disrupt vital capital inflows. Furthermore, the gap between rich and poor has widened in the 1990's, resulting in grassroots dissatisfaction over the skewed distribution of the reconstruction's benefits and leading the government to shift its focus from rebuilding infrastructure to improving living conditions.

Economy

Economy - overview: Small, landlocked, and mountainous, Lesotho's only important natural resource is water. Its economy is based on subsistence agriculture, livestock, and remittances from miners employed in South Africa. The number of such mine workers has declined steadily over the past several years. In 1996 their remittances added about 33% to GDP compared with the addition of roughly 67% in 1990. A small manufacturing base depends largely on farm products which support the milling, canning, leather, and jute industries. Agricultural products are exported primarily to South Africa. Proceeds from membership in a common customs union with South Africa form the majority of government revenue. Although drought has decreased agricultural activity over the past few years, completion of a major hydropower facility in January 1998 now permits the sale of water to South Africa, generating royalties that will be an important source of income for Lesotho. The pace of parastatal privatization has increased in recent years. Civil disorder in September 1998 destroyed 80% of the commercial infrastructure in Maseru and two other major towns. Most firms were not covered by insurance, and the rebuilding of small and medium business will be a significant challenge in terms of both economic growth and employment levels.

Introduction

Background: The 1995 Abuja Peace Accords ended seven years of civil warfare in Liberia. More than 20,000 of the estimated 33,000 factional fighters gave up their arms to the Cease-Fire Monitoring Group of the Economic Community of West African States (ECOMOG). Free and open presidential and legislative elections were held 19 July 1997; former faction leader, Charles TAYLOR, and his National Patriotic Party won overwhelming victories. The years of civil strife coupled with the flight of most business people disrupted formal economic activity. A short-lived armed clash in September 1998 between government forces and supporters of factional leader Roosevelt JOHNSON and continuing uncertainty about the security situation have slowed the process of rebuilding the social and economic structure of the war-torn country. For two centuries the US has had uniquely close ties to Liberia and today is a major aid donor.

Economy

Economy - overview: A civil war in 1989-97 has destroyed much of Liberia's economy, especially the infrastructure in and around Monrovia. Many businessmen have fled the country, taking capital and

expertise with them. Some returned during 1997. Many will not return. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia had been a producer and exporter of basic products, while local manufacturing, mainly foreign owned, had been small in scope. The democratically elected government, installed in August 1997, inherited massive international debts and currently relies on revenues from its maritime registry to provide the bulk of its foreign exchange earnings. The restoration of the infrastructure and the raising of incomes in this ravaged economy depends on the implementation of sound macro- and micro-economic policies of the new government, including the encouragement of foreign investment. **GDP:** purchasing power parity - \$2.8 billion (1998 est.)

Economy

Economy - overview: The socialist-oriented economy depends primarily upon revenues from the oil sector, which contributes practically all export earnings and about one-third of GDP. These oil revenues and a small population give Libya one of the highest per capita GDPs in Africa, but little of this income flows down to the lower orders of society. Low oil prices in 1998 cut back revenue sharply, and GDP growth fell by 1%. In this statist society, import restrictions and inefficient resource allocations have led to periodic shortages of basic goods and foodstuffs. The nonoil manufacturing and construction sectors, which account for about 20% of GDP, have expanded from processing mostly agricultural products to include the production of petrochemicals, iron, steel, and aluminum. Agriculture accounts for only 5% of GDP; it employs 18% of the labor force. Climatic conditions and poor soils severely limit farm output, and Libya imports about 75% of its food requirements. The UN sanctions imposed in April 1992 do not have a major impact on the economy although they have increased transaction and transportation costs.

Economy

Economy - overview: Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and living standards on a par with the urban

areas of its large European neighbors. Low business taxes - the maximum tax rate is 18% - and easy incorporation rules have induced about 73,700 holding or so-called letter box companies to establish nominal offices in Liechtenstein, providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein is a member of the European Economic Area (an organization serving as a bridge between European Free Trade Association (EFTA) and EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe.

Economy

Economy - overview: Lithuania has benefited from its disciplined approach to market reform and its adherence to strict fiscal and monetary policies imposed by the IMF, measures that have helped constrain the growth of the money supply, reduce inflation to 5.1%, and support GDP growth of 6% in 1997 and 4.5% in 1998. Foreign direct investment and the privatization program maintained their momentum in 1998. However, the current account deficit has hovered around 8% to 10% of GDP annually since 1995 - the result of greater demand for consumer goods and falling growth in exports. Reducing this deficit is the immediate economic challenge for 1999.

Economy

Economy - overview: The stable, prosperous economy features moderate growth, low inflation, and low unemployment. The industrial sector, until recently dominated by steel, has become increasingly more diversified. During the past decades, growth in the financial sector has more than compensated for the decline in steel. Services, especially banking, account for a growing proportion of the economy. Agriculture is based on small family-owned farms. Luxembourg has especially close trade and financial ties to Belgium and the Netherlands, and as a member of the EU, enjoys the advantages of the open European market. It joined with 10 other EU members to launch the euro on 1 January 1999.

Economy

Economy - overview: The economy is based largely on tourism (including gambling) and textile and fireworks manufacturing. Efforts to diversify have spawned other small industries - toys, artificial flowers, and electronics. The tourist sector has accounted for roughly 25% of GDP, and the clothing industry has provided about two-thirds of export earnings; the gambling industry probably represents over 40% of GDP. Macau depends on China for most of its food, fresh water, and energy imports. Japan and Hong Kong are the main suppliers of raw materials and capital goods. Macau is scheduled to revert to Chinese administration on 20 December 1999.

Economy

Economy - overview: The breakup of Yugoslavia in 1991 deprived Macedonia, its poorest republic, of key protected markets and large transfer payments from the center. Worker remittances and foreign aid have softened the subsequent volatile recovery period. Continued recovery depends on Macedonia's ability to attract investment, to redevelop trade ties with Greece and Serbia and Montenegro, and to maintain its commitment to economic liberalization. The economy can meet its basic food needs but depends on outside sources for all of its oil and gas and most of its modern machinery and parts.

Economy

Economy - overview: Madagascar suffers from chronic malnutrition, underfunded health and education facilities, a roughly 3% annual population growth rate, and severe loss of forest cover, accompanied by erosion. Agriculture, including fishing and forestry, is the mainstay of the economy, accounting for 32% of GDP and contributing more than 70% to export earnings. Industry features textile manufacturing and the processing of agricultural products. Growth in output in 1992-97 averaged less than the growth rate of the population. Growth has

been held back by antigovernment strikes and demonstrations, a decline in world coffee demand, and the erratic commitment of the government to economic reform. Formidable obstacles stand in the way of Madagascar's realizing its considerable growth potential; the extent of government reforms, outside financial aid, and foreign investment will be key determinants.

Economy

Economy - overview: Landlocked Malawi ranks among the world's least developed countries. The economy is predominately agricultural, with about 90% of the population living in rural areas. Agriculture accounts for 45% of GDP and 90% of export revenues. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. The new government faces strong challenges, e.g., to spur exports, to improve educational and health facilities, and to deal with environmental problems of deforestation and erosion.

Economy

Economy - overview: After a decade of 8% average GDP growth, the Malaysian economy - severely hit by the regional financial crisis - declined 7% in 1998. Malaysia will likely remain in recession for the first half of 1999; official statistics continue to show anemic exports, and some private financial analysts forecast

Malaysia (continued)

a further drop in GDP of 1% in 1999. Prime Minister MAHATHIR has imposed capital controls to protect the local currency while cutting interest rates to stimulate the economy. Kuala Lumpur also announced an expansionary budget for 1999 to combat rising unemployment. Malaysia continues to seek funding from domestic and international sources to help finance its budget deficit and recapitalize its weakened banking sector.

Economy

Economy - overview: Tourism, Maldives largest industry, accounts for about 18% of GDP and more than 60% of the Maldives' foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. About 350,000 tourists visited the islands in 1997. Fishing is a second leading growth sector. The Maldivian Government began an economic reform program in

Maldives (continued)

1989 initially by lifting import quotas and opening some exports to the private sector. Subsequently, it has liberalized regulations to allow more foreign investment. Agriculture and manufacturing continue to play a minor role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. Industry, which consists mainly of garment production, boat building, and handicrafts, accounts for about 15% of GDP. Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is one meter or less above sea level.

Economy

Economy - overview: Mali is among the poorest countries in the world, with 65% of its land area desert or semidesert. Economic activity is largely confined to the riverine area irrigated by the Niger. About 10% of the population is nomadic and some 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. Mali is heavily dependent on foreign aid and vulnerable to fluctuations in world prices for cotton, its main export. In 1997, the government continued its successful implementation of an IMF-recommended structural adjustment program that is helping the economy grow, diversify, and attract foreign investment. Mali's adherence to economic reform, and the 50% devaluation of the African franc in January 1994, has pushed up economic growth. Several multinational corporations increased gold mining operations in 1996-98, and the government anticipates that Mali will become a major Sub-Saharan gold exporter in the next few years. Annual growth thus may fall in the 5% range in 1999-2000, and inflation held to 5% or less.

Economy

Economy - overview: Significant resources are limestone, a favorable geographic location, and a productive labor force. Malta produces only about 20% of its food needs, has limited freshwater supplies, and has no domestic energy sources. The economy is dependent on foreign trade, manufacturing (especially electronics and textiles), and tourism; the state-owned Malta drydocks employs about 3,800 people. In 1998, almost 1 million tourists visited the island. Per capita GDP of roughly \$13,000 places Malta in the ranks of the less affluent EU countries. The island is divided politically over the question of joining the EU. The sizable budget deficit remains a key concern.

Economy

Economy - overview: Offshore banking, manufacturing, and tourism are key sectors of the economy. The government's policy of offering incentives to high-technology companies and financial institutions to locate on the island has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in their shares of GDP. Banking and other services now contribute more than four fifths of GDP. Trade is mostly with the UK. The Isle of Man enjoys free access to EU markets.

Economy

Economy - overview: US Government assistance is the mainstay of this tiny island economy. Agricultural production is concentrated on small farms, and the most important commercial crops are coconuts, tomatoes, melons, and breadfruit. Small-scale industry is limited to handicrafts, fish processing, and copra. The tourist industry, now a small source of foreign exchange employing less than 10% of the labor force, remains the best hope for future added income. The islands have few natural resources, and imports far exceed exports. Under the terms of the Compact of Free Association, the US provides roughly \$65 million in annual aid, equal to about 70% of GDP. Negotiations will get underway in 1999 for an extended agreement. Government downsizing, drought, a drop in construction, and the decline in tourism and foreign investment due to the Asian financial difficulties have caused GDP to fall in 1996-98.

Economy

Economy - overview: The economy is based on sugarcane, bananas, tourism, and light industry. Agriculture accounts for about 6% of GDP and the small industrial sector for 11%. Sugar production has declined, with most of the sugarcane now used for the production of rum. Banana exports are increasing, going mostly to France. The bulk of meat, vegetable, and grain requirements must be imported, contributing to a chronic trade deficit that requires large annual transfers of aid from France. Tourism has become more important than agricultural exports as a source of foreign exchange. The majority of the work force is employed in the service sector and in administration.

Economy

Economy - overview: A majority of the population still depends on agriculture and livestock for a livelihood, even though most of the nomads and many subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s.

Mauritania has extensive deposits of iron ore, which account for almost 50% of total exports. The decline in world demand for this ore, however, has led to cutbacks in production. The nation's coastal waters are among the richest fishing areas in the world, but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. In recent years, drought and economic mismanagement have resulted in a substantial buildup of foreign debt. The government has begun the second stage of an economic reform program in consultation with the World Bank, the IMF, and major donor countries. Short-term growth prospects are uncertain because of the heavy debt service burden, rapid population growth, and vulnerability to climatic conditions.

Economy

Economy - overview: Since independence in 1968, Mauritius has developed from a low income, agriculturally based economy to a middle income diversified economy with growing industrial, financial services, and tourist sectors. For most of the period, annual growth has been of the order of 5% to 6%. This remarkable achievement has been reflected in increased life expectancy, lowered infant mortality, and a much improved infrastructure. Sugarcane is grown on about 90% of the cultivated land area and accounts for 25% of export earnings. The government's development strategy centers on industrialization (with a view to modernization and to exports), agricultural diversification, and tourism. Economic performance in 1991-98 continued strong with solid growth and low unemployment.

Economy - overview: Economic activity is based primarily on the agricultural sector, including fishing and livestock raising. Mayotte is not self-sufficient and must import a large portion of its food requirements, mainly from France. The economy and future development of the island are heavily dependent on French financial assistance, an important supplement to GDP. Mayotte's remote location is an obstacle to the development of tourism.

Economy

Economy - overview: Mexico has a free market economy with a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. The number of state-owned enterprises in Mexico has fallen from more than 1,000 in 1982 to fewer than 200 in 1998. The ZEDILLO administration is privatizing and expanding competition in sea ports, railroads, telecommunications, electricity, natural gas distribution, and airports. A strong export sector helped to cushion the economy's decline in 1995 and led the recovery in 1996 and 1997. In 1998, private consumption became the leading driver of growth, which was accompanied by increased employment and higher wages. The government expects the

economy to slow in 1999 because of low commodity prices, tighter international liquidity, and slacker demand for exports. Mexico still needs to overcome many structural problems as it strives to modernize its economy and raise living standards. Income distribution is very unequal, with the top 20% of income earners accounting for 55% of income. Trade with the US and Canada has nearly doubled since NAFTA was implemented in 1994. Mexico is pursuing additional trade agreements with most countries in Latin America and with the EU to lessen its dependence on the US.

Economy

Economy - overview: Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remoteness of the location and a lack of adequate facilities hinder development. Financial assistance from the US is the primary source of revenue, with the US pledged to spend \$1 billion in the islands in the 1990s. Geographical isolation and a poorly developed infrastructure are major impediments to long-term growth.

Economy

Economy - overview: Moldova enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import all of its supplies of oil, coal, and natural gas, largely from Russia. Energy shortages contributed to sharp production declines after the breakup of the Soviet Union in 1991. The Moldovan Government has recently been making progress on an ambitious economic reform agenda. As part of its reform efforts, Moldova introduced a stable convertible currency, freed all prices, stopped issuing preferential credits to state enterprises and backed steady land privatization, removed export controls, and freed interest rates. In 1998, the economic troubles of Russia, with whom Moldova conducts 55% of its trade, was a major cause of the 8.6% drop in GDP. In 1999, the IMF resumed payment on Moldova's Extended Fund Facility, which had been suspended since 1997. The IMF intends to grant \$135 million in 1999.

Economy

Economy - overview: Monaco, situated on the French Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The Principality has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. About 55% of Monaco's annual revenue comes from value-added taxes on hotels, banks, and the industrial sector. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

Economy

Economy - overview: The government has embraced free-market economics, freezing spending, easing price controls, liberalizing domestic and international trade. Mongolia's severe climate, scattered population, and wide expanses of unproductive land, however, have constrained economic development. Economic activity traditionally has been based on agriculture and the breeding of livestock. In past years, extensive mineral resources had been developed with Soviet support; total Soviet assistance at its height amounted to 30% of GDP, but disappeared almost overnight in 1990-91. The mining and processing of coal, copper, molybdenum, tin, tungsten, and gold account for a large part of industrial production. The Mongolian leadership has been soliciting support from foreign donors and economic growth picked up in 1997 and 1998 after stalling in 1996 due to a series of natural disasters and declines in world prices of copper and cashmere. Mongolia joined the World Trade Organization in 1997.

Economy

Economy - overview: Severe volcanic activity, which began in July 1995, put a damper on this small, open economy throughout 1996-98. A catastrophic eruption in June 1997 closed the air and sea ports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998, but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Construction was the dominant activity in 1997 and 1998. GDP probably declined again in 1998. Prospects for the economy depend largely on developments in relation to the volcano and on public sector construction activity. The UK has committed about \$100 million in 1996-98 to help reconstruct the economy.

Economy

Economy - overview: Morocco faces the problems typical of developing countries - restraining government spending, reducing constraints on private activity and foreign trade, and keeping inflation within manageable bounds. Since the early 1980s the government has pursued an economic program toward these objectives with the support of the IMF, the World Bank, and the Paris Club of creditors. The dirham is now fully convertible for current account transactions; reforms of the financial sector have been implemented; and state enterprises are slowly being privatized. Drought conditions in 1997 depressed activity in the key agricultural sector, holding down exports and contributing to a 2.2% contraction in real GDP. Favorable rainfalls in the fall of 1997 have led to 6.8% real GDP growth in 1998. Growth is forecast to be about 4.0% in 1999. Formidable long-term challenges include: servicing the external debt; preparing the economy for freer trade with the EU; and improving education and attracting foreign investment to improve living standards and job prospects for Morocco's youthful population.

Economy

Economy - overview: Before the peace accord of October 1992, Mozambique's economy was devastated by a protracted civil war and socialist mismanagement. In 1994, it ranked as one of the poorest countries in the world. Since then, Mozambique has undertaken a series of economic reforms. Almost all aspects of the economy have been liberalized to some extent. More than 900 state enterprises have been privatized. Pending are tax and much needed commercial code reform, as well as greater private sector involvement in the transportation, telecommunications, and energy sectors. Since 1996, inflation has been low and foreign exchange rates stable. Albeit from a small base, Mozambique achieved one of the highest growth rates in the world in 1997-98. Still, the country depends on foreign assistance to balance the budget and to pay for a trade imbalance in which imports outnumber exports by three to one. The medium-term outlook for the country looks bright, as trade and transportation links to South Africa and the rest of the region are expected to improve and sizable foreign investments materialize. Among these investments are metal production (aluminum, steel), natural gas, power generation, agriculture (cotton, sugar), fishing, timber,

and transportation services. Additional exports in these areas should bring in needed foreign exchange.

Economy

Economy - overview: The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 20% of GDP. Namibia is the fourth-largest exporter of nonfuel minerals in Africa and the world's fifth-largest producer of uranium. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia also produces large quantities of lead, zinc, tin, silver, and tungsten. Half of the population depends on agriculture (largely subsistence agriculture) for its livelihood. Namibia must import some of its food. Although per capita GDP is three times the per capita GDP of Africa's poorer countries, the majority of Namibia's people live in pronounced poverty because of the great inequality of income distribution and the large amounts going to foreigners. The Namibian economy has close links to South Africa.

Economy

Economy - overview: Revenues come from exports of phosphates, but reserves are expected to be exhausted by the year 2000. Phosphates have given Nauruans one of the highest per capita incomes in the Third World. Few other resources exist, thus most necessities must be imported, including fresh water from Australia. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. Substantial amounts of phosphate income are invested in trust funds to help cushion the transition. The government also has been borrowing heavily from the trusts to finance fiscal deficits. To cut costs the government has called a freezing of wages, a reduction of over-staffed public service departments, privatization of numerous

government agencies, and closure of some overseas consulates.

Economy

Economy - overview: Nepal is among the poorest and least developed countries in the world with nearly

half of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for over 80% of the population and accounting for 41% of GDP. Industrial activity mainly involves the processing of agricultural produce including jute, sugarcane, tobacco, and grain. Production of textiles and carpets has expanded recently and accounted for about 80% of foreign exchange earnings in the past three years. Apart from agricultural land and forests, exploitable natural resources are mica, hydropower, and tourism. Agricultural production is growing by about 5% on average as compared with annual population growth of 2.5%. Since May 1991, the government has been moving forward with economic reforms particularly those that encourage trade and foreign investment, e.g., by eliminating business licenses and registration requirements in order to simplify investment procedures. The government has also been cutting expenditures by reducing subsidies, privatizing state industries, and laying off civil servants. More recently, however, political instability - five different governments over the past few years - has hampered Kathmandu's ability to forge consensus to implement key economic reforms. Nepal has considerable scope for accelerating economic growth by exploiting its potential in hydropower and tourism, areas of recent foreign investment interest. Prospects for foreign trade or investment in other sectors will remain poor, however, because of the small size of the economy, its technological backwardness, its remoteness, its landlocked geographic location, and its susceptibility to natural disaster. The international community's role of funding more than 60% of Nepal's development budget and more than 28% of total budgetary expenditures will likely continue as a major ingredient of growth.

Economy

Economy - overview: This prosperous and open economy is based on private enterprise with the government's presence felt in many aspects of the economy. Industrial activity features food processing, petroleum refining, and metalworking. The highly mechanized agricultural sector employs only 4% of the labor force, but provides large surpluses for export and the domestic food-processing industry. As a result, the Netherlands ranks third worldwide in value of agricultural exports, behind the US and France. Sharp cuts in subsidy and social security spending since the 1980s helped the Dutch achieve sustained economic growth combined with falling unemployment and moderate inflation. The economy achieved a strong 3.7% growth in 1998; a dip in the business cycle probably will cause the economy to decelerate to slightly over 2% growth in 1999. Unemployment in 1999 is expected to be less than 5% of the labor force, and inflation probably will decline. The Dutch joined the first wave of 11 EU countries

launching the euro system on 1 January 1999.

Economy

Economy - overview: New Caledonia has more than 20% of the world's known nickel resources. In recent years, the economy has suffered because of depressed international demand for nickel, the principal source of export earnings. Only a negligible amount of the land is suitable for cultivation, and food accounts for about 25% of imports. In addition to nickel, financial support from France and tourism are key to the health of the economy. Performance in 1998 was hampered by the spillover of financial problems in East Asia and by lower expected prices for nickel.

Economy

Economy - overview: Since 1984 the government has accomplished major economic restructuring, moving an agrarian economy dependent on a concessionary British market access toward a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes, broadened and deepened the technological capabilities of the industrial sector, and contained inflationary pressures. Inflation remains among the lowest in the industrial world. Per capita GDP has been moving up toward the levels of the big West European economies. New Zealand's heavy dependence on trade leaves its growth prospects vulnerable to economic performance in Asia, Europe, and the US. The slump in demand in Asian markets largely explains the slight drop in GDP in 1998. **GDP:** purchasing power parity - \$61.1 billion (1998 est.)

Economy

Economy - overview: Prior to Hurricane Mitch in the fall of 1998, Nicaragua had been pursuing a number of impressive economic reforms and had begun to shed the legacy of a decade of civil war and economic mismanagement by posting strong annual growth numbers. The storm has put the reform effort on hold and has changed economic forecasts for the foreseeable future - Nicaragua, the poorest country in Central America was one of the hardest hit by the hurricane. Nicaragua sustained approximately \$1 billion in damages and will probably see GDP growth slow by at least one percentage point in 1999. Hardest hit was the all-important agriculture sector, which is responsible for the majority of exports. As a result, the trade deficit is likely to balloon in 1999 to roughly \$900 million. Significant aid and relief have helped to stabilize the country. In addition, the Paris Club and other creditors have offered substantial debt relief. Nevertheless, additional financing will be needed to restore the economy to its pre-Mitch condition.

Economy

Economy - overview: Niger is a poor, landlocked Sub-Saharan nation, whose economy centers on subsistence agriculture, animal husbandry, reexport trade, and increasingly less on uranium, its major export since the 1970s. The 50% devaluation of the West African franc in January 1994 boosted exports of livestock, cowpeas, onions, and the products of Niger's small cotton industry. The government relies on bilateral and multilateral aid for operating expenses and public investment and is strongly induced to adhere to structural adjustment programs designed by the IMF and the World Bank. Short-term prospects depend largely on upcoming negotiations on debt relief and extended aid.

Economy

Economy - overview: The oil-rich Nigerian economy continues to be hobbled by political instability, corruption, and poor macroeconomic management. Nigeria's unpopular military rulers have failed to make significant progress in diversifying the economy away from overdependence on the capital intensive oil sector which provides 30% of GDP, 95% of foreign exchange earnings, and about 80% of budgetary revenues. The government's resistance to initiating greater transparency and accountability in managing the country's multibillion dollar oil earnings continues to limit economic growth and prevent an agreement with the IMF and bilateral creditors on a staff-monitored program and debt relief. The largely subsistence agricultural sector has failed to keep up with rapid population growth, and Nigeria, once a large net exporter of food, now must import food. Growth in 1999 may become negative because of continued low oil prices and persistent inefficiencies in the system.

Economy

Economy - overview: The economy is heavily dependent on aid and remittances from New Zealand as Niue has no indigenous export products. Government expenditures regularly exceed revenues, and the shortfall is made up by grants from New Zealand which are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of migration of Niueans to New Zealand.

Economy

Economy - overview: The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. An agreement for the years 1986 to 1992 entitled the islands to \$228 million for capital development, government operations, and special programs. Since 1992, funding has been extended one year at a time. The commonwealth received \$27.7 million from FY93/94 through FY95/96. For FY96/97 through FY02/03, funding of \$11 million will be provided for infrastructure, with an equal local match. A rapidly growing chief source of income is the tourist industry, which now employs about 50% of the work force. Japanese tourists predominate. The agricultural sector is of minor importance and is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is the fastest growing industry with employment of 12,000 mostly Chinese workers and shipments of \$1 billion to the US in 1998 under duty and quota exemptions.

Norway

Introduction

Background: Norway gained its independence from Sweden in 1905. As a separate realm, Norway stayed free of World War I but suffered German occupation in World War II. Discovery of oil and gas in adjacent waters in the late 1960s gave a strong boost to Norway's economic fortunes. Norway is planning for the time when its oil and gas reserves are depleted and is focusing on containing spending on its extensive welfare system. It has decided at this time not to join the European Union and the new euro currency regime.

Geography

Economy

Economy - overview: Norway is a prosperous bastion of welfare capitalism. The economy consists of a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector (through large-scale state enterprises), and extensively

subsidizes agriculture, fishing, and areas with sparse resources. Norway maintains an extensive welfare system that helps propel public sector expenditures to more than 50% of GDP and results in one of the highest average tax levels in the world. A major shipping nation, with a high dependence on international trade, Norway is basically an exporter of raw materials and semiprocessed goods. The country is richly endowed with natural resources - petroleum, hydropower, fish, forests, and minerals - and is highly dependent on its oil production and international oil prices. Only Saudi Arabia exports more oil than Norway. Norway imports more than half its food needs. Oslo opted to stay out of the EU during a referendum in November 1994. Economic growth in 1999 should drop to about 1%. Despite their high per capita income and generous welfare benefits, Norwegians worry about that time in the 21st century when the oil and gas run out.

Economy

Economy - overview: Economic performance is closely tied to the fortunes of the oil industry.

Petroleum accounts for 75% of export earnings and government revenues and for roughly 40% of GDP. Oman has proved oil reserves of 4 billion barrels, equivalent to about 20 years' production at the current rate of extraction. Agriculture is carried on at a subsistence level and the general population depends on imported food. The government is encouraging private investment, both domestic and foreign, as a prime force for further economic development. In 1998-99 the economy is suffering from weak world oil prices.

Pacific Ocean

Geography

Location: body of water between Antarctica, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: World

Area:

total: 165.384 million sq km

note: includes Bali Sea, Bellingshausen Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Flores Sea, Gulf of Alaska, Gulf of Tonkin, Java Sea, Philippine Sea, Ross Sea, Savu Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, Timor Sea, and other tributary water bodies

Area - comparative: about 18 times the size of the US; the largest ocean (followed by the Atlantic Ocean, the Indian Ocean, and the Arctic Ocean); covers about one-third of the global surface; larger than the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal - a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the

Pacific Ocean (continued)

northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes:

lowest point: Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources: oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); southern shipping lanes subject to icebergs from Antarctica; cyclical El Nino phenomenon occurs off the coast of Peru, when the trade winds slacken and the warm Equatorial countercurrent moves south, killing the plankton that is the primary food source for anchovies; consequently, the anchovies move to better feeding grounds, causing resident marine birds to starve by the thousands because of the loss of their food source; ships subject to superstructure icing in extreme north from October to May and in extreme south from May to October; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment - current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Environment - international agreements:

party to: none of the selected agreements

signed, but not ratified: none of the selected agreements

Geography - note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

Government

Data code: none; the US Government has not approved a standard for hydrographic codes - see the Cross-Reference List of Hydrographic Codes appendix

Economy

Economy - overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides

low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of Australia, NZ, China, US, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has slowed but not stopped new drillings.

Economy

Economy - overview: Pakistan continues to suffer
through a damaging foreign exchange crisis - stemming
from years of loose fiscal policies that have exacerbated
inflation and allowed public debt to explode. After
accruing more than \$1.5 billion in debt arrears in the first
six months of FY98/99, Pakistani officials approached
multilateral creditors requesting balance-of-payments
relief and structural support. In January 1999, Islamabad
received more than \$1 billion in loans along with \$3
billion in debt relief following the Finance Minister DAR's
pledge to implement an economic reform program to
reduce the budget deficit, deepen the financial sector,
and broaden the industrial base. Although the economy
has shown signs of improvement following
implementation of some corrective measures, Prime
Minister SHARIF - historically - has failed to implement
the tough structural reforms necessary for sustained,
longer-term growth. The government must also cope
with long-standing economic vulnerabilities - inadequate
infrastructure and low levels of literacy.

Economy

Economy - overview: Because of its key geographic location, Panama's economy is service-based, heavily weighted toward banking, commerce, and tourism. Since taking office in 1994, President PEREZ BALLADARES has advanced an economic reform program designed to liberalize the trade regime, attract foreign investment, privatize state-owned enterprises, institute fiscal reform, and encourage job creation through labor code reform. The government privatized its two remaining ports along the Panama Canal in 1997 and approved the sale of the railroad in early 1998. It also plans to sell other assets, including the electric company. Panama joined the World Trade Organization (WTO) and approved a tariff reduction that will give the country the lowest average tariff rates in Latin America. A banking reform law was approved by the legislature in early 1998. The most important sectors driving growth have been the Panama Canal and other shipping and port activities.

Economy

Economy - overview: Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by the rugged terrain and the high cost of developing infrastructure. Agriculture provides a subsistence livelihood for the bulk of the population. Mineral deposits, including oil, copper, and gold, account for 72% of export earnings. Budgetary support from Australia and development aid under World Bank auspices have helped sustain the economy. In 1995, Port Moresby reached agreement with the IMF and World Bank on a structural adjustment program, of which the first phase was successfully completed in 1996. In 1997, droughts caused by the El Nino weather pattern wreaked havoc on Papua New Guinea's coffee, cocoa, and coconut production, the mainstays of the agricultural-based economy and major sources of export earnings. The coffee crop was slashed by up

to 50% in 1997. Despite problems with drought, the year 1998 saw a small recovery in GDP.

Economy

Economy - overview: Paraguay has a market economy marked by a large informal sector. The informal sector features both reexport of imported consumer goods (electronics, whiskeys, perfumes, cigarettes, and office equipment) to neighboring countries as well as the activities of thousands of microenterprises and urban street vendors. The formal sector is largely oriented toward services. A large percentage of the population derive their living from agricultural activity, often on a subsistence basis. The formal economy has grown an average of about 3% over the past six years, but GDP declined in 1998. However, population has increased at about the same rate over the same period, leaving per capita income nearly stagnant. The new government of Raul CUBAS Grau was pursuing an economic reform agenda, albeit with limited success because of in-fighting in the ruling party and resistance from the opposition.

Economy

Economy - overview: The Peruvian economy has become increasingly market-oriented, with major privatizations completed since 1990 in the mining, electricity, and telecommunications industries. An austerity program implemented shortly after the FUJIMORI government took office in July 1990 contributed to a short-lived contraction of economic activity, but the slide came to a halt late that year, and in 1991 output rose 2.4%. By working with the IMF and World Bank on new financial conditions and arrangements, the government succeeded in ending its arrears by March 1993. In 1992, GDP fell by 2.8%, in part because a warmer-than-usual El Nino current resulted in a 30% drop in the fish catch, but the economy rebounded as strong foreign investment helped push growth to 7% in 1993, about 13% in 1994, and 6.8% in 1995. Growth slowed to 2.8% in 1996 as the government adopted tight fiscal and monetary policy to reduce the current account deficit and meet its IMF targets. Growth then rebounded to 7.3% in 1997 even as inflation fell to its lowest level in 23 years. Capital inflows surged to record levels in early 1997 and have remained strong. In 1998, El Nino's impact on agriculture, the financial crisis in Asia, and instability in Brazilian markets undercut growth. While Lima publicly projects a rebound to 5% in 1999, private sector analysts believe this figure is overly optimistic. **GDP:** purchasing power parity - \$111.8 billion (1998 est.)

Economy

Economy - overview: In 1998 the Philippine economy - a mixture of agriculture, light industry, and supporting services - deteriorated as a result of spillover from the Asian financial crisis and poor weather conditions. Growth fell to about -0.5% in 1998 from 5% in 1997, but is expected to recover to more than 2% in 1999. The government has promised to continue its economic reforms to help the Philippines match the pace of development in the newly industrialized countries of East Asia. The strategy includes improving infrastructure, overhauling the tax system to bolster government revenues, and moving toward further deregulation and privatization of the economy.

Economy

Economy - overview: Poland today stands out as one of the most successful and open transition economies. The privatization of small and medium state-owned companies and a liberal law on establishing new firms marked the rapid development of a private sector now responsible for 70% of economic activity. In contrast to the vibrant expansion of private non-farm activity, the large agriculture component remains handicapped by structural problems, surplus labor, inefficient small farms, and lack of investment. The government's determination to enter the EU as soon as possible affects all aspects of its economic policies. Improving Poland's worsening current account deficit also is a priority. To date, the government has resisted pressure for protectionist solutions and continues to support regional free trade initiatives. The government export strategy emphasizes a more aggressive export assistance program. Warsaw continues to hold the budget deficit to less than 2% of GDP. Further progress on public finance depends mainly on comprehensive reform of the social welfare system and privatization of Poland's remaining state sector. Restructuring and privatization of "sensitive sectors" (e.g., coal, steel, and telecommunications) has begun. Long-awaited privatizations in aviation and energy are scheduled for 1999.

Economy

Economy - overview: Portugal, in 1998, continued to see strong economic growth, falling interest rates, and low unemployment. The country qualified for the European Monetary Union (EMU) in 1998 and joined

with 10 other European countries in launching the euro on 1 January 1999. Portugal's inflation rate for 1998, 2.8%, was low but higher than most of its European partners. The country continues to run a trade deficit and a balance of payments deficit. The government is working to modernize capital plant and increase the country's competitiveness in the increasingly integrated world markets. Growth is expected to slow to 3% in 1999 because of a slowdown in public investment and sluggish demand for exports.

Economy

Economy - overview: Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income for the island, with estimated arrivals of nearly 4 million tourists in

1993. Construction and tourism were the leading sectors in economic growth in 1998.

Economy

Economy - overview: Oil is the backbone of the economy and accounts for more than 30% of GDP, roughly 70% of export earnings, and 66% of government revenues. Proved oil reserves of 3.7 billion barrels should ensure continued output at current levels for 23 years. Oil has given Qatar a per capita GDP comparable to the leading West European industrial countries. Qatar's proved reserves of natural gas exceed 7 trillion cubic meters, more than 5% of the world total, third largest in the world. Production and export of natural gas are becoming increasingly important. Long-term goals feature the development of off-shore petroleum and the diversification of the economy. Lower world oil prices brought GDP down in 1998.

Economy

Economy - overview: The economy has traditionally been based on agriculture. Sugarcane has been the primary crop for more than a century, and in some years

it accounts for 85% of exports. The government has been pushing the development of a tourist industry to relieve high unemployment, which recently amounted to one-third of the labor force. The gap in Reunion between the well-off and the poor is extraordinary and accounts for the persistent social tensions. The white and Indian communities are substantially better off than other segments of the population, often approaching European standards, whereas indigenous groups suffer the poverty and unemployment typical of the poorer nations of the African continent. The outbreak of severe rioting in February 1991 illustrates the seriousness of socioeconomic tensions. The economic well-being of Reunion depends heavily on continued financial assistance from France.

Economy

Economy - overview: After the collapse of the Soviet Bloc in 1989-91, Romania was left with an obsolete industrial base and a pattern of industrial capacity wholly unsuited to its needs. In February 1997, Romania embarked on a comprehensive macroeconomic stabilization and structural reform program, but reform subsequently has been a stop-and-go process. Restructuring programs include liquidating large energy-intensive industries and major agricultural and financial sector reforms. Today, Romania is continuing its difficult transition to a market-based economy. GDP contracted by an estimated 7.3% in 1998 after a 6.6% decline in 1997. Tight monetary policy and slower exchange rate depreciation earlier in 1998 helped lower inflation to an estimated 41% from 152% in 1997. The large current account deficit and concerns about meeting debt payments in 1999 contributed to increased pressure on the exchange rate towards the end of 1998. Replacing the IMF standby agreement (suspended because of lack of progress on structural reforms), servicing large debt payments, and bringing the budget under control are key priorities for 1999. **GDP:** purchasing power parity - \$90.6 billion (1998 est.)

Illicit drugs: important transshipment point for Southwest Asian heroin transiting the Balkan route and small amounts of Latin American cocaine bound for Western Europe

Russia

Introduction

Background: Russia, a vast Eurasian expanse of field, forest, desert, and tundra, has endured many "times of trouble" - the Mongol rule of the 13th to 15th century; czarist reigns of terror; massive invasions by Swedes, French, and Germans; and the deadly communist period (1917-91) in which Russia dominated an immense Soviet Union. General Secretary Mikhail GORBACHEV, in charge during 1985-91, introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize communism, but also inadvertently released forces that shattered the USSR into 15 independent republics in December 1991. Russia has struggled in its efforts to build a democratic political system and market economy to replace the strict social, political, and economic controls of the communist period. These reform efforts have resulted in contradictory and confusing economic and political regulations and practices. Industry, agriculture, the military, the central government, and the ruble have suffered, but Russia has successfully held one presidential, two legislative, and numerous regional elections since 1991. The severe illnesses of President Boris YEL'TSIN have contributed to a lack of policy focus at the center.

Geography

Location: Northern Asia (that part west of the Urals is sometimes included with Europe), bordering the Arctic Ocean, between Europe and the North Pacific Ocean

Geographic coordinates: 60 00 N, 100 00 E

Area:

total: 17,075,200 sq km

land: 16,995,800 sq km

water: 79,400 sq km

Area - comparative: slightly less than 1.8 times the size of the US

Land boundaries:

total: 19,917 km

border countries: Azerbaijan 284 km, Belarus 959 km, China (southeast) 3,605 km, China (south) 40 km, Estonia 294 km, Finland 1,313 km, Georgia 723 km, Kazakhstan 6,846 km, North Korea 19 km, Latvia 217 km, Lithuania (Kaliningrad Oblast) 227 km, Mongolia 3,441 km, Norway 167 km, Poland (Kaliningrad Oblast) 206 km, Ukraine 1,576 km

Coastline: 37,653 km

Maritime claims:

continental shelf: 200-m depth or to the depth of exploitation

exclusive economic zone: 200 nm

territorial sea: 12 nm

Climate: ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Terrain: broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Elevation extremes:

lowest point: Caspian Sea -28 m

highest point: Mount El'brus 5,633 m

Natural resources: wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, timber

note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Economy

Economy - overview: Seven years after the collapse of the USSR, Russia is still struggling to establish a modern market economy and achieve strong economic growth. Russian GDP has contracted an estimated 43% since 1991, including a 5% drop in 1998, despite the country's wealth of natural resources, its well-educated population, and its diverse - although increasingly dilapidated - industrial base. By the end of 1997, Russia had achieved some progress. Inflation had been brought under control, the ruble was stabilized, and an ambitious privatization program had transferred thousands of enterprises to private ownership. Some important market-oriented laws were also passed, including a commercial code governing business relations and an arbitration court for resolving economic disputes. But in 1998, the Asian financial crisis swept through the country, contributing to a sharp decline in Russia's earnings from oil exports and resulting in an exodus of foreign investors. Matters came to a head in August 1998 when the government allowed the ruble to fall precipitously and stopped payment on \$40 billion in ruble bonds. Ongoing problems include an undeveloped legal and financial system, poor progress on restructuring the military-industrial complex, and persistently large budget deficits, largely reflecting the inability of successive governments to collect sufficient taxes. Russia's transition to a market economy has also been slowed by the growing prevalence of payment arrears and barter and by widespread corruption. The severity of Russia's economic problems is dramatized by the large annual decline in population, estimated by some observers at 800,000 people, caused by

environmental hazards, the decline in health care, and the unwillingness of people to have children.

Transnational Issues

Disputes - international: dispute over at least two small sections of the boundary with China remain to be settled, despite 1997 boundary agreement; islands of Etorofu, Kunashiri, and Shikotan and the Habomai

group occupied by the Soviet Union in 1945, now administered by Russia, claimed by Japan; Caspian Sea boundaries are not yet determined among Azerbaijan, Iran, Kazakhstan, Russia, and Turkmenistan; Estonian and Russian negotiators reached a technical border agreement in December 1996 which has not been ratified; draft treaty delimiting the boundary with Latvia has not been signed; has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other nation; 1997 border agreement with Lithuania not yet ratified; Svalbard is the focus of a maritime boundary dispute in the Barents Sea between Norway and Russia
Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of amphetamines, mostly for domestic consumption; government has active eradication program; increasingly used as transshipment point for Southwest and Southeast Asian opiates and cannabis and Latin American cocaine to Western Europe, possibly to the US, and growing domestic market

Rwanda

Introduction

Background: Throughout their colonial rule, first Germany and then Belgium favored Rwanda's minority Tutsi ethnic group in education and employment. In 1959, the majority ethnic group, the Hutus, overthrew the ruling Tutsi monarch. The Hutus killed hundreds of Tutsis and drove tens of thousands into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in October 1990. The war, along with several political and economic upheavals, exasperated ethnic tensions culminating in April 1994 in a genocide in which roughly 800,000 Tutsis and moderate Hutus were killed. The Tutsi rebels defeated the Hutu regime and ended the genocide in July 1994, but approximately 2 million Hutu refugees - many fearing Tutsi retribution - fled to neighboring Burundi, Tanzania, Uganda, and Zaire, now called the Democratic Republic of the Congo (DROC). According to the UN Office of the High Commissioner for Refugees, in 1996 and early 1997 nearly 1.3 million Hutus returned to Rwanda. Even with substantial international aid, these civil dislocations have hindered efforts to foster reconciliation and to boost investment and agricultural output. Although much of the country is now at peace, members of the former regime continue to destabilize the northwest area of the country through a low-intensity insurgency. Rwandan troops are currently involved in a crisis engulfing neighboring DROC.

Economy

Economy - overview: Rwanda is a rural country with about 90% of the population engaged in (mainly subsistence) agriculture. It is the most densely populated country in Africa; is landlocked, and has few natural resources and minimal industry. Primary exports are coffee and tea. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and eroded the country's ability to attract private and external investment. However, Rwanda has made significant progress in stabilizing and rehabilitating its economy. GDP has rebounded, and inflation has been curbed. In June 1998, Rwanda signed an Enhanced Structural Adjustment Facility (ESAF) with the IMF. Rwanda has also embarked upon an ambitious privatization program with the World Bank.

Economy

Economy - overview: The economy has traditionally depended on the growing and processing of sugarcane; decreasing world prices have hurt the industry in recent years. Tourism, export-oriented manufacturing, and offshore banking activity have assumed larger roles. Most food is imported. The government has undertaken a program designed to revitalize the faltering sugar sector. It is also working to improve revenue collection in order to better fund social programs. In 1997 some leaders in Nevis were urging separation from Saint Kitts on the basis that Nevis was paying far more in taxes than it was receiving in government services, but the vote on cessation failed in August 1998. In late September 1998, Hurricane Georges caused approximately \$445 million in damages.

Economy

Economy - overview: The economy remains vulnerable due to its heavy dependence on banana production, which is subject to periodic droughts and tropical storms. Increased competition from Latin American bananas will probably further reduce market prices, exacerbating Saint Lucia's need to diversify its economy in coming years, e.g., by further expanding tourism, manufacturing, and construction. In 1997, strong activity in tourism and other service sectors offset the contraction in agriculture, manufacturing, and construction sectors. Improvement in the construction sector and growth of the tourism industry was expected to expand GDP in 1998. The agriculture sector registered its fifth year of decline in 1997 primarily because of a severe decline in banana production.

Economy

Economy - overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because the number of ships stopping at Saint Pierre has dropped steadily over the years. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought.

The islands are heavily subsidized by France. Imports come primarily from Canada and France.

Economy

Economy - overview: Agriculture, dominated by banana production, is the most important sector of this lower-middle-income economy. The services sector, based mostly on a growing tourist industry, is also important. The government has been relatively unsuccessful at introducing new industries, and high unemployment rates of 35%-40% continue. The continuing dependence on a single crop represents the biggest obstacle to the islands' development; tropical storms wiped out substantial portions of crops in both 1994 and 1995. The tourism sector has considerable potential for development over the next decade. Recent growth has been stimulated by strong activity in the construction sector and an improvement in tourism.

Economy

Economy - overview: The economy of Samoa has traditionally been dependent on development aid, private family remittances from overseas, and agricultural exports. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force, and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. Outside of a large automotive wire harness factory, the manufacturing sector mainly processes agricultural products. Tourism is an expanding sector; more than 70,000 tourists visited the islands in 1996. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline. Observers point to the flexibility of the labor market as a basic strength for future economic advances.

Economy

Economy - overview: This small poor island economy has become increasingly dependent on cocoa since independence over 20 years ago. However, cocoa production has substantially declined because of drought and mismanagement. The resulting shortage of cocoa for export has created a persistent balance-of-payments problem. Sao Tome has to import all fuels, most manufactured goods, consumer goods, and a significant amount of food. Over the years, it has been unable to service its external debt and has had to depend on concessional aid and debt rescheduling. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies, but economic growth has remained sluggish. Sao Tome is also optimistic that significant petroleum discoveries are forthcoming in its territorial waters in the oil-rich waters of the Gulf of Guinea. Corruption scandals continue to weaken the economy.

Economy

Economy - overview: This is a well-to-do oil-based economy with strong government controls over major economic activities. Saudi Arabia has the largest reserves of petroleum in the world (26% of the proved total), ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 75% of budget revenues, 40% of GDP, and 90% of export earnings. About 35% of GDP comes from the private sector. Roughly 4 million foreign workers play an important role in the Saudi economy, for example, in the oil and service sectors. The Saudi economy was severely hit by the large decline in world oil prices in 1998. GDP fell by nearly 11%; the budget deficit rose to \$12.3 billion; and the current account recorded a \$13 billion deficit - the first in three years. The government announced plans to implement large spending cuts in 1999 because of weak oil prices and will continue to call on greater private sector involvement in the economy. Shortages of water and rapid population growth will constrain government efforts to increase self-sufficiency in agricultural products.

Economy

Economy - overview: In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. This reform began with a 50% devaluation of Senegal's currency, the CFA franc, which is linked at a fixed rate to the French franc. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging 5% annually in 1995-98. Annual inflation has been pushed below 2%, and the fiscal deficit has been cut to less than 1.5% of GDP. Investment rose steadily from 13.8% of GDP in 1993 to 16.5% in 1997. As a member of the West African

Economic and Monetary Union (UEMOA), Senegal is working toward greater regional integration with a unified external tariff. Senegal also realized full Internet connectivity in 1996, creating a minibook in information technology-based services. Private activity now accounts for 82% of GDP. On the negative side, Senegal faces deep-seated urban problems of chronic unemployment, juvenile delinquency, and drug addiction. Forecasters predict growth will continue in the 5% range in 1999-2000. **GDP:** purchasing power parity - \$15.6 billion (1998 est.)

Economy

Economy - overview: The swift collapse of the Yugoslav federation in 1991 has been followed by highly destructive warfare, the destabilization of republic boundaries, and the breakup of important interrepublic trade flows. Output in Serbia and Montenegro dropped by half in 1992-93. Like the other former Yugoslav republics, it had depended on its sister republics for large amounts of energy and manufactures. Wide differences in climate, mineral resources, and levels of technology among the republics accentuated this interdependence, as did the communist practice of concentrating much industrial output in a small number of giant plants. The breakup of many of the trade links, the sharp drop in output as industrial plants lost suppliers and markets, and the destruction of physical assets in the fighting all

have contributed to the economic difficulties of the republics. One singular factor in the economic situation of Serbia is the continuation in office of a government that is primarily interested in political and military mastery, not economic reform. Hyperinflation ended with the establishment of a new currency unit in June 1993; prices were relatively stable from 1995 through 1997, but inflationary pressures resurged in 1998. Reliable statistics continue to be hard to come by, and the GDP estimate is extremely rough. The economic boom anticipated by the government after the suspension of UN sanctions in December 1995 has failed to materialize. Government mismanagement of the economy is largely to blame. Also, the Outer Wall sanctions that exclude Belgrade from international financial institutions and an investment ban and asset freeze imposed in 1998 because of Belgrade's repressive actions in Kosovo have added to economic difficulties.

Economy

Economy - overview: Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the old near-subsistence level. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing, which accounted for 70% of GDP in 1996-97. In recent years the government has encouraged foreign investment in order to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. The vulnerability of the tourist sector was illustrated by the sharp drop in 1991-92 due largely to the Gulf war. Although the industry has rebounded, the government recognizes the continuing need for upgrading the sector in the face of stiff international competition. Other issues facing the government are the curbing of the budget deficit and further privatization of public enterprises.

Introduction

Background: On 25 May 1997, the democratically-elected government of President Ahmad Tejan KABBAH was overthrown by a disgruntled coalition of army personnel from the Armed Forces Revolutionary Council (AFRC) and the Revolutionary United Front (RUF) under the command of Major Johnny Paul KOROMA; President KABBAH fled to exile in Guinea. The Economic Community of West African States Cease-Fire Monitoring Group (ECOMOG) forces, led by a strong Nigerian contingent, undertook the suppression of the rebellion. They were initially unsuccessful, but, by October 1997, they forced the rebels to agree to a cease-fire and to a plan to return the government to democratic control. President KABBAH returned to office on 10 March 1998 to face the task of restoring order to a demoralized population and a disorganized and severely damaged economy. Many of the leaders of the coup were tried and executed in October 1998. In January 1999, the situation had deteriorated even further, with commerce at a standstill, hundreds of thousands of people driven from their homes, and bitter fighting between the AFRC/RUF and ECOMOG troops intensifying by large-scale import of arms.

Economy

Economy - overview: Sierra Leone has substantial mineral, agricultural, and fishery resources. However, the economic and social infrastructure is not well developed, and serious social disorders continue to hamper economic development. The period of AFRC/RUF junta rule (May 1997-February 1998) led to UN sanctions and 20% drop in GDP in 1997. The continued fighting at yearend 1997 set back what small progress had been made by the KABBAH government in recovering from the junta period and reestablishing a viable economy. About two-thirds of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Bauxite and rutile mines have been shut down by civil strife. The major source of hard currency is found in the mining of diamonds, the large majority of which are smuggled out of the country. The fate of the economy in 1999 depends on the outcome of negotiations to end the civil strife.

Economy

Economy - overview: Singapore has an open economy with strong service and manufacturing sectors and excellent international trading links derived from its entrepot history. Extraordinarily strong fundamentals allowed Singapore to weather the effects of the Asian financial crisis better than its neighbors, but the crisis did pull GDP growth down to 1.3% in 1998 from 6% in 1997. Projections for 1999 GDP growth are in the -1% to 1% range. Rising labor costs and appreciation of the Singapore dollar against its neighbors' currencies continue to be a threat to Singapore's competitiveness. The government's strategy to address this problem includes cutting costs, increasing productivity, improving infrastructure, and encouraging higher value-added industries. In applied technology, per capita output, investment, and labor discipline, Singapore has key attributes of a developed country.

Introduction

Background: After centuries under foreign rule, mainly by Hungary, the Slovaks joined with their neighbors to form the new nation of Czechoslovakia in 1918. Following the chaos of World War II, Czechoslovakia became a communist nation within Soviet-ruled Eastern Europe. Soviet influence collapsed in 1989, and Czechoslovakia once more was an independent country turning toward the West. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Slovakia has experienced more difficulty than the Czech Republic in developing a modern market economy.

Economy

Economy - overview: Slovakia, continuing the difficult transition from a centrally controlled economy to a modern market-oriented economy, begins 1999 with clouds on the horizon: GDP growth is slowing sharply; budget and current account deficits are too large; external debt is growing uncomfortably fast; unemployment is high and rising; corrupt insider deals persist; and demand is weakening for Slovakia's key primary goods exports, especially as Russia and Ukraine slump and as EU growth slows. International credit rating agencies have downgraded Slovak debt to below investment grade. The new government intends to address the economy's ills by giving priority to joining the OECD and EU, cutting government wage and infrastructure spending, boosting some taxes and regulated prices, expanding privatization to companies formerly considered strategic, restructuring the financial section, encouraging foreign investment, and reenergizing the social partnership with labor and employers. Government officials believe as long as two years may be needed before its structural reforms improve economic performance. In 1999, the government expects GDP growth to slow from 5% in 1998 to 2%, inflation to rise from 6% to 10%, and unemployment to rise from less than 14% to 15% or 16%, but hopes to bring the budget deficit down to no more than 2% of GDP and the current account deficit down to 5% to 6% of GDP.

Economy

Economy - overview: Today, Slovenia exhibits one of the highest per capita GDPs of the transition economies of the region, fairly moderate inflation, and a comfortable level of international reserves. Slovenia received an invitation in 1997 to begin accession negotiations with the EU - a reflection of its sound economic footing. Slovenia must press on with privatization, enterprise restructuring, institution reform, and liberalization of financial markets, thereby creating conditions conducive to foreign investment and the maintenance of a stable tolar. Critical to the future success of the economy is the development of export sales in increasingly competitive international markets.

Solomon Islands

Introduction

Background: In 1893, Britain made the southern Solomon Islands a protectorate. Other islands were added to the group, including some ceded to Britain by Germany. The Solomon Islands were occupied by the Japanese during World War II. Following the war, internal self-government was established in 1976, and independence from the UK came two years later. Current issues include government deficits, deforestation, and malaria control.

Economy

Economy - overview: The bulk of the population depend on agriculture, fishing, and forestry for at least part of their livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Economic troubles in Southeast Asia led to a steep downturn in the timber industry, and economic output declined by about 10% in 1998. The government instituted public service pay cuts and other retrenchments.

Population: 7,140,643 (July 1999 est.)

note: this estimate was derived from an official census taken in 1987 by the Somali Government with the cooperation of the UN and the US Bureau of the Census; population estimates are updated between censuses by factoring in growth rates and by taking account of refugee movements and losses due to famine; lower estimates of Somalia's population in mid-1996 (on the order of 6.0 million to 6.5 million) have been made by aid and relief agencies, based on the number of persons being fed; population counting in Somalia is complicated by the large numbers of nomads and by refugee movements in response to famine and clan warfare

Flag description: light blue with a large white five-pointed star in the center; design based on the flag of the UN (Italian Somaliland was a UN trust territory)

Government - note: While chaos and clan fighting continue in most of Somalia, some orderly government has been established in the northern part. In May 1991, the elders of clans in former British Somaliland established the independent Republic of Somaliland, which, although not recognized by any government, maintains a stable existence, aided by the overwhelming dominance of the ruling clan and the economic infrastructure left behind by British, Russian and American military assistance programs. The economy has been growing and in February 1996 the EU agreed to finance the reconstruction of the port of Berbera; since then, other aid projects have been assumed by the EU and by a non-governmental Italian organization.

Economy

Economy - overview: One of the world's poorest and least developed countries, Somalia has few resources. Moreover, much of the economy has been devastated by the civil war. Agriculture is the most important sector, with livestock accounting for about 40% of GDP and about 65% of export earnings. Nomads and semi-nomads, who are dependent upon livestock for their livelihood, make up a large portion of the population. After livestock, bananas are the principal export; sugar, sorghum, corn, and fish are products for the domestic market. The small industrial sector, based on the processing of agricultural products, accounts for 10% of GDP; most facilities have been shut down because of the civil strife. Moreover, as of early 1999, ongoing civil disturbances in Mogadishu and outlying areas are interfering with any substantial economic advance.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band which splits into a horizontal Y, the arms of which end at the corners of the hoist side, embracing a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes

note: prior to 26 April 1994, the flag was actually four flags in one - three miniature flags reproduced in the center of the white band of the former flag of the Netherlands, which has three equal horizontal bands of orange (top), white, and blue; the miniature flags are a vertically hanging flag of the old Orange Free State with a horizontal flag of the UK adjoining on the hoist side and a horizontal flag of the old Transvaal Republic adjoining on the other side

Economy

Economy - overview: South Africa is a middle-income, developing country with an abundant supply of resources, well-developed financial, legal, communications, energy, and transport sectors, a stock exchange that ranks among the 10 largest in the world, and a modern infrastructure supporting an efficient distribution of goods to major urban centers throughout the region. However, growth has not been strong enough to cut into the 30% unemployment, and daunting economic problems remain from the apartheid era, especially the problems of poverty and lack of economic empowerment among the disadvantaged groups. Other problems are crime and corruption. The new government demonstrated its commitment to open markets, privatization, and a favorable investment climate with the release of its macroeconomic strategy in June 1996. Called "Growth, Employment and Redistribution," this policy framework includes the introduction of tax incentives to stimulate new investment in labor-intensive projects, expansion of basic infrastructure services, the restructuring and partial privatization of state assets, continued reduction of tariffs, subsidies to promote economic efficiency, improved services to the disadvantaged, and integration into the global economy. Serious structural rigidities remain,

including a complicated and relatively protectionist trade regime, and concentration of wealth and economic control.

Spain

Introduction

Background: A powerful world empire in the 16th and 17th centuries, Spain ultimately yielded command of the seas to England, beginning with the defeat of the Armada in 1588. Spain subsequently failed to embrace the mercantile and industrial revolutions and fell behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II. In the second half of the 20th century Spain played a catch-up role in the western international community. Continuing problems are large-scale unemployment and the Basque separatist movement.

Economy

Economy - overview: Spain's mixed capitalist economy supports a GDP that on a per capita basis is three-fourths that of the four leading West European economies. Its center-right government successfully worked to gain admission to the first group of countries launching the European single currency on 1 January 1999. The deficit-to-GDP ratio is 2.1%, the debt-to-GDP ratio is around 68%, and inflation is approximately 2%. Moreover, the AZNAR administration has continued to advocate liberalization, privatization, and deregulation of the economy and has introduced some tax reforms to that end. Unemployment, nonetheless, remains the highest in the EU at 20%. The government, for political reasons, has made only limited progress in changing labor laws or reforming pension schemes, which are key to the sustainability of both Spain's internal economic advances and its competitiveness in a single currency area. Adjustment to the monetary and other economic policies of an integrated Europe will pose difficult challenges to Spain in the next few years.

Economy

Economy - overview: In 1977, Colombo abandoned statist economic policies and its import substitution trade policy for market-oriented policies and export-oriented trade. Sri Lanka's most dynamic industries now are food processing, textiles and apparel, food and beverages, telecommunications, and insurance and banking. By 1996 plantation crops made up only 20% of exports (compared with 93% in 1970), while textiles and garments accounted for 63%. GDP grew at an annual average rate of 5.5% throughout the 1990s until a drought and a deteriorating security situation lowered growth to 3.8% in 1996. The economy rebounded in 1997-98 with growth of 6.4% and 4.7%. For the next round of reforms, the central bank of Sri Lanka recommends that Colombo expand market mechanisms in nonplantation agriculture, dismantle the government's monopoly on wheat imports, and promote more competition in the financial sector. A continuing cloud over the economy is the fighting between the Sinhalese and the minority Tamils, which has cost 50,000 lives in the past 15 years. The global slowdown will temper growth in 1999.

Economy

Economy - overview: Sudan is buffeted by civil war, chronic political instability, adverse weather, high inflation, a drop in remittances from abroad, and counterproductive economic policies. The private sector's main areas of activity are agriculture and trading, with most private industrial investment predating 1980. Agriculture employs 80% of the work force. Industry mainly processes agricultural items. Sluggish economic performance over the past decade, attributable largely to declining annual rainfall, has kept per capita income at low levels. A large foreign debt and huge arrears continue to cause difficulties. In 1990 the International Monetary Fund took the unusual step of declaring Sudan noncooperative because of its nonpayment of arrears to the Fund. After Sudan backtracked on promised reforms in 1992-93, the IMF threatened to expel Sudan from the Fund. To avoid expulsion, Khartoum agreed to make payments on its arrears to the Fund, liberalize exchange rates, and reduce subsidies, measures it has partially implemented. The government's continued prosecution of the civil war and its growing international isolation continued to inhibit growth in the nonagricultural sectors of the economy during 1998. Hyperinflation has raised consumer prices above the reach of most. In 1998, a top priority was to develop potentially lucrative oilfields in southcentral Sudan; the government is working with foreign partners to exploit the oil sector.

Economy

Economy - overview: The economy is dominated by the bauxite industry, which accounts for more than 15% of GDP and 70% of export earnings. After assuming power in the fall of 1996, the WIJDENBOSCH government ended the structural adjustment program of the previous government, claiming it was unfair to the poorer elements of society. Tax revenues fell as old taxes lapsed and the government failed to implement new tax alternatives. By the end of 1997, the allocation of new Dutch development funds was frozen as Surinamese Government relations with the Netherlands deteriorated. Economic growth slowed in 1998, with decline in the mining, construction, and utility sectors. Suriname's economic prospects for the medium term will depend on renewed commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition.

Economy

Economy - overview: Coal mining is the major economic activity on Svalbard. The treaty of 9 February 1920 gives the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still mining are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some trapping of seal, polar bear, fox, and walrus.

Economy

Economy - overview: In this small landlocked economy, subsistence agriculture occupies more than 60% of the population. Manufacturing features a number of agroprocessing factories. Mining has declined in importance in recent years; high-grade iron ore deposits were depleted by 1978, and health concerns have cut world demand for asbestos. Exports of soft drink concentrate, sugar and wood pulp are the main earners of hard currency. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives nearly all of its imports and to which it sends more than half of its exports. Remittances from Swazi workers in South African mines supplement domestically earned income by as much as 20%. The government is trying to improve the atmosphere for foreign investment. Overgrazing, soil depletion, and drought persist as problems for the future.

Sweden

Introduction

Background: Having long lost its military prowess of the 17th century, Sweden has evolved into a prosperous and peaceful constitutional monarchy with a capitalist system interlarded with substantial welfare elements. As the 20th century comes to an end, this long successful formula is being undermined by high unemployment; the rising cost of a "cradle to the grave" welfare state; the decline of Sweden's competitive position in world markets; and indecision over the country's role in the political and economic integration of Europe. A member of the European Union, Sweden chose not to participate in the introduction of the euro on 1 January 1999.

Economy

Economy - overview: Aided by peace and neutrality for the whole twentieth century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for only 2% of GDP and 2% of the jobs. In recent years, however, this extraordinarily favorable picture has been clouded by budgetary difficulties, inflation, high unemployment, and a gradual loss of competitiveness in international markets. Sweden has harmonized its economic policies with those of the EU, which it joined at the start of 1995. Sweden decided not to join the euro system at its outset in January 1999 but plans to hold a referendum in 2000 on whether to join. Annual GDP growth is forecast for 2.2% and 2.6% in 1999 and 2000 respectively. Budgetary problems and shaky business confidence will constrain government plans to reduce unemployment.

Switzerland

Introduction

Background: Switzerland's independence and neutrality have long been honored by the major European powers and Switzerland did not participate in either World War I or II. The political and economic integration of Europe since World War II may be rendering obsolete Switzerland's concern for neutrality.

Economy

Economy - overview: Switzerland, a fundamentally prosperous and stable modern economy with a per capita GDP 15%-20% above that of the big West European economies, experienced an export-driven upturn in its economy in 1998. The downturn in the global economy, however, will have a cooling effect on the 1998 boom in the Swiss export sector, including

Switzerland (continued)

financial services, biotechnology, pharmaceuticals, and special-purpose machines. A major downturn in the Swiss economy should still be avoided, as consumer and capital spending have picked up and will keep the economy moving in 1999. GDP growth in 1999 is expected to come in around 1.4%. The growing political and economic union of Europe suggests that Switzerland's time-honored neutral separation is becoming increasingly obsolete. Thus, when the surrounding trade partners launched the euro on 1 January 1999, their firms began prodding Swiss exporters and importers to keep their accounts in euros.

Economy

Economy - overview: Syria's predominantly statist economy is on a shaky footing because of Damascus's failure to implement extensive economic reform. The dominant agricultural sector remains underdeveloped, with roughly 80% of agricultural land still dependent on rain-fed sources. Although Syria has sufficient water supplies in the aggregate at normal levels of precipitation, the great distance between major water supplies and population centers poses serious distribution problems. The water problem is exacerbated by rapid population growth, industrial expansion, and increased water pollution. Private investment is critical to the modernization of

the agricultural, energy, and export sectors. Oil production is leveling off, and the efforts of the nonoil sector to penetrate international markets have fallen short. Syria's inadequate infrastructure, outmoded technological base, and weak educational system make it vulnerable to future shocks and hamper competition with neighbors such as Jordan and Israel.

Tajikistan

Introduction

Background: Tajikistan has experienced three changes of government and a civil war since it gained independence in September 1991 when the USSR collapsed. A peace agreement was signed in June 1997, but implementation is progressing slowly. Russian-led peacekeeping troops are deployed throughout the country, and Russian-commanded border guards are stationed along the Tajikistani-Afghan border.

Economy

Economy - overview: Tajikistan has the lowest per capita GDP among the former Soviet republics. Agriculture dominates the economy, with cotton the most important crop. Mineral resources, varied but limited in amount, include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The Tajikistani economy has been gravely weakened by five years of civil conflict and by the loss of

subsidies from Moscow and of markets for its products. Tajikistan thus depends on aid from Russia and Uzbekistan and on international humanitarian assistance for much of its basic subsistence needs. Even if the peace agreement of June 1997 is honored, the country faces major problems in integrating refugees and former combatants into the economy. Moreover, constant political turmoil and the continued dominance by former communist officials have impeded the introduction of meaningful economic reforms. Still in a post-conflict status, the future of Tajikistan's economy and the potential for attracting foreign investment depend upon stability and progress in the peace process.

Economy

Economy - overview: Tanzania is one of the poorest countries in the world. The economy is heavily dependent on agriculture, which accounts for 56% of GDP, provides 85% of exports, and employs 90% of the work force. Topography and climatic conditions, however, limit cultivated crops to only 4% of the land area. Industry accounts for 15% of GDP and is mainly limited to processing agricultural products and light consumer goods. The economic recovery program announced in mid-1986 has generated notable increases in agricultural production and financial support for the program by bilateral donors. The World Bank, the International Monetary Fund, and bilateral donors have provided funds to rehabilitate Tanzania's deteriorated economic infrastructure. Growth in 1991-98 has featured a pickup in industrial production and a substantial increase in output of minerals, led by gold. Natural gas exploration in the Rufiji Delta looks promising and production could start by 2002. Recent banking reforms have helped increase private sector growth and investment. Short-term economic progress also depends on curbing corruption.

Economy

Economy - overview: After months of speculative pressure on the Thai baht, the government decided to float the currency in July 1997, the symbolic beginning of the country's current economic crisis. The crisis - which began in the country's financial sector - has spread throughout the economy. After years of rapid economic growth averaging 9% earlier this decade, the Thai economy contracted 0.4% in 1997 and shrunk another 8.5% in 1998. In the years before the crisis, Thailand ran persistent current account deficits. With the depreciation of the Thai baht and the collapse of domestic demand, however, imports have fallen off sharply - by more than 33% - and Thailand posted a trade surplus of approximately \$12 billion in 1998. Foreign investment for new projects, the long-time catalyst of Thailand's economic growth, has also slowed. The CHUAN government has closely adhered to the economic recovery program prescribed by the IMF. The cooperation afforded Thailand stability in the value of its currency in the second half of 1998 and helped replenish foreign reserves. Tough measures - including passage of adequate bankruptcy and foreclosure legislation as well as privatization of state-owned companies and recapitalization of the financial sector - remain undone. Bangkok is also trying to establish a social safety net for those displaced by the current economic crisis and is working to increase the quality of Thailand's labor force.

Economy

Economy - overview: This small sub-Saharan economy is heavily dependent on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Cocoa, coffee, and cotton together generate about 30% of export earnings. Togo is self-sufficient in basic foodstuffs when harvests are normal, with occasional regional supply difficulties. In the industrial sector, phosphate mining is by far the most important activity, although it has suffered from the collapse of world phosphate prices and increased foreign competition. Togo serves as a regional commercial and trade center.

The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has stalled. Political unrest, including private and public sector strikes throughout 1992 and 1993, jeopardized the reform program, shrunk the tax base, and disrupted vital economic activity. The 12 January 1994 devaluation of the currency by 50% provided an important impetus to renewed structural adjustment; these efforts were facilitated by the end of strife in 1994 and a return to overt political calm. Progress depends on following through on privatization, increased transparency in government accounting to accommodate increased social service outlays, and possible downsizing of the military, on which the regime has depended to stay in place. However, in late 1998 the EU suspended aid and trade preferences for Togo because of grave doubts over the conduct of the presidential elections. The World Bank also suspended its disbursements at yearend 1998 because Togo was unable to pay its arrears.

Economy

Economy - overview: The economy's base is agriculture, which contributes 32% to GDP. Squash, coconuts, bananas, and vanilla beans are the main crops, and agricultural exports make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The industrial sector accounts for only 10% of GDP. Tourism is the primary source of hard currency earnings. The country remains dependent on sizable external aid and remittances to offset its trade deficit.

Tonga (continued)

The government is emphasizing the development of the private sector, especially the encouragement of investment.

Economy

Economy - overview: Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses. Successful economic reforms were implemented in 1995, and foreign investment and trade are flourishing. Unemployment - a main cause of the country's socioeconomic problems - is high, but has decreased to its lowest point in six years. An investment boom in the energy sector led to a surge in imports in 1997. The resulting trade deficit is expected to return to a surplus once construction is completed and the plants come on line. The petrochemical sector has spurred growth in other related sectors, reinforcing the government's commitment to economic diversification. Tourism is a major foreign exchange earner, with 260,000 arrivals in 1995, 80% from Europe.

Economy

Economy - overview: Tunisia has a diverse economy, with important agricultural, mining, energy, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Real growth averaged 4.0% in 1993-97 and reached 5.0% in 1998. Inflation has been moderate. Growth in tourism and increased trade have been key elements in this steady growth. Tunisia's association agreement with the European Union entered into force on 1 March 1998, the first such accord between the EU and Mediterranean countries to be activated. Under the agreement Tunisia will gradually remove barriers to trade with the EU over the next decade. Broader privatization, further liberalization of the investment code to increase foreign investment, and improvements in government efficiency are among the challenges for the future.

Economy

Economy - overview: Turkey has a dynamic economy that is a complex mix of modern industry and commerce along with traditional village agriculture and crafts. It has a strong and rapidly growing private sector, yet the state still plays a major role in basic industry, banking, transport, and communication. Its most important industry - and largest exporter - is textiles and clothing, which is almost entirely in private hands. The economic situation in recent years has been marked by rapid growth coupled with partial success in implementing structural reform measures. Inflation declined to 70% in 1998, down from 99% in 1997, but the public sector fiscal deficit probably remained near 10% of GDP - due in large part to interest payments which accounted for 42% of central government spending in 1998. The government enacted a new tax law and speeded up privatization in 1998 but made no progress on badly needed social security reform. Ankara is trying to increase trade with other countries in the region yet most of Turkey's trade is still with OECD countries. Despite the implementation in January 1996 of a customs union with the EU, foreign direct investment in the country remains low - about \$1 billion annually - perhaps

because potential investors are concerned about still-high inflation and the unsettled political situation. Economic growth will remain about the same in 1999; inflation should decline further.

Economy

Economy - overview: Turkmenistan is largely desert country with nomadic cattle raising, intensive agriculture in irrigated oases, and huge gas and oil resources. One-half of its irrigated land is planted in cotton, making it the world's tenth largest producer. It also possesses the world's fifth largest reserves of natural gas and substantial oil resources. Until the end of 1993, Turkmenistan had experienced less economic disruption than other former Soviet states because its economy received a boost from higher prices for oil and gas and a sharp increase in hard currency earnings. In 1994, Russia's refusal to export Turkmen gas to hard currency markets and mounting debts of its major customers in the former USSR for gas deliveries contributed to a sharp fall in industrial production and caused the budget to shift from a surplus to a slight deficit. The economy bottomed out in 1996, but high inflation continued. Furthermore, with an authoritarian ex-communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton sales to sustain its inefficient economy. In 1996, the government set in place a stabilization program aimed at a unified and market-based exchange rate, allocation of government credits by auction, and strict limits on budget deficits. Privatization goals remain limited. Turkmenistan is working hard to open new gas export channels through Iran and Turkey to Europe, but these will take many years to realize. In 1998 Turkmenistan faced revenue shortfalls due to the continued lack of adequate export routes for natural gas and obligations on extensive short-term external debt.

Subsistence farming and fishing are the primary economic activities. Government revenues largely come from the sale of stamps and coins and worker remittances. About

Tuvalu (continued)

1,000 Tuvaluans work in Nauru in the phosphate mining industry. Nauru has begun repatriating Tuvaluans, however, as phosphate resources decline. Substantial income is received annually from an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. In an effort to reduce its dependence on foreign aid, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts of up to 7%. In 1998, Tuvalu began selling internet addresses in its TV domain and reportedly has derived revenue from use of its area code for "900" lines. Low-lying Tuvalu is particularly vulnerable to any future global warming.

Economy

Economy - overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, and sizable mineral deposits of copper and cobalt. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee is the major export crop and accounts for the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. In 1990-98, the economy turned in a solid performance based on continued investment in the rehabilitation of infrastructure, improved

incentives for production and exports, reduced inflation, gradually improved domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Continuation of this performance, while possible, appears difficult because of Ugandan involvement in the war in the Democratic Republic of the Congo, growing corruption within the government, and slippage in the government's determination to press reforms.

Economy

Economy - overview: After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied equipment and raw materials to industrial and mining sites in other regions of the former USSR. Ukraine depends on imports of energy, especially natural gas. Shortly after the implosion of the USSR in December 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output in 1992-98 fell to less than half the 1991 level. Loose monetary policies pushed inflation to hyperinflationary levels in late 1993. Since his election in July 1994, President KUCHMA has pushed economic reforms, maintained financial discipline, and tried to remove

almost all remaining controls over prices and foreign trade. The onset of the financial crisis in Russia dashed Ukraine's hopes for its first year of economic growth in 1998 due to a sharp fall in export revenue and reduced domestic demand. Although administrative currency controls will be lifted in early 1999, they are likely to be reimposed when the hryvnia next comes under pressure. The currency is only likely to collapse further if Ukraine abandons tight monetary policies or threatens default. Despite increasing pressure from the IMF to accelerate reform, significant economic restructuring remains unlikely in 1999.

Economy

Economy - overview: The UAE has an open economy with one of the world's highest per capita incomes and with a sizable annual trade surplus. Its wealth is based on oil and gas output (about 33% of GDP), and the fortunes of the economy fluctuate with the prices of those commodities. Since 1973, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. At present levels of production, oil and gas reserves should last for over 100 years. The UAE Government is encouraging increased privatization within the economy. Industrial development has picked up in 1997-98, but lower world oil prices caused GDP to drop 5% in 1998.

Transnational Issues

Disputes - international: location and status of boundary with Saudi Arabia is not final, de facto boundary reflects 1974 agreement; no defined boundary with most of Oman, but Administrative Line in far north; claims two islands in the Persian Gulf occupied by Iran: Lesser Tunb (called Tunb as Sughra in Arabic by UAE and Jazireh-ye Tonb-e Kuchek in Persian by Iran) and Greater Tunb (called Tunb al Kubra in Arabic by UAE and Jazireh-ye Tonb-e Bozorg in Persian by Iran); claims island in the Persian Gulf jointly administered with Iran (called Abu Musa in Arabic by UAE and Jazireh-ye Abu Musa in Persian by Iran) - over which Iran has taken steps to exert unilateral control since 1992, including access restrictions and a military build-up on the island; the UAE has garnered significant diplomatic support in the region in protesting these Iranian actions

Illicit drugs: growing role as heroin transshipment and money-laundering center due to its proximity to southwest Asian producing countries and the bustling free trade zone in Dubai

United Kingdom

Introduction

Background: Britain, the dominant industrial and maritime power of the nineteenth century, played a leading role in developing parliamentary democracy and in advancing literature and science. The British Empire covered approximately one-fourth of the earth's surface at its zenith. In the first half of the twentieth century its strength was seriously depleted by two world wars. Since the end of World War II, the British Empire has been dismantled, and Britain has rebuilt itself into a prosperous, modern European nation with significant international political, cultural, and economic influence. As the twentieth century draws to a close, Britain is debating the degree of its integration with continental Europe. While a member of the EU, for the time being it is staying out of the euro system introduced in January 1999. Constitutional reform, including the House of Lords and the devolution of power to Scotland, Wales, and Northern Ireland, is an ongoing issue in Great Britain.

Economy

Economy - overview: The UK is one of the world's great trading powers and financial centers, and its essentially capitalistic economy ranks among the four largest in Western Europe. Over the past two decades the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with only 1% of the labor force. The UK has large coal, natural gas, and oil reserves; primary energy production accounts for 10% of GDP, one of the highest shares of any industrial nation. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance, now employing only 18% of the work force. Economic growth is slowing, and Britain may experience a short recession in 1999. As a result, unemployment probably will begin to rise again. The BLAIR government has put off the question of participation in the euro system until after the next election, not expected until 2001, but Chancellor of the Exchequer BROWN is committed to preparing the British economy for eventual membership.

United States

Introduction

Background: Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation-state. The economy is marked by steady growth, low unemployment, low inflation, and rapid advances in technology. The biggest cloud over this affluent society is the distribution of gains - since 1975 most of the increase in national income has gone to the 20% of people at the top of the income ladder.

Geography

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38 00 N, 97 00 W

Map references: North America

Area:

total: 9,629,091 sq km

land: 9,158,960 sq km

water: 470,131 sq km

note: includes only the 50 states and District of Columbia

Area - comparative: about one-half the size of Russia; about three-tenths the size of Africa; about one-half the size of South America (or slightly larger than Brazil); slightly larger than China; about two and one-half times the size of Western Europe

Land boundaries:

total: 12,248 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Cuba 29 km (US Naval Base at Guantanamo Bay), Mexico 3,326 km

note: Guantanamo Naval Base is leased by the US and thus remains part of Cuba

Coastline: 19,924 km

Maritime claims:

contiguous zone: 12 nm

continental shelf: not specified

exclusive economic zone: 200 nm

territorial sea: 12 nm

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes:

lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

Natural resources: coal, copper, lead, molybdenum, phosphates, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

Land use:

arable land: 19%

permanent crops: 0%

permanent pastures: 25%

forests and woodland: 30%

other: 26% (1993 est.)

Irrigated land: 207,000 sq km (1993 est.)

Natural hazards: tsunamis, volcanoes, and earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the midwest and southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

Environment - current issues: air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; very limited natural fresh water resources in much of the western part of the country require careful management; desertification

Environment - international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides,

United States (continued)

Antarctic-Environmental Protocol, Antarctic Treaty, Climate Change, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes
Geography - note: world's third-largest country (after Russia and Canada)

Economy

Economy - overview: The US has the most powerful, diverse, and technologically advanced economy in the world, with a per capita GDP of \$31,500, the largest among major industrial nations. In this market-oriented economy, private individuals and business firms make most of the decisions, and government buys needed goods and services predominantly in the private marketplace. US business firms enjoy considerably greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, lay off surplus

United States (continued)

workers, and develop new products. At the same time, they face higher barriers to entry in their rivals' home markets than the barriers to entry of foreign firms in US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment, although their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The years 1994-98 witnessed solid increases in real output, low inflation rates, and a drop in unemployment to below 5%. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical costs of an aging population, sizable trade deficits, and stagnation of family income in the lower economic groups. The outlook for 1999 is for GDP growth somewhat below 1998's, continued low inflation, and about the same level of unemployment. Two shadows for 1999 are the severe financial crises in East Asia and Russia and the exuberant level of stock prices in relation to corporate earnings.

Economy

Economy - overview: Uruguay's small economy benefits from a favorable climate for agriculture and substantial hydropower production. The SANGUINETTI government's conservative monetary and fiscal policies are aimed at reducing inflation; other priorities include moving toward a more market-oriented economy, completing reform of the social security system, and increasing investment in education. Economic performance remains sensitive to conditions in Argentina and Brazil, largely because more than half of Uruguay's trade is conducted with its

partners in Mercosur (the Southern Cone Common Market).

Economy

Economy - overview: Uzbekistan is a dry, landlocked country of which 10% consists of intensely cultivated, irrigated river valleys. It was one of the poorest areas of the former Soviet Union with more than 60% of its population living in densely populated rural communities. Uzbekistan is now the world's third largest cotton exporter, a major producer of gold and natural gas, and a regionally significant producer of chemicals and machinery. Following independence in December 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. Faced with high rates of inflation, however, the government began to reform in mid-1994, by introducing tighter monetary policies, expanding privatization, slightly reducing the role of the state in the economy, and improving the environment for foreign investors. Nevertheless, the state continues to be a dominating influence in the economy, and reforms have so far failed to bring about much-needed structural changes. The IMF suspended Uzbekistan's \$185 million standby arrangement in late 1996 because of governmental steps that made impossible fulfillment of Fund conditions. Uzbekistan has responded to the negative external conditions generated by the Asian and Russian financial crises by tightening export and currency controls within its already largely closed economy.

Economy

Economy - overview: The economy is based primarily on subsistence or small-scale agriculture which provides a living for 65% of the population. Fishing, offshore financial services, and tourism, with about 50,000 visitors in 1997, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands.

Economy

Economy - overview: The petroleum sector dominates the economy, accounting for roughly a third of GDP, around 80% of export earnings, and more than half of government operating revenues. As

a result, the steep downturn in international oil prices has had a severe impact on the economy; fiscal cuts spurred by the loss of revenues, high interest rates, and the sharp downturn in export earnings drove the economy into recession in 1998. The recession continued into 1999 with oil prices forecast to stay relatively low, but rising. Although the government has pursued moderate austerity measures to address the downturn in revenues, Venezuela's ongoing reform program has largely stalled. Pressure on the bolivar - overvalued by as much as 40% - was also significant through much of 1998, increasing the probability of an adjustment of the currency in 1999. Newly elected President Hugo CHAVEZ will be hard pressed to address Venezuela's many economic ills. He has promised to strike a balance between reforms designed to address the structural deformities of the economy and addressing declining living standards. CHAVEZ has sought to play down the populism that marked his political campaign for the presidency in an effort to allay investor concerns. The wide range of viewpoints represented on CHAVEZ's economic team is likely to make rapid implementation of a coherent policy difficult.

Economy

Economy - overview: Vietnam is a poor, densely populated country that has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally

Vietnam (continued)

planned economy. Substantial progress has been achieved over the past 10 years in moving forward from an extremely low starting point, though the regional downturn is now limiting that progress. GDP growth of 8.5% in 1997 fell to 4% in 1998. These numbers masked some major difficulties that are emerging in economic performance. Many domestic industries, including coal, cement, steel, and paper, have reported large stockpiles of inventory and tough competition from more efficient foreign producers, giving Vietnam a trade deficit of \$3.3 billion in 1997. While disbursements of aid and foreign direct investment have risen, they are not large enough to finance the rapid increase in imports; and it is widely believed that Vietnam may be using short-term trade credits to bridge the gap - a risky strategy that could result in a foreign exchange crunch. Meanwhile, Vietnamese authorities continue to move slowly toward implementing the structural reforms needed to revitalize the economy and produce more competitive, export-driven industries. Privatization of state enterprises remains bogged down in political controversy, while the country's dynamic private sector is denied both financing and access to markets. Reform of the banking sector is proceeding slowly, raising concerns that the country will be unable to tap sufficient domestic savings to maintain current high levels of growth. Administrative and legal barriers are also causing costly delays for foreign investors and are raising similar doubts about Vietnam's ability to maintain the inflow of foreign capital. Ideological bias in favor of state intervention and control of the economy is slowing progress toward a more liberalized investment environment.

Economy

Economy - overview: Tourism is the primary economic activity, accounting for more than 70% of GDP and 70% of employment. The islands normally

host 2 million visitors a year. The number of US tourists in the first five months of 1996 was down by 55% from the same period in 1995, the lingering result of the fierce hurricanes of 1995. Unemployment rose sharply in 1996. The manufacturing sector consists of textile, electronics, pharmaceutical, and watch assembly plants. The agricultural sector is small, with most food being imported. International business and financial services are a small but growing component of the economy. One of the world's largest petroleum refineries is at Saint Croix. A major economic problem at the beginning of 1997 was the more than \$1 billion in governmental arrears, income tax refunds, payments to vendors, and overdue wages.

Economy

Economy - overview: The economy is limited to traditional subsistence agriculture, with about 80% of the labor force earning its livelihood from agriculture (coconuts and vegetables), livestock (mostly pigs),

and fishing. About 4% of the population is employed in government. Revenues come from French Government subsidies, licensing of fishing rights to Japan and South Korea, import taxes, and remittances from expatriate workers in New Caledonia. Wallis and Futuna imports food - particularly flour, sugar, rice, and beef - fuel, clothing, machinery, and transport equipment, but its exports are negligible, consisting mostly of breadfruit, yams, and taro root.

West Bank

Introduction

Background: The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements ("the DOP"), signed in Washington on 13 September 1993, provides for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Permanent status negotiations began on 5 May 1996, but have not resumed since the initial meeting. Under the DOP, Israel agreed to transfer certain powers and responsibilities to the Palestinian Authority, which includes a Palestinian Legislative Council elected in January 1996, as part of interim self-governing arrangements in the West Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, and the Israel-PLO 23 October 1998 Wye River Memorandum. The DOP provides that Israel will retain responsibility during the transitional period for

external security and for internal security and public order of settlements and Israelis. Permanent status is to be determined through direct negotiations.

Economy

Economy - overview: Economic conditions in the West Bank - where economic activity is governed by the Paris Economic Protocol of April 1994 between Israel and the Palestinian Authority - have deteriorated since the early 1990s. Real per capita GDP for the West Bank and Gaza Strip (WBGS) declined 36.1% between 1992 and 1996 owing to the combined effect of falling aggregate incomes and robust population growth. The downturn in economic activity was largely the result of Israeli closure policies - the imposition of generalized border closures in response to security incidents in Israel - which disrupted previously established labor and commodity market relationships between Israel and the WBGS. The most serious negative social effect of this downturn has been the emergence of chronic unemployment; average unemployment rates in the WBGS during the 1980s were generally under 5%, by the mid-1990s this level had risen to over 20%. Since 1997 Israel's use of comprehensive closures has decreased and, in 1998, Israel implemented new policies to reduce the impact of closures and other

security procedures on the movement of Palestinian goods and labor. These positive changes to the conduct of economic activity, combined with international donor pledges of over \$3 billion made to the Palestinian Authority in November, may fuel a moderate economic recovery in 1999.

Economy

Economy - overview: Western Sahara, a territory poor in natural resources and lacking sufficient rainfall, depends on pastoral nomadism, fishing, and phosphate mining as the principal sources of income for the population. Most of the food for the urban population must be imported. All trade and other economic activities are controlled by the Moroccan Government. Incomes and standards of living are substantially below the Moroccan level.

Economy

Economy - overview: Growth in global output (gross world product, GWP) dropped to 2% in 1998 from 4% in 1997 because of continued recession in Japan, severe financial difficulties in other East Asian countries, and widespread dislocations in the Russian economy. The US economy continued its remarkable sustained prosperity, growing at 3.9% in 1998, and accounted for 22% of GWP. Western Europe's economies grew at roughly 2.5%, not enough to cut deeply into the region's high unemployment; these economies produced 21% of GWP. China, the second largest economy in the world, continued its rapid growth and accounted for 11% of GWP. Japan posted a decline of 2.6% in 1998 and its share in GWP dropped to 7.4%. As usual, the 15 successor nations of the USSR and the other old Warsaw Pact nations experienced widely different rates of growth. Russia's national product dropped by 5% whereas the nations of central and eastern Europe grew by 3.4% on average. The developing nations varied widely in their growth results, with many countries facing population increases that eat up gains in output. Externally, the nation-state, as a bedrock economic-political

institution, is steadily losing control over international flows of people, goods, funds, and technology.

Internally, the central government finds its control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in the successor states of the former Soviet Union, in the former Yugoslavia, in India, and in Canada. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. The addition of more than 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, desertification, underemployment, epidemics, and famine. Because of their own internal problems, the industrialized countries have inadequate resources to deal effectively with the poorer areas of the world, which, at least from the economic point of view, are becoming further marginalized. In 1998, serious financial difficulties in several high-growth East Asia countries cast a shadow over short-term global economic prospects. The introduction of the euro as the common currency of much of Western Europe in January 1999 poses serious economic risks because of varying levels of income and cultural and political differences among the participating nations. (For specific economic developments in each country of the world in 1998, see the individual country entries.)

Economy

Economy - overview: Yemen, one of the poorest countries in the Arab world, reported strong growth in the mid-1990s with the onset of oil production, but was harmed by low oil prices in 1998. Yemen has

embarked on an IMF-supported structural adjustment program designed to modernize and streamline the economy, which has led to foreign debt relief and restructuring. Yemen will work in 1999 to maintain tight control over spending and implement additional components of the IMF program. The high population growth rate of 3.3%, internal political dissension, and continued low prices make the government's task especially difficult.

Economy

Economy - overview: Despite progress in privatization and budgetary reform, Zambia's economy has a long way to go. Inflation, while slowing somewhat, continues to be a major concern to the CHILUBA government. Zambia's copper mining sector, which accounts for over 80% of the nation's foreign currency intake, is struggling. Production rates are down as are world copper prices. Aid cuts by Zambia's donors, arising out of concern for the November 1996 flawed election, also have damaged Zambia's economic prospects. Urged by the World Bank, Zambia has embarked on a privatization program which is to include the all-important copper industry. Until a deal on the copper sector is concluded, perhaps by mid-1999, economic prospects will remain clouded.

Economy

Economy - overview: The government of Zimbabwe faces a wide variety of difficult economic problems as it struggles to consolidate earlier progress in developing a market-oriented economy. Its involvement in the war in the Democratic Republic of the Congo, for example, has already drained hundreds of millions of dollars from the economy. Badly needed support from the IMF suffers delays in part because of the country's failure to meet budgetary goals. Inflation rose from an annual rate of 25% in January 1998 to 47% in December and will almost certainly continue to increase in 1999. The economy is being steadily weakened by AIDS; Zimbabwe has one of the highest rates of infection in the world. Per capita GDP, which is twice the average of the poorer sub-Saharan nations, will increase little if any in the near-term, and Zimbabwe will suffer continued frustrations in developing its agricultural and mineral resources.

Taiwan

Introduction

Background: In 1895, military defeat forced China to cede Taiwan to Japan, however it reverted to Chinese control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government that over five decades has gradually democratized and incorporated native Taiwanese within its structure. Throughout this period, the island has prospered as one of East Asia's economic tigers. The dominant political issue continues to be the relationship between Taiwan and Mainland China and the question of eventual reunification.

Economy

Economy - overview: Taiwan has a dynamic capitalist economy with gradually decreasing guidance of investment and foreign trade by government authorities and partial government ownership of some large banks and industrial firms. Real growth in GDP has averaged about 8.5% a year during the past three decades. Export growth has been even faster and has provided the impetus for industrialization. Inflation and unemployment are low, and foreign reserves are the world's third largest. Agriculture contributes less than 3% to GDP, down from 35% in 1952. Traditional labor-intensive industries are steadily being moved off-shore and replaced with more capital- and technology-intensive industries. Taiwan has become a major investor in China, Thailand, Indonesia, the Philippines, Malaysia, and Vietnam. The tightening of labor markets has led to an influx of foreign workers, both legal and illegal. Because of its conservative financial approach and its entrepreneurial strengths, Taiwan suffered little compared with many of its neighbors from "the Asian flu" in 1998.

Note: The Socialist Federal Republic of Yugoslavia (SFRY) ceases to exist. None of the successor states of the former Yugoslavia, including Serbia and Montenegro, have been permitted to participate solely on the basis of the membership of the former Yugoslavia in the United Nations General Assembly and Economic and Social Council and their subsidiary bodies and in various United Nations specialized agencies. The United Nations, however, permits the seat and nameplate of the SFRY to remain, permits the SFRY mission to continue to function, and continues to fly the flag of the former Yugoslavia. For a variety of reasons, a number of other organizations have not yet taken action with regard to the membership of the former Yugoslavia. *The World Factbook* therefore continues to list Yugoslavia under international organizations where the SFRY seat remains or where no action has yet been taken.

entered into force—20 March 1966
objective—to solve through international cooperation the problems involved in the conservation of living resources of the high seas, considering that because of the development of modern technology some of these resources are in danger of being overexploited

parties—(37) Australia, Belgium, Bosnia and Herzegovina, Burkina Faso, Cambodia, Colombia, Denmark, Dominican Republic, Fiji, Finland, France, Haiti, Jamaica, Kenya, Lesotho, Madagascar, Malawi, Malaysia, Mauritius, Mexico, Netherlands, Nigeria, Portugal, Senegal, Sierra Leone, Solomon Islands, South Africa, Spain, Switzerland, Thailand, Tonga, Trinidad and Tobago, Uganda, UK, US, Venezuela, former Yugoslavia
countries that have signed, but not yet ratified—(21) Afghanistan, Argentina, Bolivia, Canada, Costa Rica, Cuba, Ghana, Iceland, Indonesia, Iran, Ireland, Israel, Lebanon, Liberia, Nepal, NZ, Pakistan, Panama, Sri Lanka, Tunisia, Uruguay

Convention on Long-Range Transboundary Air Pollution

note—abbreviated as Air Pollution
opened for signature—13 November 1979
entered into force—16 March 1983
objective—to protect the human environment against air pollution and to gradually reduce and prevent air pollution, including long-range transboundary air pollution

parties—(44) Armenia, Austria, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, EU, Finland, France, Georgia, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, The Former Yugoslav Republic of Macedonia, Malta, Moldova, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, UK, US, former Yugoslavia
countries that have signed, but not yet ratified—(2) Holy See, San Marino

Convention on the International Trade in Endangered Species of Wild Flora and Fauna (CITES)

note—abbreviated as Endangered Species
opened for signature—3 March 1973
entered into force—1 July 1975
objective—to protect certain endangered species from overexploitation by means of a system of import/export permits

parties—(137) Afghanistan, Algeria, Antigua and Barbuda, Argentina, Australia, Austria, The Bahamas, Bangladesh, Barbados, Belgium, Belize, Benin, Bolivia, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burundi, Cambodia, Cameroon, Canada, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Cote d'Ivoire, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominican Republic, Ecuador, Egypt, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, The Gambia, Germany, Ghana, Greece, Guatemala, Guinea, Guinea-Bissau, Guyana, Honduras, Hungary, India, Indonesia, Iran, Israel, Italy, Japan, Jordan, Kenya, Kiribati, South Korea, Latvia, Liberia, Liechtenstein, Luxembourg, Madagascar, Malawi, Malaysia, Mali, Malta, Mauritius, Mexico, Monaco, Mongolia, Morocco, Mozambique, Namibia, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Saudi Arabia, Senegal, Seychelles, Sierra Leone, Singapore, Slovakia, Somalia, South Africa, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Tuvalu, Uganda, UAE, UK, US, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Zambia, Zimbabwe
countries that have signed, but not yet ratified—(3) Ireland, Kuwait, Lesotho

Convention on the Prevention of Marine Pollution by Dumping Wastes and Other Matter (London Convention)

note—abbreviated as Marine Dumping
opened for signature—29 December 1972
entered into force—30 August 1975
objective—to control pollution of the sea by dumping and to encourage regional agreements supplementary to the Convention

parties—(75) Afghanistan, Antigua and Barbuda, Argentina, Australia, Barbados, Belarus, Belgium, Belize, Bosnia and Herzegovina, Brazil, Canada, Cape Verde, Chile, China, Democratic Republic of the Congo, Costa Rica, Cote d'Ivoire, Cuba, Cyprus, Denmark, Dominican Republic, Egypt, Finland, France, Gabon, Germany, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, Iran, Ireland, Italy, Jamaica, Japan, Jordan, Kenya, Kiribati, Libya, Luxembourg, Malta, Mexico, Monaco, Morocco, Nauru, Netherlands, NZ, Nigeria, Norway, Oman, Panama, Papua New Guinea, Philippines, Poland, Portugal, Russia, Saint Lucia, Seychelles, Slovenia, Solomon Islands, South Africa, Spain, Suriname, Sweden, Switzerland, Tonga, Tunisia, Tuvalu, Ukraine, UAE, UK, US, former Yugoslavia

Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques

note—abbreviated as Environmental Modification
opened for signature—10 December 1976
entered into force—5 October 1978
objective—to prohibit the military or other hostile use of environmental modification techniques in order to further world peace and trust among nations

parties—(64) Afghanistan, Algeria, Antigua and Barbuda, Argentina, Australia, Austria, Bangladesh, Belarus, Belgium, Benin, Brazil, Bulgaria, Canada, Cape Verde, Chile, Costa Rica, Cuba, Cyprus, Czech Republic, Denmark, Dominica, Egypt, Finland, Germany, Ghana, Greece, Guatemala, Hungary, India, Ireland, Italy, Japan, North Korea, South Korea, Kuwait, Laos, Malawi, Mauritius, Mongolia, Netherlands, NZ, Niger, Norway, Pakistan, Papua New Guinea, Poland, Romania, Russia, Saint Lucia, Sao Tome and Principe, Slovakia, Solomon Islands, Spain, Sri Lanka, Sweden, Switzerland, Tunisia, Ukraine, UK, US, Uruguay, Uzbekistan, Vietnam, Yemen
countries that have signed, but not yet ratified—(17) Bolivia, Democratic Republic of the Congo, Ethiopia, Holy See, Iceland, Iran, Iraq, Lebanon, Liberia, Luxembourg, Morocco, Nicaragua, Portugal, Sierra Leone, Syria, Turkey, Uganda

Convention on Wetlands of International Importance Especially as Waterfowl Habitat (Ramsar)

note—abbreviated as Wetlands
opened for signature—2 February 1971
entered into force—21 December 1975
objective—to stem the progressive encroachment on and loss of wetlands now and in the future, recognizing the fundamental ecological functions of wetlands and their economic, cultural, scientific, and recreational value

parties—(101) Albania, Algeria, Argentina, Armenia, Australia, Austria, The Bahamas, Bahrain, Bangladesh, Belgium, Brazil, Bulgaria, Burkina Faso, Canada, Chad, Chile, China, Democratic Republic of the Congo, Costa Rica, Cote d'Ivoire, Croatia, Czech Republic, Denmark, Ecuador, Egypt, Estonia, Finland, France, Gabon, The Gambia, Georgia, Germany, Greece, Guatemala, Guinea, Guinea-Bissau, Honduras, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kenya, South Korea, Latvia, Liechtenstein, Lithuania, Malawi, Mali, Malta, Mauritania, Mexico, Monaco, Mongolia, Morocco, Namibia, Netherlands, NZ, Nicaragua, Niger, Norway, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Romania, Russia, Senegal, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Togo, Trinidad and Tobago, Tunisia, Turkey, UK, US, Uruguay, Venezuela, Vietnam, former Yugoslavia, Zambia

International Tropical Timber Agreement, 1983

note—abbreviated as Tropical Timber 83
opened for signature—18 November 1983
entered into force—1 April 1985; this agreement expired when the International Tropical Timber Agreement, 1994, went into force
objective—to provide an effective framework for cooperation between tropical timber producers and consumers and to encourage the development of national policies aimed at sustainable utilization and conservation of tropical forests and their genetic resources

parties—(54) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cameroon, Canada, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Nepal, Netherlands, NZ, Norway, Panama, Papua New Guinea, Peru, Philippines, Portugal, Russia, Spain, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Venezuela

International Tropical Timber Agreement, 1994

note—abbreviated as Tropical Timber 94
opened for signature—26 January 1994
entered into force—1 January 1997
objective—to ensure that by the year 2000 exports of tropical timber originate from sustainably managed sources; to establish a fund to assist tropical timber producers in obtaining the resources necessary to reach this objective

parties—(54) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guyana, Honduras, India, Indonesia, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Nepal, Netherlands, NZ, Norway, Panama, Papua New Guinea, Peru, Philippines, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Venezuela
countries that have signed, but not yet ratified—(2) Ireland, Portugal

Kyoto Protocol to the United Nations Framework Convention on Climate Change

note—abbreviated as Climate Change-Kyoto Protocol
opened for signature—16 March 1998, but not yet in force
objective—to further reduce greenhouse gas emissions by enhancing the national programs of developed countries aimed at this goal and by establishing percentage reduction targets for the developed countries

parties—(7) Antigua and Barbuda, El Salvador, Fiji, Maldives, Panama, Trinidad and Tobago, Tuvalu
countries that have signed, but not yet ratified—(72) Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Canada, Chile, China, Cook Islands, Costa Rica, Croatia, Czech Republic, Denmark, Ecuador, Estonia, EU, Finland, France, Germany, Greece, Guatemala, Honduras, Indonesia, Ireland, Israel, Italy, Japan, South Korea, Latvia, Liechtenstein, Lithuania, Luxembourg, Mali, Malta, Marshall Islands, Mexico, Federated States of Micronesia, Monaco, Netherlands, New Zealand, Nicaragua, Niger, Niue, Norway, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Romania, Russia, Saint Lucia, Saint Vincent and the Grenadines, Samoa, Seychelles, Slovakia, Slovenia, Solomon Islands, Spain, Sweden, Switzerland, Thailand, Turkmenistan, UK, US, Uruguay, Uzbekistan, Vietnam, Zambia

Protocol of 1978 Relating to the International Convention for the Prevention of Pollution From Ships, 1973 (MARPOL)

note—abbreviated as Ship Pollution
opened for signature—17 February 1978
entered into force—2 October 1983
objective—to preserve the marine environment through the complete elimination of pollution by oil and other harmful substances and the minimization of accidental discharge of such substances

parties—(100) Algeria, Antigua and Barbuda, Argentina, Australia, Austria, The Bahamas, Barbados, Belgium, Belize, Brazil, Brunei, Bulgaria, Burma, Cambodia, Canada, Chile, China, Colombia, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Ecuador, Egypt, Equatorial Guinea, Estonia, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Guatemala, Hungary, Iceland, India, Indonesia, Ireland, Israel, Italy, Jamaica, Japan, Kazakhstan, Kenya, North Korea, South Korea, Latvia, Lebanon, Liberia, Lithuania, Luxembourg, Malaysia, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Monaco, Morocco, Netherlands, Norway, Oman, Pakistan, Panama, Papua New Guinea, Peru, Poland, Portugal, Romania, Russia, Saint Vincent and the Grenadines, Senegal, Seychelles, Singapore, Slovakia, Slovenia, South Africa, Spain, Suriname, Sweden, Switzerland, Syria, Togo, Tonga, Tunisia, Turkey, Tuvalu, Ukraine, UK, US, Uruguay, Vanuatu, Venezuela, Vietnam, former Yugoslavia

Protocol on Environmental Protection to the Antarctic Treaty

note—abbreviated as Antarctic-Environmental Protocol
opened for signature—4 October 1991
entered into force—14 January 1998
objective—to enhance the protection of the Antarctic environment and dependent and associated ecosystems

parties—(28) Argentina, Australia, Belgium, Brazil, Bulgaria, Chile, China, Ecuador, Finland, France, Germany, Greece, India, Italy, Japan, South Korea, Netherlands, NZ, Norway, Peru, Poland, Russia, South Africa, Spain, Sweden, UK, US, Uruguay
countries that have signed, but not yet ratified—(15) Austria, Canada, Colombia, Cuba, Czech Republic, Denmark, Guatemala, Hungary, North Korea, Papua New Guinea, Romania, Slovakia, Switzerland, Turkey, Ukraine

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution Concerning the Control of Emissions of Nitrogen Oxides or Their Transboundary Fluxes

note—abbreviated as Air Pollution-Nitrogen Oxides
opened for signature—31 October 1988
entered into force—14 February 1991
objective—to provide for the control or reduction of nitrogen oxides and their transboundary fluxes

parties—(26) Austria, Belarus, Bulgaria, Canada, Czech Republic, Denmark, EU, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Russia, Slovakia, Spain, Sweden, Switzerland, Ukraine, UK, US
countries that have signed, but not yet ratified—(2) Belgium, Poland

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution Concerning the Control of Emissions of Volatile Organic Compounds or Their Transboundary Fluxes

note—abbreviated as Air Pollution-Volatile Organic Compounds
opened for signature—18 November 1991
entered into force—29 September 1997
objective—to provide for the control and reduction of emissions of volatile organic compounds in order to reduce their transboundary fluxes so as to protect human health and the environment from adverse effects

parties—(17) Austria, Bulgaria, Czech Republic, Denmark, Finland, France, Germany, Hungary, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Spain, Sweden, Switzerland, UK
countries that have signed, but not yet ratified—(7) Belgium, Canada, EU, Greece, Portugal, Ukraine, US

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution on Further Reduction of Sulphur Emissions

note—abbreviated as Air Pollution-Sulphur 94
opened for signature—14 June 1994
entered into force—5 August 1998
objective—to provide for a further reduction in sulfur emissions or transboundary fluxes

parties—(21) Austria, Canada, Czech Republic, Denmark, EU, Finland, France, Germany, Greece, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Slovakia, Slovenia, Spain, Sweden, Switzerland, UK
countries that have signed, but not yet ratified—(7) Belgium, Bulgaria, Croatia, Hungary, Poland, Russia, Ukraine

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution on Persistent Organic Pollutants

note—abbreviated as Air Pollution-Persistent Organic Pollutants

opened for signature—24 June 1998, but not yet in force

objective—to provide for the control and reduction of emissions of persistent organic pollutants in order to reduce their transboundary fluxes so as to protect human health and the environment from adverse effects

partie—(1) Canada

countries that have signed, but not yet ratified—(35) Armenia, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, EU, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Moldova, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Ukraine, UK, US

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution on the Reduction of Sulphur Emissions or Their Transboundary Fluxes by at Least 30%

note—abbreviated as Air Pollution-Sulphur 85

opened for signature—8 July 1985

entered into force—2 September 1987

objective—to provide for a 30% reduction in sulfur emissions or transboundary fluxes by 1993

parties—(21) Austria, Belarus, Belgium, Bulgaria, Canada, Czech Republic, Denmark, Finland, France, Germany, Hungary, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Russia, Slovakia, Sweden, Switzerland, Ukraine

Note: At this time, only three countries—Burma, Liberia, and the US—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.

Cross-Reference List of Country Data Codes

FIPS 10-4:	<i>Countries, Dependencies, Areas of Special Sovereignty, and Their Principal Administrative Divisions (FIPS PUB 10-4)</i> is maintained by the Office of the Geographer and Global Issues (Department of State) and published by the National Institute of Standards and Technology (Department of Commerce). These two-character alphabetic codes are included in the text of the <i>Factbook</i> in the Data code entry under the Government category. FIPS 10-4 codes are intended for general use throughout the US Government, especially in activities associated with the mission of the Department of State and national defense programs.
ISO 3166:	<i>Codes for the Representation of Names of Countries (ISO 3166)</i> is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: <i>American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange</i> .
Internet:	This is a provisional compilation that generally agrees with the ISO 3166 two-character alphabetic codes.

DIAM 65-18:	<i>Geopolitical Data Elements and Related Features</i> , Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency

The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Factbook* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies.

This is a detailed black and white map of Southeast Asia, Oceania, and the Pacific region. The map shows major landmasses including China, the Philippines, Indonesia, Papua New Guinea, the Solomon Islands, Vanuatu, Fiji, Australia, and New Zealand. It also depicts numerous island groups such as the Northern Mariana Islands, Marshall Islands, Caroline Islands, and the Line Islands. Key geographical features like the Tropic of Cancer, the Equator, and the Lord Howe Rise are marked. Major cities and ports are labeled, along with significant bodies of water like the Philippine Sea, Celebes Sea, and the Indian Ocean. The map includes a grid of latitude and longitude lines.
