Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Total	TARDEC NVESD ARL-HRED NSRDEC				

Purpose

Enable indirect vision (IV) based Soldier-systems (manned/unmanned/Soldier) to move quickly and safely while maintaining 360 local situational awareness (LSA) to enhance operational performance.

Product

- Advanced Crew Stations integrated with 360/90 Day/Night LSA, Assisted Mobility, and Soldier Monitoring / State technologies to improve Soldier performance.
- Quantitative understanding (performance levels) of future indirect vision operations for the movement and security of Soldier-systems at a platoon and below level when utilizing:
 - Assisted mobility
 - LSA system with aided target cueing
 - Digital video recording of 360/90 with intelligent tagging
 - Soldier monitoring and state based crew station (CS) design

Payoff

- Improvement in Vehicle & Soldier Survivability, Vehicle Lethality/Self-Defense & Control along with Greater Survivability/Lethality for Dismount Soldiers
- Two Mounted Soldier ability to maintain 360 LSA with IV
- One Mounted Soldier ability to move vehicle (manned or unmanned) quickly and safely with IV
- Data and Information to feed programmatic decisions
- Risk reduction for FCS

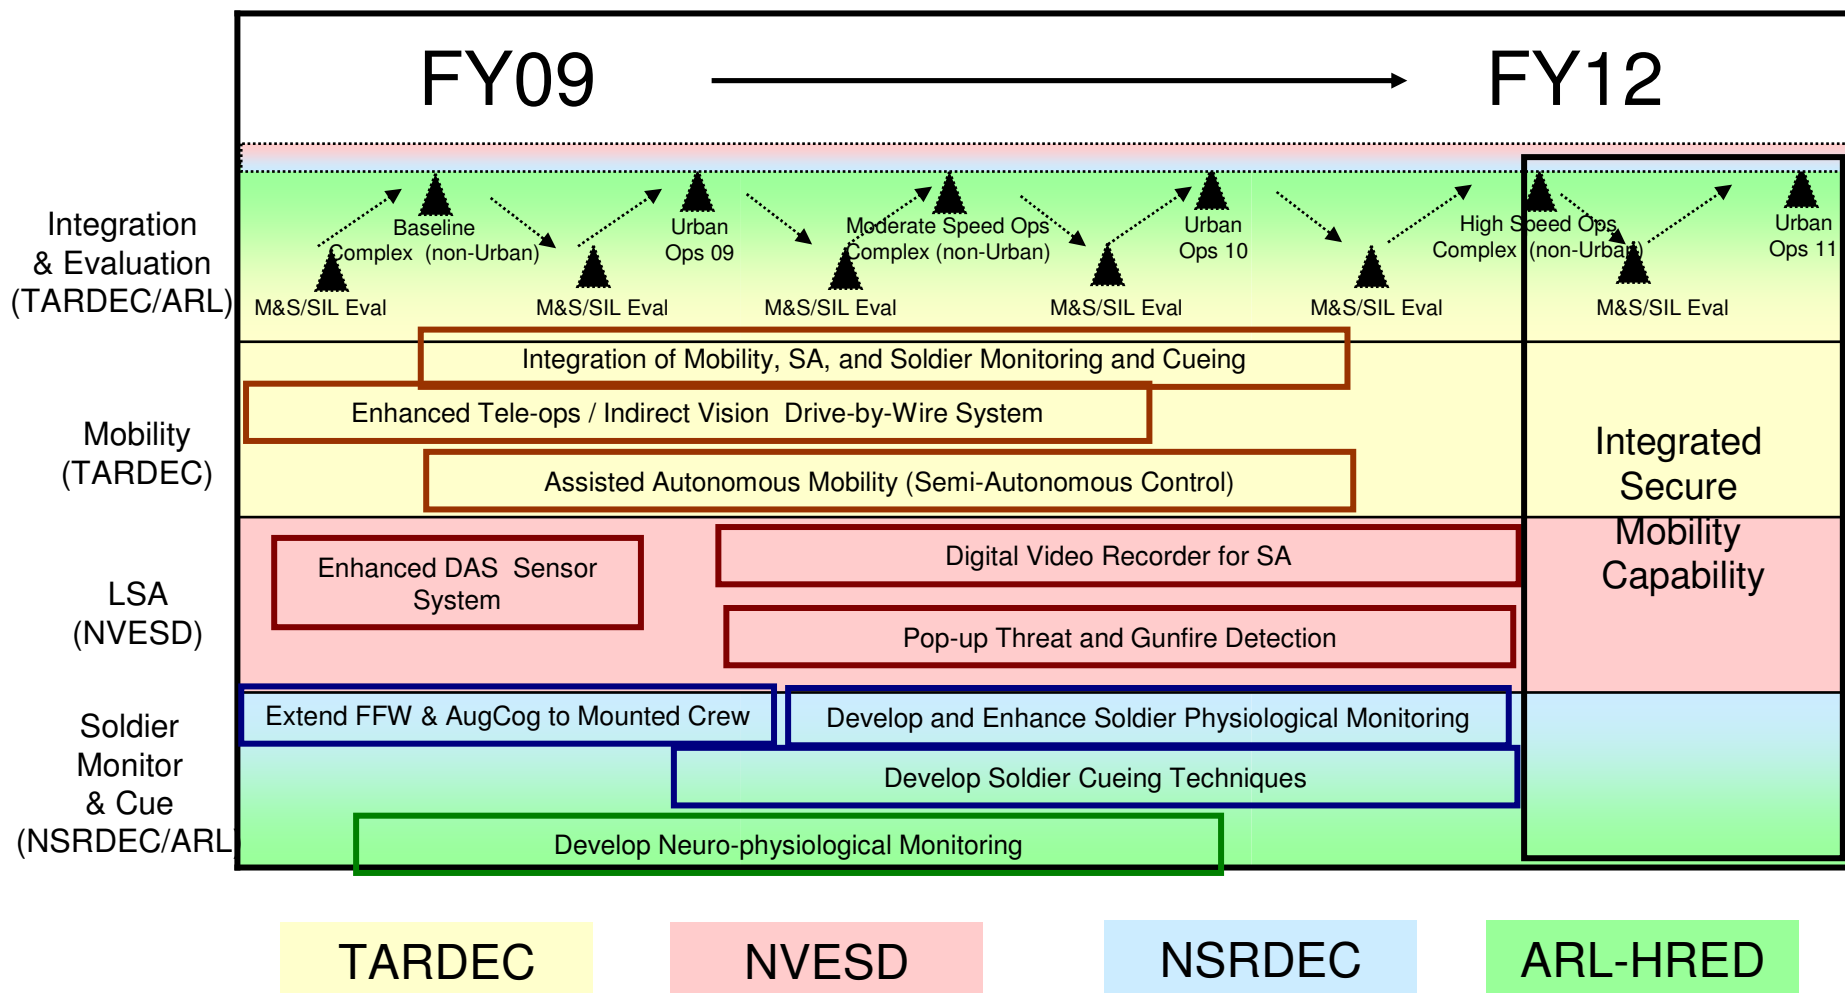

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

Development Plan and Progression

UNCLASSIFIED

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

Partners / Responsibilities

UNCLASSIFIED

TARDEC

- Develop Enhanced Indirect Vision Drive / Tele-operation Systems
- Develop Assisted Autonomy Systems
- Develop Warfighter Machine Interfaces
- Integrate and Evaluate
 - Vehicle LSA Systems (NVESD)
 - Soldier Monitoring & State Classification Systems (NSRDEC/ARL-HRED)
 - Assisted Mobility (Other TARDEC Programs)
 - Dismount LSA Systems (NSRDEC)
- Perform SIL and Vehicle/Field Experiments

ARL-HRED

- Define and Develop Experimentation Plans
- Work with TARDEC on Indirect Vision Drive and Assisted Autonomy Systems
- Provide HFE Support for Systems Development and Integration
- Develop Information Flow Requirements and Algorithms for Mobility and LSA
- Work with NSRDEC on Soldier Monitoring and Workload Management Systems

NVESD

- Enhance DAS Sensor Systems / Threat Detection Algorithms
 - Pop-Up Targeting and Gun-Fire Detection (before/during/after shot)
- Develop Digital Vehicle LSA Recording and Cueing System

NSRDEC

- Enhance and Transition Mid-Maturity Dismount Soldier Monitoring Systems from Augmented Cognition Program
- Develop/Enhance Low-Maturity Soldier Monitoring System
- Work with ARL-HRED on Soldier Monitoring Systems
- Develop Dismount LSA System
