

Fabric Structures Team Overview

Shelter Technology, Engineering, Fabrication Directorate

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

**Jean Hampel
Team Leader**

November 2009

UNCLASSIFIED

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Shelter Technology, Engineering and Fabrication Directorate

Fabric Structures Team Personnel

- **Jean Hampel - Team Leader, Mechanical Engineer**
- **Stephanie Enos - Admin support**
- **Tom Larkham - Equipment Specialist**
- **Kristian Donahue - Chemical Engineer**
- **Robin Szczuka – Chemical Engineer**
- **Julia McAdams – Chemical Engineer**
- **Liz Swisher – Electrical Engineer**
- **Chris Aall – Mechanical Engineer**
- **Clinton McAdams – Mechanical Engineer**

Fabric Structures Team

- **100% Customer Funded**
- **No Shelter S&T Funding Line**
- **Funding Sources**
 - **Joint Science & Technology Office, Defense Threat Reduction Agency**
 - **Joint PM-Collective Protection, JPEO-Chem Bio Defense**
 - **Army Medical Department**
 - **Defense Logistics Agency**
 - **Congressionals**
 - **SBIRs**

• Shelter Technologies:

- Airbeam Shelters:
 - Maintenance Shelters
 - Mobile Warehouses
 - Large Command Posts
 - CB Medical
 - Backpackable
- Insulation & energy
 - Aerogel insulation
 - Cellular insulation
 - Radiant Floor Heating

• Collective Protection – CB Defense:

- CB Hangars/Decon Shelters
- Reactive Airlocks
- Self-Decontaminating Fabrics
- Battlefield Contaminants Test Methods
- Family of Col Pro Shelters
- Col Pro for Military Working Dogs

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

- Provides Rapid, Lightweight, Durable Deployment
- Technology transitioned to Force Provider (HDT-Vertigo, Inc.) and Chemically and Biologically Protected Shelter (Federal Fabrics-Fibers, Inc.)
- New congressional program for airbeam backpackable shelters

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

2nd Generation Aviation Maintenance Shelter Demonstrated in July 09

- Designed and fabricated by Hunter Defense Technologies/Vertigo Shelters (prime), Johnson Outdoors (subcontractor)
- Congressionally Directed Effort
- FST POC: Liz Swisher

Interior Dimensions

Floor Space	83 ft × 147 ft
Area	10,600 sq ft
Height	34 ft
System Weight	18,500 lb
Pack Dimensions	Two 20-foot ISO
Number of AirBeams	7
AirBeam Working Pressure	60 psi
Snow Load	20 psf
Wind Load	
Steady	90 mph
Gust	110 mph
Set-up Time	
Under Canopy	16 hr
Full Operational Capability	24 hr
Set-up Personnel	8

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

- 5-airbeam version of 2nd generation Aviation Maintenance Shelter transitioning to Joint Strike Fighter Decon Shelter Program under Joint Program Manager – Collective Protection
- Production Products developing technology for CB liner under congressional program

- FST POCs:
 - Tom Larkham
 - Robin Szczuka
 - Liz Swisher

- 44 ft (w) × 58 ft (l) × 23 ft (h) Five AirBeam SuperSTAT
- Prototype demo'd first time here at JOCOTAS, HDT-Vertigo, Inc. area

- FST POC: Liz Swisher

- 44 ft (w) × 143 ft (l) × 23 ft (h) Twelve AirBeam SuperSTAT
- Currently under development for Defense Logistics Agency
- FST POC: Liz Swisher

- Fit, form and function study on CB liner for field hospital

- Affect of CB agents on airbeams

- Advanced insulation – aerogel, cellular honeycomb

Next Generation Backpackable Tents

- Primary Objective - high performance backpackable tents with reduced weight and cube
- Congressionally directed program with Nemo, Inc., Nashua, NH
- Designs include novel inflatable airbeam technology and tensioned fabric/pole configurations
- FST POC: Chris Aall

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

UNCLASSIFIED

- Aspen's aerogel blanket consists of amorphous silica with extremely low conductivity, incorporated into a flexible form
- In direct fuel consumption testing of two 20' x 21' airbeam tents, the aerogel lined tent consumed 34% less fuel over a continuous 91 hrs period compared to an un-insulated tent:
- Noise suppression added benefit
- New 2-year program starting in FY10 to mature manufacturing technology
- FST POC: Liz Swisher

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

Description: Lightweight, multi-layer honey-comb structure that transports flat, deployed on site using inflation . Commercial product Developed by Fi-Foil, Inc. being adapted for use and evaluation in mobile military shelters.

Capability/Impact: High level of insulation provided in minimal transport weight and cube configuration. Stand-alone panel provides an R-value of 5.

Current Status: 1st generation full-scale prototype systems being designed and Fabricated for testing in TEMPER frame-supported and airbeam tents.

FST POC: Chris Aall

- Exploring radiant heating system for shelters:
 - quality of heat is more consistent throughout the shelter.
 - the majority of heat remains within the first 6 feet of living area.
 - operation is 100% silent.
 - less energy is consumed theoretically, not yet proven in full-scale testing
- Tested first generation prototype from HotMesh, Inc.
- FST POC: Chris Aall

- Develop low cost ColPro for Military and Civil Defense applications

- Mobile Shelter System
- Small Interior Shelter
- Fly Col Pro

- Industry Partner: Production Products, Inc.,

- Sponsor: Congressionally Directed

- FST POC: Tom Larkham

**"Zero Volume"
Concept**

**Inflatable Airbeam
Concept**

- New airlock technology concepts exploring reactive media and materials while minimizing impact on the target application in regards to stowage and operational volume, power and unique logistical implications.

- Team includes Natick, Tyndall AFB, Technical Products, Inc., Warwick Mills, Inc., Louisiana State University

- Sponsor: DTRA

- FST POCs: Jean Hampel, Kristian Donahue

Hydrostatic

Tensile

- DTRA program
- Technical Products, Inc. contractor
- FST POC: Kristian Donahue

Durability

Full Scale Prototyping

- Self-detoxifying polymer-coating for collective protection shelter materials that rapidly and effectively reacts with and destroys chemical and biological warfare agents (CBWAs).
- Generation of hydrogen peroxide (H₂O₂) *in-situ* from oxygen and water present in the environment.
- Trigger for reaction will be CBWA stand off detector.
- Congressionally directed project with Crosslink, Inc.
- FST POC: Julia McAdams

Samples of Material
Before and After
application of CEES

- Improve existing CB textile barrier materials by incorporating visible detection and self-decontamination into the material.
- Industry Partner: Lynntech, Inc.
- Sponsor: SBIR- Phase II
- FST POCs: Julia McAdams, Kristian Donahue

Test Methods for Toxic Industrial and Battlefield Contaminants

- **Develop swatch permeation test methods for the Test and Evaluation of IP and ColPro materials against TICs.**
- **Industry Partner: Battelle**
- **Sponsor: DTRA**
- **FST POC: Julia McAdams**

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

CLASSIFIED

- 2 CBD SBIR Phase II's
 - Technical Products, Inc
 - Agave Biosystems/Gentex, Inc.
- Multiple concepts being explored
 - Powered and non-powered
 - CB protection integrated into kennel
 - CB protective “garage” for standard kennels
- FST POCs: Julia McAdams, Clinton McAdams
