Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 20 JUN 2011		2. REPORT TYPE		3. DATES COVERED 00-00-2011 to 00-00-2011	
4. TITLE AND SUBTITLE U.S. National / Naval Ice Center (NIC) Support to Naval and Maritime Operations				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) National/Naval Ice Center,4231 Suitland Rd,Suitland,MD,20746				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES Presented at the 4th Symposium on the Impacts of an Ice-Diminishing Arctic on Naval & Maritime Operations, June 20,-22, 2011, Washington, DC					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 16	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

NIC Mission

- A multi-agency operational center operated by the United States Navy, National Oceanic and Atmospheric Administration, and United States Coast Guard.
- Located in Suitland, Maryland and employs over 50 military and civilian personnel.
- GLOBAL sea and lake ice analysis and forecasting.
- Over 140 International Customers, including SUBFOR, ONI, NOAA, NWS, NSF, USCG, MSC, and NASA.

NIC at NSOF
Suitland, MD

Mission: Provide the highest quality, timely, accurate, and relevant snow and ice products and services to meet the strategic, operational, and tactical requirements of U.S. national interests across a global area of responsibility.

International Partnerships

- **North American Ice Service (NAIS)**

- Multi-agency partnership between U. S. National Ice Center, Canadian Ice Service and International Ice Patrol.
- Mission: Transform individual organizational strengths into a unified source of ice information and meet all marine ice information needs and obligations of the United States and Canadian governments.

- **International Arctic Buoy Programme (IABP)**

- Global participants working together to maintain a network of drifting buoys in the Arctic Ocean to provide real-time operational requirements and research purposes including support to the World Climate Research Programme and the World Weather Watch Programme.

- **International Ice Charting Working Group**

- Formed in October 1999 to promote cooperation between the world's ice centers on all matters concerning sea ice and icebergs.

Operations and Product Generation

Human, Derived, Automated, and Reconfigured

TODAY'S CHALLENGES

- **Minimally manned and resourced to meet current mission requirements.**
- **As a result, must continuously reprioritize support to meet expanding missions in the Arctic by USCG, Navy, and NOAA.**
 - **Change in type and number of missions to support (non-ice hardened ships and icebreakers).**
 - **Expanded forecast needs (5-7 days, 1-3 months, 1 year, 5-10 years).**
 - **Detailed ice information at high spatial resolution: type, thickness, age, movement.**
- **Availability of broad-based ice information.**

In order for NIC to plan, resource and provide operational support to its customers, those customers must clearly articulate their ice product requirements for current and future missions.

Summer Minimum Sea Ice Conditions

Sept. 26, 2005

5.941 million
square kilometers

Sept. 11, 2007

4.565 million
square kilometers

Sept. 21, 2009

5.843 million
square kilometers

Sept. 17, 2010

5.810 million
square kilometers

FUTURE MISSION REQUIREMENTS

- Strengthen partnerships and collaboration with other Arctic countries on safety of navigation, cryospheric science/research, data collection, and ice charting.
- Increase data sources
 - Real-time operational availability of all-weather, day and night, high resolution Synthetic Aperture Radar (SAR) imagery is crucial.
 - Improved coverage of the high Arctic, NWP, and NSR.
 - Distributed seasonal ice buoys and open ocean drifting buoys; hydrographic and atmospheric sensors; and the potential exploitation of UAVs and AUVs
- Improve modeling and forecasting capabilities (OTSR/WEAX)
- More trained ice analysts, ice pilots, and Arctic marine weather forecasters as demand signal for support in the region increases.
- Increased automated analysis and data merging capabilities.
- Continued access to Ice Reconnaissance data and platforms: USCG/NSF icebreakers, D-17/IIP C-130 flights, and Navy/NOAA ships

- [About MASIE](#)

Where is Arctic sea ice NOW?

The **MASIE** (may-zee) project is produced in cooperation with the U.S. National Ice Center to give the best available Arctic-wide answer to that question.

MASIE lets you view and download:

- Northern hemisphere-wide sea ice coverage, for yesterday and the last four weeks
- Sea ice coverage by region
- A file of ice extent in sq km for the entire northern hemisphere and by region, updated daily

MASIE uses the most recent full day of data from the National Ice Center, obtained nightly. As is the rule with operational centers, gaps in production can occur without warning.

To obtain the last four weeks of data, see the product archive on the [FTP site](#). For details about this data set, see the [full documentation](#).
