14. ABSTRACT Parental deployment can disrupt the care children receive both as a result of deployment-related separation and the potentially destabilizing impact of deployment on the remaining caregiver and daily routines. This study collaboration is between civilian scientists and the behavioral health MEDDAC of the 10 th Mountain Light Infantry Division. The project entails the assessment of parents (N=400) whose spouse/partner is currently deployed and has a child between the age of 3 and 7. The objectives of this study are to: 1) examine the role of caregiver behaviors in mitigating or exacerbating the risk associated with parental deployment in the prediction of child adaptation; 2) identify and measure developmentally salient skills as indicators of current adaptation among children during preschool and early childhood, and; 3) delineate whether particular groups of children are at greater risk or demonstrate greater resilience in response to parent deployment. Current progress includes successful IRB exemption and survey development and deployment. Based on feedback from Fort Drum, we created an internet-based version of the survey, to facilitate access to participants. Data collection has begun (n=161) and continues at this time. Initial data review indicates preliminary support for our ability to profile at risk children and parents.

INTRODUCTION

There is an emerging consensus that parental combat deployment may increase risk for child development; but details on what the remaining parent can do to reduce the risk remain unclear. The current proposal provides information on which children are at greatest risk and on the circumstances that contribute to that risk as a result of parental combat deployment. The purpose of this research is to: 1) examine the role of caregiver behaviors in mitigating or exacerbating the risk associated with parental deployment in the prediction of child adaptation; 2) identify and measure developmentally salient skills which are indicators of current adaptation among preschool and early childhood boys and girls, and; 3) delineate whether particular children are at greater risk or demonstrate greater resilience in response to parent deployment. The intended scope of this Hypothesis Development award is to collect data from a sample of spouses and partners (n=400) of Service Members from Fort Drum, NY, deployed to Iraq or Afghanistan who have a child age 3-7.

BODY

The majority of work accomplished in month 18-24 of this award was ongoing recruitment and data analysis. A total of 161 subjects have completed the survey during this time period. In addition, an unrelated event caused research to be halted at Fort Drum from June 2011- February 2012. In the interim, we have established collaborations with Blue Star Families, a non-profit organization that advocates for military family issues to collect data nationally. As the Fort Drum research issue has now been resolved and the Blue Star Families organization is poised to aid in national recruitment, we believe this project will be finished in the upcoming year.

Measures

The on-line survey contained questionnaires pertaining to parent and child functioning in a variety of domains, as well as non-identifying demographic information:

- I. Adult measures.
 - a. Parenting Issues:
 - i. Parent-child relationship quality: the 29-item Parent Child Relationship Questionnaire (PCRQ; Furman & Adler, 2001).
 - ii. Distress in the parenting role: the 36-item Parenting Stress Index-Short Form (PSI-SF; Abidin, 1995).
 - b. Parent Psychological Health:
 - i. Emotion regulation: the Difficulties in Emotion Regulation Scale (DERS; Gratz & Roemer, 2004).
 - ii. Depression symptoms: the 20-item CES-D (Radloff, 1977) self-report questionnaire.
 - iii. Dissociative symptoms: the 28-item Dissociative Experience Scale II (Carlson & Putnam, 1993).
- II. Child measures

- a. Emotional and Behavioral Problems: the 113-item caregiver rated Child Behavioral Checklist (Achenbach & Edelbrock, 1983). Ratings on this measure assess both clinical and sub-clinical levels of psychopathology across internalizing and externalizing disorders.
- b. Developmental Skill Achievement
 - i. Preschool Aged children
 - 1. Self regulation: the 36-item Early Childhood Behavior Questionnaire – Very Short Form (CBQ-VSF; Putnam & Rothbart, 2006) assesses children’s developing self regulation. The CBQ-VSF assesses three domains (i.e. negative affectivity, surgency, and effortful control) that are thought to reflect children’s reactivity and ability to engage in skills related to self regulation.
 - 2. Emotion regulation: Children’s ability to regulate their emotions is measured using the 24-item Emotion Regulation Checklist (Shields & Cicchetti, 1997, 2001), which assesses parents’ perceptions of the child’s emotionality and regulation, including emotional understanding, empathy, and dysregulation of both positive and negative emotions.
 - 3. Social skills: Preschoolers’ development of social skills within the peer context is assessed using the parent rated 49-item Social Skills Rating System (Gresham & Elliot, 1990) which captures children’s level of cooperation, assertiveness, and prosociability in interaction with peers.
 - ii. Early School age children
 - 1. Friendship formation: During the early school years, children not only must engage in prosocial behavior, but they must also begin to focus on social acceptance and friendship formation. Parent’s complete a 14-item questionnaire adapted from Lansford, Putallaz, Grimes, Schiro-Osman, Kupersmidt, & Coie’s (2006) project designed to assess social acceptance, popularity, friendship formation, and friendship quality among early school age children.
 - 2. School performance: school adjustment and performance Is assessed using a 19-item questionnaire.

III. Environmental Factors

- a. Stress endured by the family and the child: the 10-item Life Events Scale (LES; Kanner, Feldman, Weinberger, & Ford, 1987).
- b. Community support: Spouses completed a questionnaire about their use of the Battlemind program, a military sanctioned program designed to prepare families for the stresses of deployment.
- c. Social support: the 40-item Interpersonal Support Evaluation List

(ISEL; Cohen & Hobermen, 1983).

Demographics

Our objective was to sample families of deployed combat troops. From June 2010 to March 2012, we collected data from 161 spouses and partners of the First Brigade Combat Team of the Tenth Mountain Light Infantry Division, deployed to Afghanistan or Iraq. Our respondents identified themselves as women (100%), with an age range of 22-47 years. 72% of our sample identified themselves as Caucasian, 9% as Asian, 6% as African American, 4% as Latina, 4% American Indian, 7% as Other. As we targeted spouses of children aged 3-7, 47% of our sample reported on a child age 3-5 and 53% on a child age 5-7.

Whereas our current sample size prevents us from making definitive statements about our objectives, we conducted preliminary analyses to determine the extent of initial support, if any, for our objectives.

Objective 1) Identify and measure developmentally salient skills that are indicators of current adaptation among preschool and early childhood boys and girls. We propose that children who are not achieving these skills are at greatest risk of negative adjustment.

We conceptualized a single dimension for the continuum of mother-child risk and resilience, such that we hypothesized low risk (or “well-adjusted”) children to be meeting developmental milestones and not meeting criteria for an internalizing or externalizing psychiatric disorder, “at risk” children would be significantly behind the resilient children in meeting developmental milestones and would not currently meet criteria for a disorder, but may appear sub-threshold for one, and “clinically significant” risk children would not be meeting developmental milestones while meeting criteria for a psychiatric disorder.

As this model applies to our measures, we would consider a child demonstrating clinically significant levels of internalizing or externalizing disorder symptoms vis a vis their scores on the Child Behavior Checklist (CBCL). Our measures of developmental milestones also reflect a range of ability in areas that are key developmental milestones during that period. To investigate Objective 1, we conducted an exploratory k-means cluster analysis, using the CBCL total score and the age appropriate developmental milestone measures.

For preschool children, CBCL t-scores were entered into a k-means analysis along with summary scores of self dysregulation, emotion dysregulation, and social skill mastery, which were each direction corrected and standardized, so as to facilitate interpretation and clustering. These analyses were undertaken with the 81 preschool children currently in the study.

Whereas we will use distance statistics to confirm our 3-cluster model in the final data analysis, ANOVA models using the cluster identities were used in this interim analysis. Therefore, we found support for a three-group classification, Multivariate F (12,146) =

20.12, $p < .0001$. Indeed, follow-up Univariate ANOVAs with post-hoc pairwise comparisons confirmed the three-group distinction with CBCL total score [$F(2,78) = 193.93$, $p < .0001$], emotion dysregulation [$F(2,78) = 40.54$, $p < .0001$], self dysregulation [$F(2,78) = 25.82$, $p < .0001$], and social skills mastery [$F(2,78) = 10.96$, $p < .0001$]. As presented in Figure 1, the means of the three groups were consistent with our hypothesized model of risk and resilience, such that the “well adjusted” group ($n=32$) had a CBCL total score that was within normal limits and lowest scores of dysregulation combined with the highest score on social skills mastery. In contrast, the “at risk” children ($n=33$) had CBCL total score closer to that considered “sub-threshold” and higher scores of dysregulation combined with a lower score on social skills mastery. Finally, the “clinically significant” children ($n=16$) reported CBCL total scores that would be considered meeting a disorder and the highest scores of dysregulation combined with the lowest score on social skills mastery (all post-hoc p 's $< .05$).

Our second analysis was with the School-aged children ($n = 80$). Central developmental constructs during the early elementary school years are the development of high quality friendships, acceptance by the peer group, and the emergence of skills that lay the foundation for school achievement. We again found support for our three-group classification, Multivariate $F(10,116) = 16.62$, $p < .0001$. Follow-up Univariate ANOVAs with post-hoc pairwise comparisons confirmed the three-group distinction with CBCL total score [$F(2,62) = 115.42$, $p < .001$] and ratings of likability within the peer group [$F(2,62) = 6.06$, $p < .01$]. Good School Adjustment, Peer popularity, and having a best friend were not significant variables. As presented in Figure 2, the means of the three groups were consistent with our hypothesized model of risk and resilience, such that the “well adjusted” group ($n=29$) had a CBCL total score that was within normal limits and highest score of likability. In contrast, the “at risk” children ($n=35$) had CBCL total score closer to that considered “sub-threshold” and lower scores of likability. Finally, the “clinically significant” children ($n=16$) reported CBCL total scores that would be considered in the clinically significant range and the lowest scores of likability (all post-hoc p 's $< .05$).

Objective 2) Examine the role of caregiver behaviors in mitigating or exacerbating the risk associated with parental deployment in the prediction of child adaptation. Specifically, we aim to determine the role of responsive parenting, discussions of separation, and creation of consistency in family environment in predicting child adjustment.

Our next objective was to take the three-cluster group identifications generated in Objective 1 and apply them to caregiver behaviors to see if child risk and resilience would also distinguish separate groups of caregivers by their behaviors. In this manner, we first used the Preschool-aged groups with measures of parental emotion dysregulation, parent depression, poor parental deployment coping, social support, poor parent-child relationship quality, and perceiving their child as difficult to parent in a MANOVA. Overall, as Figure 3 indicates, the three groups reported differing ratings of caregiving behaviors, $F(12,146) = 4.21$, $p < .001$. Indeed, follow-up Univariate ANOVAs with post-hoc pairwise comparisons confirmed a two-group distinction between “well-adjusted”

children from both risk groups on measures of parent emotion dysregulation [$F(2,78) = 3.81, p < .01$], parent depression [$F(2,78) = 11.18, p < .001$], poor deployment coping [$F(2,78) = 3.76, p < .05$], and reported child difficulty [$F(2,78) = 3.86, p < .05$]. A three-group distinction was found on ratings of poor parent-child relationship quality [$F(2,78) = 15.69, p < .001$]. No effects were found in social support.

A similar analysis was conducted with the school age groups with measures of parental emotion dysregulation, parent depression, poor parental deployment coping, poor social support, poor parent-child relationship quality, and perceiving their child as difficult to parent in a MANOVA. Again, as Figure 4 indicates, the three groups reported differing ratings of caregiving behaviors, $F(12,144) = 4.59, p < .001$. Follow-up Univariate ANOVAs with post-hoc pairwise comparisons confirmed a two-group distinction between “well-adjusted” children from both risk groups on measures of parent depression [$F(2,77) = 6.64, p < .01$], poor social support [$F(2,77) = 4.64, p < .05$], poor deployment coping [$F(2,77) = 16.03, p < .001$], and reported child difficulty [$F(2,77) = 3.52, p < .05$]. A three-group distinction was found on ratings of poor parent-child relationship quality [$F(2,77) = 10.58, p < .001$], and parent emotion dysregulation [$F(2,77) = 10.31, p < .001$].

Objective 3) Delineate whether particular children are at greater risk or demonstrate greater resilience in response to parent deployment. Specifically, we will examine the moderating influence of deployed parent gender as well as child gender and age on child adjustment.

To address this objective, pairwise comparisons were conducted on child gender and age on CBCL total scores. No child gender or age effects are evident from the analyses run thus far. The influence of mother vs. father deployment cannot yet be examined given that all current participants in the study are mothers whose spouse is deployed.

Interestingly, an alarming profile was established when we examined caregiver mental health by our three-group cluster identifications. Using a cutoff score on our depression measure consistent with the epidemiological field of $CES-D > 24$ as an indication of likely depression, 75% of our preschool-age mothers with children in the “clinically significant” risk group meet criteria, whereas 47% and 22% met criteria from those in the “at risk” and “well adjusted” groups. Elevations were also found in the school age mothers, with rates of 38%, 29% and 10% in the three groups, respectively.

KEY RESEARCH ACCOMPLISHMENTS

- All IRB Exemptions obtained.
- Web programming of survey completed.
- Data collection/recruitment initiated.
- Preliminary sample (n=161) collected and initial data examination completed.
- Initial analyses support our objectives to profile at risk parents and children age 3-7 of Service Members deployed to combat.
- Research collaboration with Blue Star Families in progress.
- Issues regarding recruitment at Fort Drum have now been resolved.
- Final One Year No Cost Extension applied for.

REPORTABLE OUTCOMES

We are continuing to collect our current sample and will focus now entirely on data from mothers in a full sample of 400 participants. Based on this preliminary work, we have received additional funding to expand the scope of our initial inquiry. The objectives of our additional funding are to compare the sample collected with the current award to a sample of civilian families in addition to military families where the Service Member is deployed in a non-combat environment. In this manner, we hope to identify developmental factors that are specific to military families in addition to factors related to high-stress, combat-exposure intense deployments. We have also received funding to follow families through the deployment lifecycle in an effort to understand the causal nature of these mechanisms identified in the current work. Finally, initial efforts are underway to develop a depression treatment manual for spouses of deployed Service Members.

CONCLUSION

While we continue to collect the current sample, preliminary data analyses indicate a profile of Mothers with difficulties in coping with deployment stress, including greater depressive symptoms, poor emotional regulation skills, greater perceived parenting stress, and higher perceptions of their children as difficult to parent. In families with preschool age children (ages 3-5), this profile was associated with children who had deficits in social skills, in addition to self and emotional regulation skills. Further, these children were also more likely to demonstrate a profile of psychopathology symptoms. In early school aged children (aged 5-7), this profile was associated with difficulties in the peer realm and psychopathology symptoms.

If the current trends in the data continue to be supported in the larger sample, we will have evidence of children with age-specific skill deficits associated with poor deployment stress coping. Further, we will have identified stress coping deficits and key psychopathology symptom indicators for Mothers who have difficulties coping during stressful combat deployments.

3. Grade child attends in school (if applicable)	Preschool	Kinder- garten	1 st	2 nd	3 rd
4. Race of child	1. Caucasian 2. African American 3. Asian American 4. Latino American 5. American Indian or Alaska Native 6. Other				
5. Gender of parent completing questionnaires	Male		Female		
6. Age of parent completing questionnaires					
7. Gender of the parent deployed	Male		Female		
8. Age of parent deployed					
9. How long has the parent currently been deployed for? (List in months)					
10. Race of father	1. Caucasian 2. African American 3. Asian American 4. Latino American 5. American Indian or Alaska Native 6. Other				
11. Race of mother	1. Caucasian 2. African American 3. Asian American 4. Latino American 5. American Indian or Alaska Native 6. Other				
12. What is your family income per year?					
13. How many times, during the child's lifetime, has the parent previously been deployed? How old was your child at the time of each of these deployments?					
14. What has been the longest deployment?					

(List in months)?	
15. What has been the shortest deployment (List in months)?	
16. What is the current military rank of the parent who is deployed?	
17. Where does the family currently live (for instance, on base, off base in Army supported housing, off base in the community, off base with a relative)?	
18. How long have you been stationed at Fort Drum?	
19. Please list the individuals who currently live with you along with their ages. You don't need to list each individual's name but rather can list their relationship to the child about whom you are completing these questionnaires. For example, brother, age 10, sister, age 8, mother, age 35, grandmother, age 58.	
20. Do any of these individuals have a disability?	

PSI

Instructions

This questionnaire contains 36 statements. Read each statement carefully. For each statement, please circle the response that best represents your opinion about your child.

Circle the SA if you strongly agree with the statement.

Circle the A if you agree with the statement.

Circle the NS if you are not sure.

Circle the D if you disagree with the statement.

Circle the SD if you strongly disagree with the statement.

For example, if you sometimes enjoy going to the movies, you would circle A in response to the following statement:

I enjoy going to the movies. SA A NS D SD

While you may not find a response that exactly states your feelings, please circle the response that comes closest to describing how you feel. **YOUR FIRST REACTION TO EACH QUESTION SHOULD BE YOUR ANSWER.**

Circle only one response for each statement, and respond to all statements. **DO NOT ERASE!** If you need to change an answer, mark "X" through the incorrect answer and circle the correct response. For example:

I enjoy going to the movies. SA A NS D SD

SA=Strongly Agree	A=Agree	NS=Not Sure	D=Disagree	SD=Strongly Disagree
-------------------	---------	-------------	------------	----------------------

1. I often have the feeling that I cannot handle things very well.	SA	A	NS	D	SD
2. I find myself giving up more of my life to meet my children's needs than I ever expected.	SA	A	NS	D	SD
3. I feel trapped by my responsibilities as a parent.	SA	A	NS	D	SD
4. Since having this child, I have been unable to do new and different things.	SA	A	NS	D	SD
5. Since having a child, I feel that I am almost never able to do things that I like to do.	SA	A	NS	D	SD
6. I am unhappy with the last purchase of clothing I made for myself.	SA	A	NS	D	SD
7. There are quite a few things that bother me about my life.	SA	A	NS	D	SD
8. Having a child has caused more problems than I expected in my relationship with my spouse (male/female friend).	SA	A	NS	D	SD
9. I feel alone and without friends.	SA	A	NS	D	SD
10. When I go to a party, I usually expect not to enjoy myself.	SA	A	NS	D	SD
11. I am not as interested in people as I used to be.	SA	A	NS	D	SD
12. I don't enjoy things as I used to.	SA	A	NS	D	SD
13. My child rarely does things for me that make me feel good.	SA	A	NS	D	SD
14. Most times I feel that my child does not like me and does not want to be close to me.	SA	A	NS	D	SD
15. My child smiles at me much less than I expected.	SA	A	NS	D	SD

36. I don't know much about how my child spends his/her spare time.	1	2	3	4

LES

Listed below are difficult things that sometimes happen to people. For each of the events, please think about whether your family has experienced these events in the last two years and then check 'Yes' if it has happened or 'No' if it has not. If an event did occur then please rate how stressful this event was for you, your spouse, and your child (please only rate the child that you have been completing the packet on).

1. A member of the family or extended family had a physical health problem	No	Yes				
If yes, how has it affected:	Not at all	A little	Somewhat	Very much	Extremely	
You						
Your spouse						
Your child						

2. A member of the family or extended family had a mental health problem.	No	Yes				
If yes, how has it affected:	Not at all	A little	Somewhat	Very much	Extremely	
You						
Your spouse						
Your children						

3. Death of someone close to you.	No	Yes				
If yes, how has it affected:	Not at all	A little	Somewhat	Very much	Extremely	
You						
Your spouse						
Your child						

4. Unemployment.	No	Yes				
If yes, how has it affected:	Not at all	A little	Somewhat	Very much	Extremely	
You						
Your spouse						
Your children						

5. Divorce.	No	Yes				
If yes, how has it affected:	Not at all		A little	Somewhat	Very much	Extremely
You						
Your spouse						
Your children						

6. Financial Problems	No	Yes				
If yes, how has it affected:	Not at all		A little	Somewhat	Very much	Extremely
You						
Your spouse						
Your children						

7. Marital Problems	No	Yes				
If yes, how has it affected:	Not at all		A little	Somewhat	Very much	Extremely
You						
Your spouse						
Your children						

8. Problems at Work	No	Yes				
If yes, how has it affected:	Not at all		A little	Somewhat	Very much	Extremely
You						
Your spouse						
Your children						

9. Conflict with relatives, neighbors, or in the neighborhood.	No	Yes				
If yes, how has it affected:	Not at all		A little	Somewhat	Very much	Extremely
You						
Your spouse						
Your children						

10. Other, please specify:	No	Yes				
If yes, how has it affected:	Not at all	A little	Somewhat	Very much	Extremely	
You						
Your spouse						
Your children						

CES-D

Instructions: Below is a list of the ways you might have felt or behaved. Please indicate how often you have felt this way during the past week.

0 <u>Rarely</u> or none of the time (less than once a day)	1 <u>Some</u> or a little of the time (one to two days)	2 <u>Occasionally</u> or a moderate amount of the time (three to four days)	3 <u>Most</u> or all of the time (five to seven days)
--	---	--	---

	Rarely	Some	Occasionally	Most
1. I was bothered by things that don't usually bother me.	0	1	2	3

*Please be sure you have answered all items.
Underline any you are concerned about.*

Does the child have any illness or disability (either physical or mental)? No Yes—Please describe:

What concerns you most about the child?

Please describe the best things about the child:

LANGUAGE DEVELOPMENT SURVEY FOR AGES 18-35 MONTHS

For office use only
ID #

The Language Development Survey assesses children's word combinations and vocabulary. By carefully completing the Language Development Survey, you can help us obtain an accurate picture of the child's developing language. *Please print your answers. Be sure to answer all items.*

- I. Was the child born earlier than the usual 9 months after conception?
 No Yes—how many weeks early? _____ weeks early.
- II. How much did the child weigh at birth? _____ pounds _____ ounces; or _____ grams.
- III. How many ear infections did the child have before age 24 months?
 0-2 3-5 6-8 9 or more
- IV. Is any language beside English spoken in the child's home?
 No Yes—please list the languages: _____

- V. Has anyone in the child's family been slow in learning to talk?
 No Yes—please list their relationships to the child; for example, brother, father:

- VI. Are you worried about the child's language development?
 No Yes—why? _____

- VII. Does the child spontaneously say words in any language? (not just imitates or understands words)?
 No Yes—if yes, please complete item VIII and page 4.
- VIII. Does the child combine 2 or more words into phrases? For example: "more cookie," "car bye-bye."
 No Yes—please print 5 of the child's longest and best phrases or sentences.
For each phrase that is not in English, print the name of the language.
1. _____
 2. _____
 3. _____
 4. _____
 5. _____

Be sure you answered all items. Then see other side.

Please circle each word that the child says **SPONTANEOUSLY** (not just imitates or understands). If your child says non-English versions of words on the list, circle the English word and write the first letter of the language (e.g., S for Spanish). Please include words even if they are not pronounced clearly or are in "baby talk" (for example: "baba" for bottle).

- 0 1 2 _____
- 0 1 2 _____
- 0 1 2 _____

Since your spouse's deployment how often has your child shown the following behaviors or feelings

	A little bit	Somewhat	A lot
1. Crying	1	2	3
2 Sadness	1	2	3
3 Calling for deployed parent	1	2	3
4 Confusion or lack of understanding	1	2	3
5 Anger/acting out	1	2	3
6 Sleep problems	1	2	3
7 Behaving in ways that were more like how they acted when they were younger	1	2	3
8. Indifference/detachment	1	2	3
9. Fear	1	2	3
10. Worry	1	2	3
11. Loneliness	1	2	3
12. Pride	1	2	3

What was the child told about their parent's deployment?

While playing indoors, how often did your child

11. like rough and rowdy games? 1 2 3 4 5 6 7 NA

When being gently rocked or hugged, how often did your child

12. seem eager to get away? 1 2 3 4 5 6 7 NA

When encountering a new activity, how often did your child

13. get involved immediately? 1 2 3 4 5 6 7 NA

When engaged in an activity requiring attention, such as building with blocks, how often did your child

14. tire of the activity relatively quickly? 1 2 3 4 5 6 7 NA

During everyday activities, how often did your child

15. pay attention to you right away when you called to him/her? 1 2 3 4 5 6 7 NA

16. seem to be irritated by tags in his/her clothes? 1 2 3 4 5 6 7 NA

17. become bothered by sounds while in noisy environments? 1 2 3 4 5 6 7 NA

18. seem full of energy, even in the evening? 1 2 3 4 5 6 7 NA

While in a public place, how often did your child

19. seem afraid of large, noisy vehicles? 1 2 3 4 5 6 7 NA

When playing outdoors with other children, how often did your child

20. seem to be one of the most active children? 1 2 3 4 5 6 7 NA

When told "no", how often did your child

21. stop the forbidden activity? 1 2 3 4 5 6 7 NA

22. become sadly tearful? 1 2 3 4 5 6 7 NA

Following an exciting activity or event, how often did your child

23. seem to feel down or blue? 1 2 3 4 5 6 7 NA

While playing indoors, how often did your child

24. run through the house? 1 2 3 4 5 6 7 NA

Before an exciting event (such as receiving a new toy), how often did your child

25. get very excited about getting it? 1 2 3 4 5 6 7 NA

When s/he asked for something and you said "no", how often did your child

26. have a temper tantrum? 1 2 3 4 5 6 7 NA

When asked to wait for a desirable item (such as ice cream), how often did your child

27. wait patiently? 1 2 3 4 5 6 7 NA

When being gently rocked, how often did your child

28. smile? 1 2 3 4 5 6 7 NA

While being held on your lap, how often did your child

29. mold to your body? 1 2 3 4 5 6 7 NA

When a familiar adult, such as a relative or friend, visited your home, how often did your child

30. want to interact with the adult? 1 2 3 4 5 6 7 NA

When asked to do so, how often was your child able to

31. be careful with something breakable? 1 2 3 4 5 6 7 NA

When visiting a new place, how often did your child

32. not want to enter? 1 2 3 4 5 6 7 NA

When s/he was upset, how often did your child

33. cry for more than 3 minutes, even when being comforted?	1	2	3	4	5	6	7 NA
34. become easily soothed?	1	2	3	4	5	6	7 NA

When you were busy, how often did your child

35. find another activity to do when asked?	1	2	3	4	5	6	7 NA
---	---	---	---	---	---	---	------

When around large gatherings of familiar adults or children, how often did your child

36. enjoy playing with a number of different people?	1	2	3	4	5	6	7 NA
--	---	---	---	---	---	---	------

Emotion Regulation Checklist

Please rate the following on a scale of 1 = Rarely/Never like this child to 4 = Almost always like this child.

	<u>Rarely/ Never</u>	<u>Sometimes</u>	<u>Often</u>	<u>Almost Always</u>
1. Is a cheerful child.	1	2	3	4
2. Exhibits wide mood swings (child's emotional state is difficult to anticipate because s/he moves quickly from a positive to a negative mood).	1	2	3	4
3. Responds positively to neutral or friendly overtures by adults.	1	2	3	4
4. Transitions well from one activity to another; doesn't become angry, anxious, distressed or overly excited when moving from one activity to another.	1	2	3	4
5. Can recover quickly from upset or distress doesn't pout or remain sullen, anxious or sad after emotionally distressing events.	1	2	3	4
6. Is easily frustrated.	1	2	3	4
7. Responds positively to neutral or friendly overtures by peers.	1	2	3	4
8. Is prone to angry outbursts/tantrums easily.	1	2	3	4
9. Is able to delay gratification.	1	2	3	4
10. Takes pleasure in the distress of others (laughs when another person gets hurt or punished; seems to enjoy teasing others).	1	2	3	4

	<u>Rarely/ Never</u>	<u>Sometimes</u>	<u>Often</u>	<u>Almost Always</u>
11. Can modulate excitement (doesn't get "carried away" in high energy play or overly excited in inappropriate contexts)	1	2	3	4
12. Is whiny or clingy with adults.	1	2	3	4
13. Is prone to disruptive outbursts of energy and exuberance.	1	2	3	4
14. Responds angrily to limit setting by adults.	1	2	3	4
15. Can say when s/he is feeling sad, angry or mad, fearful or afraid.	1	2	3	4
16. Seems sad or listless.	1	2	3	4
17. Is overly exuberant when attempting to engage others in play.	1	2	3	4
18. Displays flat affect (expression is vacant or inexpressive; child seems emotionally absent).	1	2	3	4
19. Responds negatively to neutral or friendly overtures by peers (may speak in an angry tone of voice or respond fearfully).	1	2	3	4
20. Is impulsive.	1	2	3	4
21. Is empathetic towards others; shows concern when others are upset or distressed.	1	2	3	4
22. Displays exuberance that others find intrusive or disruptive.	1	2	3	4
23. Displays inappropriate negative emotions (anger, fear, frustration, distress) in response to hostile, aggressive or intrusive acts by peers.	1	2	3	4
24. Displays negative emotions when attempting to engage others in play.	1	2	3	4

Frank M. Gresham and Stephen N. Elliott

Directions

This questionnaire is designed to measure **how often** your child exhibits certain social skills and **how important** those skills are to your child's development. Ratings of problem behaviors are also requested. First, complete the information about your child and yourself.

Next, read each item on pages 2-4 (items 1-49) and think about your child's present behavior. Decide **how often** your child does the behavior described.

- If your child **never** does this behavior, circle the **0**.
- If your child **sometimes** does this behavior, circle the **1**.
- If your child **very often** does this behavior, circle the **2**.

For items 1-39, you should also rate **how important** each of these behaviors is for your child's development.

- If it is **not important** for your child's development, circle the **0**.
- If it is **important** for your child's development, circle the **1**.
- If it is **critical** for your child's development, circle the **2**.

Here are two examples:

	How Often?			How Important?		
	Never	Sometimes	Very Often	Not Important	Important	Critical
Shows a sense of humor.	0	1	2	0	1	2
Answers the phone appropriately.	0	1	2	0	1	2

*This parent thought that the child **very often** showed a sense of humor and that showing a sense of humor was **important** to the child's development. This parent also thought that the child **never** answered the phone appropriately and that answering the phone appropriately was **critical** to the child's development.*

There are no right or wrong answers. You may take as much time as you like.
Please do not skip any items.

1. Does your child have friends? No Yes
2. Who are your child's friends? Could you please list their initials and tell me some information about each one.

Friends	What grade is she/he in? 1 = Same grade 2 = older 3 = younger	How long has your child known this friend? In years – for example 3 years	How did they become friends? 1 = school 2 = neighborhood 3 = family connection 4 = activity 5 = church	Do they spend time together outside of school? Yes/no And if yes how many times per month	What kinds of things do they do together?	Who initiates their time together? Your child or their friend	How do you feel about each friendship? 1= very unhappy 2 = unhappy 3 = kind of happy/ok 4 = happy 5 = very happy
1.							
2.							
3.							
4.							
5.							
6.							

3. How does your child's number of friends compare to the number of friends that other children his/her age have?
 - a. It is less than others
 - b. It is about the same
 - c. It is more than others
 - d. Don't know

4. How important do you think having friends is to your child?
 - a. Not at all important
 - b. Not very important
 - c. Kind of important
 - d. Important
 - e. Extremely important
 - f. Don't know

5. How satisfied do you think your child is with his/her friendships?
 - a. Not at all satisfied
 - b. Not very satisfied
 - c. Kind of satisfied/somewhat satisfied
 - d. Satisfied
 - e. Extremely satisfied

6. Out of all your child's friendships, would you say your child has a best friend?
 - a. No – if no skip to question 13
 - b. Yes
 - c. Don't know

7. How often do your child and their best friend argue or disagree with each other?
 - a. Never
 - b. Some of the time
 - c. Frequently
 - d. Very frequently
 - e. Don't know

8. How often are your child and their best friend able to resolve their arguments and conflicts with each other?
 - a. Never
 - b. Some of the time
 - c. Frequently
 - d. Very frequently
 - e. Don't know

9. How much do your child and their best friend hang around together, go places together, and do enjoyable things together?
 - a. Never
 - b. Some of the time
 - c. Frequently
 - d. Very frequently
 - e. Don't know

10. How much does your child's best friend help them to learn things they don't know, help them to figure things out, or provide help?
- Never
 - Some of the time
 - Frequently
 - Very frequently
 - Don't know
11. How much does your child share his/her secrets and private feelings with his/ her best friend?
- Never
 - Some of the time
 - Frequently
 - Very frequently
 - Don't know
12. How much does your child seek support and advice or turn to their friend when they are feeling upset?
- Never
 - Some of the time
 - Frequently
 - Very frequently
 - Don't know
13. How well-liked would you say your child is by the other kids in his/her class?
- Not at all well-liked
 - Somewhat well-liked
 - Liked
 - Very well-liked
 - Don't know
14. Children sometimes think of being popular as being different than being well-liked. How popular would you say your child is in his/her class?
- Not at all popular
 - Somewhat popular
 - Popular
 - Very popular
 - Don't know

DIRECTIONS: For each item, circle the one answer that best describes how often your child demonstrates each academic skill.

	YES	SOMETIMES	NOT YET	DON'T KNOW
1. Contributes (relevant) information to classroom discussions – for example, during a class discussion, can express an idea or personal opinion on a topic and the reasons behind the opinion.	1	2	3	DK
2. Understands a story you read to him/her and shows this – for example, by writing a sequel to a story, or acting out a part of a story, or posing a question about why a particular story event happened as it did.	1	2	3	DK
3. Reads words with regular vowel sounds – for example, reads “coat,” “junk,” “lent,” “chimp,” “halt,” or “bite.”	1	2	3	DK
4. Reads words with irregular vowel sounds – for example, reads “through,” “point,” “enough,” or “shower.”	1	2	3	DK
5. Reads first grade books independently and understands what was read – for example, reads most words correctly and answers questions about what was read, make predictions while reading, and retells story after reading	1	2	3	DK
6. Reads first grade books easily – for example, easily reads words in (meaningful) phrases rather than reading word by word.	1	2	3	DK
7. Writes a story with a clear beginning, middle, and end.	1	2	3	DK
8. Demonstrates an understanding of some of the rules of print – for example, appropriately using question marks, exclamation points, and quotation marks.	1	2	3	DK
9. Uses the computer for number of different activities – for example by writing a page for a class book, or looking up information on a topic of interest, or solving math problems, or recording information from a scientific experiment.	1	2	3	DK
10. Identifies similarities and differences in group habits and living patterns – for example, compares and contrasts customs and traditions (forms of transportation, clothing, food, housing, holidays) in different groups of people.	1	2	3	DK
11. Recognizes some ways in which people rely on each other for goods and services – for example, by making a list of all the jobs involved in getting milk to the supermarket, or talking about community helpers.	1	2	3	DK
12. Shows a beginning understanding that maps represent actual places – for example, by making maps of his/her classroom, bedroom, or school and labeling them, or locating where a parent was born on a world map or globe.	1	2	3	DK

13. Make logical predictions in science – for example, looking closely at a group of objects before predicting if they are magnetic or not or whether they will float or sink.	1	2	3	DK
14. Forms explanations and conclusions based on what he/she sees or explores – for example, by explaining the best growing conditions for a plant after experimenting with light and water, or concluding that earthworms come out of the soil because it's raining after paying attention to the sidewalks on a rainy day.	1	2	3	DK
15. Sorts and compares living and non-living things in different ways – for example, by sorting vegetables that grow above or below the ground, or sorting different sounds as either low pitch or high pitch, or measuring objects and classifying them by size or weight.	1	2	3	DK
16. Demonstrates an understanding of place value – for example, by explaining that fourteen is ten plus four, or using two stacks of ten and five single cubes to represent the number 25.	1	2	3	DK
17. Understands and compares whole numbers – for example, recognizing that 30 is the same quantity if it is 30 rabbits or 30 check marks or 15 + 15 red dots; or describing that the number 25 is smaller than 41.	1	2	3	DK
18. Counts change in two different types of coins – for example, two quarters and a nickel, or three dimes and two pennies.	1	2	3	DK
19. Shows a basic understanding of graphs – for example, making tally marks to represent the number of children who want to play jump rope at recess, or making a picture, bar, line, or circle graph to show the different kinds of fruit children bring to school and the quantity of each type.	1	2	3	DK
20. Makes reasonable estimates of quantities – for example, looking at a group of objects and deciding if it is more than 10, about 50, or less than 100.	1	2	3	DK
21. Measures to the nearest whole number using common tools – for example, rulers, or tape measures, or thermometers, or scales.	1	2	3	DK
22. Uses a variety of strategies to solve math problems – for example, using objects, using trial and error, making a list or table, drawing a diagram, looking for a pattern, acting out a problem, or talking with others.	1	2	3	DK
23. Your child's overall motivation to succeed academically is ...	High	Average	Low	Don't Know

DIRECTIONS: For each item, circle the one answer that best describes how often your child demonstrates each academic skill.

	YES	SOMETIMES	NOT YET	DON'T KNOW
1. Speaks about ideas clearly – for example, express opinions, feelings, and ideas.	1	2	3	DK
2. Uses number of strategies to gain information – for example, uses the index or table of contents to locate information, or uses encyclopedias or other reference books/media to learn about a topic.	1	2	3	DK
3. Reads fluently – for example, easily reads words as part of (meaningful phrases rather than word by word including words with three or more syllables, such as residential, genuinely, and pneumonia.	1	2	3	DK
4. Reads second grade books (fiction) independently with clearly understands them – for example, relates why something happened in a story, or identifies emotions of characters in a story, or identifies a turning point in the story.	1	2	3	DK
5. Writes multi-paragraph stories/reports – for example, writes a report by creating and following an outline, or writes stories with a clear plot and distinct characters.	1	2	3	DK
6. Uses the computer for a number of reasons – for example, to write reports or stories them correctly, or to use a database to retrieve information	1	2	3	DK
7. Uses a variety of strategies to solve math problems – for example, (adds 100 and then subtracts 4 when doing the mental math problem $467 + 96$), or writes equations needed to solve a word problem, or orders steps in a multistep problem.	1	2	3	DK
8. Uses measuring tools accurately – for example, measures with rulers to the quarter-inch, or measures liquids to the nearest milliliter.	1	2	3	DK
9. Shows understanding of place value with whole numbers – for example, correctly orders the numbers 19,321, 14,999, 9,900, and 20,101 from least to greatest.	1	2	3	DK
10. Makes reasonable estimates of quantities and checks answers – for example, estimates the cost of a list of 8 different items and compares to actual cost, or estimates the perimeter of a bulletin board and then checks with a yardstick.	1	2	3	DK

11. Understands, reads, writes, and compares fractions – for example, shows that $\frac{1}{2}$ of a candy bar is $\frac{1}{4} + \frac{1}{4}$, or shows that $\frac{1}{4}$ of a set of 12 is 3.	1	2	3	DK
12. Makes logical predictions when conducting scientific investigations – for example, predicts that water will heat faster in the sun in a black cup than in a white cup, or predicts that plants on the south side of the building will grow more quickly than the ones on the north side.	1	2	3	DK
13. Communicates scientific information – for example, writes about predictions, observations, and conclusions when doing an investigation or makes line graphs of the height of plants over time.	1	2	3	DK
14. Sorts and compares living and non-living things in different ways – for example, compares plant and animal needs, or sorts substances according to whether they dissolve in water.	1	2	3	DK
15. Forms explanations and conclusions – for example, explains why one boat floats and another does not, or concludes that the candle stays lit longer under the larger jar because there is more oxygen available.	1	2	3	DK
16. Identifies similarities and differences in habits and living patterns between him/herself and other groups of people – for example, makes a display representing the lifestyles of Native Americans long ago and today, or contrasts colonial life in the 1700's with U.S. life in current times.	1	2	3	DK
17. Shows an understanding of the ways in which the past influences the present – for example, describes the contributions of significant Americans such as Hamilton, Franklin, M.L. King, or describes the impact of technology, such as the cotton gin or the automobile, on life in America.	1	2	3	DK
18. Knows how to use maps and globes to locate and gain information – for example, locates their own state in relation to the U.S. and the rest of the world, or uses grids to locate cities, or reads the map legends, or identifies differences between political boundaries and physical boundaries on maps and globes.	1	2	3	DK

19. Your child's overall motivation to succeed academically is ...

High
Average
Low
Don't Know

DIRECTIONS: For each item, circle the one answer that best describes how often your child demonstrates each academic skills.

	YES	SOMETIMES	NOT YET	DON'T KNOW
1. Uses complex sentence structures – for example, says “If she had brought her umbrella, she wouldn’t have gotten wet,” or “Yesterday it was raining cats and dogs,” or “Why can’t we go on the field trip at the same time as the first grade?”	1	2	3	DK
2. Understands and (interprets) a story or other text read to him/her – for example, retelling a story just read to the group, or telling about why a story ended as it did, or connecting part of the story to his/her own life.	1	2	3	DK
3. Easily and quickly names all upper – and lower-case letters of the alphabet.	1	2	3	DK
4. Produces rhyming words – for example, says a word that rhymes with “chip,” “shop,” “drink,” – or “light.”	1	2	3	DK
5. Predicts what will happen next in stories by using the pictures and storyline for clues.	1	2	3	DK
6. Reads simple books independently – for example, reads books with a repetitive language pattern.	1	2	3	DK
7. Demonstrates early writing behaviors – for example, by using initial consonants to spell words (“d” for the word “dog”), or using letter names to represent sounds (“r” for the word “are”), or phonetic spelling (“hrt” for the word “heart”), to convey words and ideas.	1	2	3	DK
8. Demonstrates an understanding for some of the rules the print – for example, by using both upper and lower case letters when writing, or putting spaces between words, or using a period at the end of a sentence.	1	2	3	DK
9. Uses the computer for a number of different activities – for example, for drawing a picture, or counting objects, or typing numbers, letters, or words.	1	2	3	DK
10. Recognizes distinct differences in habits and living patterns between him/herself and other groups of people he/she knows – for example, knowing that there are many different types of families, or knowing the different types of homes people live in, or the different types of foods that people eat.	1	2	3	DK

11. Understands what people do who have different kinds of jobs – for examples, knowing that people use different tools, equipment, and machinery in their jobs (farmers, doctors, dentists, etc.), or that most jobs require special training.	1	2	3	DK
12. Uses his/her senses to explore and observe – for example, observing and noting the habits of classroom pets, or identifying environmental sounds, or describing the differences in clay before and after water is added.	1	2	3	DK
13. Forms explanations based on what he/she sees and through exploring – for example, by describing or drawing the conditions (water, soil, sun) that help a plant grow, or by explaining that a block will slide more quickly down a steeper slope.	1	2	3	DK
14. Puts living and non-living things in different categories – for example, classifying objects according to “things that are alive and not alive,” or “things that fly and things that crawl,” or “plants and animals.”	1	2	3	DK
15. Sorts, classifies, and compares math materials by various rules and (attributes) – for example, creating a rule for sorting keys, such as “keys with numbers” in one pile and “keys without numbers” in another pile, or sorting shapes by several characteristics such as “large plastic shapes” and “small wooden shapes.”	1	2	3	DK
16. Put objects in an order – for example, by ordering rods or sticks by length, or arranging paints from lightest to darkest, or musical instruments from softest to loudest.	1	2	3	DK
17. Shows an understanding of the relationship between amounts – for example, knowing that a group of ten small stones is the same quantity as a group of ten larger blocks.	1	2	3	DK
18. Solves problems involving numbers using objects – for example, “Vera has six blocks, George has three, how many blocks are there in all?” or “How many do I need to give George so he will have the same number of blocks as Vera?”	1	2	3	DK
19. Shows an understanding of graphing – for example, coloring a graph to show three friends like green apples and four friends like red apples.	1	2	3	DK
20. Uses tools accurately (for measuring) – for examples, by using a balance scale to compare the weight of two objects, or using tablespoons and teaspoons during a cooking project, or using a measuring tape to measure the length of different objects.	1	2	3	DK
21. Uses a variety of strategies to solve math problems – for example, (using objects,) looking for a pattern, or acting out a problem.	1	2	3	DK
22. Your child’s overall motivation to succeed academically is ...	High	Average	Low	Don’t Know

Circle the best response.	Rarely	Occasionally	Sometimes	Frequently
1. How much have family routines been disrupted by your spouse's deployment?	1	2	3	4
2. How much have family rituals or celebrations been negatively impacted by your spouse's deployment?	1	2	3	4
3. How much have you had to take on new roles in the family due to your spouse's deployment?	1	2	3	4
4. How much have you felt overwhelmed by additional responsibilities or roles that you have assumed due to your spouse's deployment?	1	2	3	4
5. How much have issues regarding finances arisen during your spouse's deployment, such as unplanned expenses, difficulty managing money, or money being "tight"?	1	2	3	4
6. Since your spouse's deployment, how much have you been able to make household decisions independently of your spouse?	1	2	3	4
7. How frequently do you bring up discussions about your spouse's absence or does your child bring up conversations about your spouse being away?	1	2	3	4
8. How much do you and your children keep in touch with your spouse via phone?	1	2	3	4
9. How much do you and your children keep in touch with your spouse via email?	1	2	3	4
10. How much do you and your children keep in touch with your spouse via letters, tapes, gifts, or videos?	1	2	3	4
11. How much have you been able to stay emotionally connected with your spouse during the deployment?	1	2	3	4
12. How much have your children been able to stay emotionally connected with your spouse during the deployment?	1	2	3	4
13. How much has your spouse seemed emotionally distant since deployment?	1	2	3	4
14. To what degree do you feel that you have had to sacrifice some of your own wishes and needs since your spouse's deployment?	1	2	3	4
15. How often do you and your child talk about your spouse's deployment?	1	2	3	4

Need to add questions regarding accessing army services and navigating army services.

Interpersonal Support Evaluation List (ISEL) -- General Population

This scale is made up of a list of statements each of which may or may not be true about you. For each statement check "definitely true" if you are sure it is true about you and "probably true" if you think it is true but are not absolutely certain. Similarly, you should check "definitely false" if you are sure the statement is false and "probably false" if you think it is false but are not absolutely certain.

1. There are several people that I trust to help solve my problems.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
2. If I needed help fixing an appliance or repairing my car, there is someone who would help me.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
3. Most of my friends are more interesting than I am.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
4. There is someone who takes pride in my accomplishments.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
5. When I feel lonely, there are several people I can talk to.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
6. There is no one that I feel comfortable to talking about intimate personal problems.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
7. I often meet or talk with family or friends.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
8. Most people I know think highly of me.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
9. If I needed a ride to the airport very early in the morning, I would have a hard time finding someone to take me.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
10. I feel like I'm not always included by my circle of friends.
 definitely true (3) definitely false (0)
 probably true (2) probably false (1)
11. There really is no one who can give me an objective view of how I'm handling my problems.
 definitely true (3) definitely false (0)

___ probably true (2) ___ probably false (1)

12. There are several different people I enjoy spending time with.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)

13. I think that my friends feel that I'm not very good at helping them solve their problems.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)

14. If I were sick and needed someone (friend, family member, or acquaintance) to take me to the doctor, I would have trouble finding someone.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)

15. If I wanted to go on a trip for a day (e.g., to the mountains, beach, or country), I would have a hard time finding someone to go with me.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)

16. If I needed a place to stay for a week because of an emergency (for example, water or electricity out in my apartment or house), I could easily find someone who would put me up.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)

17. I feel that there is no one I can share my most private worries and fears with.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)

18. If I were sick, I could easily find someone to help me with my daily chores.

___ definitely true (3) ___ definitely false (0)

___ probably true (2) ___ probably false (1)
