U.S. ARMY. SIXTH ARMY

FIELD ORDER 74

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

FO 74.

Maps: KYUSHU - 1/250,000
KYUSHU - 1/50,000

1. a. Current intelligence summaries.

b. (1) United States Army and Navy Forces Pacific, invade KYUSHU in order to:

- Security classification cancelled (a) Intensify the blockade and aerial bombardment of JAPAN.
By authority of the Secretary of war (b) Contain and destroy major enemy forces.
By Lawrence T. Gruits, Capt, AGD (c) Support further advances for the purpose of establishing the conditions favorable to the decisive invasion of the industrial heart of JAPAN.
- Date 9 Apr 1947
Cite WD AGAD 7A23

(2) (a) Missions assigned supporting forces by the Commander-in-Chief, United States Army Forces Pacific: Annex 2.

(b) Organization of United States Pacific Fleet for the Operation: Inclosure 1 to Annex 2.

2. a. Sixth Army, in conjunction and as arranged with Fifth Fleet and Amphibious Forces, Pacific Fleet, and supported by Far East Air Forces, will seize and occupy southern KYUSHU as far north as the general line TSUNO - SENDAI in order to permit the establishment therein of air and naval forces for support of operations into the industrial heart of JAPAN.

b. Phases of the Operation:

(1) Preliminary Phase:

Amphibious assaults prior to X-Day, in conjunction with naval covering force operations, as are required for the establishment of air warning facilities, advanced naval anchorages and seaplane bases and for the control of OSUMI-KAIKYO and sea routes around southern KYUSHU.

~~TOP SECRET~~

~~TOP SECRET~~

RECEIVED
5 AUG 1945
COMMANANT
SEVENTH FLEET

(2) Phase I:

Amphibious assaults to seize and consolidate corps beachheads in the MIYAZAKI, ARIZAKI WAN, and KUSHIKINO areas of southern KYUSHU; the immediate blocking of hostile reinforcements from the north along the east and west coasts of KYUSHU; and the initiation of construction of air and base facilities within established corps beachheads.

(3) Phase II:

Coordinated attacks from corps beachheads to seize additional base and airfield areas, and to open KAGOSHIMA WAN to our shipping.

(4) Phase III:

The subsequent destruction of remaining hostile forces in and the occupation of southern KYUSHU south of the general line TSUNO - SENDAI.

(5) Phase IV:

The conduct of such additional overland and amphibious operations on KYUSHU and in the INLAND SEA as may be directed subsequently.

c. X-Day: 1 November 1945 (Target Date)

Hours for landings will be announced.

d. Troops designated for the operation:

(1) Units:

(a) Sixth Army Troops:

Units and staging: Annex 3a.

(b) I Corps:

1. Commander: Major General Innis P. Swift, U.S.A.

2. Units and Staging: Annex 3b.

(c) XI Corps:

1. Commander: Lieutenant General Charles P. Hall, U.S.A.

2. Units and Staging: Annex 3c.

(d) V Amphibious Corps:

1. Commander: Major General Harry Schmidt, U.S.M.C.
2. Units and Staging: Annex 3d.

(e) IX Corps:

1. Commander: Major General Charles W. Ryder, U.S.A.
2. Units and Staging: Annex 3e.

(f) 40th Division, reinforced:

1. Commander: Brigadier General Donald J. Myers, U.S.A.
2. Units and Staging: Annex 3f.

(g) 158th Regimental Combat Team, reinforced:

1. Commander: Brigadier General Hanford MacNider, U.S.A.
2. Units and Staging: Annex 3g.

(h) Sixth Army Reserve:

1. 11th Airborne Division:
 - a. Commander: Major General Joseph M. Swing, U.S.A.
 - b. Units and Staging: Annex 3h.

(i) Army Service Command-Olympic:

1. Commander: Major General Frederick Gilbreath, U.S.A.
2. Units and Staging: Annex 3i.

- (2) Command of units designated in this order as Sixth Army, corps, division, and separate regimental combat team units, which are not already a part of these commands, will pass to respective commanders effective this date, or upon arrival of each unit in its final staging area, if arrival thereat is subsequent to the date of this order. Commanders will be notified, by separate communication, of dates of arrival of units in staging areas.

- e. Boundaries between corps: Annex 4, Operations Map.

~~TOP SECRET~~

3. Annex 4, Operations Map:

a. I Corps will:

- (1) On X-Day at a time to be announced, land in the YAMAZAKI - MATSUSAKI area of southeastern KYUSHU; attack vigorously to destroy hostile forces encountered; capture MIYAZAKI and the MIYAZAKI airfield; and secure a Corps beachhead to include FUKUSHIMA on the south bank of HITOSUSE-GAWA.
- (2) Protect the northeast flank of Sixth Army and block the approach of hostile forces from the north along the east coast of KYUSHU.
- (3) When directed, advance aggressively inland and secure the general line SADOHARA - HONJO - TAWAOKA - AOIDAKE. Early contact with the XI Corps is highly desirable.
- (4) Promptly initiate:
 - (a) The rehabilitation and construction of airfields and roads as directed in Annex 8, Engineer.
 - (b) The establishment of communication and port and base facilities as directed in Annex 5, Signal, and Annex 8, Engineer.

b. XI Corps will:

- (1) On X-Day at a time to be announced, land in the SHIBUSHI - KASHIWABARU area of ARIAKE WAN; attack vigorously to destroy hostile forces encountered; capture SHIBUSHI and the SHIBUSHI airfield; and secure a Corps beachhead.
- (2) When directed, advance aggressively inland and secure the general line AOKI - IWAKAWA - TAKAKUMA - KANOYA. Early contact with the I Corps is highly desirable.
- (3) Promptly initiate:
 - (a) The rehabilitation and construction of airfields and roads as directed in Annex 8, Engineer.
 - (b) The establishment of communication and port and base facilities as directed in Annex 5, Signal, and Annex 8, Engineer.

c. V Amphibious Corps will:

- (1) On X-Day at a time to be announced, land in the KAMINOKAWA - KUSHIKINO area of southwestern KYUSHU; attack vigorously to destroy hostile forces encountered; secure a Corps beachhead to include SENDAI.

~~TOP SECRET~~

- (2) Protect the northwest flank of Sixth Army and block the advance of hostile forces from the north along the west coast of KYUSHU.
- (3) When directed, advance aggressively inland and secure the general line KAGOSHIMA - KAWAKAMICHO - ICHINO - SENDAI.
- (4) Establish communication and cargo handling facilities and initiate the improvement and construction of roads as directed in Annex 5, Signal, and Annex 8, Engineer.

d. IX Corps will:

- (1) On or after X/3, be prepared:
 - (a) To reinforce elements of Sixth Army in objective areas with all or part of the 98th Division, as may be directed.
 - (b) To land, with or without all or part of the 98th Division, on the south coast of KYUSHU, west of KAIMON-DAKE at a time to be announced, attack vigorously to destroy hostile forces encountered; seize and secure a Corps beachhead, thereafter prepared:
 1. To seize and secure the general line SESEKUSHI - CHIRAN - OTONAI - SHIRASAMAZU; and by overland or shore-to-shore operations clear the southwest coast of KAGOSHIMA WAN of enemy forces.
 2. To utilize the attached naval construction battalions to initiate promptly the construction of airfields and of bulk aviation gasoline storage and handling facilities as directed in Annex 8, Engineer.
 3. To establish communication and cargo handling facilities and to initiate the improvement and construction of roads as directed in Annex 5, Signal, and Annex 8, Engineer.
- (2) On or after X/5, be prepared to reinforce elements of Sixth Army in objective areas with all or part of the 77th Division, as may be directed.

e. 40th Division, reinforced, employing minimum forces, will:

- (1) On X-5 at times to be announced, land on KUCHINOYERABU SHIMA, KURO SHIMA, KUSAKAKI JIMA, and UJI GUNTO; destroy hostile forces encountered; and secure these islands to provide air warning facilities thereon.

~~TOP SECRET~~

~~TOP SECRET~~

(2) On X-4, at times to be announced:

(a) Land in northern KOSHIKI RETTO; destroy hostile forces encountered; and secure NAKAKOSHIKI WAN, NAKAGAWARA URA, and such other areas as are required to provide air warning facilities, emergency anchorages, and seaplane bases therein.

(b) Land in southern KOSHIKI RETTO; destroy hostile forces encountered; and secure sites suitable for the establishment of air warning facilities therein.

(3) By subsequent operations, destroy hostile forces on the remainder of KOSHIKI RETTO.

(4) Assist in the installation of air warning facilities, as directed.

(5) Defend occupied areas, advising the Commanding General, Sixth Army, at the earliest practicable date, of the minimum forces required for this purpose.

f. 158th Regimental Combat Team, reinforced, will:

(1) Afloat in the OKINAWA area on or after X-5, be prepared when directed to land on northern TANEGA SHIMA; destroy hostile forces encountered, and secure northern TANEGA SHIMA to assist in clearing OSUMI-KAIKYO.

(2) Afloat in the objective area on or after X/3, be prepared to reinforce elements of Sixth Army ashore as directed.

g. Sixth Army Reserve:

11th Airborne Division, afloat off the objective area on or after X/22, will be prepared to reinforce elements of Sixth Army, as may be directed.

h. Sixth Army Troops:

(1) Will land in the objective area and will move to bivouac areas in accordance with Loading and Landing Schedule, Sixth Army Troops, Annex 7a.

(2) Missions:

(a) Signal: Annex 5, Signal.

(b) Engineer: Annex 8, Engineer.

~~TOP SECRET~~

~~TOP SECRET~~

- (c) Quartermaster: Annex 1 to Adm O 18, Quartermaster.
- (d) Ordnance: Annex 2 to Adm O 18, Ordnance.
- (e) Medical: Annex 3 to Adm O 18, Medical.
- (f) Chemical: Annex 5 to Adm O 18, Chemical.
- (g) Transportation: Annex 7 to Adm O 18, Transportation.
- (h) Military Government: Annex 8 to Adm O 18, Military Government.
- (i) Provost Marshal: Annex 9 to Adm O 18, Provost Marshal.

i. Army Service Command-Olympic:

Missions: Inclosure 4 to Adm O 18.

- x. (1) During the amphibious movement and landing, the Commander, Amphibious Forces, Pacific Fleet, is in control of all amphibious operations. The Commander of each Naval Attack Force or Group, as the case may be, is in control in his area of operations. Control of forces ashore will pass as follows:
- (a) To each Assault Division Commander, after his arrival and establishment ashore and upon his notification, by the most expeditious means at his disposal, to the Commander of the corresponding Naval Attack Force or Group, as the case may be, that he is ready to assume control of his forces ashore. Each Assault Division Commander will promptly notify his Corps Commander and the Commander of the corresponding Naval Attack Force of the time he assumes control of his forces ashore.
 - (b) To each Corps Commander, the Commanding General, 40th Division, and the Commanding General, 158th Regimental Combat Team, in his area of operations, after his arrival and establishment ashore and upon his notification, by the most expeditious means at his disposal, to the Commander of the corresponding Naval Attack Force or Group, as the case may be, that he is ready to assume control of his forces ashore. The Commanding General, 40th Division, and the Commanding General, 158th Regimental Combat Team, will promptly notify the Commanding General, Sixth Army, and the Commander, Amphibious Forces, Pacific Fleet, of the time he assumes control of his forces ashore. Each Corps Commander will promptly inform the Commanding General, Sixth Army, and the Commander, Amphibious Forces, Pacific Fleet:

~~TOP SECRET~~

~~TOP SECRET~~

1. Of the time each of his Division Commanders assumes control of his forces ashore.
 2. Of the time he, himself, assumes control of his forces ashore.
- (c) To the Commanding General, Sixth Army, upon his announcement to the Commander, Amphibious Forces, Pacific Fleet, that he is ready to assume control of his forces ashore.
- (2) Commanders, who have assumed control of their forces ashore, will continue under control of the next senior Naval Commander until the next senior Army Commander assumes control of forces ashore.
- (3) The Commanding General, Sixth Army, will:
- (a) Arrange for the movement of all units to final staging areas.
 - (b) Arrange overwater transportation to objective area for the movement of Air Force units, except those accompanying assault forces, as designated. (Annex 6j)
 - (c) Arrange overwater transportation to objective area for naval service units as designated. (Annex 6k)
- (4) Each Corps Commander, the Commanding General, 40th Division, and the Commanding General, 158th Regimental Combat Team, will:
- (a) Arrange directly with their respective supporting Naval Commanders the plans for loading and landing operations to include naval gunfire and naval air support, submitting these plans to the Commanding General, Sixth Army, for coordination.
 - (b) Arrange directly with their respective supporting tactical air force commanders the plans for air support of ground operations after land-based aircraft have been established in the objective area and the Commanding General, Fifth Air Force, has relieved the Commander, Amphibious Forces, Pacific Fleet, of the responsibility for providing air support of operations ashore, submitting these plans to the Commanding General, Sixth Army, for coordination.
 - (c) Arrange for the occupation and defense of sites for radar, air warning, and air navigational installations as requested by commanders of respective supporting forces.

~~TOP SECRET~~

~~TOP SECRET~~

- (5) The Commanding General, 11th Airborne Division, will arrange directly with appropriate naval commanders the plans for loading and landing units of his command, submitting these plans to the Commanding General, Sixth Army, for coordination.
- (6) The Commanding General, Army Service Command-Olympic, will arrange directly with appropriate naval commanders the plans for loading and landing Army Service Command-Olympic units, except those units initially attached to Sixth Army and corps, in shipping as arranged by this headquarters, and will submit these plans to the Commanding General, Sixth Army, for coordination.
- (7) Corps Commanders and the Commanding Generals, 40th Division, 11th Airborne Division, 158th Regimental Combat Team, and Army Service Command-Olympic, will submit their complete plans to this headquarters on or before 15 August 1945.
- (8) Corps and separate unit commanders will:
 - (a) Be responsible for the supervision of loading of all units assigned or attached to their respective commands, except units in those areas for which the Commanding General, Sixth Army, retains direct responsibility for loading. (Annex 7 to Adm O 18, Transportation)
 - (b) Insure that units under their command do not fire on friendly aircraft, and that units, other than Anti-aircraft Artillery (CAC), do not fire at aircraft during hours of darkness or engage enemy aircraft unless directly attacked.
 - (c) Will enforce passive defense measures, particularly dispersal of ammunition and P.O.L. dumps.
- (9) Commanders of all echelons will safeguard captured stores and equipment against pilfering and looting.

4. Adm O 18.

5. a. Signal Orders: Annex 5.

HEADQUARTERS SIXTH ARMY
APO 442
1930I 28 July 1945

ANNEX 1 to FO 74, Intelligence.

1. SUMMARY OF ENEMY INFORMATION:

See G-2 Estimate of the Enemy Situation with amendments as issued, and see also current intelligence summaries.

2. ESSENTIAL ELEMENTS OF INFORMATION:

- a. What is the strength, composition, identification, and tactical disposition of enemy forces in southern KYUSHU (i.e., the area south of the TSUNO--SENDAI line)?
- b. What will be the strength, composition, location, and disposition of enemy reserves? How, when, and where will they be employed?
- c. Will the enemy defend on the beaches, in rear of the beaches, or on terrain farther inland? What will be the nature of such defense?
- d. Will the enemy adopt the offensive and counterattack our landing forces? If so, when, where, how, and with what troops?
- e. Will the enemy reinforce southern KYUSHU prior to, or subsequent to our landing? If so, how, when, from where, and what will be the strength and composition of such reinforcements?
- f. Will the enemy employ the civilian population in defense of KYUSHU? If so, how, when, where, and to what extent?
- g. Will the enemy counterattack our beachheads and interior installations with paratroops, air or naval forces, or by amphibious action? If so, when, where, with what forces, in what strength, and from which bases?
- h. Will the enemy attack our waterborne movement or landing operations with air or naval forces? If so, when, where, in what strength, with what forces, and from which bases?
- i. Will the enemy employ chemicals, or new weapons of any kind, in the defense of KYUSHU? If so, of which type, and when, where, and by whom will they be used?

~~TOP SECRET~~

3. RECONNAISSANCE AND OBSERVATION:

a. CMC AFPAC is requested to provide:

- (1) Identifications of enemy units, with strengths, composition, dispositions, and movements, throughout the objective area.
- (2) Intelligence concerning indications and capabilities of enemy use of chemical or bacterial warfare, or of new weapons.
- (3) Intelligence concerning indicated enemy reaction with respect to defensive plans for the objective area.

b. Commander, Fifth Fleet, is requested to:

- (1) Report enemy naval dispositions and movements, to include locations and activities of submarines, torpedo boats, and suicide craft.

c. Commanding General, Fifth Air Force, is requested:

- (1) To provide visual aerial reconnaissance of the routes and areas during the periods indicated, and night photography of the critical intersections, as shown respectively on Appendices I, II, and III. To send positive and negative reports to CG Sixth Army by fastest possible means.
- (2) To observe and report all large scale land movements and other military activities in northern KYUSHU, western HONSHU, and SHIKOKU.
- (3) To observe and report all concentrations of hostile large and small shipping within a two hundred mile radius of the objective area.
- (4) To provide timely information as to number of enemy planes, transports and gliders available on airfields or airstrips within flying range from the objective area.

d. Commanding Generals of I, IX, XI Corps, V Amphibious Corps, and separate task forces will:

- (1) Arrange visual aerial reconnaissance with maximum available carrier based aircraft of their respective areas as practicable to augment such reconnaissance indicated by Par 3 (c) above. See Appendix IV.
- (2) Initiate vigorous ground reconnaissance as required for their tactical security.
- (3) Arrange to exploit all intelligence procured by Underwater Demolition Teams.

- (4) Prepare to maintain radio contact with and assist in the establishment, supply, and maintenance of "Alamo Scout" observation posts and reconnaissance parties.
- (5) Coordinate all reconnaissance and observation missions prior to X-7 through the Assistant Chief of Staff, G-2, this headquarters.

4. MEASURES FOR HANDLING PWs AND CAPTURED DOCUMENTS:

- a. Prisoners of War will be handled in accordance with FM 30-15; SOP (Intelligence), Headquarters Sixth Army; and Administrative Order Number 18.
- b. Documents, general:
 - (1) Captured enemy documents, other than signal and cryptographic as specified in Par 4 c, below, will be delivered to the nearest Intelligence Officer. After the field examination, they will be forwarded through intelligence channels by the most expeditious and secure means to the Language Detachment attached to the capturing unit. All enemy motion picture film, as defined in Section II, W.D. Circular No. 43, 5 February 1945, and enemy photo prints and maps will be included in the category of captured documents and will be handled as such.
 - (2) Individuals desiring the return or other disposition of documents will attach their names and APO addresses thereto, and indicate desired disposition without damaging or effacing the document. After being apprised of the contents of a document by competent language personnel, G-2s of divisions and higher headquarters may return any document desired by a finder which is deemed to be without military value and the release of which is not in any wise prejudicial. All documents disposed of in this manner will be accompanied by the certificate in duplicate contained in par 4 f (2) below. Unit censors may automatically clear the following captured enemy documents:

Unused post cards with no pictures whatever,
Blank stationery,
Blank forms,
Harmless Japanese propaganda leaflets, and
Blank envelopes.
 - (3) In the case of documents of military value desired by finder, they will not be returned or otherwise disposed of until they have ceased to have such value. They will then be handled in the same manner as the documents mentioned in the next preceding paragraph, and will be accompanied by the certificate

~~TOP SECRET~~

in duplicate contained in par 4 f (2) below, signed by G-2 of a division or higher unit or by officers in charge of Language Detachments attached to divisions or higher units. If signed by officers in charge of Language Detachments, the signature will read: "For the A.C. of S., G-2 (Unit to which attached)."

(.) All documents, regardless of character, excepting those written in a foreign language, captured from the enemy, that contain information concerning any American or Allied Prisoner of War, internee, or any individual who evaded capture by the enemy or escaped from enemy control after capture, will, when they have served their purpose for intelligence operations, be forwarded to this headquarters, "Attention: G-1 (Recovered Personnel)."

(.) Classification and disposition of documents:

(a) See "Procedure for Language Detachments," Headquarters Sixth Army, dated 10 June 1945.

(b) "A" Documents are those containing information of tactical value. "B" Documents are those containing strategic information. "C" Documents are those containing no military information.

(c) All captured documents classified "A" will be forwarded to Headquarters Sixth Army as soon as they have ceased to be of value to lower headquarters for immediate tactical exploitation.

(d) All captured documents classified "B" will be forwarded directly by the respective corps to ATIS, GHQ.

(e) All captured documents classified "C" may be destroyed in the area or made available for souvenir purposes.

(f) All captured documents of interest to CIC and Military Government will be forwarded by each of the Language Detachments to the CIC and Military Government agencies at their respective headquarters. The ultimate disposition of such documents will be through Language Detachment channels

c. Signal documents and cryptographic materiel: Captured enemy codes, ciphers or cryptographic materiel of any description will be delivered promptly to the representative of the Chief Signal Officer, GHQ, designated for that purpose. If there is no designated representative of the Chief Signal Officer, GHQ, the Intelligence Officer of the unit will be responsible for forwarding such materiel by safehand officer courier, to Chief Signal Officer, GHQ, AFPAC,

~~TOP SECRET~~

who will be notified by radio of such dispatch.

d. Captured Enemy Materiel:

- (1) (a) Technical Intelligence Teams will be utilized to determine what items of captured enemy materiel are desired for intelligence purposes.
- (b) Nameplates from captured equipment may be removed only by Technical Intelligence personnel.
- (c) Three samples of all new or newly modified weapons and equipment are required by the War Department.
- (d) Technical Intelligence personnel will be permitted to enter captured enemy dumps or US salvage yards and to remove such items as required for further analysis.
- (e) Technical Intelligence personnel will advise as to the necessary preparation for shipment of all kinds of enemy equipment desired for intelligence purposes.
- (2) Bulk disposition of captured enemy equipment and supplies not otherwise covered by this annex is provided for in the Quarter-master Plan, Incl No. 1, Adm C 18.
- (3) All field tests of captured enemy equipment will be conducted under supervision of Technical Intelligence personnel. Prompt report of all tests will be made through intelligence channels to the AC of S, G-2, Sixth Army.
- (4) All corps and task force commanders will make a weekly report of the number and type of enemy vehicles and the amount of materiel, supplies, and equipment captured or destroyed. Such reports will be made to the AC of S, G-2, Sixth Army, on the 7th, 14th, 21st, 28th, and last day of each month. The report on the last day of the month will show the monthly totals.

f. Equipment Available for Souvenirs:

- (1) Within the limitations of the preceding sub-paragraphs of this paragraph, commanders of capturing units may release the following items as souvenirs:
 - (a) Swords.
 - (b) Sabers.

- (c) Watches.
 - (d) Battle flags.
 - (e) Ammunition (inert) (exclusive of enemy aircraft ammunition), clips, links, magazines, pouches, and inert Japanese cartridge cases of all sizes.
 - (f) Ammunition (inert) 6.5-mm to 37-mm (exclusive of enemy aircraft ammunition). This includes grenade shells (except chemical) for type 89 grenade dischargers, hand grenades, rifle grenades, magnetic mines and land mines.
 - (g) Uniforms: hats, caps, clothing and shoes.
 - (h) Clothing other than uniforms (except rubber or oil treated): fatigue or working clothing, gloves, mittens, socks and underclothing.
 - (i) Tentage of all types (except rubber or oil treated), ponchos, raincoats, slickers and tarpaulins.
 - (j) Toilet articles and comfort kits: razors, shaving brushes, soaps, sewing and toilet kits.
 - (k) Personal equipment: web equipment, belts, shovels, canteens, haversacks, rucksacks, mess equipment (including plastics), findings (buttons, buckles, snaps, etc.), sleds and packs, pocket knives and machetes, pots and pans for individual cooking, can openers, wire cutters, gasoline cans, oil drums (any substitute for steel), snap fasteners of all types, tent pins, water and gasoline containers, goggles, ear protective equipment (against sand), water sterilizing bags, transparent card holders and map containers, matches and cases, sunburn preparations, materials used in laundry, sleeping bags, medals and insignia.
 - (1) Subsistence stores of all kinds: rations, smoking articles.
- (2) Individuals to whom the above items are released may retain or mail them. A certificate in the following form will be issued by the appropriate censorship officer or G-2, and this certificate will be included in duplicate in parcels mailed.

CERTIFICATE

Pursuant to provisions of Section VIII, War Department Circular No. 217, 1 June 1944, and USAFFE Circular No. 85, 1944, the bearer

(Name) (Rank) (ASN)

of this certificate is entitled to retain in his possession or to mail the following:

Captured enemy document stamped with No. _____
or (description of article) _____

(signature)
G-2 or Censorship Officer
Unit

This certificate will be signed by the appropriate G-2 or Censorship Officer.

5. MAPS AND PHOTOGRAPHS:

a. Maps:

(1) Initial issue of the following maps will without requisition be made to corps and separate headquarters by Sixth Army Engineer.

(2) The following maps will be available for OLYMPIC:

(a) Strategic Maps:

1/1,000,000 (3 sheets) JAPAN, AMS, Washington, D. C.

1/500,000 (1 sheet) KYUSHU, Sixth Army.

1/250,000 (11 sheets) KYUSHU, AMS.

(b) Tactical Maps:

1/50,000 (approx 63 sheets) Southern half KYUSHU, AMS.

1/25,000 (approx 200 sheets) Southern half KYUSHU, AMS.

(c) Special Maps:

1/10,000 photo map of beach areas (as required), Sixth Army.

City plans will be available of principal cities in objective area.

(d) Road Maps:

1/250,000 (2 sheets) KYUSHU, AMS.

- (3) Requisitions for additional and/or subsequent maps will be forwarded through engineer channels to Sixth Army Engineer.

b. Aerial Photographs:

- (1) Aerial photographs of objective areas will be issued as available prior to K-Day. K-18 vertical and K-22 oblique coverage of beaches and objective areas will be available. Requests for all photographic missions, contact prints and lithographed copies of aerial photographs of operational area, will be submitted to Headquarters Sixth Army except during the period when a tactical unit of the Army or Naval Air Force is in direct support of a subordinate unit, in which case such requests may be submitted directly to the supporting air command. Information copies of photographic requests and one copy of coverage received will be forwarded to AC of S, G-2, Sixth Army.

c. Miscellaneous Intelligence Material (to be issued as available):

- (1) Photo Interpretation Reports: Second phase interpretation reports on all successful sorties pertinent to the operation.
- (2) Terrain Studies and Handbooks: AGS Terrain Study No. 130; AGS Terrain Handbooks Nos. 81, 82, and 83; and other terrain documents.
- (3) Special Data: All documents prepared by higher and adjacent headquarters pertaining to the operational area will be distributed.

6. COUNTERINTELLIGENCE: A separate annex will be issued after receipt of appropriate instructions from higher headquarters.

7. PROPAGANDA:

- a. Corps commanders will be responsible for propaganda in their respective areas, subject to the coordinating supervision of this and higher headquarters.
- b. Corps and separate task force commanders will require strict compliance with provisions of propaganda leaflets, insofar as they are applicable to conduct of U.S. troops when receiving the enemy in surrender.
- c. Full use will be made of Japanese surrender leaflets, and civilian advice leaflets.
- d. Each corps will be furnished leaflets covering all types of predictable situations, and special propaganda will be furnished on four days notice.

APPENDIX V, INTELLIGENCE ANNEX to FO 74.

CHEMICAL WARFARE INTELLIGENCE PROCEDURE

1. Object.

The purpose of this directive is to establish procedures and responsibilities to insure that all available tactical and technical chemical warfare information is furnished to all concerned with the least practicable delay. Chemical warfare intelligence includes information pertaining to smoke, incendiaries, toxic chemicals and biological warfare.

2. Responsibility.

The senior chemical officer assigned to a command is responsible to his commander through his AC of S, G-2, for all matters pertaining to chemical warfare intelligence as prescribed in AR 50-5 and changes thereto. In addition, he is also responsible for the coordination of biological warfare intelligence within the command, provided that the closest collaboration and concurrence of the surgeon is obtained.

3. Technical Intelligence Personnel.

Technical intelligence personnel in the form of teams specially trained in chemical warfare technical intelligence will be provided for attachment to corps and divisions. These CWS teams will operate under the direct supervision of corps and division chemical officers for operation in the field.

4. Scope.

a. Chemical warfare intelligence includes both tactical and technical information.

(1) Tactical chemical warfare information is that information which indicates and/or discloses the enemy's use or intended use of chemical warfare munitions and his preparedness both offensively and defensively to employ such munitions. Information of tactical value may be obtained by evaluation of the following:

(a) Stocks and locations, i.e. at gun positions, at air-cromes, in hands of troops or in depots.

(b) Movement of gases, including amounts.

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

- (c) Quantity and quality of protective equipment.
 - (d) Organization, employment, and location of enemy chemical troops.
 - (e) Character and number of enemy chemical weapons.
 - (f) Gas discipline and training policies.
- (2) Technical information includes information obtained by examination of captured enemy equipment, and/or ammunition, especially new types. Such information may also be obtained from captured documents, interrogation of PW's and other sources such as investigation of physiological effects. Included in the technical aspects of chemical warfare intelligence is collection and evaluation of information concerning means and methods of utilization of chemical munitions and chemical troops by the enemy, also malfunctioning and effectiveness of our own chemical warfare weapons and munitions including incendiaries and smokes.

5. Procedure.

a. Chemical warfare intelligence activities include the following:

- (1) In the event gas is used by the enemy, all available information will be obtained without delay. Every effort will be made to obtain samples to be forwarded to the 99th Chemical Service Company Laboratory. Samples include burned out munitions, duds, munition fragments, contaminated earth, contaminated clothing and equipment, and actual gas samples.
- (2) A survey of enemy CW capabilities and probable intentions will be continuously maintained for the purpose of enabling commanders to determine the CW protective measures to be taken.
- (3) Collection and forwarding to the Captured Enemy Equipment Depot of all captured CW equipment of known types found in the original container. Such equipment is required by the War Department for surveillance testing, training and displays.
- (4) Collection and forwarding of samples of new types of captured CW equipment to the 99th Chemical Service Company Laboratory.
- (5) When preliminary interrogation of prisoners of war reveals knowledge of chemical warfare, further interrogation will

~~CONFIDENTIAL~~

be conducted with the assistance of a Chemical Warfare Service officer of a division or higher staff.

- (6) Technical intelligence personnel furnished by AFWESPAC will be utilized to the fullest extent to train unit gas officers and gas non-commissioned officers in chemical warfare intelligence.

6. Reports.

a. Information of tactical value will be furnished to the AC of S, G-2, after evaluation by the chemical officer.

b. In the event the enemy uses gas against our troops, a report, giving all immediately available details will be submitted to this headquarters through command channels by the most rapid means available. The commander of the area concerned will require his chemical officer to make a thorough technical investigation. The report of this investigation will be forwarded to this headquarters in triplicate marked "Attention: Chemical Officer." The report will include the following information: weather conditions, terrain features and vegetation, amount and kind of gas used, method of attack, number and description of casualties (photographs if possible), sample obtained and disposition, physiological effect, and any other information procurable. The report should be accompanied with sworn statements from gassed personnel, affidavits from witnesses and certificates from medical officers attending the casualties.

c. Weekly Chemical Warfare Intelligence Reports: When units are in contact with the enemy, corps, separate divisions and separate task forces will submit a Weekly Chemical Warfare Intelligence Report as of 2400 hours each Saturday to this headquarters marked "Attention: Chemical Officer." These reports will be forwarded so as to reach this headquarters in duplicate. These reports may be submitted in any form, but will include all chemical warfare intelligence information obtained during the week covered by the report.

d. Special Technical Reports will be submitted through technical channels so as to reach this headquarters in four copies. These reports will cover new types of equipment and ammunition and will contain a description, accompanied by a drawing and other available details including quantity found and disposition made.

1930I 28 July 1945

ANNEX 2 to FO 74, Missions of Supporting Forces.

1. The following missions have been assigned by the Commander-in-Chief, United States Army Forces Pacific, in Operations Instructions Number 1, General Headquarters, United States Army Forces Pacific, 20 June 1945:

a. The Commanding General, Eighth Army, will:

- (1) Continue missions in the Southwest Pacific Area assigned by General Headquarters, Southwest Pacific Area, Operations Instructions.
- (2) Assist Commanding General, Sixth Army, and Commanding General, Far East Air Forces, in staging, equipping, training and mounting elements of their respective forces as hereafter directed or as arranged directly between Commanders concerned.

b. The Commanding General, Far East Air Forces, will:

- (1) With air forces installed in the PHILIPPINE ISLANDS continue missions as assigned by Southwest Pacific Area Operations Instructions.
- (2) With air forces installed in the RYUKYUS, in conjunction with air forces of the Pacific Fleet and Pacific Ocean Areas and the United States Army Strategic Air Forces:
 - (a) Destroy or neutralize hostile air forces in the Southern Japanese Archipelago within range, in the KOREAN PENINSULA and along the CHINA Coast.
 - (b) Destroy hostile ground forces and installations in the Southern Japanese Archipelago within range, with particular emphasis to Southern KYUSHU.
 - (c) Destroy hostile naval forces and shipping within range.

- (d) Attack critical points on hostile lines of communication with particular emphasis to the isolation of Southern KYUSHU from Northern KYUSHU and KYUSHU from HONSHU.
 - (e) Provide air protection for naval forces, convoys and shipping as requested by Commander-in-Chief, Pacific Fleet (or representatives).
 - (f) Provide air support in the objective area as requested by Commander, Fifth Fleet (or Commander, Amphibious Forces, Pacific Fleet) during the period that the latter controls air operations therein.
 - (g) Destroy hostile industrial installations and sources of raw materials in the Southern Japanese Archipelago.
 - (h) Intensify operations specified in paragraphs (a), (b) and (d) during the period X-10 to X-Day and thereafter as required.
- (3) Upon installation of air forces in the objective area and at a date later to be specified by General Headquarters, United States Army Forces Pacific, assume the mission of air support of ground and naval operations in the objective area and prepare to continue missions specified in paragraphs (2)(a), (b), (c), (d) and (e) above, extended as ranges of aircraft permit.
 - (4) Provide aerial reconnaissance and photography as requested by Commanding General, Sixth Army, and Commanders, Fifth and Third Fleets.
 - (5) Establish and operate radar and air warning in the Southern KYUSHU area as arranged with the Commanding General, Sixth Army.
 - (6) Install air garrisons in the objective area as directed and as arranged with the Commanding General, Sixth Army.

c. The Commanding General, Army Forces Middle Pacific, will:

Prepare designated Army ground forces and mount designated Army ground and air forces in the Middle Pacific, as arranged with the Commanding Generals, Sixth Army, and Far East Air Forces, and the Commander, Amphibious Forces, Pacific Fleet.

~~TOP SECRET~~

- d. For the missions assigned Commanding General, Army Forces Western Pacific, see Administrative Order 18 and Annex 5, Signal.

HEADQUARTERS SIXTH ARMY
A.P.C. 442
1930I 28 July 1945

ANNEX 5 to FO 74, Signal Orders.

- 1. a. (1) Information as to enemy dispositions is contained in current situation reports, intelligence bulletins, and Annex 1 to this field order.
- (2) The enemy has developed a highly efficient signal intelligence service. He will no doubt jam radio circuits, send false messages, and intercept radio and wire communications. All captured communication facilities must be regarded as insecure until investigated and released by this headquarters.
- (3) Captured signal installations will be placed under armed guard to prevent destruction or dismantling and a report of location will be made to signal office this headquarters.
- b. (1) Information on friendly communications will be found in Signal Operation Instructions and Signal Plans of ground, air, and naval forces.
- c. Command Posts:

<u>Command Post</u>	<u>Location</u>
GHQ, AFPAC	MANILA
Adv GHQ, AFPAC	KYUSHU (to be announced)
AFWESPAC	MANILA
SIXTH ARMY	
Initial	SAN FERNANDO, PAMPANGA, LUZON, P.I.
Afloat	USS ELDORADO
Subsequent	NISHISAKO, KYUSHU (to be announced)
Rear Echelon	SAN FERNANDO, PAMPANGA, LUZON, P.I.
I CORPS	
Initial	TUMANA, LUZON, P.I.
Afloat	USS ANCON
Subsequent	Vicinity of MIYAZAKI - to be reported

~~SECRET~~

ANNEX 5 to FO 74, Signal Orders (cont'd)

<u>Command Post</u>	<u>Location</u>
IX CORPS	
Initial	LEYTE
Afloat	USS CATOCTIN
Subsequent	To be reported
XI CORPS	
Initial	MANILA, LUZON, P.I.
Afloat	USS MT OLYMPUS
Subsequent	Vicinity of SHIBUSHI - to be reported
V AMPHIBIOUS CORPS	
Initial	MAUI, T.H.
Afloat	USS AUBURN
Subsequent	Vicinity of KUSHIKINO - to be reported
11th Airborne Division	
Initial	MATASENAKOHAY, LUZON, P.I.
Afloat	USS ROCKY MOUNT
Subsequent	To be reported
40th Infantry Division	
Initial	PANAY
Afloat	USS ESTES
Subsequent	KOSHIKI RETTO - to be reported
158th Regimental Combat Team	
Initial	IRIGA, LUZON, P.I.
Afloat	To be reported
Subsequent	To be reported
Army Service Command OLYMPIC (ASCOMO)	
Initial	DEL CARMEN, LUZON, P.I.
Subsequent	Vicinity of NISHISAKO - to be reported

d. Axis of signal communication:

(1) Sixth Army
NISHISAKO - IWAKAWA - KOKUBU

(2) Subordinate units - to be reported.

2. Continuous communication between all echelons of Sixth Army and its elements is of paramount importance

ANNEX 5 to FO 74. Signal Orders -(cont'd)

a. Commanders of all elements of Sixth Army will:

- (1) Install, maintain and operate communication facilities required for the assault upon, consolidation, and defense of his zone of operation.
- (2) Insure that the establishment of signal communication facilities are initiated immediately upon landing and completed without delay, paying particular attention to installation of ship-shore communication to facilitate rapid and orderly unloading of shipping.
- (3) Insure strict compliance with the provisions of Sixth Army Signal Operation Instructions and Communication Directives.

3. a. (1) The 16th Signal Operation Battalion, while continuing in operation such communication facilities as are required to carry out present missions of Sixth Army, will:
 - (a) Provide any additional personnel required for operation of Army Signal Center aboard the Command Ship USS ELDORADO, and Communication Ship LSV #1 (CATSKILL).
 - (b) Provide four completely mobile signal centers, equipped to operate necessary message center, radio, wire, and carrier facilities in the objective area.
 - (c) Be prepared to load the above mobile units for shipment to the objective area as follows:
 1. Two, equipped with minimum requirements for the initial command post, to be loaded on separate ships and debark on X / 1.
 2. Two, equipped with ultimate command post requirements, to be loaded on separate ships to debark on X / 4.
 - (d) Provide sufficient personnel with each mobile unit to permit efficient and continuous operation of these facilities.
 - (e) Provide for normal message center operation including air messenger service, when feasible, and "Locator" service.
 - (f) Provide for:
 1. Establishment of continuous radio contact with subordinate and higher headquarters (see Appendix #2

ANNEX 5 to FO 74, Signal Orders (cont'd)

hereto and current Sixth Army Signal Operation Instructions).

2. Radio stations to operate the Army Headquarters terminal of following circuits in objective area, to be installed in order of priority as listed:
 - a. Signal Officers Voice Common, SCR-300 (6V)
 - b. Army Local Voice Command, SCR-608 (6J)
 - c. Army to ELDORADO, LSV #1, and PCE(R)-850 (6N)
 - d. Army Command Net #1 (6D)
 - e. Army to 40th Inf Div and 158th RCT (6E)
 - f. Army Command Net #2 (6K)
 - g. High Command Net (6Q)
 - h. Army Liaison Circuit to VAC (6L)
 - i. Army to GHQ, AFPAC, MANILA (6G)
 - j. Army to Corps Net (6A)
 - k. Local Warning Net (6W)
 - l. Army to Corps Net (6M)
 - m. Army Reserve Net (6T)
 - n. Army to Army Rear (6S)
 - o. Army to GHQ, AFPAC, MANILA (6H)
 - p. Army to Army Rear (6R)
 - q. Army to Alamo Scouts (6X₁)(6X₂)

(g) Provide for:

1. Installation of complete wire facilities for Army command post.
2. Expeditious installation of carrier equipment for use

ANNEX 5 to FO 74, Signal Orders (cont'd)

between Army and corps utilizing wire or VHF radio circuits.

3. Assisting Army signal construction troops in maintenance of Army trunk lines.

(2) The 436th Signal Construction Battalion will be prepared to:

- (a) Initiate the construction of a single arm copper line from SHIBUSHI to MIYAKONOJO.
- (b) Initiate the construction of a single arm copper line along the route SHIBUSHI, KANOYA, TAKASU.
- (c) Perform such other wire construction and/or maintenance as directed by this headquarters.

(3) The 33d Light Construction Bn (Less Co "A") will be prepared to:

- (a) Install and maintain wire facilities between Sixth Army Headquarters, XI Corps and such other headquarters as directed by the Commanding General, Sixth Army.
- (b) Initiate the installation of spiral four cable along the route SHIBUSHI - KANOYA - TAKASU.

(4) The 281st Signal Pigeon Company will:

- (a) Provide I, IX, and XI Corps with one combat section each prior to embarkation.
- (b) Establish remainder of the Pigeon Company in the vicinity of Army Headquarters.

b. The Commanding Generals I, IX, XI, and V Amphibious Corps will:

- (1) Establish and operate a Safchand Courier Office beginning X-day, making collection and distribution of safchand material to all units within the respective corps zones.
- (2) Assist Sixth Army in establishing a scheduled air messenger service with Sixth Army Headquarters.
- (3) Assist respective commanding generals of supporting tactical air commands in installing and maintaining the signal communication facilities required in each objective area for air bases, tactical control center, aircraft warning, radar-radio navigation,

ANNEX 5 to FO 74. Signal Orders (cont'd)

air command liaison, and operation intelligence purposes.

- (4) Assist the respective commanders of supporting naval forces in the objective area in installing and maintaining the outside plant facilities required for naval installations.
- (5) Install and maintain wire communications as follows:
 - (a) For base installations in the objective area, coordinating with the base signal officer present.
 - (b) A minimum of two wire circuits to each subordinate headquarters.
 - (c) Open wire lines as shown on Appendix #3 of this Annex using signal construction troops and materials provided by Sixth Army.
 - (d) Initiate construction of open wire lines for interbase circuits as shown in Appendix 3 of this Annex using signal construction troops furnished by ASCOMO.
 - (e) Install spiral four cable systems as shown in Appendix 3 of this Annex.
- (6) Establish, maintain, and operate:
 - (a) Radio contact with adjacent and higher headquarters in accordance with Appendix #2 to this Annex.
 - (b) The corps end of a VHF radio telephone link for communication with Sixth Army Headquarters.

c. The Commanding General, V Amphibious Corps will:

Utilizing Radio Telegraph Team # 37 and Message Center Team #28, 4025th Signal Service Battalion, establish radio and message center facilities for communication between Sixth Army Liaison Team at V Amphibious Corps Headquarters and Sixth Army Headquarters (Circuit 6L, Appendix #2 hereto and Sixth Army Signal Operation Instructions).

d. The Commanding General ASCOMO will:

- (1) Install, maintain, and operate wire communications for General Headquarters as directed by General Headquarters representatives, including GHQ PRO activities.

ANNEX 5 to FO 74, Signal Orders (cont'd)

- (2) Install, maintain, and operate wire communications for ASCOMO Headquarters, and subordinate headquarters in the same area; and make preparation for, and initiate at the first opportunity, non-tactical wire construction indicated in Appendix #3 hereto.
 - (3) Install, maintain, and operate radio and message center facilities for communication with AFWESPAC and with subordinate ASCOMO units in the following radio nets:
 - (a) (SOS₁) ASCOMO to AFWESPAC.
 - (b) (SOS₂) ASCOMO to AFWESPAC.
 - (c) (SOS₃) ASCOMO to Corps ASCOMO units.
 - (d) (SOS₄) ASCOMO to Advance Regulating Station at Okinawa. (See Appendix #2 hereto, and Sixth Army Signal Operation Instructions).
 - (4) Establish a safeland office in the SHIBUSHI area for the collection and distribution of safeland material ashore between all the headquarters in the objective area and the Far East Air Forces collection point.
 - (5) Prepare detailed plans for signal installations in all contemplated base areas, and submit same to this headquarters.
- c. The Commanding Generals, 11th Airborne Division, 40th Infantry Division, and 158th Regimental Combat Team, and Commanding Officers, 13th Armored Group, and 6th Ranger Infantry Battalion, in addition to the normal signal communication facilities required for their zone of operations, will:
- Establish and maintain radio contact with adjacent and higher headquarters in accordance with Appendix #2 to this Annex, and current Sixth Army Signal Operation Instructions.
- f. Commanders of all elements of Sixth Army will insure compliance with the following:
- (1) Radio:
 - (a) Prior to embarkation cause all radio transmitters and receivers to be calibrated to assigned frequencies and properly marked.

ANNEX 5 to FO 74, Signal Orders (cont'd)

- (b) Cause radio silence to be observed, effective upon embarkation of troops.
 - (c) Unless otherwise directed by the responsible naval commander, radio silence will be lifted upon arrival within sight of the objective area.
 - (d) Cause alternate radio facilities for assigned circuits to be installed and prepared for operation.
 - (e) Be prepared to install, maintain, and operate additional radio facilities as directed by this headquarters.
 - (f) Cause all elements provided with required equipment to guard or monitor the Local Air Warning Net (6W) to obtain notification of air raids. (See Appendix #2 hereto)
- (2) Wire: (See Appendices 3A, B, C, D, E, F, and G).
- (a) Within the limitations of equipment available, simplex all wire lines for telegraph operation.
 - (b) Assist in the installation of such additional wire circuits as may be later directed by this headquarters.
 - (c) Wire circuits will not be cut except by wire construction personnel of the organization responsible for the wire.
 - (d) Maximum use will be made of existing commercial wire facilities, limited only by security precautions.
 - (e) All wire circuits will be tagged at least once every quarter mile (See Item No. 41, Sixth Army SOI and FM 24-5).
 - (f) Wire installations will be as prescribed in Inclosure No. 40-1 Communications Directive.
 - (g) Drivers of vehicles will be especially careful not to disrupt wire communications and will report any case of damage.
 - (h) Shore and beach wire circuits will be in accordance with U.S. Joint Air-Amphibious Communications Instructions, DNC-2. Each beach installation will be connected to the senior tactical unit headquarters on or near the beach.

~~TOP SECRET~~

ANNEX 5 to FO 74, Signal Orders (cont'd)

(3) Photographic Activities:

Cooperate in signal photographic activities in their areas and expedite the movement of exposed film to higher headquarters for dispatch to rear areas via safehand courier.

(4) Authentication:

(a) For ground force units:

Message and station authentication by use of authentication table in Aircraft Code (CSP 1270 series) for use between Army, Corps, Divisions and separate units. Within units the prescribed unit authentication will be used. (See incl 61 of Sixth Army Communication Directive).

(b) Between ground and air and Naval and Air Forces:

Authentication table in Aircraft Code (CSP 1270 series) and Shackle Authentication.

(c) Within air and naval forces, as prescribed by respective commanders.

(5) Codes and Ciphers:

(a) See Appendix #1 hereto. The Shackle Numeral Code will be used to encipher numerals on voice transmissions in the clear when necessary to provide adequate security to the transmission, i.e. coordinates, unit designations and times.

(b) Current and reserve editions of Hazardous Duty and normal code and cipher systems will be kept readily available for use in any emergency.

(c) Combined Assault Code and Amphibious Force Code will be used throughout the initial phases of the operation.

(d) Codes and ciphers for use by and between air and naval forces will be provided by mutual agreement between these forces.

(e) SIGABAS will not be taken ashore prior to X / 2. When taken ashore they will be securely guarded and prepared for immediate destruction. They will not be used until

~~TOP SECRET~~

ANNEX 5 to FO 74, Signal Orders (cont'd)

directed by the Commanding General, Sixth Army.

- (f) A maximum use will be made of assault and other prearranged message codes.

(6) Signal Intelligence:

- (a) Commanders of all units will be prepared to assist in the installations of such CHQ signal intelligence installations as may be required.
- (b) Reports will be distributed by Headquarters Sixth Army as items of interest become available.
- (c) Attempts of enemy stations to jam or transmit false messages will be reported to Headquarters Sixth Army without delay.
- (d) The plan for the operation of signal intelligence activities within the Sixth Army are outlined in Appendix #4 to this Annex.

(7) Security:

- (a) See Inclosure No. 50-1 and 72-1, Sixth Army Communications Directive.
- (b) Plain language may be used when the situation is such that the information transmitted, if obtained by the enemy, cannot be acted upon by him in sufficient time to hinder our operations.
- (c) Corps commanders will disrupt captured signal facilities as required for security reasons. Accurate reports as to circuits interrupted and equipment removed from service will be submitted to this headquarters.

(8) Precedence;

- (a) Urgent (O) will be used only for messages on contact with the enemy or in extreme emergencies.
- (b) Priority (P) will be the highest classification for administrative messages.

ANNEX 5 to FO 74, Signal Orders (cont'd)

(9) Radar:

- (a) See Appendix 5 hereto for plan for radar installation.
- (b) The TCC radar officer at each of the three TCC's will coordinate with the respective AAA group radar officer in his area in the siting and use of all radars to prevent mutual interference.
- (c) Polar coordinate method of reporting contacts will be used. "Points of Origin" for contact reporting will be as follows:
 - 1. For all forces in the overall objective area:
Point "LOMA" (Lat $31^{\circ}17'$, Long $131^{\circ}07'$).
 - 2. In the XI Corps local area:
Point "LOMA" (Lat $31^{\circ}17'$, Long $131^{\circ}07'$).
 - 3. In the I Corps local area:
Point "BROOKLYN" (Lat $31^{\circ}47'$, Long $131^{\circ}29'$).
 - 4. In the V Corps, IX Corps, and Islands local area:
Point "SEATTLE" (Lat $31^{\circ}33'$, Long $130^{\circ}14'$).
- (d) Radars of AAA gun battalions and AAA SL batteries, will be installed in such a manner as to reduce to a minimum the mutual interference between AAA radars and AW radars.
- (e) Complete diagrams of radar station locations, radio frequencies, and wire nets serving same, will be prepared and submitted to Sixth Army Headquarters without delay by the AAA group radar officer and the TCC radar officer in each area.

(10) Time:

- (a) Item time will be used.
- (b) All watches will be synchronized with ship's chronometers prior to debarkation (H-2 on S-day).
- (c) Each headquarters will broadcast time to its subordinate units at least once daily, after radio silence has been lifted.

ANNEX 5 to FO 74, Signal Orders (cont'd)

(11) Recognition and Identification Procedures:

- (a) See Item No. 14 and Incl 52, Sixth Army Signal Operation Instructions and Communications Directive.
- (b) A plan of local approach procedure for friendly aircraft in the objective airfield areas will be prepared in coordination with air liaison officer present in the objective areas, after observation of local conditions.
- (c) For means of small craft identification see Item 14, Sixth Army Signal Operation Instructions.
- (d) Ground-air recognition will be in accordance with CSP-1270 and unit identification panel code (See Incl No. 52, Communications Directive and Item No. 14, Signal Operation Instructions).

(12) Visual Signals:

- (a) Maximum use will be made of visual signals during the assault phase of the operation.
- (b) Visual signalling will be in accordance with Item No. 24, Sixth Army Signal Operation Instructions, CCBF 5, 6, and 8. Radio call signs will be used.

4. Signal Supply:

- a. Troops will proceed to the operational area fully equipped under applicable tables of organization and equipment and with full supply of items authorized in Army Service Forces Catalogues Sig-3 and Sig-4-1. No additional unit stocks are authorized, with the following exceptions:

- (1) Divisions will accumulate and transport to the operational area a stock of maintenance supplies in accordance with previously issued instructions, consisting of items covered by requisitions prepared by this headquarters. Once landed, this stock will be consumed by the division in operations, but will not be maintained.
- (2) Selected units will be issued materials or equipment to accompany the units for specific projects as directed by this headquarters.

ANNEX 5 to FO 74, Signal Orders (cont'd)

- (3) Signal repair units will requisition and accumulate a quantity of spare parts under the allowances published in Army Service Forces Catalogues Sig-7 and Sig-8, using columns applicable to the echelon of repair responsibility of the requisitioning unit, and basing quantities on the number of equipments to be maintained under that responsibility.
- b. Each army corps will establish a signal depot in its landing area utilizing ASSMO signal depot units provided for that purpose. The V Amphibious Corps will also establish a depot in its landing area using Amphibious Corps service units. Depots will be opened for operation at the earliest possible date after landing.
- c. Channels of requisitions for signal supplies will be as follows:
- (1) Army troops direct to depot.
 - (2) Corps troops through corps signal officer to depot.
 - (3) Division troops through division signal officer to depot.
 - (4) Air force troops through corps signal office to depot.
 - (5) Base troops through corps signal office to depot.
- d. Issue of available items will be immediate if transportation accompanies requisition. No transportation will be furnished by depot.
- e. Items not immediately available will be placed on back order only if written requisitions are presented, containing complete, legible identification and telephone address of requisitioning unit. Back ordered items, when they become available, will be held 24 hours after notification to unit of availability, after which items will be cancelled from requisition and returned to stock or released to meet other demands.
- f. Signature of person taking delivery of items will be required and will be considered evidence of delivery to unit.
- g. One copy of requisition will be retained by depot. If unit desires return of information copies, such must be presented to depot.
- h. Units will maintain authorized unit reserves as complete as possible, meeting current demands by withdrawals from depot stocks; exception is made of those special stocks mentioned in paragraphs a (1) and (2) above, which will not be maintained.

~~TOP SECRET~~

ANNEX 5 to FO 74, Signal Orders (cont'd)

- i. Forward supply points and temporary dumps will be established from time to time as required by lengthening supply lines, at places and times to be designated later.
 - j. Permanent depots, sub-depots, and dumps will be established, operated and maintained by ASCOMO.
5. Sixth Army Signal Officer will be located:
- Initially - - - SAN FERNANDO, PAMPANGA, P.I.
 - Afloat - - - USS ELIZABETH
 - Ashore - - - Vicinity of NISHISAKO

BY COMMAND OF GENERAL KRUEGER:

G. H. DECKER,
Major General, G.S.C.,
Chief of Staff.

OFFICIAL:

G. H. Decker
G-3.

Special Instruction.

1. Distribution of the Combined Assault Code CCBP 0130-D and the Amphibious Force Code will be made by the individual forces concerned. Sixth Army distribution will be as follows:
 - a. Combined Assault Code - Editions D8 and D15 of CCBP 0130 will be made to corps headquarters to be distributed in the objective area upon instructions from the Commanding General, Sixth Army.
 - b. Amphibious Force Code - Edition 1 of the Amphibious Force Code will be distributed down to and including battalion headquarters. Edition 2 will be held by division headquarters as the 1st reserve, and editions 3, 4, and 5 will be held in reserve at corps headquarters.
2. Upon notification by the Commanding General, Sixth Army, the use of all hazardous duty systems will be discontinued, and the following normal cryptographic systems brought into effect:

Army System 4001 or Navy ECM Key List No. 3 (SIGABA or ECM)
Army System 4002 or Navy ECM Key List No. 4 (SIGABA or ECM)
Army SIGABA System 2001
Army Strip System 2022
Army M-209 System 881
Combined Cipher Machine Systems CCBP 0103, 0133, 0201, 0202
CSP 1403, 1404 - Navy Channel 135. (To be held by army and corps headquarters for decoding purposes only.)

~~TOP SECRET~~

APPENDIX 2B to ANNEX 5 to FO 74, HEADQUARTERS SIXTH ARMY

INITIAL WIRE CONSTRUCTION PLAN

1. General:

All construction troops entering the objective area, mobile loaded in assault shipping, will carry with them a maximum of construction material. This will vary according to the contemplated mission of the troops. Representative lists of such materials have been furnished all interested headquarters.

2. MIYAZAKI (I Corps) Area:

- a. I Corps will place two spiral four cables along the route MIYAZAKI - MIYAKONOJO. These may be used at the discretion of the corps commander until completion. At that time they will be used for communication between areas until replaced by permanent construction.
- b. The army construction company, (Co A, 24th Signal Construction Bn) will construct an open wire pole line along the route MIYAZAKI - MIYAKONOJO. This line will initially carry a single ten pin crossarm and a second crossarm will be added, when time permits.
- c. The air force construction battalion will immediately install necessary airstrip, air warning, and air headquarters wire construction.
- d. The ASCOMB construction company (Co C, 60th Signal Construction Bn) will initiate construction of base communication. As soon as possible construction of a three crossarm pole line along the route MIYAZAKI - MIYAKONOJO will be initiated.
- e. One platoon, Co A, 33d Signal Construction Bn, will install necessary lines as directed by the Commanding General, 40th AAA Brigade.

3. SHIBUSHI (XI Corps) Area:

- a. Two spiral four cables will be placed along the route SHIBUSHI - MIYAKONOJO, and two along the axis SHIBUSHI - KANOYA. These will be placed by army or corps troops as determined by the military situation.
- b. The air force construction battalion will install necessary airstrip, air warning, and air headquarters communications.
- c. The 260th Signal Heavy Construction Company, (ASCOMB) will be attached to AFPAAC Headquarters and will provide such communication as directed by the AFPAAC Communications Officer.

Initial Wire Construction Plan (cont'd)

- d. One construction company of the 68th Signal Construction Bn (ASCOMO) will initiate construction of base communication in the SHIBUSHI area.
- e. The other construction company of the 68th Signal Battalion will initiate construction of a pole line SHIBUSHI - KUSHIRA (one arm initial, three arms ultimate) and a single arm side lead to the GROPAC at UCHINOURA.
- f. The 259th Signal Construction Company will initiate construction of a three arm pole line SHIBUSHI - MIYAKONOJO.
- g. One company of the 436th Signal Construction Battalion (Sixth Army) will construct a two arm pole line along the route SHIBUSHI - MIYAKONOJO.
- h. One company of the 436th Signal Construction Battalion will construct a single crossarm line SHIBUSHI - KANOYA, increasing this to two crossarm later.
- i. One platoon of Co. A, 33d Signal Construction Battalion will install necessary lines for the 68th AAA Brigade Headquarters.
- j. Company B, 33d Signal Construction Battalion will install Sixth Army Command Post and temporary trunk communications.

4. MAKURAZAKI (IX Corps) Area:

- a. It is assumed that IX Corps will land in the area about X 4 and will push northward up the shore of KAGOSHIMA W.N. The corps will place one spiral four cable along the route BYU, KIIRE, KAGOSHIMA. This cable shall be used at the discretion of the corps signal officer until wire contact is made with Sixth Army or it is supplanted by open wire construction.
- b. The air force construction battalion in the objective area, will initiate air strip, air warning, and air headquarters wire construction as required by 13th Fighter Command.
- c. Company B, 442d Signal Battalion (ASCOMO) will initiate construction of a single 10 pin arm pole line along the route MAKURAZAKI, BYU, KIIRE, KAGOSHIMA. This should be constructed with a view to future enlargement to three crossarms. Construction of a three crossarm lead KIIRE - YAMAKAWA will also be initiated.
- d. Company A, 442d Signal Construction Battalion (ASCOMO) will assist in construction outlined in paragraph 3 and will be prepared to

Initial Wire Construction Plan (cont'd)

move to KAGOSHIMA to initiate base construction when the military situation permits.

5. KUSHIKINO (V Amphibious Corps) Area:

- a. Corps construction troops will initiate construction of two spiral four cables along the route KUSHIKINO - KAGOSHIMA. This will be used at the discretion of the corps signal officer until wire contact is made with Sixth Army, or until supplanted by permanent construction.
- b. Company B, 24th Signal Construction Battalion (Sixth Army) will initiate construction of a single crossarm pole line (10 pin) on the route KUSHIKINO - KAGOSHIMA.
- c. The 276th Signal Construction Company (ASCOMD) will initiate construction of a single arm pole line KUSHIKINO - MAKURAZAKI and expand this line to three crossarms as rapidly as possible.
- d. The 253d Signal Construction Company (ASCOMO) will initiate construction of a three crossarm pole line KUSHIKINO - MAKURAZAKI. The companies mentioned paragraph 3 and 4 will be prepared to move to KAGOSHIMA to initiate base construction as necessary.

STANDARD OPERATING PROCEDURE FOR WIRE INSTALLATION BY SIXTH ARMY TROOPS

1. Open Wire Pole Line:

- a. Army and corps signal officers will designate routes of lines and location of necessary neutral points. Line surveys, chaining, preparation of transposition scheme, computation of deviations, and other construction details will be the responsibility of commanders of signal construction troops.
- b. Construction commanders will submit to higher headquarters the necessary data, span distances, line route maps, and transposition schemes to provide a permanent pole line record.
- c. Lines will be constructed using the exposed line transposition scheme (E.L.R. sections). Pole pairs will not be phantom transposed. Junction transpositions will be used. All transposition poles will be plainly and permanently marked indicating the type, (e.g. E-8, L-4, etc.).
- d. Test points will be installed at easily accessible locations. They will be double armed and #3 bridging connectors will be installed. Test points will not be installed at transposition poles. In general, they should be spaced at least ten (10) miles apart.
- e. Every endeavor shall be made to prevent construction delays due to shortages of materials. Commanders will exercise ingenuity in improvising substitute materials or methods.
- f. Daily reports of construction progress will be maintained, and furnished to higher headquarters on request.
- g. At the discretion of the corps signal officer, civilian communication lines may be rebuilt or reconditioned for army use. In such cases, careful inspection will be made to insure against enemy wire tapping. All such lines will be completely cut off at the most forward army terminal.

2. Spiral Four Cable:

- a. Spiral four cable will be considered a critical item, and will in general, not be used below corps headquarters except to advance the wire axis. Corps signal officers may authorize its use for other purposes where long carrier circuits are essential. For long tactical wire circuits, wire W-149, or W-110 B with repeaters will be employed.

SOP for Wire Installation by Sixth Army Troops (cont'd)

- b. Spiral four cable will be installed on poles or other structures, and will be supported on a messenger of #9 GI wire or equivalent.
- c. Loops shall be provided at couplings to facilitate testing, and all couplings will be legibly and properly tagged.
- d. Voltmeter tests with an EE-65 test set will be made as the cable is placed. Talking and ringing tests with a magnetic telephone do not provide a sufficient trouble indication, particularly for breakdown between conductors and the sheath.
- e. Before entering the objective area, construction commanders will insure that their troops are familiar with the proper methods of handling, installing, testing, and repairing spiral four cables.

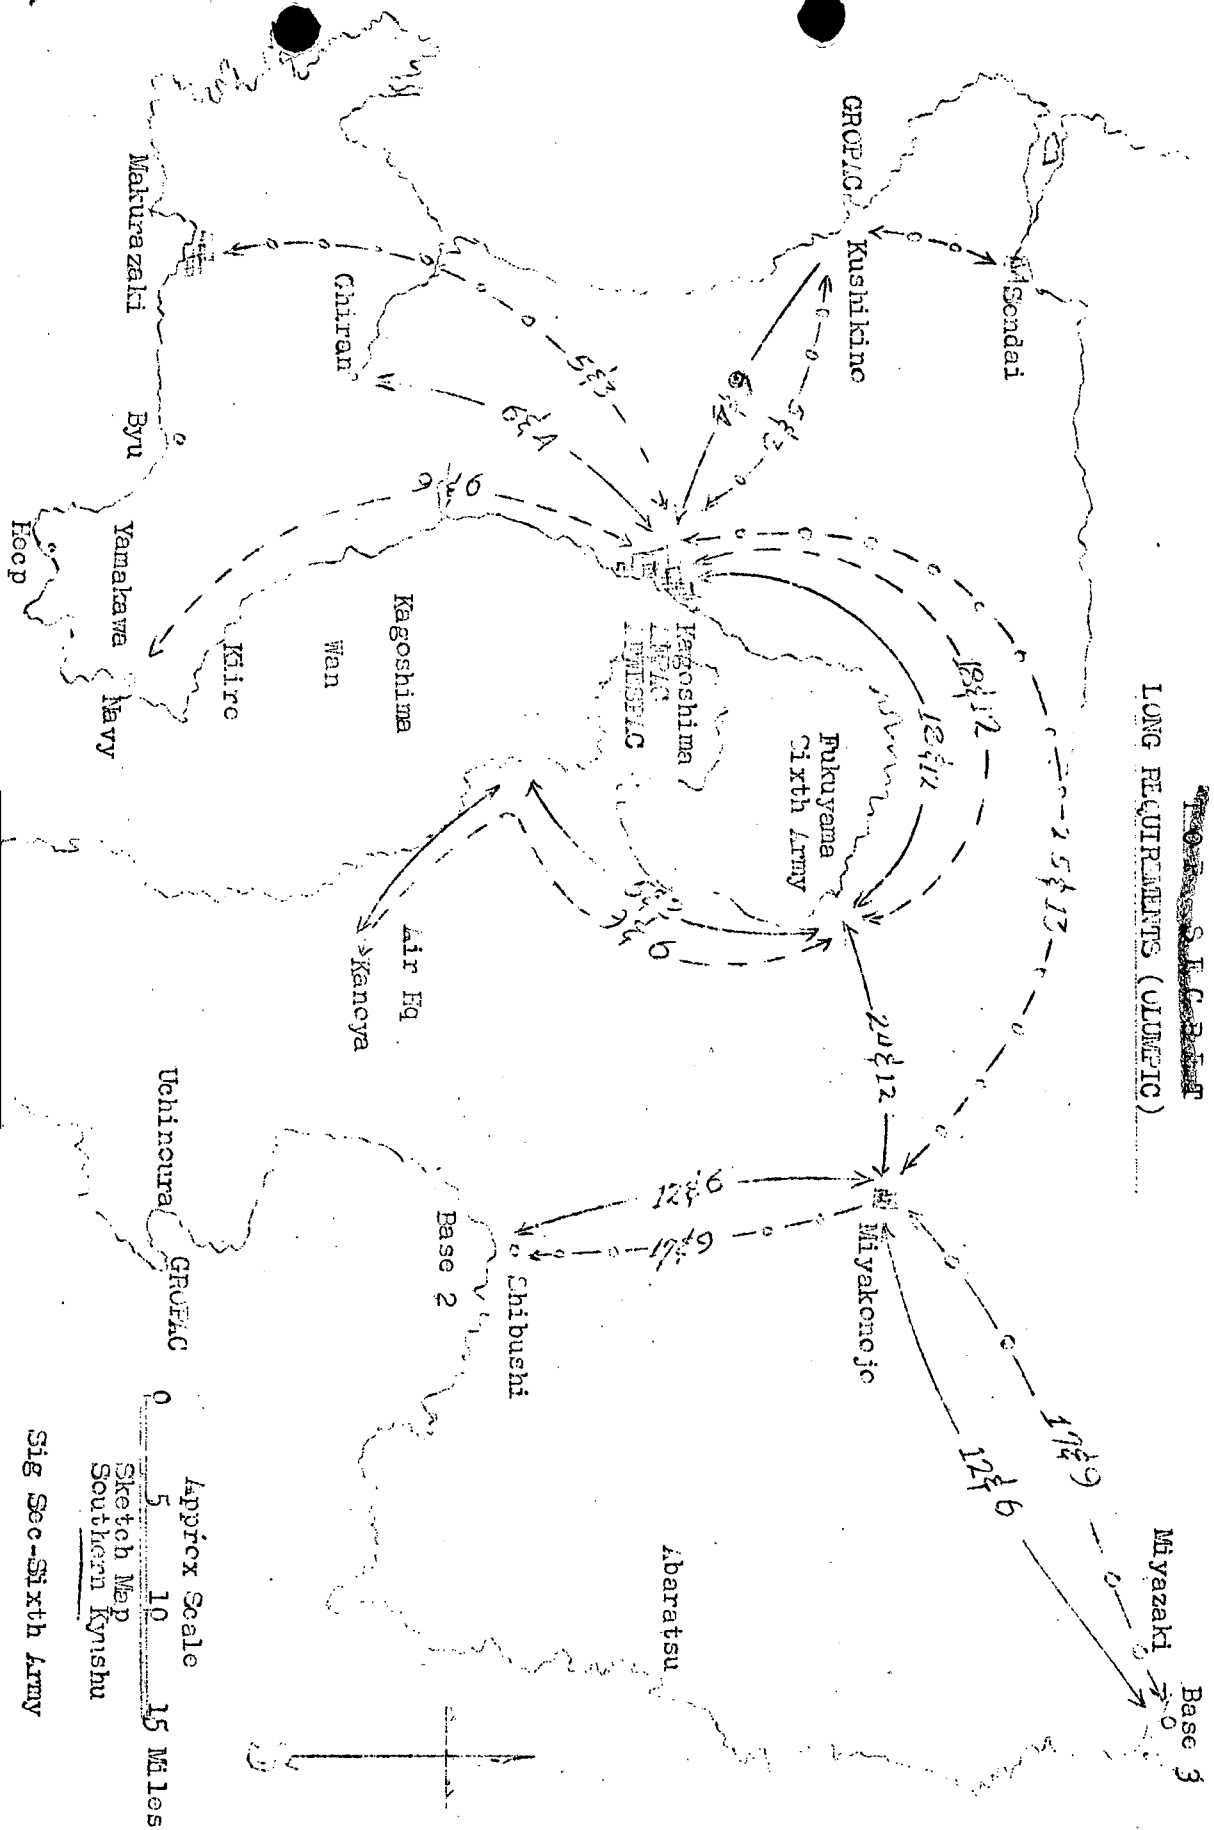

3. Field Wire:

- a. Except in urgent tactical situations, field wire will be placed off the ground on poles, trees, lance poles, etc. Loop and square knot ties are not recommended for any but the most temporary installation. Basket suspensions or the use of knobs will be used when practicable.
- b. Wire shall be tagged at least every quarter mile, and proper tagging codes employed.

4. General:

- a. Every effort will be made to recover and salvage or reuse all wire and cable. It is the responsibility of all echelons of command that wire and cable are recovered when abandoned due to displacement.
- b. Line route maps, traffic, and circuit diagrams, to include division and separate unit headquarters will be submitted to this headquarters on the 1st, 11th, and 21st of each month.

SIGNAL INTELLIGENCE

1. The Signal Intelligence Section, Headquarters Sixth Army, will be charged with the coordination of all signal intelligence activities within Sixth Army.
2. The Commanding Generals, I Corps, IX Corps, XI Corps and V Amphibious Corps will establish signal intelligence activities within their respective zones of operation as indicated below:
 - a. One (1) platoon each of the 62d Radio Intelligence Company plus an analysis team from Central Bureau, General Headquarters, will be attached to the I, IX, and XI Corps for operational control by each corps. The radio intelligence platoons now attached to the V Amphibious Corps will remain under the operational control of the corps commander. The V Amphibious Corps will be furnished an analysis team from Central Bureau, General Headquarters, to be used in connection with the radio intelligence platoons.
 - (1) The analysis team attached to each operating platoon will furnish such information as may be derived from the operation of the radio intelligence platoon directly to the corps commander.
 - (2) The commanding general of each corps will make necessary arrangements to furnish to the Signal Intelligence Section, Headquarters Sixth Army, via the fastest possible means one copy of each intercept message and direction finding bearing furnished by their respective operating platoons.
 - b. In addition the Commanding General, I Corps, will cooperate in the establishment of the following combined radio and radar countermeasures detachment in the corps area. This detachment will be under the operational control of Commanding General, Sixth Army.
 - (1) From the 3153d Signal Service Company:
 - 1 - Detachment Headquarters Team
 - 1 - AF-3 Team mess
 - 2 - D/F Teams IV-5 and IV-6
 - (2) From the 3191st Signal Service Company:
 - 1 - Detachment Headquarters Team
 - 4 - Radar Countermeasures Teams
3. The 62d Radio Intelligence Company will:
 - a. Provide one (1) each operating platoon to the Commanding Generals, I, IX, and XI Corps for their operational control.

Signal Intelligence (cont'd)

- b. Provide a liaison officer to Signal Intelligence Section, Sixth Army.
- 4. The 3153d Signal Service Company will:
 - a. Be prepared to operate necessary radio countermeasures within Sixth Army under the direction of Signal Intelligence Section, Headquarters Sixth Army.
 - b. Furnish a liaison officer to Signal Intelligence Section, Headquarters Sixth Army.
 - c. Be prepared to furnish to the Commanding General, I Corps, one (1) detachment as prescribed in paragraph 2b(1) above.
- 5. The 3191st Signal Service Company will:
 - a. Be prepared to accomplish the following missions under the direction of Signal Intelligence Section, Headquarters Sixth Army:
 - (1) Detection and jamming of enemy search and early warning radar and continuous direction finding.
 - (2) The jamming of enemy airborne search radar in harbor areas.
 - b. Furnish a liaison officer to Signal Intelligence Section, Headquarters Sixth Army.
 - c. Be prepared to furnish to the Commanding General, I Corps, a detachment as prescribed in paragraph 2b(2) above.
- 6. The radio nets that will be established by the 62d Radio Intelligence Company, the 3191st Signal Service Company and the 3153d Signal Service Company for the passing of radio intelligence, radio countermeasures and radar countermeasures traffic are shown in Incl. 1 to this appendix.

HEADQUARTERS SIXTH ARMY
A. P. O. 442
19301 28 July 1945

ANNEX 9 to FO 74, Field Artillery.

1. Mission:

The artillery with the Army will provide maximum fire support for assault troops, neutralize enemy installations as soon as located, break up enemy counterattacks by fire, and prepare for rapid displacement to furnish continuous fire support.

2. Organization for Combat:

a. Army Artillery:

Headquarters and Headquarters Battery, 420th Field Artillery Group:

226th Field Artillery Battalion (155mm Gun)
750th Field Artillery Battalion (8" How)
543d Field Artillery Battalion (240mm How)
422d Field Artillery Battalion (4.5" Rocket)

b. I Corps:

Headquarters and Headquarters Battery, I Corps Artillery:

289th Field Artillery Observation Battalion
55th Field Artillery Battalion (155mm How)
769th Field Artillery Battalion (155mm How)
168th Field Artillery Battalion (155mm Gun)

Headquarters and Headquarters Battery, 168th Field Artillery Group:

433d Field Artillery Battalion (155mm Gun)
465th Field Artillery Battalion (8" How)
544th Field Artillery Battalion (240mm How)

c. IX Corps:

Headquarters and Headquarters Battery, IX Corps Artillery:

287th Field Artillery Observation Battalion
803d Field Artillery Battalion (155mm How)
804th Field Artillery Battalion (155mm How)
223d Field Artillery Battalion (155mm Gun)

~~TOP SECRET~~

d. XI Corps:

Headquarters and Headquarters Battery, XI Corps Artillery:

624th Field Artillery Observation Battalion
757th Field Artillery Battalion (155mm How)
760th Field Artillery Battalion (155mm How)
517th Field Artillery Battalion (155mm Gun)

Headquarters and Headquarters Battery, 191st Field Artillery Group:

756th Field Artillery Battalion (155mm How)
531st Field Artillery Battalion (155mm Gun)
789th Field Artillery Battalion (8" How)

e. V Amphibious Corps: (USMC)

Headquarters and Headquarters Battery, V Amphibious Corps Artillery:

5th 155mm Howitzer Battalion (USMC)
10th 155mm Gun Battalion (USMC)
11th 155mm Gun Battalion (USMC)
12th 155mm Gun Battalion (USMC)

Headquarters and Headquarters Battery, 223d Field Artillery Group:

477th Field Artillery Observation Battalion
668th Field Artillery Battalion (155mm How)
669th Field Artillery Battalion (155mm How)
435th Field Artillery Battalion (8" How)

3. Each Corps Commander and the Commanding Generals, 40th Division and 158th Regimental Combat Team, will:

- a. Coordinate artillery, naval gunfire, and air support as outlined in Appendix A (Sixth Army SOP, "Planning and Coordination of Artillery, Naval Gunfire and Naval Air Support", dated 8 July 1945). Initial corps zones of responsibility for this coordination are given in Appendix B.
- b. Coordinate all fire plans for defense against waterborne landings with their respective Naval Attack Force or Group Commanders.
- c. Coordinate the employment of tank destroyers and antiaircraft artillery (including radar) against ground targets and waterborne landings.
- d. Furnish qualified artillery officers to act as artillery spotters in naval observation aircraft operating from CVEs as arranged with their respective Naval Attack Force Commanders. These spotters will function until artillery liaison aircraft are operating ashore. Artillery officers assigned as spotters will be trained in both Army and Navy procedures for adjusting fire and will be thoroughly briefed on the plan of action of the ground forces.

- e. Furnish artillery officers qualified to adjust naval gunfire, if available and if desired by their respective Naval Attack Force Commanders, to function as naval gunfire spotters operating from float planes of heavy fire support ships.
 - f. Coordinate survey within their respective zones of action.
 - g. Establish a definite procedure for the protection of supporting aircraft from friendly artillery and naval gunfire, with particular attention to the employment of VT fuzes. (See paragraph 10, Appendix A)
4. Special Instructions:
- a. Artillery will not destroy bridges along routes of advance except in an emergency.
 - b. The Target-Area Designator Grid System appearing on 1:25,000 battlemaps will be used by all artillery units in the Sixth Army for the numbering and designating of targets.
5. Liaison Aircraft:
- a. Each corps, division, and artillery group will maintain an airstrip suitable for L-5 aircraft.
 - b. All artillery air sections will carry a 60 day supply of aircraft spare parts.
6. Artillery Liaison will be established initially as follows:
- a. By the Army Artillery Officer with the respective Commanding Generals, I, IX, and XI Corps Artillery, and the Commanding General, V Amphibious Corps Artillery.
 - b. By the Commanding General, XI Corps Artillery, with the Commanding General, I Corps Artillery. (For artillery liaison nets see ANNEX 5)
 - c. By the Commanding General, IX Corps Artillery, with the Commanding General, V Amphibious Corps Artillery. (For artillery liaison nets see ANNEX 5)
7. Ammunition:
- a. The use of colored smoke and illuminating shell will be as directed by corps commanders. Care will be exercised that the use of illuminating shell does not reveal friendly installations or movements.
 - b. All officers must be cognizant of the necessity for restricting the expenditure of artillery ammunition to remunerative targets, the neutralization of which will insure success to the infantry.

8. Reports:

- a. The following reports will be submitted by each corps artillery officer direct to the Army Artillery Officer using the most expeditious means of communication available.

(1) Location Reports: (as of 1200 each day)

- (a) Locations and directions of fire of all battalions and detached batteries of the artillery with the corps.
- (b) Locations of group, division, and corps artillery command posts.
- (c) Locations of all L-5 airstrips in the corps zone.
- (d) A complete report will be submitted weekly. Changes thereto will be submitted daily.

(2) Other Reports:

- (a) A list of telephone code names of all artillery units with the corps will be submitted with the first Location Report. Changes thereto will be reported as they occur.

- b. Artillery liaison aircraft reports will be submitted as directed in Sixth Army letter, AG 452 H-11, Subject: "Field Artillery Liaison Aircraft", dated 17 March 1945.

BY COMMAND OF GENERAL KRUEGER:

G. H. DECKER,
Major General, G. S. C.,
Chief of Staff.

OFFICIAL:

G-3 *W. H. Decker*

STANDING OPERATING PROCEDURE

8 July 1945

PLANNING AND COORDINATION OF ARTILLERY,
NAVAL GUNFIRE, AND NAVAL AIR SUPPORT

1. REFERENCES:

a. Amphibious Forces Circular Letter AL-15 Rev. 3, "General Instructions for Planning and Executing Ship, Air, and Artillery Support of Landing Operations", dated 25 June 1945.

b. FMFPac SOP No. NCF-1, "Shore Fire Control Instructions", dated 9 February 1945.

2. GENERAL:

a. The maximum effectiveness of artillery, naval gunfire, and air support of assault troops can be attained only when such support is carefully planned and coordinated so that profitable targets are attacked at the most propitious time; that each supporting arm is employed upon missions best suited to its capabilities; that duplication of missions is avoided; and that missions executed by each do not endanger elements of the other or of the assault troops.

b. This SOP prescribes the methods of requesting, coordinating with artillery, and allocating naval gunfire and naval air support. The details of control of naval gunfire and air support after it has been allocated are not covered in this SOP except where such knowledge is essential to all arms. However, all officers concerned with the coordination of naval gunfire and air support should familiarize themselves with the details of this control by direct contact with the appropriate representatives. Such knowledge will enable them to perform their duties more efficiently.

c. Available Support:

- (1) The control of certain fire support ships and support aircraft is decentralized by the Commander, Amphibious Force, to the commander of each naval attack force in support of a ground unit, who will in turn furnish ships and aircraft for direct support and general support.
- (2) The amount of this naval gunfire and air support allotted to the commanders of naval attack forces will be in accordance with the needs of the supported ground unit and will vary from time to time.

d. The procedures prescribed herein will be followed in the preparation of fire support plans and in the coordination of such support.

3. DEFINITIONS:

a. Support Aircraft - The designation "support aircraft", as used herein, will be construed to include only such aircraft under naval control as

~~C-O-N-F-I-D-E-N-T-I-A-L~~

are used on air strikes in support of ground forces. All other aircraft are excluded, specifically combat air patrols, antisubmarine patrols, photo planes, and all liaison planes.

b. Fire Support Ships - The designation "fire support ships", as used herein, will include only those ships and craft which are employed in the attack of ground targets. The term includes both the ships and craft assigned to close support and those used on deep support missions.

c. Coordinating Agent - The designation "coordinating agent", as used herein, refers to the commanders or representatives of the supporting arms (artillery, naval gunfire, and naval air) of any particular command echelon. Such agents include:

(1) Air Support:

Commander Air Support Control Unit

(CASCU) (with army and corps afloat)

Commander Landing Force Air Support Control Unit
(CLFASCU) (with army and corps ashore)

Air Liaison Officer, Air Liaison Parties (ALO) (ALP)
(JASCO personnel with divisions and lower units ashore)

G-3 for Air of Army, Corps, and Divisions.

(2) Field Artillery:

Army, Corps, and Division Artillery Officers (Arty O)

Direct Support Field Artillery Battalion Commanders
(Bn Comdr)

Field Artillery Liaison Officers (Ln O)

(3) Naval Gunfire:

Naval Gunfire Control Officers (NGCO) (Naval officers on staffs of naval task force commanders aboard command ships)

Naval Gunfire Officers (NGO) (Specially trained artillery officers of staffs of corps with naval officer assistants)

Naval Gunfire Liaison Officers (NGLO) (Naval officers of JASCO's with divisions and lower units)

4. RESPONSIBILITY FOR PREPARATION OF FIRE SUPPORT PLANS AND COORDINATION OF ARTILLERY, NAVAL GUNFIRE, AND AIR SUPPORT:

a. The Army Commander, through the Army G-3 and Army Artillery Officer, will:

(1) Recommend the allocation of fire support ships and naval air support to the corps in accordance with the overall tactical situation.

(2) Coordinate requests from the corps for naval gunfire and air support beyond the means available to the corps.

- (3) Adjust matters covering naval gunfire and naval air support requiring coordination between corps that cannot be settled by direct communication between the corps.

b. Corps, division, and separate ground unit commanders will be responsible for the preparation of fire support requests and the coordination of artillery, naval gunfire, and air missions in support of ground forces under their command. Initial corps zones of responsibility for this support will be designated in each operation. These boundaries will be changed to coincide with corps boundaries as soon as the latter are established.

c. The proper planning and coordination of artillery, naval gunfire, and air support requires that all coordinating agents within a headquarters, especially corps and division headquarters, work together at all times. One staff officer of each headquarters should be designated to coordinate the activities of all three support arms (artillery, naval gunfire, and air). The corps artillery officer will be designated as this principal coordinating agent in each corps. Afloat, the corps artillery officer will be on the naval fire support command ship to act for the corps commander, as directed by the latter, in matters of fire support.

5. TARGET INFORMATION CENTER (TIC):

a. In order to facilitate the preparation of fire support plans (particularly for scheduled fires), each corps will establish, within its headquarters, a target information center (TIC). This center will collect and record information from all available sources of suitable targets for attack by artillery, naval gunfire, and air strikes (See Annex 3).

b. The TIC will maintain an up-to-date, cross-indexed file of all appropriate targets located by or reported to it (similar to the usual counter-battery file but including all types of targets). In addition a target information map will be kept on which all active fixed and semifixed targets will be posted.

c. The TIC will maintain records of firing or bombing attacks against the targets recorded at the TIC and of the results of such attacks.

6. COORDINATION POLICIES AND PROCEDURES:

a. Coordinating Agent--There will be present with each echelon from infantry battalion to army, a commissioned representative of each support arm (artillery, naval gunfire, and air), with adequate communication facilities. (See Annexes 1 and 2). These representatives of the support arms are coordinating agents for their respective arms in the matters of fire support for and affecting their particular echelon in addition to advising commanders in the employment of their arm. They are responsible that their arms are properly exploited.

b. Actual coordination is performed by the coordinating agents of the three support arms in each echelon under the supervision of the commander or his designated representative. These agents insure that missions assigned to their support arms are such that the capabilities of each type of support will be utilized with full effectiveness and that neither ships, ground troops, nor aircraft in flight will be endangered by friendly fires.

c. These coordinating agents will be thoroughly familiar with the characteristics, capabilities, and limitations of their respective arms and will keep themselves informed of the tactical situation at all times. They will maintain close liaison with each other and with the supported unit commander or his representative.

d. If the facilities for the type of support appropriate to a mission requested by a commander are immediately available to that commander, the mission will be coordinated and executed without reference to a higher echelon provided adjacent units are neither endangered nor their operations, interrupted. If the mission endangers adjacent units or interrupts their operations, the matter will be coordinated within the echelon of the commander who controls all of the ground troops involved. However, when a support mission is directed against a target within the zone of responsibility of a corps and will endanger or affect the troops or operations of an adjacent corps, coordination will be arranged directly between the corps concerned. Matters which cannot be adjusted between corps will be referred to the army for decision.

e. Division and regimental headquarters have no coordination function when afloat in respect to matters covered herein. When a unit ashore requests a support mission which is beyond the means available to that unit, the coordinating agent of the arm from which support is desired will transmit the request to the corresponding coordinating agent aboard the fire support command ship. This agent will in turn notify the other coordinating agents aboard. The corps artillery officer, as the representative of the corps commander aboard the fire support command ship, will determine the agency to execute the mission or will refer the request to the army after informing the corps commander if the mission cannot be performed with the facilities available.

f. When division and regimental command posts are established ashore the coordinating agents with these echelons will coordinate support missions requested within the unit. Requests for air strikes and additional naval gunfire originating in infantry assault battalions and regiments, after being coordinated in the originating headquarters, will be transmitted to the lowest echelon having the support facilities available (division or corps for artillery and naval gunfire, and corps for air strikes). The regimental and division air liaison officers will monitor the corps support air request net. They will inform the regimental and division commanders or their designated representatives of all air strikes requested. The latter will disapprove, by transmission over the support air request net, those requests that are not desired. Silence will signify consent. Corps and division commanders may modify this procedure as desired to effect more centralized control as the situation becomes stabilized.

g. Transfer of corps command posts from ship to shore will not change the procedures outlined above.

h. In determining which arm or arms will execute a mission, consideration will be given to the quantities of support available (including ammunition supply) and the effect of the various types of support on the particular target under consideration. As a general rule, if all means of support are equally available and equally capable of accomplishing the desired effect, the order of priority in the assignment of missions should be artillery, naval gunfire, and air. This will insure the greatest economy of means. In the choice of an air strike, consideration should also be given to the amount and extent of artillery and naval gunfire which must be suspended to insure the safety of the aircraft making the strike.

7. PREPARATION OF FIRE SUPPORT PLANS:

a. Insofar as is practicable all artillery, naval gunfire, and air support missions will be foreseen and planned on time schedules. These include all missions not of immediate importance to the maneuver or security of front line assault units, nor of immediate importance to the security or success of the whole or any part of the operation.

~~C-O-M-M-A-N-D-I-N-G~~

b. Requests for prearranged fires and air strikes on certain targets will be received from ground unit commanders and from subordinate echelons. Others will be selected by the corps commander or his representative after a thorough study of the scheme of maneuver and all available target information. The missions will include those of harassing, illuminating, interdiction and defensive fires during the night, preparation and supporting fires for the next day's operation, support of independent operations not directly pertaining to the main operation, and others on terrain of projected operations.

c. Fire support plans of subordinate echelons and requests for support which is not available within the echelon, when approved by the echelon commander, will be submitted to the next higher echelon for coordination and inclusion of the requested support fires in the fire support plan of the higher echelons.

d. Corps commanders will submit to supporting naval task force commanders, at such times as the latter direct, an estimate of the number and type of fire support ships and support aircraft which will be required on the following day. Requests for prearranged fires to be executed at night and support to be provided each day, after approval by the corps commanders, will be furnished to naval task force commanders supporting the corps at such times as the naval task force commanders direct.

e. The fire support plan will include location and nature of targets to be attacked, the support arm to execute the missions, type of effect to be sought (for naval fires-caliber of gun), and the time when or time limits within which the mission is to be executed.

f. Location and nature of known targets are available in the TIC and this agency should be utilized to the fullest extent in the preparation of fire support plans.

g. Schedules for the execution of prearranged supporting fires are prepared by the commander of the supporting arm for missions assigned to it and will include in addition to the details given in the fire support plan, the unit or element to execute the mission, the ammunition to be expended, and specific time at which fire is to be executed. Prompt report will be made of any delay in time of execution.

8. CALL FIRES:

a. Those fires of immediate importance to the maneuver or security of front line assault units will normally be requested of the support arm by naval spotter, artillery observer, or the coordinating agent with the unit. These targets will be so transitory or of such serious nature that fire must be delivered promptly. When support facilities are not available within the echelon the requests will be transmitted to a higher echelon for execution (see paragraph 6).

9. TRANSITION FROM NAVAL AIR SUPPORT TO ARMY AIR FORCES AIR SUPPORT:

a. During the initial stages of an amphibious operation air support is a responsibility of the Navy. All Army Air Force aircraft in or near the objective area will be under naval control. At some specific time, as announced by CINCPAC in coordination with CINCPAC, the Army Air Forces will assume the responsibility for air support in the objective area. Naval aircraft in the objective area will thereafter be under the control of the Army Air Forces.

b. This transition from naval air support to army air support will involve little change in the coordination procedures as outlined herein as the G-3 for Air in each headquarters will have been working closely with naval air support agencies. The principal change will be the substitution of Army Air Force coordinating agencies in the various headquarters for the naval air coordinating agencies. However, the naval agencies including JASCO personnel will be available to assist in air support as requested by the Army Air Force. Corps artillery officers will continue to coordinate artillery and naval gunfire. The overall coordination of the supporting arms after the Army Air Force assumes responsibility for air support will be as directed by corps and division commanders.

10. SAFETY MEASURES:

a. When an air strike is to be executed, fire support ship and group commanders, infantry unit commanders, and artillery officers as commanders of corps, and division artillery, are responsible that any necessary suspension or restriction of fires is accomplished. In all cases wherein naval and field artillery fire are ordered suspended, the same restriction will be applied to all similar weapons.

b. In order that artillery and naval gunfire will not remain unduly suspended and that infantry units will know when their advance can continue without danger of air bombardment by friendly aviation, a prearranged flare signal normally will be fired by the last airplane participating in the strike. However, the exact type of signal will be designated for each strike. In addition to indicating completion of an air strike by means of a prearranged signal, the air coordinator aloft will cause to be transmitted by VHF radio, to the air liaison officer with each echelon, notification of the completion of the mission.

c. When it is determined that a mission will be executed by support aircraft the commander air support control unit (CASCUC) will furnish the following information to the corps artillery officer:

- (1) Time and duration of strike.
- (2) Number and type of aircraft to execute the mission.
- (3) Minimum altitude (from sea level) at which aircraft will operate during the mission.
- (4) Direction of approach.
- (5) Means to be employed in notifying the ground forces that the mission has been completed.

The artillery officer will then notify naval gunfire control officers and artillery commanders of the next lower echelon concerned, including in the notification definite instructions as to what support fires must be suspended, in which areas, and for what period of time.

d. When supporting fires are to be controlled in an area during an air strike by the suspension of fires, the following uniform procedures will be employed by all concerned:

- (1) Plan Victor: This plan will be placed in effect during air strikes executed above 1100 feet. While this plan is in effect, all fires (naval guns, artillery, and other weapons)

~~C-O-N-F-I-D-E-N-T-I-A-L~~

having trajectories with an ordinate in excess of 1100 feet above the altitude of the target when entering or passing over an area within a 1000 yard radius of the center of the target, will be suspended during the specified time interval. A type message placing this plan in effect follows: "From Fort Dix, Plan Victor--1015 to 1045. Target area 1872A (target-area designator grid system). Last plane fires white flare."

- (2) Plan Negat: This plan will be placed in effect during air strikes executed below 1100 feet. While this plan is in effect all supporting fires (artillery, naval gunfire, and other weapons), except flat trajectory, direct fire, entering or passing over an area within a 1000 yard radius of the center of the target, will be suspended during the specified time interval. A type message placing this plan in effect follows: "From Fort Dix, Plan Negat--1015 to 1045. Target Area 1471 C. Last plane fires white flare."
- (3) If for any reason, it is deemed necessary to control supporting fires in a larger area, the message would be changed as follows: "From Fort Dix, Plan Victor (Plan Negat)--1015 to 1045, 4000 yards. Target area 1984 R. Last plane fires white flare." This message would increase the radius of the circle from the center of the target to 4000 yards.
- (4) The responsibility for transmitting these messages to the artillery commanders, naval gunfire officers, and to the commander of the supported units concerned, will rest with the artillery coordinating agent in each echelon.

e. In the event that a prospective air target is of such transitory nature that sufficient time is not available to suspend or control artillery and naval gunfire support, the commander air support control unit (CASCU) in conference with the corps artillery officer and naval gunfire officer will determine, after weighing the risks involved, whether or not the requested air mission should be executed.

f. As an additional precaution against unnecessarily endangering support and liaison aircraft, all commanders will take the necessary action to insure that there is maintained at the position of each field artillery battery and other indirect fire weapons, at all times while firing during the daylight hours, an air sentry charged with the duty of observing friendly aircraft in flight and notifying the officer controlling the fire when it becomes probable that a friendly plane will cross the trajectory at an altitude which will endanger the airplane. All personnel at artillery observation posts, forward observers, and naval gunfire spotters are also charged with this duty.

g. All commanders of ground forces employing spotting or liaison aircraft are charged with the duty of notifying such planes of projected air strikes and causing them to be clear of the area during the strike.

11. INDOCTRINATION OF SUBORDINATE UNIT COMMANDERS:

a. Subordinate unit commanders will be thoroughly indoctrinated with the system of planning for artillery, naval, and air support and with the procedures for the coordination thereof as prescribed herein.

SUGGESTED OPERATION OF TIC

1. General:

a. Following is a suggested method for operation of a TARGET INFORMATION CENTER by Corps Artillery Headquarters. The TARGET INFORMATION CENTER (TIC) is a part of the artillery S-2 section. The purpose of this center is to collect and record information from all available sources concerning suitable targets for artillery fire, naval gunfire, and air attack, and to evaluate these targets as to importance. This information will enable the corps to plan prearranged supporting fires (artillery, naval gunfire, and air) to include the most important and potentially remunerative targets. Equally important, this center enables corps to propose appropriate targets on very short notice. The TIC is in effect the Navy TIC moved ashore from the Fire Support Command Ship. To insure immediate operation ashore the Corps Artillery S-2 or his representative should be aboard the Fire Support Command Ship to obtain all known target information.

b. The center should be located so as to contribute to close liaison with the Corps G-2 section and with the operations sections of the Corps and Corps Artillery.

c. Reference is made to paragraphs 43-46 and Appendix 1 of FM 6-100 for the basic principles and requirements necessary in the Corps Artillery Headquarters Counterbattery Section. Basically a TIC is a counterbattery section having the added responsibility of handling targets of all types.

2. Personnel and Duties:

a. The personnel necessary to operate the TIC will vary with each headquarters, depending on the personnel available and on the activity of information gathering agencies. Personnel can be interchanged to fit the needs. However, each man in the TIC should be familiar with all its functions.

b. The officer in charge of the TIC is responsible for its operation, under supervision of the artillery S-2. He will see that all suitable targets received are posted and recorded, and that coordination between the TIC and PI teams is maintained. He sees that photographic coverage for the TIC is requested. Requests for field artillery photo and reconnaissance missions will be submitted through artillery channels to the Corps G-2. The officer in charge of TIC sees that the artillery officer is kept informed of the status of targets. Specific duties of the TIC are:

- (1) Receive and record information.
- (2) Plot targets.
- (3) Index, cross-index, and file target information cards and photos.
- (4) Interpret aerial photos.
- (5) Recommend appropriate means of attack of suitable targets.
- (6) Promptly disseminate target information.
- (7) Prepare records, reports, overlays, etc. as necessary.

~~C-O-N-F-I-D-E-N-T-I-A-L~~

c. PI teams attached to Corps Artillery Headquarters will perform photo interpretation and will make photo studies to determine the results of attack on specific targets.

3. Each TIC should maintain the following records and files:

a. Target Map: The standard Army Map Service 1:25000 topographic map will be used as the target map. On this map active, fixed, and semi-fixed targets appropriate to any of the attacking arms will be posted.

- (1) The Target Area Designator Grid System will be used by all artillery units with the Sixth Army as both a target numbering system and as a target designating system. Since this method will be used by all units of the Fleet's surface and air arms, it is imperative that the ground forces use this common system in order to assure prompt delivery of fire and eliminate the possibility of mistakes.

b. See Appendix 1 (Counterbattery Intelligence Aids) TM 6-100 for necessary records. The counterbattery register listed therein is not recommended. Suggested blank forms for necessary files are attached hereto as inclosures 1, 2, 3, 4, and 5.

c. Use of the forms mentioned in b. above is explained below.

- (1) The shelling report file (Inclosure 1) is the form for original entry of all shelling reports from whatever source. All pertinent information should be entered on the form. Headings are self-explanatory. Sample entries have been made.
- (2) The enemy installation journal (Inclosure 2) is a convenient means of recording all initial reports on enemy installations and activities except shelling reports which are entered in the shelling report file. Note that the enemy installation journal handles all types of targets.
- (3) The enemy installation file (Inclosure 3) is self-explanatory. Note that one sheet is made up for each 1000 yard square on the active enemy front. Entries in continuation of the problem commenced in (1) and (2) above have been made. This file distinguishes enemy batteries from other enemy installations thus obviating the use of another file sheet. If this file is used as indicated, the enemy battery cross index (Inclosure 4) is not believed necessary unless a large number of enemy batteries or installations appear in one grid square.
- (4) The enemy battery cross index (Inclosure 4) is a convenient method of correlating various entries pertaining to the same enemy battery in the enemy installation journal. The grid square is entered in the left hand column. The alphabetical columns across the top of the sheet are for each 200 yard square within the 1000 yard square. The line numbers from the enemy installation journal (Inclosure 2) pertaining to the same enemy battery are entered in the appropriate letter column opposite its 1000 yard grid square. In the example the cross index file indicates that line 36 of the journal pertained to 1000 yard grid square 0269 and 200 yard square K. Later entries falling in the same 200 yard square or nearby may indicate that a card file should be filled out on the enemy battery.

- (5) The card file (Inclosure 5) should be filled out and maintained when an enemy gun or battery location has become fixed. The card file is a semi-permanent record of the enemy battery and attendant information. When the enemy battery has not been reported active for a period of 72 hours or has been definitely destroyed, then the card file may be placed in the inactive or dead file. Sample entries have been made on Inclosure 5 to illustrate its use.
- (6) The S-2 assignment sheet (Inclosure 6) is a convenient means of presenting TIC results to the Corps Artillery S-3 for action. Headings indicate the use of the form. Sample entries have been made.

4. Classification of Targets:

a. All targets will be classified as to their type. Classification will clearly indicate the nature of the target.

- (1) Military installations, e.g. artillery weapons, AAA, troop concentrations, etc.
- (2) Terrain target, e.g. bridges, roads and buildings, etc.
- (3) Target to be avoided, e.g. hospitals, etc.

b. Strict supervision will be exercised in assigning priorities for the attack of targets. Priorities will be assigned as follows: "A" highest, "B" of next importance, "C" of least importance, and "X" of no immediate concern.

5. Procedure:

a. When target information is received, an initial plot is made, the target is classified, a card prepared, information evaluated, priority assigned, type of attack recommended. If information is from sources other than photo interpretation, PI is instituted and, if necessary, photo coverage requested. The results of interpretation are entered on the card; the plot is corrected by restitution.

b. Target information will be disseminated through artillery channels except in emergencies when it may be transmitted direct to the unit immediately concerned.

c. The operations officers will be kept informed continuously of all important targets. Target information will be furnished periodically and more frequently if so requested. Target information reports will always include target number, map and photo coordinates, type, nature, brief description, altitude, priority, recommended type of attack, and the results of attack if action has already been taken.

Inclosure 1 - Shelling Report File.
Inclosure 2 - Enemy Installation Journal.
Inclosure 3 - Enemy Installation File.
Inclosure 4 - Enemy Battery Cross Index.
Inclosure 5 - Enemy Battery Card.
Inclosure 6 - S-2 Assignment Sheet.

ANNEX 10 to FO 74, Antiaircraft Defense.

1. Mission:

Assist in the antiaircraft defense while afloat, establish antiaircraft defense for landing beaches, ports, river crossings, bridges, defiles, airdromes, advanced landing strips, troop concentrations, supply installations, and other vital objectives.

2. Organization for Combat:

a. Army Antiaircraft Artillery:

104th AAA AW Bn (Mbl)
389th AAA AW Bn (SM)
(with Btries C and D, 475th
AAA AW Bn (AF) Atchd)
736th AAA Gun Bn (SM)
227th SRMU (C)
743d AAA Gun Bn (Mbl)
296th SRMU (C)

744th AAA Gun Bn (Mbl)
201st SRMU (C)
745th AAA Gun Bn (Mbl)
297th SRMU (C)
233d AAA SL Bn (A) (less Btry A)
95th SRMU (A)

b. I Corps:

40th AAA Brig
159th AAA Opns Det
119th AAA Gp
14th AAA Gp
163d AAA Gun Bn (SM)
231st SRMU (C)
166th AAA Gun Bn (SM)
203d SRMU (C)

198th AAA AW Bn (SM)
202d AAA AW Bn (SM)
209th AAA AW Bn (SP)
227th AAA SL Bn (B) (less Btry B)
94th SRMU (A)
200th SRMU (A)
1417th ESMD
1431st ESMD

c. IX Corps:

15th AAA Gp
158th AAA Opns Det
528th AAA Gun Bn (SM)
202d SRMU (C)
392d AAA AW Bn (SM)

945th AAA AW Bn (SM)
Btry B, 227th AAA SL Bn (B)
195th SRMU (A)
1418th ESMD

~~TOP SECRET~~

d. XI Corps:

68th AAA Brig	476th AAA AW Bn (SM)
144th AAA Opns Det	579th AAA AW Bn (SP)
33d AAA Gp	224th AAA SL Bn (B)
35th AAA Gp	196th SRMU (A)
161st AAA Gun Bn (SM)	87th SRMU (A)
293d SRMU (C)	197th SRMU (A)
497th AAA Gun Bn (SM)	1419th ESMD
245th SRMU (C)	1421st ESMD
382d AAA AW Bn (SM)	1423d ESMD

e. V Amphibious Corps:

2d Prov AAA Gp	9th AAA Bn
17th AAA Bn	18th AAA Bn

f. 40th Infantry Division:

214th AAA Gp	739th AAA Gun Bn (SM)
470th AAA AW Bn (SM)	299th SRMU (C)
Btry A, 233d AAA SL Bn (A)	
189th SRMU (A)	
1434th ESMD	

g. 158th Regimental Combat Team:

475th AAA AW Bn (AT)
(less Btries C and D)

3. a. Responsibility:

Commanding Generals, I Corps, IX Corps, XI Corps, V Amphibious Corps, 40th Inf Division, and 158th Regimental Combat Team will be responsible for the antiaircraft defense and an adequate air warning system within their respective zone of action, until relieved of responsibility therefor.

b. Control of AAA Fire:

- (1) Mobile AAORS will land in each corps, separate division, and RCT zone of action as soon as the tactical situation permits. Brigade and separate AAA unit commanders will establish communications with all subordinate AAA units, and disseminate fire control orders received on the local air warning net from the Support Aircraft Controller. Brigade and separate unit AAORS will be prepared to transpose polar coordinates in degrees and nautical miles to the air defense grid. For points of origin for polar coordinates see Annex 5; Signal.
- (2) Upon assumption of air warning responsibilities by the tactical control center, brigade and separate unit AAORS will transmit alerts and fire restriction orders from the tactical controller to the antiaircraft artillery units within their respective zones of action.

~~TOP SECRET~~

- (3) Antiaircraft units unable to establish communications with the AAOR responsible for dissemination of alerts and fire direction orders within their respective zones of action will fire only at aircraft identified or recognized as hostile or committing a hostile act.

x. (1) Antiaircraft Defense Standing Operating Procedure Instructions No. 2, Headquarters Sixth Army, 1 July 1945, will govern air - antiaircraft cooperation.

(2) Secondary AAA Roles:

(a) AAA units will fire against ground or waterborne targets and provide illumination of the battlefield and of beaches and the seaward approaches thereto as required.

(b) AAA Commanders will establish liaison with appropriate field artillery commanders for terrestrial fire direction.

(3) Commanders of brigades and groups will be prepared to establish mobile AAORs to coordinate antiaircraft support of ground units as the corps and separate organizations advance.

(4) Antiaircraft artillery units listed as Army antiaircraft artillery will be prepared to augment the antiaircraft defense in any zone of action, as directed.

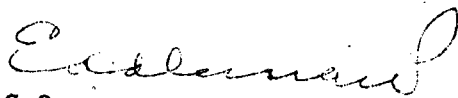

(5) Commanders of all units will insure that troops under their command do not fire at friendly aircraft.

(6) All troops will be briefed on recognition of current operational aircraft. See Appendix 1, Annex 10.

BY COMMAND OF GENERAL KRUEGER:

G. H. DECKER,
Major General, G. S. C.,
Chief of Staff.

OFFICIAL:
