

Leveraging Faceted Search for Project, People, and Socio-Collaborative Experience Discovery

Dr. Donna Cuomo, Krista Kennedy Groenwoldt & Jean Colbert

The MITRE Corporation

Enterprise Search Summit November 2010

Overview

- **Introduce you to MITRE's overall information landscape**
- **Explain why we implemented faceted search**
- **Describe the process changes we are making in order to enhance the data**
- **Demonstrate how we are using faceted search to improve enterprise information relationship discovery**

The MITRE Corporation

- MITRE is a private, not-for-profit organization chartered to work in the public interest
- Founded in 1958 to provide engineering and technical services to the U.S. Air Force
- Manages Federally Funded Research and Development Centers including:
 - Department of Defense
 - Federal Aviation Administration
 - Internal Revenue Service/Department of Veterans Affairs
 - Department of Homeland Security
- Supports a broad and diverse set of sponsors within the U.S. government, as well as internationally

7,000 employees worldwide

Background

NN/g
2010 Best
Intranets
Award

The screenshot shows the MITRE MII Intranet homepage. At the top, there's a navigation bar with links like 'FastDump', 'Phonebook', and 'Search'. Below this, a 'Welcome, Kristina' message is displayed. The main content area features a 'MII Google' search bar, a 'MyMII Menu' with links to 'About MITRE', 'MITRE Strategy', 'Employee Services', etc., and a 'News Center' section with articles like 'Keeping MITRE in the running' and 'Corporate Records Expo'. A 'Phonebook' section is also visible, showing 'Person Information' for Kristina Groenwoldt.

The screenshot shows the Onomim social bookmarking site. It features a search bar, a list of bookmarks with titles like 'Boeing Announces First ScanEagle Reinvestments' and 'Raytheon Submits KillerBee Unmanned Aircraft System Bid to U.S. Navy', and a 'popular tags' section with tags like 'mea news', 'digital libraries', and 'infocollections'. The site also includes a 'recent popular tags' section and a 'legend' for bookmark types.

The screenshot shows the MITRE Communities section. It features a 'Communities' list with entries like 'R305 - Information Management and Practice', 'FastForward', 'Information Architecture', 'MIT Content Team', 'MIT Information Stewards', 'Search Federation Team', 'Webstar', 'MITRE Innovation Program', 'Answers Feedback Blog', 'Information Architecture', 'MIT Services Design for the MFA', 'CI&T User-Centered Design Team', 'SOA Resources Page - BETA', 'MITRE Innovation Program (MIP) Site Redesign', 'CCKS', and 'Web Analytics'. Each entry has a link to 'Show 10 20 All' members.

The screenshot displays the MII Answers web application interface. It features a search bar at the top with filters for 'Fiscal Year: 2010' and 'Populated: true'. The main content area shows search results for 'People' and 'Projects'. The 'People' section lists individuals like Jonathan W. and Michael R. with their roles and affiliations. The 'Projects' section shows a list of projects with details like 'C2C (112)' and 'CIIS (36)'. The interface includes navigation links, a sidebar with filters, and a bottom section with charts and analytics.

Leverages the Endeca Information Discovery Platform

Common Data Model, Structured Data, Entity Extraction, Clustering, Analytics

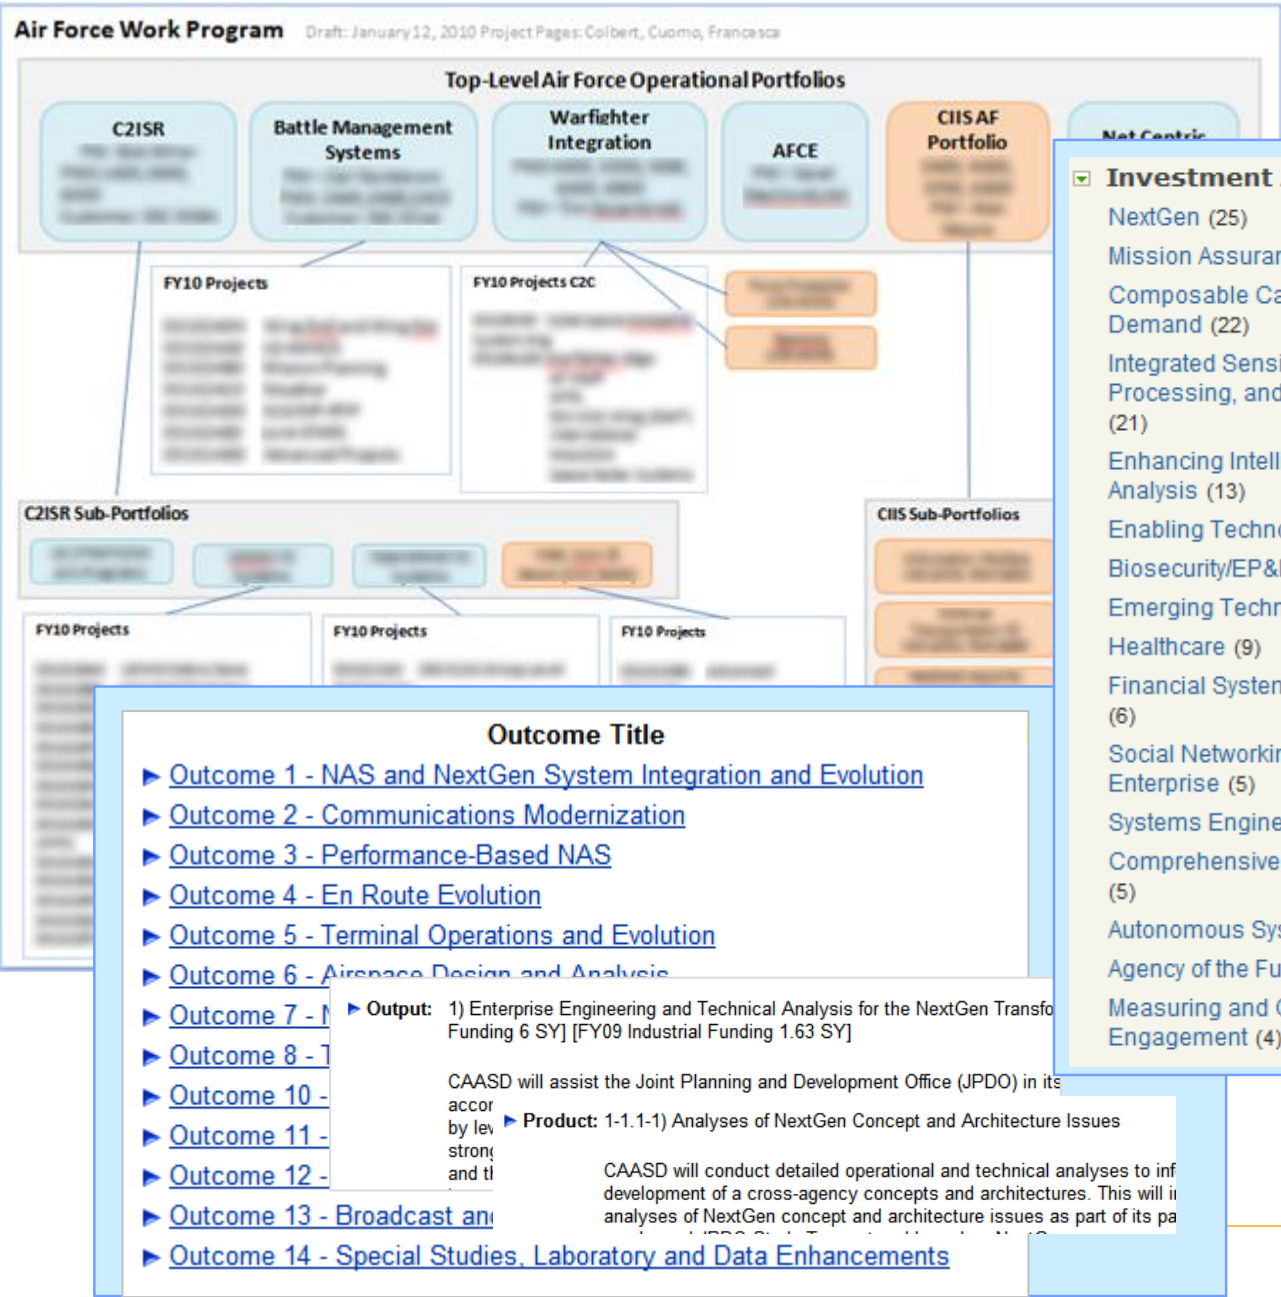

Strategy

- **Better capture and describe key “business assets”**
 - What is the view of our technical work program?
 - What has our technical work program accomplished?
 - What is the view of our technical staff?
 - What has our technical staff accomplished?
- **Identify where we have information but it is not in re-usable form**
 - Restructure business systems and processes to collect this information and make it accessible, do not recollect
- **Put the information into a discovery system**
- **Deploy a social networking platform for partner networking, profile management, and social graphs/relationship capture**
 - Internal and partner (external) social business networking
 - Improved situational awareness to motivate collection
- **Integrate these new elements into existing and planned intranet and partnership network capabilities**

Finding Projects

Portfolio View

Investment Area

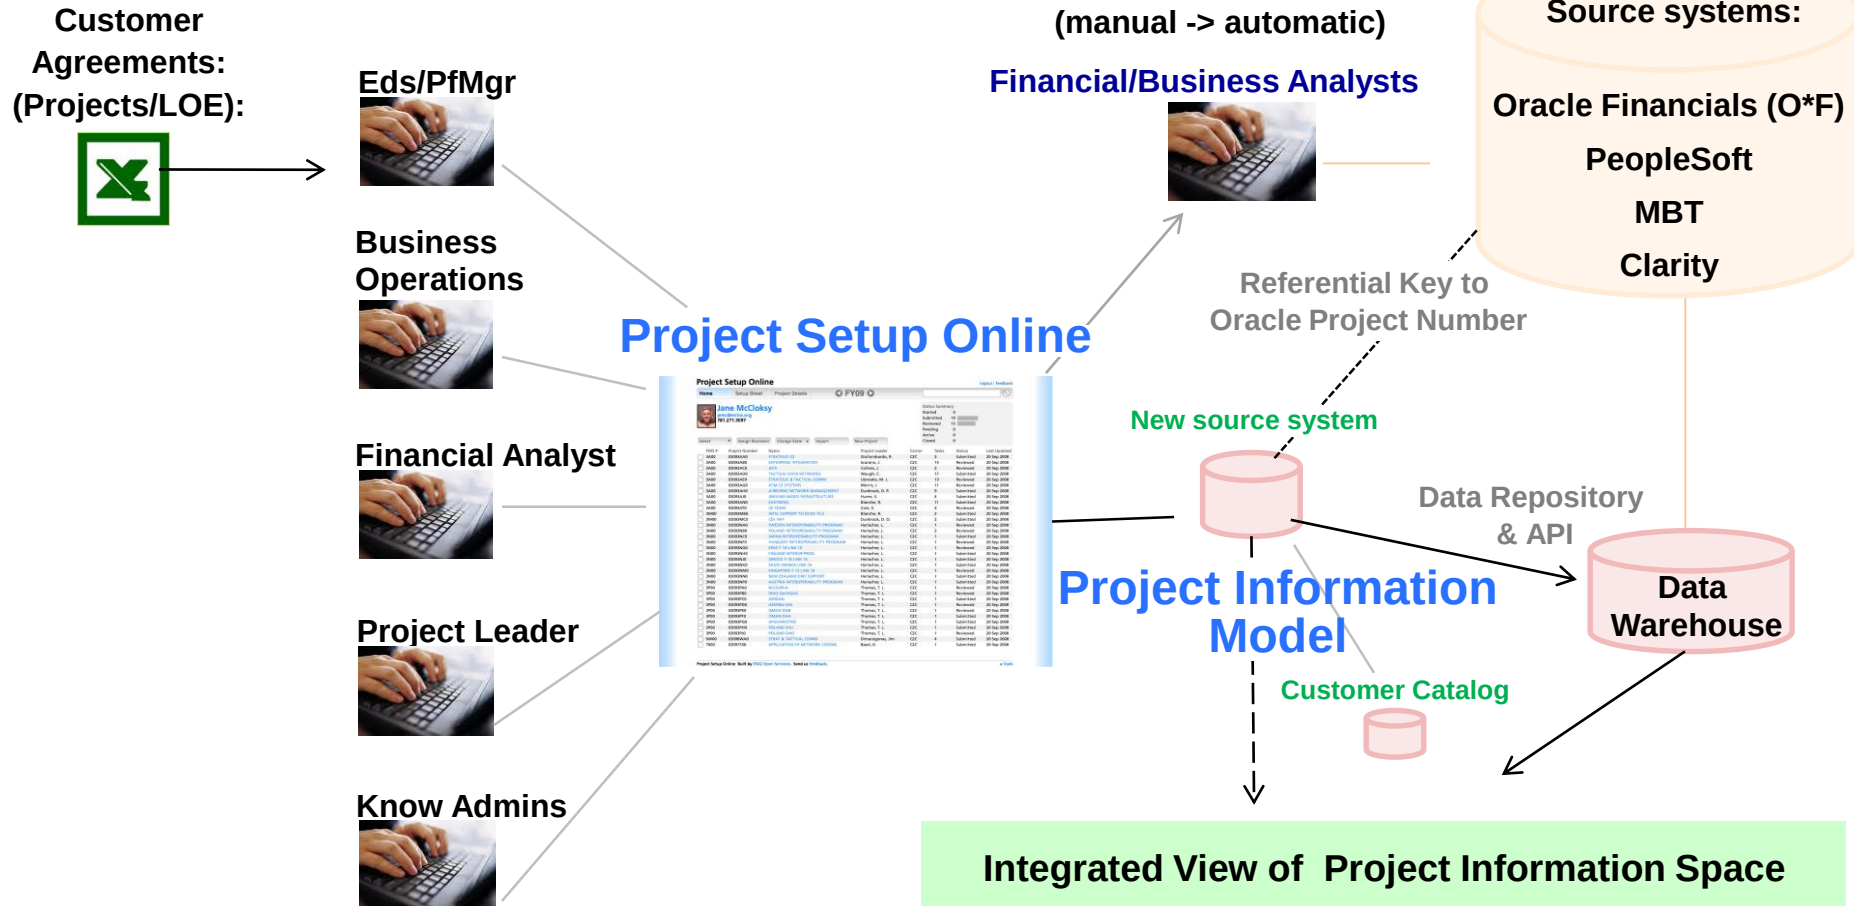

- NextGen (25)
- Mission Assurance (22)
- Composable Capability on Demand (22)
- Integrated Sensing, Processing, and Exploitation (21)
- Enhancing Intelligence Analysis (13)
- Enabling Technologies (12)
- Biosecurity/EP&R (12)
- Emerging Technologies (11)
- Healthcare (9)
- Financial Systems Oversight (6)
- Social Networking for the Enterprise (5)
- Systems Engineering (5)
- Comprehensive Screening (5)
- Autonomous Systems (4)
- Agency of the Future (4)
- Measuring and Guiding Engagement (4)

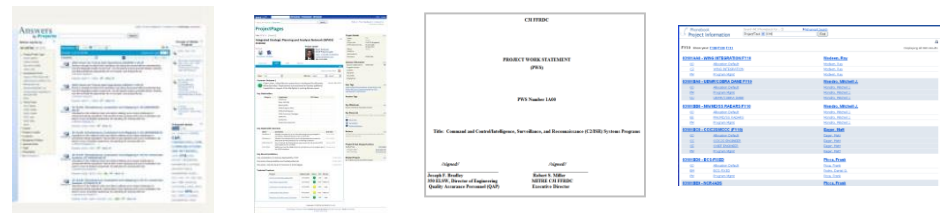

- Author DNA
- Cross-Validation for Mixed-Initiative Annotation
- Discovering Counter-WMD Pressure Points
- Economic Preparation of the Battlespace
- Entity Extraction Markup & Visualization
- Extending Chemical Production Processes to Address Ha Problems
- Intelligence Calibration

"To Be" Process: Data Collected in Source Systems

- Capture Work Program details at time of Project Setup (augment existing process)
- Bring all “actors” together collaboratively by creating Online Project Setup application
- Major step toward & foundation for OHIO

And other downstream business apps:
MRT, Workplan, etc.

Metrics

Task Description

MITRE, like many other enterprise organizations, has redoubled its efforts to facilitate collaboration both internally and with MITRE's customers and sponsors via the use of social media tools. While a number of these tools have had subjective success, it is very difficult to objectively measure this success, as well as to link that success to specific use patterns or behaviors at the individual, group, or project level. This seems to be driven by two primary factors:

As with many social media tools, adoption and establishment of typical use patterns is slow, and the relationship between usage patterns and changes in business processes takes time to emerge. As a result, it takes a long time for a sufficiently large and established user population to develop (which makes it difficult to conduct reliable measurements on the system), and the use patterns that characterize a social media tool early in its lifespan may not be typical of later tool use (so early measurements may not be predictive of later success).

In many cases, appropriate metrics for tying user behavior to project success within an enterprise context simply do not exist. Most social media metrics are designed for a marketing context, and very few track the establishment and maintenance of relationships over time, instead focusing on short term measures like conversion of anonymous users to subscribed users, allowing little assessment of the network effects that tend to be most valuable within a collaborative business context. To address this latter point, we propose to design evaluation methodologies that assess business value over long time periods, and do assessments in areas where critical mass has been achieved. We would also like to better understand what causes "tipping points" to be reached where maximal business value can be realized, and determine how to accelerate these behaviors.

Objective: Clean capture for these data elements for measurement & reporting.

The screenshot displays the MITRE TechStature profile for Beth A. Yost, a Human Factors Eng. Sr ACS. The profile includes a search bar, a profile picture, and a list of tags: CyOC, Data visualization, decision making, Human Computer Interaction, Human Systems Integration, information visualization, Mission Assurance, Tactical Edge, Visualization. The profile is organized into sections: Education (Degrees and Additional Courses), Publications (Books and Articles), Technical Activities (Courses Taught), and Papers. The Education section lists degrees from Virginia Tech and Elon University, along with additional courses at MITRE. The Publications section lists books and articles, including 'The Visual Scalability of Integrated and Multiple View Visualizations for Large, High Resolution Displays' and 'Shaping the Display of the Future: The Effects of Display Size and Curvature on User Performance and Insights'. The Technical Activities section lists courses taught at MITRE. The Papers section lists a paper titled 'Single Complex Glyphs Versus Multiple Simple Glyphs'. The profile also includes a 'Handshake' section with a profile picture, a bio, and a list of connections and groups.

Making Sense of Enterprise Experiences and Relationships

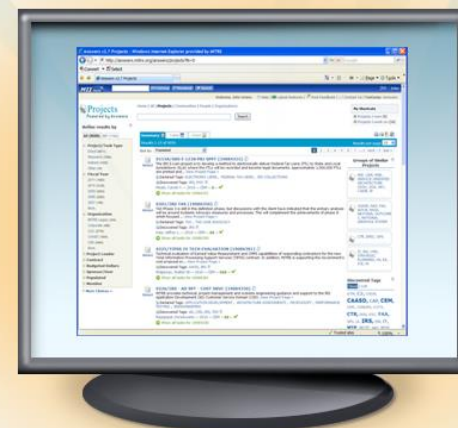

What are we partnering with Lincoln Lab on?

Where are the deliverables for this project?

I need to talk to SMEs in emergency preparedness.

Who knows people in the State Dept?

What communities exist around SOA?

Who has experience leading cloud computing efforts?

Is MITRE working on any other projects for this sponsor?

How do I find projects focusing on similar technologies?

At what conferences did MITRE present papers this year?

Who else would know about this?

What research are we doing in CCOD?

Future Search Landscape

Next MyMII: Connect, Collaborate, Awareness

The screenshot shows the MyMII web application interface. At the top, there is a navigation bar with links for FASTJUMP, PHONEBOOK, SEARCH, TRS, SITE MAP, INDEX, and HELP. Below this is a status bar showing the user's name (John), their status (Timecard incomplete, DTS non-compliant), and a news alert (URGENT NEWS: Washington campus closed due to snow). The main content area is divided into several sections: Headlines, Top News Center Stories, My Connections, My Actions, My Links, My Publishing Spaces, Events/TEMs, and View of the Outside. The My Connections section shows a list of recent posts and updates. The My Actions section shows a list of tasks and actions. The My Links section shows a list of links to various resources. The My Publishing Spaces section shows a list of spaces and groups. The Events/TEMs section shows a calendar of events. The View of the Outside section shows a map and a list of locations. Three callout boxes are overlaid on the right side of the interface, highlighting specific features: 'Integrated search, more "findable" key business objects' points to the search bar; 'Provide quick situational and status updates' points to the My Connections section; and 'Improved situational awareness of your partner and colleague network activities' points to the My Publishing Spaces section.

Integrated search, more "findable" key business objects

Provide quick situational and status updates

Improved situational awareness of your partner and colleague network activities

Next MyMII: Social-Enabled Phonebook

The screenshot shows the MyMII Social-Enabled Phonebook interface. At the top, there's a navigation bar with 'FASTJUMP', 'PHONEBOOK', and 'SEARCH'. Below this, a search bar is present. The main content area is divided into several sections:

- User Profile:** Features a profile picture of Lea Taylor, her name, contact information (phone, email, mobile), and a status update: "Lea is in a development meeting for Answers trying to develop an enterprise search strategy. 51 mins ago". Below the status are links to "Connect to Lea" and "Leave a message for Lea".
- Phonebook:** A tabbed interface with "Tech Stature" selected. It displays employee details for Lea Taylor, including her employee number, location (Bedford, Room 2M142), mailstop, and notification (Working from home on Fridays).
- Additional Information:** A section containing administrative details (Name: Sicard, Mary Lou; Phone: 781-...), job information (Signature Level: Fiscal 0, HR 0; Hire Date: Apr 28, 2008), and organizational details (Center: 01 - Corporate; Division: R300 - Corp Comm & Knowl Srv; Department: R305 - Info. Mgmt. and Practice; Report to Org: R305; Section: 01V635).
- Tags:** A list of tags associated with the user, including "Human Computer Interaction", "Human computer interface (HCI)", "Information Architecture", "Information Design", "Interaction Design", "Project Management", "Scrum", "User Centered Design", "User Experience Design", and "Web Design".
- Project Charges:** A table showing project charges for FY08, FY09, and FY10.
- Availability:** A calendar view showing availability for today and tomorrow.
- Activity:** A list of recent activities, including posts, file uploads, and membership changes.
- Lea's Connections:** A section showing a row of profile pictures of connected users.
- Lea's Publishing Spaces:** A list of publishing spaces, including "Information Architecture", "MITRE Innovation Program", and "KM Home".

Next MyMII: People, Technical Accomplishments/ Profile Info in Phonebook

The screenshot shows the MyMII Phonebook interface. At the top, there's a navigation bar with 'FASTJUMP', 'PHONEBOOK', and 'SEARCH'. A welcome message for John and a security alert 'ALERT! Y2K Virus is back' are visible. The date and time are Friday, February 6, 2008, 11:15 AM EDT. The main content area shows the profile of Lea Taylor, a MITRE employee. Her profile includes a photo, contact information, and a bio. Below the bio, there are tabs for 'Phonebook' and 'Tech Stature'. The 'Tech Stature' tab is active, showing sections for 'About Me', 'Education', 'Experience', 'Technical Activities', 'Professional Activities', and 'Licenses'. The 'About Me' section contains placeholder text. The 'Education' section lists degrees from Bentley University and Villanova University. The 'Experience' section lists roles at MITRE and The Vanguard Group. The 'Technical Activities' section lists prototypes, MIP proposals, and conferences attended. The 'Professional Activities' section lists conferences attended. The 'Licenses' section is empty.
