14. ABSTRACT This document describes the FY 2023 Update to the APHC’s Taxonomy of Injuries (References a-e) and non-injury categorizations used in APHC public health reports. The Taxonomy of Injuries provides categories for injury medical encounters based on causal energy sources (e.g., mechanical, environmental, poisonings, etc.). The injury definition consists of over 13,000 specific medical diagnostic codes from the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM). The other non-injury ICD-CM-10 medical conditions are also categorized for medical utilization reporting (Reference f). Public Health Information Paper (PHIP) No. 12-01-0717: <i>A Taxonomy of Injuries for Public Health Monitoring and Reporting</i> (with Addendum 1, Body Regions and Injury Types, and Addendum 2, FY 2018 Update). https://apps.dtic.mil/docs/citations/AD1039481 a. For transparency, the APHC has annually documented the associated changes to the APHC classification categories and any associated methodology updates (References b-e). The FY23 CDC ICD-10-CM update included a total of 1,522 code changes: 1,240 new codes, 31 revised codes, and 251 deactivated codes. There were 40 new injury diagnosis codes. The updated codes are presented in attached Tables. Unlike prior years, the CDC’s FY23 code updates are not substantial and align with prior APHC categories; all codes aligned with or replaced prior codes established in previous reports. INFORMATION PAPER

MCHB-PH-MIP
18 August 2022

SUBJECT: Fiscal year (FY) 2023 Update to the Army Public Health Center (APHC)
Taxonomy of Injuries

1. Purpose: To document the FY23 Update to the APHC's Taxonomy of Injuries and non-injury categorizations used in APHC public health reports.

2. Facts:

a. Each year the Centers for Disease Control and Prevention (CDC) updates its International Classification of Diseases (ICD) codes for medical encounter documentation. APHC annually reviews the CDC's fiscal year (FY) updates and documents resulting changes to the APHC Taxonomy of Injuries, medical condition classification categories, and associated methodology.

1) In 2018, APHC originally documented the Taxonomy of Injuries in Public Health Information Paper (PHIP) No. 12-01-0717: *A Taxonomy of Injuries for Public Health Monitoring and Reporting* (<https://apps.dtic.mil/docs/citations/AD1039481>). The last update was for FY22 (<https://apps.dtic.mil/sti/citations/AD1150155>).

2) The APHC Taxonomy of Injuries provides categories for injury medical encounters based on causal energy sources (e.g., mechanical, environmental, poisonings, etc.). The injury definition consists of over 13,000 specific medical diagnostic codes from the ICD Tenth Revision, Clinical Modification (ICD-10-CM). The non-injury ICD-10-CM medical conditions are also categorized for medical utilization reporting, such as in the 2021 Health of the Force Report (p. 34-35, <https://phc.amedd.army.mil/topics/campaigns/hof/Pages/default.aspx>).

b. The FY23 CDC ICD-10-CM update included a total of 1,522 code changes: 1,240 new codes, 31 revised codes, and 251 deactivated codes. There were 40 new injury diagnosis codes. Unlike prior years, the CDC's FY23 updates were not substantial so all codes aligned with or replaced prior codes in previous Taxonomy updates.

1) The FY23 updated codes are presented in Tables 1 – 3 in the Enclosure.

2) The complete updated APHC categorized ICD-10-CM and Taxonomy of Injuries spreadsheet is available from: usarmy.apg.medcom-aphc.mbx.injuryprevention@health.mil
